Cold Cuts To Cut Capers At CU

The Cold Cuts, shown here, will be featured Tuesday, April 10, at 8:00 p.m. in the CU Ballroom when the St. Mary's Glee Club presents its concert. This well-known group will conclude the program with their renditions of popular songs played with unorthodox instruments. These St. Mary's seniors are selected for their ability to put a beat even into Beethoven.

Orientation Leader Applications Due

Plans for recruiting group leaders for freshman orientation are drawing to a close.

The deadline for turning in applications is Friday, April 6. Applications are available at the YMCA, CU, and 207 Holladay Hall.

The recruiting methods have been changed this year. Instead of selecting a group leader for approximately every 20 freshmen, only 25 leaders will be chosen. In addition, 25 rising sophomores will be selected as assistant group leaders.

To Thirty And Three Top Sophs Named

Eleven campus leaders in the sophomore class received bids yesterday to the Order of Thirty and Three. Current members of the sophomore leadership honorary society tapped the new members Wednesday in surprise ceremonies all over campus.

Dr. Max Halperen, faculty advisor to The Technician, received an honorary membership from the order as a result of his contributions to the college community.

The new members will greet parents and visitors to the college Saturday morning in the College Union. They will serve coffee and donuts to the visitors and supervise the registration of parents for the weekend activities.

The eleven new members of the order are John Bynum from Wadesboro, John Carr, Asheville; Sonny Enloe, Asheville; Fred Millhiser, Waynesboro, Virginia; Alfred Lindsey, Haddon Heights, New Jersey; Tom Lenderink, Grand Rapids, Michigan; Allen Lennon, Morganton; Tommy Gray, Ahsokie; Horace Skipper, Abbottsburg; Jack Watson, Greensboro; and Don Zobel of Raleigh.

Three of the group are in the School of Engineering; three more are in forestry; two are in applied math; one is in agriculture; and two are in the School of Textiles.

must be torn out completely and replaced by new materials.

The job will include sections on all floors of the north end of Syme as well (See SYME, page 2)

Syme Renovation Planned; Several Students Ousted

"Why does it have to be us and why now?"

Several indignant students in the north end of Syme dormitory have asked this question since being notified that they will have to move elsewhere in the near future.

Notice came in a brief announcement from the Student Housing office recently, and stated simply that students must move out to make way for a remodeling project.

Mr. J. McCree Smith, Director of M & O, supplied the missing details. According to Smith, the remodeling project on the north end of Syme will take about four months. When questioned about the three-month renovation job on the major part of the dorm last summer, he explained that much more work is required in remodeling the remainder of the dorm. Last summer's job involved simply the pouring of concrete floors over existing beams, and then general remodeling of the halls and rooms. The north end, he said, will require complete remodeling—old wood framing

Engineers' Fair Slated Here; To Feature Student Exhibits

By J. W. Williams

A Mercury space capsule, a car that floats on a cushion of air, and a machine that can generate temperatures approaching that of the sun are being gathered together on the State campus.

These exhibits are just three among 375 that will be present on different parts of the campus April 6 and 7 in connection with the Engineers' Fair.

The Fair, which is the major student event of the School of Engineering each year, will represent twelve engineering fields and will depict the theme, "The Future Looks To Engineering."

It will get underway at

2:00 p.m. Friday evening with the deliverance of the opening address by Col. George W. Taylor, Commanding officer of the Army Research Office in Durham. Presiding over the event will be Burke Ellis of Winston-Salem, the president of the Engineers' Council. The exhibits, which are expected to be viewed by more than 8,000 people, will then be opened.

Among the departments offering exhibits are Aeronautical Engineering, which will exhibit a parawing aircraft and a low speed wind tunnel, and Agricultural Engineering, which plans to show, among other things, an environmental control exhibit. Ceramic Engineering will demonstrate the making of glass and the transformation of energy to sound by the use of ceramic components.

A detergent plant layout

and continuous extraction distillation apparatus will be featured by the Chemical Engineers, while Civil Engineering plans the showing of a model airport.

