Honor Code Board Releases Policy On Laboratory Reports

By John Curlee

Meeting in room 252 of the College Union Thursday night, the Honor Code Board tried a case involving five students who were reported by their lab instructor for submitting identical work on an assigned formal lab report. Since two of the students had dropped out of school, only the remaining three could be called before the Board.

The students admitted working together on all parts of the report, but pleaded innocence on the grounds that their instructor had not explicitly stated that collaboration was permissible.

After a lengthy deliberation, the Board ruled that the students were guilty of cheating under the Honor Code, which states that all students are on their honor not to lie, cheat, or steal. The board placed as their sentence a formal reprimand. A letter stating that the student has been convicted of cheating was placed in the permanent record of each student in Holliday Hall, and a letter describing the incident was sent to their parents.

The Board defines cheating

Noted French Film Written By Cocteau To Be Shown At CU

"Les Enfants Terribles" (The Strange Ones) a feature film written by the pre-eminent French director Jean Cocteau, will be presented in the College Union Theatre at 7:30 and 9 p.m. on Wednesday (February 22).

The film is of the private life of a brother and sister who share a room filled with secrets, treasures, and memories which betray the lack of emotional discipline and the disorderly lives of those who occupy it. Tragedy is inevitable when emotions begin to spin a net of strong, gossamer-thin threads about the brother and sister who are the "enfants terribles" of this brilliantly macabre Cocteau party.

The film is presented by the College Union International as a feature of the Fine Arts Festival now in progress at the Union.

under the Honor System to be willfully submitted work that is not one's own for a grade. The board recognizes that laboratory facilities at State College are limited and that students must work together on computational sections of the report. However, the Board defines collaboration on the analytical sections of the report, such as the introduction, the analysis of results, and the conclusion, to be cheating, except in the few labs where it is the instructor's policy for the students to write up the entire report together. It is the feeling

(See Board, page 4)

Latvian Songs And Folk Dances At CU Tuesday

A program of Latvian folk songs and dances will be given by a group of 16 Latvian students from Washington, D. C., in the North Carolina State College Union Ballroom Tuesday (February 21) at 8 p.m.

The students, who recently came to the United States, will wear colorful traditional costumes of their native land.

The program is a part of State College's fourth annual "Fine Arts Festival," now in progress. Sponsor will be the College Union International Committee, headed by Michael Celber of Israel.

Friday Lauds NCS Research

With a \$760,000 Ford Foundation grant and other recognition, North Carolina State College's School of Engineering is destined to emerge from a top-level regional institution to a national center of education and research.

This conviction was expressed by President William C. Friday of the Consolidated University of North Carolina at a luncheon meeting of directors of the North Carolina Engineering Foundation and other business leaders here Thursday (February 16).

President Friday and Walker Martin of Raleigh, president of the Engineering Foundation, explained that the foundation is currently engaged in a drive to raise \$340,000 to match a portion of the \$760,000 Ford Foundation grant, making a total of \$1,100,000 to the State College School of Engineering.

The Ford grant and the matching funds will be used in a broadly-based program aimed at attaining an even higher level of excellence in the engineering graduate training program on the Ph.D. degree level at State College.

-Notice-

All students who are interested in joining the staff of WKNC, the student radio station, are invited to attend an organizational meeting on Tuesday, February 21, at 8:00 p.m. in room 316 of the 1911 Building.

Martin declared that opportunities provided by the strengthened graduate training program and the task of raising the matching funds "constitute the greatest challenge that State College has ever had."

President Friday explained that support of the Engineer-

Joint Grant Made By Health Service To Physics Dept.

The Public Health Service, Division of Radiological Health, of the U. S. Department of Health, Education, and Welfare has made a \$50,000 joint grant to North Carolina State College's Physics Department and the University of North Carolina's Department of Sanitary Engineering for the training of graduate students in radiological health and safety.

Announcement of the grant was made Thursday (February 16) by Dr. Raymond L. Murray, head of State College's Department of Physics, and Dr. Charles Weiss, head of the UNC Sanitary Engineering Department.

The sum given for the calendar year will be used for fellowships for the staff and for equipment. The expected duration of the training program is five years, and it is anticipated

(See Joint, page 4)

Extra "Study Days" Recommended By SG

The Student Legislature, at its Thursday meeting passed a resolution which asked the administration to declare the last two class days of a semester "study days."

