## NCS To Play Leading Role On Board

By Ernie McCrary

State College will play a leading role in Governor Sanford's recently proposed Board of Science and Technology, according to Graham Jones, the Governor's press secretary.

The proposal, requesting a two-million dollar budget, has been submitted to the Legislature and is now being considered by a joint appropriations committee. Jones speculated that the request might be approved by the first of June, paving the way for immediate action.

The Governor's Scientific Advisory Committee, which has a large number of State faculty members on it, has been a forerunner of this latest plan. Dr. A. C. Menius, State's dean of the School of Physical Sciences and Applied Math, is chairman of the advisory committee. Other State faculty members, who comprise more than one half of the committee's membership, are Walton C. Gregory, H. Brooks James, J. Lincoln Echells, Paul H. Harvey, Ralph C. Swann, George O. Doak, John W. Cell, Robert W. Truitt, Ralph E. Fadum, Patrick H. McDonald, William D. Stevenson, Kenneth O. Beatty, Raymond L. Murray, Willard H. Bennett, Jackson A. Rigney, Henry L. Lucas, Henry A. Rutherford, Malcolm E. Campbell, and H. L. Kamphoefner. The committee has been in existence since 1961.

According to Governor Sanford, the purpose of the proposal now before the Legislature is "to encourage, promote, and supplement scientific, engineering, and industrial research and applications in North Carolina."

Basically, the objectives are the expansion of research facilities and programs, especially those related to the nation's space program, the application of results of space research and

technology to industrial processes and products, and the expansion of graduate training and research opportunities in the state's universities and colleges.

The Governor, who will serve as ex-officio chairman of the board, will appoint fourteen members to it. Two will be from State, two from Carolina, and two from Duke. They will be nominated by the presidents of the universities. The Executive Committee of the Board of Governors of the Research Triangle will nominate another member, one member will be from the Governor's Scientific Advisory Committee, one from the North Carolina Advisory Committee on Atomic Energy, and five members from industries in North Carolina. The other member will be appointed by the General Assembly. Jones pointed out that the board will tie in and will work closely with the Advisory Committee. "Work on this sort of thing has been done before, but this is an effort to tie in all together and accentuate North Carolina's role in the space age," he said.

Jones could not definitely say whether or not the program will call for the construction of new research facilities at State.

## Faculty Senate Opposes Athletic Fee Increase

The Faculty Senate has voted disapproval of "any increase in athletic fees for undergraduate students as a means of financing a new football stadium."

A report of yesterday's Senate action went to the Chancellor yesterday morning and was released to *The Technician* last night by Dr. Carey Bostian,

chairman of the Senate.

The resolution reaffirmed earlier Senate action that athletic fees be made optional for graduate students, and supported an earlier resolution supporting the Consolidated University administration in removing "commercialized events" from the University sports program.

The resolution, as released stated that "The administration should continue to have full control of the policies relative to the intercollegiate athletic program" and that "The Senate supports the administration in all policies pertaining to athletics . . . provided these policies do not conflict with the educational objectives and standards of this institution." The recommendation cited as overemphasis on recruiting and special privileges to athletes as two examples of conflicting policies.

The final paragraph of the resolution states that the Senate "would be strongly opposed" to any increase in athletic fees as a means for financing a new football stadium.

According to Asst. Professor Herbert T. Elridge, secretary of the Faculty Senate, the resolution passed by an overwhelming vote.

At the present time, a bill to empower the trustees of the University to issue revenue bonds is under consideration by the Legislature. An increase in student fees was mentioned as one of the possible means of paying off the bonds. The Chancellor, in past statements has termed such an action as highly unlikely.

## CU Awards Banquet

State Dean of Faculty, Dr. Harry Kelly, speaks to the CU Awards Banquet which was held last night. At the banquet, awards were given to the outgoing officers and committee chairmen, Dave Weisiger was named outstanding committee member, the Activities Committee which is chaired by Wayne Adams was selected outstanding Committee, Rosina Coburn was honored as outstanding committee chairman, and Dr. Elmer Johnson was awarded the outstanding advisor trophy. Life memberships were given to A. Sydney Knowles, John Mattox, Bill Fowler, Peggy Barnes, Bill Lucas, Stan Nemmers, Frank Denise, Willard Barbee, Bill Guinn, and Mike Lea. The Alfred E. Neuman award for "causing the most confusion" was presented to the family of Dr. Johnson.

