Little Progress Made In Name Change Fight

The House Committee which is considering the name change proposed four alternatives, but decided nothing, in a meeting held yesterday.

In a wild and sometimes emotional session, the Committee tangled itself in a flurry of motions and amendments, only to find itself with time enough to vote on only one issue. The amendment on which the Legislature voted was a deletion of all portions of the Higher Education Bill which would have left the names of all the branches of the Consolidated University unchanged. This amendment was proposed by Rep. C. E. Leatherman, and was supported by forces led by Reps. Robert Calder and George Wood who had earlier introduced an amendment calling for the name "North Carolina State University of the University of North Carolina."

Calder was opposed by Rep.

Sneed High and T. C. Crawford. High stated that he was speaking with "a lobbyist in his own house," and said that he had a son enrolled at State. High proposed an amendment to the earlier Calder amendment which would have left the original bill unchanged. The original bill included the name "North Carolina State, the University of North Carolina at Raleigh."

Supporting High's stand, Crawford stated that State alumni were getting "more than they are entitled to." He said that the other branches of the Consolidated University were getting a common name, "but we are going farther than this" and letting state alumni keep the identity of the college.

Rep. Wood, speaking against High and Crawford stated that all he had heard on the name change was "nothing said well." He stated that "what has trans-

pired in the name change is not a pretty story and I don't have the courage to tell it."

Rep. Leatherwood then made the motion to delete the portion of the bill containing all name change proposals. He was supported by Kiser who said that the name changes were "unnecessary." The proposal to delete the name change proposals was defeated by a vote of 25-17.

As soon as this proposal was defeated, Kiser voted to adjourn the meeting. Since it was five minutes before the House and Senate were scheduled to convene, the meeting was adjourned.

Another meeting was to have been held at 4 p.m. today.

Another proposal at the meeting was to change the name of Woman's College to Woman's University of North Carolina.

Twelve-Point Platform Presented By Nifong

Norman Nifong

SG presidential candidate Norman Nifong has announced his platform.

First among Nifong's ideas on Student Government is the formation of a second legislative house for Student Government. He sets the duty of the senate as control of elections, rules, and other affairs of the legislature, and approval of bills passed by the second body. The other body would deal with the needs and interests of students, and approve bills passed by the senate.

Having the students representatives pass copies of the minutes to the students is his second point.

Next comes a proposal for a revised grading system giving quality points for the actual grade made rather than the letter grade. This would give 3.5 qp's for an eighty-five, rather than the three the student re-

ceives under the present system. Fourth is the opening of Faculty Senate Meetings to students.

He also lists senior exemptions as an aim.

He adds that he would like to have a State College representative on the Raleigh City Council.

A Student Government controlled loan fund for travel to job interviews is another of Nifong's ideas.

Preregistration is his eighth point.

His platform also includes full civil rights for all students on campus.

He further proposes that a list of ways in which student fees are used be distributed to all students in detail.

Next, he suggests that Student Government work to obtain improvements in the State College Library.

He ends his platform with a proposal for an SG-administered College Bowl series between campus organizations.

WKNC Schedules Debates

(Photo by Edwards)

Norman Nifong and John Bynum are shown during preparations for their debate on WKNC next Wednesday night.

Candidates for major campus offices have been invited to participate in a series of informal radio debates on WKNC. Ron Bowers, SG legislator, will moderate the broadcasts from 8:30 p.m. to 9:00 p.m. The first program will start tomorrow with the others following on Monday, Tuesday, and Wednesday of next week.

Tomorrow's debates will feature "Jim" Miller, Rex Kelly, Gordy Eure, and Dick Gabriel, candidates for vice-president of the Sophomore Class, and John L. Sullivan and "Jackie" Mitchell, candidates for president.

The program for Monday will include E. Becton James, and Art Mattox for vice-president of the Senior Class, and Robert "King" Cole, Whitey Morrison, Allen K. Tothill, "Dick" Paschall, and Doug Lientz for vice-president of the Junior Class.

