

## Record Enrollment Begins New Year

### Chancellor Gives Welcoming Speech To Incoming Frosh

Chancellor John T. Caldwell included both a welcome and advice in his speech to 2400 new students who reported for the orientation program Monday, September 11, 1961.

He included the traditional welcome to State College, but he also tempered his welcome with advice. He warned that there are certain fundamental requirements which every student must meet. These include curricular, social, and religious responsibilities which the student must conform to.

The Chancellor pointed out that entering college involves a decision on the part of the high school senior. He stated that: "Time will tell how many of you chose wisely when you sought admission to this wonderful institution . . . We prefer to assume, however, that the overwhelming number of you

(See CHANCELLOR, page 12)

### Freshman Group Discusses Campus Life

Mike Thompson, standing at left, is shown leading a discussion on the Honor System at one of the Freshman Orientation Group Meetings held throughout the week. Mike is a member of the Honor Code Board and, with the other members of the Board, conducted similar discussions in other groups. Mike Stenhouse, leader of the group, is shown standing at the right.

### Orientation Week Program Again Proves Valuable

Approximately 2,399 new students enrolling at North Carolina State College this fall have spent this week participating in an extensive orientation program. This program has been successful in introducing the freshman and transfer students to the college campus and to college living.

The college's total enrollment is expected to hit an all-time high of between 6,700 and 7,000 students.

Monday through Friday (September 11-15) had been set aside at the West Raleigh campus for "New Student Orientation Week" for freshmen and transfer students, according to Dr. Kingston Johns, Jr., assistant director of counseling in State College's Division of Student Affairs.

The first official activity was the opening assembly of Orientation Week at 10 a.m. Monday in the William Neal Reynolds Coliseum where groups of 20 to 25 new students met with their upperclass student counselors.

Before this happened, however, the new students had ample time to become settled in their rooms and apartments. Dormitory rooms were opened for occupation on Sunday (September 10).

There were no official functions scheduled for Sunday.

However, the College Union, King Religious Center (YMCA), and Admissions and Registration Office were open. The other college offices opened at their regular hours on Monday.

On Monday morning and throughout the remainder of the week, upper-class group leaders conducted a series of meetings designed to help new students to become familiar with various campus regulations, extra-curricular and professional activities and opportunities, Student Government and the Honor Codes, and campus life. Several social and recreational events were planned for the entertainment of the new students. Monday morning was also taken up with a welcome by Norris Tolson, president of the student body, and payment of tuition fees at the Frank Thompson Gymnasium. During Monday afternoon, entering students took a mathematics examination. That night, they had the opportunity to enjoy the mu-

### Administration Offers Variety Of Services

In order for an institution which is as large and complex as State College to function efficiently and yet maintain a degree of fellowship and understanding between the faculty and the student body, there must be men whose objective is to foster such desirable conditions.

The men who serve State College in this capacity are ever alert to improve the relationship between the student and the educational processes with which he must deal. As old-timers know and as the new students will learn, today's college life is quite intricate. The college administration is set up so as to aid the student in almost every facet of his college life.

Dr. John T. Caldwell, the Chancellor of North Carolina State College, has the most responsible and perhaps the most gruelling job on campus. To him falls the task of seeing that all functions of the college are carried out in a manner that will keep State College in the top position in every way. In addition, he must see that the policies of the Greater University are carefully adhered to. It must be especially gratifying when both of these objectives can be realized simultaneously.

The Dean of the Faculty is John W. Shirley. It is Dean Shirley's duty to coordinate the functions of the administration and the faculty and to insure their cooperation for the best interests of education here at State.

James J. Stuart, Jr. is Dean of Student Affairs, a post which

is concerned with the coordination of all student affairs and services. This office also compiles records of all students during their college career here, especially concerning their respective contributions to the college in the realm of service.

The process of admission and registration is under the supervision of K. D. Raab. His office also keeps all academic records of students and provides transcripts for other institutions and prospective employers.

Insuring that all student activities are carried out in the most effective ways is the task of Banks C. Talley, Jr., coordinator of Student Activities. This year Thomas L. Covington, Jr. replaces Henry Bowers in Dean Talley's office. Mr. Covington will assist Dean Talley in coordinating the activities of the social fraternities, student publications, musical organizations, Student Government, and all clubs and honor societies on campus.

Student housing, dormitories, and student traffic control is in charge of Mr. N. B. Watts. Any questions concerning housing will be answered in this office.

The Student Counseling Center under the direction of Dr. (See ADMINISTRATION, page 12)

### Freshman Yearbook Pictures Scheduled

All Freshmen are urged to report to the College Union between now and Wednesday September 20, 1961, to have their picture taken for the State College Yearbook. These are the last days to have the pictures made. This includes Saturday from 9 a.m. until 5:00 p.m. A coat and tie is required.

### Harrelson Hall Newest Campus Addition

The new classroom building, Harrelson Hall, is not only strikingly attractive; but it is also extremely functional.

As is the only classroom building of its type in America; it has received national-wide publicity and is considered to be one of the better examples of modern Architecture.

In 1958, College planners, seeing that the present classroom facilities were becoming less and less adequate for the ever-growing State student body, decided to construct a classroom building in the geographic center of campus. Since, with the increasing faculty shortage, classes are tending to become larger, they decided that it should mainly consist of large lecture rooms. After turning these specifications over to the architects, they found that this could best be done by utilizing a design of a round building and pie-shaped classrooms. As Ralph Reeves, the head architect picturesquely described it, "If you put a bunch of slices of pie together, you get a pie."

Although this design cost more for area than a conventional building, it will handle more students than

any other type. The cost was approximately \$2 million.

The building will hold more than 3,000 students at one time and will double the classroom space on campus.

It's three stories are constructed like corkscrews. That

is, there is no place where one story begins and where another begins. The rooms follow the hall so that each room gets progressively higher than the one beside it.

It is constructed so that there are two rings. The inner ring forms the class-

rooms while the outer one consists of faculty offices. They are divided by the winding hall.

All in all, there are 103 offices, nineteen rooms which will hold approximately 150 students, fifty small, and nineteen medium rooms.

Harrelson Hall, State College's brand new and unique facility, is shown after final completion of the physical plant. The circular classroom building, designed to serve three thousand students simultaneously, now needs only installation of furnishings before being opened for use.

## The Purpose Of An Education Is Twofold

The muzzles of cannon are rising higher and higher over Berlin, casting a black shadow on hopes of peaceful existence with the Soviet Bloc.

Over two thousand of you freshman have entered State College in the last week, casting a much brighter shadow over our campus.

There seems to be no connection between the shadows cast in two such different parts of the world, but they are actually very inter-related.

State College and similar technical institutions throughout the nation are one of our country's greatest resources in the fight for freedom. These schools take intelligent but unmolded and untrained students like yourselves and mold them into outstanding men who are well trained in all aspects of practical science.

From the study of American History, it is easy to see that the one thing that has made and kept our nation the greatest in the world has been our technical superiority, but recently we have found ourselves in the unaccustomed role of having another nation approaching us and even passing us in certain phases of science. We all know that we must now put forth a greater scientific effort to stay ahead and to surpass the achievements of other nations. Our very existence may very well hinge on our doing this and our technical schools are the main foundation of our scientific achievements.

State College will provide you Freshmen with very much more than a technical education. While you are here you will find that you will gain much of an intangible, but very necessary part of life, maturity. You will also learn of things that are not in the scientific field, but are, nevertheless, no less important. The courses in the humanities which you will take will give you a well-rounded education and will give you deep insight into living with your fellow man. While your technical education will furnish you with bread in your mouth after graduation, your liberal education will provide you with a philosophy of life which is more important, than pure material possessions.

You came to this college for various reasons. Many came for their parent's sake. Others came to insure themselves with a comfortable living in the future; but all of you should have come to learn. This learning should not be restricted to only your major course of study, but should encompass all their is to know about living "The Good Life". If one takes advantage of all the multitudinous advantages for learning which are offered at a college, he will find himself well on the way to "leading the good life."

From this, you can see that gaining an education at this school is two fold in purpose. The technical training you will receive will be an invaluable aid to you and your country in later life, and the experience and the maturity that you gain while in college will help to guide you to a happy and prosperous existence.

Published every Monday, Wednesday, and Thursday by the students of North Carolina State College except during holidays and exam periods. Subscription rate is \$4.00 per school year.

"Great Scott, Everett! Look!"

### Not Too Black

During orientation week, the fact that State College is extremely difficult has been stressed over and over to Freshmen. Many of you are probably shaking in your boots over the terrible statistics of the number of students dropped and on probation. Many are probably saying that no picture can be as black as the one which has been painted, but as any upperclassman will tell you—it can and it is.

This school is a grueling test of one's intelligence and perseverance. You will find yourself working harder than you ever have before just to pass courses. You will find yourself staying up later than you ever have to pass a quiz, and you will be under tremendous pressure to stay caught up with your classwork.

This is the dark side of the picture, however. Anyone who has been accepted at State has the ability to pass. The ones who fall by the wayside have done so by their own actions. If they had applied themselves to their fullest extent, they would now hold their diplomas from State.

Failure to study is of course, one of the main causes of student failure; but there are many other reasons why students do not live up to their potential.

At this school, there is a system of unlimited cuts which have proven a downfall to many. To get the most out of school, a student should attend every class.

Not keeping up with classwork is another main source of student trouble. Start at the very first of a semester and try to never get behind. If you do, you will find that with your heavy schedule, it will be very difficult to catch back up.

Never be afraid to ask a teacher for help. It is his job and his duty to aid a student in any way which he is able. Remember that you owe the professor work and attention, but that he also owes you his time and his ability. He is being paid to provide you with an education, and most of the time he will be more than willing to give you any help that he can. While there are a few professors who do not subscribe to this philosophy, the greater number are conscientiously trying to do the job for which they are being paid.

Above all, do not be afraid to ask for help. Any teacher, professor, student, or administrator will go out of his way to help you.

If you will apply yourself to your fullest extent, in four years you will be leaving State, but you will be leaving it with a certain amount of regret. Although you will have cursed the school for being so difficult countless times, you will be able to look back with satisfaction and see a good job well done.

Crit

The bus finally pulled into a station and the driver announced "Raleigh. We'll be here for ten minutes. People going to Norfolk, Richmond, or Washington transfer here to..." It was good to be off that bus. Wonder where the guys are that they said in the letter would pick me up? Guess they're late.

Sitting down in those awful uncomfortable benches I sorta began to wonder what I was doing. What did I know about college, huge crowds at all the football games, traditions, big fraternity drunks and convertibles, studies, ROTC uniforms, grades, meeting girls, making friends... wonder if we have a Silent Sam...?

"Are you John Webb?" Two damn sharp guys were looking down. "Sorry we're late. Glad to meet you. C'mon, the car's outside." Gee, its sure good to see friendly faces and real college men. Sharp guys.

Alexander is BIG. We dropped my junk in my room and went to register for Freshman Camp. Lots of other guys there. Everybody's real friendly.

Riding on the bus to Camp Kanata for a few days of the Retreat we learned some of the State College cheers from the group leaders. Lookatthatgirl. Hey! Yelled "Whiskey Hill" at any passing Carolina people. Wonder why we hate Carolina?

