Will Cost \$2 Million

College Announces Plans For New Dormitory

Bids will shortly be let on a new nine story State College dormitory estimated to cost about \$2,150,000.

Student Housing Director N. B. Watts disclosed Friday that bids on the new facility will be taken in two to three months.

"It is hoped that Dorm 62 will be finished by September, 1963," said M & O Director J. McCree Smith.

The new dormitory, to be located behind Bragaw Dorm, will accommodate 808 students, according to Watts. Dorm 62 will have suites much like those in Bragaw and have such facilities as Student Supply Store services, trunk room, and a laundry room located on the ground floor. It will also be equipped with elevators which will stop on every other floor.

Owen Finally Gets Host and Hostess

For the first time this year, Owen dormitory has a host and hostess.

On February 10, Mr. and Mrs. Clayton E. Posey assumed that position, which has been vacant this year.

Mr. Posey, a doctoral candidate in Forestry, comes from Oklahoma State College, where he obtained a B.S. in Forestry. Age 23, Mr. Posey has worked with the Forest Service in both Colorado and Arkansas.

The plans for Dorm 62 were not affected by the defeat of the recent bond issue, as a loan from the Federal Government had already been arranged. However, plans for two other nine-story dorms had to be postponed indefinitely as a result of the November '61 failure of the bond issue.

YMCA Named Location Of Publications Office

Plans to move State College's three student publication activities to new offices in the basement of the King Religious Center were announced last Friday by the College's Planning Office.

"The plans for the offices have been submitted to M&O director J. McCree Smith for approval and estimates, and it is hoped that construction will begin in the near future," said Charles Woodall of the Planning Office.

This new area, formerly occupied by the Student Supply Store, will house the offices, work areas, and darkrooms, of The Technician and Agromeck, and the studios, control room, and offices of WKNC, the student radio station.

The plans, as they now stand, call for 996 square feet of space for The Technician, 1,012 square feet for the Agromeck, and 1,216 square feet for WKNC.

The Technician and Agromeck work areas will be partitioned, and the walls will reach the

SG Takes Exemption Poll; Jordan Named Secretary

By Mike Lea

Jack Jordan, the former chairman of the Student Legislature Elections Committee, was elected secretary of the Student Government at its last meeting.

A poll of members of the college community concerning the senior final examination exemption question

was also announced at this meeting by Student Government President Norris Tolson.

Jordan was elected by a majority vote of the student legislature to fill the unexpired term of John T. Kanipe, who graduated at the end of the semester. Kanipe is presently enrolled in the State College Graduate School, but Student Government regulations stipulate that any officer must be an undergraduate.

Jordan is a junior majoring in forestry and has been a member of the Student Government, the Military Ball Association, and other campus activities. Senators John Carr and Bill Isler were also nominated for the position. The Student Government Constitution requires that a vacancy in the

executive department be filled by a senator in the Student Legislature by a majority vote of the other senators.

The poll concerning the senior exemptions is to be taken this week. Special forms will be passed out to all dormitories and fraternity houses and placed in different locations over the campus so that student

opinion may be diagnosed.

At the meeting, Tolson also announced that he had sent a letter to Dr. D. D. Mason, the president of the Faculty Senate on the exemption question. He stated that he had asked Dr. Mason to send the Faculty Senate resolution on exemptions back to the committee which originated it.

ceiling in the radio studios and darkrooms. There will also be tile floors and air conditioning if the plans are approved as they stand.

Campus Crier

The AIEE-IRE joint student branch will meet Tuesday, Feb. 13 at 7 p.m. in 242 Riddick. Mr. K. J. Kurz, Administrator, Manpower Planning and Proposals, Government Services Personnel, R.C.A. Service Company, will speak on Field Engineering.

The American Institute of Physics and the American Nuclear Society will hold a joint meeting February 13, at 7:00 p.m., in Room 230 of the College Union. Mr. Warren C. Lyons from Martin Aircraft Co. will be the speaker. All physics and Nuclear Engineering students are urged to attend. Refreshments will be served.

(See CRIER, page 4)

New Gymnasium Needs Repairs; Gets Them Free

By Grant Blair

The results of one semester of wear have left the new gymnasium in need of minor alterations.

