## Writing Workshop Begins At State

Students interested in creative writing will have a chance to learn and discuss writing at a workshop Tuesday, September 25.

The workshop is sponsored by the College Union and will be directed by Romulus Lenney, who is also directing the drama workshop on campus. Mr. Lenney has written a novel, *Heathen Valley*, (see review, page 3).

According to Lenney, this

workshop will consist of informal discussion of student writing. It is hoped that the workshop will be expanded into a campus literary magazine. Another staff member and author, Guy Owen (see review, page 3) plans to help with the workshop. He has written for both Carolina and Stetson Universities' literary magazines.

The first workshop will be held September 25 at 8:00 p.m. in Room 252 of the College Union.

## Kelly Named

## New Faculty Dean

"My main concern is the triangle of education, basic research, and applied science."

These words came from a man who has taught, been active in research, patented a vital component of radar, and is now the Dean of Faculty of State College.

Dr. Harry C. Kelly, associate director of the National Science Foundation, will assume the full duties of Dean of the Faculty in November, but is presently visiting State one or two days a week to become acquainted with the school while still being associated with the Foundation.

In an exclusive interview with *The Technician*, Dr. Kelly remarked that he has found here at State a "blending of basic research and applied science." "For instance," said Dr. Kelly, "on this campus you walk through a barn which has animals in front and a modern lab in back."

Dr. Kelly received his B.S. and M.S. Degrees from Lehigh University and his Ph.D. Degree from the Massachusetts Institute of Technology in physics, but he has not confined his scientific study to physics. While teaching at Montana State College, he became interested in research in agricultural

fields, and has written scientific articles on potato rot.

Dr. Kelly has directed the National Science Foundation's educational and international activities since 1959. In this capacity, he worked with cooperative scientific projects with other countries.

Dr. Kelly is married and has two children.

## WKNC EXPANDS

WKNC, the campus radio station, spent \$1,100 improving its broadcasting facilities as it moved into new quarters in the King Religious Center.

The move was part of a general move by the campus publications from the 1911 Building to the location of the old student supply store in the basement of the campus YMCA.

In addition to establishing its studio in a new location, the station has added an RCA single

(See EXPANSION, page 11)

## Caldwell Speaks

## Freshmen Welcomed

Consolidated University President Friday, Chancellor Caldwell, and Student Government President Floyd McCall officially welcomed nearly 2,000 freshmen and transfer students assembled in Reynolds Coliseum last Monday night.

McCall, welcoming the new students, advocated interest among the students for various campus organizations, and asked the students to express their opinions and ideas during the coming year so that "the Student Government can represent you." He urged the students to a greater demonstration of school spirit than was evident last year.

In his annual address to the freshmen, Dr. Caldwell cautioned the new class about their present status:

"You came here as you are, no better, no worse than what you are. Each of you has a best self—honest, decent, considerate, and joyful. Don't be deprived of that best self. Don't let yourself be persuaded that anything less than your most honest and decent self can make you happy—because it cannot."

## Smile Big, Men Scrapbook Pics Taken In Pullen

AGROMECK class pictures will be taken this year in ROOM 3, Basement of PULLEN HALL.

Sept. 17-21, 9:00-5:00, Seniors

Sept. 24-28, 9:00-5:00, Juniors

Oct. 1-5, 9:00-5:00, Sophomores

Oct. 8-12, 9:00-5:00, Unclassified, Graduate Students, Professional Students, Ag. Institute.

All picture taking will end October 19.

After September 24, fraternity pictures can be made with class pictures.

## Campus Crier

Applications are now being accepted for the 1963 Federal Service Entrance Examination, the United States Civil Service Commission has announced. This examination is open to college juniors, seniors, and graduate students regardless of major studies. The closing date for acceptance of applications for Management Internship is January 24, 1963. For all other positions, the closing date is April 25, 1963.

Enrollment blanks for student insurance are available at the College Infirmary, and the Counseling Office, 201 Holladay Hall. Foreign Students are required by the College to be covered by some kind of health insurance. Any foreign student who is uncertain whether he has met this

(See CRIER, page 2)

## Three-Man Rooms Abound In Dorms

By Allen Lennon

Almost half of the anticipated 7,300 students enrolling for the fall semester of State College will have to find off-campus housing according to Student Housing Director N. B. Watts.

Watts also noted that 45 percent of the dormitory residents will be required to share three-

man rooms originally designed to accommodate two men.

In addition to the college's 13 dorms, rooms under the bleachers of Riddick Stadium have been prepared to help alleviate the crowded dorm conditions. Latest housing figures show that a total of 542 dorm rooms will have three occupants.

The housing office reports

that in addition to the 3634 students assigned dorm rooms, the college has provided quarters for 319 married students and their families in McKimmon Village, the married student housing center.

Director Watts indicated last week that 1,433 unpaid room applications for which no rooms were available were on file August 17. "We're afraid that some students may not be coming to State this fall because of our crowded housing conditions. If we had that new 800-man dorm, we could fill it today," Watts added.

The new dorm to which Watts was referring is a nine-story building scheduled for completion in the fall of 1963. Bids on the new dorm were taken on September 12.

Housing rental officer J. S. Fulghum indicated that his office has and will continue to assist students for whom no housing is available to locate facilities off campus.

Director Watts blamed State College's growing housing problem partially on the failure of the last November bond election which would have provided for the construction of another 800-man facility in addition to other capital improvements on campus. The college will now find it necessary to ask the next General Assembly for approximately \$3,500,000 to cover half the cost of building two more 800-man dormitories.

The Fraternity Row project, years behind schedule and now slated for occupancy next fall, should provide housing for about 500 fraternity men who are now living in off-campus quarters.

## Gather 'Round

"There's safety in a crowd." Or so the old saying goes. "Maybe we won't look so lost and confused if we stick together. Anyway there's plenty of room to sit with three beds in a room. Aren't we lucky?"

## New Theater Proposed In Thompson Gymnasium

The new drama program on campus plans to have a unique facility to work in next year.

According to Phil Eck, a theater designer who has been studying locations for a theater on campus, Frank Thompson gymnasium can be built into a facility which will be unmatched in the nation (see pictures page 11).

Eck, a graduate of Yale School of Drama, is presently the Technical Director of the University of Pittsburgh Theater. While at Pitt, he and Ned A. Bowman conceived the idea of constructing a theater which could be set up in many different ways so that many types of plays and functions could be presented in it. Eck described the theater construction as being "like a large erector set." Eck went on to explain that this construction will make it possible for stages, lights, and seating to be changed with a minimum of effort to fit different plays.

According to Henry Bowers, Director of the College Union which is sponsoring the drama

program, it is very possible that the Union will carry out the modifications in Thompson Gym. Bowers also remarked that the construction of this theater would also give the college a very good place to have lectures and musical programs.

The drama program will begin Friday night at 8:00 p.m. in Pullen Hall under the direction of Romulus Lenney, another graduate of the Yale School of Drama. Lenney has also participated in the Actor's Workshop and has acted professionally. According to Lenney, the drama sessions will be very informal; and anyone may attend them. He also stated that no experience is necessary and that the sessions would cover all facets of the theater. Anyone interested in acting, directing, set designing, etc. is invited.

Lenney explained that the sessions would first begin with workshops concentrating on different scenes from different plays, and that if plays developed from the workshops, he might stage full productions later in the season.

## Carolina Tickets Available Now

Student tickets for the State-Carolina game went on sale at the coliseum box office at 8:00 on Monday, September 17.

According to Jim Macomson, chairman of the S.G. committee on group seating at athletic events, student tickets will sell for \$1.00 apiece, and date tickets for \$4.50 apiece. Also according to Macomson, there will be chartered buses leaving the coliseum at twelve noon on Saturday, Sept. 22 for all students who do not have available transportation. Bus tickets for dates will cost \$1.50 apiece. Bus tickets may be obtained at the coliseum from 7 to 9 Wed. night.

In order to get a ticket, a student must present his registration card at the coliseum box office anytime between 8:00 and 4:30 Monday through Friday. Upon presentation of his card and \$1.00 the student will receive a TICKET STUB. This stub is to be exchanged for a ticket at Kenan Stadium on the day of the game. This ticket will admit the student to the game when presented at the gate.

Dr. Harry Kelly, new Dean of Faculty, gives his impressions of State College to *The Technician* during an exclusive interview with Mike Lea, Editor. With the National Science Foundation since 1959, Dr. Kelly will assume his duties here in November.