An Emasco Robot, a Human Dynamometer, and a Sonar Display are on the roster for Electrical Engineering. Both Furniture Manufacturing and Geological Engineering are planning to feature displays that are associated with their various fields.

Booths, Dance Featured At C U Carnival Night

Have you ever had the urge to take a sledge hammer and smash the window of an automobile? How about the urge to dunk someone in a large tub of water? Well, you might get the chance to do one or both of these things this weekend.

Ten booths are being planned for the Carnival night during the weekend of the Engineers' Fair. Car smashing and dunking will take their places beside penny tossing, plane tossing, and French pastry kitchens.

Games called "Recover the Astronaut" and "Bust the Block" will provide participants chances to do both of these things. Games of chance will include a game played with dice, called "Monte Carlo," and one played with marbles and slots called "Drop of Chance."

Providing entertainment for

Friday night will be the Mystics, and the Swingshifters are scheduled to play Saturday night. Each band will be present from 7 p.m. until 12 p.m., and girls from Averett College have been invited to be present Saturday night. Other girls, including a group participating in a Beta Club Convention in Raleigh have also been invited.

The Carnival Queen pageant will be held in the CU theater Friday, April 6. The finals will be held Saturday, April 7.

YMCA Group Sets Rural Tour

Students from State and Duke will have a chance to look over Eastern North Carolina rural life next weekend.

A group from the State College YMCA, along with a group of students from Duke, will travel to Franklin Center at

Bricks, North Carolina, April 7 & 8, to study the operation of the Thomas J. Pearsall farm complex as compared with the operation of a cooperative of small Negro landowners in the area.

David Statler, a student at State, will lead the group.

To Feature Light Classical Works

W C Choir To Sing At C U

Handel, Schubert, Thomas Wolfe, madrigals, contemporary compositions, and folksongs will furnish listening material Sunday evening in the College Union ballroom.

At 8:00 p.m. the Woman's College Choir of Greensboro will present a concert of light classical and contemporary works. A featured work in the group of con-

temporary compositions will be the opening paragraphs of Thomas Wolfe's, *Look Homeward Angel*, with music by William Schuman. Also featured on the program will be the Woman's College Madrigal Singers, a group of 16 music majors, who will sing three English madrigals from the Elizabethan period. A group of folksongs will conclude the program.

The Choir currently has 98 members who come not only from the music department, but also from other fields of study. The appearance here will be the first in a series of out-of-town programs which will include concerts at Wesleyan College in Rocky Mount, Fort Bragg, and Hampden-Sydney College in Virginia. Both the choir and the Madrigal Singers will be under the direction of Richard Coe, instructor in the Woman's College department of music and alumnus of the University of North Carolina.

Refreshments will be served immediately following the concert.

These 98 members of the Woman's College Choir will present a program at the College Union Sunday Night.

To The Fence Builder

Your sense of timing, Fence Builder, is superb. You managed to erect a solid wooden barricade in front of the College Union only three days before thousands of visitors were scheduled to attend the Parents' Weekend activities.

It is bad enough that you should decide to put them up in the first place, much less when any campus guests were anywhere around.

Why should a neat looking row of shrubs be subjected to the presence of that fence, Fence Builder? There are a number of construction projects on campus which no doubt could use your talents. The Erdahl-Cloyd Union never did you any harm, so why pick on it?

Objectively speaking, there are a number of good things to say about your fence, F.B. The fence posts are all nice and square and the same unpainted color; and they all stand about the same height, too. The rails match the posts, except that they are basically rectangular. As far as building fences goes, and some of it goes pretty far, Fence Builder, it is a good piece of work.

Except that it should never have been built—leastways, not in a spot which had no need for it. Why couldn't you have spent your time, money and energy laying a sidewalk through Harrelson Hall mire instead?

Sure, we like surprises, Fence Builder. And the appearance of that monstrosity was definitely a surprise. But don't you be surprised if you are asked a few questions in the next several days as to why you tried to out-hedge a hedge.

