## Fraternity Rush Opens Tonight

### Annual Fine Arts Festival Presents Cultural Series

The fourth annual "Fine Arts Festival" will be held at North Carolina State College February 16-28, with an expected attendance of thousands of persons.

A wide range of cultural events, ranging from concerts to dramatic presentations, will be presented during the 13-day festival.

Sponsor of the series of events is the State College Union and its various committees.

Programs planned for this year's festival are:

The "Good Design '61" exhibit will open February 16 in the College Union Gallery.

Cilli Wang, celebrated pantomimist, will perform February 17 at 8 p.m. in the College Union Ballroom.

An intercollegiate choral group, composed of college glee clubs from throughout North Carolina, will perform February 18 at 8 p.m. in William Neal Reynolds Coliseum.

The Duke University Concert Band will present a concert February 19 at 2 p.m. in the College Union Ballroom.

The University of Maryland Dance Group will be presented in the College Union Ballroom at 8 p.m. February 19.

A group of Latvian students attending colleges and universities in the Washington, D. C., area will be presented in an International Folk Festival February 21 at 8 p.m. in the College Union Ballroom.

The North Carolina State College Symphonic Band will present its annual winter concert in the College Union Ballroom February 24 at 8 p.m.

A One-Act Play Festival,

featuring drama groups from colleges throughout North Carolina, will begin at 3 p.m. on February 25 in the College Union Ballroom.

John Ciradi, noted poet, essayist, critic, editor, translator, and educator will speak February 27 at 8 p.m. in the College Union Ballroom.

The third lecture in the "Last Lecture" series will be presented February 28 at 8 p.m. in the College Union Ballroom, and a Photography Exhibit for the Fine Arts Festival will be held in the South Gallery of the College Union.

The movie, "Les Enfants Terribles" (The Strange Ones), will be shown February 22 at 7:30 and 9:15 p.m. in the College Union Theatre.

A special feature of this year's "Fine Arts Festival" will be the Friends of the College, Inc., presentation of the Detroit Symphony, under the direction of Paul Paray, Thursday (February 16) at 8 p.m. in William Neal Reynolds Coliseum. The Detroit Symphony is ranked among the three or four great orchestras in the United States.

The festival programs are

sponsored by various committees of the State College Union.

The "Fine Arts Festival" as a whole is under the direction and supervision of the activities committee headed by Bill Guion of Charlotte. Publicity for the festival including a brochure and a poster, is handled by the publicity committee headed by Ann Smith of Jacksonville.

Features in the festival will be sponsored by the dance committee headed by Bill Carroll of Charlotte; film committee under the chairmanship of Ernest Greene of Raleigh; forum committee headed by Dodie Clark of Garner; gallery committee under the chairmanship of John Stone of Greensboro; international committee headed by Mike Gelter of Israel; library committee under the chairmanship of Fred Slosman of Asheville; music committee headed by George Heeden of Wilson; photography committee under the chairmanship of Rodney McCurry of Chandler; and the Theatre Committee headed by Leete Doty of Summit, N. J.

All events in the "Fine Arts Festival" will be open to the public.

### State College Receives National Science Grants

North Carolina State College has been awarded six National Science Foundation grants totaling \$61,650 for undergraduate research participation programs.

Largest grant was for \$25,645,

made for research in mechanical engineering. It will provide for 10 weeks work in the summer of 1961, beginning June 1, and for the academic year 1961-62. Dr. William T. Snyder, Department of Mechanical Engineering, is in charge.

Dr. Carey H. Bostian, Department of Genetics, is directing work in genetics research for the academic year 1961-62 under a \$15,065 grant.

Other grants include \$5,005 for forest biology, Dr. T. A. Maki, Department of Forest Management, director; \$2,590 for bacteriology and botany, Dr. Herbert T. Scofield, Department of Botany, director; \$9,895 for field crops, Dr. Paul H. Harvey, Department of Field Crops, director; and \$3,450 for wood physics, Dr. Alfred J. Stamm, Department of Wood Technology, director.

The State College grants are part of a \$3.2 million undergraduate research participation program designed to help build the interest of superior students in research.

Grants were announced by Dr. Alan T. Waterman of Washington, D. C., director of the National Science Foundation.

Dr. Waterman said, "Research experiment has long been recognized as absolutely necessary to the training of a scientist. It also has been amply demon-

### Code Violations Reported By Judicial Board Rush Hours Announced; Informal Program Set

The Honor Code Board of the State College Student Government handed down decisions in two cases of Honor Code violations involving four students.