According to Paul H. Derr, head of the Physical Education Department, the handball and squash courts and the swimming pool are presently being repaired.

The squash and handball courts are being replastered. The courts had a number of cracks in the plastered walls. It is believed that the plaster had been weakened due to changes in temperature when it was applied. The replastering is now proceeding under controlled temperature conditions.

The swimming pool has also been undergoing repairs. It had been found that the ground had sunk under one of the drainage pipes, causing the caulking around the pipe to loosen. The leak is presently being repaired by the contractor.

Derr stated that "remedial work on a building of this size and type is not an unusual thing. It's similar to buying a new car or a house; things usually need adjusting until everything suits your taste." He also pointed out that these repairs are the contractor's responsibility and are made at no cost to the College.

Applied Math Prof. Writes Textbook

"Nonlinear Differential Equations" is the title of a new mathematics textbook written by a State College professor.

Dr. Raimond A. Struble, professor of applied mathematics (See TEXTBOOK, page 4)

Gov. Sanford To Speak At Ag Council Meeting

Governor Sanford will address a meeting of the Agriculture Council here February 27, according to Cleo Robertson, president of the Council. It is expected that 200 to 300 students will attend the meeting, Robertson said.

The meeting, which will begin at 7 p.m., is to be held in the College Union ballroom. All agriculture students are invited.

The Agriculture Council is the governing and co-ordinating

body for student organizations in the School of Agriculture. It consists of two representatives from each of the student organizations in the School of Agriculture. Each year, the Council sponsors a barnwarming and an Agriculture Day. In addition, the Council is the voice of agricultural students in all matters concerning their school or the college.

Cleo Robertson is the current president and David Stradler is vice-president.

Fireworks Injure Student

By Curtis Moore

The injury of a State College student by a cherry bomb here last Tuesday evening drew a stern warning from Director of Student Housing N. B. Watts.

James Miller Whisnant, a chemical engineering sophomore, returning to his dorm after the State-Duke game Tuesday, February 6, was injured in front of Alexander by a cherry bomb.

The bomb, thrown by persons

unknown, landed between Whisnant's jacket and body. Whisnant was taken to Rex Hospital, where he was treated for minor injuries and released.

Concerning the incident, Watts said, "If this firecracker had been a foot or two higher, it could have put the boy's eyes out or seriously injured him. I must say again that any incidents will be reported to the Campus Code Board and the guilty individual punished."

"Meet The Prof" Features Murray

By Cora Kemp

"Everything I've ever heard about actors or television personalities being nervous is certainly true," according to Dr. Raymond L. Murray, head of the Department of Physics. He will soon be seen across the nation on the ABC-TV program series "Meet the Professor."

Dr. R. L. MURRAY

Miles and miles of electronic cable appeared on the State College campus last Friday afternoon as WUNC-TV and WRAL-TV technicians prepared the Burlington Laboratory as the site for the seventh in a series of twenty-five programs on professors to be telecast this year.

Everyone connected with the program was required to wear a badge which checks radio-activity.

The program will feature a special shot of the inside of the reactor in operation. Twelve technicians worked two days arranging this one scene which required a large mirror to be placed above the reactor. Their first attempt failed when they broke the mirror.

Dr. Murray is one of five professors to represent the South in the series. He was chosen

from more than fifty well-known instructors in this area who were personally interviewed by the television personnel.

The half-hour program will appear on about 75 ABC-TV stations next Sunday afternoon at 2:30. WUNC-TV, Channel 4, will feature the program locally at an unannounced date.

Dr. Murray will be shown first in his office as he interviews Charles E. Siewert, one of his graduate students. Then the scene will switch to the classroom where Dr. Murray lectured on nuclear physics and nuclear engineering. About 35 State students appeared voluntarily as the audience.

Several ABC-TV officials, including producer Harry Rasky from New York and director Robert Delaney, were on hand for the production. Delaney, formerly of Winston-Salem, was a State College Electrical Engineering major in 1945-48.

Symphony Orchestra To Play Here Tues.

