N. C. Agriculture Group Holds Annual Meet Here

S. M. Cozart of Wilson, well-known Wilson County business, agricultural, and church leader, was elected president of the North Carolina Agricultural Foundation at the organization's annual meeting at North Carolina State College Saturday afternoon (December 10).

Cozart succeeds E. S. Millsaps of Asheboro, who headed the Foundation during the past year.

Other officers who were elected to serve with Cozart are W. I. Billings of Raleigh, first vice president; S. Patton of Hendersonville, second vice president; J. G. Vann, also of State College, treasurer.

The Foundation also elected 25 new directors to represent a like number of North Carolina counties, three new members of its executive committee, and a three-man investment committee.

Composing the investment committee are President Cozart, Carl T. Hicks of Walstonburg, and State Agriculture Commissioner L. Y. (Stag) Ballentine of Raleigh.

New executive committee members are E. V. Vestal of Kenansville, Woodrow Payne of Taylorsville, and C. W. Tilson of Durham.

The new directors, each of whom will serve a four-year term, are:

Alexander—County—Woodrow Payne, Route 3, Taylorsville; Alleghany—F. H. Spry, Route 3, Sparta; Anson—Brady Thomas, Wadesboro; Avery—J. E. Penland, Newland; Brunswick—Paul Brown, Leland; Burke—Frank Baker, Route 1, Morganton; Cabarrus—P. E. Stallings, Route 1, Harrisburg;

Caldwell—John P. Rabb, Le-noir; Camden—T. C. Sawyer, Jr., Belcross; Chowan—T. P. Griffin, Edenton.

Clay—John Max Waldroup, Hayesville; Cumberland—R. B. Wilkins, Route 1, Linden; Currituck—Tulley B. Williams, Jr., Currituck; Dare—Mrs. Isabelle Warren, Manteo; Duplin—E. V. Vestal, Route 1, Kenansville; Durham—C. W. Tilson, Durham; Franklin—J. T. Moss, Youngsville.

Gaston—J. G. Rhyne, Dallas; Graham—J. S. Howell, Rob- bingsville; Harnett—H. W. S. Patton, Hendersonville; Johnston—Adam J. Whit- ley, Smithfield; McDowell—C. H. Greenlee, Route 3, Marion; Mitchell—A. D. Harrell, Route 1, Smithfield.

(See Cozart, page 8)

Aeronautics Man To Speak Friday On Heart Noise

An aeronautical engineer interested in heart research will give a lecture at North Carolina State College Friday (December 16) at 3 p.m. in Room 216 of Broughton Hall.

Dr. Erik Mollo-Christenson, associate professor of aeronautical engineering at the Massachusetts Institute of Technology, will speak on "Hydro-Dynamic Problems in Heart Research."

Dr. Thomas F. Irvine, dean of State College's Mechanical Engineering Department, is sponsoring the lecturer's appearance, said at the time of cardiovascular noise and turbulence is being explored jointly by State College's mechanical engineering faculty members and the University of North Carolina's Medical School at Chapel Hill.

Leading Textile Executive Advocates Aid To College

Greensboro, N. C., Dec. 14— "The support of higher education by business and industry is no longer an option but a necessity," according to the chief executive of the nation's largest textile company.

Spencer Love, Chairman and President of Burlington Industries, makes the statement in his foreword to a new brochure, "A Program for Aid to Education," just published by the Burlington Industries Foundation. The booklet outlines a comprehensive program for financial support of higher education sponsored by the foundation. "The direction of civilization will be dependent upon the ability of our educational institutions to train young men and women for their responsibilities as tomorrow's leaders," Mr. Love states. "If we are to

continue to press the attack on poverty, ignorance and disease, we must use all available means to improve our educational processes."

The Burlington Industries Foundation, established in 1943, set forth a formal Aid to Education program in 1955. It has now been expanded to include eight major phases:

1. Matched Employee Giving— Gifts of employees and directors to educational institutions are matched up to \$2,500 per person.
2. Educational Loans— Over 1,000 Burlington employees and their children have received Foundation loans to assist them in obtaining a higher education.
3. Matched Tuition— Unrestricted grants are made each year to the schools selected by Burlington Educational Loan Fund students. These grants are equal to the tuition fees, but do not exceed \$500 per student.
4. Scholarships — Scholarships of \$1,000 each are awarded by 16 institutions to junior and senior students, payable \$500 annually. The 16 colleges and universities are located in eight states: North Carolina, South Carolina, Tennessee, Virginia, Georgia, Pennsylvania, Massachusetts and Alabama. Other scholarships are made in specialized fields, including business administration and nursing.

5. Matching Scholarship Grants— Schools which award unrestricted scholarships also receive an identical amount to use as they wish.

6. Fellowships— J. Spencer Love Fellowships are made available at the Harvard Graduate School of Business Administration to young men from South-eastern educational institutions.

7. Professorships — Several Burlington professorships have been established in the field of business administration, textiles and home economics. Grants are made to assist major financial need or to further the cause of education in a field of study or research.

Burlington's Foundation has channeled more than \$3,000,000 into the educational field since it was established.

Merry Christmas

S G Bill Protests Budget Cut

By Bill Jackson

In response to the action of the North Carolina Higher Board of Education, which recommended a 67.5 per cent slash in the proposed improvements budget for North Carolina colleges, the Student Legislature Academic Affairs Committee has prepared a resolution for consideration at the next session of the legislature. The bill, to be introduced by senior Senator Kinney Bales, calls for a 25 per cent reduction in the proposed budget for the next year.

In action on November 16, the Board subtracted \$6,252,963 from the requests of the state's educators. The recommended appropriations for the Consolidated University were about equal to the budget requests of State College alone.

Despite the efforts of the Board of Trustees and the administration officials, the im-

provements budget which contained recommendations for salary increases, additional books, library equipment, and new programs, may seriously hamper the growth and progress of the state's institutions of higher learning. The high caliber of instruction at the schools is particularly endangered by the committee's stand on salaries, "a most inadequate" in the words of Chancellor T. Caldwell. "This is the end of our dreaming for the next years."

