## 'Beats Burning in Effigy' -- Edwards As Students Honor Coach and Team

Edwards Given 'Effigy' as Statemen Rave On

### Football Coach Caught By Surprise At Home

By Roy Lathrop

Tuesday night, about 9:30 p.m., some six hundred State students marched noisily to the home of head football coach Earle Edwards. They were there to honor both a coach and a team for outstanding spirit and determination.

The march started up around Bagwell and gained momentum as the crowd of yelling, banner-waving, torch-bearing students swept down Dunn Avenue, gathering strength as they passed the long line of dormitories. In the midst of the crowd rode the life-size effigy of Earle Edwards, in the back of a truck swarming with male and female students.

The herd next ran into Hillsboro and then onto Dixie Trail where the coach resides. Ahead of the crowd, as always, was our own Banks C. Talley, Director of Student Activities, to keep a watchful eye on the orderly proceedings. Also arriving early were mobile units from the radio and TV stations, getting their equipment ready. Several photographers from various publications were on hand to record the event, including "Rudy" Skip Kugler of THE TECHNICIAN.

Finally, the crowd of cheering, singing students, accompanied by part of the N. C.

State College Band, converged on Edwards' home. The coach, somewhat puzzled, came out on the porch, pulling on a coat. He was overheard saying to a nearby student, "... somebody brief me on what is happening." He might well have thought the crowd was going to either hang or burn him in effigy, if he had taken recent happenings at Duke and Wake Forest as an indicator.

His fears were quickly allayed when a student came up on the porch and presented the dummy, dressed in typical practice suit and red cap, as a tribute to the team and coach who experienced such disastrous losses during the season.

Edwards was obviously touched by the display of confidence, saying, "This sure beats burning in effigy" and "I can't tell you how much this will mean to the coaching staff and team."

After several off-key choruses of "He's a Jolly Good Fellow," pitched by tenor Bob Kennel, and a few more cheers, the crowd dispersed to "let the coach get some sleep," expending their remaining energy on a downtown march.

This is the only instance known where a coach was honored in effigy, a decided improvement on the usual method of effigy handling by other schools.

Flood of Students Hits Tucker for New Recruits

## SG Investigates CU

By Roger Faulkner

The Student Government special committee to investigate student activity fees opened its second open hearing on Tuesday, December 9, at 7:00 p.m. to investigate the fee allocations to the College Union.

Chairman Phil Carlton opened the hearing, and again stressed the fact that the committee is merely to determine where the fees go and if they are used wisely. Dick Heaton, accountant for the Union, presented the overall budget, and the committee and visitors discussed it with Mr. Heaton.

The fact was brought out that if the time spent by the Union workers in purely social, cultural, non-revenue producing activities were translated into dollars and cents it would come to approximately \$31,375.

The general expenses were said to encompass such things as office expenses, postage, operation of the paddy wagon, juke box, painting the sign on the student government office door, clearing bad checks, etc. The item called Reserves-Future Replacement of Fixed Assets was said to be actually running below what economists would dictate. It was explained that this was the only item that could be "toyed" with; one could leave a frayed rug on the floor just a little longer than it should be.

Paul Essex, President of the G. U., then presented a detailed budget of the Social Program and proceeded to expound about it and answer questions put to him. Among the items discussed were the \$275 allocated to spe-

cial dance lessons, the free movies which everyone doesn't attend, professional entertainment in the Theater Committee, and especially the \$234 offered in prizes in two photographic contests in which only about thirty participate in each section.

S. G. President Jimmy Hunt said then, "You know that the committee will make a recommendation concerning the fee allocation at the end of the total investigation. Tell us, then, is fifteen dollars per student the best amount? Do you think it should be increased? Could you do on less?"

Paul Essex replied, "We're now operating on the limit of our budget. We have one of the best College Unions in the nation and we're generally recognized as being the best in the South, and yet we're operating under the cost per student of the average Union. The average is about sixteen and a half dollars per student."

Mr. Hunt then said, "What would you like us to recommend?" Gerald Erdahl, the College Union director, then replied, "If money weren't tight I'd recommend a five dollar or so increase but I would hesitate to make a recommendation at the present time."

The hearing was then concluded, and afterwards Chairman Phil Carlton gave a statement concerning the visitors to the hearing: "I was very pleased by the participation of those guests who attended, but was disappointed by the small number present." There were 14 visitors present.

## Nominations For Blue Key Membership Close Friday

Nominations for membership to Blue Key, the national junior leadership fraternity, are now being accepted and will be accepted through Friday, December 12.

Leadership ability as displayed here on campus is the primary criterion for membership in Blue Key. For the greater part, this leadership ability is graded by the student's activities here at State. There is a place on the nomination blanks for a listing of a student's activities.

Whether or not a person is a member of the student body or the faculty, or whether or not he is a member of Blue Key, he may make a nomination. A student may also nominate himself.

Nomination blanks may be picked up at either the main

desk of the College Union, the Y.M.C.A., or in the Student Activities office in Holladay Hall. All blanks must be turned in by 5:00 p.m., Friday, December 12, at any of the places mentioned above.

### -Notice-

A mistake was printed in THE TECHNICIAN concerning the date when spring term tuition and fees are due. The following is a correction of this error:

All students now enrolled will receive, prior to January 10, bills for spring term tuition and fees. PAYMENTS SHOULD BE MAILED TO THE BUSINESS OFFICE NOT LATER THAN JANUARY 20. STUDENTS WHO FAIL TO MEET THIS SCHEDULE MAY BE DELAYED AND INCONVENIENCED AT REGISTRATION TIME. For many years students at State College had to stand in long lines in order to pay their bills on registration day. The pre-paying system was established so that students could complete registration with the minimum of difficulty and delay. All students who make payments according to this schedule should be able to pick up Permits to Register and register as scheduled. Permits to Register will not be issued until payment has been made.

## Phi Eta Sigma Initiates Two

Phi Eta Sigma, freshman honor fraternity at State College held its fall initiation ceremony on Thursday, December 4, in the College Union Theater.

New members initiated into the fraternity were David Cooper of Cary, a sophomore in Chemical Engineering, and Joseph Allen Huggins of Wilmington, also a sophomore in Chemical Engineering.

## State Student Assembly Begins Today At Capitol

By Jim Moore

Representatives from twenty-one of North Carolina's colleges and universities arrived in Raleigh early today for the opening session of the annual State Student Legislature, which began this afternoon in the State Capitol Building.

The opening session this afternoon was a general assembly which convened at 2:30 p.m. The main address of this assembly was delivered by Gov. Luther Hodges. Also included on the agenda for this afternoon's session was the election of the Speaker of the House and the President of the Senate.

