Making Plans For Apollo Club

Bill Long, left, and Chris Tabor are shown looking over the list of speakers that will appear before the Apollo Club this fall. The club will hold its first regular meeting on October 2. (See story below.) Staff Photo

Apollo Club Releases Fall Program Schedule

By Mike Lea

A special meeting of the Apollo Club was held on Thursday at the YMCA. The purpose of the meeting was to bring the members up to date with respect to the year's program.

Christopher A. Tabor, Chairman of the club, made the following statement to the group:

"The aim of the Apollo Club is to reach the thoughtful and provocative students in order to stimulate even more their influence in the dormitories and the classrooms by having some of the best minds in the nation to speak to them on subjects vitally important to humanistic interest."

The group of lectures scheduled for the fall series will be "Beyond Technology, What?"

The first regular meeting will

be held on October 2. The speaker for this meeting will be Vera M. Dean who will speak on "Survival With Honor". She is the Visiting Professor of Government at the University of Rochester.

The speaker for the second meeting which is to be held on October 9 will be Gilbert Harrison who will lecture on "Nationalism and Its Problems".

"Religion and Politics" will be the subject of the third meeting which will be held on October 16. The speaker will be William Muehl, Professor of Practical Theology at the Yale University Divinity School.

At the last meeting of the fall season on October 23, Dr. Donald H. Andrews, Professor of Chemistry at John Hopkins University, will speak on "Science and Human Values".

Walk Construction Program Underway

By Chuck Lombard

Construction on the long awaited sidewalks is at last underway.

This information comes from J. McCree Smith, College Engineer. All the walks on the old part of the campus and a few others are to be done in brick similar to the work which is now in progress around Holladay Hall and the Alumni Building.

Because the college received prohibitively high bids for this brick work from all the contractors who submitted offers, the M & O has been forced to train a crew and do the work itself. In this way the college has cut the contractor's price in half, but progress with the work has been slow.

However, the workmen are gaining experience and should soon be laying the brick at optimum speed.

On most of the newer portions of the campus, walks will be laid of asphalt as part of the street paving work currently in progress.

The brick walkways will cost approximately \$30,000; the streets and asphalt walks, \$179,000.

Rocket Authority To Speak In Riddick Auditorium Tonight

The State College Chapter of the American Rocket Society will present a talk by David H. Newby, at 7:00 p.m. tonight in 242 Riddick. This will be an open meeting and all students are invited.

Newby is the chief of the Test and Evaluation Laboratory at Redstone Arsenal, Huntsville, Alabama. He is a graduate of Georgia Tech, where he received a degree in electrical engineering. At present, Newby is president of the Alabama Section of the ARS.

Prior to joining the Redstone Arsenal staff in 1951, Newby was a research scientist for the National Advisory Committee for Aeronautics, Langley Field, Va.

Traffic Ruling Passed; Decal Violations Void

The College Traffic Committee has ruled that some of the traffic tickets issued to date have been unreasonable.

The committee's decision was based on the fact that many of the tickets were issued too early in view of the new traffic regulations. The following recommendations were made by the committee and approved by the Chancellor:

1. That all traffic enforcement officers, upon observing an occupied vehicle parked improperly on the campus, or observing a driver leaving

a vehicle improperly parked, will request the occupant or driver to move the vehicle or park properly. Tickets will be written for a parking violation only if the vehicle is not moved without delay.

2. That "mounted in a permanent manner" be construed to mean attached as a decal, with tape or glued to the windshield.

That tickets written for this offense to date be voided. No appeal is required and refunds will be made for fees paid for such a violation upon request.

That students from states which prohibit the display of stickers on windshield will be allowed to mount stickers with masking tape. Persons mounting stickers in this manner are held responsible for stickers being displayed at all times when their vehicle is on campus.

That stickers which may drop off windshields will result in "failure to display" violations.

3. That Section 4, IX Registration of Vehicles shall be changed to read "Only the current College sticker should be displayed. Out-of-date stickers should be removed."

That tickets written for this offense to date be voided. No appeal is required and refunds will be made for fees paid for such a violation upon request.

(State law authorizes only the current sticker to be displayed. N. C. State Highway Patrolmen can issue a citation for displaying old stickers.)

