## Theta Tau Tries To Rent House

By Dick Paschall

State College's only professional engineering fraternity, the Rho Chapter of Theta Tau Fraternity, has been searching the highways and byways around the campus for a house to call its own. Obstacles from many sources have blocked successive attempts by the fraternity to even rent a house.

According to Edd Hauser, president of Theta Tau, the fraternity has been interested in obtaining a house for over a year. Every lead on a suitable house has been literally "shot down" by either the college administration or the City of Raleigh.

Asked to state the policy of the State College administration regarding the efforts of Theta Tau, Assistant Director of Student Affairs Tom Covington replied, "The college will not permit fraternities or any student organizations to move off campus into any house."

Clearing up any misgivings or misunderstandings created by this policy in recent weeks, Covington cited several reasons for his statement.

"The existing houses occupied by fraternities near the college have inadequate electrical and plumbing facilities to serve the large number of boys living in the houses. In many instances the small electrical services create dangerous fire hazards."

Covington further emphasized the importance of good rela-

tions with the neighborhoods surrounding the college, specifically those neighborhoods presently containing fraternities.

Another hindrance to the brothers of Theta Tau has been the City of Raleigh. Zoning laws have eliminated several choices for a future house. The fraternities presently situated on Clark Avenue are existing in their present locations only by the good grace of the city. These particular houses are in an area zoned for residential use only. As the houses on Clark Avenue were occupied by the fraternities before the present zoning laws were passed, they have been allowed to remain. Fraternities on Hillsboro Street are in an area zoned for offices and institutions and are legally entitled to their present existence.

The city electrical inspector, Charles P. Separk, stated that the only house that has recently been inspected for defective wiring was the SAE house at 3414 Hillsboro Street. This particular inspection was requested by the city fire prevention board as a result of a fire inspection. Findings from this inspection of April 26, 1962, were that the SAE house is in very dangerous condition from a wiring standpoint.

The 60 Amp service to the house is one third what it should be. Drop cords running around the baseboards in the rooms create further fire hazards. The kitchen appliances need heavier services.

Separk stressed that, to his knowledge, this was the only house occupied by a State College fraternity that has been electrically inspected in the past few years. It is his belief, and one shared by Covington, too, that the other houses are just as inadequately wired with the exception of the Lambda Chi house which was recently rewired.

The administration will back (See THETA TAU, page 3)

## State Senator Asks Lowering Of Voting Age

"It is now time to lower the voting age to 18," said Raleigh lawyer and State Senator John Jordan, who was the speaker last night at the State College YDC meeting in the C. U. Theater. "Young boys, as well as girls, are more mature both emotionally and intellectually than ever before," he stated.

Jordan suggested that young people get out and take part in the campaigns to learn about politics firsthand. He emphasized that young people should be elected to high offices and that college students begin their political apprenticeship in school.

## French National Orchestra To Perform Here Tuesday

The French National Symphony in its natural habitat, the Theater des Champs Elysses, in Paris. The Symphony will appear in the Coliseum next Tuesday evening at 8 p.m.

## 'Friends' Series Begins Season

The first foreign orchestra to appear at the new Philharmonic Auditorium in New York's Lincoln Center for the Performing Arts is also the first to appear in the new "Friends of the College" series this year.

The French National Orchestra, conducted by Charles Munch, will appear Tuesday at 8 p.m. in the William Neal Reynolds Coliseum.

Students and their dates will be admitted free. Others may be admitted by season ticket only.

Charles Munch, one of the world's best known conductors, retired last spring as Musical Director of the Boston Symphony. He is still well known in Europe from his tours with the Boston Symphony in 1952 and 1956. He brought the French National Orchestra to the United States in 1948 for its first tour of the North American Continent, and received high acclaim from both critics and concert-goers alike.

The one-hundred and ten piece orchestra will present a varied program next Tuesday. The program, which Munch selected, is Le Corsaire by Berlioz; Sernade by Milhaud; Bacchus et Ariane by Rouelle; La Mer by Debussy; and Daphnis et Chloe, and Suite no. 2 by Ravel.

