Many Nominated 80 for Top NCS Job

The 15-man committee named to recommend a new chancellor for State College met at the college Friday and reported that it is making progress in its work.

Judge-designate Rudolph I. Mintz of Wilmington, committee chairman, said the group has received between 75 and 80 nominations but emphasized that "the door is not closed for further nominations from any citizen or group of citizens interested in State College."

He urged the public to make recommendations to the committee as quickly as possible and said nominations should be mailed to Prof. John F. Lee, Box 5356, Raleigh.

The committee convened at State College early Friday afternoon, had dinner together at the College Union Building, and continued its meeting Friday evening.

Judge Mintz said 13 of the 15 members attended the session.

President William Friday of the Consolidated University of North Carolina appointed the committee last November 13 and requested the group to give him at least three nominations. He, in turn, will select one of the nominees and recommend his selection to the Consolidated University's Board of Trustees.

Dr. Carey H. Bostian, who has been State College's chancellor for the past five years, will relinquish the post next July 1 to return to his former position as a professor of genetics at the college.

The committee headed by Judge Mintz is composed of five alumni, five trustees, and five faculty members.

The members, in addition to Judge Mintz, are:

Leslie N. Boney, Jr., Wilmington; Percy B. Perebee, Andrews; Ernest B. Hunter, Charlotte; Mose Kiser, Greensboro;

and C. W. Tilson, Durham, all alumni.

J. Spencer Love, Greensboro; G. N. Noble, Trenton; Thomas J. Pearsall, Rocky Mount; and Sam L. Whitehurst, New Bern, all trustees.

Dr. James S. Bethel, Dr. Preston W. Edsall, Prof. John F. Lee, Dr. Robert J. Monroe, and Dr. Edward A. Murray, all State College faculty members.

Roy Lathrop, Editor of The Technician, and Jim Hunt, President of the Student Government, are scheduled to appear before the committee as student representatives.

Six Army Cadets Honored With DMS Awards

Six cadets of the Army ROTC Brigade at State College have recently been designated "Distinguished Military Students" in recognition of the outstanding ROTC records which they have made.

In announcing the appointments, Colonel L. W. Merriam, Professor of Military Science and Tactics, indicated that these students have achieved this distinction by demonstrated leadership ability, a three-year record of high grades in Military Science, outstanding performance during summer camp, and having attained an academic standing in the upper half of their class.

Those cadets designated as Distinguished Military Students are: Bruce Thomas Hainley, Schuylkill Haven, Pennsylvania; Hugh McCall Lupold, Columbia, South Carolina; Peter Meinrad Thoma, Fitchburg, Massachusetts; Thomas Fulton Wyke, Shelby, North Carolina; and Charles Richard Younts, Lexington, North Carolina.

UNC Music Faculty Members To Aid In 'Arts Festival'

Dr. Edgar Alden

Dr. William Newman

As part of their contribution to the Fine Arts Festival, scheduled at the State College Union, the Music Committee presents an afternoon with Dr. William Newman and Edgar Alden, members of the music department faculty of the University of North Carolina.

Dr. Newman, pianist, and Mr. Alden, violinist, present a piano and violin concert of sonatas in the College Union Ballroom at 3 p.m. on February 15.

Dr. Newman, the pianist, is chairman of the piano department and gives courses in appreciation and graduate musicology at the University of North Carolina. He has been making annual lecture-recitals in various parts of the country for the Arts Program of the Association of American Colleges.

Mr. Alden, the violinist, brings to his playing a background of

extensive experience in solo, chamber, and orchestral music. Formerly concertmaster of the North Carolina Symphony and of the Mozart Festival orchestra in Asheville, he has appeared as soloist with both of these as well as other orchestras.

Mr. Alden and Dr. Newman have enjoyed several highly successful seasons of playing together. Their annual recitals have become a must for audiences in the communities where they have played. They have a prime interest in promoting a greater love for chamber music, especially violin music, throughout this area.

The event is sponsored by the Music Committee with the interest of the campus and Raleigh, as part of the Fine Arts Festival. The public and members of the College Union are cordially invited to this program.

Campus Crier

ATTENTION... ALL JUNIORS!! The Junior-Senior dance is scheduled for April 11, 1959. Bids will be available only to those who have paid their class dues of \$5.00. Please mail your remittance to the Junior Class, in care of the College Union.

The Raleigh Canterbury Club, an Episcopal organization, will meet next Sunday, February 15, in the lounge of the State College Y.M.C.A. The supper meeting will begin at 6 p.m.

This Club is not limited to Episcopalians, but is opened to all interested students of any denomination.

The regular monthly meeting of the Graduate Dames Club will be held Tuesday, February 17, at 8 p.m., in the College Union.

Stolen from Mrs. Carolyn Worsham, National Science Register, Room 108, 1911 Building, between 2:15 and 3:15 p.m., January 28, 1959: Zenith Transistor Portable Radio, ivory with gold handle, approximate dimensions 7x5x2, model number R-450. Anyone knowing of its whereabouts please phone Extension 265, or VANCE 8-4771.

The Young President's Organization, a national organization of men who are under forty years of age and who are presidents of companies having at least a million dollars of sales each year, is sponsoring a lecture and discussion program on the general subject of "Our Free Enterprise System". The program will be held in the Textile Auditorium from 9 until 11 a.m. Tuesday, February 24. Seniors will be excused from classes.

All students interested in joining the Sigma Upsilon Alpha honorary fraternity must write a letter of fraternal ideals to Box 5698, State College Station. Membership is free, as are the keys which will be sent you later. Please include address.

ROTC Cadets Visit Seymour Johnson AB

Air Force ROTC cadets from State College visited Seymour Johnson Air Force Base at Goldsboro, Saturday, February 7, in one of a series of trips by AFROTC cadets to Air Force installations in the area.

Transportation for the 62 cadets making the trip was furnished by three Air Force C-123 aircraft.

The cadets toured the base, heard a briefing on the procedure of filing a flight plan by a pilot and examined a F-100 aircraft.

In the Air Defense Command area of the base the cadets were shown an F-102 interceptor aircraft and radar identification system.

