## Theta Chi Dream Girl

The lass above is Miss Gille Legget, the new Dream Girl of Theta Chi. Gille was crowned Saturday night in ceremonies at the Plantation Inn. She will represent the Delta Rho chapter this weekend at East Carolina where she will compete for the Regional Dream Girl title at the Theta Chi Mason-Dixon Jubilee.

## IDC Dance Series Begins Saturday

Featuring the Corvettes, the first in a proposed series of IDC combo parties open to all dormitory students will be held on March 9, in the College Union.

The first of two spring IDC events, the combo party, is an experiment, according to Gerald Robertson, IDC president.

"If this combo party is successful," stated Robertson, "the IDC plans to inaugurate a series of combo dances in conjunction with the College Union next fall. If the students want it, we are willing to revamp our program to give it to them."

Keen competition between dormitories should provide interest in the planned "field day," forthcoming on April 20, stated Robertson. Marked by competition in softball, track, swimming, and various physical games, the "field day" will be culminated by a picnic and a combo party in the evening.

## 71 Undergraduate Counselors Needed

The Department of Student Housing will employ seventy-one undergraduates as counselors next year.

Students interested in applying may get an application from their dormitory counselor or from 207 Holladay Hall, according to John Kanipe, assistant director of student housing.

There are four classifications of counselors—dorm counselor, floor counselor, assistant floor counselor, and athletic director. A counselor's pay is determined by the number of stu-

dents he is assigned to work with, Kanipe said.

To qualify for a counselor position, a student must be a full-time student, have a high degree of maturity, and satisfactory academic standing.

Students should turn in their completed applications to their dormitory counselors between March 7, and 16.

Applicants will be contacted for interviews with the Department of Student Housing staff, and the appointed counselors will be announced April 10.

## Best Engineer To Be Knighted At Pats Dance

Are you an outstanding senior in engineering? If so, you may be knighted at the annual St. Patrick's Dance to be held in the CU Ballroom on Saturday, March 16. An outstanding freshman will also be chosen, but this lowly chap will not be knighted.

The senior will be chosen on the basis of his academic standing and his participation in extra curricular activities. The freshman will be chosen only by his academic qualification.

The Continentals will furnish the entertainment for the dance which is semi-formal for engineering students and their dates.

Engineering students will be admitted free when they present a bid which can be obtained at any engineering department office.

## Flu Epidemic Not Apparent

Despite the annual influx of Asian Flu and associated viruses, admittances to the college infirmary have been fewer than in previous years, according to infirmary nurses.

Numbering approximately 17, the current residents are in bed with various illnesses, including virus infections. One nurse stated that none of the students with virus infections took advantage of the free flu shots offered by the infirmary.

## Stat Department Receives \$90,000

By Ernie McCrary

Dr. F. E. McVay, professor of experimental statistics at State, has announced to *The Technician* that The National Science Foundation has awarded an \$89,710 grant to the college.

The money will be used to finance a special session on Mathematical Methods in Biology, a part of the Southern Regional Graduate Summer Session in Statistics. Dr. H. L. Lucas, another professor in experimental statistics will be

technical director of the special session. A total of seventy stipends will be available to selected college teachers and graduate students in biology and mathematics. Sixty-dollars a week grants will be given to twenty graduate students. Twenty college teachers will receive stipends of \$75 per week, and thirty teachers who hold Ph.D.'s will get a minimum of \$100 per week.

Recipients of the awards will be selected by a committee composed of representatives from the Departments of Mathematics and Statistics and the Institute of Biology. Although only those chosen by this committee will receive the stipends, the session is open to all qualified research workers, teachers, and interested persons in fields such as biochemistry, wildlife, fish and game management, animal and plant ecology, and physiology. Applications should be made to Dr. McVay before March 16.

Dr. McVay stressed that this program is a part of the Southern Regional Graduate Summer Session in Statistics. The session rotates among State, Virginia Polytechnic Institute, the University of Florida, and Oklahoma State University.

## Reynolds To Senate: 'Alumni Want NCSU'

By Dick Paschall

The never ceasing controversy over the proposed name change has cropped up again, this time in the joint House-Senate Higher Education committee.

