Traffic Problems Discussed

Stu. Govt. Convenes

The sixth session of State College's Student Government was held last Thursday night in the College Union. After the long formalities of calling the roll, and reading the minutes of the last meeting the legislature finally got under way.

The first item on the agenda was the president's report. Eddie Knox, who is doing a fine job as the Student Government President this year, gave a report on the projects of the Legislature that he had been working on over the past few weeks.

President Knox reported that Alpha Phi Omega is still working on the State Fund drive and was doing an excellent job thus far. The Drive, Knox also reported that some of the buildings are being opened at night for those who wish to study in them at that time.

President Knox also pointed out that the unsightly fences that are all over the campus will be taken down in the near future if plans go as scheduled.

The Student Government had made arrangements to have the fences taken down some time ago and M and O had said that they would do the job. In the meeting previous to the last one the Student Legislature ask President Knox to see what was holding up operations. Knox talked to Mr. Smith of M and O and was assured that the fences would come down very soon.

It was also brought in the President's report that the dividing of the post office and the Supply Stores to be investigated. I personally don't know exactly when the pipes were put out where ever it is there is a lot of it that goes there judging by the prices charged in the Supply Store.

At the conclusion of the President's report, Senator Don Blizard of the Student Traffic committee made his traffic report. One of the things that came out in Senator Blizard's report was that there is a good chance that motor scooter and cycle parking places will be removed from north campus.

The reason for the parking places being removed from north campus is that these "cool cats", who want everybody to look at them when they go by, have straight pipes on their cycles or they have extremely loud mufflers on them. This noise is getting very annoying on campus and is disturbing many classes.

The student members of the Traffic Committee will talk the action if it is taken and trying to keep this from taking place but the removal will invariably come about if something is not done about these straight pipes and loud mufflers.

After the conclusion of Senator Blizard's report the Appro-

(Continued on page 3)

Bulletin

Phil Carlton, Senior class President, has been elected President of the State Student Legislature at an organizational meeting held Sunday in Chapel Hill.

The delegates from the nineteen participating colleges and universities from throughout North Carolina elected Miss Linda Wey also from State College to the position of Secretary. Charles Johns of High Point College was elected Vice President.

The Legislature will meet at the Capitol Building March 10, 11, and 12 for its first assembly since 1957.

Twelve Fraternities Named To Initially Build On 'Row'

At a meeting of the Interfraternity Council Housing Committee last Wednesday night, the fraternities which will be allowed to build on Fraternity Row were announced.

Those fraternities which will build are Alpha Gamma Rho, Kappa Alpha, Kappa Sigma, Lambda Chi Alpha, Pi Kappa

Alpha, Phi Kappa Tau, Sigma Alpha Epsilon, Sigma Alpha Mu, Sigma Chi, Sigma Nu, Sigma Phi Epsilon and Tau Kappa Epsilon.

In a statement to *The Technician*, Peyton Neal, chairman of the Housing Committee, said, "Our Housing Committee undertook this task knowing that we had some difficult decisions to

make. Before we talked to any fraternities, we of the Committee set up the criteria which we would follow in choosing the fraternities that would build this coming year.

"After deciding the points that we considered most important, we submitted our proposal to the Interfraternity Council. Upon receiving their approval, we moved forward in our plans.

"In all cases where there existed some doubt as to whether or not a certain fraternity would be allowed to build, we of the Housing Committee interviewed the fraternity's leaders at all times to make just decisions.

We feel that we have chosen those fraternities which ranked highest on the basis of the criteria which we first submitted."

The Interfraternity Council

Approved the following points as the bases for selection of the fraternities to move on Fraternity Row: (1) Cash on hand; (2) Estimated receipts from sale of present house less mortgage; (3) present membership, and (4) Possible loans from all sources. Item (2) was arrived at after official appraisal of all houses by licensed Raleigh appraisers.

The twelve fraternities listed above were chosen from a group of fifteen who indicated that they were interested in moving on Fraternity Row. Delta Sigma Phi, Farmhouse, and Sigma Phi said that they were not interested in moving on Fraternity Row.

Senators dealing on the I. F. C. Housing Committee were Bill O'Brien, Jim Crutchfield, Ralph Edwards, and Scoofer Jordan. Bob Davis, president of the I. F. C., was an ex-officio member.

Open Letter

Junior Class Rings Arrive; Available Today

Paul Leggett, President of the Junior class, made the following statement regarding the support of the Junior Class as a whole during the recent class ring issue.

"I would like to thank the Junior Class Senators and everyone who helped make it possible for the class of '61 to receive their class rings "up and running." As was noted in *The Technician*, the rings were shipped

up between 8 a.m. and 5 p.m. today and Tuesday, and between 8 a.m. and noon on Wednesday at the College Union.

"As a class, you showed fine spirit and support on the ring issue. Your support is also needed (financially) for the remaining major class project—the Jr. Sr. Dance on May 14th. So far, 25% have paid their class dues. We need at least twice the present amount in the treasury if we are going to have a dance that will be "hotter" than Meredith's Barn was last night!

There will be a representative at the ring table this week. Please pay your class dues!"

Golden Chain Visits Pres. Friday's Home

By Bill Sharpe
Members of Golden Chain were entertained at the home of C. Friday, President of the Greater University, in Chapel Hill on November 2, 1959. The purpose of this visit was to enable the members of Golden Chain to talk with President Friday rather informally.