DECLARATION CONCERNING THE CONSOLIDATED UNIVERSITY OF NORTH CAROLINA BUDGET FOR THE 1961-1963 BIENNIAL

Recognizing that the budget recommendations of the State Board of Higher Education would, if passed in their present form by the North Carolina General Assembly, seriously impair the effectiveness of the Consolidated University of North Carolina as a center of learning and research activities; and that the decreased effectiveness of the University in these vital areas would greatly lessen the role of the State of North Carolina as a leading state in the

eastern United States; the Student Government Legislature of North Carolina State College does heartily endorse the position of the Trustees of the Consolidated University of North Carolina in regard to the matter of budgeting for the 1961-1963 biennium, and recommends that all persons interested in the future advancement of the Consolidated University and/or the State of North Carolina use every resource within their power to insure that the funds necessary for the continuing progress of the Consolidated University be granted by the North Carolina General Assembly.

Forestry School Announces Award To Top Student

The 1960 winner of the \$500 Homelite Scholarship at North Carolina State College is Daniel L. Grimsley of Acme, a senior in the School of Forestry at the college.

Selection of Grimsley to receive the award was announced today by Dr. Richard J. Preston, dean of the college's School of Forestry, who said the scholarship was established at the college by the Homelite Corporation of Port Chester, N. Y.

Grimsley, a veteran of military service, is one of State College's top-ranking students. He is specializing in forest management.

Officials of the Homelite Corporation said the organization created the scholarship at State College "to help deserving and competent students complete their forestry training so that they may apply their knowledge to the better conservation of one of our greatest natural resources."

Blind Children To Be Honored By IE Students

The children in Braille Cottage at the School for the Blind will be entertained at a Christmas party given by State College industrial engineering students Friday afternoon (December 16).

Members of the Student Branch of the American Institute of Industrial Engineers, the students will decorate the cottage, provide special entertainment, lead Christmas caroling, and serve refreshments.

A record player and several record albums will be presented to the children. Among these will be an album of Christmas music.

Richard Currie, engineering senior from Bringhamton, N. Y., who is president of the Student Branch, will be master of ceremonies for the occasion.

Notice Year

Nominations for membership in Blue Key National Honor Fraternity will be closed Friday, December 16. Any junior or senior with a scholastic average above all men is eligible for membership. Nomination blanks may be obtained from the Student Activities Office in 206, Holladay Hall.

Skee Adds Two

Stan Niewierowski, captain of the State basketball team, goes in for a lay-up against the Demon Deacons in last night's action at the coliseum. The Wolfpack lost a tough one, 68-67. See story on page 7. (Photo by Kugler)

Dr. Gerstel Given Large Travel Grant

Dr. D. U. Gerstel of the Department of Field Crops at North Carolina State College has received a \$22,700 travel grant from the National Science Foundation to be used for research on the genetic instability in tobacco.

The State College professor leaves in early February for Weizmann Institute of Science in Israel where he will conduct his research.

The grant was awarded for a one-year period.

Dr. Gerstel received his B. S., M. S., and Ph. D. degrees from the University of California.

A Visit With Santa

Monday night seemed like Christmas to these Raleigh children; the eighteen social fraternities at State were hosts to over 300 orphans and underprivileged youngsters. The parties, complete with presents, Christmas trees, and Santa Claus, are an annual project of the IFC at State. (Photo by Kugler)

Comments From The Editor

Why Is This Better

"Why do we have to pay our spring semester tuition and fees at Frank Thompson Gymnasium?" That is the question that is being asked by many students on the State College campus.

In the past students have received their tuition bills through the mail in advance. However, this semester, the business office has decided to try this new procedure. The payments will be made on the day of registration for the second semester. Permits to register will also be picked up on the same day.

This procedure probably will hinder the second semester registration. The student will be required to pay his bill and pick up his permit before he registers. What are the advantages of paying your tuition on the day of registration? We have not figured out the answer to that question yet.

There were no reasons given as to why the student would be required to pay their tuition bill on registration day. Registration is a pain in itself, but to add another long line to the registration line will probably mean a couple of more hours standing in line than students expected.

There are many students at State College that would like to know why the previous procedure has been changed. It sure does not look like that it is going to make registration easy . . . does it?

—JB

Merry Christmas

This marks the last issue of *The Technician* before the Christmas holidays. We have published three issues a week so far, and believe you me, there have been times when we have wondered if we were going to make the deadline. There have been many people that have helped us in publishing three issues a week, and if it were not for them, we would probably be lucky to publish two. As many of you know, *The Technician* is not the richest organization in this country, and it is virtually impossible for us to send Christmas cards to all our helpers and readers. So we would like to wish the following people a Merry Christmas and a Happy New Year from the whole staff. They include President Friday, Chancellor Caldwell, Mr. Pate, Mr. Whichard, Mrs. Lucas, Deans Stewart, Talley, and Bowers, Mr. Phillips, the faculty, the student body, and our advertisers, and all of our readers. If we left anyone out, we wish you a Merry Christmas also. See you next year.

LITTLE MAN ON CAMPUS

"SON, I WANT YOU TO KNOW I'VE ALWAYS HAD THE GREATEST RESPECT FOR TH' COLLEGE DEGREE — UNTIL YOU GOT ONE."

Human Relations Seminar Termed As Forward Step

By John Curlee

Man's inhumanity to man—that was the problem discussed this past weekend at the North Carolina Human Relations Seminar, sponsored by the Student Government and the YM-YWCA Seminar Committee of the University of North Carolina.

Approximately forty - five delegates from fifteen of the state's larger colleges and universities convened on the campus of UNC for a weekend of discussion and study of the urgent problems of human relations in the changing and growing South.

The delegates, representing both the Negro and white campuses of North Carolina, assembled in an atmosphere of reason and of realization that the basic flaw of inequality exists in our democracy, and that the students of today, as tomorrow's leaders, will be entrusted with the eventual solution to this complex problem. The delegates from State College were John Cooke and John Curlee.