Wade "Butch" Fields, Gene Eagle, Herb Goldston, for treasurer of SG, and Brian Little and Whitey Morrison, for secretary,

will debate on Tuesday night. The series will close on Wednesday night by featuring J. Terry Lowder, Bill Keel, and Lynn Spruill for vice-president of SG, and Norman Nifong and John Bynum for president.

There will be no debates for the president of the Junior Class and the Senior Class since the candidates for these two offices are unopposed.

Suspense Created On Disqualification

Suspense was created last night by John Cameron, President of the Honor Code Board.

Cameron declined to reveal the official reasons for the Judicial Candidate Approval Board's recent disqualification of two candidates for the Honor Code Board.

It is expected that the reasons will come to light Thursday night, when the candidates appeal their case before the Student Government.

The candidates disqualified were Curtis Moore and Mark Shanker, Junior candidates for the Honor Code Board. When they were questioned Sunday following the announcement of their disqualifications, Moore stated that he had heard through unofficial sources that the disqualification was because of editorials written in *The Technician*. Shanker commented that when he contacted

(See SUSPENSE, page 5)

YPO Explains Success

The great American success story came alive Monday morning when five members of the Young Presidents' Organization told 150 State students how it's done.

Anyone who has become president of a company which grosses over one million dollars per year and has at least fifty employees is eligible for membership. These people also have to be under forty years of age at the time they become president.

The purpose of the panel discussion was to encourage seniors to enter small, expanding businesses or start their own business. Norman A. McGhee, Southland Oil Corp., told the students there were four factors in establishing a business:

desire, ideas, self confidence, and a goal. B. B. Walker, B. B. Walker Shoe Co., stated that the most exciting thing one can do is run his own company, but also work for a small company which shows promise of expansion.

After these and other opening statements, the panel members were open to questions from the students. The question was asked by a student: "Where did you look for capital when you started your business?" Mr. Walker told the audience that he and several other inves-

tors borrowed money on their homes and belongings. He also commented "If you borrow money on your bed, you won't spend as much time in it."

Another student asked: "Do you think it best to go with a small company in order to gain experience and then go into a small business?" John S. Shallcross, Shallcross Manufacturing Co., commented that this depends on the individual. Some people are best suited to large companies and some are suited to small ones. McGhee stated further that one should go with a large company to gain experience or an overall picture and then go to a small company.

A student in textiles asked the question, especially in relation to the textile program in

economics: "Does an education in economics aid in business?" Shallcross commented, "It does, but some economic theories do not always work." James F. Kelly, Aeroglide Corp., stated that he desperately needed economics to gain a more complete outlook on business.

The question, "What is your opinion of two priced cotton," was asked of John F. Redding, Pinehurst Textiles, Inc. His comment was: "I think it's an abomination." He further stated that "Here in this country, we are helping to destroy the cotton industry." Redding quoted statistics on this country's past and present production of cotton and related how much the production has fallen off.

Vote For Me!

Herb Goldston

Who's the mysterious person: Captain America? The Invisible Man? The person not so mysterious is Herb Goldston, candidate for SG Treasurer.

(Photo by Andrews)

Gene Eagle

Now we have a Mysterious and Obscure Building (M&O). Eagle was caught in the act of defacing you know who. He is another candidate for SG Treasurer.

(Photo by Edwards)

Wade "Butch" Fields

There is nothing mysterious here, except possibly the spectators jamming in the stadium. "Butch" is the third and final candidate for Treasurer.

(Photo by Edwards)

Past Voice On Present Issue

Editor's Note: This editorial was written by last year's editor, Bill Jackson, and appeared in the October 6, 1960, issue of *The Technician*. Bill was a member of the Honor Code Board, and we feel that his comments are very pertinent at this time. We would like to pose one question, however. Is this still true?

It was with considerable interest that we read recent letters to *The Technician* concerning our Honor System. The men whose opinions were published in our paper had different points of view; in their discussion of the situation they presented some ideas well worth considering. The encouraging fact was that these students were interested enough in the Honor System to express themselves.

The history of the State College Honor System is comparatively short. Since tradition can sometimes play an important role in the success of such a system, its status at State is surprisingly good. Today we are establishing the pattern for our system to follow in years to come—and our pattern is a good one.