The School of Agriculture busses rumbled out into the country. Coming up to school early was a great idea. I got in on a lot more than the people who didn't, and made a lot of friends. Thursday night my group had a bull session. I found out that I'm not the only one who doesn't know about college.

My group leader is a great guy. He sure does know a lot. We threw him in the lake the afternoon before we left camp. He's a really good swimmer and on the diving team. My group lost in football to another group, but they had two group leaders on their team. I made lots of freshman pals.

We got into a bull session when we were supposed to be discussing something else, and my group leader gave us the "poop" on ROTC, girls, fraternities. I guess fraternities aren't so bad. My group leader's in one, and he's real sharp; he invited me to come over and visit him. The people here sure do have spirit. Spirit and tradition make a college, I guess. We had a pillowfight in my cabin before the guys that were putting shaving cream in people's hands that were asleep came around.

Preacher Hall sure is okay. I never heard a preacher talk like him before. Really gets a guy to thinking. Y'know, about God and things. My folks sure don't think about it.

We hated to leave, but one of us frosh made a big sign with NCS on it that we plastered on the bus before we rode back. We shook the bus with cheers (a few dirty ones) and sang the song that we wrote during camp "Freshman Campers..." and finally found one of the group leaders that could teach us the fight song and Alma Mater.

Sure did hate for camp to end. It closed Sunday with lunch after an interdenominational worship service in the chapel.

My roomie arrived Sunday night. I was reading this book that I got during Camp I said hello and introduced myself and we talked for a little while about where we were from and all that but a conversation never really got started and he unpacked in silence.

I guess the next thing I said was goodnight. He grunted. I guess he's one of those introverts or something.

Next morning I got up, but my roomie didn't stir. I woke him up before I went down to the bathroom to shower. He cursed a little and told me to go away. "Aren't you going to get up and go to the orientation meeting?" "Nah. That crap's for kids. Leave me alone. Let me sleep."

I saw him later that day. He had on a T shirt and no socks with his loafers.

I saw him later that day. He had on a T shirt and no socks with his loafers.

## Technician Policy

Above all this year, we of *The Technician* will attempt to be fair to our readers. We will do everything within our power to report the news without bias toward any group (except possibly M&O).

We will not champion the causes of the administration, the student government, or the students individually just because they belong to a certain group. We will, however, work to the best of our abilities to further State College in any way which we can.

The Technician will not be greatly changed this year. We will be using about the same make-up as we used at the end of last year, but we will try to place a greater emphasis on feature stories, columns, and pictures. We hope that the paper will be more interesting and more entertaining than ever before, but to achieve this goal, we are going to need much help from you, the student body.

In a few weeks, all of the organizations on campus will receive a card asking them to appoint a reporter to see that any news of their organization will receive publicity. With our limited reporting staff (one) at this time, we cannot nearly cover enough of the campus to be fair to all the students. Anyone who feels that he has an article of interest to report will have to turn it in himself. Unless our staff multiplies twenty fold, we cannot do it.

We also invite anyone who wants to work on the paper to come by and see us. Working with a newspaper is one of the most fascinating things that one can do.

We also need columnists very badly. A good column is one of the most effective parts of any paper.

Finally, we invite comment from students. If you see something in the paper that you like or do not like, or if you just feel like "shooting the bull" on any subject, feel free to write us. We hope that we can have a big "Letters to the Editor" feature every issue. A letter to the editor is one of the most effective means that the individual student has to express himself.

Mike Lea  
Editor — 1961-62

## On Your Honor

"Under the Honor Code you are on your honor not to lie, cheat or steal. . . ." Few students realize the broadness of this statement.

Last year the Honor Code Board faced an unusually heavy schedule of trials. A number of them were, of course, concerning cheating on quizzes. Recently, however, the Board has faced a rash of less publicized offenses, such as forging excuses, copying lab reports, and stealing books.

Most State College students do not realize that cheating, lying, or stealing are in themselves serious offenses, no matter whether in simple form, such as unimportant lab reports, or in more pressing situations, such as final exams. For example, few students realize that stealing a worn-out calculus book is just as serious an offense under the Honor System as would be stealing the Chancellor's automobile, and that the theft of the book might draw just as heavy a penalty as would the latter.

A broader and more serious interpretation of the Honor System is necessary to avoid the frequent case of the student who receives a black mark on his record for life and whose college education is impaired or even stopped because he did not stop to *think*—to realize that a simple action, such as writing a phony excuse, is basically wrong and a violation of the Honor Code.

Many who would not cheat on a quiz have nevertheless gotten into just as much trouble by committing a so-called "lesser offense."

The true test of the Honor System is whether or not it succeeds in training the student to use his sense of right and wrong in making the most trivial decisions as well as the major decisions in life.

—JTC

## The Fraternity Way

During the summer months, each of you incoming freshmen received a brochure from the Interfraternity Council, explaining the functions of a fraternity in the general college set-up and also briefly acquainting you with each of the fraternities at State.

Although the brochure went far in explaining and answering many of your questions concerning fraternity life, there are probably doubts still in your minds about costs, and general worth, of a fraternity.

First of all, you will find that a fraternity, not only here at State, but at any school, costs only as much as an individual wants to put in it. The only cost, outside of food and lodging, which is essential anyway, is the payment of national and local dues.

In return for these token payments, a student gets the feeling of belonging, not only to another gang or group of guys, but to a group of men who share each other's every day lives, and who are willing to help each other at all times with any problem confronting one of the men.

Besides these things which a man gets from a fraternity, there are tangible rewards also. It is a place where a man can take his best girl without any fears of something malicious befalling them. He can sit in a comfortable chair and read the daily paper, well aware that he is among brothers who are all striving for a common goal.

This is the inner part of a fraternity, but not all of the functions of the fraternity are centered around its own house. Each Christmas, many fraternities here at State sponsor parties for the under-privileged children of Raleigh.

There are also different drives during the year for worth-while organizations in which the fraternities of State band together to reach the goal.

To know that you are a part of making many people "belong" is indeed a heart-warming feeling; and to know that you banded together with men just like yourself to produce this belonging is even more rewarding.

Freshmen, think about fraternities. There is a fraternity here at State for every man in the student body. All he has to do is show that he is interested . . . That interest will be returned in full.

# Experienced Persons Lead Student Body

By Bill Jackson

The various student activities on the State College campus will be run by a number of outstanding men this year—men who have compiled impressive records for service to the school. The success of any organization, of course, hinges on the efforts of all persons concerned, whether the job be large or small. It is a tribute to the State student body to realize the number of persons involved in extra-curricular activities; finding time in an already-crowded technical curriculum for extra work is no easy task.

The presence of student activities here on the campus is important for a number of reasons. To begin with, valuable service to students and other friends of the college is performed by many groups. Student publications, in the form of *The Technician*, the *Agromeck*, and radio station WKNC, are necessary to coordinate student opinion and interests. The welfare of the student and programs on his behalf are responsibilities of student government. Another worthwhile effect is the valuable training

for individuals which participation in additional activities can easily provide. In the College Union, for instance, an interested student can work in almost any area which interests him.

The myriad of technical, professional, and honorary societies on campus are responsible for a third contribution to student life. These organizations stimulate interest in scholarship, leadership and other traits worthy of being developed. And of course outside activities can be a whale of a lot of fun.

One of the most popular of the top student leaders this year is Norris Tolson, capable president of the State College Student Government. Besides his duties with the legislature, Norris represents the student body on a multitude of committees, including the Chancellor's liaison group.

The presiding officer of the legislature is Vice-President Jim Jones. The SG Secretary is John Kanipe, and Bud Taylor is the Treasurer.

The crusading editor of *The Technician*, State's student newspaper is Mike Lea.

Sharing with him the responsibility of producing three issues of the paper every week is Business Manager Dave Cribbin. The *Agromeck*, the elaborate yearbook for State College students, is the responsibility of Carlyle Franklin and Vann Sherrill, the Editor and Business Manager. Ray McCrary is the station manager of WKNC, and Business Manager Lewis Nelson is in charge of the financial side of State College radio.

In the College Union this year, the wide variety of student activities will be under the general supervision of President George Wallace. Through the operation of the several CU committees, the College Union makes a valuable contribution to the social and cultural development of the State College student.

The YMCA has a multi-phased program which, in addition to religious explorations, provides opportunities for moral and intellectual investigation. The President of the YMCA this year is Scott Bentley. The Apollo Club, the Oasis Society, the Freshman Diner's Club—these are but a few of the many scheduled projects of the State College Y.

Coordinating the various activities of the eighteen Wolfpack fraternities is part of the job of IFC President Johnny Wilcox. The IFC sponsors two of the social highlights of the State school year: the fall Pledge Formal and Spring Greeks. In addition, the IFC plans the community service projects of the fraternity men and schedules the rushing activities at the college.

These men are only a few of the many men who spend a great deal of time and effort in student activities on the State College campus. In future issues of *The Technician* the role of various organizations will be reported in greater detail.

# Administration Releases Attendance Regulations

The following rules were released by the College Administration concerning attendance.

1. Attendance of classes, laboratory periods and examinations is expected of all students.
2. It is the responsibility of each student to present to his instructor a valid excuse for any anticipated absence or any emergency absence which has occurred.

A. Valid excuses for make-up work include the following:

1. Sickness when verified by a form from the College Infirmary or a letter from a physician.
2. Death or illness in the family when verified by a letter from a family physician.
3. Official college duties or an approved college trip as certified by an appropriate staff member.
4. Court attendance when required and as certified by the Clerk of Court.

B. Excuses for other reasons may be accepted at the discretion of the instructor

3. Excuses should be given to the instructor before the absence if possible or within five days after the student's return to school.
4. Class attendance records will be maintained by the faculty for all freshman classes and in any other class if desired by the faculty member. Instructors will report to the Division of Student Affairs those students creating scholastic problems by absenteeism. Contact Mr. Bowers, 206 Holladay Hall,

tail. Perhaps such articles can help more students realize the service they can do their school and themselves by taking part in worthwhile student activities.

by letter, by note, or telephone (Extension 215) at any time needed.

5. Students reported to the Division of Student Affairs for excessive absenteeism will be counseled as to the importance of attending their classes regularly and if advisable, their parents will be notified. Continued absenteeism will result in appropriate disciplinary action.

# Religious Holidays For Jewish Students

Permission to be granted when requested to observe at one of the two local synagogues in Raleigh:

- a) ROSH HASHANNAH—Sept. 11-12, 1961 (Beginning of the Religious New Year)
- b) YOM KIPPUR—Sept. 20, 1961

Permission to be granted when requested to observe at home with their families.

- a) PASSOVER—April 19-20, 1962

# New Students Honored By Alumni Association

State College's Alumni Association honored new State students at an open house at the Alumni Memorial Building Monday.

In addition to the entertainment planned for students, their parents attended an open house, also at the Alumni Building, Sunday from 2 until 5 p.m.

During the orientation period, upperclassmen serving as group leaders accompanied new students to the open house from 8

a.m. until 5 p.m. Monday through Thursday.

The Alumni Memorial Building is dedicated to the more than 300 State College alumni who have died during and since World War II.

President of the Association is State Senator Ralph H. Scott of Burlington. H. W. (Pop) Taylor is director of alumni affairs.

There are more than 35,000 former State College students.