## Money In Your Pocket

When a freshman comes to State College he is deluged with material telling him to join everything from fraternities to the American Association of Peeping Toms-State College Chapter.

In a way this is good because it gives him an insight into the myriad activities that are open to a student at this college, but in another way it can prove harmful. The more vocal groups on campus such as the College Union lead the freshmen into thinking that they are the *only* activity on campus worth joining and associating with, and this is evidently not true. There are many organizations in which a student may participate, and the best policy he can follow is to study everything on campus-his technical societies, the governing bodies in his school, the student government, school and campus publications, the College Union etc.; decide what organizations he is most interested in; and then *join* them.

While many people might feel that taking part in extracurricular activities is pointless and does not help the individual student, it has been proven over and over that this is false. While academics and academic averages play a large part in determining a man's job after graduation, extra-curricular activities are highly rated also. An example of this is the fact that the National Aeronautics and Space Administration recognizes membership in a scholastic society when deciding starting salaries.

After covering the materialistic side of the question we would also like to comment on another portion which we feel is just as important.

When freshmen enroll at State College, they find themselves in an environment over which they have some control. They no longer find themselves bound by the iron dictates of a high school principal, their family, or a local government composed completely of older people. For the first time in their lives they have the right to speak out for what they want and have a chance to decide policies under which they will live. They are treated and respected as adults in their society, and they have the responsibility of conducting themselves in an adult manner. When they leave the society of the college, they will find themselves completely on their own, and college should be a "proving ground" for future life. Participation in extra-curricular activities will give the student the experience to become a responsible and productive citizen after graduation.

We therefore urge all you freshmen to look around and find activities that you are interested in and to take an active part in them. It will prove to be educational and enjoyable . . . and it will be money in your pocket.

## Crit

During the past year existed a column entitled CRIT. It is back.

It will be welcomed by some, and loudly cursed by others. CRIT is designed to offend the most people possible, where it hurts. If you, the reader, are never piqued by what this column has to say, it is not my fault.

The article is more or less independent of the Technician, another sacred cow which might well be put in the bull ring. The

Technician need not share the opinions represented here.

Crit has in the past been written by one student; this year a jury will give CRIT. Anyone that is worked up about any injustices on campus or at large will be welcomed as a contributor or as a participant of the jury.

The field of contributions is open; I have set it open. Any medium, any message, to any audience.

Now let us proceed to hang up some dirty linen.

## Campus Crier

(Continued from page 1)

requirement should inquire at the office of Mrs. W. W. Woodhouse, King Building, 1-5 p.m., Monday-Friday before October 15.

WKNC needs a title for a request show the old "YOU NAME IT SHOW" now on Mon. thru Thurs. from 7:00 to 9:30 p.m. and Friday from 7 to 8 p.m.

Prizes will be given for title used for the show.

Call at TE 2-7861 or drop a post card with suggestions.

Program is telephone request show.

All entries must be in by Sept. 29, 1962.

All students who have not yet received polio vaccine or a flu shot should do so by reporting to the College Infirmary during the hours 9 a.m. to 9 p.m. daily.

**IMPORTANT DEADLINES:** September 21, Last day for registration. Last day for refund less \$5.00 registration fee. September 28, Last day to add a course. October 5, Last day to drop a course without failure.

Each student must register his car, motor scooter or bike, if he is planning to drive or park anywhere on campus. Violation charges are high. Avoid unnecessary charges by registering, displaying current parking sticker and parking where student parking is authorized. Violation tickets will begin being issued Monday, September 17.

All classes will be dismissed at 11:00 a.m. on Sat., Sept. 22, to enable students and faculty to attend the State-Carolina Foot-

ball game in Chapel Hill, and at 10:00 a.m. Sat., Nov. 17, for Homecoming Day activities.

Reading improvement classes will start Tues., Sept. 25 in Tompkins 212. Sign up at Psychology Office, 201 Tompkins. Each section is limited to 24 students and meets once a week, with meeting times and beginning rates as follows: Sec. 1, Tues. 9:00 a.m., 270 words per minute; Sec. 2, Tues. 10:00, 500 WPM; Sec. 3, Wed. 2:00, 500 WPM; Sec. 4, Thurs. 10:00, 270 WPM; Sec. 5, Fri. 9:00, 500 WPM.

The word "parade" is defined by city ordinance as an assemblage of more than five vehicles or twenty-five pedestrians in public procession along the streets of the city. City regulations require that State College students must obtain "parade" permits five days in advance before any demonstrations such as "pep" parades, patriotic demonstrations, etc., may be held on city streets. Failure to do so will be in violation of the law. For details of procedure, come to Student Activities Office, 206 Holladay.

Student Government President Floyd McCall announces office hours for this week for the benefit of students who wish to be interviewed for appointments to student government committees outside the legislature. McCall will be in the SG office on the second floor of the College Union between the hours of 2:00 and 5:00 p.m. on Tuesday and Thursday.

Student Government meets Thursday evening at 7:00 p.m. in the College Union.

## On Pledging A Fraternity

Fraternity Rush Week officially ended at ten o'clock Sunday night, and for many freshmen and upperclassmen the days of decision known as silent period began.

For most of the houses on campus, the fall rush was one of the most successful ever. More than one thousand men are estimated to have visited the college's eighteen fraternities to see what a fraternity is about.

Most of them think they found out.

However, five days is not sufficient time to visit eighteen houses, meet all the brothers, catch the spirit and character of the houses, evaluate the merits and shortcomings of each house, register for classes and move into living quarters, and somewhere along the way discover what being a fraternity man can mean to a person.

The State College IFC rush program is effective, but it misses many good men because there just isn't enough time to see and talk to everyone who is interested in fraternity membership.

Bids will be received this week by rushees who must decide which of the houses they should pledge. They should consider many aspects of the houses they visited in making their decisions. The rushee should carefully weigh each house's chapter organization and management, social program, on-campus activities and interests, pledge program, alumni traditions, and national organization strength and programs, as well as the chapter's local campus reputation.

If any rushee did not learn these things, he was cheated in rush.

Perhaps above all, the rushee should consider carefully the personalities and caliber of the brothers which are the source of any fraternity's success.

Rushees, look beyond the newly painted walls, jalopies, sports cars, and combo parties, and consider the men whom you soon hope to claim as brothers. Only they will you be able to make a decision which, if it is the right one, can lead to many happy and rewarding experiences for years to come.

The day of the "do-nothing" and "all party" fraternities is ending. The really outstanding houses on this or any campus are those which go beyond the walls of their houses and use their influence in campus community affairs.

Fraternities are now ready to assume a greater share of the leadership on this campus as witnessed in last spring's general campus elections. To do this they need men who are genuinely interested in each other and the community around them.

Rushees, consider what you can do for the fraternity of your choice, and what those men can do for you. Your contribution will be amply rewarded.

AL

## Much Of Value

The policy of *The Technician* in the past has been to praise anything that can be defined as "culture," and to beg students to take part in any activity described this way.

We refuse to do this. "Culture" is similar to morals. One cannot legislate morals, and one cannot force cultural activities on an unwilling person. We would like to point out, however, that there are two programs starting on this campus that students may find of much interest.

The College Union is sponsoring both drama and writing workshops under the direction of a man admirably suited to work in these fields.—Romulus Lenney. Rom is both an author and a professional actor. He has gone to the Yale School of Drama and has studied at the Actors Workshop in New York. His novel, *Heathen Valley*, was considered by the Book of the Month Club.

With all of this talent and experience here for the asking, it would be ridiculous for anyone who is interested in either the fields of literature or drama to miss it. While we know that the greater percentage of the campus will not be interested in these programs, we also know that there are many students who will find much of value in them.

By Richard Walsler

*Editor's note: The writer of two reviews is Richard Walsler, a member of the State College English staff and one of the foremost authorities on North Carolina writers. Mr. Walsler is the writer of innumerable book reviews for North Carolina newspapers and is an author with many publications to his own credit.*

Two writers with impressive first novels to their credit have arrived on the campus this fall. Guy Owen has joined the Department of English, and Romulus Linney will be connected with the College Union.

Their coming to N. C. State is in line with the intensified college policy to encourage cultural activity.

Owen's book *Season of Fear* was published by Random House two seasons ago. Since then, he has been working on a second novel, tentatively titled *The Flim-Flam Man*, which is due to appear in the next year or so.