4. That Section 3, IX Registration of Vehicles shall be changed to read: "The sticker should be mounted in the lower right side of the windshield."

That tickets written for this offense to date be voided. No appeal is required and refunds will be made upon request.

The Traffic Committee requests that "all motor vehicle operators indicate the above changes in their copy of the new traffic regulations."

The committee further requests that "students, faculty, and staff become familiar with the traffic regulations."

Campus Crier

Alpha Phi Omega, National Service Fraternity, will hold an open meeting at 9:00 p.m. Tues., 30 in the College Union. All interested people are urged to attend.

Alpha Phi Omega is the largest Service Fraternity in the country. The State College chapter, Iota Lambda, has a membership of forty-five. Services rendered by the fraternity are many and varied. Among the projects planned for this year are the distribution of the Stu-

dent Directories, promotional work for the United Fund, and the organization of a regional Scouting Conference in December.

This chapter of the Fraternity has been recognized at past National Conferences for its work in the field of service to others.

The College Union Outing Committee is sponsoring a trip to a North Carolina beach this weekend, October 4 and 5, on which all interested students are invited to go. A deposit of \$1.00 will be charged until full expenses of the trip per individual are determined. Expenses will include the cost of food, travel, and use of cottage facilities. Sign up at the Union main desk before October 3, 1958.

Agronomy Club meeting! Thursday, October 2, 1958, 7:00 p.m. in Williams Hall. Dr. Karl Quisenberry, Research Consultant. (See CAMPUS CRIER, page 4)

Statewide Leaders To Talk At YDC

On Wednesday night the YDC will have as its guests the two candidates for the office of State YDC President. Both Arthur Vann, an attorney from Durham, and Louis Allen, an attorney from Burlington will be preparing for the State Convention which is to be held in Greensboro on October 2-4.

All persons interested in seeing how YDC candidates speak for themselves just prior to the big elections are invited to attend the meeting.

During the meeting honorary memberships will be given to some of the Council of State and also to various other dignitaries. The meeting will be held in the North Ballroom of the College Union.

AFROTC Announces Year's Plans; Senior Cadets Fill Top Positions

The Air Force ROTC at State College has started the 1958-59 year with many new faces and a changed and well planned program.

During the past summer Col. Robert C. Paul became the new Professor of Air Science. He replaces Col. James F. Risher who has held the position for the past three years. Col. Paul was previously commander of Brooklyn Air Force Base at Mobile, Ala. Col. Paul graduated from Georgia Tech in 1930 with a B.S. degree.

For the coming year the seniors have taken over the top positions in the cadet wing. Cadet Col. Robert L. Wilkins has been appointed by the Professor of Air Science as Commander 595th AFROTC Cadet Wing. While at Air Force ROTC summer training camp at MacDill AF Base, Tampa, Fla., Cadet Col. Wil-

kins was awarded "Cadet of the Week." He is a member of Sigma Alpha Epsilon Fraternity and a senior in Industrial Engineering at N. C. State College.

Outstanding members of the Senior cadet class were appointed to positions on the wing commander's staff. The following appointments were made: Dep. Wing Commander, Cadet Lt. Col. Joseph DuBois; Administrative Off., Cadet Lt. Col. Frederick Scott; Wing Personnel Off., Cadet Lt. Col. James Lassiter; Wing Asst. Person. Off., Cadet Major Thomas Saieed; Wing Operations Off., Cadet Lt. Col. Lloyd Worthington; Wing Asst. Oper. Off., Cadet Major Phillip Deans; Wing Material Off., Cadet Lt. Col. John Fletcher; Wing Inspector, Cadet Lt. Col. Homer Brown; Wing I.S.O., Cadet Major Benjamin Rush.

The three groups of the wing will be commanded by Cadet Lt.

Col. George Hunsucker, commander 5951st Group, and Cadet Lt. Col. William Gardner, commander 5952nd Group, and Cadet Lt. Col. Jimmy Lee, commander 5953rd Group.

The AFROTC program has been arranged this year so that inclement weather will not delay the drill schedule. A system of class room instruction will be held by the advanced cadets for all basic cadets. This system will be used for all drill periods during the months of Dec., Jan., and Feb. These classroom periods will insure a thorough knowledge by the basic cadets of the drill procedures and ceremonies. This will be a great advantage over the old program where inclement weather caused the cancellation of leadership lab (drill).