The cadets were accompanied on the trip by Capt. Claude R. Powell, Air Science II instructor. Cadet Commander of the group was Cadet Lt. Col. Homer S. Brown.

On Universal Day of Prayer

'Y' To Hold Service

Tomorrow, Friday, February 13, the Universal Day of Prayer will be observed on the State College campus. The Service, sponsored by the State College YMCA, will feature a special worship service in the Danforth Chapel from 12:30 to 1:00 p.m. There will be no speaker, but there will be special music by the Danforth Chapel Choir, who will also lead in the hymns.

This is a service of prayer and music and is a part of thousands of such observances which will be held on the college and university campuses of literally all the countries in the world. This international program is planned under the auspices of the World's Student Christian Federation as an occasion when prayers are made to God for the spiritual, physical, and intellectual welfare of all students,

teachers, and academic institutions of higher learning.

A hymn will be played from the Bell Tower at 12:15 tomorrow as a reminder of this special day and service. The YMCA hopes that each of you will give these few minutes of reverence to it and join in making this a Universal Day of Prayer.

KPK Elects Officers

During the regular meeting held February 5, 1959, Kappa Phi Kappa elected the following officers for the coming year: Benjamin U. Kittrell, President; Davie J. Smith, Jr., Vice President; Roger Moxing, Recording Secretary; John M. Jenkins, Jr., Expansion Secretary; and James D. Gregson, Jr., Treasurer.

Nation's Top Chemurgist To Speak On Moral Scientific Responsibility

The grandson of a slave who rose to become, in the opinion of Newsweek Magazine, "the nation's most prolific living chemurgist" will be the speaker at Monday night's Institute of Religion at the United Church at 8 o'clock.

Dr. Percy L. Julian, eminent scientist and churchman, will speak on "The Moral Responsibility of the Scientist." Born in Alabama, Dr. Julian worked his way through DePauw University where he graduated Phi Beta Kappa, then through Harvard where he earned his master's degree, in one year while also stoking furnaces, waiting on tables, and teaching, and in 1931 was awarded his Ph.D. degree from the University of Vienna.

From 1936 to 1952 Dr. Julian was instrumental in developing a wide variety of chemical matter such as pure protein for coating paper, a foam for smothering oil and gas fires, lecithin for making foods creamier, and female hormone progesterone. From yams growing wild in Guatemala he extracted the ingredients of cortisone and

his experiments with soybeans resulted in the synthetic production of proteins and "wonder" drugs. Today he heads the Julian Laboratories, Inc.

Dr. Julian is active in laymen's activities. He is currently president of the Congregational Council for Social Action. Included among his honors have been recognition as the Chicagoan of the Year, Northwestern University's Centennial Distinguished Citizen Award, and the Distinguished Merit Award from the Decalogue Society of Lawyers. His wife, too, is a distinguished scholar. They have three children.

Dr. Kenneth O. Beatty, professor of chemical engineering at State College, will introduce Dr. Julian. Rev. Gaylord B. Noyce will preside, and music will be furnished by the United Church choir, Dr. and Mrs. Arnold Hoffman, director and organist, respectively.

A fellowship dinner will be held at 6 o'clock, reservations for which must be made by 1 p.m. at the church office. At 7:00, four discussion groups will meet, as follows:

Woodrow Price, managing edi-

tor of The News and Observer, will discuss "A Proposed Revision of the Jury System" at a session on the courts sponsored by the Raleigh League of Women Voters and held in the kindergarten room.

Dr. Waldo Beach, professor in the Duke Divinity School, will speak on "Church-State Relations in American Democracy" at the session on religion and politics in Friendly Hall, sponsored by Rev. John Brown and Rev. Robert L. Shirley.

Dr. Francis Paschal, professor of law, Duke University, will talk on "When Legal Systems Meet," at a session on international affairs sponsored by the Raleigh Women's Club and held in the church dining room.

Finally, Kern Church, engineer and deputy state fire marshal, will speak on "Safety to Life of People in Buildings" at the session on social legislation, sponsored by the Y.M.C.A. and held in the south balcony.

The sixth and final event of the 1959 Institute of Religion series will be held on February 23 when U. S. Senator Clinton P. Anderson, former secretary of agriculture, will speak.

Textile School Stages Fabric Collection

The "William H. Harris Fabric Collection" will be on display during the annual "Open House" of the School of Textiles at N. C. State College Saturday, February 14.

The collection features a colorful variety of fabrics from throughout the world.

Other major displays will include exhibits of the products and methods of production of four major North Carolina textile companies. The exhibits will represent Burlington Industries, Fieldcrest Mills, J. P. Stevens Company, and Morgan-Jones Company.

Departmental exhibits in the school will include displays and demonstrations in the Yarn Technology, Textile Chemistry and Dyeing, Fabric Development, Knitting Technology, Textile Testing, Synthetic and Weaving Departments.

Guided tours of the Textile Building will give visitors an opportunity to see the complex

textile machinery in production and to observe the research being carried on in the textile research laboratories.

Fashion shows by Ivey Taylor's department store of Raleigh at 11 a.m. and 3 p.m. will give "Open House" visitors an opportunity to see spring fashions.

Special invitations have been extended to all North Carolina high school juniors and seniors to attend the "Open House."

Sponsor of the "Open House" is the Tompkins Textile Council, student governing body of the School of Textiles, headed by Eddie M. Barringer of Raleigh.

Student chairmen of the areas of activity during the "Open House" include:

Willie Bowen of Statesville and John Nix of Route 2, Rutherfordton, Yarn; John Blevins of Kinston and Bryson Dickerson of Oxford, Weaving; Bob (See TEXTILE, Page 3)

A Common Concern

The School of General Studies, along with our whole faculty and administration, wants degree-granting authority. If such authority is granted, it may very well be the greatest possible stimulus to educating the 'whole man' at State College.

The facts of our limited exposure to the humanities and our general cultural lag have been pounded home frequently. However, at the present moment our most violent critics are also those most violently opposed to a liberal arts degree being offered on this campus. Criticism which is followed by opposition to a means of alleviating the cause for criticism, bespeaks insincerity, if not selfishness.