*Season of Fear* is a story of the Cape Fear River country, more definitely Owen's own native county of Bladen. Its action takes place during the depression years of the 1930's, its characters the lower class of tobacco farmers.

The events revolve about Clay Hampton, an aging, unshaven, solvently bachelor who farms for his mother and Aunt Tuggie. When not working on the land, Clay builds signs for Preacher Frazier to place along the highway, proclaiming that "Jesus Saves."

At night, Clay enters his private sex-ridden world, alternating between prayers to a red-bearded Christ, and gnawing desires for the homely, slouch-hipped girl Naomi on the next farm. A drought is upon the land, and Clay reasons that God will never send rain to the dry tobacco fields as long as Naomi continues her carrying-on with her stepfather.

After the KKK, with Clay the informant, forces Naomi's departure, there comes to the tenant shack a new family—and Laura Dell. But the rains do not come, and the curse does not leave the land. Now Clay's day-dreams and night-dreams are all of Laura Dell; and at last his red-bearded Christ directs Clay how to erase sin from the parched fields. Owen's climax comes when waters drench the land.

A classic unity deftly controls *Season of Fear*. Never does Owen resort to raw language, though his theme of Clay's neurosis would anticipate it. The New York Times Book Review commented that this first novel

could not "be called by the usual word 'promising.' With this book Mr. Owen moves into the major league."

*Season of Fear* is now being published in England. Incident-

ing well, Bishop Ames sets up among the simple mountain people an ascetic order patterned after Romish lines. Through the following months of terror, Starns hold to his faith in his

Rom Lenney

ally, Mr. Owen is also a poet and short story writer.

### Linney's "Heathen Valley"

Linney's *Heathen Valley*, brought out last June by Atheneum publishers, is in the same tradition of Southern Gothic. But, instead of the river country, the scene is the secluded mountain valleys of North Carolina, the time the middle of the last century.

The novel is based on certain facts and legends of the Valle Crucis Mission, established by Bishop Levi S. Ives during the 1840's in Watauga County.

Central to the varied characters is William Starns, rescued from dissipation by an Episcopal bishop. When Bishop Ames establishes his mission, he puts mountain-born Starns to work subduing the wild, independent valley folk, who generations ago had fled the tyranny of the King's Men and the King's Church.

Some of Linney's most brilliant pages give colorful attention to the animal-like people, who, cut off from civilization, have degenerated into acts of savagery like incest and murder.

Just when the mission is go-

ing well, himself now turned rescuer.

*Heathen Valley* is a unique, satisfying, curiously compounded, and sophisticated work both in its use of unfamiliar materials and in its style, which give its own rhythm to the story Linney has to tell. It is also a highly moral book in its view of human motivation.

Both *Heathen Valley* and *Season of Fear* are mature productions by men now welcomed into the State College community.

## Author Discusses Campus Arts

Feels Optimistic

"I am very optimistic about the possibilities of more emphasis being put on the creative arts on this campus."

Guy Owen, a successful author, poet, and editor, made this observation in *The Technician* offices Wednesday night as he was talking to a staff member interviewing him.

Owen, a native of Maxton, N. C. and a graduate of Carolina, will teach in the State College English Department this year.

Besides his novel, *Season of Fear* which was printed two years ago, and has received critical acclaim, Owen is the writer of short stories and poetry.

In the course of the interview, poetry was brought up,

and at the mention of the subject, Owen smiled.

Leaning back in his chair, Owen began talking about a subject he is very interested in. He is the editor of a semi-annual poetry magazine, *Empetus*, which features Southern Poetry. Along this line, *Empetus* has printed a paperbound chatbook which contains a selection of Southern post World War II poetry. Commenting on poetry in the South, Owen stated that Southern poets "no longer write the magnolia tree and moonlight type of poetry but now keep up with poetry movements throughout the world." Owen went on

to say that there is an "intensified interest in poetry in the South which bodes well for Southern Literature as a whole."

Commenting on his new novel which is tentatively entitled *The Flim-Flam Man* Owen described it as a "sort of modern version of *Huckleberry Finn*. It is set in the same Eastern North Carolina County as *Season of Fear*. Owen plans to mail the manuscript to his publishers in the next few days.

Owen will teach a creative writing course next semester and plans to work with the College Union Writing Workshop this year.

If a man doesn't mind shaving under his arms, he will probably find a woman's roll-on satisfactory. Most men, however, find it simpler and surer to use Mennen Spray Deodorant. Mennen Spray was made to get through to the skin, where perspiration starts. And made to work all day. More men use Mennen Spray than any other deodorant. How about you? 64¢ and \$1.00 plus tax

# Retired Dean J. Harold Lampe To Help Direct New College

Dr. J. Harold Lampe, recently retired dean of the School of Engineering at State College, has been named to develop and direct a four-year program in engineering education at a new college in Norfolk, Virginia, which officially opened its doors in July of this year.

Lampe retired his State College post in June, having reached the customary retirement age of 65.

In accepting the new assignment Dr. Lampe said, "The new position presents a real challenge to me and I believe it is one to which I can contribute much as a result of my years of experience in developing and operating engineering education programs."

The former dean expressed

regret in leaving North Carolina, and said that he was led to accept the new position because of the great challenges associated with the development of an engineering education program.

"I will always have a strong and loyal interest in North Carolina State College and my associates at the college, as well as for the industrial leaders of the State," he declared.

In his new position, Dr. Lampe will not only develop personnel and curricula for the engineering program, but also will direct a building program which will provide the physical facilities needed to carry on programs in engineering education and research.

Dr. Lampe said he will aim at

creating four-year engineering education programs in two directions—toward industry and toward research and development. He will be closely associated with the shipbuilding industry, the nation's space program, government agencies, and the many industries which make up the active production and processing groups of the Tidewater Area.

Recognized as one of the nation's leading engineering educators, Lampe came to State College as dean of engineering in 1945. Under his dynamic leadership, the School of Engineering has moved to the forefront of technological endeavors and is considered one of the top engineering schools in the country.

# Mangum Remodeling Will Provide Labs, Textile Equipment

The remodeling of Mangum Hall for use as a textile chemistry laboratory building will be completed about November 1.

According to Professor Henry Ames Rutherford, head of the Department of Textile Chemistry, the uses of this building will triple the laboratory space of his department. The new facilities will permit the department to handle two hundred undergraduates and fourteen graduate students.

Rutherford said that the space for the graduate students is especially welcome, because the department has had no suitable accommodations for them in the past. The new building will provide a private desk and laboratory facility for each graduate student.

The cost of the project is \$350,000. \$80,000 of this is going for equipment, and the rest is being used to remodel the building.

Mangum Hall is located behind the Textile Building, at the west end of the campus. It was formerly used by the Agricultural Engineering Department.

Many State College motorists will be seen humping their way along the thoroughfare behind the Tucker-Owen dorm area this fall thanks to this latest contribution to the campus made through the tireless efforts of the IDC, the Traffic Committee, and M&O.

## Campus Construction Now And (We Hope) In The Future

Even though it may not be too obvious from the picture, Dorm '62, which is scheduled for completion in September of 1963, is located just west of Bragaw. The dorm will hold 808 students when it is completed.

Building at State College is now going on at an unprecedented rate.

A new dormitory, Dorm 62, is to be built behind Bragaw Dormitory (see pictures at right). This dormitory is scheduled to be finished September, 1962, will hold approximately 800 students, and will cost over two million dollars. Although construction has not yet begun on this dormitory, according to college officials, it will begin in the near future.

The Physics Department is slated to move into the six-story building (right) in the middle of 1963. The building will be located near Harrelson Hall. Excavation for the building has already begun.

The partially completed building which may be seen beside Tucker will replace the out-moded cafeteria facilities in Leazer Hall (below). The cafeteria is slated to be finished in September of 1963.

A new Civil Engineering Building beside Riddick Hall is also under construction, and work will begin on the different units of the new Fraternity Row in the very near future.

This gem of a building is to be six stories high and contain approximately 63,000 square feet of space. In case you're wondering, it's the new physics building, which is to be located between Harrelson Hall and the old Bureau of Mines Building.

## Box Lunchroom

"We're moving out of Leazer," is the cheer coursing through the throats of students till over the campus. Our new cafeteria is scheduled to be managed by the student's friend, Slater Food Service. It is located between Bragaw and Tucker.

