

E. B. Grover crowns Kay Perryman as "Fashion Queen of 1960" in the annual student fashion show which is sponsored by Phi Psi, national Textile Fraternity. The garments which were shown in this show, which was held Friday, were all made by the models from fabrics donated by the leading Textile manufacturers of this area. (Photo by Hoey)

In Next Few Days

Reactor to Begin Operation

By Mary N. Yionoulis
The instrumentation system for North Carolina State College's second and larger nuclear reactor—to be placed in operation within the next few days—has been completed.

The system, which measures and controls the power in the new 10-kilowatt heterogeneous reactor, was completely designed and constructed by staff members of the college's Department of Physics.

"One of the principal objectives in designing our own instrumentation system," explained Dr. H. A. Lamonds, director of the School of Engineering's nuclear reactor project, "was to achieve extreme levels of reliability not usually found in commercial instruments."

He cited the reliability of the instrumentation system which was constructed by engineering staff members for the college's first nuclear reactor and which is still being used.

"This system has been used 24 hours a day for a period of over four years, without any service whatsoever," stated Dr. Lamonds.

In addition to Dr. Lamonds, staff members who worked on the new system are Max Koonce, instrumentation supervisor; E. Jack Story, health physicist; Harold Carter, operations engineer; and technicians Doug Simpson of Albemarle, Chris Charron of Austin, Texas, Jim Torrence of Salisbury, and Jack Massengill of Durham, all engineering students.

Dr. Lamonds further explained that it is the neutron density of the reactor which is measured

and controlled. This density is directly proportional to the power in the reactor and is a readily-measured convenient quantity.

The nuclear reactor director likened the instrumentation system to the nervous system of the human body saying that both are "control systems performing in a useful and in a predictable way."

The instrumentation system is operated from a control room which houses a control console (See REACTOR, page 8)

Installation Ceremonies Held At Coliseum Today

Dr. John Tyler Caldwell was formally installed as the Chancellor of North Carolina State College this afternoon in ceremonies conducted at Reynolds Coliseum. The rites, held on the 73rd anniversary of the College's founding, were attended by many of the country's most prominent educators as well as hundreds of visitors from all over the state.

The Technician will have pictures and stories of the event in Thursday's edition.

Greetings to the chancellor were extended by Judge Rudolph I. Mintz, representing the Board of Trustees; Prof. L. Walter Seegers, chairman of the Faculty Senate; H. Edward Knox, president of the Student Government; and Mose Kiser, from the General Alumni Association.

The oath of office was administered by J. Wallace Winborne,

C. Addison Hickman Receives Top-Level Teaching Position

Dr. C. Addison Hickman, Dean of the School of General Studies at State College, was elected the Vandever professor of economics at Southern Illinois University in Carbondale, Illinois, March 4.

Dean Hickman, a member of the State College faculty since 1953, will relinquish his post here at the end of the current semester to accept the appointment.

He was named to the endowed chair of economics today at a meeting of the Board of Trustees of Southern Illinois University, one of the leading institu-

tions of higher learning in the Midwest.

Selection of Dean Hickman ended a nation-wide search by the Illinois institution for the "scholar whose professional field and interest is in economics, particularly in the teaching and dissemination of knowledge with regard to the capitalist system.

He will be the first recipient of the Vandever professorship, which was endowed by W. W. Vandever of Cleveland, Ohio, a Southern Illinois University alumnus and president of the big Ashland Oil and Refining. Last September Vandever

gave his alma mater 5,000 shares of stock in the Ashland Oil and Refining Company with which to establish the professorship. The gift will cover the salary, various allowances, and other teaching and research expenses.

The post is regarded as one of the top-level university teaching positions in the United States.

A nationally-known scholar and author, Dr. Hickman joined the North Carolina State College faculty July 1, 1953, when he became head of the college's Department of Economics.

He was promoted to the post of dean of State College's big School of General Studies in February, 1956, replacing Dr. John W. Shirley, who became dean of the State College faculty.

As dean of the School of General Studies, Dr. Hickman headed the faculty which provides instruction in the liberal arts and humanities to State College's more than 6,000 students. The school embraces eight major departments—English, History and Political Science, Economics, Modern Languages, Philoso-

phy and Religion, Physical Education, Social Studies, and Sociology and Anthropology.

Prior to joining the State College faculty, Dean Hickman was research professor and professor of economics at the University of Illinois at Urbana, Ill.