The meeting, which took place the week before fall semester exams, lasted for four hours.

Two students were charged with cheating on a Military Science 201 quiz; one of the students pleaded guilty to the charge and was found guilty by the Board. His punishment was suspension from school until June 1961 and probation during summer school and the following fall semester. The other student was cleared of the charges.

Two students were involved in a case of car stealing. One man was suspended until the spring of 1962; the other, who was actually convicted of aiding and abetting, was placed on probation until the fall of 1961.

State College students are on their honor not to lie, cheat, or steal; this is the creed of society the world over. The training offered at State College must include this standard in order to fulfill the requirements of our civilization.

### Local Projects In Science Fair To Be Exhibited

Competition in the 1961 North Carolina Science Fair will be held for the North Central District on March 25 in the College Union Building at North Carolina State College.

Dr. Homer C. Folks of the State College faculty is director of the District Fair.

Entries of junior and senior high school students from 16 counties in the district who are interested in science will be judged, with winners in the Junior Division and the Senior Division eligible to compete in the State Science Fair to be held later at Duke University.

North Carolina Science Fairs are sponsored by the North Carolina Academy of Science in cooperation with several government agencies and commercial enterprises. They afford unusual opportunities for students with abilities in science and mathematics to display their work to parents, teachers, students, and the general public.

As many as six exhibits in

strated that research or related experience contributes substantially to the education of many undergraduate students."

The undergraduate research participation program will enable undergraduate students at large universities and smaller colleges to gain more fully heretofore limited experience in research.

By Richie Williamson IFC Publicity Chairman

The Interfraternity Council is sponsoring a second semester Rush Week for the eighteen social fraternities at N. C. State College, beginning tonight and continuing through Saturday night. The Rush Week will be under open rush with one of the previous rushing restrictions being enforced. This will provide all of the new students, and present students an opportunity to visit any and all fraternities at any time throughout the week.

The Council has set up visiting hours for the week only as a means to let all students know that they are welcome at any house during that time. Visiting hours will be from 7:00 p.m. until 10:00 p.m. tonight and tomorrow night. However, this does not mean that a rushee may not stay at a house later than the specified hours.

The individual fraternities have planned Rush parties for Friday and Saturday nights for all rushees. The parties will provide entertainment in various forms, such as combo parties, cabin parties, and smokers. Invitations to these parties are not required so that all students will feel free to attend the activities. Most of the parties will be informal affairs.

Almost all of the fraternities are making an all-out effort in preparation for the Rush Week. The rush is anticipated to be

highly successful in order that membership may be increased due to coming move to Fraternity Row. Therefore, all students can expect to benefit greatly from visiting as many houses as possible so that they will be able to see how the fraternity system operates, to see which fraternity house that most appeals to them, by being able to adequately compare the houses they have visited.

The Interfraternity Council urges all students to take advantage of the opportunity to visit the houses. It feels that this would be the best time for those students who are uncertain about pledging a fraternity or have questions concerning fraternity life to make an effort to attend the house functions sometime during this week so that they will have a chance to become better informed and be able to make a wise decision.

### Campus Crier

The North Carolina State College Amateur Radio Club W4ATC will meet Thursday, February 9, at 7:00 p.m. in Room 307 of the 1911 Building. All interested persons are invited to attend.

(See CRIER, page 4)

State's Russ Marvel and Duke's Howard Hurt lunge for ball as Terry Litchfield (24) and Art Heyman (25) look on.

Dutch Muehlbauer drives past Duke's Carroll Youngkin in last night's contest. Marvel and Kistler are in background.

## Comments From The Editor

### Rushes Needed

Tonight marks the beginning of the spring rush for the eighteen fraternities at State College. Rush Week during the spring has never been as big as the fall rush. There are many reasons for this. The majority of the students that want to pledge usually pledge during the fall semester. The majority of these students are freshmen. When the second semester rush rolls around, there are very few students that are interested in joining a fraternity.

The reason could be because the IFC does not promote the spring rush as they do the fall rush. Once again, the IFC has waited to the last minute to announce rush week this time. Why was this done? There is no certain reason.

Some of the fraternities that are going to be members of the Fraternity Row are below the membership that will be needed to aid them financially when they move from their present locations.

We would like to urge all the students that are interested in joining a fraternity to take part in this spring rush. All of the fraternities have good programs set for rush. The fraternity can be beneficial to a student just as well as the student can be beneficial to it. A fraternity is a home away from home for the college student. It can play a big part in the college student's life. It is hoped that many students will take part in the rush. Let's make this spring semester rush just as successful as the fall semester rush was.