Chesterfield King's extra length adds to your pleasure in two ways: 1. the smoke mellows and softens as it flows through the longer length. 2. Chesterfield King's 21 tobaccos have more mild, gentle flavor to give.

# "Pop" Concert Series Offered

The Weavers—Entertainment New Arts, Inc.

By Grant Blair

New Arts, Incorporated represents a winning combination.

The combination is that of the Interfraternity Council and the College Union. The two organizations have combined forces to bring contemporary entertainment to 4,000 ticketholders during the coming year.

Tickets to the concerts were sold during registration Friday. According to reliable estimates, approximately 1,000 tickets were expected to be sold. The remaining tickets will be on sale at the College Union business office for the remainder of this week. All remaining tickets will be offered to the general public at a cost of \$5 per ticket after Monday, Sept. 24.

The first group scheduled in the series, The Weavers, is a well-known group, famous for their renditions of folk songs from around the world.

Thanks to New Arts, Incorporated, 4,000 ticketholders are

expected to attend the performances of individual persons and groups in a truly intimate setting, at a cost of only \$3 per person, according to Henry Bowers, director of the corporation.

The five performances will each present the groups to a limited number of students. Scheduled performers, along with their respective performance dates are: The Weavers, October 4; Josh White, October 20; Ferrante and Teicher, February 10; Ray de la Torre, March 6; and the Herbie Mann Sextet, April 26.

According to Mr. Bowers, New Arts, Inc. is a brand new corporation formed through the co-operation of the College Union and the Interfraternity Council. The purpose of the corporation is that of "combining" forces to bring quality entertainment at the lowest possible cost to the student.

Bowers stated that all performances will be presented in the coliseum. A limited audience will be preserved this year to retain "an intimate effect", but he also stated that the performers might be hired on a two-night basis next year if "the demand justifies it". Bowers

said that tickets would have been available to students only, unless the demand was not sufficient, in which case, he said, the tickets will be offered to the general public. Numerous requests have already been received from the public, according to Mr. Bowers.

New Arts, Inc., according to Bowers, was formed as a non-profit student corporation. Operating on a budget of \$12,000, it is operated by a board of directors composed of ten students, five from the College Union, and five from the IFC ranks. The organization has been underwritten by both the CU and the IFC, with each organization putting up half of a \$500 initial fee to form the corporation.

The Board of Directors are, for the CU: Willard Barbee, Jr.; Eugene Messick, Sr.; John Raymond Monroe; Herbert Sandborn; and Joseph Spencer; for the IFC, Richard Barefoot, William Watson, Charles Torrence, Robert Steinburg, and Jack Owen Watson.

Ex Officio members are: Henry Bowers, Richard S. Heaton, and Mrs. Claudia Marks.

# 'How I've Aged,' Sophomore Says

Curtis Moore

This is the story of orientation from the viewpoint of a sophisticated sophomore; one who has been here just long enough to remember being a freshman and have the attitude of an upperclassman.

You applied as an orientation assistant group leader and the first thing you did was to go through the weeding out process: was my Q. P. average good enough; did I know enough about the college; did I believe in the honor system; "If your group leader were absent and dimension arose in your group concerning the presence of a Negro, what would you do?" Then I went through the training sessions. Then the news letters, giving the word about what to do and when. Then I crammed my orientation manual during the early part of September. And then, N. C. State College beckoned its stud-grimed fingers to me and I headed towards the old stompin grounds to work for a week as an orientation assistant group leader.

As the first freshman walked into the room at 8:00 on the first day, I was just a little bit scared, but not too much—after all, he was only a frosh. For four hours on that Tuesday morning the new students asked questions and more questions, some of them stupid, but remarkably enough, most were

pretty good—for freshmen. I worked with them and explained dozens of different things, all vital to a successful campus life. Four times daily I explained the honor code, student government, the math exam, the IBM cards, the physical skills test, the hygiene test, etc. etc. etc.

A sample of frequent freshman questions are as follows: Where can I park my car?; How do I get to Harrelson?; How do I find a room in Harrelson without getting lost?; Should I pledge a fraternity?; What is a Q.P. average?; Where are the girls?; Should I work this semester?; Will I enjoy it at State—really? The answers are long, complicated, and arduous and sometimes correct.

Of course, in between telling the interested students about the objects of their curiosity, you've got to put with the ass in the back of the room who was a big man in high school and thinks that he knows it all. But then he'll flunk out anyway.

At 1:00 the last freshman walked out and I breathed a sigh of relief and leaned back, cigarette in mouth. A pretty good bunch of guys I told myself, certainly no more ignorant of college life than I was when I was a freshman. A little young, but—

New Appointments

# Faculty Gains Twenty-One

A nuclear research specialist, a former assistant to Dr. Frank P. Graham, and a nationally known author are among the 21 persons appointed to the State College faculty this year.

Leaves of absence were granted to 3 faculty members, while resignations were accepted from 11 members. One faculty retirement was also announced.

The appointments were announced by Chancellor Caldwell this summer, and were approved by President William C. Friday and the executive committee of the Consolidated University's Board of Trustees.

Dr. Melvin Rier, formerly a research specialist with Atomic International, has been appointed associate professor of nuclear engineering. Allard K. Lowenstein, who served during his career as a legislative assistant to Dr. Frank P. Graham when the latter was a U. S. Senator, and also served as foreign policy assistant to Senator Hubert Humphrey, was appointed as an associate professor of social studies. Dr. Guy Owen, Jr., author of *Season of Fear*, a novel, as well as a number of poems, has received an appointment as associate professor of English.

Other appointments include: Charles Douglas Bryant, assistant professor of agricultural education, and Norman M. Chanaksky, associate professor of psychology and education.

Joseph Nowlin Boaz, associate professor of architecture; Dr. Walter Carl Lauterman, research assistant professor of entomology; Dr. John Edward Griffith, associate professor of engineering mechanics; Dr. Donald Joseph Hansen, assistant professor of mathematics; David Alan Link, assistant professor of agricultural engineering.

Dr. Clifford K. Martin, extension assistant professor of crop science; Dr. Donald McDonald, assistant professor of civil engineering; Dr. James Clifford Williams, associate professor of mechanical engineering.

Dr. Richard Charles Axtell, assistant professor of entomol-

ogy; Dr. Charles Bingham Davy, associate professor of soil science; Dr. Robert Lyle Dough, assistant professor of physics; and Victor A. Jones, assistant professor of food science.

Newly appointed to the State College faculty are: two assistant professors of physics, Gerald Katsin and Dr. Jae Y. Park; two assistant professors of agricultural economics, Duane F. Neuman and Dr. Ralph J. Peeler, Jr.; and assistant professor of soil science, Dr. Raymond J. Miller; and an assistant professor of agricultural engineering, Rupert W. Watkins.

Three leaves of absence approved include:

William P. Bucher, assistant professor of physics, 12 months for research work at the University of Hamburg, Germany.

Abraham Holtzman, associate professor of history and political science, from January 31, 1962, until July 1, 1963, to use a SSRC grant for research in Washington, D. C.

John Kerr Whitfield, associate professor of mechanical engineering, 12 months to accept a Ford Foundation fellowship for Ph.D. study at Virginia Polytechnic Institute.

A continuation of a leave of absence was granted to Lindsay Russell Whichard, associate professor of English.

The following resignations were accepted:

Ralph Garnett Barnard, extension assistant professor of textile research, to accept the position of technical superintendent at Harriet Henderson Cotton Mills.

John William Bishir, assistant professor of mathematics, to accept a position in the Department of Statistics at the University of Florida.

George Charles Caldwell, associate professor of mathematics, to accept a position as assistant director of the School of Mathematics at Georgia Institute of Technology.

Paul Esch Gatterdam, research assistant professor of

entomology, to accept the position of Group Leader in Agricultural Chemicals with the American Cyanamid Corporation.

George Wallace Giles, professor and head of agricultural engineering, to continue his position as consultant on agricultural engineering for the Ford Foundation in New Delhi, India.

Richard Weinberg Goldsmith, assistant professor of English, in order to finish writing a book.

Roy Gussow, professor of architecture.

Ned Lynn Klumph, assistant to the dean of the School of Physical Sciences and Applied Mathematics.

Robert Roy Korfhage, assist-

ant professor of mathematics, in order to accept a position in the Department of Computer Science at Purdue University.

Wilfred Aves Walter, adjunct professor of economics, in order to accept the presidency of the Chemical and Fiber Corporation.