Of course, there could be one explanation which nobody has thought of.

Fence Builder, did you go to Carolina?

They Own It, Too

The image of State College will be projected across the state this weekend, as hundreds of visitors make the trip to Raleigh to see for themselves what modern scientists and engineers are doing.

The interests of a great many of the school's guests will be centered around their own young scientist or engineer, but a definite picture of the type of training the college is offering will still be transmitted.

And this picture is one we are proud to show. State students by the score are spending a lot of time and effort in preparing for Parents' Weekend. Whether the visitors be prospective students, returning alumni, or interested friends of the college, we know that they will be impressed by the sights they see and the people they meet here.

Maintaining public interest in State College is important, for the citizenry of North Carolina make our educational opportunities possible.

The students should realize that our school and its accomplishments belong to our campus visitors, too, and should be happy for the chance to share it.

Sweet Bird Of Youth

By J. W. Williams

"Tennessee Williams is morbid, Tennessee Williams is mad; All his plays are always good, Cause all his people are bad."

I don't know how many people feel this way about the man, but I do know how this opinion could be formed after seeing his "Sweet Bird of Youth."

Let's look at the characters. First, there is a young man, Chance Wayne (Paul Newman), who has been driven from his home town by the father of the girl he loves. The old man has been "called by God" to be the political boss of his state. It's just coincidence that he has gotten wealthy in the process.

Chance meets a has-been actress who believes that she has failed to succeed in making a comeback. She's a nice lady who drinks vodka like a Carolina man and uses hashish cigarettes as

chasers. She talks him into making love to her—she doesn't have too much trouble at this, because he has been making his living by making love to old, discouraged women for a long, long time—and he traps her into signing him as her next great star. She goes along with him to take a chance on Chance on love.

Then the plot develops. But it's not important enough to spoil the characters, who are done beautifully by Paul Newman and Geraldine Page. Every one in the movie with the possible exception of Aunt Nonnie is so corrupt, mixed up, and just generally confused that it is almost a pity that it has a happy ending. Oh, that's another thing—the ending. Kind, sweet Aunt Nonnie turns to the political boss and yells, "You can go straight to Hell." Yep. That seems to be the general direction of everything in the movie.

It is showing at the Village Theater.

Channel 4 To Preview Engineers' Fair

Exhibits from each of the engineering departments will be displayed in a television preview of the Engineers' Fair tonight at 6:15 on WUNC.

This show includes such exhibits as the plasma generator sponsored by the Nuclear Engineering Department, the inertia car and the parawing aircraft, sponsored by the Mechanical Engineering Department, and the magic show sponsored by the Chemical Engineering Department, and several others.

Electrical Engineering, for instance, will feature an electronic mouse. Metallurgy will exhibit thermic welding, and the Agricultural Engineers will display a model of a tobacco harvester.

All of the displays will be demonstrated by students. Those

WUNC To Show War Trials, Brazil Today

The Nuremberg Trials, and "Forty Million shoes" will highlight the WUNC broadcasting schedule for next week.

The first of these features is a 77 minute issue film about the Nuremberg Trials illustrating how Hitler's actions led to World War II, and the results of his aggressive programs. This movie will be shown at 8 p.m. on April 8.

"Forty Million Shoes" is a report on Brazil today, as seen through the eyes of five Brazilians. It will be broadcast at 7:30 p.m. on April 9.

students participating in the show went to the studio at about 2 p.m. to plan the show, and again at 5 p.m. to rehearse and broadcast it.

Exhibits

(Continued from page 1)

a scale model of the nuclear ship "Savannah."

More than 100 members of engineering societies from throughout North Carolina will be invited to the Fair. Members of the engineering faculty or staff will act as hosts to the visitors.

The exhibit halls will remain open Friday until 9 p.m. and Saturday until 5 p.m. There will be no admission fee to any of the exhibits.

Syme Renovation

(Continued from page 1)

as the existing snack bar and adjacent storage space.