Let's not overlook the failings of the Honor System, however: In a group as large as the State student body, it is not surprising that some individuals lack respect or knowledge of the Honor System. We have read of these in a recent issue of *The Technician*. It is an unfortunate story.

A successful Honor System depends upon several factors: student acceptance, faculty cooperation, and the administration.

Student organizations, as well as individual students, have been working long and hard to make our system even more effective and more valuable for all of us. The improvements which they, in association with the faculty and administration, have produced are very promising of the things to come.

The students at State themselves established the Honor System several years ago, realizing the values and advantages such a climate would provide. Since that time, the overall attitudes of the men of State have become increasingly favorable. This is natural, too. From the beginning of his freshman year each student quickly notices that he is treated here as an adult, with a mature sense of judgement and personal responsibility. He soon learns to exercise his judgement.

The faculty and administration have stamped their approval on the Honor System first of all by creating the atmosphere of trust which generally exists on the State campus. By cooperating closely with the judicial department of Student Government, they have contributed greatly to the system's advancement.

We can be proud of the Honor System at State College and the way our students are responding to the personal obligations placed upon them by the system. And the student body is demanding strict adherence to the ethical code of our Honor System. If you are not very familiar with your responsibilities under the Honor System as a student, you had better find out. The stakes are too high.

THE ELECTION

Once upon a time there was a boy named Ralph.

He was a pretty ordinary guy; plopies, malt-shops, James, Stoboviam Petriese cats.....

Then one day it happened.....

Ralph found himself in the political limelight.

He had been nominated to run for social chairman.....

He was plunged into a world of potholes, ballots....

and public speeches

Over night, he was changed from a kind, innocent fellow into a ruthless, driving maniac.

then he was elected

..... plunged into an ecstasy of frenzy and delight, he raced to the ballot-counting house, and died into the sea of ballots before him....

wildly he thrashed about wallowing, sleeping, and swimming, deeper and deeper, and deeper....

... then it happened..... unable to return to the surface for air, he drowned, and a new election had to be held....

Minute Course

Ch. 103

By Herb Allred

Tonight's handy-dandy summarization is on chemistry 103, general and qualitative analysis. Many students dread this course, but their fears are unfounded. If you are one of those who are worrying about it, let me assure you that it is simply a review of what you studied in fifth grade science.

As most of you already know, the earth is composed of five elements . . . fire, air, water, earth, and peanut butter. All matter is a mixture of these five elements except for apple sauce, which is a natural phenomenon. (Examples: liquor = fire + water, buffalo chips = peanut butter + earth, etc.)

When you first enter your lab, you will notice a strange-looking object in the corner. DO NOT TAMPER WITH THIS

STRANGE LOOKING OBJECT

. . . this is your lab instructor. In lecture, your instructor will show you many interesting demonstrations throughout the course. At the climax of the course, he will change water into wine and disappear in a mysterious cloud of smoke.

Should you miss a lecture class, for punishment, you will not get any cookies with your milk after play period.

QUESTIONS

1. Determine the melting point of ice. Determine the melting point of sulfur. Determine the melting point of your lab table.
2. Mix one toad eye, seven drops of bat's blood, and the small intestine from a pregnant cock roach in a 100 ml beaker. This is an aphrodisiac . . . give it to your girl.

A Review

Peter, Paul and Mary

Peter, Paul, and Mary are more than a trio . . . they are an esthetic experience. They are emancipated beings whose joy is like a river, flowing sweetly over a thirsty audience. I don't think anybody at the Dorton State Fair Arena last night was ashamed of their goose-pimples.

A hushed audience saw three figures bent over in concentration and moaning, modulating their voices with the sound of their souls. One soon became unconscious of the presence of a group of singers . . . there was only the song. The three became the song.

Peter, Paul, and Mary executed the function of an artist. With perfect rapport, they communicated the warm emotion that is somewhere between joy and nostalgia. If anything really wonderful has ever happened to you, you remembered it then.

It was a fresh, clean experience. I think that it was best said on the back of their first album. "Honesty is back . . . tell your neighbor".

Publication Policy

All unsigned editorials are by the editor and all others will be signed with the initials of the writer.