Joseph Thomas Lynn, associate professor of physics, will serve as acting head of physics for 12 months effective September 1 while Dr. Raymond L. Murray, head of the Department of Physics, is on leave of absence.

The faculty retirement was that of John G. Lewis, associate professor of knitting technology.

## N.E.A. Officers Elected

The North Carolina State College chapter of the National Student Education Association elected officers for the 1962-63 academic year last June.

The student officers are:

Vincent Revels of Lumberton, president; Grace Elrod of Ra-

leigh, vice president; Michael Dixon of East Bend, secretary; Todd Robert Scarborough of Hoffman, treasurer; and Gene Brewer of Newland, reporter.

The NEA is the professional association for college students who are preparing to teach. It

provides members with opportunities for developing personal growth and professional competencies and for gaining an understanding of the history, ethics, and program, of the organized teaching profession.

# Watson Named Music Director

J. Perry Watson, former assistant director of music at State College, has been promoted during the summer to the position of director of music.

Mr. Watson, whose appointment became effective on June 15 of this year, filled the va-

cancy created by the resignation of Robert A. Barnes last May 31.

Before coming to North Carolina State in 1959, Watson worked as staff arranger and drum major for the Air Force Band of the West from '50 to

53. In 1955, Watson left to work on his Master of Arts at Appalachian State Teachers College here in North Carolina. From 1955 to 1959, Mr. Watson taught in the public schools in Boone.

Donald B. Adecock fills the position vacated by Watson.

# Frosh Class Attendance Will Be Scrutinized

The Office of Student Affairs today reminded students that class attendance records will be kept by the faculty for all freshman classes and in any other classes as desired by the instructor.

In short, attendance of classes, laboratories, and exams is expected of all students. The regulations point out the student's responsibility to present to his instructor a valid excuse for any anticipated absence or any emergency absence which may have occurred.

Valid excuses for make-up work are limited to (1) sickness when verified by a form from the college infirmary or letter from a physician; (2) death or illness in the family when verified by letter from the family physician; (3) official college

duties or an approved college trip as certified by an appropriate college official; (4) court attendance as required and certified by the Clerk of Court; and (5) excuses for other reasons which may be accepted at the discretion of the instructor.

The policy bulletin suggests that excuses be given to the instructor before the absence or within five days following the student's return to class.

Instructors will report to the Division of Student Affairs those students creating scholastic problems by absenteeism.

How did they ever make a movie of

# Frosh PE Altered

Freshmen will be required to take physical education courses in four different sports groups before they are permitted to choose any Physical Education course they want to take beginning this year.

In announcing the new rule, Paul H. Derr, head of the PE Department said, "Practically every boy should have had experience in one of these fields. We want to be sure they get experience in each area."

The four areas are aquatic, developmental team, and individual.

The aquatic sports group consists of beginning swimming, intermediate swimming, life saving, instructors, and water sports.

The developmental sports are gymnastics, advanced gymnastics, weight training, boxing, wrestling, and track and field.

The team sports are basketball, football, soccer, softball, baseball, speedball, and volleyball.

The individual sports are badminton, handball, golf, tennis, advanced tennis, angling, squash, bowling, riflery, and roller skating.

One sport from each of these groups must be taken before the student can elect sports from any group. It has been recommended that Sophomores make up any of the groups which have been missed in Freshman PE. Transfer students are required to enroll un-

der the new arrangement, unless they have previous PE credit from their former school.

Transfer students taking Physical Education may be subject to this program if their records show that they have not taken all of the required programs.

The new program is based upon the recommendations of the Curriculum Committee of the Department of Physical Education. After a careful study of the situation, the committee presented these recommendations to the P.E. staff, where they were discussed, approved and put into effect. Individual sports were stressed, according to Mr. Derr, because they would be more applicable to the sport life after leaving school.

# PE Required For Coeds; Woman Instructor Employed

This fall, for the first time in the history of State College, freshman and sophomore coeds will be required to take physical education.

Also, for the first time this fall, a woman has been employ-

ed as a physical education instructor.

According to the Department of Physical Education, all regularly enrolled freshmen and sophomore coeds will be subject to a newly established wom-

en's physical education program which is similar to the male P. E. program. The new program for coeds has divided the P. E. courses into four general areas: team sports, individual sports, developmental phase, and hygiene.

Each freshman must pass a swimming test which requires that she knows how to swim and a written hygiene test and also participate in one sport in each of the four areas before she will be allowed to choose her courses on an elective basis. Sophomores will only be required to pass the swimming test, and then they will be on an elective basis. Any sophomore who has already taken swimming here will not be required to take the swimming test.

Freshmen and all future coeds must complete two years of P. E. in order to fulfill their requirements for graduation. This year's sophomores, however, will be required to have only one year's credit, and juniors and seniors will be exempted from the program.

Mrs. Betty Smaltz will be the only woman P. E. instructor. Prior to this fall she has been a P. E. teacher at Needham Broughton High School for the past seven years. She has also taught P. E. in Juniata College in Huntingdon, Pa., and in two high schools in the same state. Each summer she and her husband operate a youth camp at Umstead Park which is sponsored by the Sertoma Club.

Mrs. Smaltz is a native of Huntingdon, Pa. Her husband Bill is on the football staff here. Both are graduates of Penn State University where they were P. E. majors. They have two children.

Prior to September 1, women candidates for a Bachelor's Degree were not required to take P. E. The sophomores returning last week found the new program in existence.

None of the coeds had been informed of the new requirement before their arrival here last week.

Mrs. Smaltz stated that—despite the confusion the new program has created among the coeds—she felt that the coeds would enjoy the program. "The general attitude of the girls who took the swimming test Wednesday was favorable," she added. Twenty-five out of thirty-nine who took the test passed.

Team sports, including touch football, will be offered especially for the coeds this fall. Some of the courses will be co-recreational, but whenever there are enough coeds enrolled in one class, the course will be limited to coeds. Swimming classes for the coeds alone will be taught by Mrs. Smaltz. Woman's gym suits will be ordered later this fall.

Mrs. Smaltz stressed the importance of the coeds meeting their P. E. requirements as soon as possible. "We want them to take the courses in sequence so that the requirements will be completed by the end of the sophomore year. No one will be allowed to take more than one P. E. course during the semester. We are going to try to eliminate anyone overlooking the requirement. Each girl's record will be checked by a member of the P. E. staff this fall."

The new program was setup to accommodate an anticipated increase in enrollment of women students in the future.

## CE Building Rises

... And foot by foot, brick by brick, and rod by rod the new Civil Engineering building rises into the air. The three-story building will have 76,400 feet of floor space, and is designed to permit the future addition of seven floors.

## THE CLEAN WHITE SOCK

He not only wears the clean white sock; he is "clean white sock." It's a kind of confidence that comes from knowing the right thing to do; even if he decides not to do it. His clean white socks are by Adler. His girl is by his side, every bit as "clean white sock" as he is. Naturally they don't always wear white socks, they just act like they do. People who really swing are wearing the Adler SC shrink controlled wool sock. \$1.00.

# Unidentified Upperclassmen Selling M-1 Rifles To Frosh

By Doug Lientz

An unidentified upperclassman spent orientation week selling M-1 rifles to freshmen for use in Army ROTC.

When he first approached a freshman, he asked which ROTC section he was in. If the answer was Army, he proceeded to offer to sell his used army rifle for use in drill.

If the freshman's reaction was a dull sounding "I will want to buy everything I can second hand to save money," rather than a violent "What the hell are you trying to pull," the joker went on to recommend that the freshman buy it before someone else did.

At this point, most of the freshmen approached asked if

they really had to buy an M-1. Then the upperclassman protested violently at having his word doubted and offered to show the freshman the rifle, if that would convince him that he needed one.

When the freshman agreed to this, the upperclassman told him to meet him outside the storeroom in the southwest corner of the Coliseum basement where the rifle is stored "To avoid violating the rule against keeping firearms in the dorms."

When the unfortunate freshman arrived to see his rifle he had a long, disappointing wait ahead of him.

None of the freshmen approached thought of squelching the upperclassman by threatening to turn him in for soliciting without a permit.

According to the upperclassman, the project for this week is to sell an airplane to AFROTC freshmen.

## Over One Thousand Freshmen Select Engineering School

More than 1000 entering freshmen have selected courses of study in the School of Engineering this semester according to Dr. R. G. Carson, director of instruction for the school. The mechanical engineering department lead the other departments with an added enrollment increase of 353 freshmen.

