

Opportunity Knocks For N. C. State Students To Carry Education Torch

College To Benefit From Bond Issue

Seven-eleven are the lucky numbers for State College—and this is no gamble.

The seventh of November is the date on which the bond referendum will be decided. Eleven is the number of benefits which State College will reap from the successful passage of the bond issue.

Chief among the improvements will be enough money to pay the cost of a 800-man dormitory. The need for more dormitory space is already apparent this year, with over 1400 students living in three-man rooms. This is enough for one extra dormitory.

The other benefits fall chiefly under the heading of classroom expansion and improvement. They include the renovation of Frank Thompson Gymnasium, to provide more classroom area for the Military and Parks and Recreation departments; the renovation of Mann Hall, so that it may be utilized by the Electrical Engineering Department; an addition to Gardner Hall, for expansion of the School of Agriculture facilities; a General Forestry building, as well as renovation of Forest Camp facilities, to benefit the School of Forestry, air conditioning of the library building to provide a comfortable place to study, as well as to protect the books; landscaping of the college grounds and the covering of Rocky Branch Creek; a building for the Industrial Education Service and the Ceramics Department, which

presently have no separate buildings; facilities for agricultural research stations; and the purchase of approximately 800 acres of land to provide for college expansion.

State College will receive approximately \$4,741,000 of the \$61,665,000 which will be appropriated if the voters of North Carolina approve the bond issue.

According to Chancellor Caldwell, this money is necessary to provide for the expansion of State College's facilities to provide for an increasing enrollment which is anticipated at 12,000 in 1970. He also stated that: "the mission of this College will be severely limited if adequate provision is not made for teaching and research laboratories, office space, and equipment for a leading technological institution."

Other recipients of the bond issue will be: Capital area building, State training schools, State (See BOND ISSUE, page 4)

Here you get an idea of why the Nov. 7 bond issue is so important to State College. N. B. Watts (center), director of student housing at North Carolina State College, woefully tacks a "Sorry, All Dormitory Rooms Filled!" sign on the college's dormitory rental office. State College is faced with an acute dormitory room shortage. However, this situation can be improved if the Nov. 7 State-wide bond referendum for capital improvements is passed. The \$61,665,000 bond issue includes \$4,741,000 for capital improvements at State College.

Chancellor Issues Letter

To the parents of our students:
This proposed bond issue to be voted on November 7, includes over 31 million dollars for higher education in North Carolina. Other needs included in the total are of great importance to the people. There is no intelligent alternative to facing up to these needs and voting FOR the issue. To serve your sons we desperately need the improvements your vote will bring us.

S G Supports Bond Referendum

Better educational facilities in North Carolina are banking on the Bond Referendum, according to the State College Student Legislature.

The Student Government Legislature at their meeting last week, stated that "the colleges of North Carolina are producing the leaders of tomorrow. However, these colleges are being held back by antiquated facilities."

The Student Government pointed out that since so much stress is placed on getting a good college education, the institutions themselves should be of highest quality.

The resolution as passed by the Student Government states "that the North Carolina State College Student Government Legislature heartily endorses and supports the State Bond Proposal and urges that the people of North Carolina

approve said bond issue on Election Day, November 7, 1961."

Faculty Senate Backs Issue

An appeal for an affirmative vote in the November 7 bond referendum has been issued by the North Carolina State College Faculty Senate.

Dr. D. D. Mason, head of the Senate, urged citizens of the state to vote in favor of the \$61,665,000 bond issue proposal for capital improvements for state in-

stitutions and agencies. Of this amount, State College is slated to receive \$4,741,000.

A resolution was unanimously passed by the Senate concerning the election in which the bond issue was endorsed "as being in the best interest of the people of the State of North Carolina."

The resolution stated that "as the Faculty Senate recognizes the needs and potentials of the State of North Carolina, the Senate encourages every member of the faculty to support the bond issue vigorously."

Student Body Pres. Issues Statement

To the parents of our students:
North Carolina State College students have attacked with great vigor the forthcoming Bond Election campaign. Students on this campus including your son have taken a most active part in an outstanding campaign to encourage favorable voter participation on November 7th for the Bond Elec-

tion.
It is hoped that all parents having sons or daughters in state-supported schools will vote in favor of the Bond Issue. Furthermore, we hope that parents will encourage all their friends to support the Bond Issue also.

E. Norris Tolson
President Student Body

State Men To Run In Marathon Friday

The terms "bonds" and "interest" have taken on a new significance at State College.