During the Friday and Saturday sessions, the major item of business will be the presentation of resolutions by the different member institutions.

The primary purpose for representatives of all of the major colleges and universities in the State gathering each year for a discussion of the most pertinent problems of the day is relatively simple. This is the way that the students of today can show the people of the State that they are on the threshold of maturity and that they are anxious to be taught the necessary fundamentals in representative government.

The State College delegation, headed by Eddie Knox, prepared one bill concerning the minimum wage law before the Assembly began. The main component of this bill is a law which would make it compulsory for all employers to pay a minimum wage to their employees of \$1.00 per hour.

This bill will be presented in the Senate by Tom Gilmore and in the House by Phil Carlton. The only other concrete plan that the State delegation had before the Legislature began was that of running Dick Burgess for Speaker of the House. (At the time THE TECHNICIAN went to press, the results of the Thursday afternoon elections were not complete. In the December 15 issue, a resume of the complete Legislature will be given, including the results of elections and proposed bills.)

There will be door prizes for adults and children. Santa Claus will be present with favors and goodies for the kids. Also appearing will be the Chapel Accordionist, Lillian Trimble, who will render Christmas music.

Pat Walker, Chairman of the Christmas party will appreciate a call from anyone who is interested in helping to serve. She can be reached at TE 2-6964 after 6 p.m.

## Vetville Plans Christmas Party

Saturday, December 13, 1958 the Vetville Council is sponsoring a Christmas party at Fairmont Methodist Church Fellowship Hall on Clark Avenue for all residents of Vetville. The Party will begin at 5 p.m. and will be a Pot Luck supper.

All residents who told their Alderman they would attend are requested to bring the following food: Ward 1, one fried chicken and one quart of baked beans; Ward 2, one fried chicken and two dozen rolls; Ward 3, one fried chicken and one quart baked beans; Ward 4, one cake and relish dish (pickles, etc.); Ward 5, one fried chicken and one large double bag potato chips; Ward 6, one fried chicken and one quart baked beans; Ward 7, one fried chicken and two dozen rolls.

There will be door prizes for adults and children. Santa Claus will be present with favors and goodies for the kids. Also appearing will be the Chapel Accordionist, Lillian Trimble, who will render Christmas music.

Pat Walker, Chairman of the Christmas party will appreciate a call from anyone who is interested in helping to serve. She can be reached at TE 2-6964 after 6 p.m.

# Raison d'etre

In an almost unprecedented move of spontaneous school spirit, hundreds of State students marched out to Earle Edwards' home Tuesday night . . . waving banners . . . singing . . . cheering . . . band playing . . . torches burning . . . cameras flashing.

With them, they carried a dummy of Edwards, red cap and all . . . not to hang in effigy but to present to a coach who had won the admiration of the whole campus by his spirit and character. Banners proclaimed our coach is *not* a dummy, but rather is "the best."

The most amazing part of it all lies in the fact that State had a very bad football season . . . with few wins to compensate for the awful luck and many losses. Yet the students proved that winning is not the most important consideration after all, by paying honor to a coach whose behavior has won the respect of the entire Atlantic Coast Conference.

The subject of school spirit has been worn out by tiresome repetition. After Tuesday night, we no longer have to question our spirit's existence . . . we only hope for more men like Earle Edwards and his team to call it forth.

—RL

# Just Hot Air

Tuesday night was an interesting night all around. On that night, Student Government continued its investigation of student fee allocation by delving into College Union finances . . . and nobody showed up.

To be specific, there were twenty-seven people at the hearing . . . thirteen of these were on the program in one way or another, while the remaining fourteen consisted mainly of S.G. and C.U. committee members.

We would not be so optimistic as to say that everybody read *The Technician*, but for the several thousand who did read it last Monday there was ample publicity of the College Union investigation. And Student Government had thought, as we, that there would be a large turnout . . . since there is scarcely a student here who has not griped about the fifteen dollar fee.

Petty, apathetic, lethargic . . . these words aptly describe those who grumble but are too irresponsible to discover the cause of their irritation, real or imagined.

We urge the few of you who are interested in an organization which annually makes and spends one quarter million dollars to read the story on page one concerning the investigation, and then to look at a break down of the budget on page seven. Here, many of your questions will be answered; many more would have been answered had you attended the hearing . . . and heard the smooth explanation of the C.U. officers and staff.

We will be interested in the final report of the S.G. investigating committee, and will defer comment until that time. Bore you or not, we will discuss the report, for we are not satisfied with the effortless explanations heard Tuesday night.

"SERIOUSLY, NOW WORTHAL, WHAT WOULD YOU REALLY LIKE FOR CHRISTMAS?"

# WAY OUT . . .

with John Cocke

Now I want you all to know that I am not antisocial. Not in the least. Yet there comes a point when I can no longer go on with anything. The other night I was at a party in Chapel Hill. My date was a Raleigh girl, so I won't embarrass her by saying what school she was from or whether or not she was a working girl.

Anyway, we were at this party at a fraternity house and had gone downstairs to the bar and were standing around trying to find something to say. She was fingering the clasp on her handbag and looking out through the window at the rain. Finally she said, "Ooh look, it's raining!" Well as I said, it really was, and had been for several hours.

Then I said, "Sure is," and there was another long silence. Then, "What time do you have to be in?" Actually I already knew.

"Before twelve," she said. "Oh," I said. After a while somebody a few feet away slid

off a stool and hit the floor with a solid crash. He just lay there with his mouth open and liquor all over the front of his suit.

My friend jumped back with an extremely amazed look on her face. "Ooh," she said. "What's wrong with him?"

"This, dearie, is Chapel Hill."

Again the amazed look. "What do you mean? Of course it is!"

I turned away and groaned heavily. She actually meant it. She really did. I said, "Oh skip it. It's all a little too deep for you."

"Well you don't have to be sarcastic about it. You're not being too mature about it all."

Oh my God, I thought. A *psychologist*, too. Then I tried to channel things off in another direction: "Say, what do you think about all these moon rockets we've been launching. Think we'll ever get there?"

She thought for a minute, obviously a painful process. Then she said, "Well gee, I don't know. How could I know about that?" Well of course she couldn't figure it out for a fact. I mean she wasn't a scientist or anything like that, but at least she might have made a guess.

Then I started looking out the window too. There was nothing there but it began to be pretty absorbing. Finally a car drove by, its lights shining momentarily on the garbage cans just outside. Good place for her. In there with all the orange peelings and decaying meat and old gin bottles.