Well-known news correspondent and authority on world affairs, Edward P. Morgan, of the American Broadcasting Company, spoke on "Problems and Promise in a Changing South" in the keynote address of the Seminar, following a welcome to the delegates from Dave Grigg, student body president at UNC. Mr. Morgan stressed the importance of the crisis the South now faces in seeking a solution to the perplexing problem of integration and the far-reaching effects this solution will have on the future of the nation. He stated that those "four little girls" who are braving the screaming mobs of women in New Orleans to attend the first grade "hold in the outcome of their venture the destiny of our nation."

An open letter was then read to the participants in the Human Relations Seminar. It was from Adlai Stevenson offering wishes for a fruitful conference and stating that "We in the United States have learned that human freedom is indivisible. We have come to know that the basic human rights we cherish are linked with the fate of even the most humble and remote peasant . . . We can ill afford to exhibit to the world either incompetence or injustice in dealing with the relations of racial groups. Bigotry and violence contradict the sincerity of the principles which have been our greatest contribution to human history. I hope you will study the urgent problems of human relations sanely, soberly, intelligently; for it is in public enlightenment and understanding that we must place our trust. I am confident that if the relevant facts and information are supplied, the 'public' can be trusted to create a climate of reason and order in which we can find a solution to these problems.

The seminar delegates then broke up into workshops and spent Saturday afternoon and the early part of Saturday night discussing the various aspects of the racial problems in the South, analyzing the interrelations of these troubles with such fields as politics, higher education, religion, and economics. As the final event of the night, the assembly reconvened for a panel discussion on the sit-in movement in the South, participated in by Lacy Streeter of North Carolina College, David Price of UNC, and Bob Cooke, a delegate from State College.

At the closing luncheon on Sunday, Dr. Warren Ashby, Professor of Philosophy at Woman's College, spoke on "The Promise of a Changing South." The delegates as a whole, recognizing that the goal of a complete and workable integration in the South lies far in the future, looked at education as the long-range, positive method of breaking down the barrier of superstition and ignorance which causes fear and hatred in the minds of many Southern Negroes and whites, and of raising the moral and social standards of the Negro. The sit-in movements and the economic boycotts were generally regarded as necessary instruments for the Southern Negro in achieving his desire for equality, producing animosity and a certain amount of violence, but exposing this inequity and demanding a solution.

Thus the results of this Seminar were not solutions to the problems of race relations, but a deeper understanding of the human motivation behind all the outward confusion.

The sit-in movements and the economic boycotts were generally regarded as necessary instruments for the Southern Negro in achieving his desire for equality, producing animosity and a certain amount of violence, but exposing this inequity and demanding a solution.

New Cheerleaders Chosen For State

Cheerleader tryouts were held this past Monday, and we are happy to announce that State College has seven male cheerleaders. Seven? Yes, that is right. The student body and fans viewed the "Slick Seven" at last night's game between State and Wake Forest.

The members of the new squad consist of Johnny Smith, Gill Gillespie, Mac Spence, Don Rufty, Tom Taylor, Hal Frazier, and Asa Pearson. Smith is the chief of the group.

For the remainder of the basketball season, they will be dressed in red vests, white shirts, and dark pants. In the spring it is hoped that the head cheerleader will be elected in the spring elections.

These boys have a lot of new ideas, and they hope that they will be able to attend some of the away games for the Wolf-pack.

They almost tied the Demon Deacon up last night, but he was fortunate enough to get away. Beware Duke Blue Devil! The State cheerleaders will be on the prowl when you visit next time.

Letters To The Editor

To the Editor of The Technician

I would like to take this opportunity to commend the five members of the Delta Sigma Phi fraternity for the fine job they did in leading the cheers and school spirit at the State-Citadel basketball game last Saturday night. It was indeed a large step toward increasing our school spirit and toward obtaining someone whom the student body would follow. True, they were not as good as they would be with practice, but at least they demanded the attention of the student body, and there seemed to be much more noise and an increase in spirit even though it was a Saturday night game. The game was not a conference game. I think now is the time for us to get behind the school spirit program, and to back our new cheerleaders as it looks like the Wolfpack might be climbing back into the national picture after four years of probation.

The choice of uniforms was also in good taste Saturday night, and looked much better than the all white uniform.
James B. Jones

To the Editor of The Technician

Regarding payment of Spring Semester tuition and fees.

It has long been the tradition here at State College for registration to be nothing short of chaos—an endless number of endless lines with mass confusion prevailing.

There has been a rumor circulating about campus for some time to the effect that Holladay Hall was trying to find a more efficient manner of registration—one that would be quicker and have less lines. Well, to the utter job of every student on campus, we see that someone has thought of a measure which will add to, instead of lessen, the encumbrances of the student—another endless line! Having had experience with the business office, one must realize that any kind of transaction takes time, and when one considers that over 6000 students will be waiting in line, he shudders to think of the inconvenience and confusion that will be predominant.

If Holladay Hall wishes to be conservative and save on postage by not sending out tuition statements, they might consider letting students already enrolled in school stop by the business office and make payment prior to the end of the current semester. This would tend to alleviate some of the already great strains on the students' nerves and feet on registration day.

It would seem that one of the nation's finest technical schools could devise a method of registration that would be both more pleasing to the students and more efficient and ordered.

Eddie Elkins

STUDENT LEADERS MEET Tonight At C.U.

Bob Cooke, President of the Student Government has called a meeting of student leaders that will be held in the College Union tonight. Chancellor Caldwell has been invited to speak to this meeting about the budgetary request made by State College.

President Cooke has prepared a memorandum which will be distributed to all students urging them to speak to their legislators over the Christmas holidays and to ask their support for the college budget requests. Ken Bailes has prepared a resolution which will be introduced to as the Student Legislative meeting which will follow the general meeting tonight. Bailes proposed resolution is on the front page of this issue.

It is hoped that many students will turn out for this meeting.

Notice

The next issue of *The Technician* will be published on January 5, 1961. Deadlines for this issue will be Tuesday, January 3, 1961, at 7:00 p.m. All articles and columns will be due at this time. Thanks.