"Bonds" refer to the state-wide bond referendum which will be decided upon by North Carolina voters on November 7. The "interest" is the feeling toward the bond issue shown recently by the students on this campus.

Some seventy State College students have volunteered to take part in one of the most ambitious projects ever undertaken by North Carolina college students—The Torch for Education Marathon. Starting at both ends of the State, two flaming torches are now on their way to the Capitol. The men who will end the journey for both the eastern and western torches are runners from State College; the marathon is scheduled to end at 12 noon on Friday, November 3.

From the beginning of the marathon project on the morning of Oct. 31, the torches will be carried continuously by relay runners from the twelve state-supported schools who are carrying the flame of education one mile apiece. Almost 70 of the total 750 miles run are the responsi-

bility of State College students.

The torch from the east will be picked up in Fayetteville at 2:00 a.m. on Friday from Fayetteville State Teachers College. The torch from the west will be handed to State runners on the outskirts of Raleigh by North Carolina College students from Durham.

Under the direction of Norris Tolson, Student Body President, and Bill Jackson, of The Technician staff, the 70 volunteers have been divided into eleven teams, each responsible for a specific sector of the trip. The captains for the teams are Gary Dana, Hickory; Mike Gurley, Greensboro; Charles Jones, Greensboro; Johnny Woodson, Chase City; Lee Doty, Raleigh; Bob Griffith, Lexington; Pete McDonald, Thomasville; Shannon Lambeth, Greensboro; Mike Word, Greensboro; Mike Stenhouse, Charlotte; John Carr, Asheville; and Skip Kugler, Charlotte. Tolson is from Tarboro, and Jackson's hometown is Winston-Salem.

Special Issue

This issue of The Technician is being sent to all parents of in-state students of State College to acquaint them with what the administration, faculty, and students have done in relation to the November 7 bond referendum.

Sponsors Named For Engineers' Ball

Sponsors for the Engineers' Ball are pictured above. Top row, left to right: Mrs. Sonya Ellis; Miss Sherry Jackson; and Mrs. Tina Ferguson. Bottom row, left to right: Mrs. Doris Yeatts McGavisk; Miss Judy Tucker; Mrs. Constance Garrenton Hackney and Mrs. Esther W. Smith.

Parents' Support Urged

Many critics of our times have said that college students have become a group of security-seeking, pragmatic followers of the status quo, but the happenings on our campus for the last few weeks directly contradict this statement.

The students of State College have done an unbelievable amount of work toward publicizing the reasons in favor of the Bond Referendum. To take a case in point, Bill Jackson, a member of the Governor's Student Committee for a better North Carolina, drove two hundred miles last Sunday to map out the route that State College Runners are running in the "Torch Marathon" (see story page 1). This is only an example of the sacrifices students have made and the energy they have spent. Many other students have been just as enthusiastic and active.

The improvements to State College provided for in the election will not actually aid these men for many years. They will have graduated from State College before the proposed changes take place, and they will not have children to take advantage of the higher education system for many years. What then inspires these men to spend time and energy which would be more use to them for school work? It is a completely idealistic desire to see State College become an even greater benefit to our state and to see North Carolina become even more influential in our nation and the world.

The benefits that the passing of this issue will offer State College are too numerous to include in this limited space, but we will use as an example of all of our needs the housing problem on this campus.

Over fourteen hundred of your sons are living in three-man rooms in dormitories while many others are living in inadequate off-campus housing because there is no room for them in the housing areas. Any of you parents who have daughters attending State know of the vital need for adequate housing for coeds which exists here. These crowded housing conditions limit students' chances for study and impose hardships on them in many other ways. If the Bond Referendum passes, the housing situation at State will be alleviated for at least a few years and a much better atmosphere for study will be created and will provide a chance for a much better education.

The other improvements State College will receive are just as vital to the continued growth of the institution as this example we have listed.

Your sons and daughters have unselfishly given their time and effort to a cause they feel will benefit to our state. It is now your turn to show the same enthusiasm and public conscience and support the Bond Election on November 7.

LITTLE MAN ON CAMPUS

"OH, HE'S NOT SO BAD A TEACHER, BUT YOU'LL FIND HE HAS HIS 'PETS'."

For Monday

NCS Music Director Describes Lecturer

"Henry Cowell is one of the most controversial figures ever to appear on the American musical scene," These are the words of J. Perry Watson, Head of the Music Department at State and the man who will introduce Mr. Cowell Monday night as he lectures in the College Union Ballroom.