Added to the 353 in mechanical engineering were 320 in electrical engineering, 207 in civil engineering, 80 in chemical engineering, 42 in industrial engineering, and 15 in mineral industries engineering.

## Spring Has Sprung, Fall Has Fell . . .

The three entering male freshmen shown above seem more than willing to assist the coed in finding her way around the campus. The scene is typical of those which took place all over campus last week as male and female freshmen alike tried to find "the quickest way to get there."  
(Photo by Chip Andrews)

## Polk Hall Additions

Freshman staff photographer Chip Andrews makes his Technician debut with this study of natural and man-made construction. The shot shows the additions to Polk Hall begun last year and nearing completion. The trees emphasize the campus's need for more natural beauty.

## Bramer Named Acting C E Head Four New Men Join Department

Although no replacement for Dr. R. E. Fadum, former head of the Civil Engineering Department has been chosen as yet, four additions have been made to the CE staff during the summer.

The office of department head was left vacant when Dr. Fadum became Dean of the School of Engineering. During the summer Professor C. R. Bramer was appointed to serve as acting head of the department until a permanent head can be found.

When asked if anyone had been selected to fill the post, Bramer said that several men have been considered, but no one has been found who could report before next June. He added that they hope to find someone who will report in January.

During the coming year, Dr. A. I. Kashef will be with the CE faculty as a visiting lecturer. He is a soil mechanics spe-

cialist from the University of Cairo.

Mr. J. G. Mills a specialist in patent law and member of a Raleigh law firm will give lectures on the subject of law and engineering.

Mr. Nick Costes, a soil mechanics expert formerly with

the U. S. Army Cold Regions Laboratory, has obtained a post as an instructor.

A post as assistant professor has been given to Dr. Donald McDonald. Formerly with Lockheed Aircraft's missile and space laboratory, he is an expert in structural engineering.

## ATTENTION STUDENTS

STUDENT ACCIDENT AND SICKNESS INSURANCE PLAN

### ACCIDENTS

Reimbursement will be made up to \$1,000.00 for each accident as described in the brochure.

### ACCIDENTAL DEATH AND DISMEMBERMENT

For loss within 90 days of accident of:

Life .....\$1,000.00

### DEPENDENT CHILDREN

Reimbursement under the accident portion of the insurance, for dependent children, is limited to \$250.00.

### SICKNESS BENEFITS—NON-SURGICAL

Reimbursement will be made for the actual expenses incurred but not to exceed \$250.00 as follows:—

**HOSPITAL ROOM AND BOARD**—ward accommodations—requiring confinement for more than 18 hours, —\$13 per day

**HOSPITAL CHARGES** for drugs, medicines, X-rays, examinations, use of operating room, etc.,

**PHYSICIANS' FEES** of \$4.00 per visit per day while confined in the hospital and no payment is made for surgery.

### SURGICAL BENEFITS

**HOSPITAL ROOM AND BOARD**—for ward accommodations—not exceeding 30 days. —\$13 per day

**HOSPITAL INCIDENTAL EXPENSE** (In-Patient) up to .....\$100.00

**SURGICAL FEES**—Benefits are in accordance with a graduated schedule ranging up to a maximum of .....\$300.00  
Surgery may be performed either in hospital or in a duly surgeons office.

### IMPORTANT

Pre-existing Conditions Are Covered

### ELIGIBILITY AND COST

All Students attending North Carolina State College on a full time basis, and their dependent spouse and children are eligible for this plan at a cost of:

Student .....\$12.00  
Student and Spouse ..... 25.00  
Student, Spouse and Children ..... 40.00

Married couples, who prefer, may obtain insurance on themselves without including children.

## D. H. Hill Library Changes Policies

Several changes in the policies of the D. H. Hill Library have been made. These policies will be printed in detail in Wednesday's edition of *The Technician*.

Briefly, the major change has been in the replacement of the old call card system for the Mc-Bee Key Sort marginal punched cards. This new system and other changes are explained in a six page pamphlet available in the library.

## Thief Hits WKNC Saturday Morning

Records valued at approximately \$40 were stolen from the WKNC radio station early Saturday morning.

Fingerprints were found on a plastic briefcase, also stolen from the station, that was discarded outside the Publications Center.

The records, which belonged to a WKNC staff member, were stolen from the business office around 1:00 a.m. Two staff members present in the office at that time had gone into the engineering room for a few minutes. They returned to find the records missing.

Included among the missing records are "Till" by Roger Williams, "Ports of Paradise" by Alfred Newman, and "Moon-

light in Tropics," "Rhapsodies for Lovers," and "Soul of Spain" by 101 Strings.

A member of the staff stated that ten days would be allowed for the person who took the records to return them to the radio station. If the records are returned, no charges will be made against the person. However, if the records are not returned, the fingerprints will be turned over to the Raleigh police.

The radio station is located in the Publications Center in the basement of the E. S. King Religious Center.

## WKNC Expands

(Continued from page 1)

channel board for its recording studio. It was obtained from UNC and repaired during the summer by the station's technical staff.

These expanded facilities have created a need for additions to the station's staff, and they are currently looking for announcers and engineers.

## ... Fun And Games ...

## Fall Rush Called Success By IFC

By Bill Bryan

Fraternity rush began last Wednesday and witnessed what was probably the biggest turnout of rushees in recent years.

Bill Watson, president of the Interfraternity Council, stated last night, "We are pleased with the enthusiasm shown during rush week. Approximately 700 men attended the IFC sponsored reception last Tuesday night in the College Union, and probably several hundred more men visited the fraternity houses. Also, Benny Phillips should be congratulated for his work as IFC rush chairman."

"Silent Week," a period in which fraternity men may not contact freshman rushees, began last night at 10 p.m. This is a time set aside for rushees to consider all they have seen and experienced during rush and make a decision as to their preference without outside interference.

All bids will be received in Wednesday's mail. Men receiving bids should complete the forms and turn them in immediately at the Student Affairs Office in Holladay Hall. Rushees accepting bids will be free to go to the house of their choice any time after noon on Friday.

## State Sig Kappas Hold Fall Rush; Initiate Two

Sigma Kappa sorority climaxed its rush week Saturday afternoon with its traditional Violet Party

Fourteen rushees and the active members participated in the final party which was held at the Alumni Building. Earlier in the week the sorority held a "spash party" at the Carmichael Gym on Tuesday night and an "oriental party" at Becky Shankle's home on Chester Road Thursday night.

On September 9, Becky Shankle of Raleigh and Kaye Perryman of Lexington, both spring pledges, were initiated by the sorority.

Present active Sigma Kappas are Ilona Evans, president; Peggy McConnell, first vice president; Sara Norman, second vice president; Anne Fakler, recording secretary; Fronie Ward, corresponding secretary; Alice Herter, treasurer; Mary Beth Key, Anne Parker, Kaye Perryman, Becky Shankle, Martha McLaughlin, Faye Fakler, Helen Wigg, and Harriette Williams.

The Sigma Kappas will send out bids this week.

## Pack: Young, Eager, Determined

### Edwards Call Sophs Best In History

By Eddie Bradford

No football coach likes the idea of rebuilding a team. But when this situation comes up, it is always a pleasant development to have good young players.

And the reason that coach Earle Edwards is not sending up any distress signals as he begins rebuilding is just that—good rookies.

Although first year varsity men will be sprinkled through the team, Edwards does not seem too worried. He stated, "This is the best group of sophomores I have had at State."

According to coach Edwards, it is an absolute certainty that more than a few newcomers to varsity competition will play key roles for the Wolfpack. However, it still remains to be seen just who these rookies will be.

A good example of the job facing Edwards in choosing new players is the left end position.

None of the first five men at that spot has ever been in a varsity game. "And three of them are running so close that they could swap positions every day for a week," Edwards explained. The top three that Edwards was speaking of are Whitey Martin, Ray Barlow, and Bob Faircloth. According to coach Edwards, one of these three will be the starting end.

Barlow, a 6'2", 204 pounder, is the fastest of the three, but at the same time is less experienced. He played for the 1961 frosh team, while the other two were varsity holdouts last year. Martin, who is 6'2", is the lightest of the three at 190 pounds. Faircloth stands 6'4" and weighs 202 pounds.