A new program has been established for the placement of first year advanced cadets.

Freshmen Discuss Fraternity Life

The above scene was a typical sight during the past week when State's eighteen social fraternities were observing rush. Rushees as well as fraternity men were kept busy during the

week attending banquets and parties. Saturday at midnight marked the end of a week and a half of rushing by the fraternities.

Welcome Changes

The announcement by the State College Traffic Committee concerning the reconsideration and reconstruction of the most controversial parts of the new traffic regulations will come as a relief to many of the students here.

Under these new rules, a student, who is seen by an official, parking his vehicle improperly, will be asked by that official to either repark his vehicle or move from the restricted area. Only if the student refuses to do this immediately will the official be obliged to issue a ticket.

The other three parts of the new traffic rules deal mainly with the sticker, which is displayed on all registered college vehicles. Now it is legal for these stickers to be attached with either tape or glue, along with the old method of using them as a decal.

Also an item which was of particular concern to the students was the issuance of tickets to all vehicles which displayed stickers of past years. Although this practice of letting invalid stickers accumulate will still be frowned upon by the Traffic Committee, there will be no more tickets issued for this offense.

The last item which was changed deals with the position of the sticker on the windshield of the vehicle. The new ruling is that the sticker should, not shall, be attached in the lower right corner.

The Traffic Committee deserves to be commended for their honest appraisal of the situation and for having corrected the mistakes which they made in the first issue of the revised traffic regulations.

It is the hope of THE TECHNICIAN that other departments of State College will have the fortitude to correct any mistakes which they may have made, either in the past or future, so that the students here will feel that they are getting a fair shake on the affairs here that concern them most.

JM

No More Muddy Walks

From the M & O comes the announcement that many parts of the campus, which have hitherto been covered only with red dirt, will be paved in the near future.

All year round, these places on campus have been a constant menace to students, their books, and their clothing. In the winter when there is much rain and snow, students are faced with the problem of either walking through the mud, thereby messing up their shoes and clothes, or detouring around the haven for mud-pie makers, which causes them to be late for class.

In the early spring it is an entirely different problem, but one with the same end result. This time of year sees the students faced with high winds full of red dust, but this situation has no escape.

Come next year, these problems will no more be evident on our campus due to the sidewalks. It is good that this change will be made; it will stand as another improvement on the way to making State College a cleaner place to live.

LITTLE MAN ON CAMPUS

BY DICK BIBLER

Campus Cosmo

A Question of Pride

By Chuck Lombard
The boys from the Ag. school can tell you what happens when you put too many cows on too little grass. Pretty soon, no grass—just raw, eroded dirt.

For academic sake, let's examine what happens to the grounds on this campus where we don't find barbed wire and railroad ties. A good spot for us to investigate might be the front north corner of Daniels Hall. There we used to find a tangled mass of undergrowth—overgrown plants and weeds. The bank was badly trampled and gouged from students cutting the corner of the sidewalks.

Well last spring I noticed that the M & O was landscaping the area. They had cut down the unsightly bushes, had planted new shrubs, and had smoothed and seeded the bank. They neglected to put up a fence around the area.

Now who on this campus would dare to bet me that State men respected the work done on that bank? No one has to go look. We all know that it could be nothing but the mess it was before. But now that bank possesses dignity. It is a monument to us—the 6000 cows.

We have heard a lot of criticism on this campus about the unsightly fences. We have seen many ideas advanced for the solution of this problem. But let's face up to it men, there is really

only one solution for us. That solution lies in the dignity of man.

At the University of Kentucky, they have no fences. They also have unblemished shrubbery and lawns. How does this come about, you wonder. Their enviable situation is the result of a quality called citizenship—or perhaps you could call it pride.

The people on that campus believe there is no meaner, sorrier animal than a man without pride—a man who will neither respect himself or the rights of others.

So, to me, the issue lies squarely before us. Do we want to have cow fences, which are all we can afford if we're to get sidewalks; or are we to have a beautiful, open campus of unscarred lawns, bushes, and trees?

This latter alternative is not a pipe dream, but an easily accomplished reality. But to achieve this good requires not the longing of a few, but the purpose of the majority.

