## Students Invited To Duke Model UN

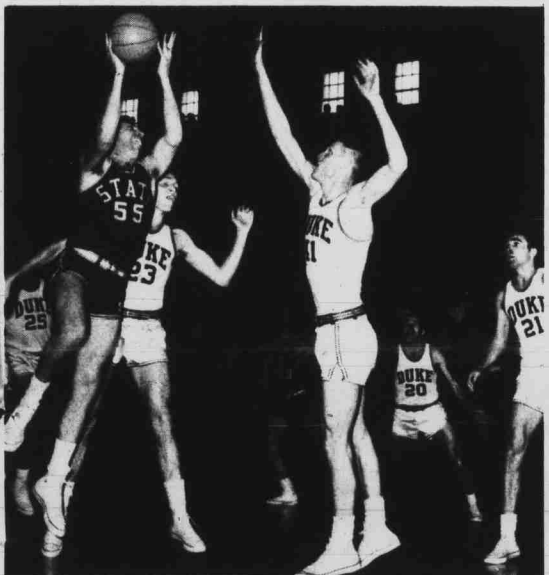

The United Nations Model General Assembly will be held at Duke University on February 22-25. The delegates from State College will be representing India.

As a point of interest, Duke has invited Boston University, West Point, Annapolis, and the Air Force Academy to participate in the assembly.

There is an option for another country should enough State College students wish to go as delegates. The registration fees will be paid by the College Forum Committee. Transportation will be furnished, meals will be paid for up to \$1.00, and the housing is free. Anyone interested in going or wishing more information on the Assembly should come by the College Union Activities Office on or before January 12, 1961.

### -Notice-

Tickets for the State-Carolina basketball game in Reynolds Coliseum on January 18 may be obtained from the Coliseum box office on Tuesday, January 10 through Friday, January 13 between the hours of 8:30 a.m. to 5:30 p.m. All seats for the game will be reserved.

Big Bob DiStefano goes up for a shot despite guarding by Duke's Doug Kistler (41) and Carroll Youngkin (23), as Ken Rohloff and Duke's Heyman, Mullen, and Hurt look on. The Blue Devils outplayed the Wolfpack Saturday 81-67. (Photo by Kugler)

## WKNC Announces Installation Of Studio Equipment

An air of watchful waiting was finally broken here at WKNC last Friday morning when our new Gates "DUALUX" console was delivered. We have been waiting for quite a few years for this momentous occasion to occur. Our old facilities were designed, engineered, and built by our staff engineers in the summer of 1952, and were not exactly of broadcast quality. Now we have the most modern facilities being installed here and at the present are broadcasting from our "emergency" control room facilities in one of our studios. These emergency facilities are not the best in the world, so please bear with us until our new equipment is installed. This new equipment is of true high fidelity quality, and after installation, WKNC will have one of the best, if not the best, quality AM signals in Raleigh. We would like to invite any student or faculty member up to our studios to see this equipment. Remember, for the music most people like most, tune to WKNC, featuring the best music in Raleigh.

## College Receives Huge Grants In '60

RALEIGH, N. C., Dec. 26.—North Carolina State College was awarded two top-level grants in 1960, both of which will doubtless leave a deep imprint on the educational, social, and economic life of the South.

Early last summer the Kellogg Foundation gave State College \$758,000 to tackle basic problems of southern agriculture. The Ford Foundation named State College in October as one of four Southern universities and colleges to receive a grant to expand and strengthen its doctoral instructional program in engineering. This grant amounted to \$760,000.

The Ford award, the largest grant ever received by State College, will amount to \$1,100,000 when its terms are fulfilled. This grant was made with the stipulation that the college would provide \$340,000 in matching funds.

In presenting State College with the grant, the Ford Foundation pointed out that the development of high-quality programs in engineering education

is an imperative national need. The South, with its expanding industrial and research facilities, shares the vastly increased demand for highly trained engineers, it was pointed out.