The National Symphony Orchestra, pictured above, will be featured Feb. 20 under the auspices of The Friends of The College. Miss Birgit Nilsson will appear as a guest soloist with the orchestra.

The Symphony has appeared before an estimated 450,000 people. Last summer it toured more than 19 Central and South American countries on a good-will trip.

A Double Victory?

There is more to being a gentleman than owning a blue blazer. If one is fortunate enough to be wearing such a garment, people might tend to think he is a pretty sharp fellow. In many cases, however, this is not true.

Take as an example some of the students at nearby Chapel Hill. When the Tar Heels played host to the basketball team from Wake Forest recently, the actions and attitudes of the home fans, blazer-clad or not, could hardly have been those of gentlemen and ladies.

At one point in the game a Carolina player deliberately fouled an opponent to prevent a basket. In the heat of the moment, the contact was excessively rough, and the other player could easily have been injured.

This type of incident happens frequently in close games, and reference to this particular act is not designed to censure the player involved. The Tar Heel fans, however, were proud to cheer this and other examples of poor sportsmanship on the court.

Carolina will have an opportunity to improve its record Wednesday, when the Wolfpack cagers meet the Heels in the Coliseum.

Changes will occur not only in the conference standings, but also the sportsmanship ratings for the two schools. The teams are doing all right, but the fans from both schools have compiled poor records thus far this year.

Let us not overlook the deficiencies in sportsmanship which exist here at State College; our reference to Chapel Hill merely points out that the problem is felt elsewhere. The number of times that other players, officials, and even our own players have been booed by home court fans at State is not pleasant to recall.

A lot of attention will be focused on the game Wednesday; because of traditional rivalry and recent scandals, both schools will be on public trial to see whether the athletic programs can be extended or should be curtailed even further.

Whether you are wearing a blazer to the game or not, take pride in defeating Carolina in two ways—sportsmanship and points. Both victories are important.

Nice Throw, Kid

A State College student almost lost his eyesight last week. While walking home from the basketball game, the man received a direct hit from a cherry bomb which exploded no more than three feet from his face.

The student was released from Rex Hospital later with no permanent injuries.

The man who threw the cherry bomb for a bit of fun is not known. He must be intelligent, big, strong, and brave.

Although accustomed to pounding nothing more formidable than an old typewriter, I would like to meet the child.

Entered as second class matter, February 19, 1920, at the Post Office at Raleigh, North Carolina, under the act of March 3, 1879. Published every Monday, Wednesday, and Thursday by the students of North Carolina State College except during holidays and exam periods. Subscription rate is \$4.00 per school year.

SG President Discusses Sportsmanship At Games

For some time now, N. C. State College has fielded some of the finest athletes and athletic teams found anywhere in the country. It is to the further credit of this school that, for the most part, the conduct and sportsmanship of N. C. State students attending athletic events have been reasonably good. It is with these ideas in mind that I write this letter to the Student Body.

During recent basketball games in the Coliseum, the conduct and manners of some of our students have left a great deal to be desired. It is commendable to see the spirit so high at games, however this is certainly no excuse for being rude to our guests, the visiting team and its coaches. I strongly advocate a high level of school spirit, but I feel that this spirit should be tempered with good manners in order for it to be a wholesome kind of spirit. It

should be the desire of all students to have N. C. State recognized for its good sportsmanship as well as its winning teams. This goal can be achieved only by extending the proper courtesies to visiting players and our other guests in the Coliseum.

I do not intend to dampen enthusiasm at our ball games, but I do feel that the time has come for N. C. State to take the lead in improving the atmosphere at basketball games that tends to generate unsportsmanlike conduct. After our victory Wednesday night over the University of North Carolina, each of us can feel doubly proud if we have been graceful winners instead of rude ones. So, I urge each and every student on this campus to use his best manners at future events, so that we may become known not only as the best team but the best-mannered school in the conference as well.

E. Norris Tolson

Letter To Editor

Poor Profs Condemned

To The Editor:

I want to comment on your editorial "Wasted Words" in the Jan. 10 issue.

