Admiral Rickover Speaks At Union Tuesday Night

Admiral Hyman Rickover, Raleigh on Tuesday night, February 17th. The 59-year-old, sharp-tongued critic of military red tape and proponent of nuclear power will make his address at State College in the College Union ballroom at 8 o'clock.

Admiral Hyman Rickover

The event will be open to the public and will be free of charge. His appearance is part of a two-week Fine Arts Festival which started at the College Union last Monday.

The carrier Navy admiral, who graduated from the Naval Academy in 1922, is known worldwide as the "Father" of the atomic sub. It was largely through his efforts that the first such underwater ship, the Nautilus, was built.

Last fall, the Nautilus completed an epoch trip under the Arctic Ocean without surfacing. Since Rickover's successful efforts in the late 1940's to exploit nuclear power into the field of transportation, the Navy has built a number of such submarines.

While pushing this program, Admiral Rickover's Navy career has been hampered on several occasions by U. S. Navy brass that resented his intense nature and failure to observe chain-of-command in putting his ideas into being.

Several Departs. To Offer Superior Student Programs

In an attempt to offer a more fundamental curriculum to those students desiring a better background for advanced undergraduate or graduate work, several departments on campus are offering courses under the heading of Superior Student Programs.

Currently these programs are being offered in the Department of English, Engineering Mathematics, and Physics. The School of Engineering offers an "Honors Program" for scholastically outstanding seniors in engineering curricula. Under consideration with the general revision of the School of Agriculture curriculum is a four year Honors Program in Agricultural Science for student preparation toward research and graduate work.

Admission to the superior programs is for entering freshman, on the basis of performance on the entrance examinations; for more advanced students, on the basis of demonstrated ability in previous coursework. Admission to the physics program is predicated upon the satisfactory completion of the freshman year Superior Student Program in Mathematics.

Superior student programs though just beginning to reach fruition here have been the subject of a great deal of study by the Faculty Senate and other campus committees in preparation for the increasing demands for more and better advanced education in the technical fields.

Victory Celebration Planned by Tar Heels

North Carolina State College will be facing the No. 1 team in the nation, University of North Carolina, this Wednesday at 8:00.

Carolina is planning a Victory Celebration after the game. This celebration appears in the planning stage, to far surpass the

joyous festival held in Chapel Hill following the last Carolina-State basketball game.

The Wolfpack is very stern and sober as the fateful day approaches. The Student Body seems to feel that under the circumstances, the best approach to the game would be one of sober contemplation.

The Tar Heels are allowing the women students an extra hour out that night to celebrate Carolina's victory.

State College has not planned a Pep Rally. No one seems to be able to find out who is in charge.

At the last meeting of State and Carolina, the Tar Heels knocked the Wolfpack out of their short-lived first place standing. Now the positions seem to be reversed as Carolina should be in first place by Wednesday.

As was said before, State is not planning anything. There are no rumors of a spontaneous demonstration anytime in the near future.

No one is very disturbed about the outcome of the game at Chapel Hill. Enthusiasm is at an all-time high and both the students and the team are very confident.

No one is very disturbed at State College, either. Enthusiasm is at an all-time low and no one seems to care about the outcome of the game.

Carolina has a Pep Rally very soon on the agenda.

As the game will be on the Carolina campus, State has not gone to the trouble to prepare any festivities before or after the game.

Everyone will be breathlessly awaiting the outcome of the biggest game of the basketball season Wednesday night, February 18, 1959.

At CU Wednesday

Rings To Be Delivered

Word was received Saturday from Lee Blackwell, the North Carolina representative of the L. G. Balfour Company, that he will be here at State from Wednesday morning at 9 a.m. until Friday at 12 noon to deliver class rings to those students who ordered them in November, 1958.

Blackwell, who will deliver the rings at the stated hours in the basement of the College Union, asked that students when picking up their rings have either the check made out for the amount on their order blank or have the correct amount of cash ready. He said that this would greatly facilitate the rapidity at which the rings could be delivered.

At the same time, all juniors are reminded to pay their class

dues. There will be an officer of the junior class there to tell each junior the amount that he owes. Dues are \$5.00 for the year.

Campus Crier

There will be a color movie on Bow Hunting at the Tuesday, February 17, meeting of the Forestry Club at 7:00 p.m.

Watch State "whip" Carolina on TV at the regular Young Democratic Club meeting Wednesday, February 18, at 7:45 p.m. in the College Union Theater. Refreshments will be served after the game.