Born in Sioux City, Iowa, June 11, 1916, Dr. Hickman was graduated from East High School, Sioux City, Iowa, 1934; and holds the B.A., M.A., and Ph.D. degrees from the State University of Iowa. He also studied at Columbia University, New York.

Prior to his service at the University of Illinois, he was instructor in economics at Stetson University, DeLand, Fla., 1938-40; instructor to professor of economics, State University of Iowa, 1940-50; and was also attached to the U. S. Army Air Corps as contract termination and plant clearance expediter at the Chevrolet Motor Company, Detroit, Mich., 1944-45.

In addition to his tenures at Illinois, Stetson, and the State University of Iowa, Dr. Hickman also has been a lecturer in work-

(See HICKMAN, page 6)

In Textile School

Department Created

A Department of Textile Technology has been established in the School of Textiles at North Carolina State College.

Dr. Malcolm E. Campbell, Dean of the School of Textiles, said the department was created through the merger of the Department of Fiber and Yarn Technology and the Department of Fabric Development.

Prof. E. B. Grover, who is the Abel C. Lineberger Professor of Textiles and who has headed the Department of Fiber and Yarn Technology, has been named by Dean Campbell as the head of this new Department of Textile Technology. Prof. B. L. Whittier, who has headed the Department of Fabric Development, stepped down as department head last year to devote his full time to teaching.

Dean Campbell said the new department will consolidate the educational efforts in the entire area of textile technology with the expected result that teaching in these areas will be improved. He expressed the belief that the new department

will eliminate the possibility of duplication of course content, and permit a more functional approach to the teaching of textile technology.

Professor Grover stated that Prof. D. S. Hamby is to coordinate new curriculum activities (See NEW DEPARTMENT, page 8)

Orientation Committee Calls For Group Leaders For Fall

Again this year as in years past, the Student Government Commission on Orientation is going to use the small group method of orientating the new students that come to State College.

The small group method depends mainly on the leadership of group leaders. These group leaders are given a group of from ten to fifteen new students, who they lead in discussions about the various aspects of life here at State. The group leaders are chosen from a group of interested upperclassmen who apply for the job.

In return for their services, the group leaders receive a letter of commendation from the college and a copy of this letter is placed in the student's permanent record. He also gets early registration privileges and a \$5.00 meal book from the cafeteria. The cafeteria donates one-third of the cost of these books and the remainder is paid by the Orientation Commission. He will also receive one free meal from the College Union.

Those of you that have been through this program know that it is very useful to the new students. Thorough discussions on

such subjects as academics, co-curricular activities, social life, fraternities, and Student Government here at State, the new students gain an insight into life here at State.

You now have the opportunity to become a part of the team, as the leader of one of these small groups. If you were a Group Leader last fall, or if you are an upperclassman with a sincere desire to work with a small group, or if you are an outstanding freshman, the Student Government needs your service. The Orientation Commission is starting their annual drive to get Group Leaders this week. From March 7 to March 18 applications for those students interested in being Group Leaders next fall will be available. These applications may be picked up at the main desk in the College Union, at 207 Holladay Hall, or in room 106-D Bragaw dorm.

The only things expected of the Group Leaders are that they return to school one week early, and that they attend one training session this spring.

Why don't you pick up an application, fill it out, and return it to the College Union main desk? If you are chosen to be a Group Leader, and serve as one, you will find that you are greatly rewarded in knowing that you have done a big job and done it well.

If there are any questions about the application or the duties of a Group Leader, please come by room 106-D Bragaw and they will be answered.

Clark Prepares To Join Fracas

Anton Meulbauer and Dave Budd scuffle on the floor as the referee tries to break the fight up and Kenzie Clark prepares to join in. This scuffle occurred in the last minutes of the semifinal game which Wake Forest won by 71-66.

—NOTICE—

All representatives to the North Carolina Student Legislature are to meet in the lobby of the College Union at 12:30 p.m. Thursday, March 10.

To the Editor of the Technician: ...lations cause disrespect for all

Without doubt, many students have by now noticed the absence of the usual bi-weekly article concerning the Student Government meeting. No doubt, many were awaiting the outcome of the latest controversy: the two resolutions pertaining to possible changes in the Honor System here at State College. (See page 1, March 3 issue.)