At its home theatre, the Theatre des Champs Elysses, in Paris, the orchestra performs weekly. It plays the standard romantic and classical selections but concentrates on the music of France. It gives its attention to music of every period in French history, including the works of this century from Debussy to Poulenc.

## State Alumnus Runs For President Of N. C. Young Democrats Club

A State College alumnus is running for the presidency of the North Carolina Young Democrats Club at the State YDC Convention which starts tonight.

J. K. Sherron, who graduated from State in 1959, recently announced his intentions for the top state office.

Sherron was vice-president of the State College chapter of the YDC while attending the college, and was active in other campus activities. He was a member of the Student Legislature, the football team, the monogram club, and other student organizations.

He is presently president of the Wake County Young Democrats and is a member of the Wake County Democratic Ex-

ecutive Committee.

Commenting on his candidacy, Sherron said, "I deeply and most sincerely believe in the principles of government supported by the Democratic Party on the precinct, county, state, and national levels. For many months now, I have been asked and encouraged by leading Democrats, from Manteo to Murphy, to run for the high office of state president. With the pledged support of hard-working and enthusiastic Democrats from all walks of life, in every county of North Carolina, I have decided to seek the office and will campaign very vigorously between now and the state convention, which begins in Greensboro, Thursday, October 11, where the office will be decided.

"If elected to the office of

state president, I will not lead the young Democrats of North Carolina down the easy road, but one of service and sacrifice to our Party."

Sherron has been endorsed by the Cabarrus, Currituck, Clay, Wake, Camden, and Cherokee Young Democrats Clubs.

He is married and has two children.

## CU Convention

Eight College Union officers and three College Union staff members left today for the regional convention of the Association of College Unions.

According to Lee McDonald, assistant CU social director, the convention, which will be held in Greensboro at Woman's College, will be the fifth one held in this region.

## Notices

There will be an organizational meeting of the State College Woman's Chorus on Wednesday, October 17, at 7 p.m. in Pullen Hall.

\*\*\*\*\*

A London Fog jacket has been found in Daniels Hall. The owner may claim it by calling Herbert Ashley at 832-3169.

\*\*\*\*\*

The CU Drama Workshop will meet tomorrow night at 8 p.m. in Pullen Hall.

## Woman's College Group Presents 'Pajama Game'

The Woman's College version of the Broadway hit, Pajama Game, will be presented in the College Union October 21 at 8 p.m. This will be the first appearance in a five week tour for which the play is scheduled.

## Kirk Predicts UN Downfall; UN Advisor Says 'No Chance'

By Gene Henriksen

Dr. Russell Kirk, professor, editor, and author, told an Apollo Club audience last night that the U. N. has been oversold to the U. S. public. "The U. N. will fall as did the League of Nations," he said.

In reply, Mr. James M. Ludlow, U. N. advisor, said, "The U. S. isn't about to see the U. N. go under." The U. N. is too valuable to the U. S. as an instrument of American foreign policy, according to Ludlow.

They made these statements in a debate on "The Place of the United Nations in American Foreign Policy."

Dr. Kirk emphasized that the U. S. cannot follow the policy of the U. N. because the U. N. has no coherent policy. The only resemblance of a U. N. policy is the personal opinions of the Secretary-General or the whims

of the temporary majority.

Mr. Ludlow agreed with Dr. Kirk on the subjects of the U. N. being oversold to the public and that the U. N. shouldn't be the sole channel for the U. S. foreign policy, however, according to Ludlow, the U. N. has an important place in U. N. foreign policy, but it is only a part of our policy. The U. N. is an important economic agency in aiding underdeveloped nations and helps to keep Russian aid out.

They also disagreed on the amount of money the U. S. should put into the U. N. Ludlow said that at the present the U. S. is footing about one third of the U. N.'s bills. Dr. Kirk said this would be true if other nations would pay their assessments on time and that their delay in paying ran the percentage of U. S. payments up to 40%.

Dr. Kirk quoted an Ohio Congressman who said "anyone who would buy U. N. bonds must have holes in his head." Personally Dr. Kirk thought our purchase of bonds would be a mistake and that U. N. financing "would go on forever". Ludlow disagreed and said that

(See KIRK, page 4)

## Free Theater Shows

The College Union Theater Committee has arranged for four free shows for students during this semester.