There will be a Danforth Chapel service Wednesday, 12:40-1:00 p.m. The speaker will be Rev. LeRoy Richardson, Chaplain to Baptist students.

YDC 'Ward Heelers' Named by Gilmore

State College YDC President, Tom Gilmore, approved the following members to be ward heelers upon the recommendation of Charles Russell, Captain of the Ward Heelers. The ward heelers and their area are as follows:

Miss Barbara Synder and Miss Joyce Meares—coeds; Ben Kittrell — social fraternities; Clay Price — FarmHouse Fraternity; Larry Baxter — Alpha Gamma Rho; James Thomas Spence — Lambda Chi Alpha; Eddie Knox — Vetville; Phil Carlton and Royce Hagaman—off campus students; Speed Williams and Sterling Mason—married students and their wives; Donald Blizzard — Trailerpark; Chesley Greene, Dale Hedrick,

James Floyd, Bill Fouts, Norman Warwick and Ronald Shearon — New Dorm; Jake Vinson — Alexander-Turlington; Norman Crump, Hugh Halsey and Roger Mazingo — Berry-Bagwell-Becton area.

This year at the annual YDC Banquet certificates will be given to ward heelers and a trophy presented to the most outstanding ward heeler. The YDC meets every 1st and 3rd Wednesday nights at 8:00 p.m. at the College Union.

School of Design Receives \$750 Grant

The Tile Council of America, Inc., of New York City has made a \$750 grant to the School of Design at State College.

In reporting this, Dean Henry L. Kamphoefner said \$250 of the grant will be used to improve the School of Design's materials display center in Brooks Hall and \$500 will be devoted to a loan fund for students in architecture at State College.

The Tile Council, the dean said, has announced that it will make grants of \$750 annually to the State College School of Design for a three-year period, making a total of \$2,250.

Richard B. Alexander is president of the Tile Council of America, which maintains its headquarters at 800 Second Avenue, New York City. The organization represents 26 participating tile firms in the United States.

By Rev. A. L. Kershaw

'Religion and Jazz'-- Subject of Lecture

The Rev. A. L. Kershaw will give his nationally acclaimed "Religion and Jazz" lecture Thursday, February 19, at 8 p.m. in the College Union ballroom. Accompanying Kershaw

with his lecture will be the Raleigh Jazz Quintet a local group of progressive jazz artists. He has lectured with such renowned bands as Dave Brubeck and Louis Armstrong.

Al Kershaw was born in Louisville, Kentucky, and heard some of the real New Orleans music on the Ohio River excursion boats as a boy. As a student at the University of Louis-

ville, he developed his extensive interest in jazz.

He later studied theology at the University of the South and at the University of Chicago and became increasingly interested in the relationship between religious faith and the cultural expression of it in the arts, including jazz.

He is a chaplain of the George Lewis New Orleans Ragtime Band. He has made several records, presented a number of jazz programs on television and radio, and has written a number of articles on the subject.

The Rev. Kershaw is probably best remembered on TV as a \$32,000 winner in the Jazz Category on the "\$64,000" quiz program. He taught philosophy at Miami University in Ohio for six years, and continues to visit many campuses across the country as a lecturer and seminar leader in "Religion and Contemporary Arts."

Mr. Kershaw is being sponsored by the State College YMCA, and his lecture is being given in conjunction with the Fine Arts Festival being held February 9-22. The public is cordially invited to attend the Thursday night lecture. Other appearances will be made with Phi Kappa Tau fraternity at 8 p.m. February 18, and with the Protestant Chaplains' Council at 12 noon on February 19.

Reverend A. L. Kershaw, lecturer to be here at the College Union on Thursday night, dis-

misses some of the aspects of jazz with one

of its main components, Dave Brubeck, of piano fame.

Hell Week

In a time when fraternities are seeking to win the approval of the administration, the state legislature, and the student body, "Hell Week" again bursts upon the scene.

For several years now, the I.F.C. has been trying, with little enthusiasm or drive or success, to change Hell Week to Help Week. For the mature fraternity man, helping rather than hazing seems to make a good sense; such an outlook would very probably inspire greater respect from those who count.

We have sampled opinion among some of the fraternities which still engage in varying forms of Hell Week; nowhere could we find any reasonable answer to the question of "why hazing?" A few even ventured to say it was a tradition . . . and they accepted it as such without question as to its origin or purpose.

There are few who will deny that most fraternities today do not think that the pledges have to be subjected to embarrassment and physical discomfort to prove themselves worthy. However, we do have some fraternities on this campus which get a big personal pleasure of exerting their power and influence over another human being . . . extending their own importance, they hopefully think, by treating their future "brothers" like silly animals.