After an eternity the thought came to mind that all of my Raleigh dates for the past few months had been like that. Hell, the past few years. And all of them thinking and talking of nothing but Lawrence Welk and how nice everything was and what wonderful things parties were and how they loved people.

But maybe that's the way things will always be, with everybody hiding what they really think or not being able to say it anyway.

But to say that people in general are ignorant or hypocritical or secretive would not be true. If everyone is stupid, then no one is stupid; for all we have to compare with them are our own ideals. And ideals are constructions of the mind. It's all relative.

## Campus Cosmo

# It Really Ain't All Bad

By Chuck Lombard

I guess every college newspaperman secretly dreams of his "big story," the one where he puts the finger on corruption in student government, embezzlement of the College Union watermelon fund, or the behind-closed-doors love affair of the dean and his student stenographer. But alas, such stories only appear in our dreams.

What we really must deal with is not dishonesty or even immorality; but rather waste, intolerance, and perhaps a little stupidity.

Whatever the shortcomings of the College Union programs may be, the very irrational attitude propagated by many campus citizens—that whatever it is, if it's at the C.U., it's bound to be bad—is perhaps responsible for a very disappointing situation which currently exists here.

The Forum Committee of the C.U. has undertaken a very ambitious program this year. The committee has already sponsored

lectures by such interesting men as N. C. Congressman Carl Durham, Chairman of the Joint Congressional Committee on Atomic Energy. It was fortunate for Congressman Durham that the C.U. has nice. He always enjoys having a big audience.

Throughout the rest of the year, The Forum Committee will sponsor a lecture approximately every two weeks. Coming, will be Admiral Hyman Rickover, Senator Estes Kefauver, editor and humorist Harry Golden, as well as local men of import and foreign dignitaries.

Because of the relatively small budget that the Forum Committee must work on, these prominent speakers are essentially doing us a favor to come here, we paying them little more than traveling expenses. This is perhaps the most practical reason for our exhibiting good attendance at these events. It is certain that we cannot continue to ask favors, repay those favors with acute disinterest, and expect to continue to hold the respect of this group of people.

## Letters to the Editor

To the Editor:

Our Student Government President finally has found something to shout about. Something to shout about so loud that now he believes he has something that will make each and every student think that we have an active Student Government. On the contrary, it is the most lax.

Definitely I am interested in where and how my activity fee is being employed. However, I consider it entirely sufficient with just a list of how my fee is being used. Then, if I have any complaints it is my right and duty to consult a Student Government member. Why should I attend a meeting that I know will spend a vast amount of time bickering over minute allowances of the activities fee.

The Student Government has much more important activities to do along with this inquiry that it should not devote such an amount of time to it. I shiver to think how many committees and individuals he has appointed on

this one particular phase.

Mr. Hunt, I know will say: "Students are always critical without being constructive." Does Mr. Hunt forget that no matter what a person does it will be subject to criticism from somewhere, just as this letter will be. I mention this because I want Mr. Hunt to realize I am expressing an opinion and that he need not waste time writing an article of explanation in his support.

P. L. Marchetti

Editor's Note:

See editorial, this page.

Dear Clean Living:

Not only do I want you to print a nude, but I dare you to. When I say nude, I mean nude, boy, not the type preserved in marble . . . they always seem so unfinished . . . anybody knows it's not smooth. If you have ever enjoyed the Swedish version of our puritanical *Playboy*, you know what I like . . . let's be more definite (than *Playboy*) and have no mistakes. Indecision kills me.

# Study of Math, Science Begins Early

When he starts to Middle school at the age of twelve, the Soviet pupil finds his serious learning commencing in earnest. In the elementary schools his program has been rather general, consisting primarily of reading, writing, and arithmetic, with just a start of academic work in history, geography, and biology in the fourth year. He has been kept in the class in which he started, with one teacher following through the whole four years teaching all subjects.

Beginning with grade five, all of these things are changed: the curriculum becomes more intensively pointed to mathematics and science, the level of work becomes more demanding in study and performance, and each subject is taught by special teachers, specially trained in the fields they are teaching.

With his introduction to the fifth grade, the pupil makes one of his very few choices—he chooses what foreign language he wishes to study for the next six years. If he is in the Russian schools, this is his first work in a strange tongue; if he has been in one of the Republic schools taught in a native language, he has already begun the study of Russian.

But in the Middle School he may start a non-Soviet tongue—English, German, or French are the most popular, in that order. If his school is located in the middle or far East, he may elect some strategic language like Arabic or Chinese. In most cases this choice is not as free as it appears on the surface, since most schools teach only one foreign language, and if the pupil wishes a different language he must of necessity change to a different school. But this is possible, and is sometimes done.

In the fifth grade, too, the nature of the work changes somewhat. History, biology, and geography are continued, but the arts and crafts becomes the start of a shops course and the drawing changes from freehand to mechanical drawing. Weekly class loads rise from the 24 and 26 of the elementary school to the 32 hours a week which will continue for the middle and secondary schools.

Other changes and courses are introduced gradually. In the sixth grade geometry and physics are added, and arithmetic changes at the end of the first semester to algebra. In the seventh grade a readjustment of

hours permits the introduction of chemistry.

And in the tenth grade, geography is dropped to make way for courses in astronomy and psychology (Pavlovian psychology, of course). The Middle and Secondary school curricula as revised for presentation in the fall of 1958 may be represented as follows (with split figures representing change in weekly hours between first and second semesters):

Thus it can be seen that all Soviet young people, boys and girls alike, are expected to (and about 80% of them do) complete a course of study which embraces a total of 10 years of

this world which the materialistic Soviets feel is essential to prepare all citizens to live in the modern world of science and technology.

In addition to these academic studies, the Soviet boy or girl continues to get work experience, both in the after-school amateur circles of the Pioneers and in summer camps. Beyond this, the scarcity of skilled labor and the need for more work has called for more formal summer employment of all school children.

This past summer, for example, it was expected that all boys and girls between the eighth and ninth years would

and remain standing until told to be seated. Grading remains the same, with each pupil carrying his grade book and presenting it to his teacher upon request to receive a mark for his recitation or examination.

Pressure to excel is great, from school officials, parents organizations, and the Pioneers and their Komsomol leaders. No Soviet young man or woman is permitted to forget that in the Soviet Union success in status and in salary is closely tied to the amount of education and training the individual can assimilate to fill the required positions in their society.

As a result, education in these schools is serious business, and is taken seriously by both teachers and pupils. As one of the top Ministers told our delegation: "In the Soviet Union we do not build schools to teach students to dance and to play. When we are old and have produced something in science, we may relax; but when we are young we must work, work, work, to learn about the world and our labors."