Mr. Watson went on to say that aside from being merely a much debated musical creator, "Cowell is a real innovator, one who is constantly searching for new forms and new techniques in his compositions. And it is the mark his truly creative instincts that his interests are so diversified. He has attempted and achieved the largest tonal color pattern of any American, and possibly European, composer that I know. I would say that he rates right up there with Bartok in that aspect of composing."

Asked whether Mr. Cowell is still composing, Mr. Watson said, "Yes, he seems to divide his time fairly equally between composing, traveling and teaching. He has become possibly a little less the radical experimentalist he was in the 1920's and 30's, but he is still never satisfied with the present state

of music and is always working to enlarge its possibilities."

Mr. Cowell is a member of the Music Faculty at Columbia University. "It is a real tribute to this man that he can fit right into the academic atmosphere and add so much to it. When a creative artist can do this successfully, you know that he is an extraordinary person," Mr. Watson said.

During his undergraduate work at Fla. State University, Mr. Watson saw and heard Henry Cowell and was "tremendously impressed with his knowledge about every conceivable form of musical construction. This man is a real scholar, a creative scholar, and if people want to find out what the trends are in contemporary music at the present, they will probably learn more about it from Mr. Cowell than almost any composer writing today. I would urge anyone faintly interested in music not to miss this lecture."

Mr. Cowell's lecture will begin Monday at 8:15 in the College Union and will be followed by a coffee hour in the lounge. He is appearing under the auspices of the Library Committee, Incorporated.

Parents!

Dear Parents,

Each year we find that we have many requests from parents of State College Students for a subscription to our college newspaper, THE TECHNICIAN. Realizing that all parents are interested in their son or daughter, and his or her associates, we should like to take this opportunity to enable you to subscribe to our paper.

We are currently publishing three times a week.

The price of a subscription for a full year will be \$4.00. If you are interested, please fill in the blank below and remit with your check or money order.

We are looking forward to serving you in 1961-62.

Sincerely yours,
David Cribbin

D-Day

The attacks were coming with clock-like regularity now. We knew that in the end they would be inevitable but somehow we just weren't prepared for them. One might ask how do you go about preparing for something of this sort. No one really knows the answer, I guess, until they've actually experienced it, and then it's too late. Maybe next time, if there is a next time, we'll be ready.

Packing just a few belongings we left our apartment and hurried to the predetermined building we were to go to when this

thing happened. There were others already there just like ourselves.

Separation from loved ones began and there was nothing to do but wait. Why did this have to be? Why couldn't some other arrangement be made? Some how you learn to accept things as they must be thought.

Nearly two days went by. I, for one, didn't get much sleep during that time; how can you when you go on just beyond a door not 50 feet away. About the eighth hour of the second morning after our arrival I
(See I.B.M. NO., page 4)

Profile . . .

Henry Cowell

Henry Cowell, celebrated American composer, editor, and lecturer, was born in 1897 in San Francisco. His early musical education was concerned with the violin, but later developed into a devotion to the piano.

He toured Europe and the United States for many years with programs of his own compositions. Mr. Cowell has written fourteen symphonies in addition to a large amount of other types of music. His latest compositions include "Madras" and the "Persian Set."

Mr. Cowell has spent much time in the Asiatic countries and, in the Spring of 1961, attended the international music conferences in Japan and Iran. Here he took part in studying, discussing, and examining East-West music and the relationship of the two.

In 1931 he received a Guggenheim Fellowship for study of non-European music. He

studied at the University of Berlin and later went to other countries, including Japan.

This amazing belt has a dual purpose. It may be worn for casual or dress wear. Imported from England and priced at a paltry 3.50.

Wolfpack Travels South To Alabama To Meet Strong Miss. Southern Team

By Benny Pearce

The Wolfpack will journey to Mobile, Ala., this weekend to meet the strong Mississippi Southern team. This will be the third intersectional meeting for the Pack this year; in previous games the Wolfpack lost to Wyoming and Alabama.

The Southerners of Mississippi Southern have lost only one game this year. That was a 21-7 defeat at the hands of strong Memphis State. Memphis State is the only team to score more than seven points against the Southerners this season.

Mississippi Southern is a so-called "small college", but State coach Earle Edwards has this to say about that, "There is nothing small-college about Mississippi Southern, and I don't care how they are rated. The Southeastern Conference schools won't schedule them so they have difficulty in getting a major

or schedule and major rating."

State will once again try to put a well-rounded attack together to stop the Southerners. In the four losing games this season the Wolfpack has been able to do some things well and not even get started in other departments. One of the major difficulties has arisen from a lack of a running attack to go with Roman Gabriel's great passing.