We can agree with State's critics that our education here is often too specialized and narrow. But the end point of criticism, if it is to be constructive, should be the evolution of an adequate program to right the wrong.

All technical schools at State require their students to take humanities as a supplement, with the weak hope of broadening the students' outlooks. But the general studies departments are maintained in a service position only, and the faculty of these departments must often take a back seat in their demands on the student's time and thought; such a situation can not possibly be stimulating to either teacher or student.

Looking to the Long-Range Plan report for State College, we see further convincing arguments.

In the words of the report, "... The Faculty Senate, voice and agent of the General Faculty, urges that the College 'should place emphasis upon the humanities, the fine arts, and the social sciences as complementary to instruction in technology and the natural sciences, in order to give students breadth, balance, and well-proportioned perspective toward all of society.'"

We do not have space here to discuss either the myriad benefits to be derived from General Studies degrees or the severe setbacks arising from the continuance of the status quo. However, we will draw again upon the Long Range Plan report and note its declarations concerning the faculty of the School of General Studies, leaving other areas to later discussion. From the report we have:

"It is precisely because the present exclusively service status of the School (of General Studies) is now threatening severe erosion in the quality of the faculty that establishment of undergraduate degree programs can no longer be delayed. These programs will, in their own right, meet a student need that is also growing increasingly acute.

"It has become painfully apparent that a genuinely first-rate faculty cannot be recruited, stimulated, and long held when professional opportunities are restricted or totally lacking.

"... Establishment of undergraduate degree programs would be a major step in maintaining the high-quality faculty necessary to make State College graduates in all fields broadly educated in the humanities and social sciences as well as in the scientific and technological domain."

On this page, one of our columnists depicts a highly realistic situation concerning faculty inspiration, or lack of it, under the present "service" setup in the School of General Studies.

Students too have a vital interest in this issue.

"I CAN'T SIGN YOUR PETITION TO DROP MY CLASS—I NEED YOUR 'F' TO EQUALIZE MY GRADE DISTRIBUTION."

Campus Cosmo

By Chuck Lombard

State College men, by modern standards, most nearly approach the classification of individualists. Coupled with the natural artistic-scientific tendency to inquire which brands the college man, it is natural to assume that on any given topic within his experience a State College man will have an opinion ... and likely a refreshing one.

However, to all but the most inquisitive observer, the number average State College student could be one of the most intellectually neutral specks of biology on surface earth. State men rarely express an idea beyond the immediate range of his girl friend's or roommate's hearing. And if he should attempt the task of expression in surroundings so hostile as his professional society meeting, the incoherent babble which ensues is a wonder to behold.

One can draw a not too fantastic conclusion regarding the

demonstrated incapacity for vocal expression, and the painfully obvious lack of vocal participation, by looking at the number average State College men in campus affairs ... they are mutually cause and effect.

We all know what happens in any sort of group meeting on campus. Virtually the whole load of idea conception, organization, and delivery is assumed by less than 10% of the members present. Why?

The classic answer to this question is that the men who do carry the load are: 1) grandstanders, 2) egotists, 3) loud mouths. A better answer might be that there are only a few men willing to stand and try to express themselves so that (1) the job will be done right and (2) the job will be done at all.

So we are faced with the negative condition that in a society which is generally non-fluent, those who would express themselves may be suppressed.

To most people of our time the officially desirable condition is

What Can YOU Say?

Progress! And Liberty! But these are only words when those who have new ideas can not convey them to others for action, and when those who could or would, do not for fear of public censure.

It is a well recognized fact that the proper expression of an idea is the most sure road to its acceptance. In our society, where more and more people are being forced to work together, it is increasingly important that a person be able to get others to understand him and to agree with him. This art which we learn naturally with personal friends often does not hold us in good stead before strangers or large groups.

On campus there is an organization known as the Toastmasters Club. This group meets for dinner once a week, after which they discuss in a sympathetic atmosphere topics of general interest. The discussions are by way of brief—two-minute speeches. There are also longer five-minute speeches delivered infrequently by each member. The group seeks to improve the assurance and ability of each of its members to speak before a group of attentive people.

This is the sort of training which will be of great value to almost everyone in public and private life. There is a demonstrated need on the part of the average State man for this training. Toastmasters Club offers an invaluable opportunity. It's worth looking into.

Letter to the Editor

To the Editor:

The International Committee of the College Union will present a "Folk Songs and Dances" program on February 16, at 8 p.m., in the College Union Ballroom. The Committee takes pleasure in inviting your staff and every student on campus to come to the program and enjoy this presentation of international folklore.

Quite often in the current school year, we have heard comments from different sections of the student body concerning the purpose and activities of the International Committee. It seems that the name International is a deterrent to American students because it connotes to them foreign. The International Committee has the purpose of bringing Americans and foreign students together to know each other better, to enlighten their views of each other's cultures, and to present meaningful programs to the student body so as to provide them with a cultural and recreational outlet.

The program that the Committee presents on Monday, February 16, is a clear example of the view expressed above. It is composed of American and foreign "folkloric" numbers, making a good international composite.

Let's remember that the United States also belongs to the International family of nations.

I thank you cordially for your consideration.

Internationally yours,
Nick Ardito
Chairman,
International Committee

Editor's Note:

This year the International Committee has launched an impressive, ambitious series of programs to serve "foreign relations" at the College. The programs, varied in appeal and design, have often been plagued with poor attendance ... one of the possible reasons being given above in Nick Ardito's letter.

We want to urge you strongly to take advantage of this folklore program coming up next Monday night, being presented in conjunction with the College Union's annual Fine Arts Festival. The program is free, much better than the average movie, and we guarantee both its entertainment and educational value.

A lot of work, both in planning and execution, goes into the production of this program ... you receive only the benefits.

WAY OUT...

with John Cocke

Professor Moore asked them again. It was the second time. "Come now, gentlemen," he said. "Who has an idea as to the central theme behind *Catcher in the Rye*? Surely there must be someone..." No answer. Everybody glanced around the room as if they had never heard him. Someone coughed.