JB

## Behavior Problem

An unfortunate incident took place at Duke's Indoor Stadium last Saturday night. Many of you that saw the game on television between Duke and Carolina know about the fight that took place in the closing moments of the contest.

There have been many comments about the fight by different sportswriters. The tension among the Big Four schools is reaching a peak where it might be necessary to move the games away from the campus to a neutral site in the future. This would hurt the students and the loyal fans of the schools.

It has been suggested by many that see the games at the Big Four schools that a barrier, such as the one that we have in the Coliseum, be installed to keep fans and students from running on the court such as was the case at Duke Saturday night.

Duke, Carolina, and Wake Forest have their seats right next to the playing court. It is therefore easy for the persons attending the game to break out on the court.

Duke received the sportsmanship award this past year for the school displaying the best sportsmanship among an Atlantic Coast Conference school.

State has never received the award. It is true that sportsmanship trophies do not bring conference championships. However, it is time that we, as well as some of the other schools in the conference, start displaying courtesy to the visiting schools.

An act, such as the one that took place at Duke University, is uncalled for. It is true that the players started it, but it is the fans that edge them on. We do not want any of our players to obtain an injury from one of these melees, nor do we want any of the opposing team's players hurt. Let's give the other schools a run for the sportsmanship trophy this year, and we can do it by not having a scene such as the one at Duke last Saturday night.

## LITTLE MAN ON CAMPUS

"YOU HAVE YOUR ASSIGNMENTS TWISTED!—THIS IS SUPPOSED TO BE A BOTANY FIELD TRIP—NOT BIOLOGY!"

## Letters To The Editor

To The Editor of The Technician:

For those who took to heart "State College . . . A View from Within" in the January 16, 1961 issue of the Technician, let me attempt to set the record straight on a few points on which the author was obviously confused. The author did not seem to be aware that there exist here at State College some engineering students who have the sincere purpose of understanding the scientific world. It is these students of whom I speak and whom I defend.

In the first place these students do not learn by rote, but develop a thought process which enables them to probe into the depths of a problem and break it into its basic elements. I dare say that one of these students could take a quiz problem and, if given time, could solve it by beginning with the basic physical laws. This is hardly rote memorization. When these students start to work, they will not solve problems by looking up formulas in a thick book. This is absurd, and could only be thought of by one who approaches problems in this manner or who never bothers to approach a problem at all. The real problems are virgin problems that require for their solution the exuberant exercise of the thought process with the assistance of available pertinent material.

Upon graduation from State College, these students have learned how to think, and what is more, have learned how to apply their thoughts. Perhaps it is true that many so called engineers perform the function of looking up formulas which they don't understand; but credit must be given to the real engineers who have the ability to think and apply. After all, a person who has developed his thought process through scientific

study can apply it easily to every other phase of life; so I say, that it is those who cage their thought processes inside the bars of their own fields, or who don't use the thought process at all, are those whom State College seems to be failing. But exactly who is failing whom?

Bruce Hoadley

To The Editor

The Technician:

This letter is concerning the article printed in *The Technician* on January 12, 1961 under Fraternity Flashes entitled, "Operation Abolition".

Gentlemen, since when do you let *Communist Propaganda* get into our student paper? This is exactly what happened at the University of California. Their school paper also was used for *Communist Propaganda*.

I do not know, maybe you had seen "Operation Abolition" before printing the article and maybe not. I think not, for, if you had, I do not think the article would have been printed.

The film was seen the night of the twelfth by a group of us students on campus, since to many, and it shocks us to read the article concerning the film in our paper. The Communists must not invade State College. We should not be duped as were the students of the University of California. We are not to be led to believe such trash, why should we be subjected to such an article.

Gentlemen if you have not seen the film, try to see it—and,

We have just received a beautiful selection of Half-Sleeve Sport Shirts for Spring

in plaids & solids pull-over & coat fronts— from \$4.95

## CU Forum Committee Plans New Program

The College Union Forum Committee, as its name suggests, is concerned with bringing to the State College campus speakers versed in state, national, and world affairs. These speakers may be persons directly influential in politics, scholars in the political field, or big political names. The aim of the Forum Committee in bringing these speakers to State College is to give to the campus population a greater knowledge of state, national, and world affairs through hearing and conversing with those actively participating in the making of contemporary history. Only by being well grounded in current affairs can a college graduate be truthful when he says that he is ready to accept his responsibilities as a citizen.