These are the Raleigh Little Theater productions of Bells Are Ringing and Write Me a Murder. The Everyman Players' production of The Book of Job, and the College Union Talent Show. The first show, Bells Are Ringing, will be open to students October 23 and 24.

## ... Will Depend On The Attitude

Since the removal of fences from the State College campus, the problem of paths across the grass has been compounded. We have no objection, to last year's removal, by Student Government, of the fences. However, it has been previously pointed out by this paper that a simple pipe and chain arrangement would be sufficient.

Of course, pipes and chains, like everything else, cost money.

Money is a unique item at a state-supported institution. There is never, ever, enough to go around. According to J. McCree Smith, College Engineer, the college simply does not have enough money to spend on decent fences.

The burden of campus beautification, must fall on the student body.

The student body, represented by the Student Government, faces two choices.

The Student Government can ask the students to contribute a specified amount toward the financing of a project to build decent fences on campus. Whether or not this would be practical will depend on the attitude of the students.

Or the Student Government can ask the student body to refrain from walking on the grass. Whether or not this would be practical will depend on the attitude of the students.

There are a number of campuses which enforce the idea of campus beautification through the use of student pride. The University of Kentucky is one of the best examples of this type. Students of this university have had a pride of their "blue grass" campus instilled in them as freshman and no one walks on the grass.

There is a third alternative which also depends on the attitude of the students. The students can allow paths to be tracked across the campus and replace "cow fences" by "cow paths."

## One More Day

Four years seems like a very short time, but in the life of a student body it is a generation. The green freshmen of this year will be the campus leaders of 1965.

Four years ago, the name of almost every man now in a top campus position appeared on the ballot for freshmen elections. In fact, we would say that the people who lead their classmates and their school are almost completely determined during their freshman year.

For these reasons, anyone who feels that he would like to be a Big Man on Campus some day should sign up for freshmen elections. There is only one day left.

## For Freshmen

# Advanced Courses Offered In Math, Chem, English

By Dwight Minkler

State College is the place for brains.

Advanced programs have been and will be offered to superior freshman students in many of the departments at State. The superior student programs which affect most students are in the departments of mathematics, chemistry, and English.

During Orientation Week, tests were given in math and chemistry to determine who would be enrolled in the programs. In addition, all freshmen who scored above 550 on the verbal sections of the College Board Exams were sent a written invitation to participate in the advanced English program, course 112A. Four years of high school math are prerequisite for the math courses. Approximately 150 students tried their hand at the chemistry placement test.

Those who passed the math test were eligible to enter the advanced course 101S. After a four weeks trial period which ends this Saturday, those who have shown capability to do the advanced work will be officially enrolled in Math 102. If a "C" or better is maintained in 102, nine hours credit will be given—five hours credit by examination and four hours credit based on the grade made in 102.

The remaining students who do not make the grade in the special section will drop into the regular 101 course with no mention of the change made on their records.

Of the approximately two hundred students who will continue in Ma 102, about fifty of these will be selected at the end of this semester to participate in a program designed to promote a deeper interest in mathematics, according to Dr. John Cell, head of the Math Department. The same text as is used in the regular sections will be followed, but the professors will carry the students into deeper discussions and problems, Dr. Cell said.

Dr. Lodwick Hartley, head of the English Department, said many students declined invitations to the advanced course because they themselves felt that they had had inadequate training in composition. The first two themes by the frosh who accepted the invitation determined whether they remained in the course.

Emphasis in this advanced course is placed on individual participation in class discussion, according to Dr. Hartley. Dis-

cussion will center around stories and poems which the class will read during the semester. Among the selections which have been chosen are The Adventures of Huckleberry Finn, Return of the Native, Look Homeward, Angel, and Othello.

Moreover, during the year this class will have direct talks with several literary figures. Granville Hicks, a critic; Carson McCullers, a novelist; Edward Albee, a playwright; and Reynolds Price, a novelist, will form the basis of the program.

Six hours credit will be given to those who make a "C" or better on this English course.