If this resolution passes the administration, classes will be suspended the last Friday and Saturday of each semester, so that students will have an extra two days to prepare for final examinations.

This resolution, which was introduced by the Academics Affairs Committee, passed unanimously by voice vote.

In conjunction with the pass-

ing of the resolution, the Student Government recommended to the liaison committee that:

1) They request that extra days necessary to provide for accreditation standards be adjusted by the administration as they feel is best and that,

2) Faculty members be requested to be in their offices during Study Days for consultation.

The resolution follows:

WHEREAS, the short period at the end of the semester between the end of regular classes on Saturday and the beginning of final examinations on the following Monday creates a difficult situation for many students because of a lack of time for preparation for final examinations which are scheduled early in exam week, and

WHEREAS, the relatively heavy schedule of examinations and the short period in which they are given allows inadequate time for the student to study during exam week for examinations, and

WHEREAS, the failure of many instructors to lighten assignments during the last week of classes renders this week al-

most useless for concentrated study for examinations, and

WHEREAS, many other schools allow from one day to an entire week between the end of classes and the beginning of final examinations for reading days, and

WHEREAS, the loss of one Friday and one Saturday at the end of the semester would, in general, result in a student's missing only one class in each course—a loss which would not seriously lessen the value of the course, and which would benefit the student by allowing him more time for preparation for final examinations;

THEREFORE, BE IT RESOLVED that the Student Government of North Carolina State College recommends to the Administration that the last day of classes of each semester be designated as the Thursday before examinations begin on Monday, and that the following Friday and Saturday be set aside as Study Days, during which every student will be afforded the opportunity to study for examinations.

AND FURTHER BE IT RESOLVED, that the Student Government requests that this change become effective with the Fall, 1961, semester.

AIE Ranks Second In Annual Rating

The State College chapter of the American Institute of Industrial Engineers was recently awarded second place in annual competition conducted by the AIEE national headquarters. A bronze plaque was presented to the group during ceremonies held in the chapter lounge in Riddick Hall, on Wednesday, January 25.

Dr. Alex Rathe, professor of industrial engineering at New York University, who is on leave to serve as national president of the institute, made the presentation. He spoke to the group on the role of professional societies in the life of the engineering

student, before and after graduation.

State's industrial engineering students were chosen for their contributions during 1959-1960 to the welfare of the college, to activities benefiting the Industrial Engineering Department, and to the advancement of the engineering profession.

Dr. C. A. Anderson, head of the Industrial Engineering Department, said, "We are proud of our industrial engineering students at State College who have consistently placed high in national competition."

The State chapter placed first in 1956-1957 and third in 1957-1958.

Campus Crier

Mr. Ed Kelso of the Navigation Engineering Branch of the Tennessee Valley Authority will be guest speaker at Tuesday night's meeting of the student chapter of AIEE. Using slides he will talk on the "Industrial Development Along the Tennessee River."

Mr. Kelso is a graduate of the University of Tennessee, holding a B.S. in Civil Engineering and an M.S. in Industrial Engineering.

Every student is cordially invited to attend Tuesday night's meeting, regardless of curriculum, as Mr. Kelso will answer any questions from those who might be interested in TVA. This will be a good time to get information on TVA, since they will be on campus to interview seniors Monday and Tuesday.

After a brief business meeting, coffee and refreshments will be served, and Mr. Kelso will be available to speak informally with the group.

The YMCA Search Group on World Understanding will hold its weekly meeting Tuesday at 6:00 p.m. in the college cafeteria. The topic of this week's discussion will be the problems of segregation and integration.

A panel composed of students from St. Augustine's College,

Walser Completes Biography

Prof. Richard Walser of the North Carolina State College English Department is author of the recently issued "Thomas Wolfe: An Introduction and Interpretation," first book in the new American Authors and Critics Series published by Barnes & Noble of New York.

Written especially for the college bookstore market, Professor Walser's book is a low-priced paperback which attempts to present a detailed biography of Wolfe as well as to answer questions about the Asheville author's literary works puzzling to the average undergraduate.

The theme of the book is that Wolfe was primarily a poet who was constantly assessing his experience against the background of America.

Wolfe's boyhood in Asheville and his college years at the University of North Carolina in Chapel Hill are treated in full.