Dr. G. J. Moore, Associate Professor of English, turned and gazed silently out the window. He looked at the cold winter rain and shivered as he thought of the intangible one that dampened the classroom.

Well what the hell, he thought. Nobody wants to know anything about that. Then he spoke. He said, "Well if you don't know, I guess I'd better tell you."

So he did. He told them all about the implications in the story and explained very patiently how he had known what to look for and the process that one might use in digesting the data. But no gleam of intelligence crossed the students' faces, no look of enlightenment brightened their eyes.

He dismissed class early and walked slowly back to his office, depressed and amazed. His office-mate was there. "Hello, Whitesides," he said. "Oh, hullo, Bill. How was class?"

"Not so good. I feel pretty bad about them. I can't get anything out of them at all. They just sit there not saying anything," said Moore.

"This is a new thing? All mine have been like that for years now." He paused and then went on slowly. "I wish to God I had a Ph.D., as you do. I'd get out of this place fast. I've hated it for a long time now."

"Well I don't know," said Moore. "It would be a lot better if those plans for granting liberal arts degrees came through. They've been quite hopeful about it, you know."

"They've been hopeful about it for years now, but nothing ever happens. Lots of talk, but nothing really happens."

"Maybe so, maybe so. Tell you what... Why don't we start writing some other schools. Anything but this disinterest. I can't stand it."

"Yes, Bill, it would really be wonderful to teach some enthusiastic students for a change. And to be able to follow a man through four years of college and watch him develop under your instruction! Now that would be rewarding..."

At this moment a student ambled slowly into the room. They observed the slide rule that swung from his belt and the grass stains on his plaid shirt. "Professor Moore," he said. "I'm looking for Professor Moore."

Moore raised his hand. "Here I am," he said. "What's on your mind, Mr. Spivey?"

"Oh I'm sorry. I didn't recognize you. Well, what I wanted to say was would you like some criticism on your course. You know, constructive."

"Why certainly," he answered.

"Well I don't think you're slanting the course the right way. We're mostly future engineers, and me, I just can't quite get interested in all this interpretation mess. I mean it's all so vague."

"Yes, I can see how it might be to the technical mind. But what can I do? My job is to teach English."

"Yes," said Spivey. "But there's one thing you haven't covered yet I would like to see some of."

"And what might that be, Mr. Spivey?"

He paused and thought for a minute. Then he said, "One thing. What are the engineering applications of literature?"

Moore looked amazed and then burst into a bitter peal of laughter.

Graduate Students Must Specialize

By John W. Shirley
Dean of Faculty

Graduate education in the Soviet Union is carried on with the same degree of planning in specialization that marks the Diploma degree. Very few students pass directly from their undergraduate training into graduate programs; generally they go into actual work in industry or production, seeking as they work to find special problems needing research attention that they might use for research projects in their post-graduate education.

Application to graduate school is much like that to higher education generally. The number of graduate openings and stipends is announced by the GOSPLAN, both for full-time student positions, and for evening study towards advanced degrees.

An admissions committee, consisting of the Dean of the School, all the department heads, and representatives from the Trade Union, Komsomols, and Party, screens all applicants and awards the positions and stipends to those it considers best qualified to pursue specialized research in the field.

The first graduate degree is that of Candidate—it consists of three years of special work as a full-time day student, or six years as a night student studying four hours a night four nights a week.

During the first year, the student takes all of his required course work. This consists of a continuation of the foreign language, a course in the history of his specialty, another course in Communist philosophy, a seminar in Marxism-Leninism, and study in small groups in special subjects dealing with the research specialty which the study is to undertake.

During the first year of study, the graduate student is expected to do all the background reading demanded by his research project, and at the end of this year he stands rigorous examinations in philosophy, linguistics, history, and general exam-

inations on the field in which he is specializing.

During the second year the graduate student pursues his individual research. His course work is over, and he is on his own, receiving what advice and counsel his major professor wishes to give him.

If travel to other sections of the country or other libraries or research centers is involved, his departmental chairman will make the necessary arrangements. But during this second year, the student is expected to complete his investigation and get his materials in shape for publication in a scientific journal.

The third year is crucial for the aspirant for the Candidate degree. He must get his researches published; this requires acceptance of his thesis by a separate editorial board of specialists.

The culmination of the whole process is the public defense of the dissertation in the customary style of the European Universities. Two official "opponents" are named by the University, but the examining board is either named or approved by the Ministry of Higher Education. It is the vote of this board which determines whether or not the degree is to be awarded.

Our delegation was not in the Soviet Union during this examination time, but we heard similar accounts of the procedures from different educators. Let me give you my notes from one account at the University of Moscow. Our translator was the wife of a graduate student who had recently been granted the Candidate degree in biology, and her choice of words indicates something of the student's point of view:

"For the candidate's dissertation defense there must be two opponents. They must thoroughly read the work and form a personal scientific opinion. They express their criticisms of the work. The sessions are open to everyone, teachers and public alike. As a rule, there are about

twice as many visitors as there are on the scientific board. The poor person is introduced, his age, what he did, where he worked, etc. Then the applicant is given twenty minutes for a brief summary of his work. Questions are asked. Person must answer all questions. Then the opinions of the non-official opponents are given. (Notice about the public defense has previously been published—usually they are put in the papers with the obituaries.) Following the reading of all these non-official opponents, the "official killers" are recognized. These "murderers" are not limited as to time. They can talk as long as they wish. Then anyone can speak. After each speech the poor person must answer—oppose or agree. When everyone has spoken himself out and is exhausted, a counting committee of 3 or 5 persons is selected. Then members of the scientific board are given cards approving or disapproving the Candidate degree. Ballot is secret. After ballots are counted, head of committee recounts and returns to room to announce decision to the general public."

If the decision is favorable to the applicant, he is awarded the Candidate degree. If the decision is unfavorable (as it rarely is if he has been screened this far) he has "completed his post-graduate education" and is not entitled to go further.