To meet the matching funds requirement, the legislature must provide \$115,000 and \$225,000 must come from other sources. The North Carolina Engineering Foundation already has launched a drive to obtain these funds.

Specifically, the Ford grant will be used as follows: Additions to the faculty, \$105,000; \$100,000 initially and up to \$100,000 in matching funds to aid in professional development

of the present faculty; \$60,000 initially and up to \$180,000 in matching fellowship funds for increasing the quality and numbers of graduate students; \$100,000 in a lump sum for forgivable loans; \$20,000 initially and \$60,000 in matching funds for the School of Engineering; and \$35,000 for discretionary expenditures of importance to the doctoral program.

(See College, page 4)

## Campus Crier

There will be a meeting of the American Society of Civil Engineers Tuesday, January 10, at 7:30 P.M. in Room 436 Mann Hall.

We will have as guest speaker Mr. John C. Voorhees of TVA, and he will speak on "The Planning and Designing of TVA Hydro Steam Plants."

All interested persons are invited to attend.

The ROTC STORY, one of a series of student activity programs, will be presented on WUNC-TV on Tuesday, January 10 at 8:30 p.m. This program will give a general view of the ROTC activities at N. C. State College.

Included in the program will be films of the Brigade, Drill Team, Drum and Bugle Corp, Cadet Hop, and Scabbard and Blade Society. The films will be narrated by the respective cadet commanders of each unit. Members of the State College community and their families are invited to view this presentation.

A WKNC staff meeting will be held this Tuesday at 8:00 p.m. in the station lounge. Procedures concerning the new console will be discussed.

(See Campus, page 4)

## NCAA Committee Confers With Carolina Officials

By DICK FONTANA  
United Press International

PITTSBURGH UPI—A four-man delegation from North Carolina University, headed by Chancellor William Aycock, appeared before the infractions committee of the National Collegiate Athletic Association Sunday, increasing speculation the Tar Heels are under investigation for alleged basketball recruiting violations.

Chancellor Aycock acted as spokesman for the group during the two-hour and 20-minute session. He departed immediately afterward for Chapel Hill, N. C.

Walter Byers, executive director of the NCAA, acknowledged Aycock, athletic director Charles P. Erickson, head basketball coach Frank McGuire and assistant coach Dean Smith appeared before the committee but did not divulge what occurred.

## Air Society Annual Banquet Staged In CU

The AFROTC George V. Holoman Squadron of the Arnold Air Society at N. C. State College, Raleigh, held their annual Winter Banquet Saturday evening, 7 January 1961 in the ballroom of the College Union.

General Samuel E. Anderson, originally of Greensboro, Commander of Air Material Command and National Honorary Commander of the Arnold Air Society, was the guest speaker.

Other guests were Chancellor John T. Caldwell; Deans J. J. Stewart and J. H. Lampe; Col. L. W. Merriam Professor of Military Science and Tactics, all of N. C. State College; and Col. Louis R. Ciccoli, National Executive Secretary of the Arnold Air Society.

Byers' admission that the conference took place actually was a departure from NCAA policy. The NCAA traditionally refused to make formal announcement on any investigation unless punishment is meted out to the school involved.

### Recruiting Success Studied

North Carolina reportedly came under scrutiny because of McGuire's success with recruiting Yankee players since going to the Southern school several years ago from St. John's of Brooklyn.

Byers said a statement would be issued at noon tomorrow concerning all schools now under investigation against whom action will be taken.

Earlier Sunday, the American Football Coaches Association, after "long hours" of deliberation, recommended a change in rules to permit a return to unlimited substitution.