Weekly Course Load—Middle and Secondary Schools

| Subject              | 5   | 6   | 7  | 8   | 9   | 10 |

| Geometry             |     | 2   | 2  | 2   | 2/3 | 2  |
| Trigonometry         |     |     |    |     |     | 2  |
| Biology              | 2   | 2   | 2  | 2   | 1   |    |
| Physics              |     | 2   | 3  | 3   | 4/3 | 4  |
| Chemistry            |     |     | 2  | 2   | 3   | 4  |
| Astronomy            |     |     |    |     |     | 1  |
| Psychology           |     |     |    |     |     | 1  |
|                      | 32  | 32  | 32 | 32  | 32  | 32 |

Russian language and literature; 7 years of history (with special Soviet interpretations on every page); 6 years of geography; 10 years of physical education, shop, and drawing; 10 years of mathematics including 5½ years of arithmetic, 4½ years of algebra, 5 years of geometry both plane and solid, and one year of trigonometry; 4 years of chemistry; 5 years of physics; 6 years of biology; and 1 year of astronomy and 1 of psychology. This is apparently the general knowledge about

work for at least three weeks on a collective farm; all between the ninth and tenth years would work a similar time in industry. This means that all school children have actual work experience in agriculture and industry during the time when they are considering their life's choice of future employment.

Instruction in the Middle and Secondary schools is like that of the elementary schools—formal and exacting. Copybooks are kept in meticulous handwriting. Pupils stand formally to recite

"WE GROW THE FLOWERS WE SELL"

## A Campus-to-Career Case History

**"I wanted a job I could grow with  
—and I've got it"**

H. James Cornelius graduated from Swarthmore College in 1954 with a B.S. in Electrical Engineering. He's been "growing" ever since with the Bell Telephone Company of Pennsylvania.

After an initial 44-week inter-departmental training course, Jim was made Facility Engineer in charge of the fast-growing Norristown-Pottstown area. In that capacity, he engineered over half a million dollars' worth of carrier systems and cable facilities between major switching centers.

Today, he is one of 50 young engineers from the Bell Telephone Companies chosen to attend a special Operating Engineers Training Program at Bell Laboratories.

This 19-month course of study—with full pay—deals with advanced techniques and new concepts in electronics which signal a new era in telephony. It involves both classroom theory and practical laboratory applications.

When Jim and his colleagues return to their companies, they'll review major engineering projects. This will assure the best use of equipment for current engineering, as well as for expected new developments in communications.

"I wanted a job I could grow with," says Jim, "and I've got it. I can't think of a better place than the telephone company for an engineering graduate to find a promising future."

Many young men like Jim Cornelius are finding rewarding careers with the Bell Telephone Companies. Look into opportunities for you. Talk with the Bell interviewer when he visits your campus. And read the Bell Telephone booklet on file in your Placement Office.

# Wolfpack Ranked Fifth In Nation

## UNC Tarheels Rated Thirteenth In Poll

The State College Wolfpack, unbeaten in four games to date, captured fifth place this week in the initial balloting of the 1958-59 basketball season. After victories over Penn State, Maryland, Wake Forest, and Clemson, the Associated Press poll lists the Wolfpack as the fifth place team in the country.

The Tarheels of Carolina placed thirteenth in the national poll. Following is a list of the top ten teams, their first-place votes in parenthesis, and total points:

1. Cincinnati (38) ..... 834
2. Kentucky (20) ..... 695
3. Kansas State (10) ..... 641
4. West Virginia (17) ..... 634
5. N. C. State (5) ..... 363
6. Tennessee ..... 335
7. Kansas ..... 184
8. Mississippi State ..... 177
9. St. Louis ..... 151
10. Northwestern ..... 148

## Pack Downs Tigers, 56-54 For Fourth Straight Victory

In their fourth win of the season in as many starts, the State College Wolfpack downed the Clemson Tigers by a score of 56-54 Tuesday night, in a thriller that saw the Pack come from behind with mere minutes left in the game.

Dan Englehardt dunked the deciding two points with just eight seconds remaining. From this point Clemson tried a last desperation drive, only to have their last try at the basket fail, and the final score ended 56-54.

At halftime the score stood 29-25 in favor of the Tigers. Until the last 2 minutes when Lou Pucillo scored a two-pointer to even the score 54-54, the Pack was unable to pull ahead of the strong Clemson team by an appreciable margin.

With about three minutes remaining to be played, the score stood at 54-50 with the Tiger team on the big end. At this point, the Wolfpack began a last minute rally that ended the game with the State team out front by 2 points.

From this point the Tigers were unable to score another

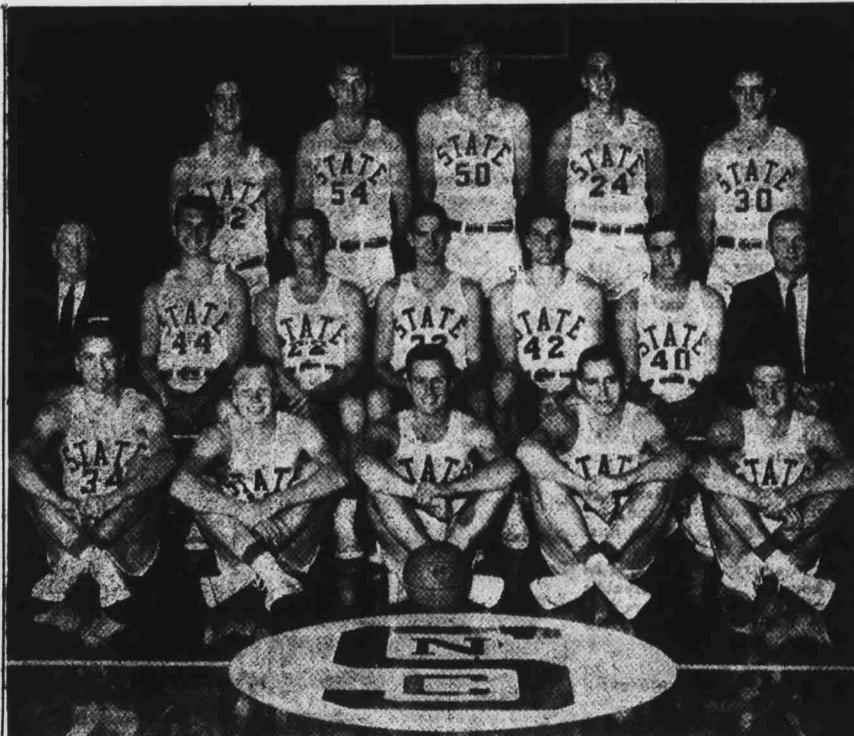

point. The last six points of the game were scored by State. To start off the rally, Richter made good two free-throws, followed by a two-pointer by Pucillo with two minutes left. This tied the game, and with 1:48 remaining it was Clemson's ball.

