International Week Held

Fashion Show, Talent Show Featured

State College has gone international this week.

International Week—a salute to the United Nations and to the foreign students on campus—continues through Friday night. Activities have been arranged by the College Union International Committee, Hospitality Committee, and Theater Committee.

Tomorrow night there will be a showing of an Italian film "Poor, But Beautiful" at the College Union Theater. Showings of this comedy will be at 7 and 9 p.m.

The Week's activities will be accented by the International Fashion and Talent Show Friday night. It will be held in the CU Ballroom at 8 p.m. Costumes from Spain, the Philippines, India, Finland, Scotland, Indonesia, Thailand, and Argentina will be featured.

An exhibit of articles from many different countries has been placed in the South Gallery of the College Union.

Shown in the picture is Miss Belle Cline, model in the International Fashion Show last year.

Annual IDC Ball Slated Sat. Night

It is 8:00.

Orange and black Halloween decorations lend an eerie air to the semi-darkened cavern.

The lights come on. And the first and largest dance of the school year begins. The Inter-Dormitory Council Ball, featuring Warren Covington, will be held Saturday night.

ton, will be held Saturday night.

About 3,000 people are expected to attend the dance which is the highlight of the social season for the IDC, the governing body of the dormitory students at State College.

Ernie Freeland, president of the IDC, wishes to stress part of the college policy concerning dances. Students are not expected to provide flowers for their dates and are encouraged not to, he stated.

A brief figure will be held during the ball in which the sponsors, the Dance Committee of the Dormitories, and their dates will be introduced to students attending the dance.

Dress for the ball will be formal. Either a black Tuxedo, white dinner jacket, or the military uniform with a white shirt and black bow tie is acceptable. The use of the military uniforms has been authorized by the Army and Air Force ROTC commanders.

In 1956 Covington took over the reigns of the Tommy Dorsey Ball.

(See IDC Ball, page 2)

Queen Contest Sponsored By Blue Key Fraternity

There'll be a new Queen this year.

All fraternities, dormitories, organizations, and interested individuals who wish to enter a contestant in the Homecoming Queen contest must submit their entries by November 15.

The Blue Key Honorary Fraternity has announced that entries must be submitted no later than 5:00 p.m. on this date. The entries must include pictures and information concerning the contestants.

The contestants must be between 18 and 25, and must be single. The contestant does not have to be a student at State College or any other school. The name of the contestant and two photographs, one full-length and one 8 1/2 x 11, must be submitted, along with the name, address, and telephone number of the sponsor. Pictures will be returned after the contest and may be picked up at 206 Holladay Hall.

The Blue Key will select ten finalists from the pictures submitted. The finalists will be formally interviewed by the judges on Saturday morning, November 18. The winner will be

announced during the half-time ceremonies of the Homecoming Game and will be officially crowned Miss Wolfpack at the Homecoming Dance.

Any questions concerning the contest may be answered by contacting John Kanipe at VA-85772.

Prof Lectures Council On Radiation Effects

Professor William Jackson, a staff member in the Soils Department, explained the effects of atomic radiation on all forms of life to the Ag Council last night.

The Council met at the College Union Theater. State Fair booth awards were presented to the Agronomy Club, Ag Engineering Club, and Ag Education Club for first, second, and third place honors in that order.

The Ag Council consists of each departmental club in the School of Agriculture and Agricultural Education. Each club elects two members as representatives to convey messages

of importance and discuss and vote on questions which arise.

All meetings are open for anyone to attend. Records are kept of the number of members of each club attending. At the end of the year, a plaque is presented to the club which has had the largest percentage attendance.

The officers are elected from the representatives from each department and are as follows for this year: Cleo Robertson, president; David Stadler, vice-president; David Mustian, secretary; Reynolds Cowles, treasurer; Ivan Rash, reporter; Professor M. E. Gardner and Dr. W. M. Lewis, advisors.

Chancellor Speaks On U. N. Week

Opening Raleigh's observance of United Nations Week last night, Chancellor John Caldwell warned against two great temptations which manifest lack of faith in the UN.

These temptations are, he noted, "to believe that a lie can overpower the truth . . . in the UN," and to believe that the free nations of the world can "maintain freedom by compromising it."