The highest degree in the Soviet Union is the Doctor's degree, though their doctorate differs somewhat from ours. The Soviet doctorate is a combination of an academic and an honorary degree. It calls for residence at a University for one year, with no course work or academic requirements beyond the defense of the dissertation.

The doctoral stipends (full salaries for these men) free them from other duties to prepare their major work for publication in book form, and to defend it against all opponents.

Acquisition of the Doctorate automatically carries with it a full Professorship in the Soviet

educational system with a lifetime salary of 4,500 rubles a month.

Both of these graduate degrees are primarily designed to produce top-level specialists for advanced research or for teaching in Institutes and Universities. Numbers are planned by the GOSPLAN to meet these needs, just as are undergraduate Diploma numbers.

As a result, there are approximately equated numbers of high-level positions and well-qualified teachers and research workers. Thus it is possible to maintain academic faculties on the basis of the same sort of national competitions that operate in the Soviet admissions procedures.

Teachers in the Soviet Institutes and Universities fall into three grades: assistants, who are operating on a sub-professional level; docents, who possess at least the Candidate degree and who actually instruct in the lower levels of the specialties; and professors, who

hold the Doctor's degree.

All appointments are for five years only. At the close of the fourth year of service, the Institute or University advertises in the educational newspapers that a vacancy on the faculty at the designated stipend will be filled. Any person in the Soviet Union who possesses the proper academic credentials may apply by forwarding his credentials, his records of research and publications, and letters of recommendation to the faculty he wishes to join.

The incumbent, too, reapplies for his own position. From all these applicants, the faculty make their selection.

In theory, the Soviets assured us, this means that every faculty position is filled by the one person in the whole country best qualified to hold the position. In practice, they admitted, there was some tendency to give preference to their own graduates or their own colleagues in filling these positions.

One other academic honor

should be recognized: this is membership in one of the Academies.

Two types of members are named—corresponding members, who usually are not actively engaged in research at the Academy, and full members, who usually are.

Full membership carries with it a life stipend which most Academy members supplement with a full professor's salary by associating themselves with some University.

In discussing their activities with Professor Sissakian, assistant to the Director of the Academy of Sciences of the U.S.S.R., I commented: "We have heard in America that the budget of the Academy of Sciences is unlimited. Is this Utopian situation possible?" He replied, "Probably not. The appetite of modern science is insatiable. But," he added as an afterthought, "we have been given by the Supreme Soviet what we thought we needed to do our work."

A Campus-to-Career Case History

"In my job, I get the variety and responsibility I wanted"

"Each new assignment brings me greater responsibility and more challenging work. I have the satisfying feeling that I'm getting ahead in management," says Charles F. Barefield, B.S.E.E., Alabama Polytechnic '56. "That's what I was looking for when I joined Southern Bell Telephone and Telegraph Company."

"Following three months of interdepartmental training, my next training step was as a supervisor in the Plant Department. My assignments were varied to give me experience in handling technical and supervisory situations. In June, 1957, within a year after joining the company, I was appointed Plant Foreman supervising a group of men responsible for telephone installation and maintenance at Auburn, Alabama."

Six months later—in January, 1958—Charlie became Transmission Supervisor in Birmingham. "This assignment involves responsibility for accepting newly installed systems, analyzing performance and recommending modifications for improvement," Charlie explains. "I work with the many different groups responsible for engineering, installation and operation of telephone circuits. These circuits range all the way from wires to microwave radio."

"I have been getting the variety and responsibility I looked for," Charlie says. And he sees a bright future ahead for himself and Southern Bell. "The telephone industry is growing fantastically and chances for advancement go along with growth," he points out.

Many young college men like Charles Barefield are finding interesting and rewarding careers with the Bell Telephone Companies. Check into the opportunities available for you. Talk with the Bell interviewer when he visits your campus. And read the Bell Telephone booklet on file in your Placement Office.

LINDER

Repeat Feat . . . ?

Next Wednesday night promises to be a big night in college basketball. Not because the two top teams in the ACC will meet, nor because they both happen to hold national rankings . . . but because it will be the State-Carolina game!

Nowhere in the nation can one find a game offering more thrills and excitement, or a rivalry between two teams more intense, than demonstrated by these two "sister schools." Never has there been a State-Carolina game that didn't make major changes in the record books, and Wednesday night's encounter is certainly stacking up to meet all expectations.

In their last contest, Carolina, then the No. 3 team in the nation, handed the top rated Wolfpack a 72-68 overtime defeat. That game was on a Tuesday night . . . the same day that the papers carried the news of State's No. 1 rating.

And now, it seems that the Wolfpack will have a chance to avenge this humiliating defeat. Reviewing the national ratings, released just Tuesday morning, we see that Carolina again is ranked No. 2, behind the top rated Wildcats of Kentucky.

Only one fact doesn't meet the eye, when we view the sports writers and broadcasters decisions . . . Kentucky has gone down in defeat since their poll was taken. This poll, which places the Wildcats in the No. 1 spot for the fourth straight week, was taken, as is customary, through the previous Saturday's games . . . and up until then the Kentucky squad had only one loss.

But, Monday night Mississippi State handed the Wildcats their second loss of the season, by a score of 66-58.

So . . . just where does that leave Coach McGuire and his Chapel Hill boys? Undoubtedly, Kentucky's loss will pave the way for the Tarheels to take over the No. 1 spot . . . and no one will be surprised to see Carolina at the top of next week's national ratings!

And where does the Wolfpack fit into this picture? If this week's contests emerge as everyone is predicting them to . . . and if the Tarheels are boosted to the top spot in the nation . . . the stage is all set for an eventful night of basketball when these two ACC teams meet.

Coach Case and his revenge-seeking squad will be afforded the same opportunity as the Tarheels were given when they invaded Reynolds Coliseum. The one remaining question is . . . the Tarheels knocked the Wolfpack out the nation's No. 1 spot . . . will the Wolfpack be able to do the same? —BL

Pack Topples Duke Blue Devils, 80-72 Maryland Terps Invade Coliseum Sat.