For the volume, Professor Walser was able to locate a number of photographs of Wolfe never before used, including a portrait and accompanying write-up in the 1920 Yackety-Yack-UNC student yearbook, at the time of his graduation from the University.

Professor Walser, former Guggenheim Fellow, edited "The Enigma of Thomas Wolfe" for the Harvard University Press in 1953.

A native of Lexington, Professor Walser received his education at Davidson College and the University of North Carolina. He holds the bachelor's and master's degree in English from the latter institution. For a number of years, he taught in the public schools and at the University in Chapel Hill.

He came to North Carolina State College in 1945 after sev-

Comments From The Editor

Thanks !!!

In last Monday's *Technician* an appeal was issued to the students of State College and the residents of Raleigh to come to the aid of a four-year old boy who was critically sick in Rex Hospital with a brain tumor. This young boy's parents, Mr. & Mrs. Gene Inman, had exhausted their supply of money to help their son overcome his illness.

During the week, many organizations and departments at State College went to work to aid this young couple. Letters with checks and cash started coming into the office. The News Bureau at State College wrote a story about the young boy, and it appeared in many papers across the state. The News and Observer's Charlie Craven also issued a plea for help. Through the conscientious efforts of all, a grand total of \$750 has been received by *The Technician*.

This does not come near the amount that has been spent by the Inman's, but it does help. The drive is not over, and we hope that everyone that has not contributed to the fund will take some amount out of his or her pocket and contribute to a worthy cause. The bills are continuing to pile up day by day, and your aid will help to pay these bills. We would like to thank everyone that has helped so far on this drive, and we hope that we can match the same figure this coming week.

—JB

Progress Made

There have been many gripes by some organizations and students towards the College Union in the past couple of years. There have been legitimate gripes, but some have been completely wrong.

It would be very hard for anyone to have a gripe towards the operation of the College Union this year. Clyda Weeks, the first coed President of the CU, and her staff have done a tremendous job in making the CU a worthwhile operation so far this year.

In conjunction with The Friends of the College Inc., the College Union has sponsored some very interesting programs this year. Many of you probably saw the famous Detroit Symphony Orchestra last Thursday night. This undoubtedly was one of the best programs that the CU has ever sponsored . . . and they have two more programs lined up for the spring.

All the students and audience that attended the program Thursday night were highly awarded by the cultural qualities of the program.

When we go out into the world, we are going to need more than just book sense. Programs like this help us have more than just plain old book sense. More and more of these programs are needed for the students at State College.

The College Union and The Friends of the College Inc., have gone a long way in securing these programs for the students. They cost very much, but they are worth every penny of it.

In the spring the New York Philharmonic and the Broadway Play "J. B." will be presented. For those of you that missed the program this past week, we would recommend that you attend both of these presentations.

We would like to thank and congratulate the College Union and The Friends of the College Inc., for taking a big step forward towards helping and improving the culture of the students at State.

—JB

Subscriptions

Anyone desiring to subscribe to *The Technician* for the spring semester may do so by sending his money to Richard Culp, Business Manager, Box 5698, State College Station, Raleigh, N. C.

The rates for the spring semester are \$1.00 for Monday editions and \$2.00 for all editions. Faculty members may subscribe for a reduced rate of \$1.50.

Please send your name and address and the appropriate amount of money immediately as these rates end in two weeks. You will receive the remaining 35 issues.

YPO Panel Discussions To Be Held March 8

A panel discussion by members of the Young Presidents' Organization will be held in the School of Textiles auditorium at North Carolina State College March 8 from 10 a.m. to 12 noon.

Discussions will be open to all State College seniors and graduate students from all professional schools at the college.

The Young President's Organization is an international organization of some 1500 members. Each member has met a unique qualification—having become president before the age of 40 either of a manufacturing concern, with sales in excess of \$1 million a year or of a service organization with sales of at least \$3 million a year.

John F. Redding, of Asheboro, chairman-elect of the Rebel Chapter of YPO, said that John Herbert, of Birmingham, Ala., will serve as moderator of panel discussions, with panel members to be named in the future.