Last Thursday Charles H. Reynolds of Spindale, president of the State College Alumni Association, told the committee that alumni are not at all happy with the recommended name in the bill, according to *The Raleigh Times*. The name that

has been recommended to the Legislature committee is "North Carolina State, the University of North Carolina at Raleigh."

Reynolds, a former State Senator, agreed the Alumni Board of Directors accepted the name as a compromise but added that it was a second choice. Reynolds said that the first choice is still "North Carolina State University of the University of North Carolina." "I would like to report to

you this name has not been well received by the general alumni," said Reynolds. "I have had numerous calls and letters, some from the members of the General Assembly, protesting against the name with the comma," reported *The Raleigh Times*.

According to reliable sources, the bill concerning the name change was introduced to the Legislature this past week, explained, and referred to the joint Higher Education Committee. A public hearing will be held for the first time sometime this month. Reynolds was allowed to present his arguments only because he had the impression that the public hearing was last week, and had driven through the snow and ice to be present.

Until a public hearing has been held, the bill will not be brought on the floor for a vote.

## CU Official Charged With 'Using Influence'

By Grant Blair

A student leader of the College Union last night charged Dave Phillips, CU social director, with threatening to use his influence to prevent the student from running for CU president.

The charge was made by Terry Lowder, executive vice-president of the CU and president of Region IV of the Association of College Unions.

Lowder had planned to run for both the CU presidency and the Student Government vice-presidency. According to Lowder, when he told Phillips, he was informed that he could not run for both offices. The words, Lowder said, were "you will not run for a College Union office."

Phillips then threatened to

use his influence with the CU Board of Directors when the Board meets to approve nominations for CU offices, according to Lowder.

(See CU OFFICIAL, page 4)

## Probation Ruled For Two By HCB

The Honor Code Board departed sharply from its usual procedure at the last Board meeting according to John Cameron, chairman of the Board, when it placed two students on probation for stealing and cheating.

One of the students, a freshman in Engineering, pleaded guilty last Thursday night at the board meeting to having stolen a \$1.50 bar of soap from the Village Pharmacy. Said Cameron, concerning the unusually light sentence of two semester probation placed on the student, "We felt that in this case the circumstances involved in this student's case justified a much lighter sentence than usual."

In the second case tried by the board, a senior in Agriculture was convicted of cheating on an insect collection and placed on probation for one semester by the Board. According to Cameron, the usual sentence for cheating is suspension from school.

The exception was made in (See HONOR CODE, page 4)

## Aggies Receive Grant

Two undergraduate students in the School of Agriculture have been awarded academic scholarships.

Joseph Nolan Smith, a freshman in the Agricultural Institute, and Robert Jackson Drye, Jr., a senior in Food Science, are the recipients.

Dr. E. W. Glazener, director of instruction of the School of Agriculture, announced that they had been selected by the

School's scholarship committee.

Smith has received the Cottonseed Crushers Award. He is from Lexington and is studying Livestock Management. This is the first scholarship given by the North Carolina Cottonseed Crushers Association.

Drye's award, for students in dairying, is provided by the Borden Company. He is from Charlotte and is a member of the Animal Science Club and Alpha Zeta.

## Break-ins Break Out

By Joe Clocker

Thirsty vandals were at work Sunday morning in three buildings on the campus.

Campus police reported that two drink machines and one cigarette machine in Carmichael Gym, one drink machine in Winston, and one drink machine in Polk Hall were broken into.

According to W. T. Blackwood, Jr., M&O chief security officer, the vandals broke into the gym, but Polk and Winston were not locked. The damage in the gym was discovered Sunday morning by a faculty member, and the damage in the other buildings was reported by students.

Mr. Blackwood estimated that the time of the break-ins was between midnight and 8 a.m.

The amount of damage and money stolen was to be deter-

mined today. Mr. Blackwood reported that the Raleigh Police

investigated Sunday morning and took fingerprints.

## Campus College Bowl

A college campus is traditionally a seat of knowledge, but in America it has also become a center of entertainment. The GE College Bowl show which pits campus against campus in a contest to see which college has students with the broadest general knowledge effectively combines these two aspects of the modern university.

Since the inception of this program, we have been interested in the possibility of State entering a team on the national TV show, and we think that we now have a plan which could insure or at least promote a successful entry.

