## Heaton Appointed Assistant

### Bowers Named Director Of NCS College Union

With the appointment of a new College Union Director, the division of student affairs is planning a considerably enlarged program of cultural events for the campus.

James J. Stewart, Dean of the Division of Student Affairs, announced the appointment of Henry Bowers, former assistant director of student activities, as director of the College Union and coordinator of the social-cultural affairs, and Richard S. Heaton, former assistant director of the College Union, as associate director.

The change in College Union personnel was necessitated by the recent death of Gerald Erdahl, director a number of years.

According to Dean Stewart, the responsibilities of the head of the College Union have grown to the extent that college officials have found it necessary to appoint a director and an associate director. In mak-

ing the appointment, Dean Stewart said: "As director of our College Union and Coordinator of Social-Cultural affairs, Mr. Bowers will endeavor to develop to the maximum the social-cultural opportunities for our Students, using all available resources of the college, the City of Raleigh, and the area. Mr. Heaton (See BOWERS, page 4)

### Indian Delegate To UN Slated For Talk Fri.

India's permanent representative to the United Nations is slated to speak here Friday night.

Chandra Shekhar Jha, a prominent world figure, will deliver his lecture at the College Union at 8 p.m. Anyone interested is invited to attend free of charge.

Students will have an excellent opportunity to gather firsthand information concerning the problems and policies of Indian leaders. A question sure to arise for discussion is India's position concerning its recent invasion of the small Portuguese colony of Goa.

In addition to his duties as head of India's UN Delegation, Ambassador Jha is chairman of the United Nations' Special Fund for aid

(See INDIAN, page 4)

### Veteran Dept. Head Retires This Month At College Library

Mrs. Katherine A. Edsall, head of the library's Circulation Department, is retiring after sixteen years of service.

She received her undergraduate degree from Randolph-Macon Women's college, a master's degree from Columbia University, and library training from Catholic University of America. Before coming to State College, she worked for two years as librarian at the North Carolina School for the Blind.

At a recent meeting of the Faculty Library Committee, Dr. Lockwick Hartley, chairman of the Committee and head of the English Department, said of her work:

(See DEPT., page 4)

### SG Opposes Move To Rescind Senior Exemptions From Finals

By Allen Lennon

A move by the Faculty Senate to discontinue senior exemptions from final examinations is again under way. Student Government is on record as opposing the recommendation.

Student Government President Norris Tolson presented the matter at the last Student Government meeting and found the legislature strongly opposed to the year-old faculty proposal which would rescind the current administration policy of dismissing seniors from exams in those courses in which they have A or B averages.

"The legislature has passed a resolution favoring senior exemptions, and a stronger resolu-

tion is now in the works," Tolson said. "In addition, committees have been appointed to take student and faculty polls on this issue. In other words, Student Government is prepared to wage a vigorous campaign to preserve one of the few senior privileges we have here."

The controversy stems from an action of the Faculty Senate which occurred

### Eta Kappa Nu, EE Fraternity, Holds Induction

Eta Kappa Nu, the Electrical Engineering honor fraternity here at State College, initiated 34 new members in December. The initiates are:

Richard T. Baer, Toms River, N. J.; Richard H. Blackwell, Jr., Charlotte; Manny M. Borookhim, Teheran, Iran; Charles W. Bostian, Raleigh; Wallace C. Bradley, Gerton; James E. Brewer, Biscoe; Jesse D. Brown, Wilmington; John C. Deriso, Camp Lejeune; Kenneth A. Dunning,

(See ETA, page 2)

in November of 1960. At that time a report of the Educational Policy Committee was approved and sent to the Chancellor. The report recommended that commencement be held after the exam week and that senior exemptions from exams be discontinued. In accordance with the report, commencement this spring has been moved to follow exams, resulting in a reorganization of the school calendar; but no action has yet been taken concerning the second part of the faculty recommendation.