Twenty-three of the students who applied for the advanced chemistry course were accepted. Dr. Gilbert Long, who is teaching this group, stated that the course merely crammed one year's work into one semester. He also added that the students selected are doing better than was expected and that the grade for qualification for this course may be lowered next year.

A similar article on opportunities for superior students above the freshman level will appear in a later issue of The Technician.

## Notice

Student Government Secretary John Carr has announced that orders for Student Government keys are now being taken. All members of the legislature, committees, Honor and Campus Code Boards, SG officers, members of the CUSC, and all other SG agencies may order keys by calling Carr at TE 2-9148.

## Publication Policy

All unsigned editorials are by the Editor and all others will be signed with the initials of the writer.

We invite letters to the editor, but reserve the right to edit or not to print any letter received. All letters to the editor must be signed, and names will only be withheld in cases in which the writer's grades may be affected.

Deadlines for issues are 7:00 p.m. the night before the issues are delivered. Anyone wishing to have a story or notice printed in The Technician should drop it by the offices in the basement of the Y.M.C.A.

## CU Weekend Movies

Above are two scenes from the weekend's movie fare offered by the College Union Theater Committee. Showing this weekend in the Nelson Textile Auditorium will be five cartoons, including the Road Runner, Speedy Gonzales, & Pepe LePew. The featured movie will be "The Set Up", a story of the boxing world.

## "Wait And See"

# Machine Teaching Evaluated

By Joe Clocker

After its experience with teaching machines this summer, the English Department has adopted a "wait and see" attitude, according to Dr. Jack Suberman, chairman of the Freshman Composition Program.

The Department feels that the present programs in the machines—which were used in a remedial English class—are unsatisfactory and has no plans to make extensive use of them at the moment.

Future use of the machines will depend on better programs for them, said Dr. Suberman, but their use is in any case likely to be limited to clinical instruction for individual students.

Dr. Lodwick C. Hartley, head of the English department, said that the machines are being used by the teachers on a voluntary basis with the present programs.

Nine students in a control group, which underwent formal classroom instruction, and eleven students in an experimental group, which used the machines, were the "guinea pigs" in this test. The machines were programmed to teach spelling, punctuation, and grammar only, while the actual theme writing was done in class and corrected by the instructors.

An evaluation questionnaire was administered to the experimental group at the end of the course. According to the official report on the test, "The findings indicate an uncertainty in the students' attitudes towards

programed instructions, which makes it difficult to draw clear-cut conclusions."

As the result of a comparison between the control group and the experimental group, the ex-

# Dorm Intramurals

By Mike Barnhill  
Rugged competition was prevalent as dormitory intramurals moved through their third week of play.

Bragaw North copped its second golf title in as many years, although it shared top honors with an Owen team last year, by shooting an even par 216 for two rounds of the 9-hole pitch and putt golf course.

The volleyball schedule was full Tuesday night with all the teams playing except Tucker #1. The action featured 3 upsets which should change the outlook of the new season. Watauga upset the defending champions Bragaw North by a score of 2-1. Owen #1 shut-out last year's runner-up Bragaw South 2-0. McOC shut out a strong Alexander team by 2-0, while Bagwell white-washed Tucker #2 2-0. Berry also edged WG4S 2-1 and Syme took Turlington 2-1.

The football season neared its midpoint Wednesday afternoon as three teams really showed their power, while the other four games were nip-and-tuck battles all the way. Alexander put on the biggest display of power shown by a team this year as they ran over a fairly good Owen #2 team by a score of 33-13. Hale led the way for a well-balanced Alexander team as he hit Buffalo for three TD's and Cartwright for another, besides running one over himself. Earp caught two passes for both Owen #2 TD's.

Owen #1 completely overwhelmed a WG4S team by a 20-0

score with quarterback Nance leading the way for the runners. A strong Watauga team, led on offense by Corn, West, Lineburger, and Yokeley, and on defense by Bowling, defeated Bagwell 20-6. Bagwell's lone score was on a pass from Sykes to James.