You stated that classroom teaching at State College is virtually unsupervised, and that this is an ill of our system. Please print my wholehearted agreement. I believe that a student movement is in order here to rid our school of some of the uncaring faculty members. They are few, mind you, but one in such a position seems like many. I don't believe we are that short of professional educators. It's not the intellectually incompetent about which I speak. It is the lazy, non-caring person who maybe did choose the educational field to escape work and responsibility. It's those who think more about justifying their own actions than finding the true answers and dedicating himself to helping the student who is here for no other reason than to learn.

The faculty should be monitored, and his progress watched, just as closely as the student, if not more so, because the leader can do harm to others, whereas the student can only harm himself, by laxity.

Please do not take this as a "hate professor" campaign on my part. The competent and earnest ones get a show of appreciation from the thoughtful student. Some of the faculty seems to take the attitude that if the whole class is treated alike, whether good or bad, then we're relatively no worse off. This is a very poor argument, whether stated or only implied.

Maybe the faculty leaders should conduct classroom polls, as has been done regularly at some schools. The testing and grading procedure should be just as closely monitored as the lecture method, as some seem to give the type quiz which is

most easily graded, rather than the one which is most comprehensive.

I salute the worthy of our faculty, and I don't believe they need to be told who they are—even if I knew them all and were allowed to judge.

I disagree with you that we should not have quizzes the week before finals. We should have quizzes that week by rule. We'd be that much better prepared for finals. And, don't you agree (Now let's face it) that many of us would rest (loaf) that week, had we no quizzes.

Bob Shields

It All Depends

A New Yorker boarded a Greyhound bus in Butte, Mont., and politely asked the driver if smoking was permissible.

"Mister," he replied, "this is Montana. If you've got two good fists, anything is permissible."

YMCA To Sponsor Discussion Groups

By Eddie Blackford
The YMCA has some of the best bull sessions on campus.

Sometimes they eat and then just listen. Sometimes, in small groups spotted around the campus, they discuss Red China, Vietnam, Berlin, and Iran. Sometimes they just sit around the lobby and chat. "They" are the students and faculty members who study, discuss, and argue among themselves in some of the liveliest talk-fests on campus.

One of the groups will participate in a "Great Decisions" program. Beginning this Wednesday, students armed with non-partisan material supplied by the Foreign Policy Association will get a chance to let their own ideas be heard. These groups are going to discuss everything from "Is Berlin a test of Allied unity?" to "Is the United Nations an independent force?" However, the students are not going into these discussion groups with little or no information for the material given to them to read and study gives a good picture of what is going on at the present time in the areas they plan to discuss.

Another group to be initiated this semester is a Freshman Diners Club. This club which will hold its first meeting this Tuesday has been formed to discuss the interest of freshmen at State College. The program for the Diners' Club will be a panel discussion by three faculty members to help air out some of the problems that freshmen run into. Dr. Raymond Murray, Head of Department of Physics, Dr. Robert G. Carson, Jr., Director of Instruction of the School of Engineering, and Dr. C. Horace Hamilton, Professor of Rural Sociology, are just a few of the

faculty members to be in on the panel discussions.

Two old and continuing "Y" projects are the Oasis Society and the Apollo club.

The Oasis Society provides students with an opportunity for volunteer service to help others. The places that Oasis Society members are helping are the Catholic Orphanage, the School for the Blind, Dorothea Dix State Hospital, Central Prison, and Joe Lewis Park. An earlier Technician article gave a full report on the work of the Oasis Society.

The Apollo Club, which meets only in the fall, is an eating club that meets to hear national figures discuss current topics in any field. The overall topic discussed last fall was, "The Welfare State—What it is and my opinion of it." Some of the more colorful speakers last fall included I. Beverly Lake and Har-

Gators Nip Swimmers; UNC Here Wednesday

Fogarasy, Spencer Set School Records

The University of Florida swimming team edged the State tankmen 51-44 in one of the most exciting dual meets of the season last Friday night in the State natatorium. It was the second loss of the season for the Wolfpack and ended a seven meet winning streak. Florida boosted its record to eight wins without a setback and ended a three-day tour in the Carolinas with three successive wins over North Carolina, East Carolina, and State.