However, to the surprise of probably very few, the S. G. did not meet last Thursday night. As we all remember, the State College campus was covered with ice and snow, making travel hazardous. But it seems that this reason was not the one which was responsible for the Government not meeting.

Because of a slight oversight by someone, the representatives did not receive a notice saying that the meeting would be held. Such a mistake would usually make little difference, but, in this case, the Student Government had several important items to consider. Besides the two resolutions concerning the Honor System, much discussion was scheduled in order to iron out the final plans for the State College representatives to the State Student Legislature this weekend here in Raleigh.

Responsibility is an important attribute, and one that many people strive to attain. However, the striving, which naturally entails mistakes, should take place before one assumes an office as important as one in the Student Government.

Gift to Raleigh

Again this year, many State College students were seen on the streets of Raleigh helping the citizens of Raleigh and neighboring communities free themselves from the masses of ice and snow. (See article, this page.)

Often, the State students and the Raleighites do not see eye-to-eye on certain events and the results are strained relations which are good for neither group. These relations often lead to harsh, meaningless words, for which each group is apologetic afterwards.

The only way that State College (and it must be us) can minimize these unhappy occurrences is by gestures such as these ones last week. It is hoped that these gestures will continue whenever Raleigh citizens are in distress. It's good for public relations as well as personal satisfaction.

Our Loss

With sincere feeling, we ready of the resignation of Dr. C. Addison Hickman, dean of the School of General Studies, to accept the Vandever professorship at Southern Illinois University.

We must be proud that Dean Hickman has been named to this coveted position, but we cannot help but feel the loss when we look at his accomplishments since he assumed his present position in 1953. He has continued to build, by securing many top men in the fields of which he is head, a School of General Studies which is known throughout the United States.

He has done this even though he was dean of a School that was, and is unable to grant degrees. This was a handicap, for many teachers have the feeling that their talents are being somewhat wasted when they must teach only those students who are required to take their courses.

However, Dean Hickman has performed his job in an admirable way. We can only give him our thanks for a duty well done and our congratulations for this new and perhaps greatest, honor.

Greeks On Campus

By Bill Marley

Last weekend the Division 8 Leadership Conference of Sigma Nu Fraternity was held at State. The local chapter was host to delegates from 8 chapters in North and South Carolina. The men met for three hours Saturday morning and three hours in the afternoon. This was followed by the movie at the C.U.

Saturday night was the finish with a banquet at Scandia Village. Dr. Clark, the U.N.C. chapter's adviser, was the main speaker at the banquet.

Sigma Nu also "sponsored" some car pushing activity on Hillsboro in all that downpour of snow. The men of Beta Tau chapter pushed from 2 to 6:30 in the afternoon accompanied by some Farmhouse, Kappa Alpha, and Theta Chi men. I'm sure you all have seen A. C. Snow's and "Uncle" Craven's praise on this subject which sho' helps our sometimes bedraggled reputation.

Our sorority was also hard at work last Saturday. The mem-

bers of Sigma Kappa met at the home of Mrs. Hawley Cobb, who is in charge of Raleigh alumnae, and sang songs in an informal acquaintance period topped off with a spaghetti dinner.

Sigma Kappa sisters from Duke University (30 strong) held a pledging ceremony in the Memorial Room of the Alumni Building on February 12. These 11 pledges will be initiated sometime this semester and will then be formally the first members of N.S.S.'s sorority: Melissa Lindsey, sophomore in recreation, Fort Worth, Texas; Fran Birch, Raleigh, sophomore in Eng. Math; Dee Clark, Beaulieu, junior in Eng. Math; Sally Holt, Sanford, freshman in textiles; Betty Harris, High Point, sophomore in Eng. Math; Nancy Moody, Raleigh, senior in Science Ed.; Helen Wigg, Wilmington, freshman in Chem. Eng.; Patricia Garner, Raleigh, junior in Zoology; Joyce Meares, Raleigh, sophomore in recreation; Peggy McConnell, Pittsburgh, Pa., freshman in Civil Eng.; and Lane Davis, Mt. Ulla, sophomore in Design.

opinion that the ... traffic on campus this year tops all records for bpnrs.