So let us face ourselves in the open. I propose a campus referendum. A vote of "yes" means we tear down the fences, but we pledge ourselves on our honor and dignity to keep on the sidewalks and off the grass.

A vote of "no" means we keep the fences which were designed for cows and have done their job well.

Letter to the Editor

Reader Believes Campus Patrolmen Take Pride in Work

To the Editor:
You know, everyone isn't as unhappy about the traffic regulations here as you might think. As far as I can tell the Traffic Committee, in general, is pretty well satisfied. At least they ought to be; they're making money hand over fist!

Hardly a day goes by that I don't see some satisfied campus patrolman happily ticketing a student's car. The joy of doing an honest day's work, I suppose.

I really must congratulate them. They have quite an ingenious set-up; either way somebody makes money, for whether or not State College knows it, it is against the State Law of North Carolina to display ANY KIND OF STICKER AT ALL on the windshield of a car. (Except the N. C. Safety Inspection Sticker.)

Don't take my word for it; call the City Police Department

like I did. John F. Chappell
(Ed. note: Along with the letter from Mr. Chappell, we received a copy of two sections from the Constitution of North Carolina. The first of the two said, in essence, that it is unlawful to drive in North Carolina with any non-transparent material upon the front windshield, etc., unless it be required to be displayed by law.)

The second section which Mr. Chappell sent up simply stated that the trustees of the University of North Carolina should make their rules in accordance with the laws of the State.

I feel sure that Mr. Chappell and any student who is in sympathy with his convictions will be greatly relieved by the report which is in tonight's TECHNICIAN. This report should go far to alleviate what seems to be Mr. Chappell's main concern.)

Greeks On Campus

By Bill Marley

Because Tom Henderson, the vice-president of the I.F.C., was unable to return to school this year due to scholastic difficulties, the I.F.C. was left with the task of filling his vacated post.

Phil Gaines, a senior in Chemical Engineering and a member of Sigma Alpha Mu, was elected to the position. Gaines had previous experience in the I.F.C. in the form of serving under last year's vice-president, Bob Gardner, as a member of the Social Committee.

On his own this summer and prior to his election or knowl-

edge of Tom's difficulty, Phil contacted several agents of different orchestras and brought back to school a list of available bands and prices to present to the I.F.C. Immediately following the selection by the I.F.C. Phil contacted the Agent for the Glenn Miller Orchestra and had a contract sent down. He then proceeded to complete final arrangements for the upcoming Fall Pledge Dance and Concert.

To me, this is indicative of the tremendous interest which Phil has in the I.F.C. and I feel that the Greeks at State stand ready to aid him in the successful fulfillment of this office.

A dynamic Rush Week has ended and the Greeks on campus share in a highly successful program. Those who visited the various houses, for the most part a new experience for you found an intangible spirit present in all fraternities.

We, the Greeks of State, feel that the following definition best expresses our conception of what a fraternity is.

"Take a group of men. Give them a pin; give them a ritual; give them some songs.

"They use them. They blend them, and are blended by them into that mystery of college life... a mystery even to those that live it and love it... a Fraternity.

"No one can explain it; no one can define it. All can live it and reap its benefits. It is a thing of the soul and the spirit; a creation of man's mind, and heart, and his desire to 'belong.'

"It is indefinable, yet it is the extreme in reality to those who live it. It becomes virtually a way of life to them. It colors their lives and thoughts, gives them a different outlook and point of view.

"This mysterious creation of man takes its members and molds them and polishes them and in the finality, produces a man, instead of a boy, and a gentleman instead of just a man.

"Its benefits are uncountable and positive. They are easily singled out and listed: Fraternity brings to its members purpose in life, the spirit of cooperation in group living, ability and experiences in leadership and all its facets, social poise and contacts, aid in scholarship and countless others boons.

"Yes, its benefits are many and real. Its organization is easily grasped and put down in black and white. Its home can be seen and lived in. Yet, again: "What is a Fraternity?"

Scientists Probe Mysteries of Mind

Scientists probing the mysteries of the human brain at various colleges and universities have come up with some surprising new conclusions, reports the October Reader's Digest. Among them:

It's as easy to think hard as not to think at all.

You think more imaginatively when lying down, more forcefully when you stand.