The Happy Holidays ... For The Survivors

Every year before the Christmas vacation, we run several safety features in the hope that all of us at State can better realize the huge tragedy which is re-enacted each holiday season . . . the slaughter on the highways . . . and realizing, act accordingly. We seem to fail to a certain extent, however. Every year when vacation is over we come back to an empty room down the hall or an empty desk in our 8:00 class which was made vacant by a speeding or reckless driver during the "happy holiday." In the hopes that it might be different this year, we will try again.

You drive down the highway jubilantly . . . no classes for two weeks . . . a date with your girl whom you haven't seen since September . . . everything is wonderful.

The first taint of unpleasantness is the line of cars ahead . . . hell, it'll cost you at least ten precious minutes getting home . . . probably some of those silly JC's and their refreshment stops which urge people to drive carefully during holidays. You don't have time to mess with any of that silly stuff. Then you hear the sirens and you see two twisted caricatures of cars.

The spectators are standing around silently looking at the grotesque mixtures of steel, glass, flesh, and blood; and if you look real closely at their faces you could see hidden behind the expressions of shock and sadness another look of sadistic excitement. So you stop. It'll be something to talk about when you get home. And it is exciting.

The blood-covered woman hysterically screaming . . . like the end of the world had come. It almost had for her . . . the remains of the man pinned in the car with his head leaning at an impossible angle was once her husband, and the small, crimson-spattered, blue blanket is a mute and grim reminder of her six-month-old son.

A smell that is hard to define permeates the air . . . spilled gasoline . . . burnt flesh . . . fresh blood. The scent seems to stick to you, making you wish you could take a long, warm shower.

Finally the ambulances come. They would have been to the scene of the accident ten minutes earlier, but the parked cars of you eager spectators made it impossible.

You walk over to the other car.

Three young men are lying in the car with shocked expressions on their faces and at different intervals one opens his eyes and stares at the people looking at him, groans, and then closes his eyes again.

A slightly different smell lingers on this scene. The ingredients of the first are still there, but another is present . . . a smell of alcohol.

The ambulance attendants start putting the victims into their vehicles. You are amazed at the roughness with which they handle the occupants of the smashed cars, but then you realize that it no longer makes any difference.

The woman is led into the ambulance and sat in the front seat for there is no room to lay her down in the back. She is still quietly sobbing, and is holding a lifeless bundle in her arms.

The excitement is over. You get into your car and try to get out of the traffic jam caused by you and the other spectators. A patrolman is impatiently motioning you on. You look at your watch and see that you lost thirty minutes, so you press harder on the accelerator to make up the lost time.

This story is crude, horrible, bloody, and in poor taste; but massacre on the highways is also. Death can never be in good taste, and a violent death is even worse. This is multiplied tenfold if it is someone you know, and a hundred fold if it is yourself.

—Mike Lea

Another had somehow gotten out of the car and walked a few steps before the pain from walking on his broken leg had caused him to collapse and lie face-downward in the slightly-soggy red mud along the side of the road.

Sailing Trip Around World Offered To College Students

A project tailored especially for adventuresome college students—a voyage around the world aboard the most famous sailing ship afloat—is in the offing for the summer of 1961.

The ship, the 96-ft. brigantine Yankee, will sail from Miami July 1, 1961, and follow the trade winds to such places as Pitcairn and Easter Islands, the South Seas, Africa, the Orient, and 'round-the-horn to South America and the West Indies.

The 25 persons aboard will actually serve as crew and help navigate and sail the ship. They will share expenses of the cruise. Besides a rare chance to become proficient in traditional windjammer sailing skills the 'round-the-world voyage offers a unique educational opportunity, according to Yankee's owner, Capt. Milke Burke of Miami.

"We'll sail to places far off the beaten tourist path," says Capt. Burke. "For example, we can get a glimpse of history by talking to descendants of The Bounty at Pitcairn, and by studying customs and people from Tahiti to Zanzibar."

Arrangements have been made, he adds, for students to continue their studies aboard under professional guidance during the 18-month 50,000 mile voyage. Side trips will be arranged to major island points of interest and activity will range from fishing and skin diving to big game hunts and photo-safaris.

Yankee, which gained renown as a result of countless magazine articles and six books about four earlier 'round-the-world cruises under command of Capt. Irving Johnson, was built in Emden, Germany, and operated as a North Sea pilot vessel until captured by the British in World War II. When Capt. Johnson purchased her in 1947, Yankee was changed from schooner to square-rigged brigantine. Her 15 sails total 7,775 square feet.

Information concerning Yankee's 'round-the-world cruise may be obtained by writing: Capt. Mike Burke, Windjammer Cruises, Inc., P. O. Box 1051, Miami Beach, Fla.

The C U Scene

By Ann Smith

The Outing Committee sponsored an outing to Long Beach last week end (December 10 and 11).

We loaded the Paddy Wagon with provisions to last the week end along with a portable TV set. A charcoal grill was among the equipment taken along with several sleeping bags and liners.

Six people went in the Paddy Wagon and two flew down in one of the participant's own plane. The plane and wagon arrived at the cabin almost simultaneously.

Bridge playing and television watching were most of the activities indulged in by the members of the outing. The owner of the plane took most of the party for a plane ride over Bald Island.

It wasn't as cold there as we

thought it would be. One of the party slept on the beach by the plane. The others slept in either beds (if they brought their own linen and blankets) or in sleeping bags on couches.

The weather was fine most of the time; it started raining Sunday afternoon.

The Guiding Star will be shown at 8 p.m. Friday (December 16) as the program for PANORAMA. It is the heart-warming story of how a misguided family finds the true meaning of Christmas.

In Jobs

Dance Committee Displays Ingenuity

For enjoyment of the job, enthusiasm for the project, and ingenuity for the unusual, the College Union Dance Committee is well known. This committee consists of, though it is not limited to, people who like to dance, to organize dances, to complete decorations for the dances, and who do not mind a little hard work. The Chairman of the Dance Committee, Bob Binns, through his enthusiasm for the job and his willingness to follow through with work, has constructed one of the most successful committees in the College Union.

