## Durham Predicts Russia Will Suspend A-Tests

By Billy Evans

Russia will agree to suspend nuclear tests, Congressman Carl T. Durham of Chapel Hill, representative of North Carolina's Sixth District, predicted Thursday night during a talk at State.

He based his prediction on the recent intensification of blasts reported within the Russian boundaries. During October, 20 blasts were reported with 3 more bombs being detonated since the beginning of November.

Representative Durham said that the Russians as well as the rest of the world are realizing that increasing the radiation content of the atmosphere cannot continue indefinitely. It was his opinion that the increase in tests indicates that the Russians are seeking to gain as much knowledge as possible before the tests end.

Durham's talk on the peaceful uses of the atom and the Geneva Conference on atomic energy was the third in a series of 12 forum discussions planned for the 1958-59 academic year by the College Union Forum Committee. Previous forums had as their subjects Poland and the International Scene as observed by Dr. Frank P. Graham.

Apologizing for a cold, the remains of a recent attack of influenza, Congressman Durham spoke on the need for the United States and its allies to meet the challenge being offered them by Soviet Russia in the field of atomic energy.

Cooperation between the free nations of the world is necessary, he stated, and the United States should strive to build military and political alliances with the nations of the world.

Reviewing the "atoms-for-peace" program, which was inaugurated in 1953, he told of the good will being created by the more than 40 bilateral agreements with other countries which allows an exchange of information on atomic energy and helps in the training of foreign students in such institutions as State.

Progress is being made for the international control of the atom, he reported, through the creation of an International Atomic Energy Agency which is now two years old and has its headquarters in Geneva.

Durham particularly praised the countries of Western Europe for their steps toward the use of nuclear power plants. He said that during the period 1963-65, six nuclear plants will be built in Europe with a generating capacity of 1,000,000 kilowatts.

He demonstrated the part that the United States is playing in the development of nuclear power by pointing out that the last Congress had voted to go 50-50 with the European governments on such construction and would furnish the nuclear sources required for operation of the reactors.

Durham praised American manufacturers for the part which they played in the recent Geneva conference by contributing fully-manned exhibits on many phases of atomic energy.

Comparing the United States and Russia in the development of nuclear power plants, he said that Russia already has several plants in operation with a generating capacity of 200,000 kilowatts which is comparative to a fairly large steam generating plant and is ahead of present nuclear plants in the United States in capacity.

## AFROTC Offers Flying Program

State is one of over 130 colleges and universities throughout the nation offering a Flying Instruction Program for Air Force ROTC cadets.

Open only to Air Science IV cadets, the program allows the cadets who complete it to bypass pre-flight training upon entering the Air Force on active duty.

The flight training offered includes 35 hours of individual instruction by civilian instructors. Upon completion of the course, the cadets receive a private pilot's license.

Approximately 10 months is required for the men completing the course to earn their wings on active duty. By training qualified Air Force ROTC personnel in the program, the cost of pre-flight training is eliminated from the present cost of training a combat-ready pilot which amounts to \$600,000 per pilot.

## Committee Appointed To Study Fee Allocation

By Vance Roberts

At the last meeting of the S.G. the President, Jimmy Hunt, appointed a special committee to study the Student Activity Fee Allocation.

The purpose of the committee is to study distribution of the \$43 each student pays each

year as part of his tuition.

Phil Carlton, committee chairman, summarizes the purpose of the investigation in the following statement: "We feel that the students who pay \$43 per year on the activity fee have the right to know that the fee is being distributed in the right

amount—to the proper channels. This committee will make an investigation to see whether the recipients of the fee are receiving too much or not enough of the total distribution. The committee will recommend either an increase or a decrease in the present allocations. These hearings are open to the student body and we urge all interested students to attend."

The committee will make a report to the S.G.; and if the report is approved, it will be furthered to the Board of Trustees for their approval. This study will be made by open hearings conducted by the committee. The particular group under investigation will be required to present their financial records for the past 2 or 3 years, so the committee might see how the money has been used in the past.

The first hearing will be held Tuesday at 7 o'clock at the C.U.

The S.G. fee will be the first subjected to the investigation. The following are members of the committee: Phil Carlton, chairman, Scoffer Jordan, Dick Burgess, Bob Brisson, Waring Boys, and S.G. officers are ex-officio members.

The organizations affected by the Student Activity Fee Allocation are the Agromeck, College Union, Intramural Athletics, Physical Education, Student Activities, Student Government, Technician, Tower, WKNC Radio, and Reserve Fund.