We invite letters to the editor, but reserve the right to not print any letter received. All letters to the editor must be signed, and names will only be withheld in cases in which the writer's grades may be affected.

All letters to the editor must be typed on a sixty-two space line, double spaced. No letters will be printed in cases in which this is not done.

Candidates Issue Statements

By Doug Lientz

Editor's note: These are the statements of the relatively minor candidates who have brought their statements to our office. We will run similar statements from other candidates next week at this time. The deadline for turning in these statements is 6 p.m. March 25. They must not be longer than eight lines of 62 spaces. We reserve the right to edit these statements.

Twenty candidates for minor offices have submitted statements to *The Technician* up to this time. Six of these are running for class offices, three for Honor Code Board, and thirteen for senator.

Class Officers

Art Mattox

Mattox states that he has served as mayor of McKimmon Village, member of the College Union Board of Directors, and technical society treasurer. He promises that if he is elected he will work to make the voice of the Senior Class an impressive one. He is running for Senior Class vice president.

Robert "King" Cole

The use of class dues for no purpose other than payment of

class dues is condemned by Cole, who promises that if he is elected he will attempt to add other types of activities to the class's program. He is running for Junior Class vice president.

John "Jackie" Mitchell

Class dues, Mitchell says, should be used to provide a balanced program of activities for class members, rather than for the exclusive purpose of providing formal dances for the few students who attend them. He is now serving as Freshman Class treasurer and is seeking the office of Sophomore Class president.

Jim Miller

Miller advocates the formation of a Sophomore Senate composed of the senators, Honor Code and Campus Code representatives, and class officers to represent the class. He also suggests a revised program of class activities. He is running for Sophomore Class vice president.

The statements of Doug Lientz, candidate for Junior Class vice president and Steve Johnston, candidate for Junior Class treasurer appear with the Action Party platform.

Honor Code Board

The statements of John Theys and Doug Coats appear with the Action Party platform.

Mark Shanker

Shanker lists having been a member of the Honor Code Board last fall, until his health forced him to resign. He states that he feels that strong revisions are needed in the Honor Code, and that the Textile School's "monitor-spy" system needs the immediate attention of the Board. He is running for Junior Class representative.

Senator

Edward S. Thomas

A more equitable apportionment of representation for en-

gineering students is the goal of Thomas. He also wants better communication between the student-faculty-administration triangle. He is running for Senior engineering senator.

David Goddard

Goddard, a candidate for PSAM junior senator, seeks to promote more initiative for the individual senator, revised election procedures, and more emphasis on the student's little, bothersome problems, rather than the ones students cannot solve. As a specific election procedure revision, Goddard lists setting up an executive board and taking elections out of the hands of the senate.

Jim Gregory

Gregory states that his one and a half years in the senate make him the best man to represent the Juniors in the School of Forestry.

Gene Hendriksen, Richard Anglin, Willard Prussel, Gerald Goodman, Steve Johnston, Bob Downing, Herb Alfred, Doug Lientz, John Logue, and Dwight Minkler include their statements in the Action Party Statement.

John Theys, chairman of the Action party, made the following statement concerning the members' joint endeavor:

"Ever since word got out that a student political party was being formed on campus, mem-

bers of the Action party have been deluged with queries from interested students.

"We of the Action party have pooled our space in *The Technician* and forfeited such largely meaningless space-fillers as lists of individual activities in order to answer these questions and others.

"The Action party is a group of 12 candidates who have pooled their energies and resources in an effort to bring about the revisions and reforms outlined in its platform. The organization as a group is working in politics only, at the campus level and does not represent or

1963

In many ways the story of the Thunderbird is one of the most unusual in the automobile business. The whole idea of the car was born at one of the great European automobile shows. The then president of our company pointed to some of the small, lush sports cars that are always a center of attention at such shows and asked his companion, "Why can't we build something like these?"

The companion, who later became a vice president of the company, said, "It just so happens I have one on the boards. I'll show it to you when we get back to Detroit." Then as fast as he could discreetly get to a transatlantic telephone he called his assistant and told him, "Remember that car we've been talking about? Finish those sketches on it."