In an interview with *The Technician*, David D. Mason, Faculty Senate Chairman, said, "At the December meeting, I was directed to reaffirm to the chancellor at the Liaison Committee meeting, the faculty position on senior exemptions, which I did." "This should not be interpreted as a surprise move by the Senate, but an effort to express the faculty's continued support of the old report," Mason commented.

Chancellor Caldwell told *The Technician* Wednesday night that he would have no comment on the issue

(See S G OPPOSES, page 4)

### Union To Display Top News Pictures

More than 75 prize-winning newspaper photographs will be on display in the College Union South Gallery next week.

These winners of the 17th Annual News Pictures of the Year Competition, the largest of its kind in the world, were selected from 7,135 top photos entered by more than 650 photographers. The exhibit will be presented by the Union Gal-

lery Committee from January 7 to January 20.

Sponsored jointly by the National Press Photographers Association, the University of Missouri School of Journalism, and *Encyclopaedia Britannica*, this exhibit has become a regularly scheduled event at many institutions in the United States.

In a prominent place in the exhibit will be the pictures of Burt Glinn of *Magnum Photos*, who was named "Magazine Photographer of the Year" and Albert Moldvay of the *Denver Post*, "Newspaper Photographer of the Year." Special recognition for outstanding photo-journalism achievement was accorded Gordon Converse of the *Christian Science Monitor*, who was named "Newspaper-Magazine Photographer of the Year."

The photographs were first screened in Columbia, Mo., and finalists were sent to judging committees in New York, Miami, and Denver, where the top winners were selected. Additional prints rated highly by the judges are included also in the show.

This exhibit is one of eleven similar displays now traveling about the country. Last year the show toured nearly 200 cities and was exhibited at universities, colleges, public libraries, and museums. It is estimated that more than two million persons will view this year's show.

The competition is judged in twenty categories, covering different fields, of photo-journalistic work, most of which are represented in this exhibit by a selected group of pictures.

### Bennett Plans Talk

Dr. W. H. Bennett, Burlington Professor of Physics, will present a seminar on "The Epitron — A High Yield Machine" on Wednesday, 7:30 P.M., January 10th, in the Reactor Observation Room. Those interested are cordially invited to attend.

### Apartments Planned For Coeds

By Cora Kemp  
Dr. Key L. Barkley, professor of psychology at State College, has announced plans to open a new apartment development for State College coeds.

The apartments will be completed and ready for occupancy by second semester and will accommodate thirty-two girls. State College provides no facilities

for coeds on campus. This will be the first building in Raleigh maintained primarily for them.

The development is a two-story brick building located at 2208 Garden Place, two blocks from campus.

Each floor consists of two separate apartments and will be occupied by eight girls. Each apartment has a large living

room joined by a dining room and a kitchen in addition to four bedrooms, two complete baths, and one storeroom.

Every room is completely furnished to meet the students' needs, including the kitchen. Each apartment will have its own telephone. Also, quarters for a house manager are provided in the basement.

Dr. Barkley stated that the building will be rented by apartments rather than rooms. "It is desired to have groups of eight compatible girls to rent each apartment. These groups are being formed now," he said.

Over a period of two years, Dr. Barkley surveyed the city of Raleigh to determine the needs of single women and coeds in this area. He found such facilities to be extremely limited. It was then that he decided to construct his unique and expensive new building.

"There is no other building like it," noted the professor. "It is unique in every respect and I am pleased with it. I am opening it first to State College coeds and hope that they will take advantage of it."

This partially completed apartment development will be ready to furnish living quarters for thirty-two State College coeds by second semester. The building is located two blocks from campus.

### M & O Strikes Oil

Well friends, they're at it again! The M & O gentlemen have undertaken another gigantic campus improvement project as shown above. The monster rising near Harrelson Hall, an enigma to most students (and several M & O employees), has been called everything from a new smokestack to an oil well!

(Photo by Justice.)

## The Coming Fight

The life of a State College tradition may be drawing to an end. Administration and faculty officials have discussed the possibility of abolishing the final exam exemptions for graduating seniors with grades of "B" or better.