How much you "talk to yourself" is probably the most accurate measure of your intelligence.

In the article, "New Light On How The Mind Works", Lawrence Galton reveals that researchers at the University of Pennsylvania found subjects engaged in solving difficult problems used virtually no more energy than others who were sound asleep. They concluded that most of the brain's energy is used in just "keeping the circuits open." It takes little more effort to use the circuits.

Dr. Hugo Beigel of Long Island University tested subjects in different postures. He discovered thinking is more complacent lying down. Associations are freer, ideas have wider range. Stand up, and thinking becomes more energetic; decisions come faster. Want to take advantage of the tendencies of both positions? Merely sit down. It's an effective compromise.

A University of Massachusetts psychology professor suggests that the extent of our "conversations" with ourselves may determine how intelligent we are. Verbal cues are commonplace, he says, though they may not be audible. How much we use those cues influence the extent of our learning and the powers of our reasoning.

Wolfpack Stopped By Maryland

Determined Terrapins Win Revenge Battle By 21-6

The mighty Terrapins of Maryland have gotten their revenge for last years 48-13 trouncing at the hands of the Wolfpack of State College. The determined Terps claimed a 21-6 victory in Saturday's game with the defending ACC champions.

It was Maryland's day all the way, as nothing seemed to click for the Wolfpack. The State squad could never get the upper hand, as they lost the ball on their first two scoring chances. On the other hand, Maryland could do nothing wrong, as they marched down the field behind both a masterful passing attack and a powerful ground assault.

Rebounding from last week's humiliating loss to Wake Forest, the Terps displayed a flawless attack that caught the Wolfpack napping after last week's victory over the Tarheels of Carolina.

Coach Edwards' squad displayed a performance far under the sharpness of last week's season opener. The Wolfpack was unable to move the ball until the final period, when the third squad took over and saved the day in keeping Maryland from enjoying a shut-out.

In the first quarter Maryland marched 73 yards on the ground for their first score and a 7-0 game. In the third period, after a halftime score of 7-0, Maryland's Forbes took a pass behind

his line of scrimmage and ran 70 yards for the second Terp score.

Maryland's third tally came in the final period on a drive of 71 yards, with the Terp quarterback taking the ball over from the 1 yard line.

The offensive play of the Wolfpack seemed to lack much of the usual sharpness. The State squad lost the ball on fumbles when it hurt most, and the all-around play was far under par.

Possibly the Wolfpack's longest run and best performance occurred when Ken Trowbridge took the ball on a reverse, and faking the entire Maryland defense, romped for 34 yards before he was brought down on the Maryland 19. Here the Wolfpack drive faltered and Maryland took over again.

Third Team Starts

The one bright spot for Wolfpack supporters came in the final period when Coach Edwards' third team went into the game. Soon after, the Wolfpack came alive and marched for their lone touchdown. On an interception by Randy Harrell and a return to the Maryland 20, the Wolfpack's tally was set up.

After a series of plays, Mancini passed into the flat to Harrell who covered the remaining 15 yards to the goal and scored the Wolfpack touchdown. The attempted conversion was missed and the final score ended 21-6.

Coach Edwards proved to everyone that he had been right in his prediction of last week. Although it was hard to be proven right, Coach Edwards had said all week that Maryland had a strong football team despite the Wake Forest game.

After the game Saturday, Coach Edwards said, "This was certainly no surprise. We knew what Maryland could do. We're disappointed, naturally, but I think we can do a lot better."

Duke Snider's Secret

This ball star found the secret to learning to dance and learning to hit over .300 is the same—timing and rhythm. Let Arthur Murray show you how to acquire dancing skill the easy "Magic Step" way, too. This basic step is the key to all dance steps. And the key to more fun and popularity, too.

Shown above is John Forbes, the right half-back for the Maryland Terps as he is stopped by a pair of Wolfpack linemen while trying to go through the middle of the line. Forbes, a standout for the Terrapins in the Saturday win over the Wolfpack, was not always so easily contained. It was he who evaded, with the help of

some fine Maryland blocking, several State players as he ran seventy yards in the third quarter for the second Maryland tally of the game. Forbes also scored the first Terp touchdown when he bulled over in the first period for the score. (Staff Photo)

Harrell Scores Lone Touchdown

In Saturday's conference game with the Terrapins of Maryland, nothing went right for the Wolfpack of State College... except Randy Harrell. With hope for a victory gradually fading, this speedy Wolfpack performer erupted with a comeback all his own.