The Thunderbird became one of the few cars ever built that was produced essentially as the original sketches presented it. Most cars undergo countless changes in the design period. But there was a natural clarity and cleanliness to the Thunderbird design that immediately captured all of us at Ford.

It was probably this clean, sharp look that won so many friends so fast when the car went into production. That first Thunderbird had its drawbacks. For example, it was too soft-sprung for true sports-car handling. But, the truth is, it was not designed in the European tradition of the fast performance car. Some people called it a sports car but we never did. We called it a "personal" car; a small, fairly luxurious car that was fun to look at and fun to drive. It had its own integrity: it was one alone.

We built the Thunderbird as a bellwether car for Ford. It was our intention to test new ideas before we put them into our Fords, Fairlanes and Falcons. The new Ford ride and Swing-Away steering wheel appeared first on the Thunderbird, for instance. However, we never foresaw the extraordinary influence Thunderbird would have on the whole automobile business here and abroad. Almost everybody offers the Thunderbird bucket seats these days. And the Thunderbird look is the most decisive styling of the '60s.

The Thunderbird is a classic, made so by a peculiar blend of magic ingredients of which we would love to know the secret. We're building cars right now we hope will become classics, but the truth is, we don't make classics, we make cars. People make the car a classic. And that's the story of the Thunderbird.

Missed A.F.R.O.T.C.?

Go A.F.O.T.S!

These letters stand for Air Force Officer Training School—a three-month course for those who realize they want to become Air Force officers, but don't have enough school time left to enroll in AFOTC.

We prefer our officers to start their training as freshmen, so we can commission them directly upon graduation. But right now we're accepting applications for another fine way to become an Air Force officer—OTS. We can't guarantee that this program will still

be open a year or so from now.

As an Air Force officer, you'll be a leader on the Aerospace Team, serving your country while you get a flying headstart on the technology of the future. The U.S. Air Force sponsors one of the world's most advanced research and development programs—and you can be part of it.

If you're within 210 days of graduation, get more information on OTS from the Professor of Air Science.

U.S. Air Force

Softball Games Mark The Start Of Spring Sports

By Martin White

After the finals in the handball and table tennis play-offs, there will be only six intramural sports on the 1963 athletic calendar.

The first of these spring sports began Monday afternoon with six games in the fraternity softball league. Dormitory softball began this afternoon.

Badminton will start during the week of March 25, followed by Swimming and Tennis during the week of April 1; starting during the week of April 22, track will climax the intramural schedule.

In fraternity softball action Monday, Sigma Phi Epsilon broke a 3-3 tie in the eighth inning by scoring 7 runs to defeat Tau Kappa Epsilon 10-3. SPE started the 8th inning rally by loading the bases to set the stage for a double by Mike Morton which scored 2 runs.

Five more runs scored on an error and three hits before the inning ended. A first inning home run by Frelund brought in the three TKE tallies.

On the adjoining field, the Delta Sigs had a similar rally going which gave them 8 runs in the 6th inning to come from behind and beat the Kappa Sigs 18-12. Bare slammed the only HR of the game for D. Sig.

Sigma Nu scored 4 runs in the first inning, 3 in the 2nd, 5 in the 3rd and 12 in the 5th to rout the Theta Chi's 24-4 in a 5 inning game. Hendrix led in the HR department with two for Sig. Nu. Huntsman of Sig. Nu and Sadler of T. Chi each had one.

In other games, Pi Kappa Phi downed Sigma Alpha Epsilon 9-5. Huggins for PKP and Coble for SAE hit round-trippers. Pi Kappa Alpha pushed 5 runs across the plate in the third inning on their way to a 9-4 win over Lambda Chi Alpha. Sigma Chi scored 12 tallies in the first three innings to take a comfortable margin over the Sigma Phi's. The Chi's held their lead for a 12-5 victory. Smith hit a HR for S. Chi while Seagle hit a four-bagger for S. Pi.

Technician Sports

Varsity Baseball Begins Tomorrow

The 1963 baseball season begins for the Wolfpack Thursday afternoon.