Two other games were decided by yardage, one by a single point and the other by a touchdown. Turlington and defending champion Becton would have tied at 6-6 on touchdowns by Moore of Turlington and Butler of Becton. However, Turlington took the game on yardage 120-57. Bragaw South and Bragaw North finished in a 6-6 deadlock, but South was awarded the game on yardage 86-80. Stutts scored the lone Bragaw South score.

In other action McOC rallied in the fourth quarter to overcome a 12-6 Syme lead and took the game 13-12. Quarterback Whisenant passed to Smith and Snead for the two TD's and hit Snead again for the all-important extra point.

Tucker #1 out-battled Tucker #2 for a 13-6 victory with quarterback Leonard leading the plays.

## Theta Tau

(Continued from page 1)

any effort by Theta Tau to move onto the now-being-constructed fraternity row, according to Covington, but this will call for long-range planning. Theta Tau president Hauser stated that Theta Tau "will do everything possible to obtain financial backing to eventually move onto fraternity row." Hauser said, "We wish to cooperate fully in the best interest of our fraternity and State College."

## BAHA'I WORLD FAITH

### Search After Truth

Man must be a lover of the light no matter from what day-spring it may appear. . . He must be seeker of the truth no matter from what source it comes. . . A rose is beautiful in whatsoever garden it may bloom. . . In order to find truth we must give up our prejudices, our own small, trivial notions; an open receptive mind is essential—

Abdu'l Baha

### A World United

That one indeed is a man who, today, dedicateth himself to the service of the entire human race. Let your vision be world-embracing rather than confined to your own self. Ye are all the fruits of one tree, the leaves of one branch, the flowers of one garden. . . The fundamental purpose animating the Faith of God and His Religion is to safeguard the interests and promote the unity of the human race, and to foster the spirit of love and fellowship amongst men. . . The earth is but one country, and mankind its citizens—

Baha'u'llah

The lovers of mankind, these are the superior men, of whatever nation, creed or color they may be. . . God is no respecter of persons on account of either color or race.

Inasmuch as all were created in the image of God, we must bring ourselves to realize that all embody divine possibilities — 'Abu'l-Baha. From the BAHAI WRITINGS.

## Our future is in the hands of men not yet hired

At Western Electric we play a vital role in helping meet the complex needs of America's vast communications networks. And a career at Western Electric, the manufacturing arm of the nation-wide Bell Telephone System, offers young men the exciting opportunity to help us meet these important needs.

Today, Western Electric equipment reduces thousands of miles to fractions of seconds. Even so, we know that our present communications systems will be inadequate tomorrow; and we are seeking ways to keep up with—and anticipate—the future. For instance, right now Western Electric engineers are working on various phases of solar cell manufacture, miniaturization, data transmission, futuristic telephones, electronic central offices, and computer-controlled production lines—to name just a few.

To perfect the work now in progress and launch many new communications products, projects, procedures, and processes not yet in the mind of man—we need quality-minded

engineers. If you feel that you can meet our standards, consider the opportunities offered by working with our company. In a few short years, you will be Western Electric.

Challenging opportunities exist now at Western Electric for electrical, mechanical, industrial, and chemical engineers, as well as physical science, liberal arts, and business majors. All qualified applicants will receive careful consideration for employment without regard to race, creed, color or national origin. For more information about Western Electric, write College Relations, Western Electric Company, Room 6206, 222 Broadway, New York 38, New York. And be sure to arrange for a Western Electric interview when our college representatives visit your campus.

MANUFACTURING AND SUPPLY UNIT OF THE BELL SYSTEM

Principal manufacturing locations at Chicago, Ill.; Kearny, N. J.; Baltimore, Md.; Indianapolis, Ind.; Allentown and Laureldale, Pa.; Winston-Salem, N. C.; Buffalo, N. Y.; North Andover, Mass.; Omaha, Neb.; Kansas City, Mo.; Columbus, Ohio; Oklahoma City, Okla.; Engineering Research Center, Princeton, N. J.; Teletype Corporation, Skokie, Ill., and Little Rock, Ark. Also Western Electric distribution centers in 33 cities and installation headquarters in 16 cities. General headquarters: 195 Broadway, New York 7, N. Y.