We found President Friday quite easy to talk to and very interested in our opinions about phases of State College education. Some of the topics brought up by either President Friday or ourselves were; Fraternity Row, the Honor System, growth of the college, methods of education, and compulsory ROTC.

We found both President and Mrs. Friday very charming and the evening was well spent.

Jud. Board Restates Mob Violence Policy

The Judicial Department hereby restates its policy concerning mob violence. The apprehension of any student on the scene of mob violence shall be considered PRIMA FACIE evidence of participation in such violence. Therefore, students arrested at the scene of any mob violence, such as a panty raid, will be considered guilty of participating in the raid unless evidence or subsequent testimony indicates otherwise.

Eighteen Fraternities To Give 300 Orphans

Over 300 children from the orphanages and Welfare Department of Raleigh are being entertained today by the member fraternities of the N. C. State College Interfraternity Council, as part of their continuing community service projects.

From 7 to 9 p.m., the eighteen chapters will roll out the red carpet for the youngsters, by providing refreshments and entertainment in their decorated homes.

Santa will visit the various houses and give each child a present from the I. F. C.

The children ranging from 6 to 12 years old, are from the Methodist and Catholic Orphanages and the Welfare Department.

Tom Eck, I. F. C. Activities Chairman has been working long and hard on the project.

These Christmas Parties are sponsored annually by the social fraternities of State College.

Campus Crier

Ralph Daniel of Greensboro, the carillonneur for State College, will present a concert of Christmas music on the Memorial Tower Carillon Tuesday, December 15, at 1:00 p.m.

Music associated with the Nativity will be performed corresponding to the chronological order of events as recorded by St. Luke and St. Matthew.

The program will also include

other traditional and modern carols.

The concert will end with "Auld Lang Syne", signifying the approach of the New Year.

The Engineering Mathematics Club will meet Monday, December 14, at 8:00 p.m. in 242 Riddick. Dr. Pasquale Porcelli of Louisiana State University will present a talk on "An elementary development of Lebesgue-Stieltjes integral."

Members and other interested persons are invited to attend.

The Phil Monday cigarette contest will close December 15, at 1:00. All empty packs must be turned in at the CU ballroom at that time.

The Industrial Engineering Student Chapter will meet Tuesday, Dec. 15, at 7:00 p.m. in the College Union. There will be a short business meeting with a report from the Engineers' Council. Members are urged to be on time, as the meeting will only last an hour.

WKNC Begins Broadcasting To Peace College Tomorrow

As this paper goes to press, arrangements are being completed for the extension of WKNC's program services to Peace College. Actual broadcasting will commence tomorrow morning at 7 a.m., if not sooner. This is a great step for the Student Broadcasting System, which owns WKNC.

The extension of its programming to the neighboring college of Peace makes it the first such station in the state to endeavor to cover more than one college campus. It is felt that this extended coverage will enable the students of Peace College to enjoy a quality of programming that has been lacking previously. This step makes Peace one of the few schools of its size to offer its students the benefits of

a campus radio station.

In signing the agreement with WKNC, Mr. Wagner, Vice President of Peace, said that the station policy of good music was the main reason for accepting the program service.

The Peace College campus will be served by one carrier current transmitter, fed by a telephone line from the WKNC studios. Under terms of the agreement, Peace College will have a representative on the WKNC Board of Directors from its student body. In addition, Peace College will always have the opportunity to use the WKNC facilities, at the station's discretion.

Since 1952 the Student Broadcasting System has endeavored, at various times, to extend its services to one of the other local

colleges. Each time these worthy efforts were squelched for certain rather good reasons. One such reason was, "too much money, we can't afford it." At this particular time the S.B.S. was to pay for installing a transmitter. The local college was then to assume the cost of line charges. This figured out to be roughly 2¢ per student per month. One of the better reasons was that WKNC would be featuring programs repetitious with existing Raleigh stations. Needless to say, it just ain't so.

The installation of this transmitter will certainly help seal the all ready good relations between these two great institutions. Dedication and request shows will now certainly have a greater meaning.

Theta Tau Sponsors Christmas Party

The annual Theta Christmas Party was held Saturday afternoon at the State School for the Blind Gymnasium. The young boys from Cox Cottage at the School for the Blind were the guest of Theta Tau.

The Theta Tau's along with their wives and girlfriends helped to plan the party and make it a success. The boys enjoyed games such as balloon blowing, stop the music, blind man's bluff, basketball and wrestling, with prizes being given for the best story and poem that was told.

Christmas carols were sung by everyone and the highlight of the afternoon was the visit by Santa Claus. He came bearing games, candy, treats and gifts for the cottage.

EDITORIAL COMMENT

For All We Know...

Every year at this time, an editorial appears in this space asking all students to drive carefully during the coming Christmas holidays. Often, a gory picture is painted to all readers in an attempt to shock them into a state of "careful driving".

Nevertheless, as the first issue of the new year is printed, there always seems to be several articles informing us that a few of our fellow students lost their lives in traffic accidents during the holidays.

The gory details do not seem to shock even the most susceptible ones among us. As the "Bug Out Time" nears, students are seen scurrying about, waiting for their friends to get out of class, waiting until that happy moment when they can hit the road for home, waiting until they can experience once again the feeling that comes with high speed on the highways.

But often, in reality, we find the greatest shocks. We here can think back just two weeks ago when one of our columnists and an outstanding senior died on our highways. We can think back to a weekend last May when another of our columnists was killed.