Each organization will have advance notification of its appearance before the committee so that it will have time to prepare its records. Also, THE TECHNICIAN will carry an announcement before each investigation so that interested students can be present for the hearings, and the paper will give the final results of the whole student activity fee investigation.

## Campus Crier

The Ag Club will sponsor a stunt night at the next meeting, which will be Tuesday night at 7 p.m. in the College Union Theater. Refreshments and free cigars will be given to all the members who attend the affair.

There will be a DeMolay supper meeting at the college cafeteria on Tuesday at 6 p.m. A business meeting will follow this affair in room 108 of Polk Hall.

The Engineering Mathematics Club will meet Tuesday at 7 p.m. in room 11 of Riddick Hall. The guest speaker for the meeting will be Dr. Robert Herbst, who will speak on "Computer Programming Techniques." All Engineering Math students and any others who are interested are urged to attend this meeting.

There will be a meeting of the Forestry Club on Tuesday at 7 p.m. in room 159 of Kilgore Hall.

There will be a meeting of the A.S.C.E. on Tuesday at 7 p.m. in Mann Hall Auditorium. Mr. Scroggie of the Tennessee Valley Authority will speak at the meeting on "Bridge Design in the TVA." He will also show slides and pictures. All CE and CEC students and their guests are invited. Refreshments will be served.

Agromeck pictures for the following organizations will be taken tonight (Monday), at 8:30 in the College Union: Consolidated University Student Council, the Student Traffic Committee, Orientation Commission, and the Campus Stores Advisory Committee.

## For 'High School Day'

### Plans Materialize

Plans are being completed for the annual "High School Day" on Saturday, December 6.

Student sponsors said that hundreds of juniors and seniors from high schools in the State will visit the campus. During their stay at the college, the students will get a glimpse of the educational opportunities offered by the institution.

Planned tours of the campus will be held between 10 and 12 a.m. and from 2 to 4 p.m. A general meeting will be held in the Coliseum at 1 p.m. Preliminary plans call for Chancellor Carey H. Bostian to present the welcome and for YMCA President Fred Manley of Reidsville to give the invocation.

Registration and information booths for the college's seven

schools will be located at the Coliseum.

Additional programs are being scheduled by the seven schools for the students.

Tickets to the Wake Forest-N. C. State basketball game at 8:15 p.m. in the Coliseum will be distributed to the visitors. A high school section of 2,500 seats is being reserved for the students.

## DeMolay Holds 1st Reg. Nov. Meeting

The N. C. State Chapter, Order of DeMolay, held its first regular meeting of November, Tuesday the 11th.

The chapter has decided to give assistance to some needy family for Christmas. A party, for all DeMolays on the State College campus and their dates, will be held on the weekend prior to leaving for Christmas Holidays. A supper meeting was planned for Tuesday, November 25, at which time all DeMolays will have a room reserved in the College Cafeteria.

Several advisors were in attendance at this meeting and Dad Olan Marks took the chapter charter to be framed. The meeting was closed promptly at 8:00 p.m. in keeping within the one hour limit placed on all meetings.

Anyone interested in DeMolay is requested to go by 108 Polk Hall on second and fourth Tuesdays at 7:00 p.m.

## 'Ice Capades' Features Seven Performances

Seven performances of the "Ice Capades of 1959," billed as "The Greatest Show on Ice," will be presented in the Coliseum on December 9-13.

The 2½-hour production will open its engagement with a full-length show Tuesday, December 9, at 8:30 p.m.

"Ice Capades of 1959" is produced by John H. Harris, noted Hollywood and Pittsburgh theatre executive.

Evening performances will be staged Tuesday, December 9, through Saturday, December 13, at 8:30 each night. Matinees are scheduled for Friday, December 12, at 3:30 and Saturday, December 13, at 2:30 o'clock.

Seats are available in the State College Coliseum for approximately 70,000 people during the five-day stand of Ice Capades in Raleigh.

Drama and entertainment critics who saw Ice Capades during its run this fall in New York's Madison Square Garden unanimously acclaimed the glittering acts and skating artists.

Many of the Ice Capades stars that have made hits in previous performances in the State College Coliseum are cast in featured roles in this year's production.