## Poteat Elected IDC President Monday

James Poteat is the new president of the IDC.

Poteat was named at the annual IDC banquet held in Learzar Hall Monday night.

During the short meeting awards were presented, Henry Bowers spoke, outstanding IDC

members were recognized, and the new officers were elected.

The hosts and hostess of several of the dorms were made honorary members of the IDC.

In Bowers' speech he cited the progress the IDC has made this year and urged the IDC to

support the CU in their joint programs such as the CU-IDC combo parties.

After Bowers' speech, Robertson commended several mem-

bers of the council for their work this year on special projects.

## Mangum Name Change Slated; No Arguments

Mangum Hall will officially become the David Clark Laboratories Friday.

The program will begin Friday at 11 a.m. with a welcoming address by Malcolm E. Campbell, dean of the School of Textiles. Other morning activities will include discussions by Professor John Cook of the Psychology Department and W. C. Daniel, assistant to the president of Dan River Mills.

The afternoon will include speeches by Professors E. B. Grover and D. S. Hamby of the Textile School, and by James C. Fry of the American Textile Manufacturers Institute.

Friday night's event will be a banquet at which R. L. Stern, an official of the U. S. Department of Commerce, will speak.

Saturday's program will include reports by attending educators and four seminar discussions.

David Clark, for whom the building is to be named, was widely known throughout the textile world for his work as the owner and publisher of the Textile Bulletin.

## Blue Key Taps Twelve

Twelve outstanding juniors were named to Blue Key Honor Fraternity today and yesterday. Blue Key is the only nation-

al leadership fraternity at State, and recognizes junior and senior student leaders each year.

Names to Blue Key were: Grant Blair, Tom Bentley, Jerry Jackson, Becton James, Bryan Little, Garland McAdoo, Art Mattox, Fred Millhiser, James Poteat, Horace Skipper, Lynn Spruill, and Bill White.

These men will be initiated next fall, according to Blue Key President Frank Smith.

## Agromecks Here Next Week Editor Says

Agromecks will be here next week.

According to Editor Frank Smith, the college yearbook is coming from the printers some time next week.

Smith stated that distribution plans are incomplete, but that there is a good possibility that they will be distributed on presentation of ID cards.

## Malayan Watches Chicken

State College's chickens interested Malaya's deputy prime minister Tun Abdul Razak during a visit yesterday to the poultry research station. Ending his five-day visit to the state, Razak said, "I was very much interested in your Agricultural Extension Service. This is one of the ways that we are trying to help our rural people."

## ME's Hear Of Changes In Curriculum

Tuesday night the AIAA, American Institute of Aeronautics and Astronautics, sponsored a departmental meeting to explain the new M.E. and M.E.A. curriculums.

Dr. R. W. Truitt, ME department head, spoke on the curricula and how they affect the student. Dr. J. C. Williams spoke on the MEA curriculum and the aerospace field. Dr. C. F. Zorowski spoke on the ME curriculum and the mechanical engineering future.

The main changes approved by the Engineering Department and now awaiting approval by the Consolidated University are: Drop MA 101 and move all other math courses up one semester, adding either MA 401 or MA 441; move PY 201 and PY 202 up one semester with MEA's adding PY 407 the junior year; drop IE 217 and IE 218; drop MIM 421, MIM 422, and MIM 423, add MIM 201; other changes will be made in the electives.

A question and answer period was held after the program by Dr. Truitt.

## Biological Scientists Meet

Some of the South's top biological scientists met at State College yesterday for the final day of a two-day institute sponsored by the Southern Regional Education Board. Examining some research papers are W. L. Bowden, associate director of SREB; Dr. R. L. Lovvora, director of agricultural research at State College; and Dr. L. E. Hawkins, director of agricultural research at Oklahoma State University.

## Grounds For Agreement

The Faculty Senate and *The Technician* have found new grounds for agreement this week.

This kind of phenomenon does not occur too many times during a given year, so the agreement merits comment.

The Faculty Senate briefly left its sphere of primary interest this week to reaffirm its position on intercollegiate athletics as well as to voice strong opposition to increasing undergraduate athletic fees as a means of financing a new 40,000-seat football stadium here.

The Senate reiterated its opinion that the college administration should have full control of all athletic policies and promised its support of these policies provided they do not interfere with the educational objectives and standards of the college.

We feel that the Senate acted wisely and we commend it not only on its views concerning intercollegiate athletics, but also on its perception of its function concerning athletic matters.