# Student Station, WKNC, Begins New Season

Sunday, WKNC began their new season of broadcasting with the week-long program "Freshman Festival—Open House". This program, running through 8:00 p.m. Friday at which time we will carry the "Platter Party" direct from the College Union snack bar, features news, weather, campus info, and sweet, swinging sounds. Beginning at 5:00 p.m. Monday, September 18, we will carry our regular programming featuring music geared to the likes of the mature collegiate mind, featuring Jazz, Classics, and true popular music (not "Rot 'n' Roll").

WKNC is owned and operated by the students of North Carolina State College as an extra-curricular activity. We are located on the third floor of the 1911 building and would enjoy having you come up and visit us and let us show you the studios.

Each year, WKNC holds training sessions in radio announcing and engineering for those students who are interested in "breaking into" the radio entertainment or news field as announcers or engineers. WKNC is required by state law to be a non-profit making organization, so salaries are next to non-existent, with commissions paid on any advertising sold by a staff member. All-in-all, we have a ball, though so if any of you are interested in radio, come visit us. After all, one of you may be another Chet Huntly and just not know it. Many of our "Alumni" have gone on to very highly paying jobs in the radio-TV field. Any way, come see us . . . and remember . . . "With the music most people like most . . . This is WKNC . . . 580 on your radio!"

# The C U Scene

By Francis Buckley

Welcome, new students, to North Carolina State College and to the College Union here. If you have not visited us already, I certainly hope that you will do so soon. We have many programs planned especially for your enjoyment. All our programs are free to all students of the college and to their dates.

Friday night in the Snack Bar the College Union Dance Committee will be sponsoring a Platter Party. The dancing will begin at eight o'clock. This is a very informal dance, so come and have fun.

Saturday afternoon the College Union Music Committee will present Music in the Afternoon. This outdoor show will feature several bands and play music from Dixieland to Progressive jazz. The program will be held on the College Union Terrace from 12:30 to 6:30 P.M. Those attending will be given choice seats on the grass between the College Union and Harrelson Hall. In the event of rain, the show will be held in the College Union Ballroom.

Saturday night there will be a semi-formal dance in the College Union Ballroom. This is an Open House Dance sponsored by the College Union Social

Committee. It will begin at 8 p.m.

The movie this weekend has been changed to "The Snows of Kilimanjaro" starring Gregory Peck, Susan Hayward, Ava Gardner, and Leo G. Carroll. It will be shown at the times scheduled on the College Union Calendar. This is a great love story and an epic drama of a man in search of his soul, told against the eternal snows of Kilimanjaro.

We at the College Union hope that you will enjoy the programs we put on for you as much as we enjoy putting them on. We hope that you will find your interests represented by one of the nineteen College Union committees and urge you to join that committee and give it your support.

# State To Celebrate Diamond Jubilee; Land-Grant Centennial This Year

State College will join the nation's 67 other Land-Grant colleges and universities in celebrating the Centennial of the Land-Grant or Morrill Act during the coming academic year.

Chancellor John T. Caldwell of State College appointed a Land-Grant Centennial Committee, headed by Rudolph Pate, director of the college's Office of Information Services, about a year ago. The committee has drafted plans for a year-long series of events in observance of the Centennial and State College's Diamond Jubilee.

The Morrill Act is a Federal Act—designed to enable qualified persons to go to college, regardless of financial ability—and was signed by President Abraham Lincoln on July 2, 1862.

Purpose of the Land-Grant Centennial, as outlined by Dr. Richard A. Harvill, president of the University of Arizona and chairman of the steering committee, is two-fold:

(1) To build public understanding of the Land-Grant philosophy, especially as it may contribute to the solution of problems common to all American higher education.

(2) To examine and portray the work of the Land-Grant institutions in order that they may more clearly identify their future responsibility to America and the world.

First formal national Centennial event will be a Convocation in Kansas City, Mo., November 12 to 16.

Keynote speaker will be Dr. John A. Perkins, president of the University of Delaware and

of the American Association of Land-Grant Colleges and State Universities.

Foreign speakers will be Sir Charles Morris, vice chancellor of Leeds (Eng.)

Other speakers will include Allan Nevins, historian; Dr. J. L. Morrill, president emeritus of the University of Minnesota, and Dr. John A. Hannah,

M. Thomas Cousins (left), resident composer of Brevard College and nationally-known musician, will compose a selection commemorating North Carolina State College's Diamond Jubilee and the Land-Grant College Centennial this fall. With Cousins is J. Perry Watson, director of music at State College, who points to a phrase in the Morrill Act—Federal legislation creating North Carolina State and the nation's 67 other Land-Grant Colleges. (Photo by L. S. Bennett.)

University; Dr. Anisio Teixeira, minister of education in Brazil; Dr. Ayo Ogunshye, director of the Extramural Department at University College, Ibadan, Nigeria, and Dr. Hellmut Becker, president of the German Adult Education Association.

president of Michigan State University.

Study groups, financed by the Carnegie Corporation, will report on the international responsibilities of American colleges and universities. Evaluations of the work being done in eight Land-Grant instructional areas, with recommendations for the future, will be made by outstanding authorities not affiliated with the Land-Grant system.

Emphasis throughout the year-long observance of the Centennial will not be on the past, but on the future: how the 68 Land-Grant colleges and universities can improve and expand their services here and abroad.

Paul Retires During Summer

## Hower To Head AFROTC

State College's 1,400-man Air Force ROTC Detachment has a new commandant.

He is Col. James D. Howder, a veteran Air Force officer and former faculty member at the University of Illinois.

His appointment was announced during the summer by Chancellor John T. Caldwell of State College at a ceremony honoring Col. Robert C. Paul, commandant of the college's Air Force ROTC Detachment for the past three years, who retired from his post during the ceremony.

Chancellor Caldwell, said that the institution had been "extraordinarily fortunate" to have Colonel Paul on its staff and that the retiring officer always had the "respect of the college administration and the confidence of the students" during his tenure at State College.

Messages praising Colonel Paul for "a long and devoted military career" and for "contributing immeasurably to the Air Force" came from General Curtis E. LeMay, Air Force chief of staff, and Brig. Gen. William J. Bell, Air Force

commandant. Chancellor Caldwell announced that Col. James D. Howder, a veteran Air Force officer and former faculty member at the University of Illinois, had been assigned to the campus to succeed Colonel Paul.

On behalf of the Air Force, Colonel Howder presented the retiring officer the Commendation Medal in recognition of "meritorious service" at the college during the past three years.

On hand for the ceremony were Mrs. Paul and the Pauls' two young sons—William and Richard. Richard pinned the Air Force medal on his father.

Prior to joining the N. C. State staff in August, 1958, Colonel Paul was commander of Brookley Air Force Base at Mobile, Ala.

A veteran of 28 years' service in the armed forces, Colonel Paul was graduated from Georgia Tech and later took advance courses at Princeton University and N. C. State.

During World War II, he served in both the African and European theaters of operations. He also was on

Air Force duty in the Berlin Airlift.

A native of Lake City, Fla., Colonel Paul will leave Raleigh and live with his family in Tallahassee, Fla., where he plans to teach at Florida State University.

Colonel Howder, who succeeds Colonel Paul at State College, began his new duties immediately and will be in charge of the 1,400-man Air Force ROTC Detachment at the college during the coming academic year.

Before coming to State College, Colonel Howder was director of personnel for the Air Force ROTC at Maxwell Air Force Base in Montgomery, Ala.

He has served in the armed forces for 27 years and was professor of air science at the University of Illinois from 1955 to 1958.

Colonel Howder is a 1933 graduate of Texas A & M College.

Colonel Howder and his wife and son, James W., 12 reside at 3618 Corbin Street, Raleigh. Another son, John D., 19 will be a sophomore at Texas A & M College this fall.

## National Catering Service To Operate Cafeteria

Operation of the cafeteria at State College will be handled by a nationally-known food catering service this coming school year.

The Slater Food Service Management Company of Philadelphia, the largest and oldest institutional food service organization in the United States, now has approved the college's contract, J. G. Vann, College Business Manager, said.

"With the very difficult position of breaking even and still maintaining good, attractive food at reasonable prices, and being faced with an automatic increase in cafeteria employee wages of a substantial amount, we felt it was a propitious time to try the contract feeding system," Vann explained. Em-

ployees of the cafeteria are on the State payroll.

Vann emphasized that "it has never been a policy of the college to make money on its food services—and we haven't. We do not expect to make money on the new system either," he added.

"The contract we entered into with this company, like any of the several competing services in the field of food management, is subject to cancellation on 60-day notice," Vann said in explaining terms of proposed agreement. "Among other things, the contract provides that all menus and prices and subject to approval by the college."

Decision to use the contract feeding system was made after several years study. Vann pointed out that more and more colleges are adopting the practice each year.

The Slater Company, according to Vann, is recognized as a leader in its field. He said that a number of schools and colleges in North Carolina, including Wake Forest, Davidson, Guilford, and Gardner-Webb, have contracted its services. Wake County Memorial Hospital also is a client.

Vann said that the Slater Company hired its own em-

ployees. He said the company interviewed all of the regular school employees, which number between 100-125 during the regular school year, and that most of them were offered employment. It is a policy of the company to hire all of its help locally, Vann said.

# Twenty-One Professors Join Faculty; Net Gain-Zero

During the summer, a list of forty-nine faculty changes were announced by Chancellor John T. Caldwell. These changes included twenty-one appointments, eleven leaves of absences, ten resignations, and seven promotions.

These faculty changes were approved by President William Friday and the executive committee of the Consolidated University.

**New Appointments**  
The New Professors and their positions are:

Dr. George August Cummings, who will be assigned to the School of Agriculture, received all his degrees at Purdue University. The Cortland, Ind., native is married, and he and Mrs. Cummings have two children. He comes to State College from Purdue University, where he has held a teaching assistantship since 1958.

Dr. George Osmore Doak, as professor of chemistry, will teach in the School of Physical Sciences and Applied Mathematics. A native of Prince Albert, Saskatchewan, Canada, he received a B.Sc. degree in chemistry and a B.Sc. degree in pharmacy from the University of Saskatchewan. He earned the M.S. and Ph.D. degrees from the University of Wisconsin. A naturalized American citizen, he is married, and he and his wife have two children. Dr. Doak's present position is acting director of the V.D. Experimental Laboratory, U. S. Public Health Service. He was associate professor of Public Health at the University of North Carolina for 12 years.

Dr. Minir Ridha El-Saden, who will join the faculty of the School of Engineering, is a native of Baghdad, Iraq. He earned his undergraduate degree at the University of Denver and both the M.S. and Ph.D. degrees at the University of Michigan. He comes to State College from the University of Texas, where he

has been assistant professor of mechanical engineering since 1959. He is married, and he will be eligible for U. S. Citizenship in 1964.

Dr. Leon David Freedman has been appointed to the faculty of the School of Physical Sciences and Applied Mathematics. The Baltimore, Md., native, who is married and has two children, received the A.B., M.A., and Ph.D. degrees from Johns Hopkins University. He has been an organic chemist with the U. S. Public Health Service at the University of North Carolina since 1947.