The whole thing started last spring when the Faculty Senate adopted as a recommendation to the chancellor the idea of moving commencement to the end of exam week. The suggestion about forgetting A and B seniors which had been supported was somehow lost in the shuffle when the administration approved the commencement proposal. Some of the faculty members were therefore indignant when they discovered no change in exemption policy this winter. The administration will probably right this "wrong" at the first opportunity.

Indications from Holladay Hall have been to the effect that student opinion in this matter of academic concern is scarcely needed. It is presumed that scholarly considerations are of more merit than the whims of a transient student population; this might well be true.

But has there been scholarly consideration in the Faculty Senate and have the results of this decision been correctly conveyed to the administration? This is the area of debate which offers the most hope for tradition defenders.

Student Government, at its last meeting, learned of the proposed action and immediately resolved to do its part in presenting all sides of the issue to the man who makes the decision.

Our newspaper has as one of its prime missions the exchange of information. In the coming weeks it is hoped by this staff that our facilities may be well used in presenting all sides of the question. *The Technician* is a student newspaper; it exists, however, to serve all members of the State College community—faculty, staff, and students.

The opinions of this newspaper, expressed editorially, have always been merely the thoughts of the writer. We refuse to back up automatically the arguments of either our fellow students or of the sponsoring administration. It is hoped that the editorial comments are based on associations with both groups and are at least somewhat removed from prejudice.

Of course, it has been said before—this is a student newspaper. Our opinions could hardly be anything but student opinions. Perhaps our arguments will also be filed in Holladay Hall under "T" for Troublemakers.

Everything the administration does is not right. Everything the faculty does is not right. And we will further admit that not everything the students do is completely right. Nevertheless, State College students have in most cases been denied a true partnership in the educational process. It might not be altogether wise to ignore completely the sincere feelings of some of the students who may not be totally ignorant.

—WMJ

## Big Deal

### Comments On Twist

(This editorial appeared recently in the *News and Observer*.)

You can't avoid "The Twist" any more than you can the tremors of a cyclone. The constant repercussions churn butter and slosh water buckets in remote places. Half the town looks as if it is stuck in glue and is trying to wiggle loose and the other half seems to be taking musical therapy for severe rheumatism.

But this devastating national sensation is merely an old wrinkle with a new twist. If you look through the popping vertebrae you will see "The Twist" is only the "Shimmy" with a new set of spinal detours. The "Shimmy" was a bowl of jelly on a wind-tossed platter and "The Twist" is more dambson preserves suffering from the big jitters.

Obviously, both silly-dillies stem from the Hindu snake charmer and his needle-threading serpent. Some "Twisters" are flowers growing from the ground in prodigious flourishes, stretching, straining and yawning. Others are glow-worms in a room filled with striking matches. And it is rather appalling, just as we elders declare. It certainly lacks the stately grace of the Bunny-Hug, the Turkey Trot, the Camel-Hop, the Charleston, the Black Bottom and the Big Apple and those

other pristine patterns so beloved by us staid exponents of impeccable decorum.

(The student newspaper at Pfeiffer College produced this article.)

Pfeiffer students can now officially "twist" to their hearts' content.

The following is an excerpt from the official Student Government notice concerning the "twist":

"On Wednesday, November 29, a discussion was held dealing with the decision on banning the 'twist'. At the meeting a committee was appointed to re-evaluate the resolution and present a definite proposal for change on December 6.

"This committee presented the following motions which were unanimously adopted by the Student Council on December 6:

- (1) The previous motion banning the "twist" be nullified.
- (2) Dancing will be allowed on Pfeiffer campus without criticism unless the participants show a lack of decent morals in their dancing.

"We as students appreciate the fact that the leadership of Pfeiffer College allows us to dance on our campus and it is our desire not to do anything that will jeopardize this privilege."  
Ed. Note: And we thought we had problems.

(This column appeared under the headline "Way Out . . ." in the February 12, 1959, edition of THE TECHNICIAN. It is one of several classic works by John Cocks, '59.)