It is my opinion and the opinion of some experts whose articles I have read that one of the big reasons for traffic violations is stupid and poorly conceived traffic laws. I quote Don Wharton, Reader's Digest, December, 1955, Page 33. "Highway studies have proved again and again that unreasonable and unenforced regulations cause motorists to lose respect for all traffic laws." Also I quote the summary sentence to his article with which I wholeheartedly agree, "Let's do away with the dangerous hazards of ridiculous, unenforceable regulations which make lawbreakers of most drivers." If it is true that such regu-

type or traffic regulations which I have in mind: (1) The new entrance to State College beside the Textile building. I agree with many people that a new entrance was needed, but why did they have to ruin it all by making it a one-way street?

(2) The changing of the direction of traffic in front of the Textile building. I will also admit that there was some confusion the old way, but why wasn't some warning given or at least some good-sized signs erected? Speaking of confusion, have you tried to turn onto the street when coming off Hillsboro?

(3) The stop signs for pedestrian crossings on the street on front of the Coliseum. Boy, if anything breeds disrespect, this act should sure do it. Have you ever tried driving and stopping every fifty feet? It's not only aggravating, it's downright stupid. Why not a sign, "Yield right of way to pedestrians"? This would cause traffic to slow, give walkers the right of way, and yet, not require constant stopping.

(4) Now they have reached the ultimate. They have again closed the road behind Tucker Dormitory. What possible reason could there be for this move? I live in the basement of Owen and I drive. If I want to go home or drive west, this little move costs me a half mile or about two minutes. I happen to go west quite often and two minutes ten times daily can add up, not only in time, but also in the amount of gas consumed. I have never heard but one reason given for closing this street and that was that someone was afraid this street would be used as a fast escape route from the Coliseum. Have you ever tried to make that fast escape?

Seems to me that there is usually a line on this street as there is on every other street. I think you'll have to agree that four exits from the Coliseum are a heck of a lot better than three. Anyway, right now, I hope that the new road block has a big sign on it so no one will hit it tonight as happened the last time the blocking post was replaced.

NCS Boys Are Lauded

(Editor's Note: The following article is reprinted from the March 3 issue of the Raleigh Times. Student acts like this benefit us all because of bettered city-campus relations.)

Raleighites today were tossing bouquets at State College students.

Especially grateful were those motorists who ploughed along snow-laden Hillsboro Street yesterday afternoon and last night.

Dozens of slide-rule good Samaritans provided the brain and brawn to get many a motorist out of an unhappy situation caused by the snow and sleet.

Students pushed cars away from the curbs and over the hill, after the chain-less tires spun futilely on the snow and ice.

Other students with brooms brushed away the snow from the front and back windows of numerous cars.

And still others stepped into the street to direct traffic at clogged intersections.

Several people who called. The Times wanted the newspaper to express their appreciation.

On behalf of Raleigh's citizens—"Thanks, boys."

Dormitory Drivel

A RELICH FROM WELCH

ment was the issuance of a few tickets to our "honored" visitors, or it will

flooding by cars belonging to basketball fans from all over this state and surrounding states. Now we all know that the snow had the gutters blocked and that the cars that wanted to park at such places had to park a little further out from the curb than usual. Now granted that our campus is small, and that there is little parking space available for us, the paying students and faculty, for parking, this still does not give our "honored" visitors the right to park in intersections or on the sidewalks.

This writer took several walks each night during the tournament and found many cars parked in a manner hazardous to traffic and in such positions as to block several cars in. Not a one of these vehicles was registered to students or faculty members of N. C. State. If these vehicles were registered to students, you may be sure that M&O would have wasted no time in either issuing tickets or towing the offending vehicles off and impounding them. Why must we be persecuted by M&O's ultra-strict interpretation of the traffic rules when they do not enforce them on other persons? I can see letting visitors park in marked spaces, but I see no reason for them to be allowed to park on the sidewalks, the grass, in intersections, and in the driveways leading to parking lots, with impunity.

A few examples: 1) a car parked across the pedestrian crosswalk directly in front of the M&O security office, the vehicle was registered to a student at a neighboring college; 2) a station wagon parked with the wheels within two feet of the wall of Mann hall (this vehicle was parked almost totally on the SIDEWALK next to Mann on the University Drive); 3) a vehicle parked in the shrubbery in front of Patterson hall (across the entrance to the steps leading to Primrose Avenue); 4) a vehicle parked ON the bicycle rack in front of Patterson hall; 5) vehicles parked in the center of several parking lots on the campus, preventing the cars parked legally in the marked spaces from leaving; 6) vehicles parked in a manner blocking both lanes of traffic on University Drive, E. Broughton Drive, W. Broughton Drive, and numerous other streets.