Dr. Dorsey McPeake Gossett received his B. S. degree from the University of Tennessee. M.S. degree from the University of Illinois, and Ph.D. degree from North Carolina State College. A native of Holladay, Tenn., he is married. His appointment to the faculty of the School of Agriculture follows a four-year graduate assistantship at State College.

Dr. James Ray Harris, a native of Berrien County, Ga., is married and he and his wife have two children. The new faculty member of the School of Agriculture received the Doctor of Veterinary Medicine degree from Alabama Polytechnic Institute and has done general practice in veterinary medicine. His present post is director of veterinary medicine for the S. E. Masengill Company, Bristol, Tenn.

Dr. William Paul Buchert, who, as assistant professor of physics, will be affiliated with the School of Physical Sciences and Applied Mathematics, is a native of Cairo, Ill. He earned the B. S. degree at the University of Maryland and the M.A. and Ph.D. degrees at the University of Virginia. The appointee joins State College from his position as research physicist for the Bartol Research Foundation in Swarthmore, Pa. He is single.

Also joining the School of Physical Sciences and Applied Mathematics is Dr. Forrest W. Getzen, who has been a research chemist with the Humble Oil and Refining Company in Houston, Tex., since 1956. The Stuart, Fla., native received his B. S. degree from Virginia Military Institute and Ph.D. degree from the Massachusetts Institute of Technology. He is married and he and Mrs. Getzen have three children.

Dr. Ernest Hodgson will join the faculty of the School of Agriculture following two years of post-doctoral research at the University of Wisconsin. A native of Hutton-La-Hole, County Durham, England, he earned his B.Sc. degree at Kings College at the University of Durham, Newcastle-upon-Tyne, and his Ph.D. degree at Oregon State University. A citizen of Britain, he is married and he and his wife have one child.

Dr. James Murray Leatherwood, a native Tar Heel, will teach in the School of Agriculture. The Waynesville native, who is married, received the M.S. and Ph.D. degrees from North Carolina State College after earning his undergraduate degree at Berea College. He presently holds a post doctoral fellowship in biochemistry at Duke University.

Another Tar Heel son, Marvin K. Moss, a native of Burlington, will teach in the School of Physical Sciences and Applied Mathematics. He earned the A.B. degree at Elon College and the M.S. degree at State College in 1957. He completed his Ph.D. degree requirements at State College in September. Moss is married and has held various positions as research assistant, teaching assistant, and instructor at State College since 1954.

The new professor of electrical engineering, Dr. George Edward Schafer,

joins the School of Engineering faculty from his present position as physicist with the National Bureau of Standards in Boulder, Colo. The Lincoln, Neb., native earned his B.A. degree at Macalester College, St. Paul, Minn., the M.A. degree at the University of Minnesota, and the Ph.D. degree at the University of Colorado. He is married and he and Mrs. Schafer have two children. Dr. Schafer has taught previously at the University of Minnesota, Southern Methodist University, and Nebraska State College.

Another new member of the School of Engineering faculty is Dr. Edward Paul Stahel, who received his Ph.D. degree this year from Ohio State University. A native of New York City he is married and he and his wife have one child. He earned the B.S.E. degree at Princeton University and the M.S. degree at the University of Notre Dame. Dr. Stahel has worked as an engineer for the Grumman Aircraft Engine Corporation, the B. F. Goodrich Chemical Corporation, the Union Carbide Company, and the E. I. duPont de Nemours Company.

Rounding out the list of new appointees is another native North Carolinian, Charles R. Pugh, who, as extension associate professor of agricultural economics, will be affiliated with the School of Agriculture. A native of Asheboro, he earned his B.S. degree at North Carolina State College and M.S. degree at Purdue University. He expects to complete his Ph.D. degree requirements in September. Pugh has worked as assistant county agent in Craven County and as farm management specialist with the North Carolina Agricultural Extension Service. He is married and he and Mrs. Pugh have two children.

Dr. Carlton Leith, a new member of the School of Engineering faculty, received his B.A. and M.A. degrees from the University of Wisconsin and his Ph.D. degree from the University of California. He came to State College from Los Angeles, Calif., where he was a project engineer geologic adviser for Holmes and Naver. Dr. Leith and his wife have two children. He is a native of Madison, Wis.

Professor Floyd P. Gehres, an Ohio native, is a member of the School of Education faculty. He received his B.S. degree from Bowling Green State University and his M.A. degree from Ohio State University. Professor Gehres was a visiting professor at State College until his new appointment. He and his wife have four children.

Dr. Richard C. Pinkerton is associated with the School of Physical Sciences and Applied Mathematics. He earned his B.S. and M.S. degrees from Michigan State University and his Ph.D. degree from Iowa State University. A native of Holly, Mich., he has been manager of chemical research for ASTRA, Inc., in Raleigh. He and his wife have four children.

### Promotions

The new promotions include:

Harvey Lindy Bumgardner from assistant professor to extension associate professor of poultry science in the School of Agricul-

ture. John Oren Rawlings from assistant statistician to assistant professor of experimental statistics and Institute of Statistics in the Schools of Agriculture and Physical Sciences and Applied Mathematics.

Homer Edwin Beam from visiting lecturer to assistant professor of agricultural education in the School of Education.

Harold Augustus Lamonds from associate professor of nuclear engineering to associate professor and head of nuclear engineering in the School of Engineering.

David Griffin Sprull from instructor to extension assistant professor of animal industry in the School of Agriculture.

Paul M. Buisson from visiting assistant professor to assistant professor of architecture in the School of Design.

Brian Shawcroft from visiting assistant professor to assistant professor of architecture in the School of Design.

Leaves of Absence  
The following faculty members have been granted leaves of absence:

# Two New Departments Organized Here

Establishment of two new departments at State College was announced recently by Chancellor John T. Caldwell.

The new Department of Food Science and Processing, which came into existence in the college's School of Agriculture this summer, will bring about a reorganization of staff members in the food and nutrition area and will focus additional attention on the advancement of food processing in the State.

The other new department is the Department of Nuclear Engineering, which embrace the college's famed teaching, development, and research in nuclear engineering. The college's nuclear program previously has been operated in the Engineering Physics Department but was given departmental status in State College's School of Engineering, effective September 1.

Authorization for the creation of the two new departments was granted by President William C. Friday and the executive committee of the Consoli-

dated University of North Carolina Board of Trustees at a meeting in Governor Sanford's office.

Decision to set up the two new departments followed national studies aimed at improving State College's teaching, research, and extension work in the two fields, Chancellor Caldwell stated.

#### Food Science and Processing

State College's School of Agriculture almost four years ago began studying ways and means of improving its work in food processing. In the fall of 1957, a review team of outstanding scientists, sponsored by the U. S. Department of Agriculture, spent a week at the college evaluating food processing work with the college staff.

Composing the team were Dr. W. J. Stadelman, Purdue University; Dr. Emil Mrak, now chancellor of the University of California at Davis; Dr. E. H. Boyd, USDA State Experiment Stations Division; and Dr. R. G. Garner, also of the USDA's

State Experiment Stations Division.

Commenting on the team's work at N. C. State, Dr. H. Brooks James, dean of the college's school of Agriculture, said that the college continued to study food processing programs throughout the country following the team's evaluation and that the studies finally culminated in the decision to reorganize the personnel and programs into the new Department of Food Science and Processing.

#### Roberts Named Head

Dr. William M. Roberts, veteran member of the college faculty and head of the Dairy Manufacturing Section of the Animal Industry Department, has been designated as head of the new department.

The following research, teaching, and extension staff members will be transferred to the Department of Food Science and Processing:

Dr. L. W. Aurand, professor of dairy manufacturing; Dr. T. N. Blumer, professor of animal husbandry; J. A. Christian, animal husbandry extension specialist; H. B. Craig, instructor of animal husbandry; Dr. Daniel Fromm, research associate professor of poultry science; Dr. M. W. Hoover, professor of horticulture; Dr. Ivan Jones, research professor of horticulture; Dr. Robert Redfern, assistant professor of dairy manufacturing; Dr. M. L. Speck, William Neal Reynolds distinguished professor of dairy manufacturing; Frank B. Thomas, processing extension specialist; and Dr. Fred G. Warren, associate professor of

dairy manufacturing.

A wide range of research projects, in food science and processing, now being conducted in the Animal Industry, Horticulture, and Poultry Science Departments, will be transferred to new Department of Food Science and Processing.

#### Veteran Department Head

Dr. Roberts, the new department head, has been a member of the North Carolina State College faculty since 1943 when he became a research associate professor. He was promoted to full professor and head of the Dairy Manufacturing Section of the Animal Industry Department in 1947.

Previously, he was a member of the faculty of the University of Tennessee, serving there as an instructor from 1941-43.

A native of Sharon, Tenn., Dr. Roberts holds B.S. and M.S. degrees from the University of Tennessee and the Ph.D. degree from the University of Minnesota.

He has served as secretary, vice president, and president of the Southern Section of the American Dairy Science Association and has been highly active in the affairs of the American Dairy Science Association, holding such significant offices as secretary of the manufacturing section, vice chairman of the manufacturing section, and chairman of the regulatory advisory committee.

Widely known in the State, Dr. Roberts is a former president of the State College Chapter of Phi Kappa Phi, national scholastic honor society; and is a mem-

ber of the Society of the Sigma Xi, Gamma Alpha, and Alpha Zeta, all honorary organizations.

As a member of the State College faculty, he has been engaged in teaching, research, and extension duties and has done a wide range of consulting work for other universities, the U. S. Department of Agriculture, and the U. S. Public Health Service and Food Sanitation Advisory Board, serving on the latter board as a representative of the American Dairy Science Association.

#### Raleigh Civic Leader

A key civic worker in the Capital City, Dr. Roberts headed the State College United Fund Drive in 1959, is a member of the Raleigh Lions Club (for about 15 years), and was colonel-in-charge of the Raleigh United Fund's educational division in 1960. He has also been a member of the United Fund's board of directors.

He is a member of the board of trustees of Saint Andrews College and is a member of the West Raleigh Presbyterian Church, where he has served as superintendent of the Church School, a deacon, and an elder.

Dr. Roberts has been a member of the State College faculty committee including the graduate, Land Grant College Centennial, and industrial tours committees.

He is the author or co-author of 36 scientific publications.

#### Nuclear Engineering

The new Department of Nuclear Engineering preceded by the pioneering work in nuclear engineering by State College's

School of Engineering, headed by Dean J. H. Lampe.

Dean Lampe said the department's program is "in the forefront of engineering education in America."

The new department will have 38 graduate students and 211 undergraduates in addition to its heavy research responsibilities.

Dean Lampe said the department work and proposed role has been reviewed and endorsed by groups from the Massachusetts Institute of Technology, Cal Tech, and the University of Iowa.

State College was the world's first university to build and operate its own nuclear reactor and was America's first institution of higher learning to offer the B.S., M.S., and Ph.D. degrees in nuclear engineering.

Its graduates occupy key posts in America's atomic installations, both governmental and private.

#### Lamonds Key Figure

Dr. Harold A. Lamonds is chairman of a faculty committee which did the spade work for the new department's development to full departmental status in the School of Engineering.

The 36-year-old Lamonds has been project director of the college's world-famed nuclear reactor since 1957.