Professor Moore asked them again. It was the second time. "Come now, gentlemen," he said. "Who has an idea as to the central theme behind *Catcher In The Rye*? Surely there must be someone. . . ." No answer. Everybody glanced around the room as if they had never heard him. Someone coughed.

Dr. G. J. Moore, Associate Professor of English, turned and gazed silently out the window. He looked at the cold winter rain and shivered as he thought of the intangible one that dampened the classroom.

Well what the hell, he thought. Nobody wants to know anything about that. Then he spoke. He said, "Well if you don't know, I guess I'd better tell you."

So he did. He told them all about the implications in the story and explained very patiently how he had known what to look for and the process that one might use in digesting the data. But no gleam of intelligence crossed the students' faces, no look of enlightenment brightened their eyes.

He dismissed class early and walked slowly back to his office, depressed and amazed. His

## Crit

office-mate was there. "Hello, Whitesides," he said.

"Oh, hello, Bill. How was class?"

"Not so good. I feel pretty bad about them. I can't get anything out of them at all. They just sit there not saying anything," said Moore.

"This is a new thing? All mine have been like that for years now." He paused and then went on slowly. "I wish to God I had a Ph.D., as you do. I'd get out of this place fast. I've hated it for a long time now."

"Well I don't know," said Moore. "It would be a lot better if those plans for granting liberal arts degrees come through. They've been quite hopeful about it, you know."

"They've been hopeful about it for years now, but nothing ever happens. Lots of talk, but nothing really happens."

"Maybe so, maybe so. Tell you what . . . Why don't we start writing some other schools. Anything but this disinterest. I can't stand it."

"Yes, Bill, it would really be wonderful to teach some enthusiastic students for a change. And to be able to follow a man through four years of college and watch him develop under your instruction! Now that would be rewarding. . . ."

At this moment a student ambled slowly into the room. They observed the slide rule that swung from his belt and the grass stains on his plaid shirt. "Professor Moore," he said, "I'm looking for Professor Moore."

Moore raised his hand. "Here I am," he said. "What's on your mind, Mr. Spivey?"

"Oh I'm sorry. I didn't recognize you. Well, what I wanted to say was would you like some criticism on your course. You know, constructive."

"Why certainly," he answered.

"Well I don't think you're slanting the course the right way. We're mostly future engineers, and me, I just can't quite get interested in all this interpretation mess. I mean it's all so vague."

"Yes, I can see how it might be to the technical mind. But what can I do? My job is to teach English."

"Yes," said Spivey. "But there's one thing you haven't covered yet I would like to see some of."

"And what might that be, Mr. Spivey?"

He paused and thought for a minute. Then he said, "One thing. What are the engineering applications of literature?"

Moore looked amazed and then burst into a bitter peal of laughter.

### Course Repeaters

Every student repeating a course for credit this semester should secure from his department office a special IBM card (Course Repeat Card) for each course being repeated, complete it and bring it to the Registration Office, 12 Holladay Hall. Unless the card is completed and turned in, the grade-point average shown on the semester grade report will not be adjusted to reflect the grade substitution.

# 4 Teams Resume Action Sat. Night

By Richie Williamson  
Sports Editor

North Carolina State's athletes return to action in three sports this Saturday night after a two week layoff for the holidays. However, all the action will be away from the Raleigh campus. The basketball team invades Duke University, the swimming team travels to Virginia, and the wrestling team will be hosted by North Carolina.

The State eagles with a 2-1 mark will try to upset the favored Blue Devils of Duke who carry a 9-1 record and rank seventh in the nation. The Pack are very capable of stopping All-America Art Heyman with his 28 point average. Last

year, John Pungler was effective in stopping Heyman as State upset Duke 60-59.

Leading the Pack offensive will be Jon Speaks with his 18.7 average for the three games. Speaks is the nation's leading free throw shooter with 18 out of 18. Pungler is the leading rebounder with an 11 per game average and 14 points for each contest.