The plan is to set up on this campus a miniature College Bowl under the auspices of the College Union. Different campus organizations such as fraternities, publications, clubs, and even schools could enter the competition, and possibly small monetary awards could be presented to the winning organizations.

Questions could be gathered from all the departments on campus, and should be designed to test a broad knowledge rather than specific knowledge in higher subjects. Possibly the scientific questions should be based on the sophomore level for engineers, and questions on the arts should be ones familiar to any well-read individual.

An on-campus college bowl could become a very interesting and stimulating part of State College life. Various organizations might become interested in this sort of contest, and strong rivalries could develop. On the purely pragmatic side of the coin, it could also help State College greatly. If competitions of this sort were held, the best and most knowledgeable students on campus could be found and entered in the national College Bowl. No other school in North Carolina has done well in the Bowl. Carolina was beaten in its first attempt, and no North Carolina school has won the maximum number of games which a school can win.

Winning on the College Bowl gives a school both prestige and money for its scholarship program, and a series of intramural contests would give State the best possible team.

The college and the College Union should consider entering a national team and setting up this series on campus. It could prove to be entertaining and add much prestige to the school.

To facilitate the establishment of a series of this type, the staff of *The Technician* challenges any other campus organization. So many people have told us that we don't know anything that we think they ought to have a chance to prove the charge.

## Letters To The Editor

# WKNC Strikes Again

To the Editor:

I would like, at this time, to answer several of the charges leveled at WKNC by the six announcers who felt it necessary to resign from the station staff and the one announcer who led these poor stepped-upon angels and who, by the way, was fired from the station several weeks ago.

First of all, I would like to clear up several points which appeared in the February 27 edition of *The Technician* (front page). "... they said that it (the station) is now run by two people, Nelson and George Heeden, program director for the station." "Run" is a very poor word choice, for it is impossible for Mr. Nelson to "run" the station, even with my aid. I think what is meant by that sentence is that the Station is managed by Mr. Nelson, who by some quirk of fate happens to be Station Manager. Also, according to the constitution, the Program Director is responsible for and in charge of all programming, over the airwaves and otherwise. Therefore, if the occupiers of these two offices did not exercise the control over the station, which the resigning announcers are implying that they now do, both officers would undoubtedly be fired.

"They also said that the member-at-large of the Station Board of Directors has not been permitted to attend meetings of the Board." If anyone cares to check the minutes of the Board meetings, one will find that since the time of his election, Mr. Foxworth has attended all meetings of the Board of Directors of WKNC. "Also, according to the announcers, there is no representative on the Board from Peace College, which is served by the Station. They added that the Station constitution provides for such representation." It is true that our constitution provides for such representation and, furthermore, the contract with Peace College provides for such representation, but neither document demands that we, at gun-point, force Peace College to send such a representative if they do not desire to do so.

"They also said they wanted the Station to include rock and roll." The Station has never banned rock and roll to the point where it must now be included. However, there are some strict limitations placed on the amount of rock and roll which can be played, which is as it should be. As to the plans of Mr. Covington to close down the Station, until the present controversy arose Mr. Covington did not even know of these plans.

In regard to the program change suggestions coming forth from the "Fuller Gang," it does seem strange that the majority of the suggested changes were discussed around the Station and okayed for production approximately three weeks before the mass exodus. A number of the better suggestions were expressed to the staff by George Hall, Station Advisor and Director of WUNC-TV, at the be-

ginning of the second semester. Some of these changes have already gone into effect; others take time to work out; and others are unfeasible at this time.

In response to the letter which appeared above the name of J. Lindsay Fuller in the February 28 edition of *The Technician*, actually there is nothing in that letter which warrants a reply, although it is a shame that the imagination, artistry, information, and clarity of purpose which are expressed in this letter in the name of J. Lindsay Fuller could not also have been expressed at least once while he worked at WKNC.