An important requirement for a successful committee is one in which the members are busy. The Dance Committee sponsors many successful programs throughout a school year.

The Starlight Club, which began in 1956 in a small room with only records for music, has expanded to a large dance with live music in the College Union Ballroom. Music by Irving Fuller's "Chorvetts," soft candlelight, a sparkling fountain, and dancing couples all lend a romantic nightclub atmosphere to the dance. "State's own

nightclub" is open six Saturday nights during the year and has had a full house for the three Starlight Club dances already held this year. The next Starlight Club dance will be held on March 18.

Other dances sponsored throughout the year by the Dance Committee are: Fall and Spring Get-Acquainted Dances, after-ball game Soc Hops, a Christmas Dance, Valentine Dance and St. Patrick's Day Dance.

The Dance Committee also provides free dance lessons. Basic dance skills are taught to anyone who wishes to learn to dance, or to improve their skill on the dance floor. The lessons are open to single students, married students and wives, faculty and staff. The lessons have been well attended this semester. Basic skills in Latin American dance will be taught next

semester beginning in February.

The Platter Party, which is almost an institution of the College Union, is held nearly every Friday night in the College Union Snack Bar. Here, in an informal atmosphere, students find an opportunity for relaxing from studies by dancing and just generally having a good time.

Two special programs which the Dance Committee is bringing to the campus are modern dance groups to be here in February. The first is a Modern Dance group composed of men and women from the University of Maryland. They will be here on February 21, as a part of the Fine Arts Festival, which is presented February 16-March 1. On February 28, a modern dance group from Woman's College will appear in the College Union.

"YOUR SATISFACTION IS OUR FIRST CONCERN"

micro wave

Consistent with our pioneering role in the communications industry, once again we have scored a first. The East Coast section of our radio beam system has been in operation for several years. The West Coast section is in its last stages of completion. By late 1961 broadband channels with a capacity of 2,400,000 words per minute will provide high speed data, alternate record-wire and digitalized TV transmission service to government and industry. This system will be the first truly national microwave network. Such significant technological advancements are the product of Western Union "know-how." Our representative will be visiting your campus Placement Office in the very near future. Why not sign up for an interview and explore in greater detail our opportunities in maintenance and installation, design and development engineering!

Visiting Geneticist Teaches Here

RALEIGH, N. C., Dec. 17.—the famous Arnold Arboretum State College now has another distinguished scholar to add to its roster of renowned visiting professors.

Dr. Karl Sax, retired Harvard University professor, has established headquarters in the State College Department of Genetics until the termination of the current fall semester.

He was invited to the college by the Genetics Department and the School of Forestry.

At Harvard, the celebrated Dr. Sax was engaged in work concerning genetics and horticulture for more than 30 years. In addition, he was director of

located at the university.

Dr. Sax laughingly admitted that since his 1959 retirement from the Massachusetts University he has earned the title of "wandering" professor. Since he bade goodbye to Harvard, the educator has been a visiting professor at the University of Florida and Yale University.

Apparently Dr. Sax has been as active since his retirement as he was before. Besides his visiting professorships, the enthusiastic scholar has presented numerous lectures at colleges and churches up and down the east coast. And when he leaves

State College in 1961, Dr. Sax will head for Oxford University, England, where he will be a Guggenheim fellow in the field of botany.

Even though the erudite professor is well-known in his professional field, today he has probably received more recognition for his prodigious study of the much-discussed population explosion.

Dr. Sax first became interested in the population explosion, which is now his avocation, when he was a member of the Harvard faculty. While at the university, his professional duties brought him in contact with Dr. E. M. East, the author of "Mankind at the Crossroads." Dr. East's hobby was the study of the population explosion and soon his colleague, Dr. Sax, acquired the same interest.

Through his popular book, "Standing Room Only", and by means of articles and lectures,

the eminent Dr. Sax has helped to impart to his fellow man facts concerning the startling rise in world population and the effects the situation is having on the world of the present and will have on the world tomorrow.

"Standing Room Only" initially was published in 1955 with a new edition published this year.

In the preface of the last edition of the book Dr. Sax plainly states eye-opening facts and figures pertaining to population problems that have become more evident since the first edition went to press.

Dr. Sax says, "The increasing rate of population growth has been so acute that many responsible people now acknowledge the 'population explosion' as the greatest threat to world peace and prosperity."

"The most tragic aspect of the population explosion," says

the visiting professor, "is that the greatest rate of growth is in Asia, Africa, and Latin America, where most of the people are already living at or near bare subsistence levels, with inadequate food, housing, education, and medical care."

Dr. Sax explains that of these three areas Asia is in the most critical condition. He also points out that the United States, Canada, and the Soviet Union are in a position to cope with the population growth for a while.

The visiting professor says, "In short, while great advances are possible in food production and industry, even the most fantastic increases cannot possibly keep pace with the present rate of population growth for any significant period of time."

He continues, "In 600 years the entire earth would provide only one square yard of land per person."

Dr. Sax offers this appalling fact. "It is obvious that the present rate of world population growth cannot be maintained for any significant period of time. Either death rates must

increase, or birth rates must be decreased." He adds, "During the recent years, great progress has been made in developing birth control techniques."

The author has found in his studies that the solution of the world's population problems is made much more difficult by the Catholic and Communist opposition to any effective method of birth control.

In bringing the population explosion problem closer to home, Dr. Sax commented on the traffic congestion found in such populous areas as New York City and Los Angeles. Traffic isn't the only hazard found due to the great population growth. He believes that the high crime rate in these sections can be attributed to the same factor.

Dr. Sax was accompanied to Raleigh by his attractive wife, Dr. Hally Sax. He said that the distaff half of the Sax twosome also is engaged in scientific work in the State College Genetics Department, but he added that she is working at the college "for the fun of it."