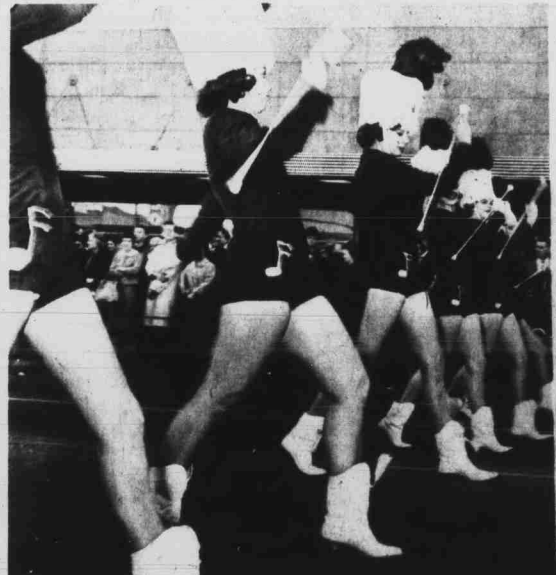

## Sax To Lecture On Explosion Of Population

Dr. Karl Sax, North Carolina State College visiting professor and retired Harvard professor, will give a lecture at 8 p.m. Tuesday (January 10) in Withers Auditorium on the State College campus.

An authority on the population explosion, Dr. Sax will speak on "Malthus and the Modern World: The World's Exploding Population."

The speaker is teaching at State College during the current fall semester. When Dr. Sax leaves the college he will go to Oxford University, England, where he will be a Guggenheim fellow in the field of botany.

Dr. Sax was associated with Harvard University for more than 30 years where he was director of the Arnold Arboretum. The public is invited to attend the Tuesday lecture which will be sponsored by the Society of Sigma Xi.

This classic shot illustrates the real reason people go to see a parade, inaugural or otherwise. These charming young ladies led one of the several high school bands in the parade through downtown Raleigh last Thursday. Our compliments to Technician staff photographer Skip Kugler.

## Comments From The Editor *Conservatism . . . Not All Bad*

The average American thinks of a conservative as an unrealistic defender of the status quo who wants no change in governmental policy whether it might be for the better or the worse. He also thinks of the conservative as a member of the Republican Party.

Both of these ideas are to a great extent wrong. The conservative does want a change in the government, and the Republican party is no longer a conservative organization. The line between the "conservatism" of Nixon and the "Liberalism" of Kennedy is at the best hazy, if not nonexistent. The leader of the conservatives, Senator Barry Goldwater of Arizona, is a Republican; but his ideas played almost no part in the Republican Platform.

The conservatives of today are not dedicated to the idea of spending no money or preserving the status quo. They are dedicated to the idea of State's Rights, and we feel that this is an intelligent and worthwhile position.

The federal government is becoming more and more powerful, and the states are becoming weaker and weaker.

The gain in federal power was initiated by President Roosevelt at a time when the country needed a more powerful central government, and it has made great strides in the supposedly conservative administration of President Eisenhower. We feel that it has gone much too far; and that if this country is to remain truly democratic, much of the power that has been taken from the states must be given back.

The federal government is now the almost supreme authority on every phase of government. The facets which it does not directly control such as schools and highways are indirectly controlled in various other ways. The most wide-spread way in which the federal government exerts its control is by the "giving" of money to states for development. The only catch to this is that the states must spend this money the way that the federal government wants it to.

One of the basic concepts of Economics is the law of diminishing returns. Of course, the federal government has long since passed the point at which business can be carried out even slightly economically. The red-tape magnifies greatly the cost of any undertaken project.

The conservative feels that individual states can much better calculate their own needs than to have them predetermined by the federal government and "forced" on them by promises of monetary aid. It is difficult for a state not to put a highway where the government wants it or to set up a curriculum that the government wants in a school if the federal government promises to pay fifty-per-cent of the cost of these developments.

He also realizes that the money coming from the government is not "free", for it all comes from the same source—the taxpayer. Whether the taxes go to the state or federal government is immaterial. He feels that much of tax paid to the federal government should go to the state which knows its own needs much better, and can do things more economically because of the before-mentioned law of diminishing returns.

This is completely rational, for if a state needed highways, it would elect a Kerr Scott to governorship or if it needed industry, a Luther Hodges. The conservative feels that this method of government would give the individual person more of what it needs for less money paid in taxes.