Chancellor Caldwell addressed an audience of 220 at a banquet at the College Union. Ed Preston, chairman of the Mayor's Executive Committee for the Observance of UN Week, welcomed the guests. Dr. Raoul Freyre, Associate Professor in the Department of Physics, introduced the Chancellor.

The Chancellor also stated in his address that the UN

has created an awareness of the world situation among the general public. He added, "The UN has changed from an institution of debate to an institution of action." And in spite of this great change, the UN has retained its original purpose to establish international peace and security, the Chancellor said.

State Professors To Discuss Fallout On WUNC-TV

"Radioactive Fallout — The Issue in Perspective" will be discussed by four State College professors tonight on television.

The special program will begin at 9:30 on WUNC-TV, Channel 4. The discussion will be centered on the effects of radioactive fallout upon the individual and posterity.

Professor Henry Cooke, a mathematics instructor at State College, will be the moderator. Dr. Newton Underwood, professor of physics; E. Jack Story, director of the State College Nuclear Reactor Project; Dr. Walton C. Gregory, professor of field crops in the Department of Genetics; and Dr. Ken-ichi Kojima, assistant professor of Genetics, will be the panelists.

Behind The Scenes - N. Y. City Ballet

By Allen Lennon
What is this thing called ballet?

This is the question which was in the minds of more than 6000 students and Raleighites who flocked to the Coliseum Monday night for the first of three performances by the New York City Ballet.

They found out.

The performance was, to be sure, intriguing in itself; but just as interesting as the performance was a glance at some of the activities which the audience missed.

When asked about the adaptability of the Coliseum for ballet before the performance, one of the managers commented, "This is one of the largest houses we've ever played in. I'm sure they'll hear the orchestra

all right, but they may need field glasses on the back row."

Meanwhile, Stage Manager Ronnie Bates was putting the finishing touches on the lighting while the dancers were loosening up. "Yes, we do have a few qualms about performing here. We've had a few problems in setting up our production, but we are very pleased with the arrangements," he said.

Ronnie's worst fears were realized when the new curtain opened a little too far the first time—in fact one side fell down completely. The stage crew discreetly pulled it off the stage while the performance went on as usual. A passing comment backstage was, "Well, it's happened before. We'll try again tomorrow night."

A trip to the orchestra pit at intermission brought this comment. "I'm surprised at the sound of the house. It's monstrous, but we're carrying the last row with no trouble. Yes, I'm also amazed at the audience reception so far. We always seem to do a better job for a good crowd."

By ten-thirty the crowd was gone except for a few autograph-seekers and ballet fans who were discussing the performance.

Anne Burton was there, too.

Anne is a lovely young Tarheel lass who got her start with the Atlantic Civic Ballet. There she was offered a Ford Foundation Scholarship to study ballet in New York. Anne is eighteen and the only

Southern Belle in the company of dancers from all parts of the world. "I've always loved to dance, and I think I'm the luckiest girl in the world!"

"Yes, it does take a lot of time to rehearse every day, but it's worth the six or seven hours every day when you get on that stage. It's really another world."

"Most people don't realize the extent of unionization in the arts today," she continued. "If we practice more than five hours a day, we get overtime. But the sense of accomplishment far surpasses the pay," she added.

Asked about the company's feelings regarding performances so far south, Anne said, "Well,

we were all pretty scared not knowing what kind of reception we'd get here, but it was really wonderful tonight. This was one of the best audiences we've had. The stage is a little slippery and somewhat smaller than usual, but things are fine."

Anne likes the men in the company very well, she says. "They are all wonderful, but I like college boys better."

She hopes to continue in the ballet as long as possible. "I want to be the best," she said. She also plans to return to Atlanta to teach some day.

The beauty of the ballet may be readily apparent to all who see it, but the spirit of the company is every bit as real and too often missed.

Who? Me?

One of the most popular tonics for a late-hour bull session is, "What the hell is wrong with this school?" Although such a meaty subject is well-known throughout the land, the participants in such discussions generally lay aside their conclusions with the arrival of blessed sleep and somehow fail to regain them when the next debate starts.