George Heeden, Jr.  
Program Director  
WKNC Radio

To the Editor:

Being one of the "ringleaders"

of the current revolution at WKNC, I would like to take it upon myself to clarify one very popular misconception. There has never been so much as a single word in relation to a desire on our part to convert WKNC to a full time rock and roll station. This would indeed be a tragedy for a station with the potential of WKNC. We simply feel that the top forty popular tunes, whether recorded by Elvis Presley, the Kingston Trio, or Lenard Bernstein, should be programmed regularly at appropriate times. It seems that the current definition of rock and roll at WKNC is record with a large hole in the center. While I also favor emphasis on Folk music and Jazz, the early evening hours and possibly Saturday should include popular music to fulfill the objective of the station, to

serve the students. There is no question in my mind that there is a significant number of students on campus that would like to hear some popular music. I also believe that most of the students feel that WKNC is going to introduce some culture into their life whether they like it or not. This idea is certainly not stated in the Constitution of the station. I believe if Mr. McCrary and other persons harboring this misconception will bother to examine the arguments we have presented in the last year, they will find absolutely no mention of our advocating full time rock and roll over WKNC.

Richard Hertzler  
former staff member  
WKNC

## Classical Guitarist Set By New Arts

The New Arts program is presenting Rey de la Torre, Cuban classic guitarist, Wednesday night.

De la Torre annually tours the United States and Canada coast to coast. He has additional tours in Eastern America and outside the country.

Born in Havana, de la Torre was a pianist and guitarist by the age of 10. At 14, the guitarist was sent to Spain for academic and guitar studies under Maestro Miguel Llobet, a teacher of virtuosos. He made a name for himself there as a concert guitarist and as an athlete.

Maestro Llobet presented de la Torre in debut in Barcelona in his teens. His New York debut was in Town Hall in 1941.

Rey de la Torre has been heard in several television events such as the Jack Parr Show, Today Show, and Camera 3.

The New Arts, Incorporated presentation of de la Torre will be at 8 p.m. Wednesday in William Neal Reynolds Coliseum.

Rey de la Torre

## Designers Slate Lecture Series

The Student Publication of the School of Design has inaugurated a series of faculty lectures.

The first lecture, held last Wednesday was given by Architecture Professor Harwell Hamilton Harris, who showed slides of some of his earlier architectural work in California. He will be followed by six other speakers.

According to Professor Charles Kahn, who will appear in the series on March 11, most of the lectures will be fairly specialized for the purposes of the design student, but will they contain much of general interest as well, and anyone who wishes to attend will be welcome.

Jezy Glowczewski, professor of architecture was scheduled to have given a lecture on the new Dulles International Airport this evening.

The list of remaining speakers, all of whom will appear at 8 p.m. in the Design School Auditorium reads as follows: March 11, Charles Kahn, Associate Professor of Architecture (tentative subject: "Structure and Architecture").

March 18, Wayne Taylor assistant professor of architecture; March 28, Duncan Stuart, associate professor of design; April 17, Vernon Shogren, assistant professor of architecture; April 29, Victor J. Papaneck, head of Product Design.

## WKNC Auditions

Auditions for folk, jazz, and popular singers and instrumentalists who wish to perform on WKNC will be held March 16. The auditions will be held at 2 p.m. in the studios of WKNC in the Publications Center of the YMCA.

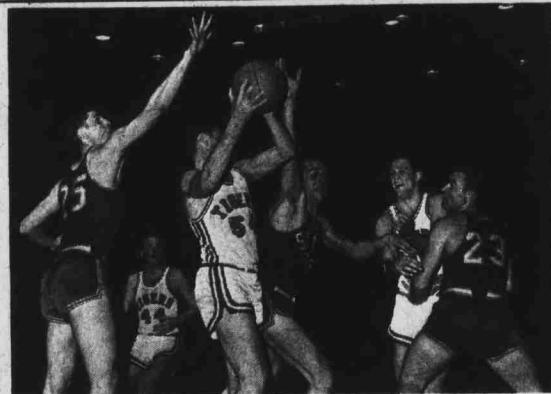

Artists and shows which will be highlighted on "Insight '63" this week are:

Monday—Stan Kenton  
Tuesday—"My Fair Lady"  
Wednesday—Josh White  
Thursday—Johnny Mathis  
Friday—Andre Previn

## Correction

The editorial, "A Real Change," was incorrect in that it said, "drinking and smoking were permitted if tables and ash trays were provided." It should have read "Refreshments and smoking."