Big production numbers in Ice Capades are "Les Sylphides," "Salute to the Black Watch," "Snow White and the Seven Dwarfs," "Cavalcade of Hits" spotlighting the most popular musical selections of the last 50 years chosen by America's top disc jockeys; "Anchors Away," "Sampson and Delilah," "Pagliacchia, Faust, and La Boheme."

Coliseum Director Roy B. Clogston said advanced ticket sales to the State College performances of Ice Capades this year have to date surpassed last season's sales at the present stage of the sales campaign but

pointed out that plenty of good seats for all performances still are available at all box offices and through mail order requests.

Box offices are located at the State College Coliseum, Womble, Inc., and Kerr Rexall Drugs in Raleigh; Ellis Stone in Greensboro; Futrelle's Pharmacy in Wilmington; Benders Drug Stores in Fayetteville; and World Wide Travel Agency in Durham.

## Chi Epsilon Initiates Eleven

Eleven civil engineering students were initiated into Chi Epsilon, civil engineering honorary society, Friday night.

The special initiation ceremonies were held in the auditorium of Mann Hall. Fred Moreadith of Raleigh, chapter president, presided over the affair.

Following their initiation, the new members were entertained at a banquet.

They are Charles David Averette of Elizabethtown, junior; David Shelton Brown of Davidson, senior; Ray Howard Gorman of Raleigh, senior; David Bright Hilburn, Jr., of Bladenboro, senior; Andrew John Hutchins of Canton, junior; James Stanley Massey of Winston-Salem, senior; Norman Hagberg Perry of Durham, senior; Jack Kenneth Poplin of Norwood, junior; Donald Robert Rummier of Cheraw, S. C., senior; Larry Baxter Smith of Marshville, junior; and Albert E. Stone, Jr., of Raleigh, senior.

Other officers of Chi Epsilon are John Anderson of Greensboro, vice president; Bill Kay of Red Springs, secretary; Jan Jansen of Asheville, treasurer; and Frank Scarpa of Raleigh, publications editor. Dr. M. E. Uyanick, professor of civil engineering, is chapter adviser.

TOP STAFF MEMBERS OF N. C. STATE RADIO STATION—Heading the activities of WKNC, the student radio station at North Carolina State College, are the students pictured above. Left to right: Ed Finch of Bailey, station manager; Mike Graham of Winston-Salem, sales director; and John Sprinkle of Route 1, Winston-Salem, business manager.

## A Sports Story

The football season is over for State . . . but the statistics and the win-loss figures will never tell the human story of this year's team and its great coach.

As Earle Edwards openly admits, this has been his most frustrating year (see page 3), but we are proud of him and his team for the truly fine fighting spirit which they have maintained despite terrific setbacks.

In addition to the physical losses, our team and coach have had to endure insult and gross examples of bad sportsmanship from other schools and their coaches.

The most striking example of poor sportsmanship comes from Chapel Hill's own Jim Tatum . . . who somehow charms the newspapers, the radio, the students and faculty at the Hill, and the University administration into ignoring his blatant violation of both the written and unwritten rules.

Quite recently, Tatum brought up the question of eligibility of one of State's players . . . thinly disguising the move by saying he only wanted to do a favor for Earle Edwards. It is interesting to note that if the player had been declared ineligible, State's victory over Carolina would have been forfeited and Carolina could have won the ACC title by beating Duke Saturday. However, Tatum weakly denied any intention of stealing the ACC title, lowering himself to an unprecedented level by saying, "I don't want to cheapen Clemson's championship, but it doesn't mean much this year anyway."

How Carolina can continue to be the darling of the North Carolina sports world is beyond reason. Jim Tatum must have power, prestige, and influence far beyond our previous guesses . . . and a whole lot of alumni in high position whose main concern is victory and glory on the football field and a philosophy that the end justifies the means.

—RL

## Fee Investigations

Starting Tuesday, November 25, we will all have the opportunity of delving into the manner in which our activities fee is spent . . . or misspent.

Student Government is performing a valuable service to the campus by reconsidering the allocation of our fee money; and we can all appreciate that the hearings will be open to the whole student body (see page 1). For many years students have wondered, sometimes suspiciously, about fee allocation. In these open hearings, anybody interested can learn the details of each organization's spending.

The purpose of these hearings is not necessarily to take appropriations away from any group but rather to determine which groups have an excess appropriation and which groups need more money to continue operating effectively.

Attend as many of these hearings as you can. We will announce each meeting, the organization to be investigated, and in the end the results of the investigation.