On a deliberate foul by MacGillivray, the Tiger's Walt Gibbons failed to make his free-throw and it was State's ball again with seconds left. Stalling the ball till the last 8 seconds, State decided then to try a shot, and Dan Englehardt made it good to put the Wolfpack out front by 56-54.

After this the Tigers tried in vain to drive to the State goal for a last desperation shot, but this failed and the score ended in another victory for the Wolfpack.

This win gave State their fourth straight victory and a 4-0 record. Rated the No. 5 team in the nation, the Wolfpack eagerness travel to Philadelphia, Pa. for their next foe, the LaSalle basketball squad. This game will be played December 17.

With three more games remaining before the Dixie Classic, the Wolfpack will travel to LaSalle, Kansas State, and Kansas. Their next home appearance will be in the Classic, December 29, when they meet Louisville in the opening game. Also slated for the Classic will be Cincinnati, the No. 1 team in the nation. Other teams will be Yale and Michigan State.

N. C. State Varsity Basketball Squad

Front row: Dan Englehardt, Mark Reiner, Captain Lou Pucillo, Bob McCann, and Dick Culler. Middle row: Coach Everett Case, Stan Niewierski, Bob MacGillivray, Bruce Hoadley, Don Gallagher, Jon Ed Simbeck, and assistant coach Vic Bubas. Back row: George Stepanovich, Bob DiStefano, Larry Ranta, John Richter, Harold Atkins.

**-Dixie Classic-**

The Dixie Classic, one of the nation's most outstanding holiday basketball tournaments, celebrates its tenth birthday this year. The king of all cage

turneys will be held in Reynolds Coliseum, December 29-31. Started by the Wolfpack coach Everett Case in 1949, this tourney has mushroomed into a spectacular attraction during its ten-year history. This year's Classic is expected to hit the

top, with the visiting teams being Cincinnati, Yale, Michigan State, and Louisville. Cincinnati, the No. 1 team in the nation, will be out to capture the title, never before won by an outside team. North Carolina's "Big Four" teams have succeeded in sharing the title during the tourney's history. Tickets for the individual games are now on sale at the Coliseum (Season tickets have long been sold out!)

## ELECTRONIC ENGINEERS PHYSICISTS

At Bendix Radio you will be  
AHEAD when TOMORROW comes!

AT BENDIX RADIO the accomplishments of today are stepping stones to continued leadership tomorrow! There is no resting on our laurels—either individual or collective, no coasting on a reputation already won. Our immediate accomplishments are important for today . . . and for the future.

That is why work moves ahead rapidly at Bendix Radio and why each day brings new, stimulating challenges.

That is why the rewards of success are great . . . and why the scope of your future at Bendix Radio is unlimited.

It is important to you—the young engineer—to start your career off on the right track.

You will be on the right track at Bendix Radio.

You will be working with leading scientists and engineers who are pioneers in new fields. You will be working in a modern plant with most modern equipment. Your work will be of a project nature, and you will see projects through from design concept to manufacturing. You will receive ample on-the-job training. You will be working in a professional atmosphere of exceptional accomplishment . . . where the importance of your career is fully recognized . . . where the attitude, the way of work and the way of life will encourage your best efforts!

We invite you to consider your future with Bendix Radio . . . and be ahead when tomorrow comes.

## State AIE Chapter To Receive Award

The State College Student Chapter of the American Institute of Industrial Engineers will receive a third place award Dec. 9, 1958, as outstanding student chapter in the nation.

The award will be presented by David G. Dall, regional vice-president of the A.I.E.E., at 7 p.m. in the Riddick Engineering Laboratories Auditorium. Competition is based on increase in membership, program and service of the student chapter.

Dall is currently group supervisor in the Methods and Planning section of the DuPont Nylon Plant at Chattanooga, Tenn. He will speak to the chapter on a current phase of industrial engineering. Dall has been in industrial engineering work with DuPont since 1947.

Winner of the first place award a year ago, the chapter is headed this year by William R. Foss of Raleigh.

Dall's presentation and speech will be open to the public. Refreshments will be served after the meeting.

## Job Opportunities Voiced By LaVene

Engineering employment opportunities were discussed by C. T. LaVene, employment manager of the Engineering Division of Douglas Aircraft Company of Santa Monica, Calif., today at 7 p.m. in the Riddick Engineering Laboratories Auditorium at State College.

In his speech before students in the college's School of Engineering, he discussed how engineers are used in the aircraft industry and what he looks for in hiring an engineering graduate.

## Eta Kappa Nu Selects 24 For Membership

Twenty-four electrical engineering students were recently initiated into Eta Kappa Nu, honorary society for electrical engineers, at State College Beta Eta Chapter.

Following the initiation, a banquet in honor of the new initiates was held at Finch's Restaurant. The banquet was attended by about one hundred members and guests.

The initiates are Robert L. Beadles, Roy B. Blake, Dan Boone, John A. Bowman, John T. Bunn, Allen J. Fuller, William F. Grieder, Jerry S. Har-

ris, John R. Hauser, John S. Hill, William J. Laughton, John H. Lippard, Edwin L. Lowery, George S. Lyda, Ernest P. McKnight, Gary D. Miller, Glenwood J. Mitchell, Larry K. Monteith, William F. Shepherd, Harvey W. Sigmon, Glenn E. Stirewalt, Edgar M. Underwood, William R. Watson, and James S. Williams.

In addition, the following men from Duke Eta Chapter were initiated at the State ceremony: David I. Blanchard, Ralph H. Clinard, Jr., William T. Peters, Jack E. Rathmell, and Stephen G. Rudisill.

## Pi Tau Sigma Initiates 17

Pi Tau Sigma, National Honorary Mechanical Engineering Fraternity, initiated seventeen new members into the fraternity on Friday, November 21, 1958. Initiation ceremonies were held at Broughton Hall in the Mechanical Engineering Lounge and were concluded by a banquet at the Charcoal Steak House.

Membership in Pi Tau Sigma is based upon sound engineering ability, scholarship, and per-

sonality. Those men exhibiting these qualities and receiving membership are: Carl W. Anderson, Jr., Floyd L. Basnight, Harold G. Bush, Douglas C. Clark, Robert L. Cowardin, James U. Crowder, Phillip M. Deans, Robert G. Eudy, William F. Grieder, William H. Kirk, James R. Maus, Jr., Glenn Moore, Victor E. Morrow, Cecil L. Neal, Jr., James L. Raper, John N. Sideris, Jr., and Charles N. Stinnett.