The State swimmers are now preparing for their last conference meet of the season against North Carolina on Wednesday afternoon at 4 o'clock in the home pool. Carolina has fielded a strong team this year, losing only two meets. Both of these losses have been to the same teams that have defeated State this year, Maryland and Florida. The top man for the Tar Heels is backstroke Thompson Mann who set a new conference record in his event this year.

The losing cause for State

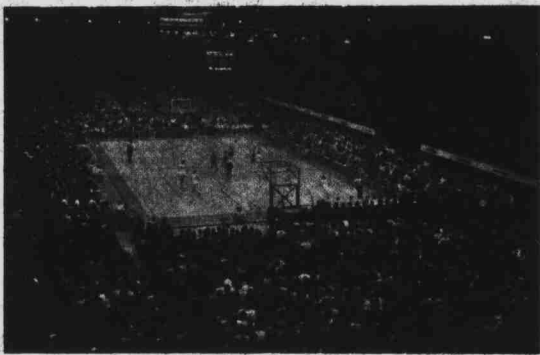

was highlighted by two new school records set by Pete Fogarasy and Ed Spencer. Fogarasy eclipsed his own school record in the 200-yard individual medley with a time of 2:10.3 in beating Florida's Eddie Reese, an all-SEC performer. Fogarasy also easily won his specialty, the 200-yard breaststroke, to be a double winner.

Spencer was also a double winner in the 220 and 440 yard freestyle events and swam the anchor laps of the winning 400 yard freestyle relay. He set a new school record in the 220 event with a time of 2:06.6, beating the old record held by Frank Naus by two and a half seconds.

Bill McGinty was the other winner for State, winning the 100 yard freestyle event. He was also in the relay event along with Spencer, John Wilcox, and Smoky Ellis.

Florida built up an early point lead with a victory in the 400 yard medley relay and the first two places in the butterfly and diving events. All-America diver Steve McBride performed excellently while becoming the first diver to total over 300 points in the State pool from the 3-meter board.

State-Carolina Tilt Slated

The capacity crowd at the State-Duke game last Tuesday. Another such crowd will be on hand Wednesday to witness the State-Carolina clash.

Phi Taus, Sig Eps In Bowling Finals

The finals of the fraternity intramural bowling championships are scheduled tonight for nine o'clock at the Western Lanes with Phi Kappa Tau, the defending champions, squaring off against Sigma Phi Epsilon for the title.

Both teams were tops in their sections over an eight-week regular season with the top three teams in each section qualifying for the playoffs. PKT gained the finals by stopping Delta Sigma Phi after drawing a first round bye. SPE reached the finals in the same manner, winning its semifinal match from Lambda Chi Alpha.

Leading the way for the Phi Taus will be Terry Phillips, the league's second top bowler, and Percy Scarse. However, they will be without the services of one of their top men, Jim Skidmore. The Sig Eps feature a well-balanced team led by Bill Grant and George Setzer.

In intramural basketball the fraternity sections have reached the halfway point

in their six-game regular season play. The top two teams in each of the four sections will qualify for the playoffs to be held in the first part of March. The starting of the handball

Pi Tau Sigma Inducts Top M E Students

Those students running around the State campus wearing railroad engineers' caps have been given the highest honor accorded to a mechanical engineering student, membership in Pi Tau Sigma, National Honorary Mechanical Engineering Fraternity.

Recently the fraternity held its induction of pledges and those inducted were: Hubert Michael Collins, Winston Salem, N. C.; Thomas Clay Dellinger, Thomasville, N. C.; Frank Taylor Hart II, Raleigh, N. C.; William Dewey Jackson, St. Pauls, N. C.; Olin Jarrett Jr., Marshall, N. C.; Mariano Molina, Camaguey, Cuba; Harmon Lindsay Morton, Charlotte, N. C.; James Edward Peterson, Jr., Raleigh, N. C.; Charles Clifford Randall, Falcon, N. C.;

Robert Gene Rouse, Magnolia, N. C.; Robert Carlton Steljes, Wilmington, N. C.; Thomas Williams Stephenson, Benson, N. C.; Edward Shermer Todd, East Bend, N. C.; Harry Clifton Tune Jr., Morganton, N. C.; and John Roland Yow, Seagrove, N. C. Following the initiation ceremony the annual fall banquet was held at the Imperial House in Glenwood Village.