Dr. Lamonds became associated with the college's nuclear reactor for the first time in 1952 when, as an electronics technician, he designed and constructed in-

To Tune of \$30 Million Annually

## Take Heed Raleigh: State Helps City

A review of the college's budget and other income brought here by various college activities shows that State College jingled Raleigh cash registers to the merry tune of nearly \$30,000,000 during the last fiscal year.

Of this amount, \$16,566,261 made up the annual payroll. In addition, \$4,334,115 was spent for maintenance and other items, making a total budget of \$20,900,376. During the past five years, an average of \$3,000,000 has been spent annually on permanent improvements.

An estimated \$6,080,300 was spent for food, clothing, rent, and other items by the 11,000 students enrolled in both the regular sessions of school and the summer sessions during 1960-61.

During the last regular session, the 6,500 students spent \$5,865,300 and during the 4,500 students spent \$215,000.

Including students State College attracts more than 400,000 persons to the city during a year.

College-sponsored attractions and the number of people they drew last year include:

Athletic events, 243,210; Extension Division activities, 12,988; College Union events, 140,000; Extension Division summer events, 490; 4-H Week, 1,400; Farm-Home Week, 1,200; FFA Convention, 2,000; and engineering summer activities, 586.

People attending these attractions provide additional increase to the city, its merchants, and business people.

## Faculty Changes

(Continued from Sec. 1, page 6)

Henry Bowers, assistant director of student affairs—two years for graduate study at the University of North Carolina.

John H. Gilliam, forest management extension specialist—one year to pursue graduate study.

Alfred John Goetze, associate professor of electrical engineering—one year to pursue graduate study.

John C. Jones, acting head of forest management extension section—one year to pursue graduate study.

Paul Samuel Stone, extension farm management specialist—one year to pursue graduate study.

Raul Eduardo Alvarez, assistant professor of industrial engineering, who will pursue graduate study at Johns Hopkins University.

Richard Hugh Bigelow, assistant professor of civil engineering, who will pursue graduate study at the University of Illinois.

Douglas Scales Chamblee, professor of field crops, who will accept a two-year assignment with the State College agricultural station in Peru.

George Washington Middleton, assistant professor of engineering mechanics, who will pursue graduate study at Colorado State University.

Robert James Monroe, professor of experimental statistics, who will accept a position as visiting professor in biophysics and biometry at the Medical College of Virginia.

Resignations were accepted for the following:

John M. Curtis, extension professor in charge of extension marketing, who will become head of the Department of Agricultural Economics at the University of Maryland.

Edgar Lee Harrisberger, associate professor of mechanical engineering, who will continue his studies toward a doctorate degree as a member of the teaching staff at Purdue University.

Chi-hsun (Peter) Pan, research assistant professor of textile research, who will enter private business.

Joseph Stanislaw, assistant professor of industrial engineering, who will become head of the department of processing, research and development, with the Darlington Fabric Corporation.

Jack Fleischer, assistant professor of the Institute of Statistics, who will remain with the Business Research Group at the B. F. Goodrich Company, where he has been on leave of absence for the past year.

## NCS Now Offers 22 Ph.D. Degrees

State College's Graduate School now offers instruction leading to 22 Doctor of Philosophy degrees and 37 Master of Science degrees, according to Dr. Walter J. Peterson, dean of the Graduate School.

The two newest Ph.D. degrees offered at State College are in the fields of applied mathematics and bacteriology. Both degrees were approved in 1961 by the Board of Trustees of the Consolidated University of North Carolina and the North Carolina Board of Higher Education.

The fields in which the Ph. D. are offered, in addition to applied mathematics and bacteriology, include:

Agricultural economics, agricultural engineering, animal industry, applied physics, botany (in the fields of physiology and ecology), ceramic engineering, chemical engineering, civil engineering, electrical engineering, entomology, experimental statistics, field crops, forestry, genetics, mechanical engineering, nuclear engineering, plant pathology, rural sociology, soils, and zoology (in the

fields of ecology and wildlife biology.)

The Master of Science degree is offered in following fields: Agricultural and biological chemistry, agricultural economics, agricultural education, agricultural engineering, animal industry, applied mathematics, applied physics, bacteriology, botany, ceramic engineering, chemical engineering, civil engineering, electrical engineering, engineering mechanics.

Entomology, experimental statistics, field crops, forestry, genetics, geological engineering, horticulture, industrial arts, industrial education, industrial engineering, industrial psychology, mechanical engineering, metallurgical engineering, nuclear engineering, occupational information and guidance, plant pathology.

Also poultry science, rural sociology, soils, textile chemistry, textile technology, wood technology, and zoology.

In State College's newest school, the School of Physical Sciences and Applied Mathematics, three of these Ph. D. de-

grees are offered and four of the M.S. degrees.

The school was established at the college in July 1960 with Dr. A. C. Menius as dean.

The Ph.D. degrees offered by the new school are in the fields of applied mathematics, applied physics, and experimental statistics. The M.S. degrees include the fields of applied mathematics, applied physics, agricultural and biological chemistry, and experimental statistics.

In addition, Bachelor of Science degrees in the School of Physical Sciences and Applied Mathematics are offered in the fields of physics, chemistry, applied mathematics, and experimental statistics.

Assistant to the dean of the new school is Dr. Carey G. Mumford and department heads include:

Dr. Ralph Clay Swann, chemistry; J. A. Rigney, experimental statistics; Dr. John W. Cell, mathematics; and Dr. Raymond L. Murray, physics.

### FRESHMAN

TO TRAIN FOR LEADERSHIP OF THE CLASS OF 1965

How to do this: look right from your very first day on campus. How to look right: leave it all to our Cricketer College Collection. We have the Cricketer suits and sportcoats with shoulders all your own, trousers narrower, coats a little shorter. We have the vests you need to be really dressed. We have the right outercoats... the shirts, the ties, the socks, all right to the last detail. Your best course of action to accomplish your college aim: see us before you matriculate.

SPORTCOATS, 35.00 TO 45.00

SUITS, 55.00 TO 69.50

### WELCOME STUDENTS

Make our fountain a regular stop on your daily schedule. Between and after classes you will find appetizing refreshments at:

# New Traffic Regulations Issued By Administration

By Grant Blain

Traffic rules remain essentially the same this year with the exception of some changes which have been initiated by the college administration.

These changes involve: traffic on the street south of the Alexander - Turlington - Owen-Tucker Dormitories, parking on the North Campus, and the use of Doak Field for parking.

In accordance with regulations, all vehicles driven by Faculty, staff and students must be registered at the Traffic office, even if the vehicle will be on campus for one day.

Cars which have an "A" sticker are allowed to park in

any space not authorized for another group. Cars with "B" stickers can park in a designated parking area. Cars with "D" stickers are permitted to park south of the railroad in any parking space not reserved for another group or the lot adjacent to the A & P on Hillsboro Street, or in the student time zones on North Campus.

These rules apply between 7:45 and 5:00 on weekdays and 7:45 till noon Saturdays. At other times, parking is permitted in these areas. Bicycles are not permitted on sidewalks and must be parked in racks. Registered cars are not allowed to park in visitors spaces, load-

ing zones, No Parking areas, and any area which does not have marked parking spaces. The campus speed limit is 20 M.P.H.

The East-West Street South of Alexander-Turlington-Owen-Tucker Dormitories will be closed daily at 6 p.m. and opened at 7 a.m. so that traffic will not interfere with studying in this area as it has in the past. The east section of the street can be reached for overnight parking by the road from Dan Allen Drive. Cars will not be allowed to park on the north campus between 7:45 a.m. and 5:00 p.m. on weekdays and 7:45 and noon on Saturdays. This

includes the area around Sime dormitory. Doak Field will be open for parking at these times.

Fines for failing to follow these regulations will be paid at the College Traffic Records Office. The fine for an unregistered vehicle is \$10, and failure to display sticker \$5. A parking violation on the South Campus costs \$2, and a parking violation on the North Campus during the restricted times costs \$5.

If a student feels that he has been unjustly accused, he may appear before the Student Government Traffic Committee within 2 weeks. The Committee meets each Monday at noon.

## Band Plans Tribute To College's 'Jubilee'

The North Carolina State College Marching Band, 150 strong, will pay a musical tribute to the college in recognition of the institution's Diamond Jubilee and the Land-Grant College Centennial on October 21.

J. Perry Watson, director of music at the college, said the musical salute will be given at the halftime of the Wake Forest-North Carolina State football game in Riddick Stadium Saturday, October 21, at 8 p.m.

Both musical selections and band formations will constitute the anniversary program, Wat-

son stated. Donald B. Adcock is acting director of bands at State College.

During the 1961-62 academic year opening this week, North Carolina State College will join the nation's other 67 Land-Grant Colleges and Universities in a year-long program commemorating the Centennial of the Morrill Act of 1862—Federal legislation signed by President Lincoln which created the nation's Land-Grant Colleges and established public support for higher education in science and technology.

## ATTENTION STUDENTS

### STUDENT ACCIDENT AND SICKNESS INSURANCE PLAN

#### ACCIDENTS

Reimbursement will be made up to \$1,000.00 for each accident as described in the brochure.

#### ACCIDENTAL DEATH AND DISMEMBERMENT

For loss within 90 days of accident of:

Life .....\$1,000.00

#### DEPENDENT CHILDREN

Reimbursement under the accident portion of the insurance, for dependent children, is limited to \$250.00.

#### SICKNESS BENEFITS—NON-SURGICAL

Reimbursement will be made for the actual expenses incurred but not to exceed \$250.00 as follows:—

**HOSPITAL ROOM AND BOARD**—ward accommodations—requiring confinement for more than 18 hours,

**HOSPITAL CHARGES** for drugs, medicines, X-rays, examinations, use of operating room, etc.,

**PHYSICIANS' FEES** of \$4.00 per visit per day while confined in the hospital and no payment is made for surgery.

#### SURGICAL BENEFITS

**HOSPITAL ROOM AND BOARD**—for ward accommodations—not exceeding 30 days.

**HOSPITAL INCIDENTAL EXPENSE** (In-Patient) up to .....\$100.00

**SURGICAL FEES**—Benefits are in accordance with a graduated schedule ranging up to a maximum of .....\$300.00

#### IMPORTANT

Pre-existing Conditions Are Covered

#### ELIGIBILITY AND COST

All Students attending North Carolina State College on a full time basis, and their dependent spouse and children are eligible for this plan at a cost of:

Student .....\$12.00  
Student and Spouse ..... 25.00  
Student, Spouse and Children ..... 40.00

Married couples, who prefer, may obtain insurance on themselves without including children.

Applications cannot be accepted after October 15, 1961

Applications will be sent to you upon request.

## N. C. State Honor Code

The Honor System of State College is based upon the Honor Code and the Campus Code. The responsibility for carrying out both codes falls upon the individual student.

Incoming students must certify to uphold the Honor System as a requirement for registration.

#### The Honor Code

"Under the Honor Code you are on your honor not to lie, cheat, or steal; furthermore, you are on your honor to see that all violations of the Honor Code are reported to the Student Honor Code Board."

The primary goal of the Honor Code is to develop in the student those honorable virtues that are so essential in attaining strength of character.

The Honor Code also provides us with a number of other significant benefits. The entire atmosphere becomes much more wholesome when a student realizes that mutual trust and self-respect are shared by him and his fellow students.