### ADVENTURES IN SOCIAL SCIENCE: NO. 1

"The proper study of mankind is man," said Geoffrey Chaucer in his immortal *Casey At the Bat*, and I couldn't agree more. In these tangled times it is particularly proper to study man—how he lives and works. Accordingly, this column, normally devoted to slapdash waggery, will from time to time turn a serious eye on the social sciences.

In making these occasional departures, I have the hearty approval of the makers of Philip Morris Cigarettes, whose interest is not only in providing young Americans with fine cigarettes, matchlessly blended of vintage tobaccos, grown with loving care and harvested with tender mercy, then cured with compassionate patience and rolled into firm tasty cylinders and brought to you in long size or regular, in soft pack or flip-top box, at prices which wreak no havoc on the most stringent of budgets, but who are equally concerned with broadening the minds and extending the intellectual vistas of every college man and woman!

I, for one, am not unmoved by this great-heartedness, and though I know it is considered chic these days to disparage one's employers, I shall not. Indeed, I shall cry "Huzzah!" for the makers of Philip Morris. I shall cry "Huzzah!" and "Viva!" and "Olé!" and "Ochichoonya!"

But I digress. For our first lesson in social science, let us turn to economics, often called the queen of the social sciences. (Sociology is the king of the social sciences. Advertising is the jack.)

Economics breaks down into two broad general classifications: 1) coins; 2) folding money. But before taking up these technical aspects, let us survey briefly the history of economics.

Economics was discovered by the Englishman, Adam Smith. He published his findings in 1786, but everybody giggled so hard that Smith, blushing hotly, gave up the whole thing and went into the cough drop business with his brother.

For long years after that economics lay neglected while the world busied itself with other things, like the birth of Victor Hugo, the last days of Pompeii, and the Bunny Hug.

Then one day while flying a kite during a thunderstorm, the American, Henry George (also called Thorstein Veblen), discovered the law of diminishing returns, and then, boy, the fat was in the fire! Before you could say "knife" the Industrial Revolution was on! Mechanization and steam power resulted in prodigies of production. For example, before the Industrial Revolution, a Welsh artisan, named Dylan Sigafoos, used to make horse-shoes by hand at the rate of four a day. After the Industrial Revolution, with the aid of a steam engine, Sigafoos was able to make entire horses!

And so it went—factories rising from the plains, cities burgeoning around the factories, transport and commerce keeping pace—until today, thanks to economics, we have smog, recessions, and economics textbooks at \$7.50 per copy.

© 1958 Max Shulman

The makers of Philip Morris are no economists, but they do understand supply and demand. Some people demand filter cigarettes, so they supply the finest—Marlboro, of course! Great flavor, improved filter—a lot to like!

REALLY SOMETHING  
TO WRITE HOME ABOUT  
...FOR CHRISTMAS

## REMINGTON SHAVER!

Hint for a Remington, ask for a Remington. If it gets really desperate, buy a Remington yourself (it's worth it!). It's the smoothest electric shaver around!

### REMINGTON ROLLECTRIC® FOR MEN

A real man wants, and needs, a real man's shaver... a man-sized Rollectric! Six diamond-honed cutters... largest live shaving area of all! Exclusive Roller Combs roll skin down, comb whiskers up to get your Heavy Beard and Hidden Beard: whisker bases below ordinary shaving level. You get close, fast, comfortable shaves that last hours longer! 110V, AC-DC.

### REMINGTON PRINCESS FOR WOMEN

Gentle, feminine shaver. Petite, yet with four times as much live shaving area as any other ladies' shaving implement. Exclusive Guard Combs make it so safe it can't chafe; you can shave back and forth—no need to worry about which side to use for legs or underarms. You can apply a deodorant immediately. Three chic colors: Ivory, Pink, or Blue. AC only.

Allen Lee

EVE ARDEN will make one of her rare and exciting guest appearances on the "I Love Lucy" show tonight at 7:30, CBS. The "Lucy" script has the crowd in Hollywood, and Miss Arden as well as William Holden take part in a very humorous program.

Incidentally, while we're talking about "Lucy", let's mention the recent "I Love Lucy" special. The script was prepared without effort from all the writers; it showed. This just goes to prove that no matter how great a star a person is, he can't go it alone. Without these writers, he's sunk. Gale Gordon stole the special right away from the "Ricardos". His performance was a prodigious success.

This might well have been National Pat Boone Week. Pat turned up on Steve Allen's program last Sunday, I understand, and sang "Loyalty", a record which he and Mr. Allen made

for release on "Dot". The song is, of course, from "Mardi Gras".

It was a surprise appearance to me simply because only a few weeks ago I read that Steven's sponsor "Greyhound Bus" would not permit such competition as Pat affords to appear on their program. Mr. Boone is very well identified with "Chevrolet" which Greyhound Bus definitely defines as competition.

Later in the week, Mr. Boone popped up on "I've Got a Secret" to plug his new book, "Twixt Twelve and Twenty," which I know all our readers will rush out and buy for Christmas. It was easy to tell that this program does not rehearse in advance as Pat was told by Garry Moore what his secret was on the air. It still made for a thoroughly fascinating show. Incidentally we understand that Jayne Meadows may return to "I've Got a Secret" after all, and soon, too.

A reader writes, "Is Claude

really real?" Answer: No. He's part of a nightmare I see almost everyday. Rah! Cheer! Another Letter! Mr. Bennett Cerf writes in part: "Dear Alton... That was a mighty nice story you wrote on me... you stick to writing; I think you've got what it takes!" I deeply appreciate such generous comments. It makes writing this column even more of a pleasure.

Staff

All sorts of jazz exist according to "C. J." There's Swing Jazz, Dixieland Jazz, Progressive Jazz, and now Elmo Jazz.—He also reports that the Loyal Order of Kemosabes meet daily on campus. Any readers of a recent "Clean Living" column will understand that fully.