For us, it is extremely easy to remember to always be alert on the highways. We know that we cannot shut our eyes to others' driving, because neither of our columnists were at fault. We know that we must always remain on guard, because we have felt the sharp sting of death come close to us.

But, for many more students here, there two incidents are just "regrettable occurrences". To these students who have been removed from death on the highways, it is difficult to explain the necessity of careful alert driving.

Were there some way to caution them, we would hasten to do so. But, it seems to be an unsurmountable task. They will continue to go their happy, carefree ways until one day, some day, on a quiet, peaceful stretch of highway, shielded from the glare of bright sunshine by overhanging oak trees, spotted with serene havens just big enough for two, there will be a deafening crash heard, destroying all that made this picture so desirable.

And, in the same instant, the things that we have tried to say here will become obvious. Everything will be so clear to the students that were involved in the disruption. But, then, it will be so late. . . so very late.

—JM

President Knox Speaks

Numerous complaints have been issued concerning the taking of Agromeck pictures. After consultation with student members of various organizations, it is apparent that much of the criticism is just. The major complaint has been the failure of the photographer to meet the time scheduled or poor scheduling, and interruptions by the photographer during the meeting hour.

It is regrettable that so many organizations have been inconvenienced. On the other hand, we must recognize the complexity of publishing such a yearbook; however, this type of planning and scheduling is inexcusable. The editor of the Agromeck has informed me that necessary steps to improve this situation are being taken. He and members of his staff further state that it is difficult to obtain student participation in publishing the year book. This statement is debatable.

First, it should be mentioned that most of the major positions provide some monetary gain for the participants. Second, it must be noted that the outgoing editor generally recommends his successor to the Board of Student Publications and finally the student body receives the right to vote for the individual recommended. As a result of this procedure, the year book has the tendency to become localized outside of the Agromeck office, thereby limiting participation. It should be stated that to the best of my knowledge no outstanding effort has occurred to gain interested students participation in this publication. For example, how many notices have been printed in *The Technician*, the Student Bulletin, or how many announcements have been made on the student radio station, WKNC? Also, how much time was devoted to investigating records of incoming students with past yearbook experience? Finally, how many interviews were held?

Thus it is not difficult to understand why limited participation is in existence. More representation of the entire campus is essential if the Agromeck is to be representative of all phases of student activities. Obviously, steps must and will be taken to give all fraternity, dormitory and off-campus students a say-so in their yearbook publication.

Eddie Knox, President
Student Government

L.G.

I had been visiting with my young college friend for about three weeks now, and since I didn't want to wear out my welcome, I decided to try to get back to my own generation. I was anxious to tell of my visit and suggest changes that should be made in our generation for a higher standard of living.

I will omit the details of our return journey; I will only say that it was uneventful and much more pleasant than the first, our state of preparedness being much better this time. I arrived back in my laboratory exactly three weeks and one day after I had left it. I must explain at this point that while I could transport myself into the future and past, I could not return to the exact point in time from which I had originally ventured; my time passed like everyone else's. So when I arrived, my friends were overjoyed to see me for they had known of my experiments and feared some dire consequence of my accidental journey.

After my return I became somewhat of a celebrity for my bold thinking and daring journey; I was therefore invited to speak at many meetings of important men and women, telling them of my observations and impressions of the future generations. I was changing the course of history by telling business leaders the world over of the world in times to come. They were quite interested in my observations for they planned to use my information to their best advantage. I shall quote to you parts of my last and most famous speech to the Industrial Leaders Congress of America.

"I am very pleased to be able

to come before you today and, in my little way, tell you of some of the more important observations that I made. One must realize that years of intensive study are necessary to begin to comprehend the method of travel, so I will touch on it as briefly as possible. . .

"I think that I can qualify myself as an expert on the future generations since I had the opportunity of observing them for a period of three weeks, during which I carefully noted the changes in mankind during the next century. I plan to write a book giving the facts in more detail for those of you who desire to know the whole story, but in the meantime I will fill you in on a few of the basic facts. . .

"Upon arriving I saw a great gaming arena, built at the exact spot on which my laboratory is now situated; this arena, I have come to find, played a large role in the lives of the natives. Apparently they thought of bigness and gaudiness as a sign of power, so the owner of the arena leases it for parties. . .

"I was disappointed to find that the moral fiber of mankind had decayed somewhat in the future. His rules were laxer and more tolerant toward law-breakers. He seemed to be giving in to the disorderly ones among him. . .

Churches of the future retained the power that they now hold over us all, enabling us to have a crutch to fall back on in case of emergency. The future generation uses this privilege more than we do now, feeling the necessity for a stronger crutch because without it, they have a longer fall. . .

Coed Defends Sigma Kappa Colony; Pastor Writes

To the Editor of the Technician

A great deal of discussion and publicity has been given to the new colony of Sigma Kappa Sorority. I have felt the need to explain to the student body as a whole and to some confused individuals exactly what a sorority at State College will mean for the coeds here, the college, and the community.

In answer to an article in the November 23 issue of *The Technician*, our colony of Sigma Kappa has high hopes of other sororities colonizing at State College in the near future. The writer of that article seemed quite concerned about the 130 girls who are left out of the sorority.

It is true that there are 152 coeds here at State College. From the Admissions Office, I have found that there are 63 married coeds, eight teachers who are coeds, 23 auditors or coeds taking one course, and 58 coeds who do not fit into one of the groups above. We, therefore, have 58 coeds who could be in a sorority; seventeen of these girls showed interest, and all seventeen were selected by the sorority.