On March 5, 1961, Roy Wilkins, executive secretary of the NAACP, will speak in the College Union Ballroom at the invitation of the Forum Committee. Later, it is hoped that a high ranking Russian official will speak here. Speakers of the type of Mr. Wilkins and the Russian are those who are directly involved with the political atmosphere of the United States and the world today.

At present the College Union Forum Committee is greatly concerned with becoming a corporation. Like the College Union Library Committee, the Forum Committee, by being incorporated can bring speakers of a greater caliber to the campus. Formally, because of a lack of funds, the Forum Committee has been forced to rely on free speakers and the supply is limited as most speakers prefer booking through agencies that can insure them a good fee. With an incorporation, funds will be available to the committee so that a well-planned series of lectures for 1961-1962 will be established.

beware of printing such *Communist Propaganda* again, or, are you too already duped!

Charles O. Cox

One program with which the College Union Forum Committee is concerned at present is the United Nations Model Assembly of the Collegiate Council of the United Nations to be held at Duke University from February 23 through 25. North Carolina State College is sending delegations representing three countries—India, Sweden and Poland. By working hard in preparation for the Model Assembly it is hoped that State College will make an excellent showing.

During the Fine Arts Festival from February 17 through March 1, the Forum Committee has two programs. On February 17, at 8:00 p.m., in the College Union Ballroom, a comic pantomimist, Miss Cilli Wang will appear.

On February 28, at 8:00 p.m., in the College Union Ballroom Mr. Sidney Knowles will speak as part of the Forum Committee's Last Lecture Series. The Forum Committee is also concerned with several programs on a smaller scale. Such things as providing space and TV sets for the great debates and the election returns take up a part of the committee's time.

### Registration Pause

Consider a trinket from Pandy's box  
That scourges the progress of all just men;  
That at the door of the devil knocks;  
That seems to me a crying sin:  
That dryrot, stained, poisonous sign;  
It says that here you must wait in line.

# Litchfield Bags Bucket For Win

By Earl Mitchell  
Sports Editor

Reynolds Coliseum—With just two slim seconds left on the Coliseum clock, big Terry Litchfield bounded into the air and sent a shot through the basket to give State College a 61-59 win over the Duke Blue Devils, the third ranked team in the nation.

According to Wolfpack Coach Everett Case, Litchfield was chosen to take the shot in the timeout huddle with just five seconds left in the contest. The timeout followed a rebound grab by Ken Rohloff. Rohloff quickly stuck his hand in the air and called timeout. At this point the score was tied at 59-all. After the timeout was over, Dutch Muehlbauer threw the ball in to Rohloff, who quickly fired a pass up to Litchfield, who was standing about 12 feet to the left of the basket.

Before Litchfield made the game-winning shot, he had only scored two points, but Coach Case felt that he was the man to do the job. When the ball dropped through the basket, fans were lined up 10 and 15 deep all around the court. When the game ended, Stan Niewierowski, who had to miss the game because of an ankle injury, ran out to congratulate Litchfield. Niewierowski was so carried away with his greeting that he knocked Litchfield to the floor. By this time the playing floor was a madhouse of spectators. The fans quickly hoisted Litchfield to their shoulders and he rode to the dressing room.

The Blue Devils jumped off to an early lead, but the Pack went ahead with 12:03 left in the first half on a free throw by Muehlbauer. The State five held on

to this lead for the rest of the first half and extended it to as much as five points on two occasions. Russ Marvel, who scored 14 points for the night, tossed in nine tallies in that torrid first half that saw the Wolfpack playing one of their better styles of basketball this season. Going into the dressing room at intermission, the Pack held a 28-25 lead.

The big question was now whether State could hold on to the halftime lead that they had lost so many times in the past. The question was quickly answered as they came out fired up in the second half and moved their lead out to ten points before the Blue Devils could get organized. From this point, the Dukes worked on the Wolfpack lead and finally tied the score at 41-all with about 12 minutes left in the contest.

With about six minutes showing on the clock, Duke had mov-

ed into a five point lead. Four points by Moose DiStefano and buckets by Muehlbauer and John Pungier tied the score at 59-all with about 1:51 left in the contest. Duke then put the ball into a deep freeze hoping to get the last shot of the game. With about seven seconds left in the game Doug Kistler took a hurried shot at the basket that missed its mark. Rohloff got the rebound and quickly called time-out.