Where are our Christmas presents? So many people sent in for my list of names and addresses that we hired another staff member just to sort the mail; he hasn't been very busy.—All readers of "Dear Abby" will be happy to learn that her sister Ann Landers now has a similar column appearing in our Sunday morning newspaper.—

A special, forty-five minute, Christmas edition of "ENTERTAINMENT UNLIMITED" will be presented tonight on WKNC at 8:00. We'd like to have YOU in our listening audience.—

Stan Freberg's "Green Christmas" is really the living end. Not only is it humorous, but it also has a serious and veracious message.—Ask Felton Watson what can happen by failing to lock a door properly. He can give you a most interesting twenty-minute lecture. If one's time is limited, ask for the jazzy, three-minute highlighter.—

Christmas gift suggestions: 1. "Smoke Gets in Your Eyes" by the Platters or "I'll Remember Tonight" by Pat Boone; 2. "Twixt Twelve and Twenty" by Pat Boone; 3. Eve Arden photos, wallpaper size.—A big, new edition of "The Worst from Mad" is due to hit the stands this week. Claude is counting the days.—

# At the College Union

By Oscar Taylor

I attended part of the session of the Student Government investigation of the College Union and was pleased to see the response by the committee to the budget of the College Union. Credit must be given to the members of the Student Government for their interest in the affairs of the various organizations on campus.

But, the explanation of the

budget was not intended only for the committee. It was also intended for the students who had complaints to place against the College Union.

An elimination of the confusion concerning the \$15.00 student fee was considered by myself as a major item of interest as part of the investigation, but obviously it did not concern the students as much as had been supposed.

Because of the poor response

to President Hunt's offer to attend the session, it could be considered that at this time the gripping will stop. Following the usual pattern of students, the gripes are expected to continue.

Any student is entitled to join and participate in the activities of the College Union; any student who would like a place in the College Union is indeed welcome to join and help provide the remainder of the students with a home away from home during the school year. But as Mark Twain said, "Everybody talks about the weather, but nobody does anything about it."

To change to other thoughts: On Friday evening, December 12 at 8 p.m., the film committee will present its Christmas Panorama. Three films, "Christmas Through the Ages," "Silent Night," and "The Spirit of Christmas," will be shown in the College Union Theater, followed by a coffee hour.

Newell Banks, the world's leading exhibitionist of simultaneous chess and checkers, challenges all chess and checkers players to come to the College Union on Friday night, December 12 at 7 p.m. to play him in a game of chess or checkers.

The Woman's College Chorus will present a Christmas program at the College Union on Sunday, December 14. The concert, which begins at 3 p.m., will be presented by the sixty-two girl chorus and will include, "Hear, King of Angels," "O Holy Night," "The Shepherds," "Carol of the Bells." The finale will be "Twas the Night Before Christmas."

With music by Harold Nall, the Christmas Dance will be held in the College Union ballroom on Saturday, December 13, from 8:30-11:30 p.m. The semi-formal dance will be for dates only and will be a similar set to the Starlight Club.

The one-act play competition will be held in the College Union ballroom on Friday, December 12 at 8:40 p.m. The event is beginning late so that the many other events of the evening may come first for those interested in other things.

# Golden Chain Members Visit President Friday

By Larry Harris

Eight members of Golden Chain found a warm welcome in the home of President and Mrs. Friday on Sunday evening, November 23rd. Mr. Friday, class of 1941, who is also a member of Golden Chain, led a discussion of State College enthusiastically and quite frankly.

It was interesting to note that a considerable proportion of the discussion initiated by the members of Golden Chain was dealing with the faculty of State College. The students indicated that they were interested in a positive program which would establish a faculty at State which would be able to help place State as the top technical school in the United States.

Since the financial compensation to the faculty is way out of line with their contribution to the student body and society, all agreed that a major step forward would be an increase in salaries. It was also proposed that another method of improving the position of the faculty would be to make their work more desirable.

Particularly significant in making the professors' work more desirable in the liberal arts departments was the suggestion that the professors might find it advantageous to

teach more advanced courses.

In the opinion of the students, to find an increased student demand for such advanced courses would probably necessitate the establishment of liberal arts degrees. Mr. Friday mentioned that a study is presently being conducted which should determine the value of liberal arts degrees at State to North Carolina's educational system.

A brief discussion of married student housing and fraternity row indicated that considerable progress is being made in both areas.

Regarding the selection of a new chancellor, Mr. Friday explained the criterion which he had used in appointing the Committee of fifteen, pointing out that the main reason for omitting students from this committee was that if the committee should not complete its work during the present academic year, student members might become unavailable after commencement.

He did emphasize that he felt the students should have a part in the selection of the new chancellor and that students would be given an opportunity to appear before the committee to make nominations and to present their ideas as to the qualifications desirable for the new chancellor.

# De Graff Accelerator Installed At State

Work on the installation of a one-million-volt Van de Graaff particle accelerator began December 3 at State.

The assembly will occupy two

levels in the new nuclear science laboratory located in a campus building formerly used by the Bureau of Mines.

With the acquisition of the new nuclear device, the State College School of Engineering, officials said, is continuing its program of expansion toward becoming one of the most complete nuclear training and research centers in the country.

The Van de Graaff device—an electrostatic generator used to accelerate charged particles—is being installed by members of the college's physics staff with the assistance of Richard Schuler, field engineer for the High Voltage Engineering Corporation of Massachusetts which constructed the equipment.

Dr. Harold A. Lamonds, director of the Nuclear Reactor

Project, is in charge of local arrangements for the installation of the new facility.

Dr. A. C. Menius, Jr., head of the college's Department of Physics, said it will take approximately 10 days to complete the entire installation. The sensitive instrumentation and the basic parts of the machinery must be in balance, he said.

The voltage-generator assembly is being mounted on a steel baseplate and will be contained in a pressurized steel housing. Other major components of the assembly are the acceleration tube and extension system and

the control cabinet. The accelerator's appearance is characterized by the generator column topped by a highly-polished, dome-like high voltage terminal.

Capable of producing precisely-known energies, Dr. Menius stated, the accelerator is invaluable as a training tool in nuclear physics experiments. He pointed out that it will be used at the college primarily as a neutron source, especially in conjunction with the Physics Department's sub-critical nuclear reactor assembly which will be placed on a lower level directly beneath the Van de Graaff.

Job facts from Du Pont

## YOUR INTERESTS, SPECIAL ABILITIES ARE IMPORTANT WHEN DU PONT MAKES YOUR FIRST JOB ASSIGNMENT

**BENEFIT PROGRAM MEANS ADDED INCOME**

by A. F. Hartford, Jr.  
Du Pont personnel representative

Don't forget the "extras" of an employee benefit program when you compare the job offers and salaries of different companies. At Du Pont, these extras mean added income that doesn't always meet the eye. They include life insurance, group hospitalization and surgical coverage, accident and health insurance, pension plan and paid vacation.

In addition, the Company sponsors a thrift plan. After two years of service, for every dollar you invest in U. S. Savings Bonds the Company sets aside 25 cents for the purchase of common stock in your name. Roughly, 60,000 of our employees are now participating in this plan.