Dr. Hally Sax received her education at Stanford University and her husband commented that she put him through graduate school at Harvard by teaching at nearby Wellesley College.

Before entering Harvard, Dr. Karl Sax attended Washington State College.

The visiting professor is a member of the National Academy of Science and in 1958 he was president of the Genetic Society of America. In 1956 the Botanical Society of America presented him the Award of Merit.

College Stores Hold Meeting At College

A regional meeting of the National Association of College Stores was held here Saturday night (December 10).

Addressing a dinner session was L. L. Ray, director of foundations at North Carolina State College.

Host at the dinner was L. L. Ivey, manager of the Student Supply Stores of State College and a former national president of the organization.

Concluding features of a three-day convention of the association will be held in Chapel Hill Sunday morning when delegates will attend a breakfast session at the Carolina Inn and a special showing at the Morehead Planetarium on the University of North Carolina campus.

Principal speaker at the Sunday breakfast will be Jeremy North of Duke University's Gothic Book Shop.

Varsity Men's Wear

Intramural Dixie Classic Ends Tonight In Thompson

By **Richie Williamson**
Associate Sports Editor
The patter of basketballs and the blowing of whistles can be heard constantly at the Frank Thompson as more than 65 games have been played in the Intramural Dixie Classics which winds up its action on Thursday night. For the past two weeks

it has been a tough grind for the teams that aspire to this year's championship.

Watauga Wins

Watauga has used the combination of a fast-break and good outside shooting to dispose of Theta Chi 56-17, Delta Sig 62-48, and Sigma Nu 39-37. The Sigma Nu game was a very close contest with the score being tied at half at 23 all. Watauga moved to a two point lead in the third period and held on to win. Yokely and King have provided most of the scoring punch.

Tri-State Advances

Advancing into the semifinals as expected were the Tri-State five, the defending champions, and Watauga, the runnerup. Joining these two teams were Phi Kappa Tau and Pi Kappa Alpha, who have played the darkhorse rolls but from their showing, they definitely have the potential for the title.

Phi Kappa Tau moved to the semis on the basis of their height and speed. They eased past Bagwell 45-31, took a 36-20 thriller from Kappa Alpha, and dumped Berry 52-28. Their scoring is pretty evenly balanced with their five starters Skidmore, Searce, Thorn, Williams, and Mayton.

Tri-State has shown no evident signs of missing Roman Gabriel as they ripped off three victories to reach the semifinals. Being led by Sandifer, Faircloth, Bushofsky, and Raneri, they stopped the Dragons 56-47, clouted the R. H. Rebels 66-24, and then put away the Gunners 51-43.

Crystal Ball Corner

Even with some of the nation's best teams going down in defeat early in the season, the Crystal Ball Corner was able to keep its head above water sufficiently enough to record a respectable average through the first week. Basketball terrors such as Indiana, Cincinnati, Utah, Utah State, Detroit, West Virginia, Wake Forest, Kentucky, and Georgia Tech have already been humiliated by lesser known teams which means that this will be a topsy-turvy season where anybody could win on any night.

To add to the importance of the Crystal Ball selections is the fact that the emphasis of our selections centers on the best basketball area in the nation as witnessed by the latest polls which ranked State, Carolina, Duke, and Maryland in the top 20.

Richie Williamson took the first round lead in averages by picking 15 out of 20 games right for 75%. Jay Brame was in a close second with 14 right, 6 wrong for 70%. Earl Mitchell got off to a slow start, registering an 11-9 mark for 55%.

Once again we set the Crystal Ball in front of us, open our basketball books, and pick a few winners out of the hat:

State Swimmers, Wrestlers Travel

North Carolina State's undefeated swimming team put a 2-0 mark on the line against the Wake Forest Deacons in Winston-Salem, N. C., this afternoon.

So far this season the State swimmers have beaten the ACC champs, Maryland, and the Duke Blue Devils. The Pack tankers dropped the Terps in the first meet of the season in the Frank Thompson Pool.

The following Friday, the State team went to Durham and defeated Duke. So far this year the swimmers have depended mainly on the feats of the sophomore trio of Peter Fogarasy, Ed Spencer, and Smokey Ellis.

In other action for State College athletic teams, the State grapplers went to Charlottesville, Va., to do battle on the mats with the University of Virginia.

The State wrestlers have met defeat in their first two outings of the season. They opened their season last Friday afternoon with a loss to The Citadel and then traveled up to Maryland the next day and dropped their second decision.

Bowl Bound With No Fans

At this writing, the narrow-minded Duke administration was still holding out against the students' plea for an extension of the Christmas vacation period so they could attend the Cotton Bowl. The Blue Devils, as we all know, got an invitation to the post-season classic after finishing a season in much better fashion than most people thought possible.

The vacation period was set up far in advance of the beginning of the school year, but the administration has absolutely refused to change the vacation time several times. Students at the Durham school resorted to demonstrations and the like in an effort to make the administration "see the light." So far the students have made no forward progress and it looks like their last effort failed last week.

The policy regarding the cutting of class the days before and after vacation periods makes it just about impossible for a student to cut his classes to make the game. The Duke rules call for the subtraction of quality points for each hour of instruction missed on days before and after vacations. As most of the students on this campus know, the loss of quality points is academic suicide.

We hope that the Duke officials will reverse their decision, but the probability of such an event is pretty remote at this time. As it stands now some of the students won't even be able to see or hear the game because they will be traveling back to the campus in order to get there in time for the start of classes.

Wonder what State officials would do if State was going to the bowl game?

Dixie Classic Not Far Off

For those of you who measure things in days this time of the year, there are only 14 days until the Dixie Classics start. This year's field includes Wyoming, Villanova, Marquette, and Maryland in addition to the Big Four. The holiday classic gets underway on Dec. 29 and runs through Dec. 31. There are four games on tap each day.

The first round will find Maryland facing Carolina and State taking on Villanova in the afternoon games, while Wake Forest tangles with Marquette and Duke meets Wyoming in the initial night clashes. From here the losers play for a consolation championship, while the winners move into the championship bracket.