Construction is expected to begin on or about May 1; therefore all occupants of the rooms concerned must be out by April 28. If this plan can be followed, the rooms will be ready for occupancy by first semester of next year.

Publication Policy

Material submitted to this newspaper for publications should be typed in 62 character lines and double-spaced. This includes announcements of meetings and other events, which should be addressed to Campus Crier.

Letters to the editor must be typed as stated above and signed by the writer. No materials can be returned with the exception of photographs.

Rural Hall Move Announced For Leaf Research

State College's tobacco research facilities are going to move.

This was announced yesterday by Dr. H. Brooks James, Dean of the School of Agriculture. According to Dean James, the program will make the move from Rural Hall, N. C., to Chinqua-Penn, N. C. in the interest of saving money and expanding research facilities.

"We have had excellent cooperation from people in and around Winston-Salem," said Dean James, "but we believe the move will permit us to be of greater service."

Tied in closely with the move is the planned construction of an office and storage building, a tobacco processing laboratory, and a series of two motel-type curing facilities. The move is being made from a rented farm in Rural Hall to Consolidated University property on Chinqua-Penn Plantation near Reidsville.

Parawings, Plasma Flow

Seniors In Research

By Doug Lients
Parawings, plasma flow, and jet wings are being studied by MEA seniors in their Aeronautical Laboratory course.

Two different groups of students are studying the parawing, a combination parachute and glider. This device was first developed by NASA for use in booster recovery and possibly re-entry. It is a wing shaped device made of a triangular frame on which a flexible sheet is mounted. When in use, the sheet forms a wing.

Two models of the parawing were made by NASA; one which was guided by use of the wing itself, and another guided by an airplane-like device mounted under the wing. At present, two groups of State students are working on projects dealing with it.

The first group, made up of Frank Coble, Jerry Allen, Don Decker and Glen Snyder, is testing various models of the parawing in a wind tunnel to determine the most effective design for it.

The second group is making a flying model of the parawing

according to NASA specifications. It will have the properties of both of the NASA models, being guided by use of the wing, use of the rudder mounted under it, and control of the engine's speed. This group consists of Otis Pendergraft, Jack Johnson, Guy Burke, and Andy Owens.

A third group, made up of Lynn Thomson and Gus Jarrett, is testing the effect of a magnet on plasma flow. They are shooting a jet of argon gas, heated to about 25,000 degrees Fahrenheit, against a copper plate with a magnet behind it. They hope to be able to photograph the results.

Another group, made up of David MacCallum and G. C. Rogerson, is experimenting with supersonic jet wings. They are trying to find out what effect the use of flaps and slats, the lift it achieves, and the minimum landing speed possible with it. So far, with flaps, they have cut the required landing speed from 380 miles per hour to 335 miles per hour and increased the lift by 60 percent, for a five-ton aircraft.

Bragow

(Continued from page 4)

4-2. Jeff Arey scored 3 of Beeton's runs as he went 3 for 4 including a home run. Bagwell's 2 runs came on a two-run homer by Elmer Horne in the second inning.

In the only game played Monday, Alexander scored 6 runs in the first two innings and held on to get its first win of the season over Owen #2, 10-5. Action resumed today with all teams playing.

Dormitory tennis began Monday with Turlington, Bragaw South, Bragaw North, Welch-Gold-Fourth, and Tucker #2 picking up first round victories.

Dormitory horseshoes will begin Monday, April 9th on the new, permanent horseshoe courts at the southwest side of Carmichael Gymnasium.

many a knight
was spent
in rusty
armor

In days of yore, men feared not only their mortal enemies, but the elements too. It was the medieval armorer's task to protect his chief against foemen, but weather-protection was a more difficult matter. Thus many a knight was spent in rusty armor.

Engineers and scientists at Ford Motor Company, engaged in both pure and applied research, are coping even today with the problem of body protection (car bodies, that is). Through greater understanding of the chemistry of surfaces, they have developed new paint primers and undercoatings, new rustproofing methods, and special sealers that guard entire car bodies against nature's corrosive forces—all of which add armor-like protection to Ford-built cars.