The 41 remaining coeds showed no interest in the sorority and, consequently, are not in the colony group. Too many people are assuming that the sorority will be a clique, and this is not true. Sorority membership is based on affirmation, not negation. We are not against anyone, but we do believe that the Constitution of the United States gives us the right to choose those with whom we associate. We want our sorority to be a highly personal, closely-knit group so that we can help each individual girl to develop her talents and help her achieve those goals of which she is capable.

Coeds at State need a sorority more than girls at most colleges, because they have no means by which they can develop their social person. Many coeds find some satisfaction from school activities, but they will have a hard time finding the loyalty, companionship, dignity, and seriousness of purpose that they would find in a sorority.

The seventeen girls in the colony do have a main purpose, that being to help the coeds at State College, but not just the coeds in the sorority, but all the coeds at State College. It is true that the girls in the sorority will reap the most benefit from the project, not because of the aims of the project, but, instead, because they'll be working on it. I think that the motive of most of the opposition is to tear down something that they admire in their hearts, not to replace it with anything or equal or greater merit.

It is true; some women students will be left out of the sorority, but State College is not a unique example of girls not getting in a sorority. Some girls do not want to be a member of a sorority, and some do. Life is full of disappointments; and, if we do not want a sorority because some girls will be left out, then we had better not have honoraries, play casts, cheerleaders, or student government representatives. Somebody might be left out and develop a phobia or permanent attitude of defeatism. There are seventeen girls in the colony now, and we want as many more girls as we feel would make good members. The girls who have shown no interest should not feel that they are not getting a fair chance.

as have wild parties, become snobbish, and form cliques. Maybe this is what these people would make a sorority, but we have our own ideas about what a sorority should be.

Our national chapter has set up many high standards for its members, and we have approved them and will abide by them. I hope that the student body and the faculty will realize that we are a serious-minded group trying, through a mature outlook, to have a beneficial college career.

The writer of the letter asked why somebody did not try to get a dormitory for the coeds at State College. I do not see any analogy between the need for a dormitory for State College coeds and our sorority. Why she included the two subjects in the same letter is beyond me, but, since she did put the two subjects together, I shall present the following facts:

Our newly-elected registrar and only senior member of our colony has been working for a dormitory for the coeds for the last four years. Last year, the Administration of State College made available for the coeds the top floor of the Alumni Building. Our newly-elected vice-president was in charge of trying to get enough girls to live there, but, because of the high costs and many other

We would be please to know that the student body, including the fraternities, approves of our colony and its aims. Many people have been telling us what our sorority will do, such

as have wild parties, become snobbish, and form cliques. Maybe this is what these people would make a sorority, but we have our own ideas about what a sorority should be.

Our national chapter has set up many high standards for its members, and we have approved them and will abide by them. I hope that the student body and the faculty will realize that we are a serious-minded group trying, through a mature outlook, to have a beneficial college career.

The writer of the letter asked why somebody did not try to get a dormitory for the coeds at State College. I do not see any analogy between the need for a dormitory for State College coeds and our sorority. Why she included the two subjects in the same letter is beyond me, but, since she did put the two subjects together, I shall present the following facts:

Our newly-elected registrar and only senior member of our colony has been working for a dormitory for the coeds for the last four years. Last year, the Administration of State College made available for the coeds the top floor of the Alumni Building. Our newly-elected vice-president was in charge of trying to get enough girls to live there, but, because of the high costs and many other

factors, not enough girls were interested in this plan. This year, after the colonization of Sigma Kappa, I made a twenty minutes long appeal to the Consolidated University Council for a dormitory for State College coeds.

If we, who may well be soon living in a sorority house, can work for a dormitory for the remaining girls, we hope that they, who will benefit from a dormitory, will do as much and work with us.

Linda Wey, president
Colony of Sigma Kappa
(Editor's note: Whe-e-e-w-w-!!)

To the Editor of
The Technician:

I think you are wrong, to say the least and to put it mildly, to criticize the administration of Duke University for suspending the student newspaper. It seems to me that the administration's decisions was a light action that should have been taken against a writer and an editor for allowing such a base, distorted, sordid, and blasphemous article as "A Christmas Story" to appear in print.

I am really sorry for Steve Cohen and, after having prayed for him, I sent him a letter.

Ronald Creech, Pastor
Edgemont Free Will
Baptist Church

By now, the Christmas parties for the underprivileged children of Raleigh are over and most of us fraternity men are launched into the Christmas spirit. I'm sure that the parties were a success, and I'm also sure that the kids will remember your kindness for a long time.

As you have probably noticed from the quantity and quality of these articles, I'm getting a lot of co-operation from you publicity (?) chairmen. Well, I've tried and that's about all I can do.

One report has come in, however, from the Sigma Chi house on their Playboy Party last Saturday night. The house was decorated in authentic Playboy style. (Yes, including the Playboy mates!) There were also assorted Playboy decals and balloons sticking and hanging throughout the house. All the brothers there have said that it was a tremendous party! Maybe a few other fraternities will break away from the standard parties, no and try something different.

You Greeks have a sad Christmas both in traveling your homes and in your festivities. I'd like to pass this Christmas card inscription onto you which bears a little bit thought.

"Man's ultimate destiny depends not on whether he learns new lessons or makes discoveries and conquests, on his acceptance of the lessons taught him close upon two thousand years ago."