—RL

## LITTLE MAN ON CAMPUS

BY DICK BIBLER

"I REFUSE YOUR QUESTION ON TH' GROUNDS MY ANSWER MAY TEND TO INCRIMINATE ME."

## Greeks On Campus

By Bill Marley

Since the merchants of Raleigh have already spread their "cloaks of Christmas" and started the ball rolling toward the yuletide season, now seems to be the appropriate time to give a little more information on the Greeks' Christmas program.

The date for the Christmas parties for the orphans and underprivileged children has been changed. The new date is December 12, Friday night. The IFC's budget for the parties is approximately \$325, covering cost of refreshments and gifts for the children. There will be an IFC Santa Claus who will distribute the individual gifts.

Each fraternity is responsible for the preparation of games and entertainment. I am sure that both fraternity and non-fraternity men will all agree that this is an excellent way in which to share what we are so

fortunate to have with those who have so little.

\* \* \*

Word has gotten around that some of the fraternities have been abusing other fraternities' pledges by taking them on little one way "excursions" to out of the way places. Gentlemen, this is not an action of a true fraternity man . . . so let's grow up and act according to those principles upon which your fraternity and all fraternities are founded.

\* \* \*

A reminder about scholarship. Last year all eighteen fraternities at State were above the all men's average and since final exams are in the near future, concentrated effort would be in order so that we can maintain this fine record.

Make the best of the few short days we have for Thanksgiving because the "factory" will be here when you return.

Worked on it all night? I don't care. . . . I still don't like it

By Irving Glick

This drawing might be called a one-picture description of life in the School of Design. Since it's of no use, boys, why not go home and get a good night's rest, and give Watauga Dorm a chance to know what night really looks like.

The drawing is the work of Peter Breughel and was done some time around 1550. The art-

ist is probably Breughel himself, while the Patron could be any non-understanding, unsympathetic onlooker.

For those interested in seeing first hand some of the all-night efforts of the School of Design, I recommend the Art Auction which will take place in the C.U. ballroom on December 1 from 7:30 p.m. on. It's a good place to pick up a good painting at a reasonable price.

## Letter to the Editor

To the Editor:

Criticisms and counter-criticisms have appeared in your editorials as well as in the letters to the editor regarding the English speaking abilities of foreign instructors at this institution.

In my opinion most of these comments represent the extremist viewpoint. While it is true that some of the foreign instructors have displayed a poor English speaking ability it must be admitted in all fairness that most of them can express themselves in a reasonably understandable way with quite a few of them exercising a mastery control over the language. The general statement that "foreign instructors create a first-grade problem in speaking English" is a very sweeping remark.

Also without any weight is the remark of a foreign professor that the language being spoken in North Carolina has little to do with English. However, it should be understood that there are certain American slangs which are foreign to Englishmen, Australians, and other English speaking peoples of the world. This situation is further complicated by the fact that southerners have a typical accent of their own and the average southerner who has little or no contact with other English speaking people of the different parts of this country as well as of other countries finds trouble

in understanding the accents different from his own.

The same is true for the foreigners who come to the South only to discover slangs and accents which he did not come across before during his whole English speaking experience. This is the point where arises the need for cultural and educational exchanges between different countries of the world. Such programs do remove the wide differences among men in various spheres of cultural life and do help to promote international understanding which is so vital today.

That is the main reason why the government of the United States in collaboration with other governments has undertaken an extensive program of International Educational Exchange which permits the students and teachers of one country to study or teach in a different country.

In view of these facts, it would appear while the foreign instructors should endeavor to adapt American ways of speech, the students should realize that contact with English speaking foreigners would give them, if nothing else, valuable experience in learning the ways of speech popular in other parts of the world. This experience may not bear any fruits immediately, but one day it may become useful when you happen to visit a foreign country.

S. B. Hasnain

## "Teaching-by-Ear" Cited As Having Little Worth

Editor's Note:

As a follow up on our series of articles and editorials on the need for good, experienced teachers in college, we are presenting the following excerpts taken from an article called "Teaching - by - ear" by Dr. Brown, a former college president. This material was given us by Dr. Scarborough of the Agricultural Education Department.

"In all probability there are great teachers who were born great teachers, and the genius of great teaching being within them, they flowered without the instruction or the normal aids for learning a craft or an art.