Technician  
**Sports**

The action gets rough in the closing minutes of the Pack's thrilling 79-78 victory over Clemson Thursday night. The Tiger's Woody Morgan tries to block a shot by Pete Auksel by holding hands (top). Later on, Morgan was charged with goal tending on Larry Lakins free throw to give State the much wanted victory. Auksel, Key, and Rohloff combine on defense to give Clemson's Mahaffey a hard time (bottom). (Photos by Jackson)

## Duke Downs Wake For Tourney Crown

By Martin White  
Following all pre-game pre-directions, the Duke Blue Devils downed a tough Wake Forest team 68-57, to win the 10th annual Atlantic Coast Conference Tournament.

Although the final margin of victory was 11 points, the Dukes did not have a comfortable lead until Art Heyman made a 3-point-play to give his team a 7 point lead with 5:43 left in the game.

Captain Dave Wiedeman scored 13 points in the first half of the game while taking the Deacons to a 35-31 lead at intermission. During the final 20 minutes of action, Duke's Ruzzy Harrison played Wiedeman man-to-man and held him to just two field goals on only two attempts.

All American Art Heyman proved to be the winning punch in the hard-fought victory. Artie was able to collect only 9 markers during the first half of the game, and went scoreless for the first 7 minutes of the second half. Then, with 13:10 remaining and the score tied for the fifth time 39-39, Heyman let loose with 15 of his teams 20 points in the following 10 minutes of play. When the smoke cleared, the Blue Devils had a comfortable 59-51 lead with 3:15 to be played. The Deacons could come no closer. Eleven points was the largest lead that the Dukes had during the contest.

Only two games in the tournament were won by margins of victory less than 10 points, both of these games were won by only one tally.

The Wolfpack provided the thrills in the first of these two games by defeating the Clemson Tigers 79-78. The Pack was far behind for most of the contest and did not gain the final lead until 0:05 remained to be

played. Clemson had one last shot at the basket, but it failed to score.

Larry Lakins provided the margin of victory in this thrilling contest by making a 3-point-play for the Pack. Lakins shot once and missed, grabbed the rebound and shot again, this time tying the score 78-78. He was fouled on the play and went to the line for the all-important charity toss. Just as his attempt seemed fruitless, Clemson's Woody Morgan tipped the ball off of the rim. Goal tending was called, giving the Pack the point and the game.

Wake Forest edged the Tar Heels in the other one-point-margin contest. After the contest had been tied for the tenth time at 54-54 on a basket by Carolina's Respass, he added the third point of the 3-point-play to put the Heels ahead 55-54 with 0:57 remaining. Wake was not to be bettered, as Bob Wollard tapped in the winning basket with 0:05 to be played. Billy Cunningham got in one last shot for the Tar Heels from 30 ft. that would not drop as the Deacs won 56-55.

Jeff Mullins and Art Heyman poured in 74 and 64 points respectively to lead the tournament scoring, Buckley with 39 rebounds and Heyman with 38 rebounds led in this department. Although he played in only two games, Cunningham was third in both departments with 41 points and 26 rebounds.

Ken Rohloff led the State scorers with 34 points followed by Key with 30, and Auksel with 29.

## Four Place In Meet

Four State students placed in the Region 4 College Union Games Meet held in Atlanta, Georgia at Emory University this month.

The events included bowling, table tennis, three-rail billiards, and chess.

Ron Lipsius and Ron Oliver finished first in doubles bowling with a total of 1270 pins. Doug Moretz finished first in individual table tennis, and John Theys placed third in three-rail billiards.

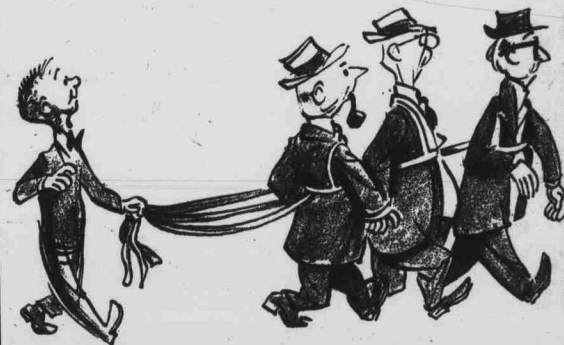

(Author of "I Was a Teen-age Dwarf", "The Many Loves of Dobbie Gillis", etc.)