Redding stated that the object of the panel discussions is to acquaint seniors and grad-

Character Of Pershing Rifleman Revealed

When the average college student hears the words *Pershing Rifles*, he thinks of a strictly military unit. He thinks of intricate drill movements and long hours of extra drill. He probably wonders why anyone would want to spend part of his free time each day practicing a drill movement instead of relaxing for a few minutes between the tedious grind of classes. The usual answer is "They're gung-ho." This belief is exemplified by a Pershing Rifleman in uniform. Whenever a Pershing Rifleman wears his uniform, he is all military, saluting all officers, and never doing anything to degrade the uniform which he is wearing.

But the Pershing Rifleman has two sides to his character. The first side as already mentioned is his military attitude. The second side is his social relationship with his brothers. After all, the Pershing Rifles is a social as well as a military brotherhood. Through social events such as dinner meetings with other organizations, dances and parties, the Pershing Rifleman develops an *Esprit De Corps* for his unit which will remain with him for many years after he has left college.

If anyone should be at the Coliseum at 12 o'clock on Tuesday, Wednesday, or Thursday, he could watch the Pershing Rifles practice their drill movements. This year the Pershing Rifles have more experienced personnel than ever before. With just a little student interest to show them that their efforts are worthwhile, they would undoubtedly be able to gain even greater recognition for State College.

State Fourth After Two Triumphs

By Earl Mitchell
Sports Editor
North Carolina State finished up their conference slate in high style by winning three out of the last four ACC tilts. The Pack started off the week with a win over Maryland and then dropped a close decision to Car-

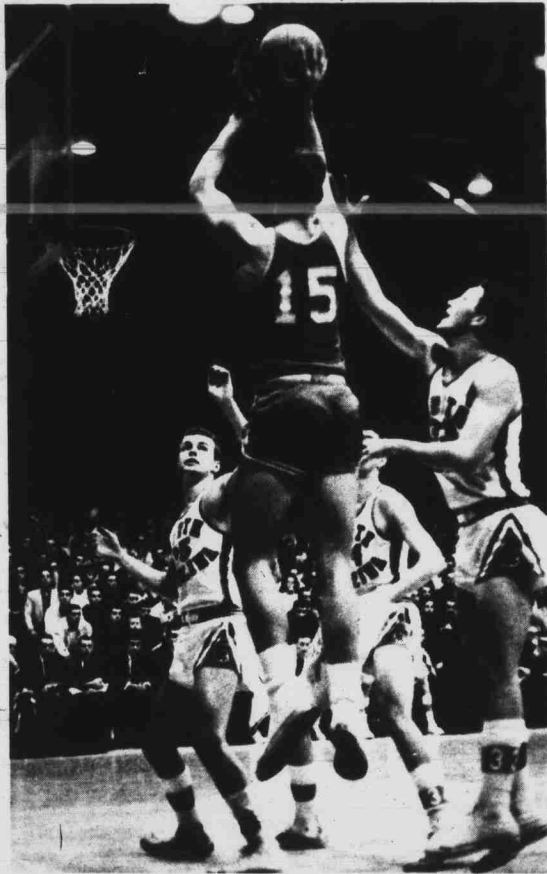

olina on Wednesday night. Just this past weekend, State polished off Clemson and South Carolina to give the Pack an 8-6 conference mark. The two wins in Charlotte brought the Pack's overall record to 15 wins and 11 losses of the season. The 8-6 loop mark

puts the State team in fourth position in the ACC with no chance of losing that spot since they don't have anymore conference games and the fifth place team has a 4-8 record in the conference. As it stands now it looks like the Pack will be playing the

number seven team in the conference come March 2. At present this number seven team is South Carolina. Virginia or Clemson could take over this position before the week is over. Virginia has three loop games, Clemson has three, and South Carolina has two. This week will

be the sole factor in determining the final lineup of the bottom teams for tournament bracket purposes. State has one lone contest left on the regular schedule and that is with Villanova on Thursday night. Villanova is the same team that came from 14 points behind at halftime in the first round of the Dixie Classic to beat State. This is also the same team that downed a strong Wake Forest team this past Saturday night in Winston-Salem, 60-56. That Villanova contest is slated for 8:15 Thursday night in the Reynolds Coliseum.

dumped in 12 points to round out the double-column scorers for the Pack. State led 50-41 at intermission and added 47 points in the second half to 43 for the Gamecocks to furnish the final margin. Marvel turned in a fine night under the boards as he picked off 20 rebounds to add to the 13 he got the night before to give him a total of 33 for the two day event. DiStefano pulled down 15 the last night to give him 22 for the two games, and Pungor got 14 to give him 25 for the series. In that South Carolina game, State beat USC 64-42 on the boards.