Besides, what can one guy do? When the myriad of problems which can arise from a community of over 7000 students and 700 faculty members is considered, the efforts of a single individual can seem pretty ineffective. The situation is further complicated by the cosmopolitan nature of State men and women. After all, sixty countries are represented here; students on this campus may come from New Jersey or Louisiana, be Catholics or Moravians, be conscientious or couldn't care less.

Some people—optimists to be sure—disagree. Take Floyd McCall, for instance. The chronic ache in the backs of many interested persons has always been school spirit. Mr. McCall had an idea in this area and, contrary to custom, did something about it.

The special seating arrangements for groups of State students at the Wake Forest and Duke football games was the result of the idea of one man, his efforts to see it through, and the fine cooperation of a lot of other people, staff and students, who took the trouble to be interested. The idea was to provide good seats for students groups usually stuck in some corner and at the same time gather together those people most susceptible to supporting actively our athletic activities.

The plan worked fairly well last week, despite the damping factors of weather and late evening hours. The seats were full—no question about that. And the support from the stands was certainly an improvement. Some of the groups, either clubs, dorms, or fraternities, showed a lot of enthusiasm; some of the others concentrated more on enjoying the good vantage points allocated to them.

The test is, of course, this weekend. Will the reserved student section become a firm policy at State College? If the response from the "blocks" is favorable for the idea, the arrangement will in all likelihood be continued.

The groups who consider themselves the cream of the crop present at the game could very well prove it to more sceptical eyes. Sure, the gripe sessions will always be with us—but the gripes can change.

Fraternity Flashes

By Charles Hamilton

This column, in the past, has been composed mainly of the social events of the various social fraternities on campus. There has hardly been any co-operation whatsoever from the fraternities toward presenting information, especially that which may be of interest to people outside their own house.

As the new editor of this column, I will attempt to present material that will be of interest, not only to fraternity men, but also to the students on campus who would like to know more about the social fraternities and their activities. I shall attempt to correct this condition by writing a series of articles concerning such things as fraternity life, organizations, and projects.

This series will begin with a brief summary of the newly organized Junior Interfraternity Council. The Jr. IFC, while it is still in the so-called planning stages, promises to be a big step forward in the strengthening of the present fraternity system. Composed of the pledge-class presidents from each fraternity, the Jr. IFC was proposed and organized by the "Senior" IFC. It will, however, operate on its own accord. In early stages of development, this organization will work very closely with the present IFC.

To give you a better outlook on how the Jr. IFC will operate, I will present a few of its first

duties. A primary function will be that of stressing scholarship and exchanging helpful ideas between houses. Good scholarship is a primary goal of every fraternity, and since it presents somewhat of a problem in most instances, it is felt that the Jr. IFC, consisting as it does mainly of first and second semester Freshmen, will recognize the importance of good scholarship and will be able to "tackle" this problem by presenting its ideas and recommendations to the pledge classes.

Another aim of the Jr. IFC is directed toward strengthening the various pledge-classes. Much of the time there is a problem in organizing a pledge-class and in getting a pledge-class to work together as a unit. By exchanging ideas through the council, this problem can be lessened.

While it works separately from the IFC, the Jr. IFC is not meant to replace or reduce the effectiveness of the IFC. On the other hand, it will be a major asset to the IFC, for one of the chief weaknesses of the present IFC is that of inexperience. A number of council members first took their position with little knowledge of what it was like. It is felt that much useful experience can be gained by having served previously on the Jr. IFC.

While I have mentioned only a few of its duties, I hope that I have given you something of an understanding of what the Jr. IFC is and what it will do toward promoting a better IFC and interfraternity system here at State College.

Profile . . .

I. Beverly Lake

Tomorrow night at the Apollo Club meeting, Dr. I. Beverly Lake will debate fair employment practices with Harry Golden, the editor of *The Carolina Issue*. A profile on Mr. Golden will appear tomorrow night.

Mr. Lake was the runner-up for the democratic nomination for Governor of North Carolina in 1960.

He received his B.S. Degree from Wake Forest in 1925 and his L.L.D. Degree from Harvard in 1929. He later attended Columbia University and received his L.L.M. degree from there in 1940 and a S.J.D. Degree in 1949.

He taught at the Wake Forest School of Law from 1932 to 1951. In 1951 he was appointed an attorney in the Department of Commerce and was later named Assistant Attorney General of North Carolina. He

served in this position until 1955 when he went into private practice with the Fletcher, Lake, and Bryce Law Firm in Raleigh.