The first objection that anyone would have to this concept is that it would be weakening the federal government at a time when the threat to our security is the greatest which it has ever been. This idea is not true, however. Weakening the power of the government in-

ternal affairs should have no effect on its external affairs. In fact, if the government were less concerned with the internal situation, it could devote more time, energy, and money to strengthening the nation in this all-important field.

This article is not a Barry Goldwater for president pamphlet or a denunciation of liberal policies. It is written to show that possibly an answer to the problems of our nation could be found by listening to some of the conservative ideals and putting them into practice, instead of condemning them just because they bear the label "Conservative."

—ML

## We'll Tell You So

On this page, there is an interview with Bob Cooke, the President of the student body. Bob and the whole Student Government have been working very much on the problem of the paying of second semester fees. The Student Government did get the time for the paying of the bills extended one day, but the administration did not see a necessity of changing the procedure to any great extent.

Our thanks to the Student Government for doing everything possible for the students, and we will just wait and see how well this new procedure operates. We have a feeling, however, that after all the lines are endured; we will be able to look the business office in the eye and say, "We told you so."

—ML

## Letters To The Editor

# Student Denounces Fee Payment Plan

To the Editor of The Technician  
As a member of our student body and as your representative in the Student Government, I feel that it is my responsibility to prod you into action concerning registration.

As you all know, the paying of bills for the semester has been unreasonably changed for the coming registration. That is, forcing us to pay our bills in person over a two (2) day period rather than having the

business office send the bills to us. This change is solely the result of maladministration on the part of Mr. Vann, our business manager.

It is my feeling that this new method of paying bills will not only cause a great deal of confusion but will cause us, the students, to waste valuable time standing in another long line for many wearisome hours. The only way we can hope to alleviate the situation is not by writ-

ing *The Technician* but by writing the Chancellor, who is sympathetic to our problems. If the incorrigible Mr. Vann does not reverse his policy, perhaps we can look into the matter of obtaining a new, more efficient, business manager.

STUDENTS LET YOUR-  
SELF BE HEARD!

Respectfully yours,  
Peter N. Pund  
Senator—Ag School

## Bob Cooke Comments On Bill Payments

Bob Cooke, student body president, in an interview with *The Technician* made the following comments concerning the recently announced statement which alters the policy for payment of fees.

"December 15, 1960 the Student Government Legislature adopted a resolution expressing disapproval of the policy of the business office on the manner of receipt of fees for the spring semester tuition. On Friday, the following day, in an interview with Mr. J. G. Vann, College Business Manager, the student objections were aired.

After this meeting, an extension of one day for payment of fees was granted.

"Feeling that this action would, however, not be the most acceptable or convenient method for the student body, I called the matter to Chancellor Caldwell's attention. Although expressing a sympathetic attitude, Dr. Caldwell upheld the business office's decision.

"I regret that a more favorable system has not been enacted. On the other hand, I am pleased that at least minimal, and I hope, practicable measure was obtainable."

## Honor Board Places Student On Probation

The Honor Code Board, a division of the Judicial Department of Student Government at State College, dealt with a case of stealing at a meeting in the College Union last Thursday, January 5. The student involved was charged with stealing an item from one of the stores in

Cameron Village. The defendant, who has already been tried in Raleigh City Court, pleaded guilty to the offense.

After questioning by the board members the defendant was found guilty as charged. His sentence was probation for the remainder of the 1960-61

school year. Probation is defined as prohibiting a student from representing the college in any capacity or participating in any school activity other than one in which the student has a life membership. A letter concerning the incident was placed in the student's file and a copy was sent to his parents.

The Honor Code at State College places a student on his honor not to lie, cheat, or steal; it is his individual responsibility to see that the Honor Code is upheld.