Head baseball coach Vic Sorrell sends his boys against the team from Southern Illinois in the first of six straight home games. It is Sorrell's eighteenth season as Wolfpack coach.

Although bad weather during the first days of practice prevented the team from practicing and settling certain positions, Sorrell says that overall prospects are better than last year. "I really like the looks of some of these new boys this year. This could be one of the best young clubs I've had," said Sorrell, "we should have more speed and be a lot better defensively, we might surprise a few teams in the ACC."

Outstanding sophomores expected to add extra punch to the team are: John Arganbright, 6-3, 205 lb. outfielder with good speed; James Cutts, who had a .364 batting average on the freshman team; Pete Parham, who Sorrell says could be the best second baseman he

has ever had; Ray Barlow and Frank Perkinson, both rating high in Sorrell's mound plans, along with Buck Johnson, who had a 1.86 ERA for the freshman team last year.

Larry Clary and Walt Brown, transfers from Louisburg, are also new assets to the team, Sorrell said. Clary had a .368 batting average as a junior college All-American at Louisburg while Brown compiled a 4-1 record on the mound.

All-ACC football end Don Montgomery heads the list of 10 lettermen returning. Other veterans include pitchers George Allen, Johnny Boughan and Doug Harris; outfielders Ron Erb, Warren Linebrger and Jimmy Kirkman; and infielders Tom Hines, Jerry Cordell and Les Young.

Games during the week will begin at 3 p.m., while Saturday games start at 2:30 p.m. The last five home games will begin at 8 p.m.

Schedule

Finals Thursday Night In Dormitory - Fraternity Handball, Table Tennis

By Martin White

Only two teams remain in each of the dormitory and fraternity divisions in handball and table tennis.

In fraternity handball last week, Sigma Phi Epsilon defeated Kappa Alpha in route to their championship in the loser bracket. Last night, SPE downed Sigma Alpha Epsilon for the crown. Thursday night, SPE meets the winner's bracket champion, Sigma Alpha Mu, for the handball crown.

Sigma Phi Epsilon reached the finals in the table tennis play-offs last night by downing Pi Kappa Alpha for the losers' bracket championship. In the finals Thursday, SPE will face undefeated Sigma Pi for the table tennis championship.

In dormitory division handball, Berry defeated Owen #2 to gain its birth in the final round along with the winners' bracket champion, Bagwell. Owen #2 had defeated Syme in a preliminary game.

Becton took two wins Tuesday night, one over Owen #1 and the other by forfeit from Braggaw North, to reach the finals in the dormitory table tennis play-offs. The undefeated winner's bracket champion, Alexander, will defend its position Thursday night in the final round.

Tennis Team Begins Play Tomorrow

North Carolina State's tennis team will play 16 matches this spring, with the Wolfpack at home against 13 of the opponents, Athletics Director Roy B. Clogston announced.

The Pack, in coach John Kenald's 13th season here, opens at home against Dartmouth on March 21. The only road matches are against Maryland, Virginia and North Carolina in Atlantic Coast Conference play.

The 1963 schedule:
March 21 Dartmouth
March 22 Kent State
March 25 Campbell College
March 27 M. I. T.
March 29 at Maryland
March 30 at Virginia
April 1 Williams
April 5 South Carolina
April 6 Clemson
April 8 Toledo
April 19 Indiana
April 20 East Carolina
April 22 Davidson
April 27 Wake Forest
May 1 at North Carolina
May 9-11 at Chapel Hill
ACC Tournament

Ski Club

The Ski Club will meet Thursday, March 21, in room 109 of the gym.

In the championship matches Thursday night, the winners' bracket champion in each sport of each division has only to defeat the losers' bracket champion once to take the first place crown. In the event that the losers' bracket champion should win the first match of the play-off, that team would have to win a second play-off match to decide the overall championship.

Suspense

(Continued from page 1)

Cameron, he was told that the reasons for his disqualification were his grade point average and his association with PEP fraternity.

Cameron, when questioned last night, would not give the official reasons for the JCAB's action. He stated, that the candidates involved would have to be contacted. Shanker, was when contacted, stated that he had talked to Cameron, and had received "three reasons for my available for comment. Moore, disqualification—all connected with *The Technician*."