### HAIL TO THE DEAN!

Today let us examine that much maligned, widely misunderstood, grossly overworked, wholly dedicated campus figure—the dean.

The dean (from the Latin *Deanere*—to expel) is not, as many think, primarily a disciplinary officer. He is a counselor and guide, a haven and refuge for the troubled student. The dean (from the Greek *Deanos*—to skewer) is characterized chiefly by sympathy, wisdom, patience, forbearance, and a fondness for homely pleasures like community singing, farina, spelldowns, and Marlboro Cigarettes. The dean (from the German *Deangemacht*—to poop a party) is fond of Marlboros for the same reason that all men of good will are fond of Marlboros—because Marlboro is an honest cigarette. Those good Marlboro tobaccos are honestly good, honestly aged to the peak of perfection, honestly blended for the best of all possible flavors. Marlboro honestly comes in two different containers—a soft pack which is honestly soft and a Flip-Top box which honestly flips. You too will flip when next you try an honest Marlboro, which, one honestly hopes, will be soon.

*There is not a dry eye in Yutah*

But I digress. We were learning how a dean helps poor, troubled undergraduates. To illustrate, let us take a typical case from the files of Dean S. . . . of the University of Y. . . . (Oh, why be so mysterious? The dean's name is Sigafos and the University is Yutah.)

Wise, kindly Dean Sigafos was visited one day by a freshman named Walter Aguincoourt who came to ask permission to marry one Emma Blenheim, his dormitory laundress. To the dean the marriage seemed ill-advised, for Walter was only 18 years old and Emma was 91. Walter agreed with the dean, but said he felt obligated to go through with it because Emma had invested her life savings in a transparent rainhood to protect her from the mist at Niagara Falls, where they planned to spend their honeymoon. If Walter called off the wedding, what use would the poor woman possibly have for a rainhood in Yutah? The wise, kindly dean pondered briefly and came up with a brilliant answer: let Walter punch holes in the back of Emma's steam iron. With steam billowing back at the old lady, she would find a rainhood very useful—possibly even essential.

Whimpering with gratitude, Walter kissed the dean's Phi Beta Kappa key and hastened away to follow his advice—and the results, I am pleased to report, were madly successful!

Today Emma is a happy woman—singing lustily, wearing her rainhood, eating soft-center chocolates, and ironing clothes—twice as happy, to be candid, than if she had married Walter. . . . And what of Walter? He is happy too. Freed from his unwanted liaison with Emma, he married a girl much nearer his own age—Agnes Yuca, 72. Walter is now the proud father—stepfather; to be perfectly accurate—of three fine, healthy boys from Agnes's first marriage—Everett, 38; Wilhelm, 43; and Irving, 55—and when Walter puts the boys on a lead and takes them for a stroll in the park on Sunday afternoon, you may be sure there is not a dry eye in Yutah.

And Dean Sigafos? He too is happy—happy to spend long, tiring hours in his little office, giving counsel without stint and without complaint, doing his bit to set the young, uncertain feet of his charges on the path to a brighter tomorrow.

© 1963 Max Shulman

# NE Sets Changes

The Nuclear Engineering Department will make seven course changes, according to Dr. H. A. Lamonds, department head.

"The changes are a part of a periodic evaluation of the curriculum, and courses are regularly added," Lamonds noted.

The new courses will include NE 511, Radiation Detection and Analysis; NE 540, Nuclear Reactor Control; and NE 545,

Nuclear Reactor Kinematics, which will be offered to graduates and advanced undergraduates.

NE 404 and NE 405, Nuclear Energy Conversion sequence will replace ME 503 and 504, Elements of Nuclear Power Generator I, II and will be offered to undergraduates.

Dr. Lamonds also stated that the changes would be effective in the fall semester of 1964.

## Baptist Prof Will Speak At Conference

The Raleigh Intercollegiate Conference will meet with Dr. Wayne Oates, professor of psychology of religion in the School of Theology of The Southern Baptist Theological Seminary, Louisville, Kentucky, as the conference leader.

The conference will be a study into the insights of self-identity of the college student, according to Tom Bentley, secretary of the campus YMCA.