Last year the Deacons edged out a determined Tar Heel team, 53-50 for the tourney title. State has won the tourney seven out of eleven times with Carolina picking up two wins and Duke one in addition to the Deacons win last year.

Villanova and Wyoming will be appearing in the tournament for the second time, while Maryland and Marquette are newcomers. This year Villanova is one of the top Eastern powers while Marquette is a standout in the mid-West. If Wyoming's basketball team is anything like their football team of a year ago then they will be plenty tough. The Cowboys are also a title-contender in the Skyline Conference this year, and Maryland is always a tough team in a tournament.

The Dixie Classic, originated by Everett Case in 1949, has come to be one of the leading holiday basketball shows in the nation. This year tournament officials are expecting around 75,000 fans for the three-day dribble derby. Last Saturday only a few tickets remained in the Coliseum ticket window.

In the first six Dixie Classics the championship game featured a Big Four team against one of the visitors, but for the last five years none of the outsiders have been able to make it into the finals with the exception of Michigan State in 1958. No outside team has ever won the Classic either.

Merry Christmas From "Us"

We here on the TECHNICIAN sports staff wish to take this opportunity to extend our best wishes for a Merry Christmas and a Happy New Year to all of our readers. Take it easy on the highways cause we need somebody to read this paper next year.

Deacons Hand Pack 68-67 Setback

By Earl Mitchell
Sports Editor

Reynolds Coliseum — Billy Packer's two free throws with less than a minute showing on the clock gave Wake Forest a 68-67 win over the State Wolfpack in a thrill packed contest Wednesday night. The ACC clash went down to the wire with Dutch Muehlbauer tossing in ten points in the final minute of play as State pulled to within one point of the Deacons.

Billy Packer poured in 22 points to lead the Deacons scoring assault. Bill Hull, who had a good night on the boards, was next in the scoring parade with 17 tallies. Tommy McCoy and Alley Hart had 12 and ten

points respectively to round out the double-figure shooters for the visiting Wake Forest team. Bob DiStefano, who had 17 points to lead the Pack in scoring, did a great defensive job on Len Chappell, who got only seven points for the night and fouled out of the game with about two minutes remaining. Ken Rohloff was next in the State scoring column with 15 points and he was followed by Stan Niewierowski with 14 markers. Muehlbauer had 12 points.

Wake Forest jumped into the lead at the beginning of the contest by a 7-0 margin before the Pack scored two points at the 16:24 mark. From this point

on the Deacs and the Pack traded baskets with Hull and Niewierowski leading the respective offensive surges. With about eight minutes left in the first half the Pack tied the score at 20-all. Then Chappell and Packer hit nine points between them and pulled the Deacons out into a 31-28 margin at intermission.

As the second half got underway it appeared that the Wolfpack was going to take the lead away from the Deacs for good. DiStefano and Niewierowski hit on baskets and the State five took the lead for the first time in the contest with less than two minutes gone in the half. Marvel added a charity

toss to put the Pack into a two-point lead.

The Deacs got the lead back when Hull sank a shot after the State team. Rohloff put in two more points and the Pack was back out in the lead. Rohloff then stole the ball and fired a pass to DiStefano who laid the ball in the hoop and was fouled. DiStefano dropped in the foul shot to give State a 44-40 lead, their biggest of the night. Hull then pulled the Deacons back out in front and that is where they stayed for the rest of the contest.

Jon Speaks pulled the Pack to within one point of Wake Forest, but eight straight points by the Deacons pushed the lead out to nine points. Then the real fireworks began. Muehlbauer and Rohloff cut the Deacons lead down to one point, but the two teams only traded points for the remainder of the contest to arrive at the final margin of 68-67.

The score was not the only thing close about last night's game. In the rebounding department the State team edged the Deacons 50-49. In the shooting percentages, the Deacs held a slight edge as they dropped in 38.4% of their shots, while the State shooters hit on 36.1% on their shots. In the foul shooting department, the Wake Forest team hit on 22 of 31 attempts with State tossing in 15 of 24 attempts.

In the preliminary contest, the Wake Forest Frosh handed the State freshmen a 81-60 defeat. Don Cox led the State scoring with 14 points while Ron Erb had 13. Les Robinson, a guard, hit for 11 tallies. Dick Carmichael led the Deacon scoring with 24 points. He was followed by Frank Christie with 19 points, while Butch Hassell and George Lehman each had 16 points.

The next home game for the Wolfpack will be on Saturday night when they play host to

the Georgia Tech team. The freshmen will face Fort Eben in the first game starting at 6:15.

SHULTON

Solid opportunities with solid state devices

A big part of Western Electric's job is to manufacture the miniature "new arts" products that are changing the science of communications. It's a job which offers you a challenging career—a chance to plan new methods of mass producing ever-improving kinds of transistors, ferrite devices, diodes, special purpose electron tubes, etc.

You'll be with a company that is expanding rapidly in this field. At present our Allentown and Laureldale, Pa., plants are devoted exclusively to making electron devices, and a big new plant is under construction in Kansas City. The needs of the Bell Telephone System for these products are increasing daily and will multiply enormously with the introduction of Electronic Central Office switching now nearing trial operation.

These devices are changing the scene at all our manufacturing plants as they go into the startling new communications products developed by our associates at Bell Telephone Laboratories. From microwave transmission

equipment to submarine cable amplifiers, our products call for creative production engineering, installation planning, and merchandising methods. Our job for the Bell System and the U.S. government has grown to the point where we are now one of the nation's "Top 11" in industrial sales. And your chance to play an important part in our future growth is solid!

Opportunities exist for electrical, mechanical, industrial, civil and chemical engineers, as well as physical science, liberal arts, and business majors. For more information, get your copy of Consider a Career at Western Electric from your Placement Officer. Or write College Relations, Room 6106, Western Electric Company, 195 Broadway, New York 7, N. Y. Be sure to arrange for a Western Electric interview when the Bell System recruiting team visits your campus.