The success story of the night was the Pack defense that held scoring ace Art Heyman to only 14 points. Heyman had only one

point at intermission, but found his shooting eye before the second half started. Howard Hurt was the big shooter for the Blue Devils with 19 points on seven field goals and five free throws. Hurt was followed by Heyman and John Frye with 14 each.

Marvel and DiStefano provided the scoring punch for the home standing Wolfpack with 14 tallies apiece. Hot on their heels was sophomore John Pungier, who did a great defensive job on Heyman. Pungier got 12 for the night.

Duke had the better night from the floor as they hit on 20

of 54 attempts or a 37% mark. State, on the other hand, dropped 24 shots through the cords in 72 tries for 33.3% accuracy. In the rebounding department, the Wolfpack led with 49 saves to 40 for Duke.

The Duke freshmen defeated the State freshmen in the first game of the night 85-65. Duke

## IBM WILL INTERVIEW FEBRUARY 21-22

Candidates for Bachelors or Masters Degrees are invited to discuss opportunities in:

### Marketing and Sales Engineering and Science

This is a unique opportunity to find out about the many career opportunities at IBM. The IBM representative can discuss with you typical jobs, various training programs, chances for advanced education, financial rewards, and company benefits—all important factors that affect your future.

#### SOME FACTS ABOUT IBM

**An Unusual Growth Story:** IBM has had one of the exceptional growth rates in industry. It has been a planned growth, based on ideas and products having an almost infinite application in our modern economy.

**Diverse and Important Products:** IBM develops, manufactures and markets a wide range of products in the data processing field. IBM computers and allied products play a vital

role in the operations of business, industry, science, and government.

**Across-the-Country Operations:** Laboratory and manufacturing facilities are located in Endicott, Kingston, Owego, Poughkeepsie and Yorktown, N. Y.; Burlington, Vermont; Lexington, Ky.; San Jose, Calif.; Bethesda, Md.; and Rochester, Minn. Headquarters is located in New York City with sales and service offices in 198 major cities throughout the United States.

The Accent is on the Individual: No matter what type of work a person does at IBM, he is given all the responsibility he is able to handle, and all the support he needs to do his job. Advancement is by merit.

The areas in which IBM is engaged have an unlimited future. This is your opportunity to find out what that future has to offer you.

Call or stop in at your placement office to arrange an appointment with the IBM representative for the date above. If you cannot attend an interview, write or call the manager of the nearest IBM office:

# New College Service Club Plans Spring Activities

The Circle K club of State College has changed its meeting time and place of meeting for the spring semester. Beginning February 6, Circle K will hold dinner meetings in Room 254 of the College Union from 5:30 to 6:30. On the agenda for the newly-formed service club this semester are several projects which should prove interesting to the campus as a whole as well as the club itself.

Taking the motto "We build" from the parent club, Kiwanis International, the Circle K has as its aim the betterment of the community in general and the

welfare of the students of State in particular.

Persons interested in joining Circle K are urged to contact either Membership Chairman Edgar Snider, 324-C Bragaw; Publicity Chairman Edwin Harris, 249 Owen; or President Protem Charles Sparrow, 1709 Hillsboro Street. Applications for membership should be made as early in the semester as possible.

# DISTRICT FAIR PLANNED

(Continued from page 1)

each division are permitted each school in the district, with the exhibits divided evenly between Biological Science.

The best five exhibits in the two categories, biological and physical, from each District Fair will be invited to the State Fair, where first prize will be an all-expense-paid trip to the National Fair in Kansas City. Other prizes are cash awards from \$5 to \$10.

The North Central District Science Fair will show exhibits from students in the following counties:

Wake, Johnston, Nash, Halifax, Northampton, Harnett, Lee, Moore, Chatham, Durham, Orange, Person, Granville, Vance, Warren, and Franklin.

Student entries will be judged on the basis of creative ability, scientific thought, skill, thoroughness, clarity, and dramatic value. Points will be awarded in each area of judging; winners will be determined on this basis.

Each entry will be a display consisting of a demonstration experiment, a working model, or of charts, diagrams or collections with a scientific objective.

# Crier

(Continued from page 1)

There will be a meeting of the Engineers' Council Thursday February 9, at 7:00 p.m. in Room 11 Riddick. All members are urged to be present.

The State Math Education Club will meet at 7:30 on Wednesday in Room 252 of the College Union. The Alumni Association will have the program.