HILLSBORO AT STATE COLLEGE

Window Washing—M & O Style

This is the latest advance in the state of the art of window washing. The window washer need only add more sections of aluminum tubing as the windows get higher. They are going to have fun with the new nine-story dormitory. (Staff Photo)

Candidates Speak Out

(Continued from page 3)

support any outside organization or other campus group. Its members come from a variety of classes, schools, and backgrounds, and have only one common objective—the invigoration of the Student Government at State College. Each is, himself genuinely interested in the office which he seeks and is not simply a party pawn.

"Many people may at first feel a vague aversion to a party system in general. It should be emphasized, however, that the basic governmental system of the United States depends greatly on its political parties and that so far this system has succeeded admirably in preventing either anarchy or dictatorship.

"The present elections at State College are held in an atmosphere which can best be described as chaotic. Each candidate runs individually on his own merits and ideas (in an atmosphere in which such things are rarely considered) and campaigns sooner or later degenerate into poster-erecting contests. Even if an individual candidate with very constructive ideas is elected, he is usually powerless to translate his ideas into action by himself. In a party system, however, the best ideas of many candidates are combined and introduced to the legislature with the power of numbers behind them."

ACTION PARTY PLATFORM

"The party platform follows: We, the members of the ACTION party will, if elected, use our influence in the Student Government to accomplish the following.

1. A thorough investigation of profit-making areas on campus
2. Initiation of universal pre-registration.
3. A more realistic honor code (see separate head)
4. Get Woman's College Orientation program going right. Every year about 20 busloads of WC girls are taken to UNC for "Orientation". We want them routed here!
5. Work for the initiation of ROTC and OEP (a system of two year Junior-Senior level Reserve Officers' training which would supplant ROTC as it is now)
6. Get girls transported from local girls' schools for special events
7. Extend the Gym and Library hours on weekends
8. Establish longer hours for

9. Initiate improvements in the library—especially the reserve book room. Presently our library is rated among the poorest college libraries in the South
10. Restore large diplomas
11. Get M&O to put permanent sidewalks around Harrelson and improve landscaping in that vicinity
12. Obtain standing parade permits
13. Keep students better informed about their student government
14. Reinstatement of the Senior exemption rule

Honor Code

"The Action party proposes several major changes in the Honor Code System so that the number of possible decisions available to the Honor Code Board be larger and thus the trials become more individual and fairer. We recognize that the establishment of general disciplinary laws is extremely difficult and that the Board should have more discretion in handling of violators.

"The Action party, believing that these goals of the law have not yet been achieved at State College, proposes the following changes in the Honor Code and in the By-Laws of the Student Government Constitution.

"1. That the Honor Code Board be empowered to give a reprimand in those cases in which it deems advisable, which would not be placed in the permanent file of the student convicted, but instead the Honor Code Board would keep a copy of the reprimand in its own files and upon a second conviction of the same student would place the reprimand in that student's permanent file and suspend that student for a period of not less than one semester.

"The reason for this proposal is that we of the ACTION party do not believe that a student's whole life should be marred by one weak moment. We do believe, however, that any person twice convicted of violations of the Honor Code has no business at State College. We further believe that this reprimand would facilitate the turning in of violators of the Honor Code.

"2. That the names of those students convicted of violations of the Honor Code, with the exception of those receiving the aforementioned reprimand, be published in the student newspaper and those students found not guilty have the option of

having their name and the verdict of their trial published in the student newspaper."

ACTION PARTY CANDIDATES SENIOR representatives to

the Honor Code Board: Doug Coats, John Theys.

Junior Class Offices: Vice President, Doug Lientz; Treasurer, Steve Johnston.

Senior Agriculture Senator: Gene Henriksen.

Senior Textiles Senator: Richard Anglin.

Junior Engineering Senators: Willard Preussel, Gerald Goodman, Steve Johnston, Bob Downing.

Junior General Studies Sena-

tor: Herb Allred
Junior PSAM Senator: Doug Lientz

Sophomore Engineering Senator: John Logue

Sophomore PSAM Senator: Dwight Minkler

Tempest Winners...Lap 2!