MANUFACTURING AND SUPPLY UNIT OF THE BELL SYSTEM

Principal manufacturing locations at Chicago, Ill.; Kearny, N. J.; Baltimore, Md.; Indianapolis, Ind.; Allentown and Laureldale, Pa.; Winston-Salem, N. C.; Buffalo, N. Y.; North Andover, Mass.; Omaha, Neb.; Kansas City, Mo.; Columbus, Ohio; Oklahoma City, Okla.; Engineering Research Center, Princeton, N. J. Teletype Corporation, Skokie, Ill., and Little Rock, Ark. Also Western Electric distribution centers in 32 cities and installation headquarters in 16 cities. General headquarters: 195 Broadway, New York 7, N. Y.

North Carolina State Student Affairs Bulletin

CHRISTMAS HOLIDAYS begin 12:00 noon, Dec. 17. Classes resume 9:00 a.m., Jan. 3.

RESERVATORY ROOMS FOR SPRING SEMESTER—Room rent will be due and payable in the Business Office during the period Jan. 2—Jan. 13. Present occupants of rooms will have priority to reserve their same rooms provided they pay the rent during this period. Unreserved rooms will be reassigned beginning Jan. 16.

CHAIN LETTERS—Postal authorities have asked us to notify students and staff that chain letters are illegal. Anyone participating in this kind of operation is liable for prosecution by the Federal Government. Also, the chain letter operated by the Tupper Sales Corp., P. O. Box 820, Charleston, S. C., which involves the sale of all ball point pens, has been declared an illegal activity.

BLUE KEY NOMINATION BLANKS may be obtained at 206 Holiday Hall, Dec. 12—Dec. 16.

TV APPEARANCE—The N. C. State Men's Glee Club will make their first appearance on television on WUNC-TV on Tues. Dec. 13 at 8:30 p.m. Members of the State College Community and their families are cordially invited to view this presentation.

FOUND—Set of Ford car keys. May be picked up at Business Office, 105 Holiday Hall.

DINING HALL closes after lunch Tues., Dec. 17; reopens for breakfast on Sat., Jan. 3.

PART-TIME JOB—Teach dance skating at new roller skating rink. Qualified students call at Part-time Employment Office, 206 Holiday Hall.

JOBS FOR STUDENT WIVES—(1) Home Ec. major with industrial dietary experience to manage snack bar and luncheonette at Coll. Union. Call Mr. Anderson, TE 4-7818. (2) Full-time experienced bookkeeper, beginning Jan. 1. Call Mr. Phillips, State College Print Shop, Ext. 281.

CONSTRUCTION—Several incidents have been caused by students which have delayed the construction of the steam line in the vicinity of Turlington Dormitory. This larger steam line is needed to properly heat the dormitories. Elimination of all interference will speed the completion of the project & eliminate the inconveniences in the area. Your cooperation will be helpful in the completion of this line.

D. H. HILL LIBRARY CHRISTMAS HOLIDAY HOURS (Dec. 17—Jan. 2)—

Sat., Dec. 17, 9:00 a.m.—1:00 p.m.—Open

Sun., Dec. 18—Closed

Mon., Dec. 19 thru Fri., Dec. 23, 9:00 a.m.—5:00 p.m.—Open

Regular schedule resumed Mon., Jan. 2.

Sat., Dec. 24 thru Tues., Dec. 27—Closed

Wed., Dec. 28 thru Fri., Dec. 30, 9:00 a.m.—5:00 p.m.—Open

Sat., Dec. 31, and Sun., Jan. 1—Closed

PAYMENT OF SPRING SEMESTER TUITION AND FEES—All students currently enrolled and registering for the spring semester will make tuition payments on Fri., Feb. 5, 1961, the day of registration, beginning at 7:00 a.m. Payments will be made at the Frank Thompson Gymnasium. Tuition bills for the second semester will not be mailed to students in advance and no payments will be due before that date. Permits to register will also be given out at the Frank Thompson Gymnasium. Students making tuition payments and obtaining permits may then proceed to the Coliseum for registration, according to the following schedule:

- 8:00-9:00 Special Group
- 9:00-10:00 Graduate Students
- 10:00-10:45 Seniors L through Z
- 10:45-11:30 Seniors A " K
- 11:30-12:15 Juniors L " E
- 1:00-1:45 Sophomores L through Z
- 1:45-2:30 Sophomores A " K
- 2:30-3:15 Freshmen A " K
- 3:15-4:00 Freshmen L " E
- 1:00-4:00 Unclassified, special and Auditors

Cozart Elected Agricultural Prexy

(Continued from page 1)
1, Bakersville; and Scotland—Henry McLeod, Route 3, Laurinburg.

Speaking briefly at the meeting were W. D. Carmichael, Jr., vice president and finance officer of the Consolidated University of North Carolina; L. L. Ray, director of foundations at State College; C. W. Hart, assistant director of foundations at the college; and J. G. Vann, business manager of State College.

Reports on current teaching, research, and extension work in State College's world-famed

School of Agriculture were made by Dr. H. Brooks James, dean of agriculture; Dr. E. W. Glazener, director of instruction in the School of Agriculture; and Dr. Roy L. Lovvorn, director of the college's Agricultural Experiment Station.

In his report, Treasurer Vann said total income to the Agricultural Foundation from its founding in 1944 to the end of its last audit year on August 31 of this year amounted to \$2,254,340. Income during the past fiscal year totaled \$265,575 including more than \$150,000 from the "Nickels for Know-

How" program.

Carmichael, in his talk, lauded State College for its rise during the past decade to a position of top rank among the United States and said the college's increasing reputation as one of the nation's top centers of higher learning makes it "a happy hunting ground" for other institutions which are seeking to strengthen their faculties.

He expressed appreciation to

the Agricultural Foundation for the support which it is providing State College in retaining and attracting eminent teachers and research scientists for work at State College.

Dr. John T. Caldwell, chancellor of State College, addressed a luncheon meeting of the Foundation's executive committee and thanked the organization for its support.

The Foundation provides supplements to the State salary scale in attracting and retaining a top-level faculty in the State College School of Agriculture.