Mr. Lake resides in Wake Forest and is married to the former Mrs. Gertrude Bell of Raleigh. He has one son, I. Beverly Lake, Jr.

Frat Football In Last Round

By Richie Williamson

The fraternity intramural football league moves into its last week of regular season action before starting the post-season playoffs to determine the championship. In Monday's games, three teams remained unbeaten while the rest of the four sections continued to leave the playoff berths unclaimed. The top two teams in each of the sections earn the right to enter the playoffs.

Defending champions Kappa Alpha used the long pass to score a 21-6 victory over SAM. Grady Ferrell passed for two TDs and ran for a third in sparking KA. It was an even game with both teams generating good offensive attacks as KA held a 7-0 halftime lead. In the last half Ferrell connected for the long gainer to break the game open.

Sigma Chi was held to a 6-0 halftime lead before breaking loose to stoy AGR 20-0 to keep its unblemished record. Wilbur Mazingo passed to Thompson,

Robertson, and Bunch for scores in each of the last three periods while AGE was ineffective in moving the ball against the Sigs defense.

The other unbeaten team, Sigma Nu, was idle Monday, but they scored a 14-0 win over PKT last Thursday. Herman Snyder's 45-yard kickoff return in the last period gave Sigma Nu the margin of victory.

In other games Monday, PKT got their first win of the season with an impressive 27-7 rout over TKE. The first half ended in a 7-7 deadlock, but PKT's Jim Skidmore pulled out the victory with a flurry of touchdown passes. Skidmore passed to Irving Tucker for two TDs and to Bob Thorn for two more. Sig Eps' Jimmy Hooks led a second half rally to break a scoreless tie and post a 13-0 shutout over Sigma Pi. It was a very even game until Hooks moved the Sig Eps to their scores.

SAE scored two touchdowns in the second period and went on to post a 19-6

win over PKA. Angberger ran for the first TD while Shotten passed for the other two. PKA's lone tally came in the second period when Roberts crossed into paydirt. PKP's Jerry Crabtree paced his team to a smashing 27-0 victory over Farm House. PKP hit for two quick scores in the first period and were never to be headed from there out. Crabtree scored three touchdowns and Broughton scored the fourth.

In the closest game of the afternoon Theta Chi edged out Lambda Chi Alpha 6-0. For three quarters the two teams battled evenly without score. Then, in the final period Theta Chi managed to cross the goal for the margin of victory. In the only lopsided game of the day, Kappa Sig smeared Phi Ep 39-0. Churchill Brown scored four times while Watson Hale and Reef Ivey also scored. Phi Ep was never able to move the ball as they had a minus 42-yards gained. Kappa Sig, however, just walked over the field as they gained 143 yards.

Swim Meet Tonight

The preliminary rounds for both the dormitory and fraternity intramural swim meets will be held tonight in the new swimming pool. The dormitory qualifying round will get underway at 8 o'clock while the fraternity events will begin at 7:30.

The events which will be in contest tonight are the 25-yard freestyle, 100-yard freestyle, 50-yard breaststroke, and 50-yard backstroke. The qualifiers will compete in the finals next Wednesday night along with

SYSTEMS ENGINEERING can start here... or here... or here... or here... or here... or here

If you are completing studies in engineering, economics, math, science or business, have maintained high averages and are interested in a rewarding professional career, IBM Systems Engineering may be just the career for you.

An IBM Systems Engineer studies problems in industry, science, business and government, and then organizes the most effective electronic data processing techniques and machine systems to solve them. The problems are fascinating and exciting—and include automation of: process control and manufacturing operations, inventory control, document preparation, highway planning, weather forecasting, and complete business control

IBM DATA PROCESSING

systems for utilities, transportation, banking and insurance, to name but a few. New techniques of automatic data processing are making headline news almost daily.

Your present training, combined with one of the most comprehensive training programs conducted by any company, prepares you for this fast-growing, dynamic new profession. Openings exist in all principal U.S. cities. All qualified applicants will receive consideration for employment without regard to race, creed, color or national origin. For more information describing the opportunities at IBM, see your College Placement Director or, if you desire, write or call—

M. E. Jonsson, Branch Manager