# micro wave

Scheduled completion of our coast to coast radio beam system by late 1961 affords graduating engineers an opportunity to participate in the development, installation and subsequent maintenance of what will be the first nationwide microwave network. Additionally, the continued growth of the company stemming from the expansion of facsimile and private wire services offers unlimited opportunities for nontechnical graduates interested in Accounting, General Administration, Operations and Sales following completion of a formal Management Training Program. Our company representative will be visiting your campus in approximately three weeks. Check the date at your Placement Office and arrange to have your name placed on our interview list.

# Second Half Beats State Again

By Earl Mitchell  
Sports Editor  
Durham, N. C. — Resolved: That all State College basketball games have the second half played first.

**Affirmative:** The State College basketball team.  
**Negative:** The State College basketball opponents.

This thing called the second half seems to have the Wolfpack completely confused. The Pack went down to an 81-67 defeat at the hands of the Duke Blue Devils Saturday, when they fell down on the job in the second half. This is not the first time that the second half has brought the downfall of the Pack. In the first round of the Dixie Classic, Villanova came from 14 points behind at intermission to win the game by nine points.

State didn't play their best game of the season in the first half against the Dukes. They did manage to grab a three-point lead before the first half ended and it was only the second time that the Pack had had the lead. The Wolfpack led briefly 10-9, but the Blue Devils quickly took the margin back. With 1:41 left in the first half Stan

Niewierowski popped in a bucket that put the Pack in the lead. Duke got the lead back, but a basket by Moose DiStefano and another by Niewierowski gave the State five a 36-33 halftime margin.

In the second half the Blue Devils jumped out in front with scoring of Art Heyman and just moved away from the hapless Wolfpack. The Blue Devils outscored State 48-31, got six more field goals, and in general, just about ran the Wolfpack clean out of Duke Indoor Stadium in the second half. Heyman, after a slow first half of only seven points, fired 20 points through the cords in the second half and pulled down ten rebounds to give him 16 saves for the game. In that red hot second half for Duke, they hit on 19 of 41 attempts from the floor for 46.3% accuracy.

Howard Hurt followed sophomore sensation Heyman in the Duke scoring with 20 points. Carroll Youngkin was the number three scorer for Duke with

18 points. DiStefano led the State offense with seven out of 15 from the floor and five of six from the foul line for 19 points. In addition to his scoring effort he also pulled down 14 rebounds. Niewierowski followed DiStefano with 17 points, while Ken Rohloff was third with 12.

John Pungler, who had done so well for the Pack in the three previous outings had a miserable afternoon. He took only five shots from the floor and one try from the charity line and missed them all.

Duke jumped into an early 4-0 lead before the Wolfpack was able to score. State finally got the advantage at 10-9, but quickly lost it. The Blue Devils then stretched their lead to nine points before they hit a cold spell. State then got eight straight points to narrow the lead to one point. Then with about one minute left in the first half they moved into the lead for good in the first half. As the second half got under-

way the Blue Devils raced into the lead as they scored 19 points while the Wolfpack could only throw in five. The Duke five had little trouble holding off the Wolfpack for the rest of the game. Late in the game the Blue Devils went into a semi-stall to eat up the clock and keep the State team from scoring.

After the Wake Forest game, the Pack will return home to battle the University of North Carolina on Wednesday night. After Carolina, Maryland will close out the first half of the season for the Wolfpack on Saturday night. There will then be an idle week for examinations before the Pack takes on

South Carolina a week from this coming Saturday. The following Tuesday will see State facing Virginia in Greensboro.

## Solid opportunities with solid state devices

A big part of Western Electric's job is to manufacture the miniature "new arts" products that are changing the science of communications. It's a job which offers you a challenging career—a chance to plan new methods of mass producing ever-improving kinds of transistors, ferrite devices, diodes, special purpose electron tubes, etc.

You'll be with a company that is expanding rapidly in this field. At present our Allentown and Laureldale, Pa., plants are devoted exclusively to making electron devices, and a big new plant is under construction in Kansas City. The needs of the Bell Telephone System for these products are increasing daily and will multiply enormously with the introduction of Electronic Central Office switching now nearing trial operation.