Membership in Pi Tau Sigma is the highest honor that can be obtained by a mechanical engineering student in his field. He must maintain a very high scholastic average in order to be eligible for membership. This is by no means the only requirement, for selection is also based on social adaptability, honesty, personal cleanliness, and neatness.

Design Publication Released

"Theme Center For A World's Fair—Two Surfaces of Revolution" is the title given to the latest volume of the Student Publications of the School of Design, just released Tuesday.

This new volume illustrates rather than tells of a design for the main building of a world's fair, and

presents technical drawings of tori and hyperboloids.

The volume is free to all students of the School of Design and is priced at \$1.50 a copy for anyone who is interested in purchasing a copy. They may be purchased at the Design School Office in Brooks Hall.

Textbook

(Continued from page 1)

matics here, is the author of the book being published this month by McGraw-Hill Book Company, Inc.

His text is designed for a one-semester, advanced undergraduate or beginning graduate course.

Dr. Struble, a member of the faculty since 1958, received his Ph. D. degree from the University of Notre Dame. Prior to coming to State, he was a member of the faculty at the Illinois Institute of Technology. Dr. Struble has also been an aerodynamicist for the Douglas Aircraft Company.

Case Dismissed

My 80-year-old grandmother, who drives a car like a cowboy, prides herself on never having had to pay a fine. Recently she almost spoiled her record. Sailing through a stop sign, she was halted by a policeman. Before he could write out a ticket, she insisted on going to court.

The young judge looked at Grandma and said she had no business driving at her age—this was obviously a case of poor eyesight. With that, Grandma pulled a sewing kit out of her purse, threaded a needle on her first try and handed it to the judge. "Your turn," she said. He failed. The case was dismissed.

THE MANY LOVES OF THORWALD DOCKSTADER

When Thorwald Dockstader—sophomore, epicure, and sportsman—first took up smoking, he did not simply choose the first brand of cigarettes that came to hand. He did what any sophomore, epicure, and sportsman would do: he sampled several brands until he found the very best—a mild, rich, flavorful smoke—an endless source of comfort and satisfaction—a smoke that never palled, never failed to please—a smoke that age could not wither nor custom stale—a filter cigarette with an unfiltered taste—Marlboro, of course!

Similarly, when Thorwald took up girls, he did not simply select the first one who came along. He sampled. First he dated an English literature major named Elizabeth Barrett Schwartz, a wisp of a girl with large, luminous eyes and a soul that shimmered with a pale, unearthly beauty. Trippingly, trippingly, she walked with Thorwald upon the beach and sat with him behind a windward dune and listened to a conch shell and sighed sweetly and took out a little gold pencil and a little morocco notebook and wrote a little poem:

*I will lie upon the shore,
I will be a dreamer,
I will feel the sea once more,
Pounding on my femur.*

Thorwald's second date was with a physical education major

He did not simply select the first one who came along...

named Peaches Glendower, a broth of a girl with a ready smile and a size 18 neck. She took Thorwald down to the cinder track where they did 100 laps to open the pores. Then they played four games of squash, six sets of tennis, 36 holes of golf, nine innings of one o'cat, six chukkers of lacrosse, and a mile and a quarter of leapfrog. Then they went ten rounds with eight-ounce gloves and had heaping bowls of whey and exchanged a firm handshake and went home to their respective whirlpool baths.