From other scientific inquiries will undoubtedly come new materials with protective properties vastly superior to those of today. This is another example of Ford's leadership through scientific research and engineering.

Bragaw North Leads Dorms

Bragaw North is first with 915½ points in the dormitory intramural division with all winter sports except one completed. Also coming on strong is Alexander who is second with 771½ points. Alexander scored a first place in table tennis and a second in basketball to move up. North took first in basketball, second in bowling and table tennis and is still in contention for the badminton championship. The only other dorm to win a championship in a winter sport was 6th place Syme, who took bowling.

Bragaw North and Alexander finished 7th and 8th respectively in last year's final standings. As of now, however, they appear to be far enough ahead of the field to warrant assurance of at least placing in the top four in the final standings. As of now, Becton is third with 702 points and Bragaw South is fourth with 658.

The standings as released by the Intramural Department yesterday:

1. Bragaw North 915½
2. Alexander 771½
3. Becton 702
4. Bragaw South 658
5. Berry 620½
6. Syme 589
7. Bagwell 551½
8. Owen #2 514½
9. Watauga 504½
10. Welch-Gold-4th 484
11. Turlington 439
12. Owen #1 428½
13. Tucker #2 425½
14. Tucker #1 421

In the table tennis championship matches played last Wednesday, Alexander defeated Bragaw North 2-1 for the championship after North had defeated Syme 2-1. Moretz and Haire were singles winners for Alexander while Collins and Goldstein won the doubles match for Bragaw North.

In badminton, the only winter sport not completed, defending champion Bragaw South took on Tucker #2 for the winner's bracket championship last night. The loser will join Bragaw North, Owen #2, Becton, and Bagwell in the playoffs for the loser's bracket championship tomorrow night. The two bracket champions will meet for the championship next Tuesday. In last week's action Bragaw North defeated Owen #2 2-1 and Becton beat Bagwell 2-1.

In the dormitory consolation basketball championship played last Tuesday night, Bragaw South beat Owen #1 in a 57-56 thriller, thus becoming the first dormitory consolation champion. Ayers led South with 26 points while Darrel Spry was high for Owen with 21.

The spring sports schedule got well under way last week with softball being the major attraction. The season's opener last Tuesday between Welch-Gold-Fourth and Tucker #2 was spoiled when Tucker failed to show up, but action began Wednesday and continued Thursday.

A sacrifice fly by Ted Noris scored Billy Revels from third base in the 8th inning of a scheduled 7 inning contest to give

Tucker #1 an 8-7 victory over Bragaw South in a Wednesday game. South had tied the game with a six run sixth inning. Revels was the hitting leader for Tucker with 3 hits in 4 trips. Scott Trott paced South with 2 hits in 3 trips.

In another Wednesday game, third baseman Dan Cope made two successive leaping grabs of line drives to rob Syme batters of base hits and enabling Owen #1 to shut off Syme's 7th inning rally at 4 runs and the bases full to give Owen a 12-9 win. Cope was also the batting leader for Owen with 2 hits for 4 at-tempts. Defending champion took advantage of a special Intramural rule which allows a team ahead by 11 runs or more after the third inning to win without playing further as they beat Welch-Gold-Fourth 16-3 in 5 innings. Joe Vercheck paced Bagwell with 4 hits in 4 trips including a home run.

Becton won by the same route on Wednesday, defeating Owen #2 25-10 in 6 innings. Gardner was the big gun for Becton with 4 hits in 5 trips including 2 home runs and a double. Robert Harrison had 3 hits in 4 at bats for Owen.

In other games played Wednesday, a seventh inning rally by Alexander fell short as Turlington held on for a 6-5 win, and Bragaw North scored 7 runs in the first inning and held on for a 13-3 win over Berry. James Arey hit 2 home runs for North. As action continued Thursday, Bragaw North continued its home run spree, hitting six of them in defeating Syme 21-8 in

4 innings. Ray Spangler hit his third home run of the day to ice the game for North in the 4th inning.