"But most teaching-by-ear is bad teaching. And much teaching-by-ear could become better teaching with attention to the techniques of teaching. There is curious irony in the fact that a young man or woman may not teach in a public high school in the U.S.A. without subjecting himself to a series of educational courses including practice teaching and observation. How-

ever, that same young man or woman, if he has a degree in his field of specialization, may teach in a college without ever having been exposed to a course in the history of education, the principles of educational psychology, or the methods of teaching his particular subject matter.

"Many of us . . . would like to urge that those preparing for college teaching recognize that college teaching, like high school teaching, is both a craft and an art. Granted that the first prerequisite is the mastery of the subject matter to be presented. But granted, also, that mastery of subject matter alone is no assurance of successful teaching.

"The graduate student, by example, is brought to a conclusion of prejudice toward all education courses. He fails to realize that what he counts sacred is the warped judgment that all that matters in the complex process of education are his daily doses of beloved subject matter . . . enthusiastically delivered to young throats, tensed to receive the dosage."

## Coach Edwards . . . "My Most Frustrating Year"

By Bill Hensley

Many years from now, when Earle Edwards is writing his memoirs, he will have an entire chapter on the 1958 North Carolina State football team.

"This has been my most frustrating year in coaching," the Wolfpack coach said frankly, "but I'll tell you one thing. I couldn't be more proud of this team if we were undefeated."

Edwards says he has nothing but praise for this year's team. "If our misfortune were written in story form, people would reject it as being too fantastic. Nevertheless, it's true."

Edwards said that week after week the team had new obstacles to overcome. "Yet they always met the challenge head on and never became discouraged," he said. "I have nothing but sincere admiration for a team like that."

For the unenlightened, the Wolfpack has lost 14 players this year who figured prominently in the pre-season plans. Of the losses, seven were from the first team, six from the second and one from the third.

"When our losses became more staggering," Edwards continued, "we were afraid that some team might run away with us. It would have been easy for the boys to suffer a complete

loss of morale and give up. But they haven't done that. All our troubles made the players try that much harder. A good spirit was always prevalent.

"The toughest thing about a season like this is to the players," the State coach went on. "A fine prospect like Jim D'Antonio played briefly in two games and broke his leg. That cost him a year of eligibility and a chance to gain a lot of valuable experience."

"And look at the situation of left ends Jim Tapp and Dick Drexler. Both are sophomores this year and we had planned to bring them along slowly, playing them sparingly. As it turned out, both have found themselves in the starting lineup."

"Of course there are others. Boys like Jim Crain seem to be hit the hardest. Crain was a starter and was playing his last year of college ball. He was hurt at mid-season and watched the rest of his career from the sidelines. That's the pathetic part of all this."

With the 1958 season all over, the Wolfpack's record for the year stands at 2-7-1 . . . five games were lost by the margin of one touchdown and the other two were by two touchdowns.

"The record book won't show that this is a fine team," coach Edwards concluded, "but in my book it's a great one."

## Wolfpack Ends 1958 Grid Season With 12-7 Loss To South Carolina

The State College Wolfpack brought to a close its 1958 football season Saturday in a 12-7 loss to the Gamecocks of South Carolina. The depth-shy State squad, riddled by injuries this year, ended the season with a 2-7-1 record. The bowl-hopeful Gamecocks are now 6-3 for the season.

Struggling behind a 12-0 deficit in the final quarter, the Wolfpack drove for 88 yards and its lone score. In the final period, the State squad came to life and dominated the final minutes of play.

The first score of the game came with just 22 seconds left in the first half. The Gamecocks had possession of the ball on the State 36. With just seconds remaining, the South Carolina quarterback handed off to Hawkins, who swept around his left end and dashed for the 36 yards, and scored standing up. A two-point conversion was stopped by Arnold Nelson, and the half-time score stood at 6-0.

After the half, the South Carolina squad held the Wolfpack after the kickoff, and on fourth down Trowbridge was forced to punt. Having to leap high for the pass from center, Trowbridge barely got his kick away, and it went for only 13 yards

to the State 37. From here the Gamecocks quickly struck for their second touchdown. Saunders went over from the two to make the score 12-0. Again a two-point conversion was no good, and the score remained 12-0.

Late in the final period, State gained possession on its 12 yard line and started its only scoring drive of the day. Depending on his aerials for most of the yardage, quarterback Frank Cackovic ended the drive with a five yard pass to Randy Harrell and the score. John Lawrence boot-

ed the extra point with 3:42 remaining in the game.