The Happy Holidays ... For The Ones Still Alive

By Barry Shaw
Last Christmas, during the long, usually-joyous holidays, record numbers either murdered each other or themselves. This wholesale slaughter took place

Death on the Highways

on our highways, where millions open a hole in the bloody crowd as they watch the bodies of "some college kids" being scraped from a red road, the blood curdling cry of a young girl with her screaming mouth

None of these future corpses had the slightest idea that their life would end in a lonely ditch, against a broken telephone pole, or in a twisted mass of what once was a car, with only a statistic in a holiday death report to be remembered by.

Student Government THE TECHNICIAN DEC. 14, 1959

(Continued from page 1)
The Blue Key appropriation got through a little bit easier, perhaps because several members of the Blue Key Fraternity are on the legislature. However the Blue Key appropriation, too, was cut somewhat to \$158.50.

Later, Senator John Fulton stated that in all probability the matter of signing the loyalty oath will be brought up in the next meeting. He urged all members to come prepared to discuss the matter thoroughly. I imagine we can all expect one of those long, drawn-out, informal debates next week over this matter, however, this is immaterial at this point.

The point that I would like to bring out is that if anyone has any feeling over the matter of signing the loyalty oath on government grants he should state his ideas to his Senator so that

the Senator can bring them out in the next meeting. This is a very important item to State College. If the Student government decides to do so State College will withdraw from the program of student grants from the federal government. You can read the details of this matter in the last edition of *The Technician* in the "Editorial Comment".

I would strongly suggest to any student having government grant that, if he wishes to keep the grant, he state his ideas on this subject to his senator. Watch for the results of action taken in the legislature in this column on Jan. 11. It should be very interesting to see if State will be the first southern college to withdraw from the Government grant program.

Examine the "Mix"

AT GRUMMAN AIRCRAFT

The Defense Department policy of relying on a "WEAPONS MIX" as the best war deterrent is reflected at Grumman. The company has always abided by this concept by putting its corporate effort into many diversified projects, both military and commercial. It is precisely this "COMPANY MIX" that is creating a wealth of engineering opportunities.

MOHAWK, a new observation plane on which production began in 1958—Grumman's first Army airplane—is designed to operate from small unimproved fields and will be used for purposes of tactical observation. Featuring a 59-knot stall speed and relatively the same short take-off and landing (STOL) capabilities as the Army's present light-weight single-engine airplanes, the Mohawk will be able to virtually "live" with the Army in the field.

ANTI-SUBMARINE WARFARE The award to Grumman by the U. S. Navy of a contract for a new anti-submarine airplane, the S2F-3, is the result of an intensified effort on the part of our Anti-Submarine Warfare development team (ASW). The S2F-3 was designed to combat what may well be considered to be the free world's greatest menace . . . the submarine!

COMMERCIAL AVIATION—THE GULFSTREAM Grumman's new prop-jet business transport. The Gulfstream marks the return of Grumman to commercial aviation. This 350-mile-an-hour pressurized aircraft, now in full-scale production has been ordered by many of the nation's leading corporations.

EARLY WARNING An early warning airplane serves as an "electronic fence" for the Navy. Designed to operate from aircraft carriers far at sea, the plane patrols the extremes of defense perimeters to detect impending attacks by enemy air and sea forces. Carrying detection gear in a huge saucer-like radome atop its fuselage, the early-warning plane identifies approaching "strikes" and relays data to task force Combat Information Centers for the immediate dispatch of defensive fighters or missile units.

MISSILE & SPACE TECHNOLOGY

The Navy Department selected the Bendix Aviation-Grumman Aircraft proposal as the winning design, in a sixteen-company competition, for its new long-range air-to-air guided missile, The Eagle. The Eagle will equip the Navy with a new generation of air-to-air missile capabilities.

Top design engineers and research scientists are studying a wide range of problems connected with space and its exploration to meet the challenges which stand somewhere between the present and the realization of a true space age.

HYDROFOIL SEACRAFT A contract to design a high-speed hydrofoil-equipped vessel suitable for operation on the open seas has been awarded Grumman Aircraft Engineering Corporation by the Maritime Administration. The feasibility of employing hydrofoils to increase ocean transportation speed and comfort has been recently established by a Grumman Study. The study's results showed that hydrofoil craft were well-suited to a wide range of high-seas operations.

Our representative will interview Engineering Degree Candidates majoring in aeronautical, mechanical, electrical or civil engineering, math or physics on Jan. 6

Lutz Stars In State Win; Kansas Whips Pack, 80-58

REYNOLDS COLISEUM, Dec. 11—Denny Lutz, a sophomore from Charlestown, Indiana, came off the bench to play the last five minutes of the contest and lead the Wolfpack to a 66-59 victory over Kansas State.

Lutz, who had played briefly in two other contests, was one of many heroes Friday night. Bob DiStefano, Jon Ed Simbeck, and Stan Niewierowski all were heroes in a fine come-back against K-State.

Coach Everett Case was at his best as he used many combinations in trying to find one that would click.

Coach Case realized that this was a must game for his cagers, and he let them know so by delivering a halftime lecture that was filled with fire and fury.

The Wolfpack, who had been down as many as ten points (18-28), in the first half came out to start the second half with the idea that they were going to win the ball game.

The Wildcats quickly grabbed a seven-point lead against the Pack, 31-38.

However, baskets by Simbeck and DiStefano kept the Wolfpack in the contest.

A basket by Simbeck with 12:18 left in the game tied the score at 45-45.