By Mike Word

The Coliseum was packed with a wildly cheering crowd of 9,000 fans as the Wolfpack clinched their tenth victory out of eleven starts in Atlantic Coast Conference play against the Blue Devils of Duke University, and brought the season record to seventeen wins and two losses.

After Duke scored the first field goal, the Pack came back to take an early lead. But, the Blue Devils came fighting back to make things fairly tough for Coach Case and his squad. The game was touch-and-go all during the first half with neither team hitting exceptionally well. Neither of the teams were able to get an appreciable lead over the other, and as the buzzer sounded ending the half, the score was tied at 34 to 34.

Lou Pucillo was at the head of a last-half attack by the Wolfpack, which sent the Terrible Blue Devils sailing down in de-

feat. Lou's 16 point tally in the second half brought his total for the evening to 27 points and made him high scorer in the game.

In the early minutes of the latter period, the Wolfpack went on a five minute battle for supremacy which gave them thirteen points while the Duke team scored only two. After this State onslaught, the Blue Devils made a valiant comeback which put the Pack behind by a score of 63 to 60.

Immediately following the Duke rally, the Wolfpack began their winning attack which was led by Captain Lou Pucillo. The attack slowed down as the Pack led the Blue Devils by a score of 76 to 62, but it never died out. This lead was the largest one enjoyed by either team during the contest, and State went on to end the game by a 80 to 72 margin.

Pucillo played his greatest game, in every respect, against Duke, and John Richter gave

him a mighty big assist in leading the attack. Richter came in second in scoring for the Pack with fifteen points and the same number of rebounds.

Percentage-wise the two teams were just about equal with State hitting 42 per cent, and Duke hot on their heels with 41.4 per cent. The Duke boys gave State a fit off the board as they collected 46 rebounds to State's 49.

Coach Everett Case was mighty proud of the Pack, but he said, "We're still playing in spurts with some of the play, good and some of it bad, and you've got to play good all the time to come out on top."

Don't forget that the Pack plays host to the Terrapins of the University of Maryland this Saturday, February 14, at 2:00 o'clock. Students will be admitted upon presentation of the blue I.D. card at the door of the Coliseum.

On next Wednesday night, Feb. 18, the Wolfpack will venture to Chapel Hill where they hope to change their number 2 ACC rating to NUMBER 1!!

Lucky Strike presents

THINKLISH

—the funniest, easiest way yet to make money!

PUT IN A GOOD WORD AND **MAKE \$25!**

Speak English all your life and what does it get you? Nothing! But start speaking Thinklish and you may make \$25! Just put two words together to form a new (and much funnier) one. Example: precision flight of bumblebees: *Swarmation*. (Note: the two original words form the new one: swarm + formation.) We'll pay \$25 each for the hundreds and hundreds of

new Thinklish words judged best—and we'll feature many of them in our college ads. Send your Thinklish words (with English translations) to Lucky Strike, Box 67A, Mt. Vernon, N. Y. Enclose name, address, college or university, and class. And while you're at it, light up a Lucky. Get the full, rich taste of fine tobacco—the honest taste of a Lucky Strike.

1st Intramural Program Established By State

By Rob Ferrell

State College was the first college in North Carolina to provide an organized program of intramural athletics.

This program was established in 1924, and since that time it has become recognized as one of the most valuable extra-curricular activities. The purpose of the program is to provide an opportunity for students to gain physical and organic soundness.

The State College Intramural Program comes under the Office of Student Affairs and is co-ordinated through the Department of Physical Education. Intramural play is divided into three groups—Dormitory, fraternity, and open league.

The participation in each of these groups during the 1957-58 year was as follows: dormitory—770; fraternity—680; and open league—390. The total participation was 1,840 or approximately 29% of the student body.

Student Housing officials and the Inter-Dormitory Council

strive to have as many dormitory residents as possible participate in the intramural program. Each year the dormitory office appoints athletic directors for the dormitories. These directors are responsible for encouraging all students to take part in some phase of intramurals. At present, there are nineteen athletic directors for the dormitories. (Some of the larger dorms have two.)

In the "Fall Summary of Intramural Athletics" it is reported that all leagues had a successful season with spirit and competition running high. The fall sports are touch football, volleyball, bowling, track, golf, and tennis.

At present, the intramural program is composed of winter sports—basketball, table tennis, handball, and swimming. Later in the year the program will change to spring sports—softball, badminton, and horseshoes. (Anyone who is interested in participating in any of these sports should contact his dormitory athletic director.)

Entertainment Unlimited

Alton Lee

Jack Gardner, a recent graduate of State, lives very near Hollywood. Needless to say, he has seen his share of celebrities. He once swam against Jack Linkletter in a swimming match, for example. He has seen Lib-Grace give a huge sum to charity at the Hollywood Bowl. He's seen Kim Novak, Jimmy Stewart, and Art Linkletter just to name a few. He's also seen Jayne Mansfield driving around in her sports car whom he describes as "big as ever".

The thought of meeting a celebrity is an unforgettable experience to many; but as Jack puts it, "They're only human." Right now, he and his new bride live next door to a struggling young producer who may someday be world renowned. It's a small world.

The recent winter holidays gave us a chance to catch up on our tv-viewing. For example, "December Bride" which we rarely see due to our own radio show seems even funnier this year.

The recent appearance of Lucy and Desi on the "Danny Thomas Show" saw them steal the entire program. Eve Arden's appearance on a recent "Dinah Shore Show" was simply jazzy; the Platters on "George Gobel" were great. G. G. is not going off the air on account of their appearance either Claude. In fact, he isn't going off the air.

Pat Boone's shot on "Hoe-down" saved the show. We missed "P.B." when he appeared on the "Arthur Godfrey program", and also Dr. Billy Graham's spot on the "Jack Parr Program". Understand both were very entertaining.

The recent "Bob Cummings" anniversary program was one of the best ever, but the show is going off the air according to

one source. Some of the westerns are going off the air, too. Rah! Rah! Rah! WTVD has wised up and is now carrying a whole half-hour of "American Bandstand". They're also carrying "Crusader Rabbit" and "The Mickey Mouse Club" again. Wow!