With the third string in the game for Coach Edwards' squad, Maryland seemed to be in complete charge of the game, but the reserve Wolfpack team was out to show that they could play ball as well as the first squad... and they did. Coming alive in the fourth period, Coach Edwards' third team looked like the ACC champions they are.

In the fourth period Lewis of Maryland dropped back to pass, and here, Harrell stepped in to turn the tide. Going high in the air for the interception, Randy came down with the ball and raced 18 yards to the Maryland 20.

Three plays later Harrell took a pass from Gerald Mancini and went for 15 yards into the end zone for the touchdown. On the attempted conversion, a pass to Harrell was wide and no good for the 2 points.

With very few minutes remaining in the game and the crowd cheering wildly for the little number 41, Randy took the kickoff and returned the ball to mid-field. From here the clock ran out before the Wolfpack could start rolling again.

Harrell, a sophomore in Agriculture, was outstanding on the freshman team and looked promising during spring drills. The winner of seven letters in football and track in high school.

ATHLETE OF THE WEEK

Randy Harrell... 5-11, 184 lbs. 20, years old, of Raleigh, N. C. A graduate of Needham Broughton high school, Randy is a sophomore this year in Agriculture. (See details above in story.)

New Members Join Eng. Research Staff

Two new members have joined the staff of the Department of Engineering Research at State College for the current academic year.

The appointments were jointly announced Sunday by Dean J. Harold Lampe of the School of Engineering and Prof. N. W. Conner, director of engineering research at State College.

The new appointees are Dr. Robert F. Stoops, research engineer who was named research professor of ceramic engineering and head of the Pyrochemical Section of the Engineering Research Department, and Pranab Kumar Maitra, who was named research assistant in the Pyrochemical Section.

Dr. Stoops is a 1949 graduate of State College with a B.S. degree in ceramic engineering. He received both his M.S. degree and Ph.D. degree from Ohio State University.

From 1949 to 1951, he was research assistant at Ohio State

University. The following year, he served as research engineer for the Harbison Walker Refractories Company in Pittsburgh. Prior to his present position, Dr. Stoops was research engineer for the Metallurgical Products Department of the General Electric Company in Detroit.

Science Fiction Contest Open

The Library Committee of the College Union again announces its writing contest which was begun last spring. The contest is open to State students, and entries are to be of a science-fiction or fantasy theme and not more than fifteen thousand words in length.

Students may obtain copies of the rules of the contest at the main desk of the College Union.

All entries are to be submitted to the College Union Library Committee by no later than November 14. Cash prizes will be awarded to the writers of the top stories on December 3, when John Campbell, Jr., editor of one of the country's leading science-fiction magazines, will present the prizes.

MEN'S WEAR

Hillsboro at State College

Do you often dislike doing favors for others, even though you tell yourself you enjoy it? YES NO

Do you refuse to worry about things you can't do anything about? YES NO

Would you be completely at ease if you found yourself suddenly in the spotlight at a social gathering? YES NO

Would you vote for establishing an international language other than English? YES NO

Can you compete with another person without feeling hostile? YES NO

Do you ever say things you don't believe, just to start a discussion? YES NO

When you're very hungry, do you like to try out strange foods? YES NO

Do you enjoy being called upon as an umpire to settle disputes? YES NO

The Man Who Thinks for Himself Knows...

ONLY VICEROY HAS A THINKING MAN'S FILTER... A SMOKING MAN'S TASTE!

Now answer this one: Do you really think about the filter cigarette you choose? YES ___ NO ___
If your answer is "Yes"... well, you're the kind of person who thinks for himself. You can be depended on to use judgment in everything you do. The fact is, men and women who really think for themselves usually smoke VICEROY. Their reason? Best in the world. They know for a fact that only VICEROY — no other cigarette — has a thinking man's filter and a smoking man's taste.

*IF YOU HAVE ANSWERED YES TO 6 OF THESE QUESTIONS, YOU ARE A PERSON WHO THINKS FOR HIMSELF!