From this point the score was tied five more times until the Wolfpack grabbed the lead 58-57 on two free throws by DiStefano at the 2:29 mark.

Lutz made two baskets within 28 seconds of each other to wrap the contest up. His two baskets put the Wolfpack ahead 62-57 with 1:14 left in the contest.

Lutz and Anton Mehlbauer added two more free throws each to make the final score read 66-59 in favor of State.

It was a great contest for the Wolfpack to win.

The ability to out rebound the much taller Wildcats and the desire of a group of untested and untried sophomores led the Wolfpack to victory.

DiStefano led the Wolfpack scoring with 16 points, while Larry Comley added 17 points for the losers.

The Wolfpack hit on 26 out of 59 shots from the floor for a 44.1% shooting accuracy, while the Wildcats hit on 22 out of 80 shots for a 27.5%.

REYNOLDS COLISEUM, — Dec. 12 — Sophomore center, Wayne Hightower, scored 25 points in leading a strong Kansas University team over State's Wolfpack, 80 to 58.

The final margin of 22 points was no indication of the contest that was played between the two teams. With 13:40 left in the game, the Jayhawks led by only one point, 44-43.

Hightower and Allan Donaghuie, who led the Jay hawks through most of the contest, fouled out with over nine minutes left in the contest.

The Jayhawks never did relinquish the lead however.

With 6:39 left Jon Ed Simbeck hit a jump shot to narrow the margin to five points, 58-53. From here, the Kansas substitutes took over and stretched

Notes From The Wolfpack

William Neal Reynolds Coliseum, home court of the Wolfpack, ranks eighth in the nation in seating capacity for on-campus gyms. Built in 1949, the Coliseum seats 12,400 for basketball.

14th season under Case, has played in 18 overtime games during that span. The won-lost mark in extra period play is 12-6, he most notable of the overtime games was against Canisius in the first round of the '56 NCAA tourney. The Casemen lost that one in four OTs, 79-78.

only once in the past three years.

The Wolfpack's longest win streak in a single season was 19 during the 1947-48 campaign. State lost to DePaul 75-64 in the opening round of the NIT to snap the win streak.

Only two teams have ever scored 100 points against the Wolfpack, and both opponents reached the 107 mark. Villanova did it in 1954-55 and West Virginia turned the trick in 1956-57.

In the past 14 years, which teams have defeated the Wolfpack the most? North Carolina and Duke claim 10 wins each over State while Wake Forest, including this year, has nine. But Case's cagers hold big margins in the series, State is 24-10 against Duke, 26-10 against Carolina and 30-9 vs. Wake Forest.

The longest streak over two seasons was 23. The Pack won the last 12 games of 1954-55 and the first 11 in 1955-56.

State, however, has passed the century mark 24 times but

As for basketball scoring, how about the State-William and Mary game in 1954-55. Final score was 126-99 in favor of the Wolfpack with Ronnie Shavlik scoring 55 points.

For Graduates Seeking

GROWTH TYPE CAREER OPPORTUNITIES IN CHEMICAL INDUSTRY!

Approaching its 50th year of specialization in industrial chemicals and commercial explosives, ATLAS is constantly on the alert for graduate engineers seeking unusual growth opportunities. Here at ATLAS in Wilmington, as well as in our nine manufacturing facilities and four research centers throughout the United States, we are planning and looking, as always, to the future.

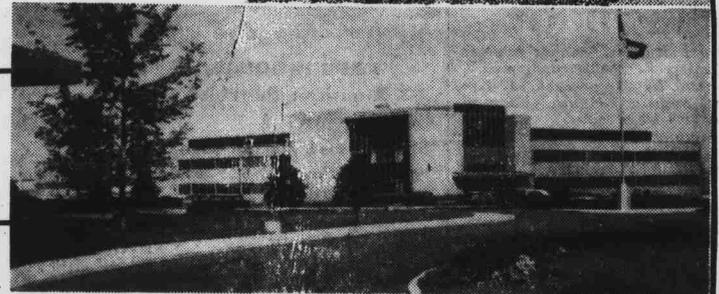

Since YOUR future, as well as OUR OWN, could be closely linked together in the expansive period ahead, we invite your consideration of our opportunities.

For those who have degrees in Chemistry and Chemical Engineering, we have a wide range of openings. Our present need is for qualified men at every level for work in Research, Development, Sales, Management, Staff Functions and Production. We also need imaginative graduates who seek unusual experiences in Civil, Mechanical and Mining engineering.

Our financial rewards are many. Salaries are competitive with the industry; our benefits are unsurpassed. And, opportunity for rapid advancement depends on you . . . our planned program of management development will prepare you for the responsibilities you are capable of assuming.

ON-THE-JOB-TRAINING

Most new technical employees start at ATLAS with a formal training course at one of the company's laboratories. Afterward, they train on the job at an ATLAS laboratory, plant, or sales office, where they gradually assume increasing responsibility under the guidance of an experienced ATLAS staff member. Men with specialized qualifications may immediately begin the on-the-job phase of the training program.

State Swimmers Defeat Duke, 52-43; Freshmen Set Records

State's Wolfpack Swimmers opened their regular season last Wednesday with a victory over the highly-rated Duke Blue Devils at Frank Thompson Pool.

Duke won the two relay events, but State, coached by

Willis Casey, scored heavily in the individual events to come out on the long end of a 52-43 score.

John Wilcox paced the win with victories in the 200 yard butterfly and the 200 yard individual medley.