The reviewer who said "What's My Line?" gives too many free plugs is absolutely correct. That's the program's major fault besides letting Bennett Cerf stay off a whole month. Gosh!

If the Valentine Issue of "Mad" is still on the stands when you read this, then read it. It's jazzy! Ask Elmo, Felton, or Claude. Russ Ford notes an incorrectly-spelled word a few weeks ago. We answer by giving him a song title—a Platter song, but of course—"I'm Sorry". That's a song by Bodidley, too! Gad!

MUSIC POLL: 1. Smoke Gets in your Eyes-2. All American Boy-3. Lonely Teardrops-4. With the Wind & the Rain, etc.-5. Manhattan Spiritual-6. May You Always-7. Stagger Lee-8. Donna-9. My Happiness-10. Good-Rocking Tonight-11. Nobody But You-12. 16 Candles-13. Charlie Brown-14. It's

Just A Matter of Time-15. Ambrose-Alton's Hit Pick: Tall Paul. One word about the poll: It is dependent on your cards, letters, or lists given to us personally.

There's no question about Ricky Nelson's fabulous success, but an expose magazine has a very revealing story on the "real" Ricky. Interesting! Felton and others will be happy to learn that there are 3 Road-runner Cartoons on at the Variety this weekend. Looks as though Mr. Starr is planning something drastic for "Pete" in "On Stage". If he "kills" him, he's going to lose a lot of readers.

All "Peanuts" fans will be happy to learn that the sixth book in a series, "You're Out of your Mind Charlie Brown" is being released in time for Saint Valentine's Day. It can be purchased with a special holiday envelope.

Federal Income Tax Law Contains Clauses Helpful to Students

By George Hammett

There are a few clauses of the 1958 Federal income tax law which may be beneficial to students who have earned more than \$600 last year, to husbands and wives filing joint income tax returns, and to people presently employed who are seeking further educational opportunities.

Two conditions are required before a student earning over \$600 in a year can be claimed as a dependent. If the parents have furnished more than half of his support, they may claim an exemption for him regardless of the amount he earned, providing he had not reached his 19th birthday by January 1, 1959. And the parents may continue

to claim an exemption after his 19th birthday if he remains a student during five calendar months, and if he meets the support test. In addition to attendance in recognized schools, a "student-exemption" may be made if he is taking a full-time on-farm training course under the supervision of an agent of a State or political subdivision.

For husband and wife to get the most from their income tax return, the best method usually is to file a joint return if the wife's income is \$600 or less. If the husband and wife do not file a joint return, either one may qualify as a dependent of some other taxpayer; but in no case may the husband claim his wife as a dependent.

Deduction for further education during employment is speci-

fied under two conditions: If the education was undertaken primarily to maintain or improve the skill of a taxpayer required in the performance of his employment duties when the education expense was incurred; or, if the education was undertaken primarily to meet the express requirements of a taxpayer's employer, or the requirements of applicable law or regulations imposed as condition for retaining the taxpayer's present employment, salary, or position.

Well-seasoned, ready to serve *America's second largest telephone system!*

Dishing up telephones in the right place at the right time is the sort of catering service Gen Tel specializes in.

As servants to over 3½ million telephone subscribers, we strive to make communications so dependable that no one need ever give his phone a second thought.

And, in the growing communities we serve, our job is to enable more people to communicate with one another.

Indeed, Gen Tel is determined to give its growing "family" nothing but the best. That's why we never cease in our efforts to develop new products and services that will make the telephone still more convenient, economical and useful.

Knowing how vital the telephone is in modern American life, Gen Tel "invests ahead" in new plant and equipment to make sure that our telephone system will be equal to whatever task it is called upon to perform.

Foundation Funds Total In Millions

The State College Development Council Wednesday reported that income to the foundations supporting the college's various schools and divisions amounted to a total of \$5,465,280.91 during the past 15 years.

In a 29-page review of development activities of the College, C. A. Dillon of Raleigh, council chairman, and other directors of the organization said a record-breaking \$655,265.51 in income was received by the college's fund-raising foundations during the fiscal year ending last August 31.

The foundations, the report said, have appropriated during the current fiscal year a total of \$476,613.00 in support of State College teaching and research functions, principally through salary supplements enabling the college to retain and attract top-level teachers and scientists for work at the institution.

L. L. Ray, director of foundations at the college, said the salary supplements and other support provided this year by the foundations exceed the total budget of the college 20 years ago.

The council's report stated that State College student financial aid including grants-in-aid, loans, scholarships, and athletic awards this year amounts to \$337,005.00.

The report showed that three of the foundations at the college have reached the million-dollar

mark in their fund-raising activities. These include the Agricultural Foundation — \$1,658,896.46; the Engineering Foundation — \$1,017,395.81; and the Textile Foundation — \$1,643,581.39.

Chairman Dillon paid tribute to Dr. Carey H. Bostian, who plans to relinquish his post as Chancellor of State College next July 1 to return to teaching. He said, in part:

"His concern for the welfare of this institution and his leadership of its varied programs have been an inspiration to me. This has been especially true because of the exceptionally fine character of the man.

"He is a true Christian gentleman in every sense of the word. According to my way of thinking, that is the crowning point in the life of any great leader. It was Martin Luther who said: 'A Christian man is the most free of all. He is the most dutiful servant of all, and subject to everyone.'

"Dr. Bostian most surely must believe that an education, in which the truly religious nature is ignored, cannot produce the noblest type of man. He has, therefore, served wisely and effectively as the leader of the institution to which we are so deeply devoted. It is with a sense of deep personal loss that I acknowledge his decision, while I praise him for his achievements. Dr. Bostian will be missed from his post as Chancellor.

"But I am convinced that his

At The College Union

On Friday, February 13, the students of State College will have the opportunity of seeing some of the best productions from other colleges and universities in our area.

University of North Carolina, Shaw University, East Carolina College, and A & T College will present plays beginning at 8:00 p.m. on the arena stage of the College Union Ballroom.

Judges for the Festival will be Charlie Khan and George Hall, both of Raleigh.