Neither the M&O security police or the City of Raleigh Police Department did a single thing to remedy these conditions. All that it would have taken to prevent these things from happening on the second and third nights of the tourna-

seem to realize that this is what caused the "riot" on March 9, 1957. The students, then or now, were not responsible for what happened, but when the blame for any "unfortunate incidents" is passed out, it will fall right in the lap of John Q. Student. The visitors to this campus are welcomed warmly, but do they have the right to get away with illegalities which would result in a fine or penalty for a student doing the same thing? This writer feels that the students had better stand up for their

are you going to pay your salaries as human beings?

New Department

(Continued from page 1)

for the department and that work has already begun in the establishment of new course and programs to be started. The course and curriculum revisions are only one of several progressive steps to keep the School of Textiles ahead in the field of textile education.

Professor Grover also said the new department will enable the School of Textiles to offer a more diversified program, and simultaneously to correlate the various activities in the field of education and research in textile technology.

He added that the Department of Textile Technology will enable the School of Textiles to better pattern its educational program with the needs of the industry itself in the changes in textile yarns, new synthetics, blends of synthetics with natural fibers, and new processes and developments.

and room 207, Holladay Hall. Any Sophomore may be nominated by himself or any other students. The deadline for nominations is March 9, at 6:00 p.m. Please turn all nominations in at the College Union Main Desk.

The State's Mates will meet on Monday night, March 7, at 8:00 p.m. in the college Union. All members are urged to attend. The Beatniks will entertain.

Attention IE students: Mr. Charles G. Howard of American Viscose, Vice-President, Region III, will lead a short, informal discussion on "The AIEE Opportunity", in room 319 of Riddick, on Wednesday, March 9, at 3:00 p.m.

Bids for the St. Pat's Dance, which is sponsored by the Engineers' Council and will be held in the Coliseum on March 12, 1960, may be picked up at the respective students' departmental offices. Betty Lane Evans, Miss North Carolina will be at the dance.

A nationally-known research authority on the mechanical behavior of materials will deliver the keynote address at the opening session of the international conference on the mechanical properties of engineering ceramics at State College March 9-11.

He is Dr. Earl R. Parker, professor of metallurgy at the University of California and Director of the university's Institute of Engineering Research.

Dr. Parker's special field of research is the study of the mechanical behavior of materials particularly at high temperatures. He has received numerous honors for his contributions to metallurgical research. In 1956 he was awarded the Gold Medal Award from the American Institute of Metallurgical Engineers for the best research publication of the year.

He is a member of the National Advisory Committee for Aeronautics and a member of the National Academy of Sciences.

Long-range Planning Committee. Also a member of many professional and honor societies, Dr. Parker is a trustee of the American Society for Metals.

Prior to Dr. Parker's address, Dr. John T. Caldwell, chancellor of North Carolina State College, will welcome to the campus approximately 200 delegates from this country and abroad expected here for the conference. He will be introduced by Dr. J. Harold Lampe, Dean of the School Engineering.

The program includes ten technical sessions with noted men of science and engineering as speakers, from the United States, Belgium, England, and Norway.

Reactor

(Continued from page 1)

and a bank of recorders on a rack behind the console easily visible to the control operator.

From the console—which contains the operating controls for manipulating the reactor—all safety circuits and indicating devices and all vital nuclear reactor functions are monitored by multiple instruments for maximum safety of operation.

Such important information as reactor operating power, temperature, and radiation levels in the area are continually charted on the bank of recorders.

In addition, the staff members constructed four ionization chambers which are used to convert the neutron density of the reactor into electrical signals back to the control room. These boron-coated aluminum neutron detectors are valued at \$3,000 each. They are located inside the reactor shield about 25 inches from the core.

The system's safety devices are designed to automatically shut down the nuclear reactor in the event of any important deviation from the normal operating conditions.

Dr. Lamonds reports that the shut-down action is taken in less than 25 hundredths of a second.

When the new and larger reactor goes into operation, North Carolina State College's School of Engineering will have one of the most complete nuclear training and research facilities in the Southeast. It now has in operation a homogeneous nuclear reactor, a Van de Graaff particle accelerator, and a subcritical nuclear reactor assembly.