With a little over two minutes left in the game, State was afforded a scoring opportunity when Bob Pepe stole the ball from the Gamecock fullback, John Saunders. A 15 yard personal-foul penalty put the ball on the Gamecock 35, another break for the Wolfpack. All this proved to no avail as on the next play, Gamecock end Jerry Frye rushed through to spill the Pack for a 14 yard loss. After this the State squad was unable to advance the ball, and the game ended 12-7.

### ATHLETE OF THE WEEK

Frank Cackovic . . . 5-11, 166 pounds, a senior of Steelton, Pa. The Wolfpack's starting quarterback accounted for 116 yards in Saturday's game with his aerials. Completing 10 of 20 attempts, Cackovic depended on his aerial attack to account for half the entire yardage and the lone State score.

## N. C. State Student Affairs Bulletin

**ALL STUDENTS**—The North Carolina State College Men's Club will perform Thanksgiving Day, November 27, under the direction of Neil Leonard, on WRAL-TV (Channel 5) from 1:30 p.m. until 2:00 p.m.

**OFF-CAMPUS STUDENTS**—The College Union directories are now available and may be picked up at the C. U. Main Desk. Students are reminded that the directories are not to be sold or given to anyone.

**STUDENT INSURANCE I-D CARDS** were not issued this year by the company. Anyone who wishes to make sure that he is enrolled may do so by calling at the College Infirmary or by telephoning Miss Bridges, TE 29969, (single student insurance) or Miss Taylor, TE 20367, (married student insurance).

**REPORT ON WITHDRAWALS**—In the face of a rumor that withdrawals are greater this year than last, it is of interest that an actual check of withdrawal records shows that fewer students have withdrawn to date than was true at the same time last year.

**FOREIGN STUDENTS** who plan to spend the Christmas Holidays in Miami, Washington, New York City or other places might be interested in picking up some information from the Foreign Student Adviser's Office (secretary, Mrs. Maus, 236-1911 Bldg.) regarding programs specifically designed for foreign students and where they might secure reasonable housing.

**U. S. AIR FORCE CADET SELECTION TEAM** will be in the Student Union Dec. 1-3, between 9:00 a.m. and 4:00 p.m., to interview and counsel students interested in applying for pilot or navigator training. **HAPPY THANKSGIVING HOLIDAYS**

## N. C. State Plans Special Courses

N. C. State College is one of 11 institutions planning "short courses" in warm air heating and air conditioning during 1959.

George Boeddener, managing director of the National Warm Air Heating and Air Conditioning Association of Cleveland, Ohio, reported that the course at State College will begin on February 16 and end on February 19.

He said the series of courses gives dealer-contractors an opportunity to "invest in the future of their business and reduce costs by learning the right and best way to size and install a system."

The short course series will

cover subjects affecting manufacturers, wholesalers, architects and builders as well as the warm air heating and air conditioning dealer-contractors.

**Y'ALL COME . . . TO THE  
Thanksgiving  
Sports Car Hill Climb  
Nov. 29 & 30**

The region's best sports car drivers pit their skill in fierce competition at Chimney Rock Park in the Thanksgiving Sports Car Hill Climb. The course, one of the best in the country, boasts 18 tortuous turns and an 8% grade in its 2 3/4 miles, with a rise of 1,100 feet in elevation.

Favorite sports car models will be featured, Alfa Romeo, Lotus and Moserati cars are expected. Skill, technique, and the response of the car determine the winner Thanksgiving weekend at Chimney Rock Park.

# Industrial Program Expands Scope

Recent developments in the work of N. C. State College's Industrial Experimental Program have expanded the scope of the Program's activities.

This was reported Wednesday afternoon at the annual fall meeting of the Program's Advisory Committee by Dr. W. C. Bell, program head.

"The Industrial Experimental Program is doing more and more liaison work to bring together various industrial groups throughout the State to discuss mutual problems," said Dr. Bell. The nine-member group, which

met for a business session at the School of Engineering following a noon luncheon, reviewed and evaluated ten major areas of activities conducted by the Program. John Truitt, of Greensboro presided at the meeting.

Among these areas were natural resources utilization, preventative maintenance for in-

dustry, safe transit and packaging for industry, in-plant technician training aids, industrial boiler operations, and industrial engineering applications.

In addition, it was announced that the Program now has available for industry in North Carolina a complete film series entitled "Keys to Productivity". These industrial training films cover supervision and industrial relations, engineering, economics, and safety. The Advisory Committee were shown a safety film during the session as an example of what type films are available to industry upon request.