The Wolfpack has excellent break-away runners in Carson Boshier, Tony Koszarsky, Mike Clark and Joe Scarpati, but they have been unable to get good blocks in order to spring them loose. Al Taylor, Jim D'Antonio and Dave Houtz are capable power runners, but there has been a minimum of good line blocks thrown by the State line.

At any rate, the Wolf-

pack will be trying to bring back a win when they meet Mississippi Southern Saturday night. The game will be broadcast over the Wolfpack Sports Network with game time being 9:00 p.m. EST.

HUSBANDS, ANYONE?

It has been alleged that coeds go to college for the sole purpose of finding husbands. This is, of course, an infamous canard, and I give fair warning that, small and spongy as I am, anybody who says such a dastardly thing when I am around had better be prepared for a sound thrashing!

Girls go to college for precisely the same reasons as men do: to broaden their horizons, to lengthen their vistas, to drink at the fount of wisdom. But, if, by pure chance, while a girl is engaged in these meritorious pursuits, a likely looking husband should pop into view, why, what's wrong with that? Eh? What's wrong with that?

The question now arises, what should a girl look for in a husband. A great deal has been written on this subject. Some say character is most important, some say background, some say appearance, some say education. All are wrong.

The most important thing—bar none—in a husband is health. Though he be handsome as Apollo and rich as Midas, what good is he if he just lays around all day accumulating bedsores?

The very first thing to do upon meeting a man is to make sure he is sound of wind and limb. Before he has a chance to sweet-talk you, slap a thermometer in his mouth, roll back his eyelids, yank out his tongue, rap his patella, palpate his thorax, ask him to straighten out a horseshoe with his teeth. If he fails these simple tests, phone for an ambulance and go on to the next prospect.

If, however, he turns out to be physically fit, proceed to the second most important requirement in a husband. I refer to a sense of humor.

A man who can't take a joke is a man to be avoided. There are several simple tests to find out whether your prospect can take a joke or not. You can, for example, slash his tires. Or burn his "Mad" comics. Or steal his switchblade. Or turn loose his pet raccoon. Or shave his head.

After each of these good-natured pranks, laugh gaily and shout "April Fool! If he replies, "But this is February nineteenth," or something equally churlish, cross him off your list and give thanks you found out in time.

But if he laughs silverly and calls you "Little Minx!" put him to the next test. Find out whether he is kindly.

What should a girl look for in a husband?

The quickest way to ascertain his kindness is, of course, to look at the cigarette he smokes. Is it mild? Is it clement? Is it humane? Does it minister tenderly to the psyche? Does it coddle the synapses? Is it a good companion? Is it genial? Is it bright and friendly and filtered and full of dulcet pleasure from cockerow till the heart of darkness?

Is it, in short, Marlboro?

If Marlboro it be, then clasp the man to your bosom with hoops of steel, for you may be sure that he is kindly as a summer breeze, kindly as a mother's kiss, kindly to his very marrow.

And now, having found a man who is kindly and healthy and blessed with a sense of humor, the only thing that remains is to make sure he will always earn a handsome living. That, fortunately, is easy. Just enroll him in engineering.

© 1961 Max Shulman

Joining Marlboro in bringing you this column throughout the school year is another fine product from the same makers—the king-size, unfiltered Philip Morris Commander. Here is pure, clean smoking pleasure. Try a pack. You'll be welcome aboard!

how far is
"way out"?

Like about 239,000 miles if you're part of the scientific team at Ford Motor Company's Aeronutronic Division in Newport Beach, California.

A leader in missile development, Aeronutronic was assigned to build the U.S.'s first moon capsule for the NASA Ranger lunar exploration program. This 300-pound instrumented package will be launched by a larger spacecraft for impact on the moon's surface where it will transmit computer data to earth. Meanwhile, back on this planet, men and ideas are in constant motion at Aeronutronic, planning scientific break-throughs which will effectively transform new concepts into practical products for industry and defense.

Aeronutronic has been awarded prime contracts for the Air Force "Blue Scout" rocket-space program; the development of DECOYS in the Air Force ICBM program; SHILLELAGH surface-to-surface guided missiles for the Army.

Ford Motor Company recognizes the vital relationship of science to national security. Through our Aeronutronic Division supplemented by our scientific research and engineering facilities at Dearborn, Michigan, we actively support long-range basic research as an indispensable source of today's security and tomorrow's products. This is another example of Ford's leadership through scientific research and engineering.