Blue Devils Advance On Win; at Deacons 63-50 In Final

By Jay Brame
REYNOLDS COLISEUM, RALEIGH, NORTH CAROLINA; The Demon Deacons of Wake Forest and the North Carolina State Wolfpack battled in the second game of the semi-final round of play to see who would earn the right to play the Duke Blue Devils, who upset the University of North Carolina in the first game of the semi-final round of play by a score of 71-65.

If the 12,400 fans that were on hand for the contest had known that this was going to be one of the roughest games of the whole tournament, they would probably have brought their boxing gloves and brass knuckles, for it was one of the bloodiest contests that this writer has seen in all his years observing basketball games in the Coliseum.

Both the Deacons and the Wolfpack knew that it was going to be a hard fought contest. The Deacons had 675 pounds of beef under the boards to the Wolfpack's 606. The action under the boards was tough

and furious, with the Wolfpack and the Deacons fighting for every one of the rebounds as if the NCAA championship depended upon it.

The score was knotted three times in the first half before the Deacons took the lead at 13-12 with ten minutes remaining. The Deacons never trailed after this point, as they built up their half-time lead to eight points with Lennie Chappell leading the way with 19 points for the Deacons.

The Wolfpack was unable to reduce this margin in the second half as the Deacons continued to hold their eight point margin. With the score 58-46 in favor of Wake Forest the Wolfpack went into a scoring spree as DiStefano and Niewierowski hit lay ups, Muehlbauer a tap-in, and Niewierowski two free throws. This cut the Deacs' margin to two points, 56-54. This was as close as the Wolfpack ever got.

The Wolfpack never could catch the Deacons as they won, 71-66. The score had little to do with what happened in the final minutes of the contest. There was a fight between the much

publicized Dave Budd of Wake Forest and Anton Muehlbauer of State. There were only eighteen seconds left in the game when this incident occurred. It was probably brought about by what happened a few seconds before this. Sophomore Russ Marvel of State was simply clobbered in the nose by the Deacon's Jerry Steele. It was done deliberately, for this writer just happened to be looking that way at the time of the incident.

This ended the season for the Wolfpack on a bitter note, as they were outslugged and outscored. The Wolfpack will be better next season with a bunch of strong freshmen coming up plus a couple of holdouts. They will be interested in knowing that the next time these two teams meet will be at the Coliseum on December 3 of this year. There will definitely be a few scores settled in that battle.

The Duke Blue Devils followed the Wake Forest Deacons in the finals of the Atlantic Coast Conference Tournament to win their first basketball championship since the league was started back in 1953, and their first loop title since 1946.

The Blue Devils beat the Deacons 63-59 in Reynolds Coliseum Saturday night. The Blue Devils jumped into the lead with just 2:05 remaining in the game and held on to it with the help of four foul shots by little Johnny Frye. The game was nip and tuck all the way with the difference between the two teams never being more than five points, and this was only on one occasion.

Doug Kistler's 22 points provided the punch that the Blue Devils needed to down the Deacons. Howard Hurt played a fine game and contributed 14 points to the Duke scoring column. Len Chappell, who was a

put 1:13 left in the half. Chappell with ten points but he grabbed 15 rebounds while Chappell picked 14 stray shots off the boards. The Deacons out-rebounded the Blue Devils 51-34 but Duke proved too strong from the floor as they hit on 41.1%.

Billy Packer got things underway with a basket to put the Deacons ahead 2-0. Kistler evened the count up with a bucket, but George Ritchie popped in a score after 2:13 had gone by to put the Deacs back out into the lead. Kistler scored three straight points to put the Blue Devils in a one point lead, but this was quickly erased by Chappell. Frye hit on a bucket with 17:00 remaining in the half to put the Blue Devils out in front to stay for a while.

The Blue Devils increased their lead to five points on a dunk shot by Kistler with 5:22 remaining in the half. Winston

Packer dropped in a shot that increased the Deacons' lead to three points as the second period opened. The Blue Devils got the lead back on two foul shots by Carroll Youngkin three minutes later but lost it again with 11:49 left on a basket by Chappell. The Blue Devils got the lead back on a jumper by Hurt.

Then with just two minutes and five seconds remaining in the game, Kistler hit on a field goal that put the Duke five ahead to stay. A Deacon shot missed its mark and two foul shots by Frye put the Blue Devils ahead by a 61-58 count. Chappell added one point to the Deacons scoring column and Frye added two more foul shots to the Duke count giving the Blue Devils a 63-59 victory, the ACC title and the right to represent the Atlantic Coast Conference in the NCAA tourney tomorrow night.