At tackle, Steve Parker, Glenn Sasser, Rosie Amato, and Lloyd Cooke could rise to a prominent role. "Parker (6' and 240 pounds) is the largest and strongest and at times is impressive," Edwards commented. Parker is currently on the second unit. Sasser, who is 6' and weighs 215 pounds, will man a third team position.

The center position is well filled with veterans, but this is not likely to keep Lou DeAngelis on the bench. While talking about DeAngelis, coach Edwards made this comment, "Defensively he may be the best of our first four."

Trying to figure the backfield picture from the rookie angle is nearly impossible.

Merrick Barnes is being groomed as a defensive quarterback to replace Tom Dellinger. Dellinger did the defensive work for Roman Gabriel for the last two seasons, so that Gabriel would not risk a possible injury on defensive play. And it

looks as if Barnes will be doing this same job for the new quarterback, which will be either Bill Kriger or Jim Rossi.

Pete Falzarano, a 210 pound fullback, and Ron Skosnik, a

### New Players Might Improve Record

By Eddie Bradford

Coach Earle Edwards enters the 1962 season with the youngest team in his nine years at State.

Pre-season predictions are not like they were a year ago; how-

ever, some new blood could be just the thing to improve upon last year's disappointing four to six record.

#### Inexperienced Q'Backs

One of the largest question marks on this year's team is the replacement of all-American quarterback, Roman Gabriel. Bill Kriger, a senior from Moon Run, Pa., and Jim Rossi, a junior from Asheville, are both trying for Gabriel's old position. However, they have had only twenty offensive plays between them in the last two years.

Neither Kriger nor Rossi are among the 15 returning lettermen, since they were used only sparingly last year. Both, however, are capable as runners, passers, and signal callers. Their success, and that of Merrick Barnes, will reflect what the success of the Wolfpack will be.

#### Lettermen Back

While there are no monogram men at the vital quarterback spot, junior halfbacks Tony Kozarsky, Joe Scarpati, and Mike Clark will be back after fine sophomore seasons. At fullback, which should be one of the Wolfpack's strongest positions, lettermen Roger Moore and Dave Houtz are back. Houtz did almost all of the Wolfpack's punting last year. He averaged 38.9 yards on 59 kicks and set a new State record with an 83 yard punt against Wyoming. He also averaged 4.4 per carry last year, a very good performance for a sophomore.

There are three lettermen each at center, guard, and tackle.

Greensboro's Bert Wilder returns from military service to head the tackle corps, along with Chuck Wachtel and Fred Bernhard. Playing along side of guards Skip Matthews, the captain of this year's Wolfpack team, and Harry Puckett, is Statesville junior Bill Sullivan, who should be one of the stand-out blockers in the Atlantic Coast Conference. Center, which had no experienced performers last year, has three men who gained letters in 1961, Oscar Overcash of Landis, figures to play on offense, while Bob Royer, Mt. Carmel, Pa., junior, and Walt Kudryan will also share the pivot duties.

Don Montgomery, the only letterman end on the squad, played only four games last year due to a broken leg incurred after receiving a pass in the Alabama game. Therefore, there should be a real fight for the other end position.

### 1962 Wolfpack Football Team

LEFT TO RIGHT: 1st Row: Bert Wilder, Fred Bernhard, Harry Puckett, Walt Kudryan, Skip Matthews, Bill Kriger, Roger Moore, John Golden.  
2nd Row: Don Montgomery, Pat Powell, Bill Sullivan, Silas Snow, Dave Houtz, Merrick Barnes, Bob Faircloth, Ron Krall, Jim Rossi.  
3rd Row: Lloyd Cooke, Tony Kozarsky, Mike Clark, Whitey Martin, Oscar Overcash, Rosie Amato, Bob Royer, Dave Carter, Bob Bussard, John Irvin.  
4th Row: Dave Stout, Joe Scarpati, Chuck Wachtel, Roy Wood, Les Young, Vance Cockerham, Sam Saunders, Jerry Krecicki, Sam Sorce, Mike Malone, Will Mann.  
5th Row: Pete Falzarano, Stacey Gillen, Ron Skosnik, Jack Schafer, Lou Krezanosky, Lou DeAngelis, Don Smith, Golden Simpson, Jimmy Deaton, Horace Moore, Larry Brown, Bennett Williams.  
6th Row: Doug Brackett, Shelby Mansfield, Jerry Fuller, Jerry Topinka, Tony Golmont, John Turco, Abby Mauro, Joe McCall, Deal Watkins, Pete Starr, Don Hamilton.  
7th Row: Tom Clausi, Manager, Page Ashby, Bill Hall, Gibbons Sloan, Ray Barlow, Ronnie Clark, Charles Bradburn, Bruzz Perrou, Glenn Sasser, Biff Mullins, Dan Golden, Steve Parker.  
8th Row: Assistant coaches Al Michaels, Ernie Driscoll, Carey Brewbaker, Johnny Clements, Bill Smaltz and head coach Earle Edwards.

## Halfbacks Expected To Star

When the Wolfpack invades Kenan Stadium to meet Carolina on September 22 it will be led by two junior halfbacks.

Tony Kozarsky and Joe Scarpati are looking forward to a great year after returning from a fine sophomore season. Kozarsky and Scarpati have been rated as two of the best halfbacks in the Atlantic Coast Conference, and the chances of State having a winning season depends greatly on these two players.

Kozarsky, a 5'8", 170 pound junior, hails from Bridgeville, Pa. Tony, who has been called "the best runner on the squad," by coach Edwards, will be playing left halfback (diveback) again this year. He led the Wolfpack in punt and kickoff returns last year, caught 5 passes for 34 yards and a touchdown, and gained 112 yards

rushing. While playing on the frosh team in 1960, Tony scored 42 points, and had seven runs,

with either kicks or from scrimmage, over 50 yards each. Joe Scarpati, at 5'10" and 170

pounds, is the other man of the Wolfpack's halfbacks. The 19 year old right half, who comes from Fanwood, New Jersey, is a math education major who carries better than a "B" average.

"Joe will rank as one of the Atlantic Coast Conference's best performers before he finishes at State." This comment was made by coach Edwards when asked to comment about Scarpati.

Joe rushed for a 3.8 average on 43 carries, caught 14 passes for 150 yards and two touchdowns, and scored a total of 18 points in his 1961 season. Scarpati was also named to the Atlantic Coast Conference's all-Academic team last year.

Unless something drastic happens both Kozarsky and Scarpati are good bets for All-Star honors.

Joe Scarpati—44, and Tony Kozarsky—40.

## Sidelights

North Carolina State's Ed Spencer complained about "feeling lousy" before winning the 100-meter butterfly race at the Men's National AAU championships recently.

When he returned home to Wallingford, Pa., a visit to his family doctor determined that Ed had had virus pneumonia.

"If he had been feeling right, Ed would have easily bettered the world mark for the event. As it was, he just missed it by three-tenths of a second," said State coach Willis Casey.

A doctor ordered two weeks rest, involving no physical exercise, preventing Spencer from swimming in a meet last weekend against the West German National all-Star team in Philadelphia.

Spencer who currently holds both the NCAA and AAU 100-meter butterfly titles, will be a senior this year.

\*\*\*\*\*

Most of the players from North Carolina on the N. C.

### Sophs

(Continued from page 1)

190 pound halfback, may outshine all the other sophomores in backfield action this year. It is very possible that these two boys will get to see a fair amount this season.

How well these new faces turn out this season will help decide what part the Wolfpack will play in the 1962 Atlantic Coast Conference title race.

State football squad already knew the Wolfpack's new trainer, Al Proctor, before both reported for duty on Sept. 1. Proctor had been trainer for the East-West and Shrine Bowl all-star games the past few years, before replacing Herman Bunch on the State staff.

\*\*\*\*\*

Bill Sullivan, North Carolina State's candidate for all-star guard honors this year, is a versatile athlete. The Statesville native won his football letter last year as a sophomore; took the 1962 Atlantic Coast Conference heavyweight wrestling title; and is a former Western North Carolina high school doubles champion in tennis.

\*\*\*\*\*

Two members of North Carolina State's 1962 baseball team are doing well in summer professional baseball.

Pitcher Bob Conner, of Wilmington, entered the final week of play for Middlesboro in the Appalachian League with a 6-1 record, ranking in the top five in earned run averages, and striking out better than one man per inning pitched.