The State freshman team will also play Saturday against the Duke frosh at 6:15. The Wolflets will also be in action on Monday night at Reynolds Coliseum as they play host to the Tar Babies of Carolina at 8:15.

(See FOUR TEAMS, page 4)

# Water Polo Anyone

A new sport will begin on the State campus this coming week when water polo returns after several years absence. The physical education department is sponsoring a program that will serve to instruct in the fundamentals of water polo and create competitive interest in the sport.

The first call for all who have any interest in learning to play water polo is slated for Monday night at 7 o'clock in the new swimming pool. Previous experience in the sport is not necessary as the program is set up to provide training for everyone.

The coach of this new endeavor will be George L. Brodmann, a highly experienced water polo player. Brodmann, a Hungarian freedom fighter who came to this country in 1956, was a member of the national

team of Hungary for 15 years. After coming to this country he was a member of the New York Athletic Club team which won the national championship in 1959.

Workouts will be held three times weekly. The times for these sessions are Monday and Wednesday nights from 7 to 8:30 and Saturday afternoon from 12 to 2. Participants may come to the pool at any time during these hours.

Brodmann stated "Since this is the first time this new sport has been played on this campus, we probably will not have many people with experience. I invite anyone interested to come to the practice sessions where the basic principles of water polo will be taught. Everyone come and bring their swim suit for Monday night."

# Sports Minded Cop Stops State Student

North Carolina State fans who display Wolfpack stickers on their cars and who drive slowly through Fanwood, N. J., are liable to be stopped by the local police. At least that's what happened to State student Steve Juncker when driving through Fanwood on his way home to Leonia, N. J., for the holidays.

Juncker was preparing his alibis as he was signaled over to the curb by the Fanwood patrolman. "But officer, I didn't break any laws. I wasn't speeding, didn't go through a red-light or stop sign, and didn't hit a pedestrian," Juncker told the nattily attired, but stern looking patrolman.

"You're from North Carolina State, aren't you?" asked the patrolman as he looked over the Wolfpack stickers and decals plastered on the windshield and windows of Juncker's car.

A polite "yes sir" was the reply.

(See STUDENT STOPPED, page 4)

# State Athletes In Bowl Games

State College's football players have been showing up well in past season bowl games throughout the country. The school has been represented by four players in four of the different all-star games. Two of the players, Roman Gabriel and Fran Palandrani, were selected to play in two of the contests while Tom Dellinger and Nick Maravich each have been selected for a game.

Dellinger and Palandrani will be seen on NBC television this Sunday in the first annual U. S. Bowl to be played in Washington, D. C. This game matches the NFL draftees of the Eastern Conference against the Western Conference. Palandrani is a Cleveland Brown choice while Dellinger, although not selected in the NFL draft, was thought good enough to deserve a bid to the game.

Gabriel, who just finished playing in the East-West Shrine game, will also be playing Sunday in the Hula Bowl in Hawaii. Gabriel will also be honored by the Filipino Health Club in Hawaii as being the first foot-

# THE TECHNICIAN

January 4, 1962

ball player of Filipino descent to be selected as an All-American.

In action this past Saturday, Maravich and Palandrani helped the Grey team to a 9-7 win in the Blue-Grey game in Montgomery. The two teamed up as the middle guards on defense to make over half of the tackles in stopping the

Blue's running game. Although the East lost to the Shrine game, it was no fault of Gabriel. He connected on 11 of 19 passes for 106 yards and carried the ball five times for 46 yards. He passed for the East's only score and had another pass dropped in the end zone by Maryland's Gary Collins.

AN EQUAL OPPORTUNITY EMPLOYER

## Four Teams

(Continued from page 3)

The State tankmen will defend their 2-1 record against the Virginia swimmers in Charlottesville. The team is expected to have no trouble in making a rout of the contest. All-American Pete Fogarasy and Ed Spencer and record-breakers Bill McGinty, Smoky Ellis, and John Wilcox will lead the way against the Cavaliers.