If you have specific questions on Du Pont benefits, just send them to me. I'll be happy to try to answer them. E. I. du Pont de Nemours & Co. (Inc.), Room 12421 Nemours Building, Wilmington 98, Delaware.

**PERSONALIZED TRAINING RELATES TO POLICY OF PROMOTION FROM WITHIN**

Where do your interests lie? What courses have you taken? What are your special abilities? Du Pont tries to match these factors with available openings to determine your first assignment within the Company.

Once the assignment is made, the Company helps you apply your knowledge to a problem right away. You learn by doing and by consulting with your supervisor and others working on various phases of the same project.

Your performance on the job is evaluated periodically to assist you in knowing where you stand in the eyes of your management. And, as you might guess, Du Pont's personalized training is closely related to its promotion policy. Practically all promotional opportunities are filled by advancement from within the Company.

It is especially important for the college student to know that management authority at Du Pont is decentralized through many departments into small groups—small enough so that the new man's capabilities can be recognized. This type of organization, plus the Company's steady growth, produces many opportunities.

**SEND FOR INFORMATION BOOKLET**

Booklets about the kinds of technical jobs at Du Pont are yours for the asking. Subjects include: mechanical, civil, metallurgical, chemical, electrical, instrumentation and industrial engineering; technical sales, business administration, research and development. For a copy of one of these booklets write to Du Pont, 12421 Nemours Building, Wilmington 98, Delaware.

**MECHANICAL ENGINEERING MOVIE AVAILABLE FOR A.S.M.E. MEETINGS**

Just what does a mechanical engineer do at Du Pont? Whether your chosen field is research, development, design, production supervision or plant engineering, you'll find many of the answers to this question in the informative film, *Mechanical Engineering at Du Pont*.

From start to finish, this film has been prepared with the young engineer in mind. Its express purpose is to show him where he fits into the picture—what kind of assignments he will be called upon to handle in the chemical industry.

This is a realistic on-the-job film, without frills and falderal. No professional actors appear in it. All photography was done right in Du Pont plants and laboratories, and everyone you will see in it is a working Du Pont engineer.

If you would like to learn in considerable detail what mechanical engineers do in the chemical industry, arrange to see this Du Pont film. *Mechanical Engineering at Du Pont* is available at no cost for A.S.M.E. chapter meetings, fraternity house and dormitory showings. Write to Room 12421 Nemours Building, E. I. du Pont de Nemours & Co. (Inc.), Wilmington 98, Delaware.

**Christmas Stories:** "I don't care what your name is, Pops, just get those G. D. reindeer off my roof."

"Who cares what star you're following . . . those camels of yours are dirtying up my driveway."

**Cereal Story:** Hear about the illegitimate Rice Krispie? No? Well, he had Snap, Crackle, but no Pop.

The magazine rack in a certain drug store across Hillsboro is so crammed full of "Men's Entertainment" type magazines, that the owner refers to it as the Pornography Dept. Those magazines get better (or worse) every month. I'll bet that if the C. U. used such an approach they'd have to hold their Photo Shot Course in Reynolds Coliseum.

Hear about the rich Design Student from Texas? He tried to buy Boys Town.

**To Engineering Students:** What would you do if you had \$8,875.75 to spend? Well, believe it or not, you do! That's the amount the Engineers Council has (over and above the operating budget) just sitting in the business affairs drawing not one cent of interest. At 3%, it could earn over \$264.00 per year. Now the real problem is how

to spend that \$8,875.75, so All Engineering students will benefit. If you have any ideas, please let the members of the council (elected from the tech. societies) know—or write the Engineers Council and ask that your letter be read at the next meeting. But what ever you do, don't let all this money be spent on something you don't need or don't want. Why, \$8,875.75 is more than I'm paid per column.

"I ran over a milk bottle this morning and cut my tire to pieces."

What's the matter? Didn't you see it?"

"No, I didn't know the kid had it in his pocket."

**Procrastination:** It's a funny thing to me how all the instructors have the guts to keep telling us not to put off work til the last minute, then, at the last minute give us all our quizzes at once. Moral: If you can't do it, teach it!!

**Baptistball Game:** I'm not one to criticise officials at athletic contests . . . but I will say that the officials for the State-Wake Forest game last Saturday night were not Presbyterian.

This is the spot where I'm supposed to wish you all a Merry Christmas and all that garbage. To be perfectly frank about it, I don't give a damn what you do, as long as you keep your livin' clean!

## IFC Sponsors Party For Raleigh Orphans

The members of State's eighteen social fraternities will play Santa Claus to 289 children when the annual Interfraternity Council Christmas party is held Friday night, December 12. The children will be the guests of the fraternities in parties given at the fraternity houses. Children from the Methodist and Catholic orphanages and Raleigh welfare cases have been invited to the IFC Christmas Party. Each child will receive a toy donated by the IFC and personally given out by Santa Claus. Stockings full of candy will be distributed to the children. Refreshments will be served by each fraternity.

## Memorial Tower To Play Christmas Music Concert

A Concert of Christmas Music will be presented on the Carillon Bells of the Memorial Tower at N. C. State College on Tuesday, December 16 at 1:00 p.m. The Carillon will be played by Ralph Daniel, from Greensboro, a member of the N. C. State College Symphonic Band. The music will include both traditional carols and some of the lighter and more modern melodies associated with the Christmas Season.

Robert A. Barnes, Director of Music at State College, in announcing the program, stated that the Concert will open with Silent Night and other carols will follow, in chronological order, the events that took place during the first Christmas, according to the accounts of St. Luke and St. Matthew.

The program will end with the familiar Auld Lang Syne, signifying the approach of the New Year.

**Campus Crier**  
WKNC will present the Christmas section of Handel's "Messiah" Sunday evening, December 14, at 10:30 p.m. The N. C. State Chapter of DeMolays will hold its Christmas party on Friday, December 12 at 7:00. Rides will be furnished. All DeMolays can either date or come alone.

It takes a lot of spade work to build America's second largest telephone system

Past, present, future—Gen Tel has an exciting story to relate! The past? In just 24 years, Gen Tel has grown from a new company into the nation's second largest telephone system—a corporation that ranks among America's top 35 in gross income. The present? Gen Tel operates over 3½ million telephones in 30 states—and is installing 3,750 new phones each week. The future? Gen Tel is "at home" in those suburban and rural areas where America is expanding at a record clip. To meet this ever-increasing need for more and better telephone communication, Gen Tel is investing in new facilities at the rate of almost \$200 million a year. It took a lot of hard work and imaginative planning to put Gen Tel where it is today. And there is no stopping now! From here on out, as America grows and prospers, so will Gen Tel.