The conference will convene at 2:00 p.m. March 9 in the E. S. King Religious Center. A Saturday evening supper will be held in the Grill Room of the College cafeteria.

## Polish Lecture

Dr. Zenon Jielinski, structural engineer from Poland, and Robert Newman, acoustics specialist from MIT, will appear in the School of Design Auditorium for a series of lectures for fourth and fifth year design students beginning March 11.

According to an announcement from the Design School office, Jielinski will give a series of three lectures on properties of steel, aluminum, and concrete structural materials.

Newman will use slides in his series of five lectures on acoustics, beginning April 1.

There will be a meeting of the CU Board of Directors at 7 p.m. Tuesday night in the CU.

A man's wedding ring was found February 27 in the east parking lot of the Coliseum. The owner can contact John Gifford at TE 2-6873 after 7 p.m.

## CU Official

(Continued from page 1)

Lowder stated that Phillips guaranteed that six members of the Board would be opposed to him "after he had talked to them." Said Lowder, "I believe he has already talked to one."

Lowder continued, "I don't think any paid professional staff member has the right to use influence. This matter should be up to the student body. Since I am running for two offices, it should be my prerogative to decide whether or not I am capable of running."

Lowder added, "I know this is a serious charge, but it's the truth. I don't know any other way to put it."

Dave Phillips was unavailable for comment.

All those interested in the ski club are invited to attend a meeting in Harrelson 113 at 8 p.m. this Thursday. Information can be gotten from Len Lindsay at TE 2-4788 or Jim Rea at TE 2-9323.

There will be a Student Government meeting at 7 p.m. in the CU Thursday.

Students registered in Dr. Paul Rust's *Improvement in Reading* course day sessions are requested to meet at their regular class time during the week of March 4. Dr. Normal Chan-sky will meet those classes at that time.

There will be a meeting of the entire *Technician* staff at 7 p.m. Tuesday.

(Continued from page 1)  
this case because of an apparent misunderstanding between the professor and the student concerning the ground rules for the collection.

Said Cameron, "this is an excellent example of one of the 'unfortunate cases' that I spoke of when addressing the Textiles faculty a few days ago."

Cameron was referring to a point in his speech to the Textiles faculty that stated that, failure on the part of both students and faculty members due to irresponsibility or laziness to determine exactly what is and what is not authorized in a course has led to many unfortunate instances.

ganize the sports activities, while the dorm officers will make final arrangements for the parties and picnic," added Robertson.

"The field day will be a championship day. We hope that the dorms will challenge each other in the various sports events before field day.

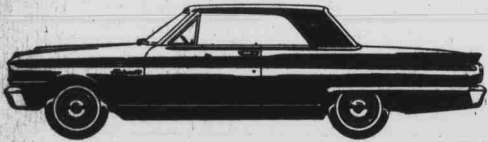

"First, second, and third place trophies will be awarded. Any dorm which captures a trophy for three years out of ten, will get to keep the trophy permanently," he said.

*Assignment: design a suspension that "paves" its own way!*

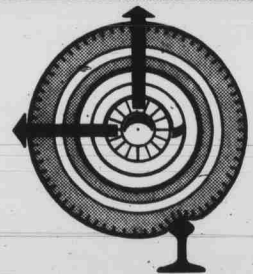

**Result: "Cushion Recoil" provides a dramatically smoother ride in 1963 Ford-built cars**

The challenge given Ford engineers was to design suspensions that would permit wheels virtually to roll with the punches—not only in a vertical plane but fore-and-aft as well. Conventional suspension systems provide only a partial solution to road shocks by limiting wheel recoil to an up-and-down motion.

The solution? Exclusive Cushion Recoil suspension design in all Ford-built cars for '63! Cushion Recoil, with cushioning action in a fore-and-aft plane as well as vertical, smoothes the jars and jolts of rough roads, adds to your comfort, safety, and driving pleasure. Even the thump of freeway tar strips is reduced, and on deeply rutted roads you experience better control of the car. Furthermore, your Ford-built car is spared the wear and tear of road-induced vibration.

Another assignment completed—one more example of engineering excellence at Ford and new ideas for the American Road.

**SOAKS UP ROAD SHOCK.** Exclusive Ford Motor Company Cushion Recoil action moves back as well as up for a smoother ride.