In another Thursday game, Owen #1 defeated Watauga 11-5 as Ricky Wilkenson collected 3 hits in 4 trips including a home run. Bill Webb hit a 3 run homer in Berry's 6 run 4th inning to give them an 11-5 victory over Bragaw South. It was Webb's 2nd home run of the day. Center fielder Tommy Stagner and third baseman Pete Falzarano were defensive standouts for Berry.

Tucker #2 scored 4 runs in the third inning on home runs by Robert Brummit and John Kavendy, added three more in the fourth and then held on for a 7-4 victory over Alexander, and Turlington overcame a five run first inning by Owen #2 with home runs by Furman Overby and Jason Dunshee to win 7-5 in a game called after 6½ innings due to darkness in other Thursday action.

A good performance by Becton and the pitching by George Kitrell enabled Becton to upset defending champion Bagwell

Learning never stops for engineers at Western Electric

There's no place at Western Electric for engineers who feel that college diplomas signify the end of their education. However, if a man can meet our quality standards and feels that he is really just beginning to learn... and if he is ready to launch his career where learning is an important part of the job and where graduate-level training on and off the job is encouraged — we want and need him.

At Western Electric, in addition to the normal learning-while-doing, engineers are encouraged to move ahead in their fields by several types of educational programs. Western maintains its own full-time graduate engineering training program, seven formal management courses, and a tuition refund plan for out-of-hours college study.

This learning atmosphere is just one reason why a career at Western Electric is so stimulating. Of equal importance, however, is the nature of the work we do. Our new engineers are taking part in projects that implement the whole art of modern telephony, from high-speed sound transmission and solar cells to electronic telephone offices and computer-controlled production techniques.

Should you join us now, you will be coming

to Western Electric at one of the best times in the company's history. In the management area alone, several thousand supervisory jobs are expected to open up to W.E. people within the next 10 years. And our work of building communications equipment and systems becomes increasingly challenging and important as the communications needs of our nation and the world continue to increase.

Challenging opportunities exist now at Western Electric for electrical, mechanical, industrial, and chemical engineers, as well as physical science, liberal arts, and business majors. All qualified applicants will receive careful consideration for employment without regard to race, creed, color or national origin. For more information about Western Electric, write College Relations, Western Electric Company, Room 6206, 222 Broadway, New York 38, New York. And be sure to arrange for a Western Electric interview when our college representatives visit your campus.

Principal manufacturing locations at Chicago, Ill.; Kearny, N. J.; Baltimore, Md.; Indianapolis, Ind.; Allentown and Laureldale, Pa.; Winston-Salem, N. C.; Buffalo, N. Y.; North Andover, Mass.; Omaha, Neb.; Kansas City, Mo.; Columbus, Ohio; Oklahoma City, Okla.; Engineering Research Center, Princeton, N. J. Teletype Corporation, Skokie, Ill., and Little Rock, Ark. Also Western Electric distribution centers in 33 cities and installation headquarters in 16 cities. General headquarters: 195 Broadway, New York 7, N. Y.

Two approaches to the "man's deodorant" problem

If a man doesn't mind shaving under his arms, he will probably find a woman's roll-on satisfactory. Most men, however, find it simpler and surer to use Mennen Spray Deodorant. Mennen Spray was made to get through to the skin, where perspiration starts. And made to work all day. More men use Mennen Spray than any other deodorant. How about you? **64¢ and \$1.00 plus tax**

Wolfpack At Duke Fri.; UNC Here Sat.

North Carolina State's baseball team returns to action after a ten-day layoff when it opens Atlantic Coast Conference play this weekend against Duke and North Carolina.

conference play, meets Duke in Durham, Friday, and returns home to face the Tar Heels on Saturday in a 2:30 game.

dule since defeating Yale 6-5, on March 27.