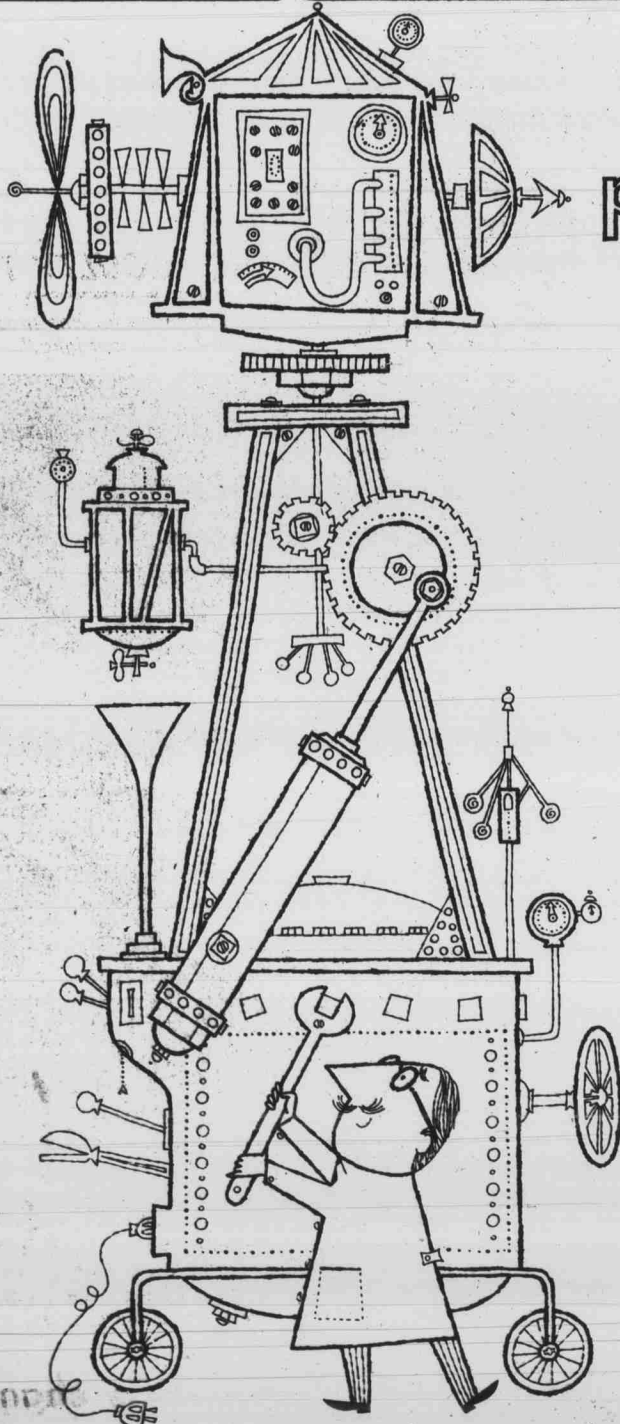

Thorwald's final date was with a golden-haired, creamy-browed, green-eyed, red-lipped, full-calved girl named Totsi Sigafoos. Totsi was not majoring in anything. As she often said, "Gee whillikers, what's college for anyhow—to fill your head full of icky old facts, or to discover the shining essence that is YOU?"

Totsi started the evening with Thorwald at a luxurious restaurant where she consumed her own weight in Cornish rock hen. From there they went to a deluxe movie palace where Totsi had popcorn with butter. Then she had a bag of chocolate covered raisins—also with butter. Then they went to a costly ballroom and did the Twist till dawn, tipping the band every eight bars. Then they went to a Chinese restaurant where Totsi, unable to translate the menu, solved her problem by ordering one of everything. Then Thorwald took her to the women's dorm, boosted her in the window, and went downtown to wait for the employment office to open.

While waiting, Thorwald thought over all of his girls and came to a sensible decision. "I think," he said to himself, "that I will stick with Marlboros. I am not rich enough for girls."

© 1962 Max Shulman

Marlboro, however, is rich enough for anybody. It takes mighty good makin' to give you unfiltered taste in a filter cigarette. That's the flavor you get in the famous Marlboro recipe from Richmond, Virginia. You get a lot to like.

perpetual motion?

No! But scientists and engineers at Ford's research and scientific labs do deal in perpetual notions—and they have more than a few about what might be commonplace in the future, some of them just as startling.

Studies at Ford involving new energy sources and improved materials may help bring jet-propelled cars with gyro stabilizers... automatic driving controls... flying automobiles and wheel-less vehicles that glide on a cushion of air... vehicles propelled by atomic energy... plastics with the strength of conventional metals... adhesives that replace welding... radar and other electronic controls to assist or replace the driver in many situations.

Basic studies in these and other fields are just part of a continuing program of progress aimed at reinforcing Ford's leadership through scientific research and engineering.