These devices are changing the scene at all our manufacturing plants as they go into the startling new communications products developed by our associates at Bell Telephone Laboratories. From microwave transmission

equipment to submarine cable amplifiers, our products call for creative production engineering, installation planning, and merchandising methods. Our job for the Bell System and the U.S. government has grown to the point where we are now one of the nation's "Top 11" in industrial sales. And your chance to play an important part in our future growth is solid!

Opportunities exist for electrical, mechanical, industrial, civil and chemical engineers, as well as physical science, liberal arts, and business majors. For more information, get your copy of Consider a Career at Western Electric from your Placement Officer. Or write College Relations, Room 6106, Western Electric Company, 195 Broadway, New York 7, N. Y. Be sure to arrange for a Western Electric interview when the Bell System recruiting team visits your campus.

**Western Electric**  
MANUFACTURING AND SUPPLY UNIT OF THE BELL SYSTEM

Principal manufacturing locations at Chicago, Ill.; Kearny, N. J.; Baltimore, Md.; Indianapolis, Ind.; Allentown and Laureldale, Pa.; Winston-Salem, N. C.; Buffalo, N. Also Western Electric distribution centers in 32 cities and installation headquarters in 16 cities. General headquarters: 195 Broadway, New York 7, N. Y.

# College Receives Huge Grants

(Continued from page 1)  
At present State College awards Ph. D. degrees in ceramic, chemical, civil, electrical, mechanical, and nuclear engineering, and applied physics.

The regional agricultural program established under the Kellogg grant is focusing attention on things that will put farm incomes on a par with non-farm incomes.

To implement this program in agricultural adjustment and public policy, an organization known as the Agricultural Policy Institute has been established. It is operated by the college's School of Agriculture, working through its Department of Agricultural Economics. Dr. C. E. Bishop, head of the department, is the Institute administrator.

The Institute will have these primary objectives:

First, throughout the program made to bring southern leaders a concentrated effort will be together to exchange views on the South's farm problems and opportunities.

Many seminars and workshops will be held in Raleigh and other locations in the South. Attending will be agricultural, political, and educational leaders.

Second, a new series of edu-

cational programs will be launched at State College to train agricultural workers in problems of farm adjustments and policies.

The third phase of the program concerns State College expanding its research activities to supplement the two educational phases of the programs sponsored by Kellogg.

Since the grant was awarded last summer, the Agricultural Policy Institute has organized an advisory committee and developed plans for the future.

A conference on the general theme, "Southern Agriculture—Its Problems and Policy Alternatives," will be held in Raleigh, January 23-26. This conference will be oriented primarily to Southern agriculture leaders.

A second conference on marketing policy will be held February 21-23, also in Raleigh. This conference will consider marketing orders and agree-

ments, advertising promotion programs, improved market structure and improved market efficiency. The conference will be open to agricultural, industrial, and professional people throughout the nation.

In June there will be a technical workshop concerning the measurement of management input in agriculture. Also in June, the first summer session on agricultural adjustment and public policy will be held in Raleigh for local agricultural workers.

The first issue of a quarterly magazine, "Agricultural Policy Review" will be published by the Agricultural Policy Institute beginning in January.

## Campus Crier

(Continued from page 1)

The unlucky day of Friday the Thirteenth brings an enjoyable evening for lucky students and their dates who go on the Hayride January 13.

Students who wish to go on the Hayride are asked to meet at the College Union at 7 p.m. Friday; the caravan will leave the Union at 7:15 p.m. for Horseshoe Acres. The ride will last for two hours and refreshments will be served afterwards.

This event is for couples only. Sign up at the CU Main Desk by noon of Thursday, January 12.

The Hayride is sponsored by the College Union Outing Com-

mittee.

Several students on campus have expressed an interest in establishing an agreeable time for them to meet. There will be a short organizational meeting play and just playing for fun. Tuesday, January 10, at 6:30 p.m. in the College Union.