All college Union members and their guests will be admitted free. There will be a coffee hour immediately following the program.

As their contribution to the FINE ARTS FESTIVAL, the International Committee sponsors an evening of entertainment by the students of foreign countries. The program "Folk Songs and Dances" will be held in the College Union Ballroom and will begin at 8:00 p.m. on February 16th. All college students and their guests, and the

citizens of Raleigh are invited to attend. A coffee hour will follow.

The Lamplighters will provide the music for the Valentine Dance scheduled in the College Union Ballroom February 14th from 8:30-11:30 p.m. The dance will be semi-formal and for couples only. All students are invited to attend. The Dance Committee sponsors the event.

Be sure to sign up at the College Union main desk for the Ice Skating Party sponsored by the Social Committee. All college students in Raleigh are invited to join in the fun when the cars leave the College Union and journey to the Durham ice arena on February 20th at 6:15 p.m. There will be discount tickets available at the College Union main desk.

R. J. REYNOLDS TOB. CO.
Winston-Salem, N.C.

Boquets: Congratulations are in order for Mrs. Clean Living. She's at Duke Hospital making cutting remarks to all the surgeons.

Success at Last: Heard a comment about this column I thought at least some of you would thoroughly enjoy. Just as I passed a group of students in the hall after classes, I heard a low conspiratorial voice grumble, "There goes that son-of-a-bitch that writes 'Clean Living'". Ah, there's nothing like the heady feeling of having ARRIVED.

Till Death Do Us Part, Yet: A hen-pecked friend of ours patriotically commented to his wife that he'd like being buried in Arlington National Cemetery. "Oh no you don't," she commented, "You'll be buried beside me!"

"Oh, damn," he groaned, "you don't want me to go out with the boys even after I'm dead!"

Our College Union is ranked number 2 in the nation by the Nat. Assn. of College Unions. This is just too wonderful. It's too bad that most of us have little time for watermelon feasts, camping trips to Kerr

Damn, and platter parties. Perhaps if our College Union were on the campus of a liberal arts school it would be worth the \$15 a year fee per student. Hell fire, I wouldn't mind all the luxury and fat in the budget if I could get a decent cup of coffee.

Me Worry?: Man goes to psychiatrist and says he's worried about his wife. Seems that lately she's started keeping a billy goat in the bedroom.

"Don't let that upset you," the psychiatrist says, "just open a window."

"What? our boy exclaims, 'and let all my pigeons fly out.'"

Civil Service To Offer \$1000 Per Year Extra To 'B' Students

The Civil Service has recently been authorized to offer about one thousand dollars a year more to college graduates with a B average or in the top one-fourth of their class.

This has been made possible by a law passed by the United States Government. This law states that the Federal Government can now recruit these special graduates at grade GS-7, offering a starting salary of \$4,980.00 a year. Other graduates will be hired at \$4,040.00 per year.

College graduates who have had student trainee experience may have such experience credited toward the GS-7 grade on a month-for-month basis for a maximum of six months if it was closely related to their college career and was equivalent to the GS-5 level in the Federal Service.

College students are recruited through the competitive written Federal Service Entrance Examinations. It is given to college juniors, seniors, and graduates, and if the person passes the test, he will probably receive a number of offers from various federal agencies.

For information about the Federal Service Entrance Examinations, including the scheduled dates of the examination and the necessary application forms, contact the College Placement Office, or Mr. John H. Ingle, Social Security Administration, Raleigh, North Carolina.

IS STUDYING NECESSARY?

Once there were three roommates and their names were Walter Pellucid, Casimir Fing, and LeRoy Holocaust and they were all taking English lit. They were all happy, friendly, outgoing types and they all smoked Philip Morris Cigarettes as you would expect from such a gregarious trio, for Philip Morris is the very essence of sociability, the very spirit of amity, the very soul of concord, with its tobacco so mild and true, its packs so soft and flip-top, its length so regular or long size. You will find when you smoke Philip Morris that the birds sing for you and no man's hand is raised against you.

Each night after dinner Walter and Casimir and LeRoy went to their room and studied English lit. For three hours they sat in sombre silence and pored over their books and then, squinty and spent, they toppled onto their pallets and sobbed themselves to sleep.

This joyless situation obtained all through September and October. Then one November night they were all simultaneously struck by a marvelous idea. "We are all studying the same thing," they cried. "Why, then, should each of us study for three hours? Why not each study for one hour? It is true we will only learn one-third as much that way, but it does not matter because there are three of us and next January before the exams, we can get together and pool our knowledge!"

Oh, what rapture then fell on Walter and Casimir and LeRoy! They flung their beanies into the air and danced a schottische and lit thirty or forty Philip Morris and ran out to pursue the pleasure which had so long, so bitterly, been missing from their lives.

Alas, they found instead a series of grisly misfortunes. Walter, alas, went searching for love and was soon going steady with a coed named Invicta Breadstuff, a handsome lass, but, alas, hopelessly addicted to bowling. Each night she bowled five hundred lines, some nights a thousand. Poor Walter's thumb was a shambles and his purse was empty, but Invicta just kept on bowling and in the end, alas, she left Walter for a pin-setter, which was a terrible thing to do to Walter, especially in this case, because the pin-setter was automatic.

Walter, of course, was far too distraught to study his English lit, but he took some comfort from the fact that his roommates were studying and they would help him before the exams. But Walter, alas, was wrong. His roommates, Casimir and LeRoy, were nature lovers and they used their free time to go for long tramps in the woods. One November night, alas, they were treed by two bears, Casimir by a brown bear and LeRoy by a Kodiak, and they were kept in the trees until mid-January when winter set in and the brown bear and the Kodiak went away to hibernate.

So when the three roommates met before exams to pool their knowledge, they found they had none to pool! Well sir, they had a good long laugh about that and then rushed to the kitchen and stuck their heads in the oven. It was, however, an electric oven and the effects were, on the whole, beneficial. The wax in their ears got melted and they acquired a healthy tan and today they are married to a lovely young heiress named Ganglia Bran and live in the Canal Zone, where there are many nice boats to wave at.