Coach Vic Sorrell will send senior right-hander Bob Conner after his second 1962 victory when he goes against Duke, and will use right-hander John

Baughan against North Carolina. Baughan is undefeated in two starts, while Conner has gone the distance both times in splitting two games, and has struck out 15 batters.

wards, at .444, and catcher George Hayworth with a .313 average, are the leading Wolfpack hitters. Hayworth, from High Point, leads in runs-batted-in with six, while Edwards has scored five runs.

Sorrell expects second baseman Warren Lineberger and first baseman Jerry Cordell to be available for duty after missing the last three games with pulled leg muscles.

The Pack will have Don Montgomery in left, Ron Erb in center and Les Young in right field. Cordell will go at first; either Lineberger or Tom Hines will be at second; with Edwards at shortstop and Vernon Strickland on third. Hayworth will catch.

State handed Duke, defending ACC titlist, two of its three ACC defeats last year, while losing twice to the Tar Heels in conference play.

Shortstop Wayne Ed-

State's freshman team, under coach Jimmy Edwards, makes its 1962 start against Duke and Carolina also this weekend. The Wolflets meet the Duke freshmen at 3:00 p.m. in Raleigh on Friday, and face the Tar Babies in Chapel Hill, Saturday afternoon.

Get Lots More from L&M

L&M gives you **MORE BODY** in the blend, **MORE FLAVOR** in the smoke, **MORE TASTE** through the filter. It's the rich-flavor leaf that does it!

HERE'S HOW MEN AND WOMEN AT 56 COLLEGES VOTED.

Category	Soft Pack	Box
Men	46% (36%)	54% (64%)
Women	43% (28%)	57% (72%)
Yes	66% (49%)	34% (51%)
No	34% (51%)	66% (49%)

L&M's the filter cigarette for people who really like to smoke.

men recommend it to other men

Cool, clean Old Spice After Shave Lotion always gets you off to a fast, smooth start. Feels just as good between shaves as it does after shaving. Rates A-OK with dates. 1.00 and 1.75 plus tax.

Old Spice AFTER SHAVE LOTION

SHULTON

State, UNC Tankmen In AAU Competition

North Carolina State and North Carolina will join swimming forces to form the North Carolina Athletic Club in the National Indoor AAU swimming championships at Bartlesville, Okla., starting today.

Heading the list in the Wolfpack's Edwin Spencer, winner of the NCAA 100-yard butterfly championship last Saturday at Columbus, Ohio, in a record 52.5 seconds. Other State swimmers will be breast-stroker Pete Fogarasy and freestyler Bill McGinty.

Sophomore Thompson Mann, of Hickory, Va., third in both the NCAA 100 and 200-yard backstroke events at Columbus, and freshman ace Harrison Merrill, from Atlanta, Ga., will represent the Tar Heels.

The North Carolina A.C. will defend its 400-yard medley relay championship won last year at New Haven, Conn., in record time.

DU PONT TRADE MARK

Live it up with a Lively One from FORD!

New Galaxie 500/XL Fun it up in an XL hardtop, or sun it up in the convertible. Both are brand new—and feature soft bucket seats with Thunderbird-type console in between. Storm out with up to 405 Thunderbird V-8 horses, reined by a quick, all-business 4-speed stick shift. When studies stop—GO!

New Falcon Sports Futura
Talk about having a fast ball! This compact crowd-pleaser scores with bucket seats up front . . . a snappy console . . . wall-to-wall carpets . . . quicksilver maneuverability . . . prodigious economy and a Thunderbird-type roof (vinyl-covered if desired). Isn't there a Falcon Sports Futura in your future?

New Fairlane 500 Sports Coupe Here's a hint of sprint, and more! Check out those new bucket seats; the smart console in between; the washable, color-keyed vinyl upholstery. Up front, you can have a scorching new powerplant—the Challenger 260 V-8. All systems are GO in the Lively Ones from Ford. See them at your Ford Dealer's, the liveliest place in town!