The name of State College is more highly respected as a result of an effective Honor Code.

The duties that the Honor Code imposes upon the individual in relation to himself are obvious. He is on his honor not to lie, cheat, or steal.

The duties imposed by the Honor Code upon the individual with respect to others are also clearly defined. He is bound to see that all violations of the Honor Code are reported to the Student Honor Code Board, the board of fellow students who have been delegated the responsibility of enforcing the Honor Code.

Reporting another student for an Honor Code violation may appear to be a distasteful duty; however, it is a duty that must be performed willingly if we are to maintain a successful Honor System.

The Judicial Department recommends that the offender first be given an opportunity to report himself; if he fails to do this, however, the student who witnessed the violation must do so. In either case, violators of the Honor Code are always tried and dealt with by the Student Honor Code Board.

#### The Campus Code

"Under the Campus Code you are bound by your responsibility as a gentleman to conduct yourself as such at all times, and further to see to it, insofar as possible, that your fellow students do likewise."

The Campus Code is the second component of the Honor System. It is a pledge on the part of each student to conduct himself in a man-

ner befitting a gentleman under all circumstances.

Since "gentlemanly conduct" cannot be precisely defined, the interpretation is left to the student who must rely upon his own training and common sense. Gambling, hazing, intoxication, and boisterous conduct are examples of what could be considered violations of the Campus Code today.

The student must rely upon his judgment and discretion in reporting Campus Code Violations.

#### Procedure for Reporting Violations

A member of the student body or faculty who has cause to report a violation of the Campus Code or Honor Code, either on his own initiative or at the request of someone else, may handle the case through the Office of Student Activities, Telephone 370 or 215. This office will arrange for a member of the Student Judicial Department to see the student or faculty member.

#### Trial Procedure

This procedure is used to maintain a uniform method of conducting trials and supplements the Student Government Constitution.

#### THE TRIAL

1. Introduction of defendant (s), witness (es), and members of the involved Board.

2. The Chairman charges the involved Board—"I charge all members present to be unbiased and just in your consideration of the facts and evidence concerning the case, and to administer justice in accordance with

and to uphold the Constitution and its By-Laws."

3. Members of involved Board are given the right to disqualify themselves or any other member present. The member investigating an incident shall be automatically disqualified for the trial concerning that particular incident.

4. The Summons is read.

5. The defendant is asked how he pleads—Guilty or Not Guilty.

6. The Investigations Report is presented by the member of the Board who investigated the incident.

7. The defendant is then requested to give his version of the alleged happening with the right of presenting witnesses who will give evidence relevant to the case.

8. Other witnesses, either for or against the defendant, are then asked to testify. At any time during the trial, the defendant, any witnesses, or any member of the Board may ask questions or make statements.

9. At the conclusion of the testimony and questioning by the Board, both defendant and witnesses are excused from the room, and further discussion of the case may take place. The defendant and any of the witnesses may be recalled for further questioning by the members of the Board.

10. After full discussion of all the facts, there is a finding by the Board—Guilty, Not Guilty, or No Trial. The sentence is then determined (if the defendant is found Guilty) accord-

(See HONOR CODE, Sec. I, page 12)

## Semester Calendar

CHANGES IN COLLEGE CALENDAR FOR 1961-62: The college calendar for 1961-62 has been rearranged. Published below in full is the official calendar for 1961-62. FALL SEMESTER, 1961 Student Affairs

Sept. 11	Mon.	General Faculty Meeting.
Sept. 11-13	Mon.-Wed.	New Student Orientation.
Sept. 14	Thurs.	Freshman Registration.
Sept. 15	Fri.	Upperclassman Registration.
		Late registration fee of \$5.00 payable by all who register after September 15.
		Continuation of New Student Orientation.
Sept. 15-16	Fri.-Sat.	Classes begin 8:00 a.m.
Sept. 18	Mon.	Last day for registration. Last day to withdraw with refund less \$5.00 registration fee.
Sept. 22	Fri.	Last day to add a course. Last day to drop a course without failure.
Sept. 29	Fri.	Mid-term reports.
Oct. 6	Fri.	Thanksgiving holidays begin at 1:00 p.m.
Nov. 11	Sat.	Classwork resumes at 8:00 a.m.
Nov. 22	Wed.	Last day to withdraw from school without failure.
Nov. 27	Mon.	Christmas holidays begin at 6:00 p.m.
Nov. 28	Tues.	Classwork resumes at 8:00 a.m.
Dec. 19	Tues.	Last day of classes.
Jan. 3 '62	Wed.	Reading Day.
Jan. 16	Tues.	Final Examinations.
Jan. 17	Wed.	
Jan. 18-24	Thurs.-Wed.	

# New Ultramodern Gym Offers Complete Sporting Activities

State College students will be able to enjoy the benefits of a new gymnasium this year. This \$2,750,000 building will contain a complete repertoire of recreational facilities, as well as a section devoted to classroom

and office space.

The largest portion of this building contains the recreational facilities, which includes areas for swimming, basketball, handball, and squash. The area

which has already attracted the student's interest is the swimming pool and the basketball courts, which have been open during orientation week. The king-size swimming pool

and one three-meter diving boards available.

The main gym floor contains space for seven basketball courts and a gymnastics area. This includes one varsity court and six smaller basketball courts. There is also a small recreation room for activities such as ping-pong, chess, checkers and bridge. There is space for ten handball courts and six squash courts.

The basement contains a 10,000 locker equipment room, as well as dressing rooms for both boys and girls. There is also a "corrective" room for rehabilitation purposes, a wrestling and boxing room; a weight room; a golf room which has six "driving nets"; and a room which may be converted into 12 bowling alleys in the future.

In the outside area, there is a parking lot which can be converted to a skating area. Provisions have also been made for adding an 18-hole golf course and horseshoe pits on the North side of the building.

Aside from the recreational area, there is a section containing offices for the gym staff and

View of New Gym from Coliseum

Swimming Pool

Basketball Courts

is 25 yards wide by 25 meters long. It has eight lanes laid out for competitive swimming on a yardage basis, but it can be converted to a metric course for international competition. There are two one-meter diving boards

classrooms for instruction in Hygiene. There is even a small library which can be used for studying.

Students are invited to tour their new gymnasium and use its facilities for relaxation during the coming school year.

College Centennial and was prepared by Bob Messick of Shelby, chairman of the College Union Gallery Committee.

Of a historical nature, the exhibit is divided into sections, each depicting college life during the term of a college president or chancellor.

The display, which opened Sunday, will be on view until September 30.

## History of State Displayed at CU

A special exhibit tracing the development of North Carolina State College over the past three-fourths of a century has been arranged in the College Union Building.

The display is a salute to the college's dual celebration of its Diamond Jubilee year and the Land-Grant

## Campus Improvements

The State College Campus continues its expansion and beautification program year after year.

Although we criticize many of M & O's practices, we will have to admit that many of their beautification programs have done much for the campus. This year, the parking area

new gym is a remarkable structure both in size and design, and the new classroom building (See view from within below) is a very good example of modern architecture at its best. Its simplicity of lines and its very functional design offers much to our campus. M&O also has another "brick-

View from Within Harrelson

Addition Beside Supply Store

at the cafeteria has been removed and a brick patio-type structure put in its place.

The two new ultramodern buildings on campus also adds very much to the appearance of the college. The

ed" area in front of the Student Supply Store. Although this development is very handsome (see pictures below) there is some question of it being an actual improvement. It has cut the street so that no-through traffic can go on Dunn Avenue.

## The Leaning Tower of Brick

Which tower is the one which arose overnight during summer school (and was later demolished by M & O's)? You guessed it. Remember the old saying, "Give a man enough rope and he'll hang himself"? Well, now the M & O is trying to do it with bricks. On the other hand, these particular bricks swaying(?) delicately in the breeze are probably resting happily in the new elaborate road block at the Student Supply Store. Freshmen: M & O means Mistakes and Oversight.

GANT

OXFORD BUTTON-DOWN

Careful tailoring adheres to the strict tradition you look for in this classic. Emphasis is placed on confident detail brought to the highest level of correctness. Fine cotton oxford has been crafted to provide excellent fit and complete comfort. The softly flared button-down collar maintains the authentic impression.

TO NORTH CAROLINA STATE

THE FRATERS OF PHI EPSILON PI

# Scenes From First Day Of Rush

## Social Fraternities Seek New Pledges

By Charlie Hamilton  
I. F. C. Publicity Chairman

For the second year, State College fraternities are having rush week during Freshman Orientation Week. In fall of 1960 the fraternity system "experimented" by planning rush during freshman orientation. The reason for this was to give the student more time and opportunity to visit houses without having to worry about classes and studies, and to allow the fraternity men to devote full time to their rush program. The plan proved to be very successful last year. With this year's program following closely that of last year's, and with a record number of freshmen entering school, this year's fall rush appears that it might be the most successful ever.

Already a number of the entering freshmen have been making numerous visits to the eighteen social fraternities on campus. For these boys it is becoming an enriching experience in producing a well-bal-

anced Orientation Week and is giving each one the best opportunity to discover the many advantages of fraternity life. Only when a boy can be inside a fraternity house or can participate in some of its activities or actually see the brotherhood in action can he really determine the qualities of a fraternity.

On Tuesday night the Interfraternity Council held an Open House at the College Union for all freshmen in order that the entire rush program could be explained, and also an invitation was extended to every freshman to participate in the rush activities. The Council has maintained an information center at the Union for the purpose of answering any questions which arise and keeping all fraternities informed on the week's progress. It is desired that all freshmen become familiar with all the rush rules so that no misunderstanding will occur.

The visiting days are in progress with the parties coming  
(See RUSH, page 12)

# Gallagher Named In Scandal As Grand Jury Investigates

By Benny Pearce  
Another former State player is among those named in the latest basketball scandal. He is Don Gallagher, a former outstanding performer on the hardwood court in Reynolds Coliseum. Gallagher from Binghamton, N. Y., is said to have shaved points in the State-Maryland game of Feb. 13, 1960. State won the game 48-46 with Gallagher scoring only four points. The latest indictments brought a new season into the basketball scandals. All

DON GALLAGHER.

of the other indictments served had been for the past basketball season. The new indictments make one wonder just how many past basketball games were either "fixed" or had points "shaved" in them.

The alleged man who contacted Gallagher and paid him the money is Joseph Green of New York. Green is in the custody of New York authorities where he faces other charges arising from the basketball scandal. Green is one of the six indicted.

Two other former State players appeared before the Grand Jury Tuesday, Sept. 12. These were Stan Niewierowski and Terry Litchfield. Both of these were indicted last Spring, but neither has been to trial yet. A third State player from last year's squad, Anton Muehlbauer, did not appear before the Grand Jury Tuesday.

The other five that were indicted were: Lou Barshak, Bob Kraw, David Budin, Michael Siegel and Charles Tucker, a New York attorney.

Several local men were indicted on several different charges. Stewart Mason Howe was indicted on a charge of operating a gambling house and gambling. How operates the State House Restaurant on Hillsboro Street. Charles (Red) Campbell testified before the Grand Jury Tuesday. Campbell

had charges brought against him last week of taking bets involving basketball games. Campbell operates the Profile Tavern near the college. Norman Delancey testified briefly before the Grand Jury. He has no charge against him, however. Delancey operates Norman's Clothing Store across from

State College. Chalmers gave no indication as to when any of those indicted would be tried. The trial for Niewierowski, Muehlbauer and Litchfield was originally scheduled for last June, but for some reason it was put off and no one has put a definite date as to when they will be tried.