Bob Adams won the 250 free,

Robin Best won the 500 free, and Dick Elam won the 50 free in gaining points for the Pack.

State College gave a strong indication that it would soon re-establish itself as a national swimming power as two freshmen set National Freshmen records in the meet against Duke.

Smokey Ellis of Miami, Florida, covered the 50 yard freestyle in 22.3 seconds to break the old record of 22.5, held by Rex Aubrey of Yale. Ellis also won the 100 yard freestyle.

Peter Fogarasy of Budapest, Hungary, swam the 100 yard breaststroke in 1:05.8 to erase the old mark of 1:06.3 set last year by Zoltan Bary of Yale.

Ed Spencer of Philadelphia was a double winner in the State victory as he took the honors in the 100 yard butterfly and the 200 yard freestyle.

Varsity Results

400 yd. Med. Relay—Duke

(Blue, Shumaker, Weber, Smith) T. 4:07.8

250 Freestyle—1. Adams (S), 2. Best (S), 3. Congling (D), 2:44.9

50 Freestyle—1. Elam (S), 2. Cutter (S), 3. Dickinson (D), 24.3

200 Individual Medley — 1. Wilcox (S), 2. D'Anna (S), 3. Weber (D) T. 2:20.5 (New pool record)

Diving—1. Buen (D), 2. Coble (S), 3. DiVigne (D). 164.8 points.

200 Butterfly—1. Wilcox (S), 2. Best (S), 3. Naugde (D), 2:21.9.

100 Freestyle—1. Smith (D), 2. D'Anna (S), 3. Taylor (D), 52.8.

200 Backstroke—1. Blue (D), 2. Cutter (S), 3. Sandelin (D) 2:28.3.

500 Freestyle—1. Best (S), 2. Adams (S), 3. Elsey (D), T. 5:50.4 (New pool record).

200 Breaststroke — 1. Weber (D), 2. Singer (S), 3. Richard (D), 2:48.6

400 Freestyle Relay—1. Duke (Coughlin, Schroeder, Brown, Smith) T. 3:53.3.

Lutz Stars

(Continued from page 4)

their lead to a 22 point victory by outscoring the State five 22-5 in the final six minutes of the contest.

State could have held the margin down to ten points if they had elected. However, they decided to go for the win.

The Wolfpack, tired from the contest the night before, just simply ran out of steam.

The Wolfpack made a terrific game out of it except for the last six minutes. Bob DiStefano was the high scorer for the Pack with 13 points.

This was the Wolfpack's last home contest until the Dixie Classic.

They travel to Greensboro to take on the Villanova Wildcats Wednesday night. After that they go to Atlanta, Georgia to play the strong Georgia Tech cagers on Saturday night.

The ACC held its own by taking three of the four contests with the Big Eight teams, Kansas and Kansas State. Carolina, without Doug Moe and Dick Kepley, looked the best of the four teams competing in the Holiday Double-header.

They defeated Kansas by a score of 60-49, and then, clobbered Kansas State, 68-52.

Carolina travels to the Blue Grass Invitational this week where they meet Kentucky in the opening game. West Virginia and St. Louis meet in the other game.

The Tar Heels will be out to gain more prestige for the Atlantic Coast Conference.

Denny Lutz, Athlete of the Week, is shown driving for a lay-up against Kansas State. Guarding Lutz is Wally Frank (34) and Cedric Price (32) of Kansas State. Lutz scored six points in the 66-59 win. (By Skip Kugler.)

On Campus with Max Shulman
(Author of "I Was a Teen-age Dwarf", "The Many Loves of Dobie Gillis", etc.)

DECK THE HALLS

When you think of Christmas gifts you naturally think of Marlboro cigarettes, leading seller in flip-top box in all fifty states—and if we annex Wales, in all fifty-one—and if we annex Lapland, in all fifty-two. (This talk about annexing Wales and Lapland is, incidentally, not just idle speculation. Great Britain wants to trade Wales to the United States for a desert. Great Britain needs a desert desperately on account of the tourist trade. Tourists are always coming up to the Prime Minister or the Lord Privy Seal, or the Thane of Glamis, or like that and saying, "I'm not knocking your country, mind you. It's very quaint and picturesque, etc., what with Buckingham Palace and Boveril and Scotland Yard, etc., but where's your desert?")

"...but where's your desert?"

Before I forget, let me point out that Scotland Yard, Britain's plain-clothes police branch, was named after Wally Scotland and Fred Yard who invented plain clothes. The American plain-clothes force is called the F.B.I. after Frank B. Incheliff, who invented fingerprints. Before Mr. Incheliff's invention, everybody's fingers were absolutely glassy smooth. This, as you may imagine, played hob with the identification of newborn babies in hospitals. From 1791 until 1904 no American parent ever brought home the right baby from the hospital. This later became known as the Black Tom Explosion.

(But I digress. England, as saying, wants to trade Wales for a desert. Sweden wants to trade Lapland for Frank B. Incheliff. The reason is that Swedes to this day still don't have fingerprints. As a result, identification of babies in Swedish hospitals is so haphazard that Swedes flatly refuse to bring their babies home. There are, at present, nearly a half-billion unclaimed babies in Swedish hospitals—some of them well over eighty years old.)