If our social fraternities are to ever merit the respect needed to expand their service on this campus, they need to grow up. And those fraternities which have already ruled out Hell Week would benefit by putting pressure on the I.F.C. to make the ruling fraternity-wide.

It is an unavoidable truth that a minority can ruin the reputation of the majority.

Road Runner Beware

The policemen will be here . . . maybe even speed traps . . . they have fast little cars . . . they will catch you . . . over 20 m.p.h. and you may kill someone . . . or waste your tavern money.

Actually, it's not funny. At night, the campus has often resembled a proving ground . . . so now the police will have to prove the speed limit is 20 m.p.h. Lots of luck, speedy.

Cheer, Leaders!

Look on front page and you will notice a story which informs us that Carolina is planning a victory celebration Wednesday night.

Naturally, their spirit raises them to this level of confidence . . . it seems spirit goes along with optimism.

By the way, has anyone heard anything from our cheerleaders about a rally . . . the game is Wednesday, isn't it . . . maybe we could be spontaneous again!

"I HELPED HIM WITH HIS HOMEWORK—DIDN'T KNOW HE WAS A DENTAL STUDENT"

Greeks On Campus

by Bill Marley
I have some of the highlights of the National Interfraternity Conference which Gary Schultz and Bob Davis attended in December.

The reports include some good news in regard to how our own I.F.C. compares to other such organizations. The constitution of N. C. State's I.F.C. is very strong in this comparison. Our I.F.C.'s judicial power concerning rush is greater than the majority of those represented at the N.I.C. The system of collecting dues here is as efficient as any of those held by other groups.

Also, the training procedure of future I.F.C. officers employed by the committees here at State is a generally accepted practice. Another item noted by our two representatives and one which both pleased and interested them was the way in which our administration cooperation compared with other such cooperation, and that was very favorable.

One representative from State had the opportunity to sit in on a panel discussion entitled "What Research Tells Us About the Value of Fraternity Life."

The panelists had gathered data from surveys concerning fraternities. One panelist spoke as an educator, and arrived at the point that the fraternity is the only institution on a college campus that teaches the student a set of values. Another spoke as a sociologist and made the important point that in the past fraternity life was available to men in the upper income class but that today fraternities are able to teach socially accepted modes of behavior to the increasing number of students from the middle class.

Another approached the question from the standpoint of a psychologist, and quoted the results of a survey of a mid-western university which had contacted all the living alumni who had graduated from the university since 1926. About 40% of the alumni were fraternity men and all answered one question concerning whether or not they thought it was advantageous to belong to a college fraternity. Yes was the answer of 90% of these men!

These are just a few of the highlights and the overall picture of this year's National Interfraternity Conference.

These two State men are to be congratulated for their fine report and work at the N.I.C.

Next week, we will have a report on more local matters, specifically on the results of second semester rushing and perhaps a progress report on I.F.C. sponsorship of a lectures series to be instigated here at State, open to everyone.

Technicalities . . .

by Steve Daves
It's a thinking man's filter.

For a man who thinks for himself. For a corporation lawyer interested in navigation. For a janitor who reads Plato. For a bartender who is a church deacon. For a C.U. President who likes a S.G. President. For an editor who likes censors. For an English professor who likes athletes. For a Russian who likes General Motors. For a Callas who loves a Tebaldi. For an Adolf Hitler who protects a Gertrude Berg. For a Democrat who stands up for Sherman Adams.

For me. It builds my ego. Some days I am not a thinking man. Some days I am just a

man. Tattooed. For real men. For ranchers. For ships' captains. For policemen and truck drivers. For hunters. For lovers. For steelworkers. For Jimmy Hunt. Liberace. Jerry Erdahl. For hoods and other such toughies. For ever and ever.

For me. It builds my ego.

They had a hell of a fight over at W.C. (you know, W.C. in Greensboro). It seems that some outspoken freshman pushed a bill through legislature abolishing the old system of lights out at 11:00 p.m. for freshmen. Said freshmen demanded more study time. The progressive administration proved its brilliance by vetoing the bill.

This is the first time in three and a half years that the administration has vetoed a bill by legislature. Reasons for this veto: health, possible physical exertion. Brilliant move, administration. You really put those freshmen in their places. Who ever heard of freshmen keeping waking hours after 11 p.m.? Meredith College, the Squeaker's Haven, also has some interesting, quaint, archaic rules.