## A Look at the Basketball Past

State basketball captain Don Gallagher (right) in action in the game he reportedly shaved points in against Maryland on February 13, 1960. Gallagher was recently implicated in the basketball scandal in connection with Joseph Green, who faces charges for the bribery acts last spring. Gallagher is now a Second Lieutenant with an Army Ranger outfit in Germany.

## Honor Code

(Continued from Sec. 1, page 9)

ing to the stipulations of the By-Laws of the Constitution or if not provided for in same, shall be determined at the discretion of the Board.

11. The defendant is recalled and the decision of the Board stated and explained.

12. If the verdict is guilty, the defendant is informed of his right of appeal. To obtain a new trial, the defendant must prove that the Student Judicial Department committed an error in procedure or that vital new evidence has come to light since the trial.

13. It shall be the responsibility of the defendant to contact the Office of Student Affairs on the next school day, to clarify his college status.

### AFTER THE TRIAL

An official summary of the case is made available to the Student Affairs Office. The Clerk incorporates in his report the following:

1. The alleged offense
  2. The verdict
  3. The penalty
  4. A resume of the evidence (the resume is unofficial)
- The Clerk shall file a report of the trial with THE TECHNICIAN. The defendant shall be treated anonymously unless the Chairman directs otherwise.
- The Clerk shall file the of-

cial report of the trial in the permanent Judicial Department Files.

### Penalties For Honor System Violations

1. *Reprimand*: This sentence means that the student is severely reprimanded for his conduct. Only the Campus Code Board can issue this penalty.

2. *Probation*: This sentence means that the student cannot represent the Student Body or North Carolina State College in any representative capacity; nor retain membership in nor participate in any student activities except those in which he has a life membership.

3. *Suspension*: This sentence means that the student is suspended from school for one, two, or three semesters. After the period of suspension, the student is free to return to school, if he is academically qualified.

4. *Dismissal*: This sentence means that the student is permanently suspended from school.

5. A second Honor Code conviction shall result in dismissal.

6. In addition to penalties awarded by the Honor Code Board, a student convicted of stealing or knowingly possessing stolen goods shall repay the proper parties in total.

7. A student convicted of giving or receiving unauthorized aid shall receive an "F" on the course in which the violation occurred.

## Orientation Works Again

(Continued from page 1)

sic of the "Orientation Week Band", followed by an assembly in the William Neal Reynolds Coliseum.

Tuesday opened with an assembly in Reynolds Coliseum, with instruction on health, traffic regulations, and the ROTC program. Tuesday afternoon was devoted to meetings in the respective schools which the freshmen were entering. On Tuesday night, there were dormitory meetings, a chemistry examination, and a movie presented by the Interfraternity Council, "Fraternity Life is For You". Rushing rules were explained and refreshments were served.

Wednesday was devoted to a physical Examination Check and Physical Skills Test, Band and Glee Club tryout, discussions, and a Hygiene Test. That night, there was an open house at

the College Union.

Today was registration day for all freshmen. After being X-rayed, all freshman students registered for their classes. Upon reception of ROTC equipment, they went about the pocket-book wrenching task of buying books and supplies.

Tomorrow will be registration day for all upperclassmen and transfer students. All students have been invited to use the recreational facilities available at the New Gymnasium.

On Saturday, freshmen can rush fraternities and attend the rush week activities which have been planned. On Saturday night, there will be a "get acquainted dance" at the College Union Ballroom.

Sunday completes Orientation Week, with an invitation to attend the church of your faith.

## Diamond Jubilee Exhibit

Two members of the North Carolina State College Union Gallery Committee were caught as they prepared a portion of the College Anniversary Exhibit now being shown in the College Union. This exhibit may become a permanent part of the gallery program if reaction is favorable.

# Gridders, Swimmers Treat Townspeople

Raleigh residents took part with members of the city's civic clubs and their families at a special "family night" program at North Carolina State College Monday.

Featuring the program was a preview of the 1961 Wolfpack football team, a free swimming session for children, and a swimming and diving exhibition by State College's All-America swimmers.

Other highlights of the event included a tour of the new two and a quarter million dollar physical education building and a basketball movie shown by Coach Everett Case.

In addition to having an opportunity to swim in State College's new swimming pool, the children went to a special camera and autographing session. Members of the coaching staff and football squad were on hand to pose for photographs and sign autographs.

A barbecue supper was served in Riddick Stadium at 6 p.m. The program began with the swim period at 4 p.m. and ended with the football scrimmage, conducted by Coach Earle Edwards, at 7:30. Greetings to the visitors was extended by State College Chancellor John T. Caldwell.

The program is an annual affair sponsored jointly by the Raleigh Chamber of Commerce and State College.

## YMCA Retreat Welcome Frosh

By Bill Isler

"So You're a College Man. Now What?" and thus began a new chapter in the lives of some one hundred odd State College Freshmen. This phrase was the theme of a brochure announcing the YMCA Freshman Camp, attempting to explain what Freshman Camp was and how it could benefit the incoming freshman. One hundred of a select group of new freshmen attended this largest Freshman Camp on record.

Thursday, September seventh, Freshman Camp began with registration in the lobby of the N. C. State YMCA. Three fun-packed, educational days later it closed with the lunch following an interdenominational worship service in the Danforth Chapel. During these three days, the freshmen attending prepared themselves in some manner for the great experience of college.

Among the highlights were: the Reverend Hartley Hall's addresses; a panel of State College professors consisting of M. Petrea (Math.), Mr. Morgan (Chemistry), and Mr. Stinson (Graphics), during which were fired many questions by the freshmen; and a raunchy and very entertaining stunt program.

The discussion groups of Camp will be continued into the first semester of school and will be open to any interested individuals. This is a valuable opportunity for any interested people to grow intellectually.

## Chancellor

(Continued from page 1)

choose wisely and soundly with respect to your ambitions when you applied to State College."

Mr. Caldwell reminded the new students that: "Learned Men the world over are pushing back the frontiers of the... material universe", but the universe is still a great challenge. He urged his audience to explore this universe within themselves and to "keep your Bible handy and use it".

## Fraternity Rush

(Continued from page 11)

up on the weekend. Visiting hours will be from seven until ten this evening with most houses having speakers, films, and other light entertainment. Friday's schedule begins with visiting at 2:00 P.M. Supper will be served on Friday evening for those rushees who have signed up for the meal. Following the meal, each house will have a party until midnight with girls, combos, and other professional entertainment. Activities on Saturday begin at 11 a.m. and continue until 12:30 that night following closely the Friday slate of activities. Rush will conclude on Sunday with the houses being open from two until ten.

Silent period will begin at ten Sunday night and will last through noon Friday. During this period no contact may be made by a

fraternity man with any rushee. Each rushee will receive all his bids from Holaday Hall by Wednesday or Thursday and will have until noon Saturday to make his decision on the selection of fraternity.

Some important facts that each rushee should remember are that he must visit at least four houses, getting a house officer to sign his rush card; that this rush card will be turned over to a house after he has gotten the fourth signature; and that the rushee is expected to have an invitation for the Saturday night party and Sunday afternoon smoker. Each rushee will pick up his invitation cards at the I. F. C. information center on Saturday, beginning at 11 a.m. Visitation of as many houses as possible during the rushing period is strongly encouraged.

## Administration Introduced

(Continued from page 1)

Lyle B. Rodgers and Dr. Kingston Johns stand ready to assist all students in any phase of their college life. This office now has an expanded counseling program with complete vocational guidance facilities. The Student Financial Aid Program is also administered through this office.

These are but a few of the men and women of Hol-

aday Hall who stand ready to assist the student in any possible manner. Students are encouraged to use their services and cooperate with them whenever the need should arise.

Students are further referred to the 1961-62 edition of The Tower for information as to whom to see and where to go for specific needs.

# Pack Looks To Successful Season

## State Meets Wyoming In Season Opener

N. C. State will tackle Wyoming in the season football opener September 23 at Laramie, Wyoming. The Wolfpack did not play the Cowboys of Wyoming last year, but the team from the west "lassoed" State with a 26 to 0 defeat in 1959 in the only other meeting between the two teams.

The Cowboys have won three straight Skyline Conference championships. Their chief losses from last year were at guard right tackle and left halfback. If replacements can be found at these positions, the Cowpokes should be able to field a strong eleven. Wyoming has 14 returning lettermen along with some fine newcomers which should provide the folks of Laramie with some interesting football this fall.

Probable starters for the Wolfpack will be ends, Krall and Morris; tackles, Wilder and Maravich; guards, Singleton and Bushofsky; center, Kudryan; halfbacks, Boshier and Taylor; fullback, D'Antonio; and quarterback, Gabriel. All but Boshier and Kudryan are lettermen.

The second Wolfpack unit should be ends, Krall and Harden; tackles, Shaffer and Pallandriani; guards, Puckett and Matthews; center, Krecicki;

halfbacks, Koszarsky and Clark; fullback, Moore; quarterback, Dellinger.

Many of the Wolfpack players were members of the 1959 team which suffered the 26-0 defeat, and will be trying their best to avenge the defeat.

### Season Slate

Date	Opponent	Place
Sept. 23	Wyoming	Laramie, Wyo.
Sept. 30	North Carolina*	Chapel Hill
Oct. 7	Virginia*	Charlottesville, Va.

## Nationally-Rated Team Led By Roman Gabriel

For the first time in several years the Wolfpack football team is receiving pre-season recognition as one of the Nation's best teams. The Pack has been rated as high as seventh in the Nation in pre-season polls.

Last year's record leaves the Wolfpack camp in a state of optimism. State won 6, lost 3, and tied 1. Eighteen lettermen return from the fine team of last year.

The returning lettermen are led by All-American, Roman Gabriel. "Gabe" was one of the four players in major college football to be responsible for over 50% of team's total offense. He was personally responsible for 54% of State's total offense. In addition to being selected to several All-American teams Gabriel received several other honors. Among these are: "Athlete of Year" in ACC, "Football Player of Year" in ACC, and "Outstanding Athlete of the Carolinas".

Four other returning lettermen will perform with "Gabe" in the backfield. The halfbacks returning are led by Al Taylor, last year's rushing leader. Al gained 303 yards and maintained a 3.3 average. Other lettermen backs are Tom Dellinger, defensive star, Roger Moore, powerful fullback, and Jim D'Antonio, fullback. D'Antonio, if Spring practice is any indication, could become the top fullback in the ACC this fall.

Lettermen ends are led by Johnny Morris, who lead the Wolfpack in number of receptions last season. John Gill and Dennis Kroll are returning defensive stalwarts.

The tackle position is one of the strong points of the Pack team. These positions will be manned by four very fine tackles: Bert Wilder, Fran Pallandriani, Nick Maravich, and Jake Shaffer. Pallandriani and Maravich, have both already been drafted by professional football teams. With this size and talent at the tackle slots, it will be easy for Coach Edwards to operate a defensive and offensive platoon system.