There will be a meeting of the Leopold Wildlife Club this Thursday, February 9, in 149 Gardner at 7:00 p.m. All members should attend as pictures for the Agromeck will be taken.

The CU Hobby Committee wishes to remind all those who have a locker in the Craft Shop that they must renew their application or the locker will be reassigned. Last date to renew these lockers is February 10.

## "A GUIDE FOR THE DATELESS"

With the cost of dating rising higher and higher it is no wonder that so many of us men are turning to discus throwing. Naturally, we would prefer nuzzling warm coeds to flinging cold disci, but who's got that kind of money? Prices being what they are, the average man today has a simple choice: dating or eating.

Unless the average man happens to be Finster Sigafos. Finster came to college with the normal ambition of any average man: he wanted to find the prettiest coed on campus and make her his. He looked long and carefully, and at last he found her—a tall job named Kretchma Inskip, with hair like beaten gold.

He asked her for a date. She accepted. He appeared at her sorority house that night, smiling, eager, and carrying a bouquet of modestly priced flowers.

"Now then," said Kretchma, tossing the sleazy flora to a pledge, "where are we going tonight?"

Finster was a man short on cash, but long on ideas. He had prepared an attractive plan for this evening. "How would you like to go out to the Ag campus and see the milking machine?" he asked.

"Ick," she replied.

"Well, what would you like to do?" he asked.

"Come," said she, "to a funny little place I know just outside of town."

And away they went.

The average man today has a simple choice.

The place was Millionaires Roost, a simple country inn made of solid ivory. It was filled with beautiful ladies in backless gowns, handsome men in dickeys. Original Rembrandts adorned the walls. Marlboro trays adorned the cigarette girls. Chained to each table was a gypsy violinist.

Finster and Kretchma were seated. "I," said Kretchma to the waiter, "will start with shrimps remoulade. Then I will have lobster and capon in maderia sauce with asparagus spears. For dessert I will have melon stuffed with money."

"And you, Sir?" said the waiter to Finster.

"Just bring me a pack of Marlboros," replied Finster, "for if ever a man needed to settle back and enjoy the mild beneficence of choice tobacco and easy-drawing filtration, it is the shattered hulk you see before you now."

So, smoking the best of all possible cigarettes, Finster watched Kretchma ingest her meal and calculated that every time her fetching young Adam's apple rose and fell, he was out another 97¢. Then he took her home.

It was while saying goodnight that Finster got his brilliant idea. "Listen!" he cried excitedly. "I just had a wonderful notion. Next time we go out, let's go Dutch treat!"

By way of reply, Kretchma slashed him across the face with her housemother and stormed into the house.

"Well, the heck with her," said Finster to himself. "She is just a gold digger and I am well rid of her. I am sure there are many girls just as beautiful as Kretchma who will understand the justice of my position. For after all, girls get as much money from home as men, so what could be more fair than sharing expenses on a date?"

With good heart and high hopes, Finster began a search for a girl who would appreciate the equity of Dutch treat, and you will be pleased to hear that he soon found one—Mary Alice Hematoma, a lovely three-legged girl with sideburns.

We're no experts on Dutch treat, but here's an American treat we recommend with enthusiasm—Marlboro's popular new partner for non-filter smokers—the Philip Morris Commander.

## The TOP name in Missile Inertial Guidance—AC SPARK PLUG seeks top talent!

### AC SPARK PLUG, THE ELECTRONICS DIVISION OF GENERAL MOTORS,

has immediate, permanent positions in Milwaukee, Los Angeles, Boston and Flint. If you have a BS, MS or PhD degree in EE, Physics, Math or ME, you may qualify . . .

You can find a challenge and opportunity for advancement at AC. You will be working on such projects as MACE, THOR, POLARIS, the ultra-sophisticated TITAN system and complex Bombing Navigation Systems.

AC and GM will assist your career progress through graduate study at universities in nearby locations. In addition, you will have the opportunity to take exclusive on-the-job course work on the advanced state of the art.

These training programs are now available in Milwaukee:

**ENGINEERING PROGRAM**—For men whose career aim is design and development of inertial guidance equipment. All recent college graduates will enter this one year career acceleration training program with formalized classroom instruction. This instruction will be in conjunction with rotating job assignments. These assignments, in Manufacturing, Reliability and Engineering areas, will provide a smooth transition from academic learning to career development.

**FIELD SERVICE PROGRAM**—formalized two- to four-month classroom and laboratory training on missile inertial systems and bombing navigation systems. After completion of training program, assignments are to both domestic and foreign sites.