But I digress. Marlboro is, of course, an ideal Christmas gift for your friends and loved ones who enjoy filter cigarettes. If, on the other hand, your friends and loved ones like mildness but don't like filters, then you can't go wrong with a carton of Philip Morris. If your friends and loved ones like a subtly mentholated cigarette that combines refreshing taste with high filtration, then buy a carton of Alpines. (Alpines, incidentally, are named after the late Albert G. Pine. Al Pine worked all his life to invent a cigarette that would combine light menthol and high filtration, but alas he never succeeded. As by-products of his research he did manage to invent the atom, the gooseneck lamp and the cocker spaniel, but the lightly mentholated high filtration cigarette, alas, never. Now this dream is realized, and what could be more fitting than to pay tribute to this gallant man by calling this cigarette Alpine?)

We, the makers of Marlboro, Philip Morris and Alpine are now enjoying our sixth year with Max Shulman. Obviously, we think he is a funny fel'ow. We think you'll think so too, if you look at his television series "THE MANY LOVES OF DOBIE GILLIS"—and read his latest book, "I WAS A TEEN-AGE DWARF."

SYMPHONIC BAND MEMBERS are to report to rehearsal at 12:00 noon Monday, Dec. 14, in complete uniform for band photograph.

D. H. HILL LIBRARY CHRISTMAS HOLIDAYS HOURS:

Open—Wednesday, Dec. 16, 8:00 a.m.—6:00 p.m.
Thursday, Dec. 17, 8:00 a.m.—5:00 p.m.
Friday, Dec. 18, 8:00 a.m.—5:00 p.m.
Closed—Saturday, Dec. 19 through Sunday, Dec. 27.
Open—Monday, Dec. 28 through Friday, Jan. 1—8:00 a.m.—5:00 p.m.
Closed—Saturday, Jan. 2, and Sunday, Jan. 3.
Regular schedule resumed Monday, Jan. 4.

ATTENTION JUNIORS—Any juniors who have not ordered their rings may do so now in the lobby of the College Union.

CAPS AND GOWNS FOR GRADUATION EXERCISES FEBRUARY 1, 1960—Place your order and measurements for your cap & gown at the Watauga Book Shop before Dec. 16. They will need to know your chest measurement, height and cap size. Pick up caps and gowns Friday, Jan. 29, 8:30 a.m.—5:00 p.m., and Saturday, Jan. 30, 8:30 a.m.—12:00 noon at the new Students Supply Store located immediately west of the Coliseum.

BICYCLES—The Security Office in the M & O Division has notified the Division of Student Affairs that they have eleven unregistered bicycles which have not been claimed by the owners. Any student whose bicycle is missing should check with the Security Office in the West Stadium Building.

ROOM RENT FOR THE SPRING SEMESTER will be due and payable in the **BUSINESS OFFICE ON OR BEFORE JANUARY 16th**. A statement of room rent is being mailed to each dormitory resident. Remittance should be attached to the statement and be mailed to the **BUSINESS OFFICE, Room "B" Holladay Hall**. In order to reserve your present room, the rent must be paid by the above date or the room will be made available for re-assignment to other students.

NATIONAL FOUNDATION HEALTH SCHOLARSHIPS—Available to currently enrolled college undergraduates; 49 in Medical Social Work, and 102 in Medicine. Value: \$500 per

year for 4 years. Deadline for filing applications: April 1, 1960. Further information: 201 Holladay Hall.

OPPORTUNITIES FOR FOREIGN STUDY:

1. **Fellowships for Graduate Study in Poland.** About 19 awards providing tuition, living accommodations, maintenance, and medical care. A few travel grants available. Limited to U. S. citizens with bachelor's degrees and a knowledge of the Polish language commensurate with the nature of the proposed studies. Deadline: Jan. 15, 1960.
2. **British Universities Summer Schools 1960.** A limited number of full and half scholarships. Areas of study limited to Literature, history, philosophy and the arts. Applicants must be graduate students or students in their last two years of undergraduate work. Deadline for scholarship applications: March 1, 1960.

EXCELLENT JOB ON CAMPUS—Two students needed to operate linen rental exchange. Must have satisfactory academic standing and present evidence of financial need. Student Employment Office, 207 Holladay Hall.

Veterans' Corner The Next Edition

By Sam Blackwood

This is not a new column, merely the continuation of an old one. The purpose of this column will be to report on the proceedings of the Veterans' Association of N. C. State College and to keep all veterans in school informed of the latest news from the Veterans Administration.

Officers of the Association this year are: Wayne Philbeck, President; Sam Blackwood, Vice President; Jim Lawrence, Secretary; Ted Byers, Treasurer; and Jerry Massey, Assistant Secretary. Committee Chairmen are: Jim Hilbert, Projects; Gene Hartsell, Programs; Darwin McCombs, Social; and Art Reed, Membership.

Meetings are held the 1st and 3rd Fridays of each month in the College Union at 7:00 p.m.

The last meeting was held December 4th. The Association met their new faculty adviser, Mr. Clarence Bomar of the ME Department. A report was given on the results of aid during Thanksgiving to a local welfare

case and the members present voted to continue the project during Christmas. A membership drive was launched. This drive will continue until February 20, 1960 and will culminate in a banquet and dance.

News from the Veterans Administration:

Veterans who wish to apply for GI loans will have until July 25, 1960 for WW II veterans and until February 1, 1965 for Korean conflict veterans.

Korea veterans have three years from the date of their discharge to begin educational training. They have eight years from the date of discharge in which to complete the training. The entire training program has a final dead line of January, 1965.

There are no deadlines applicable for medical care, hospitalization, domiciliary care, or applications for pension or compensation.