John Pungor (15) shoots for a basket against North Carolina in Chapel Hill on Wednesday night. The Tar Heels beat the Pack for their only conference loss this month and only their second since mid-term examinations. Pungor has come through with some valuable performances since returning to the lineup

CAMERON VILLAGE
RALEIGH, N. C.

Blue Devils Host UVA; Bubas Seeks Replacement

Durham, N. C., Feb. 20.— Blue Devils with the loss of stay-in-the-race for the ACC tournament's number one spot, close out their home season Monday night when they face the University of Virginia.

Tipoff in Duke Indoor Stadium is slated for 8:15.

The game itself is of great importance to the Blue Devils who find themselves faced with the "must" situation of having to defeat both the Cavaliers Monday and the arch-rival North Carolina Tar Heels in Chapel Hill Saturday afternoon. The Dukes need both wins to assure themselves of a tie for the tournament's top spot with the Wake Forest Demon Deacons.

Should both outfits finish in a tie in the ACC standings, the Blue Devils would receive the top seeded spot by virtue of being defending loop champion. The top seeded position carries added importance this year, in that the Number One club will receive a bye in the first round and would need to win only two games to take the marbles and go on to the NCAA.

The problem increases for the Blue Devils with the loss of high-scoring sophomore forward Art Heyman for both conference games. Coach Vic Bubas tried numerous combinations last week in order to fill the gap left by Heyman. Junior Buzz Mewhort and sophomore Fred Schmidt were both tried, with Schmidt pouring in 12 points in a losing cause against Maryland. Schmidt is a fine outside shooter and may be enough to bridge the gap.

Bubas will go with his four veterans at the other starting positions on Monday night. Captain Howard Hurt will start at either forward or guard depending on whether Mewhort or Schmidt starts, Doug Kistler will go at one forward spot, Carroll Youngkin will be the center and John Frye will man one of the guard posts.

The Cavaliers are led by sharp-shooting guards Tony Laquintano and Jack Hasbrouck who were thorns in Duke's sides when the Blue Devils took a 92-90 overtime win in Charlottesville earlier in the campaign.

The Gant Story

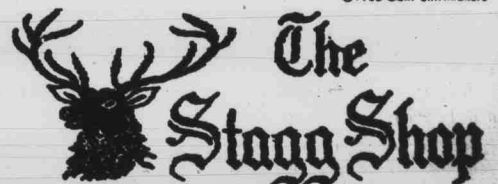

We believe that Gant shirts have a certain well-bred look that distinguishes them from all others. Careful tailoring and adherence to a strict tradition are qualities indigenous to Gant. The emphasis here is on meticulous detail in a heritage of conservatism.

Do you like a really neat, well fitting collar? Softly flared collar construction is gently RIGHT. Do you want to hang your shirt up? A trim hanger loop sees to that. Room to breathe? Oversize body construction is the answer. There's a full length box pleat back for trimness, too. Precise stitching lets the easy barrel cuffs roll up at mid-point.

The Gant shirt has been designed to serve you through a lifetime of correct dressing. There is painstaking workmanship in every fine Gant shirt...it comes from the expert craft of New England's finest shirtmakers. The craft explains why the careful details of these Gant shirts have been many times imitated but never duplicated.

Congo Situation Summarized

LONDON UPI—The awakening continent of Africa spawned violence halfway round the world Sunday and threatened still more bloodbaths.

From the Katanga Province jungle of the Congo to the plush Chelsea district of London there was fighting and rioting.

In Northern Rhodesia, sharing a 1,500-mile border with the Congo, there was the threat of civil war between white and black extremists.

Officials in London and non-Communist diplomats at the United Nations in New York sought to stave off more trouble and bring peace to the Congo.

This was the situation: London: Some 5,000 demonstrators tried to storm the Belgian Embassy to protest the death of ex-Congo Premier Pa-

trice Lumumba, several persons were trampled. Clubswinging police arrested 30 persons.

Luaka, Northern Rhodesia: A spokesman for the whole extremist "Federal Fighting Force" dared African extremists to attack. African nationalists spokesmen made the same dare. Officials feared civil war in attempts to form a multi-racial parliament and Britain's strategic reserve was alerted for possible duty in Northern Rhodesia.