The guard position offers the most lettermen for Coach Edwards to select from. Five lettermen return at this position. They are Joe Bushofsky, Hazel Matthews, Kent Morton, Harry Puckett and Graham Singleton.

The center position presents one of the biggest problems to Coach Edwards and his staff. Walt Kudryan won the first string offensive position with a fine Spring practice. Sam Raneri was expected to handle the defensive linebacking position, but due to a recent operation it is not known when he will be able to play. Gerald Krecicki and Oscar Overcash provide depth at the center position.

Many fine newcomers from last year's undefeated Freshman team are expected to bolster weak positions on the Wolfpack squad. Among these are halfbacks Carson Boshier, Tony Koszarsky, and Joe Scarpati. Jim Rossi, quarterback on the undefeated team, will provide reserve strength for Gabriel.

All in all it looks like the Wolfpack should have the finest football team since the days of Dick Christy and Dick Hunter.

## 1961 Wolfpack

## Coach Earle Edwards Begins Eighth Year At Helm Of Pack

By Benny Pearce

Coach Earle Edwards' popularity among students, faculty, administration, and football fans will be reflected this year as he experiences his eighth season as head football coach at North Carolina State College. Beattie Feathers is the only other coach in 69 seasons of football to remain head coach at State as long as eight seasons. Feathers was the Wolfpack coach from 1944-1951.

Edwards' popularity among students was established during a recent losing season when the students paid him tribute by banding together and marching to his home shouting "We like Earle" and singing "For He's A Jolly Good Fellow". During that same season many football coaches were burned in effigy including the coach at a nearby university.

Edwards became head coach at State in 1954 after a five year tenure as end coach at Michigan State. He had also coached at Penn State, his Alma Mater. During his seven years at State, Edwards' teams have attained a record of 25 wins, 40 losses, and 5 ties. In 1957 his team won the Atlantic Coast Conference championship with a 7-1-2 record. With this fine season Coach Edwards was named "Coach of the Year" in the ACC. The most unsuccessful season was 1959 when his team won only 1, while losing 9. This season was wrought with bad

luck as five of the losses were by five points or less. The Wolfpack was so unlucky that they lost the pre-game coin-tossing ceremony on all ten occasions.

Assisting Edwards this year will be Al Michaels, Carey Brewbaker, Pat Pepler, Bill Smaltz, and Johnny Clements. Michaels and Clements have been on the same coaching staff for twenty seasons. Both came to State in 1954 and they had previously served to-

gether for thirteen years on the Penn State coaching staff. Michaels specializes in the defensive portion of the game. In addition to his football duties, Coach Michaels has been golf coach for the last five years.

For the last eight seasons the line-play of the Wolfpack has been very capably directed by Carey Brewbaker. Brewbaker joined the staff in 1954 following a successful tenure as head

coach at Durham High. He also handles the recruiting in the Carolinas and Virginia for the Pack.

Pat Pepler has done all of his college coaching at N. C. State College. Edwards persuaded Pepler to join his coaching staff from the ranks of the Michigan high school program. Pepler is the co-ordinator of the Pack scouting program

## Carolina Tickets May Be Secured Beginning Sept. 18

A general admission coupon for the Carolina game may be secured at Window #2, Reservations, in front of the Coliseum upon presentation of your Athletic Ticket and I. D. Card. Issuing Dates: September 18 thru September 22, 8:30 A.M. to 4:30 P.M. \*Date tickets are priced at \$4.50 each. Your coupon will be exchanged for a reserved seat stub at Kenan Stadium, Gate No. 1, between 12:00 Noon and 2:00 P.M., Sept. 30. Round-trip bus tickets to Chapel Hill can be obtained at the Coliseum Box Office on Wednesday September 27 from 7:00 to 9:00 P.M. Student bus tickets are FREE, however, date bus tickets are priced at \$1.50. Bus to leave at 12:00 Noon from front of Coliseum Saturday, September 30.

\*Date tickets may be used ONLY by someone of opposite sex, within same age bracket.

## Soph Duet To Feature Running Attack

By Benny Pearce

The 1961 issue of the Wolfpack football team would offer reason enough to be optimistic on just the strength of Roman Gabriel and 17 other returning lettermen. There are two other good reasons for having an optimistic viewpoint. These reasons are the finest duo of running halfbacks N. C. State has had since Dick Hunter and Dick Christy were paving the Pack's way to the conference championship in 1957. The two halfbacks to whom I am referring are Carson Boshier and Anthony Koszarsky. These two led the 1960 Wolfpack Freshman team to an undefeated season.

Carson Boshier established himself as a starter on the 1961 team in Spring practice. Boshier is stocky built for his 5-8 frame, weighing 185 pounds. He is an excellent man in all phases of

the game. He led last year's Freshman team in scoring with 44 points. He kicked 20 of 22 extra points. Boshier is also a fine pass receiver and good blocker.

The other half of this Sophomore combination is Tony Koszarsky. Tony is also 5-8, but weighs 168 pounds, somewhat less than Boshier. Koszarsky scored 42 points on last year's Freshman team on seven touchdowns. He is excellent at all phases of the game, but he is aided in his running game by his good speed and elusiveness. Tony had several long runs from scrimmage for the Freshman team. He missed most of Spring practice due to a pulled leg muscle.

These two running backs along with lettermen Taylor and D'Antonio should provide "Gabe" with plenty of support.

# Three Way Fight Predicted In ACC

By Benny Pearce  
Sports Editor

If preseason polls mean anything, the coming football season in the Atlantic Coast Conference promises to offer plenty of excitement. Many observers rate it as a three-way race for the championship between N. C. State, Duke, and Clemson.

I personally lean towards State (not that I'm prejudiced) on the basis of Roman Gabriel's strong arm, improved line-play, and a new-found rushing attack provided by Al Taylor, Jim D'Antonio, Carson Basher and Tony Kozarsky.

Duke, last year's champion and Cotton Bowl winner over Arkansas, will find it quite difficult to repeat as champions. Duke has loads of backfield talent in Jack Wilson, Mark Leggett, Joel Arrington, Dean Wright, Walt Rappold and Billy Futrell. Jay Wilkinson, son of Oklahoma's famed coach Bud Wilkinson, should see action behind Rappold as a quarterback. Duke's main worries are with the line where graduation swept away six of the seven starters. The only returning lineman starter is guard Jean Berry. Due to Duke's line woes, I pick them to be on the short end of the score against State this year for the first time in fifteen years. It was way back in 1946 when State last beat Duke, 13-6. The 1957 Wolfpack team came close with a 14-14 tie.

Clemson, coached by the sharp-witted Frank Howard, has won three of the last five ACC championships. The Tigers appear to have a formidable line but are short on backfield strength. Three of four quarterbacks were lost due to graduation. Although no halfbacks were lost, the material is so lean, at this position that Howard has experimented with 6-4 end Gary Barnes at this post. On the other hand

Clemson has two of the biggest players in college football in tackles Ronnie Osborne, 278, and Jimmy King, 267. The line-play should provide Clemson's backfield with enough holes to keep them in contention for the championship.

South Carolina, Carolina, and Maryland should rank about even, but neither has the material to go all the way to the championship. Of the three I pick South Carolina to give the most trouble to the contenders on the basis of a new coach Marvin Bass, and their upset 8-8 tie of N. C. State last year. South Carolina has a good forward wall but, they like Clemson, are weak in backfield talent. Their backs are exceedingly small for college backs.

It appears to be a lean year for Wake Forest because for the first time in three years they are without the strong passing arm of Norman Snead.

Virginia has a new coach in Bill Elias, but I don't see much reason to believe that the Cavaliers will stop their consecutive loss skein at 28.

I predict the season to end in this way: N. C. State, Duke, Clemson, South Carolina, Maryland, Carolina, Wake Forest, and Virginia.

Institute of Electrical Engineers.

He is currently vice-chairman of the Technical Committee on Nucleonic and Radiation Instruments of the AIEE.

Honorary societies to which he belongs are Tau Beta Pi, national engineering society; Phi Kappa Phi, national scholastic society; Sigma Pi Sigma, physics society; and Sigma Chi, America's highest honor society in the field of general sciences.

End John Morris

Tackle Fran Palandrani

Captain Roman Gabriel displays the passing arm on which the hopes of the Wolfpack are based. Gabriel accounted for 54% of the Packs' total offense in 1960 with his passing and running.

## ARCHIE SAYS:

My cousin Archie—he thought the electric razor his gal gave him last Christmas was o.k. Then he tried Old Spice Pro-Electric, the before shave lotion. Now the guy won't stop talking, he thinks electric shaving is so great.

ARCHIE SAYS Pro-Electric improves electric shaving even more than lather improves blade shaving. ARCHIE SAYS Pro-Electric sets up your beard by drying perspiration and whisker oils so you shave blade-close without irritation. ARCHIE SAYS Pro-Electric gives you the closest, cleanest, fastest shave.

If Archie ever stops talking, I'll tell him I use Old Spice Pro-Electric myself.

SO DO I.

P. S.  
There's a .60 size but Archie gets the 1.00 bottle. (He always was a sport).

**Coach Makes Debut  
In Opener Sept. 30**

The North Carolina State Soccer team this year will be experiencing its first season under Coach Nelville Cooper. Coach Cooper has been a member of the State P.E. staff for several years, but this will be his first year as a coach here. Coach Cooper has a drastic rebuilding job to do. Last years team did not win a game and only managed to salvage one tie out of its ten-game schedule. Cooper has seven returning lettermen to provide him with nucleus of a team. Among those are: Yalman Balta, John Lighton, David Barnes, Edward Gibson, Juan Del Carmen, Sukru Tarim and Ergin Uskup. The first game will be played in Raleigh Sept. 30 with the opponents being U. S. Naval Amphibian Base.

**ON MONEY MANAGEMENT—**

This questionnaire was especially designed for North Carolina State College students by Wachovia Bank and Trust Company, your convenient bank in Raleigh.

Take this easy test...find out how you *now* rate...and discover how easy it is to improve your money-managing ability!

1. Do you ever forget which bills you've paid...and which you still owe? Can you *prove* you've paid your bills?  Yes  No
2. Can you pay all your monthly bills in just a few minutes instead of several hours?  Yes  No
3. Do you find it easy to plan your budget and keep track of expenditures?  Yes  No
4. Do you run the risk of losing cash?  Yes  No
5. Do you keep enough money on hand to tide you over a sudden emergency—to allow you to take advantage of an unexpected trip or some unusual opportunity?  Yes  No
6. Do you keep these extra funds in a Savings Account where they're 100% safe and earning DAILY INTEREST...yet are quickly available?  Yes  No

**FIND THE ANSWERS...**

at Wachovia's West Raleigh Office, right across the street from State College. (Cameron Village Office is just a short walk from the campus.)

**Wachovia Special Checking Accounts**

Pay bills by mail with an economical Special Checking Account at Wachovia. Your name and address are imprinted on each check and deposit ticket. Open your account with any amount...no minimum balance required...monthly statements furnished.

**Wachovia DAILY INTEREST Savings Accounts**

Put your extra cash to work in a Wachovia Savings Account. Earn full-time DAILY INTEREST—from the first day of deposit to day of withdrawal! Wachovia pays maximum bank interest—3% per year, compounded and paid 4 times a year.