George Hayworth, of High Point, and in the Milwaukee Braves farm system, was promoter to Eau Claire of the Class C Northern League for the remainder of the season. Hayworth, like his two uncles who played major league ball, is a catcher.

## Ambitious Intramurals Planned

By Eddie Bradford  
This year's intramurals program will offer thirteen competitive sports for the dormitory, fraternity, and off-campus leagues.

The fall sports will head up this year's program with touch football, volleyball, bowling, golf, and swimming. The winter program calls for basketball, table tennis, handball, and badminton; while, spring competition in softball, horseshoes, tennis, and track complete the activities. Team competition is

highly spirited and when this coming season's play begins there should be some hard fought games.

There will be an athletic director's meeting in the new gymnasium at 7 p.m. Tuesday to confirm all the details about the first football games. There will also be a football officials' clinic at 4 p.m. Wednesday to train officials for the intramural games.

The fraternity football league play will begin Monday, September 24 and the dormitory

play Wednesday, September 26. Defending champs in fraternity football are the Sigma Nu's, who had an impressive 9 wins and 0 losses last year. Becton dormitory will be defending their crown as dorm football champs. They will be hard pushed to equal last year's record of 8 wins and 0 losses, unless they are extremely lucky.

There is also a special open Fall golf tournament starting soon.

There will be two divisions, a student division and a faculty-

staff division, with flights of ten players. The flights will be based on qualifying scores, and the low man in each flight will receive a trophy. The fee for the 54 hole tournament, which will be held at Wildwood course, will be \$3.00. Anyone wishing to play can qualify for 18 holes at Wildwood on September 17-21 or the 24-28. More information about the tournament is available at the new gym.

Under the direction of Art Hoch, who begins his ninth year

(See INTRAMURALS, page 3)

## State Teams Composed of North Carolina Players

These North Carolina players rank high on the 1962 Wolfpack team. Left to Right—End Done Montgomery, Guard Bill Sullivan, Guard Skip Matthews, Center Oscar Overcash, Guard Harry Puckett, Tackle Chuck Wachtel, Tackle Bert Wilder. Second Row—Coach Edwards, Fullback Roger Moore, Quarterback Jim Rossi, and Halfback Mike Clark.

# Gabriel Leaves Large Footsteps To Be Filled

**Editor's Note:** Although Roman Gabriel has graduated from State College and is now playing for the Los Angeles Rams pro football team, we thought that since he was one of the best and most colorful athletes in State College athletic history that a story on the many honors he won while representing State College would prove of interest to our readers.

By Carlos Williams

Number 18 will never be worn by another N. C. State football player. Roman Gabriel's famous 18 has been retired from further competition and placed in a trophy case in Reynolds Coliseum, along with a listing of his achievements as a player and student.

Gabriel, all-America quarterback, almost completely rewrote the State College football record books during his three varsity seasons.

Heading the list of Gabriel's

statistical achievements is his distinction as Most Accurate Passer in NCAA's listing of top 25 passers in the nation in 1960, based on a record of 60.4% of 134 pass attempts. In Total Offense he was placed 8th in the nation in 1960, and 14th in 1961. In Passing Offense (number of completions) he ranked 6th in the nation in 1960 and 3rd in 1961. In 1960, he was 54% of N. C. State's team offense and 51.4% in 1961.

Gabriel received All-America recognition from Football Writers of America (1960 and 1961), Football News (1960 and 1961), American Football Coaches Association (1960 and 2nd team 1961), Time Magazine (1961), United Press International (2nd team 1960 and 1961), and from Newspaper Enterprise Association (2nd team 1960 and 1961).

During his three year college football career, Gabriel was awarded many other honors and awards. Among these were Academic All-America Quarter-

back, as selected by American People's Encyclopedia (1960); "Athlete of the Year" in the Atlantic Coast Conference (1960); "Football Player of the Year" in the Atlantic Coast Conference (1960 and 1961).

Other such awards include the State College Alumni Association Award, as top senior athlete and student (May 1962); Sports Illustrated National "Back of the Week" (Nov. 18, 1961); United Press International's National "Backfield of Week" twice in 1960; and Associated Press "ACC Back of the Week" four times during the 1960 season.

In addition to intercollegiate participation, Gabriel was chosen Co-Captain of the Shrine East-West Game in San Francisco, 1961 and Co-Captain of

ROMAN GABRIEL

the East team in the American Football Coaches Association All-America Bowl in Buffalo, June 1962. He was also picked for the Hula Bowl in Honolulu, January, 1962, and the College All-Star Game vs. the Green Bay Packers, Chicago, August 1962.

According to State College records, Roman Gabriel holds ACC records for the following:

- Most Yards Passing (in one game) 279
- Most Passes Completed (in one game) 23
- Most Passes Completed (total) 285
- Best Pass Completion Percentage 56.3%
- Fewest Passes Intercepted (400 minimum attempts) 20

## ANOTHER YEAR, ANOTHER DOLLAR

With today's entry I begin my ninth year of writing columns in your school newspaper for the makers of Marlboro Cigarettes.

Nine years, I believe you will agree, is a long time. In fact, it took only a little longer than nine years to dig the Suez Canal, and you know what a gigantic undertaking that was! To be sure, the work would have gone more rapidly had the shovel been invented at that time, but, as we all know, the shovel was not invented until 1946 by Walter R. Shovel of Cleveland, Ohio. Before Mr. Shovel's discovery in 1946, all digging was done with sugar tongs—a method unquestionably dainty but hardly what one would call rapid. There were, naturally, many efforts made to speed up digging before Mr. Shovel's breakthrough—notably an attempt in 1912 by the immortal Thomas Alva Edison to dig with the phonograph, but the only thing that happened was that he got his horn full of sand. This so depressed Mr. Edison that he fell into a fit of melancholy from which he did not emerge until two years later when his friend William Wordsworth, the eminent nature poet, cheered him up by imitating a duck for four and a half hours.

But I digress. For nine years, I say, I have been writing this column for the makers of Marlboro Cigarettes, and for nine years they have been paying me money. You are shocked. You think that anyone who has tasted Marlboro's unparalleled flavor, who has enjoyed Marlboro's filter, who has revelled in Marlboro's jolly red and white pack or box should be more than willing to write about Marlboro without a penny's compensation. You are wrong.

Compensation is the very foundation stone of the American Way of Life. Whether you love your work or hate it, our system absolutely requires that you be paid for it. For example, I have a friend named Rex Glebe, a veterinarian by profession, who simply adores to worm dogs. I mean you can call him up and say, "Hey, Rex, let's go bowl a few lines," or "Hey, Rex, let's go flatten some pennies on the railroad tracks," and he will always reply, "No, thanks. I better stay here in case somebody wants a dog wormed." I mean there is not one thing in the whole world you can name that Rex likes better than worming a dog. But even so, Rex always sends a bill for worming your dog because in his wisdom he knows that to do otherwise would be to rend, possibly irreparably, the fabric of democracy.

*"I better stay in case somebody wants a dog wormed!"*

It's the same with me and Marlboro Cigarettes. I think Marlboro's flavor represents the pinnacle of the tobacconist's art. I think Marlboro's filter represents the pinnacle of the filter-maker's art. I think Marlboro's pack and box represent the pinnacle of the packager's art. I think Marlboro is a pleasure and a treasure, and I fairly burst with pride that I have been chosen to speak for Marlboro on your campus. All the same, I want my money every week. And the makers of Marlboro understand this full well. They don't like it, but they understand it.

In the columns which follow this opening installment, I will turn the hot white light of truth on the pressing problems of campus life—the many and varied dilemmas which beset the undergraduate—burning questions like "Should Chaucer classrooms be converted to parking garages?" and "Should proctors be given a saliva test?" and "Should foreign exchange students be held for ransom?"

And in these columns, while grappling with the crises that vex campus America, I will make occasional brief mention of Marlboro Cigarettes. If I do not, the makers will not give me any money.

*The makers of Marlboro will bring you this uncensored, free-style column 26 times throughout the school year. During this period it is not unlikely that Old Max will step on some toes—principally ours—but we think it's all in fun and we hope you will too.*

## Intramurals: '62-'63

(Continued from page 2)

as head of intramurals, the intramural program at State has reached a point where more than 50% of the student body participates every year. Hoch has been one of the main reasons behind the interest that the students have in intramural athletics.

Information about the other four Fall sports will be available from the different athletic directors after their first meeting next week. Therefore, anyone who is interested in participating in intramural athletics should contact his athletic director.