But Meredith is a religious school. Yes indeed. It is supported and ruled by a particular church whose ideas of sin date back about one hundred years ago, but of course age only mellows and yellows ideas of right and wrong. Like dancing. And permission for weekends. And going into those sinful, decadent fraternity clubs. And they even have rules to offset their sweet young things having traumatic experiences with demon liquor.

And this is all as it should be. After all, girls should be protected from the world. That's why they come to college.

But sir, I don't belong to a fraternity, and I have sold my car, so can't I have a student loan?

Richter Goes Over 1000-Point Marker

The N. C. State Wolfpack downed the Terrapins of the University of Maryland by a score of 53-37, Saturday afternoon in the Coliseum. This win gives the Pack a 12-1 record in Atlantic Coast Conference play, as well as an 18-2 overall record.

George Stepanovich was way out front in scoring and rebounding throughout the game. He scored 20 points and came up with 23 rebounds.

In the number two spot was Big John Richter, who scored 13 points. His score brought his total to 1005 points for three years of varsity play. He was awarded the game ball after the contest.

The first half went fairly slow with State scoring 15 points before the Terps could muster one tally. After this decisive lead was accomplished, the Terps came back to cut the Pack's lead to 7 points. Stepanovich made two baskets in the last 2 minutes of the period to bring State a 9 point lead at halftime with the score standing at 28 to 19.

In the early minutes of the second period, State started on a scoring drive, led by Stepanovich. George tallied 11 points during this attack.

As the push died, Maryland made 5 quick points but they could not keep up the pace. State made a comeback making 6 successive points to bring the score

"Little" Lou Pucillo (20) gets set to loop one in for 2 points. Trying unsuccessfully to foil his shot is Maryland's Bob Wilson (55). (Photo by Hoey)

to the largest spread in the game at 51 to 32.

As the contest drew to a close, Maryland made another five point rally, but State's Niewierowski made a tally as the clock ran out leaving the Wolfpack victorious by 53-37.

ATHLETE OF WEEK

George Stepanovich . . . forward . . . 6-4 . . . a senior of Chicago, Ind. In Saturday's win over Maryland George accounted for 20 points to claim high-scoring honors, and hauled down 23 rebounds.

Freshman Baseball Meeting:
Anyone interested in trying out for the Freshman or Varsity baseball team of N. C. State College should report to the band room of the Frank Thompson Gymnasium Tuesday evening, February 17, at 7:00 p.m.

Those individuals who are not able to attend the first meeting of February 17, should report at the same place at 4:00 p.m. on Wednesday February 18.

All those interested in becoming members of the State Varsity baseball team will be given complete instructions by Jim Edwards, who will supervise the meeting.

If you are unable to be at either meeting, you can get information from the staff members of the Physical Education Department.

Duke Snider's Secret

This ball star found the secret to learning to dance and learning to hit over .300 is the same — timing and rhythm. Let Arthur Murray show you how to acquire dancing skill the easy "Magic Step" way, too. This basic step is the key to all dance steps. And the key to more fun and popularity, too.

Spring Football Drills Underway for Gridders

Coach Earle Edwards and his 1959 football squad began spring workouts Saturday, with approximately seventy-five candidates showing up for the Wolfpack varsity.

Included in the group were 16 lettermen, plus a large number of promising rookies from last year's Freshman team.

The squad will work out four times a week and will end the 20-day workouts March 21 with the annual "Old Timer-Varsity game."

Coach Edwards is faced with a big problem in replacing three of his top four guards, two starting ends, and the Wolfpack's number one quarterback . . . all lost from last year's squad.

"I'm looking forward to spring practice and so are the

boys," said Coach Edwards. "Personally, I think the prospects for a good season are bright if we can shake the injury jinx."

"There isn't a spot on the team which has been sewed up by an individual, and I expect a keen race for all positions."

Nuclear Reactor To Be Relocated

State College's famed nuclear reactor has been de-activated in preparation for its relocation in another, newly-constructed concrete shield.

Officials said this is another major step in the State College School of Engineering's expanding nuclear program. The move makes way for a new and larger nuclear reactor under construction now by the Nucleodyne Company, a division of Cook Electric Company of Chicago.

Announcement of the removal of the reactor core from its octagonally-shaped concrete shield located in the Burlington Nuclear Laboratories Building was made jointly Thursday by Dr. A. C. Menius, Jr., head of the Physics Department, and Dr. H. A. Lamonds, director of the Nuclear Reactor project.