Wolfpack Swamps Terps, 74-58, In First Round

By Jay Brame
REYNOLDS COLISEUM, Raleigh, North Carolina; The seventh annual Atlantic Coast Conference / tournament was opened by the Wolfpack of North Carolina State College and the Terrapins of the University of Maryland.

The Wolfpack spanked the Terrapins by a 74-58 margin. With Bruce Hoadley and Captain Dan Englehardt leading the way, the Wolfpack led by a 21-8 mark at the 10 minute mark in the first half. Englehardt and Hoadley both had six points apiece, as the fast break was working to perfection for the

Wolfpack. Paul Jelus hit a jump shot with 5:06 left in the first half and the Wolfpack's margin was cut to ten points, 27-17. The Terrapins quickly scored ten points while the Wolfpack was getting only three to reduce the State lead to three points, 30-27.

Both teams scored six points apiece in the remaining minutes of the first half to make the score read 36-33 in favor of the Wolfpack.

Maryland came back strong in the opening minutes of the first second half to grab a 37-36 lead with 16:00 remaining in the contest.

It remained nip-and-tuck up until the 11:00 mark. With 11 minutes remaining the Wolfpack led by only three points, 49-46.

From this point the Wolfpack outscored the Terps in the next eight minutes by a 19-2 margin. In this period the Terrapins did not score a field goal until there were three minutes and seventeen seconds remaining in the ball game.

The Wolfpack had the game all wrapped up as they led 68-50. The Wolfpack thus earned the right to enter the second round of play, or the semi-final round of play against the Demon Deacons of Wake Forest.

The Wolfpack had six players in the double digits against the Terps. These included Hoadley and Bob DiStefano with 13 points, Don Gallagher with 12 points, Dan Englehardt with 11 points, and Anton Muehlbauer and Russ Marvel with ten points. The Wolfpack hit 51.7% of their shots for the game while the Terps were able to hit on only 29%.

Blue Devils Lead All-Tournament First Team

Reynolds Coliseum, Raleigh—The Duke Blue Devils placed three players on the all-tournament team, while Wake Forest and North Carolina had one each.

The team, selected by the Technician sports staff, featured Howard Hurt, Duke; Carroll Youngkin, Duke; Doug Kistler, Duke; Len Chappell, Wake Forest; and Lee Shaffer, North Carolina.

The second team included York Laresse, North Carolina; Anton Muehlbauer, N. C. State; Dave Budd, Wake Forest; John Frye, Duke; and Winston Wiggins, Wake Forest.

Honorable Mention: Harvey Salz, North Carolina; George Ritchie, Wake Forest; Don Gallagher, N. C. State; Russ Marvel, N. C. State; George Krajack, Clemson; Paul Adkins, Virginia; Paul Jelus, Maryland; Bruce Kelleher, Maryland; Bob Robinson, South Carolina; Mike Calahan, South Carolina; Art Whisnant, South Carolina.

Hickman Receives

shops on economic education at the University of Iowa and Washington University, has been a participant in the Brookings Institution seminar on U. S. foreign policy, and was also a participant in Northwestern University's Centennial Conference on Economic Problems of the Aging.

As an undergraduate student, he won a four-year scholarship and was awarded several prizes for his academic excellence in economics and speech.

In late 1952, he was awarded an uncommitted and unsolicited grant-in-aid of \$5,500 from the Behavioral Sciences Division of the Ford Foundation following his nomination by a national selection committee.

His professional and honorary affiliations include membership in a number of learned and professional societies, including the American Economic Association, the Southern Economic Association, American Association of University Professors, American Society of Engineering Education, the Institute of Management Sciences, Phi Beta Kappa, Beta Gamma Sigma (commerce), Order of Artus (economics), Phi Gamma Mu (social science), and Delta Sigma Rho (speech).

He has been an officer in the

local chapters of Phi Beta Kappa, Order of Artus, and American Association of University Professors.

Dr. Hickman is listed in the "Directory of American Scholars" and "Who's Who in America."

A widely known writer in his field, Dr. Hickman is the author or co-author of six major books dealing with economics, including "Pan-American Economics," "World Economic Problems," "Our Farm Problem and Foreign Trade," and "Individuals, Groups, and Economic Behavior," (to be published in early March). He has also written a number of articles published by various national magazines and has reviewed certain works in his field for several publications and journals.