Elisabethville, The Congo: There were reports the Communist-backed Lumumbist regime of Antoine Gizenga was bogging down in factional strife at Stanleyville, Oriental Province. Some reports said army Gen. Victor Lundula had replaced Gizenga. Two Gizenga aides sought U. N. asylum.

United Nations, N. Y.: The U. N. Congo representative cabled reports of possible new political assassinations by foes of Lumumba. The cable warned of "fear and apprehension" in Leopoldville, the Congo capital, as the U. N. Security Council prepared to resume Congo debate Monday.

Moscow: The official Tass news agency quoted Red Chinese Vice President Chin Yih as extending Peiping recognition to the Lumumba regime at Stanleyville, against the pro-Western Leopoldville government of Congo President Joseph Kasavubu.

eral years of service in the U. S. Naval Reserve, from which he was released in the rank of lieutenant-commander.

He is well known in North Carolina for his activity in the North Carolina Teachers Association, of which he is a former president. He has written a number of articles on the late Thomas Wolfe and is also widely known for his editorial work on three volumes of North Carolina literature, poetry and short stories of North Carolina, and the recently released "North Carolina Drama."

He has lectured throughout the State to book clubs, business and civic organizations, and has published numerous articles on North Carolina literature in various magazines.

ing fire behavior, heat exchange of bark, and other work that he has done in fire research.

This should be one of the most interesting programs of the year, and all students in the School of Forestry are urged to attend.

Grant

(Continued from page 1)

and the remaining \$225,000 must come from other sources.

The Ford grant, Dean stated, will enable State College to make three major achievements:

(1) Increase the size of its faculty to provide instruction for the additional candidates for Ph. D. degrees in engineering.

(2) Upgrade its present faculty through further training and development at the top academic levels.

(3) Create a number of new

fellowships and assistantships for graduate students seeking the Ph.D. degree in engineering.

In addition to the funds provided by the Ford Foundation for the three key objectives, the organization also made available to the college a \$35,000 discretionary fund.

President Friday said Ford Foundation officials looked the South over in deciding where to set up its doctoral training program and selected North Carolina State College along with Georgia Tech, the University of Florida, and the University of Texas.

Board Releases Policy

(Continued from page 1)

of the Board that the purpose of laboratory reports is to train the student to analyze and explain the results of an experiment clearly and logically, and that this analysis is expected to be original.

In the second case of the night, two students who had been reported for cheating on a Physical Education exam were found not guilty.

No record of the trial will be

placed on their permanent record.

Under the policy of the Judicial department, no accused person shall be denied the presumption of innocence until guilt is proven, the right to due notice and a fair hearing, the right to face his accuser during the trial, the right to request testimony from any persons, and the privilege of assistance by a student or a faculty member of his choice.

Joint Grant Announced

(Continued from page 1)

that the grant of \$50,000 will be renewed annually throughout the period.

Prof. Emil T. Chanlett, professor of sanitary engineering at the University, and Dr. Newton Underwood, physics professor at State College, are co-directors of the project, which began with the spring semester last week.

According to the directors, the training program has been designed to meet the increasing needs which are developing in the nuclear energy industry.

Students in the program will

attend one term at State College, for the physics aspect of the project and to use the college's nuclear reactor facilities, and one term at Chapel Hill for the public health aspect.

Currently the training program is in progress at State College under the direction of Dr. Underwood.

Humble to hold job interviews Feb. 27 - do you qualify?

• Chemical Engineers (ALL degree levels) graduating in 1961 will be interviewed for permanent employment.

To schedule an appointment with the interviewing teams from the Humble Division of Humble Oil & Refining Company, check now with your Placement Bureau. The interviews will be held on the campus.

Humble is one of the leading producers of crude oil in the United States, and is a completely integrated oil company. Humble's Baytown Refinery, one of the largest in the world is engaged in both refining and petrochemical manufacturing. Research centers in Houston and Baytown are making valuable contributions to petroleum and petrochemical technology.

For a rewarding career in the petroleum industry, discuss your future with the Humble Division interviewing team.

A Quick Look at the Humble Division

Area of Operation: Texas, Louisiana, California, Mississippi, New Mexico, Florida, Alabama, Arizona, Georgia, Washington, Oregon, Alaska, Nevada.