The Faculty Senate has adopted a hands-off attitude toward sports in the past and has let the administration do its rightful job, in controlling the sports program, commenting only on those athletic matters which have pertinence to general student and faculty welfare in the academic community.

In this light, the Senate's comments on student fees and stadium financing are pertinent and worthy of more than respectful consideration.

The faculty evidently agrees with us that student fees are high enough and that this source of revenue should not be encroached upon for the financing of an enterprise which amounts to frosting on the academic cake.

We have never stated opposition to the idea of a new stadium, properly financed and fiscally independent. However, the commitment of student fees to a non-academic enterprise establishes a dangerous policy.

Student fees should be only as large as is necessary for the athletic department to break even when it allows students to occupy seats at an athletic event. They should not be used to back extraneous athletic projects such as new stadium construction.

Let's have a fine new stadium if it can be independently financed, but we must agree with the Faculty Senate that an increase in student fees for such a project is not in the best interests of academic purpose.

—AL

## Pickets Zilched

### By Parents

It had to happen to someone.

Two of the counterpickets who were down at the State Theater Friday have learned that they will lose their parent's financial support if they continued to demonstrate, according to a person connected with the group.

This resulted in the number of counterpickets being cut to four, as they managed to recruit one new picket.

Spokesman for the pro-integration group have stated that none of their members have experienced this problem.

## Christian Scientists

Nationally-known former band leader Kay Kaiser will speak before the State College Christian Science Club tomorrow night at 8 p.m. in the College Union. Kaiser is now head of Christian Science publications in Chapel Hill.

Whatever you do, don't mention cars to my roommate!

## Naval Research Studying NCS Students

By Chip Andrews  
The Navy is studying state students.

According to the psychology department, the Office of Naval Research (ONR) is sponsoring a program of research in human learning here.

This research is being done in the Psychology Department and has been in progress over the past two years.

During this semester, Mr. Alfred Forsyth and Mr. John

Gorham, graduate students in the Psychology Department, have been conducting this research using State College students.

Dr. S. E. Newman, associate professor of psychology, is in charge of the research. After obtaining his Ph.D. at Northwestern University, Dr. Newman worked with the Air Force for several years as a civilian research psychologist. In 1957 he took a position here at State

and continued his studies of verbal learning. From 1957 to 1960 these studies received some support from the North Carolina State College Faculty Research and Professional Development Fund.

ONR began to sponsor this

research program in 1960. State is one of approximately eight universities in the United States at which ONR is currently sponsoring research in verbal learning.

According to Newman, the results of this research will probably not lead to immediate change in the instructional methods used by the Navy. They may, however, lead to an understanding greater than we have now about how people learn the names of symbols and things (for example, a list of names for electrical symbols), and to the identification of principles for designing materials and procedures to promote such learning, Newman explained.

Details of these experiments are being withheld by *The Technician* at the request of the Psychology Department so as not to bias the results of future experiments in which State College students might participate.

## Last Lecture In Nash Series Set For Friday

"Marriage Is What You Make It," available only to State College married students, will be presented as the final topic in the Nash lecture series tomorrow night at 8 p.m. in Room 242 Riddick.

According to Bob Hare, associate secretary of the YMCA, the event will be free of charge to all married students; the program is co-sponsored by the McKimmon Village Wives Auxiliary and the YMCA. A discussion period will follow the lecture.

Mrs. Ethel Nash is the noted Family Life Specialist from the Bowman Gray Medical School in Winston-Salem. This year's edition of her annual lecture series on Courtship and Marriage will conclude tonight with lectures at 7 and 8 p.m.

## Civil Engineers To Hear Head Of Aeroglide

James F. Kelly, president of the Aeroglide Corporation of Raleigh, and vice chairman of the Advisory Council of the N. C. State College School of Engineering, will be the keynote speaker at the American Society of Civil Engineers meeting Friday.

This joint meeting of the North Carolina Section of the ASCE is with the Duke University and North Carolina State Student chapters.

Dr. R. C. Carson, Jr. will welcome the visitors.

In addition to the keynote speech, there will be a presentation of outstanding student papers.

Professor Earl I. Brown, CE head at Duke will preside at the technical session. James E. Derby and Edward A. Johnson of Duke and George L. Reed and Jesse W. Myers of State College will present their award winning papers. George S. Rawlings of Charlotte, immediate past president of the North Carolina Section of the ASCE will present the technical paper awards.