In addition, the reactor's instrumentation system has been

dis-assembled for the move. The present 500-watt homogeneous reactor will be housed in the new nuclear science laboratory located in a campus building formerly used by the Bureau of Mines. Its rectangular concrete shield was recently completed on the main floor of the building.

It is in this building also that the recently installed Van de Graaff particle accelerator is housed.

The new 10-kilowatt heterogeneous nuclear reactor will be installed within the original concrete shield. The control room will be equipped with a new instrumentation system.

Four Textile Firms; AEC Support Fabric Research

Four major textile firms have agreed to support, along with the Atomic Energy Commission, a \$275,000 basic research project to be conducted over a three-year period at the new radiological laboratory of the School of Textiles Research Center at State College, William A. Newell, Research Center director, announced.

The four mills, which will supply 20 per cent of the funds required, are Burlington Industries, Inc., Cone Mills Corporation, J. P. Stevens and Company, Inc., and Reeves Brothers, Inc. The remaining 80 per cent of the money will be provided by the AEC.

The proposed research program will explore the effects of nuclear energy on fibers, fabrics, and textile processes, New-

ell said. Work has already begun.

"These four textile firms are to be congratulated on their willingness to participate in the program," Newell said. "By so doing they are clearly demonstrating their appreciation of the function and value of basic, exploratory research. Further, since the results of the project will eventually be available to the entire textile industry, we admire the sense of responsibility to the entire textile community shown by these mills."

The radiological laboratory at the College's Textile Research Center was completed last fall at a cost of \$96,000, and at that time received a cobalt-60 source to be used in research in an effort to find industrial uses for nuclear radiation.

WKNC To Broadcast State-Carolina Game

As a service to the students here at State College, WKNC, your campus station, is pleased to announce that it will broadcast the Freshman game between State College Wolflets and the Carolina Tarbabies this Wednesday night. This broadcast will come direct from the Wolflets Gymnasium in Chapel Hill, this Wednesday night at commencing at 6:10 P.M. over WKNC, State College radio.

THE GIRL I LEFT BEHIND ME

It happens every day. A young man goes off to college leaving his home-town sweetheart with vows of eternal love, and then he finds that he has outgrown her. What, in such cases, is the honorable thing to do?

Well sir, you can do what Rock Sigafos did.

When Rock left Cut and Shoot, Pa., he said to his sweetheart, a simple country lass named Tess d'Urbervilles, "My dear, though I am far away in college, I will love you always. I will never look at another girl. If I do, may my eyeballs parch and wither, may my viscera writhe like adders, may the moths get my new tweed jacket!"

Then he clutched Tess to his bosom and planted a final kiss upon her fragrant young skull and went away, meaning with all his heart to be faithful.

..You can do what Rock Sigafos did..

But on the very first day of college he met a coed named Fata Morgana, a girl of such sophistication, such poise, such savoir faire as Rock had never beheld. She spoke knowingly of Frans Kafka, she hummed Mozart, she smoked Marlboros, the cigarette with better "makin's". Now, Rock didn't know Frans Kafka from Pinochio, or Mozart from James K. Polk, but Marlboros he knew full well. He knew that anyone who smoked Marlboros was modern and advanced and as studded with brains as a ham with cloves. Good sense tells you that you can't beat Marlboro's new improved filter, and you never could beat Marlboro's fine flavor. This Rock knew.

So all day he followed Fata around campus and listened to her talk about Franz Kafka, and then in the evening he went back to the dormitory and found this letter from his home-town sweetheart Tess:

Dear Rock,

Us kids had a keen time yesterday. We went down to the pond and caught some frogs. I caught the most of anybody. Then we hitched rides on trucks and did lots of nutsy stuff like that. Well, I must close now because I got to whitewash the fence.

Your friend,

Tess

P.S. . . . I can do my Hula Hoop 3,000 times.

Well sir, Rock thought about Tess and then he thought about Fata and then a great sadness fell upon him. Suddenly he knew he had outgrown young, innocent Tess; his heart now belonged to smart, sophisticated Fata.

Rock, being above all things honorable, returned forthwith to his home town and walked up to Tess and looked her in the eye and said manfully, "I do not love you any more. I love a girl named Fata Morgana. You can hit me in the stomach with all your might if you like."

"That's okay, hey," said Tess amiably. "I don't love you neither. I found a new boy."

"What is his name?" asked Rock.

"Frans Kafka," said Tess.

"A splendid fellow," said Rock and shook Tess's hand and they have remained good friends to this day. In fact, Rock and Fata often double-date with Frans and Tess and have heaps of fun. Frans can do the Hula Hoop 6,000 times.