The wrestling team will be seeking its first win of the season as they grapple with the Tar Heels. They have lost their first three matches but have improved greatly, losing their last two by close scores. The team lost one match this year when heavyweight Paul Jaeger broke his ankle and had to forfeit. The rest of the team will be in fine shape to try to grab their first win.

## Notices

The last intramural basketball officials clinic will be held at the gymnasium on Wednesday, January 10, at 5 o'clock. Officials are needed to call basketball games five nights a week with pay of one dollar per game. Anyone who can officiate on any of the nights are urged to attend the clinic. Persons not attending one of the clinics will not be permitted to officiate games.

Team captains who wish to enter basketball teams in either the open league or the wild card league are urged to do so before the end of this week. Play will begin in these leagues next week.

## Dept. Head Retires

(Continued from page 1)

"In the history of the entire library there has not been a person more warmly devoted than she has been to the tasks of increasing the library's resources and of improving the efficiency of its operation. To these ends she has labored with extraordinary intelligence and splendid enthusiasm, and often to the extent of personal sacrifice.

"The whole college is indebted to her. I am sure that most faculty members share my own appreciation and very high

until the Faculty Senate recommendation was on his desk in the formal form. The Chancellor further stated that he will gladly consider any student opinions and recommendations concerning the matter in making his decision.

## Student Stopped

(Continued from page 3)

"Well, I just wanted you to know that you are passing through Joe Scarpati's hometown," cheerfully said the policeman.

Scarpati, as Juncker well knew, is State's star sophomore halfback on the Wolfpack football team. Joe, named to the Atlantic Coast Conference's all-academic team and to the all-State team, was a top defensive back. He also averaged 3.8 yards rushing and caught 14 passes for 150 yards and two touchdowns this year.

Joe and State have some ardent and influential supporters in Fanwood, N. J.

## Bowers

(Continued from page 1)  
will concentrate on the College Union Programs as such, and will assist Mr. Bowers in the promotion of college-wide social-cultural affairs."

According to Mr. Banks C. Talley, director of Student activities, the new programs of the College Union will be similar to the friends of the college program, ranging from classical music to jazz, but no definite plans have been made at this time.

The appointments, which will become effective on

February 1, have been approved by both Chancellor Caldwell and by William C. Friday, President of the Consolidated University.

Mr. Bowers is a 1962 graduate of the University of North Carolina, and holds a M.A. degree from Columbia University earned in 1956. Currently he is working toward his Ph.D. degree at UNC.

Mr. Heaton is a 1940 graduate of St. Lawrence University. In 1949, he received his O.D. from Southern College of Optometry. In addition, he has studied higher accounting. Currently Mr. Heaton is Treasurer of the "Friends of the College, Inc."

## An Invitation to Opportunity-Minded Graduates:

## MATCH YOUR INTERESTS AND TRAINING TO EXPANDING CAREERS AT CELANESE

Exceptional and continuing growth at Celanese opens up wide areas of opportunity for college graduates. We want aggressive young people with science backgrounds to keep us ahead in our research and development programs that bring chemistry to the markets of the world.

We also want people with backgrounds in advertising, sales, business administration, accounting—opportunity-minded graduates who will help us to continue to grow and who will grow with us.

Celanese has established its world-wide reputation by concentrating on the research, development and sales of chemicals, polymers, plastics and fibers. We're particularly interested in business-minded scientists and science-minded businessmen. Your future is your own to make—you'll go as far as your

ability will take you. There are no artificial road blocks.

Celanese plants, laboratories, and sales offices are located throughout this country. Wherever you work, you'll enjoy major medical benefits, company paid life insurance, generous vacations and, above all, opportunity.

To find out more about a career at Celanese, contact your college Placement Office for specific information, or write us directly, outlining your interests, academic background and—where applicable—your experience. Please direct your inquiries to the attention of our Personnel Manager at the address nearest you: Celanese Corporation of America, 522 Fifth Avenue, New York 36, N. Y.; P. O. Box 1414, Charlotte, North Carolina; P. O. Box 937, Pampa, Texas.