The senior awards will be presented by faculty advisors A. E. Palmer of Duke and P. D. Cribbins of State.

Host for the one day meeting is the Eastern Branch of the ASCE.

## PSAM Council Names Members

Physical Science and Applied Mathematics students have elected seventeen students in the school to serve on the PSAM Science Council for next year.

Physics department represen-

tatives are Ray Brady, Tom Bentley, G. Comer Duncan, and Frank C. Ziglar. Chemistry members are Jean Lawrence, Ethel Oliver, and John G. Stevens. The chemistry alternate is Betty Van Dyke.

Council members for the math department are John Carr, Charles A. Chapman, Ronald Dabbs, Marvin Leatherman, David Shreve, Ralph Showalter, and Lynn Spruill. The math alternate is Terry Lowder.

The statistics department will be represented by Peggy Brant, Marilyn Adele Jones, and Arthur Van Nostrand.

## Dietrich Sings In 'Destry' Weekend Flic

"See What The Boys In The Back Room Will Have," a Marlene Dietrich special, will be crooned in the College Union weekend movie "Destry Rides Again," according to the CU Film Committee.

The movie will be shown this Saturday and Sunday at 3, 5, 7, and 9 p.m. in the Textile Auditorium.

The movie starring James Stewart and Marlene Dietrich, is described by the Film Committee as "A real rip-roaring, swashbuckling film of the 'Old West' about a quiet, lanky sheriff who tries to reform a corrupt town without using his 'shooting iron.'" The film was adapted from a novel by Zane Grey.

## Band Sets Concert

James Terrell, a sophomore from Morehead City, will be featured trumpet soloist in "Deep Blues" with band accompaniment in Friday evening's CU terrace concert by the State College Symphonic Band.

Beginning at 7 p.m., the concert is another in the spring concert series presented by the college's music department, and sponsored by the Performing Arts Committee of the College Union.

## New IDC Officers

New IDC officers were elected in the Inter-dormitory Council's banquet Monday. They are, from left to right: Fred Barkley, vice-president; Jim Potent, president; and Jerry Jenkins, secretary. (See story, page 1.)

# State Big Four Day Championship Teams

# Fraternities And Dormitories Begin Softball Play-Offs

Seven games were played yesterday in the dormitory and fraternity softball divisions, three of the contests were to decide final positions in the regular season standings, the other four were in tournament competition.

It took two games to decide third place in Section #2 of the dormitory division. Owen #1, Alexander, and Bragaw South all ended the season with 3-3 records. In the first play-off game, Owen #1 defeated Bragaw South 10-9. The winners held a 9-2 lead going into the top of the last frame, only to see Bragaw S. score seven times to tie the score 9-9. Owen #1 pushed across the winning run in the bottom half of the inning. Thomas hit a home run for Owen #1 while Brummitt had one for the losers.

Alexander took third place in the section with a 7-5 victory over Owen #1 in the second play-off contest.

In the only dormitory tournament game, Bagwell downed Owen #2 18-6. The Bagwell team scored in every frame of the game in posting the victory. Cornwright hit two homers for Bagwell with Craft and Kerley getting one each. Whitman hit the only Owen #2 four-bagger.

In the semi-final round, Watauga will play Bagwell and Turlington will meet the winner of the Bragaw North-Alexander contest.

Alpha Gamma Rho scored eleven runs in the first two frames of their play-off game with Kappa Alpha in posting a 20-10 victory. The win gives the AGR's second place in Section #4 in the fraternity division. In tournament action today,

Sigma Nu eliminated last year's champions, Sigma Phi Epsilon, by a 4-1 margin. Hendricks hit the only homer of the game for Sigma Nu.

Theta Chi defeated Kappa Sigma 11-7. The score was tied 5-5 going into the final frame before Theta Chi rallied for six runs while holding KS to two. Rhodes homered for the winners while Ivey hit one for KS.

In the other contest, Phi Kappa Tau won a close match over Sigma Chi, 14-12. The PKT's took a 6-0 lead in the first frame and were never headed in the contest. Morrow homered for PKT while Medlin hit one for Sigma Chi.

# Technician Sports

## Duke Tops Pack 3-1

The Wolfpack collected 11 hits last night while holding the Duke Blue Devils to only 4 hits and still lost by a 3-1 score. The Pack left twelve potential runs stranded on base during the game.

Duke scored on run in the second, third, and fifth innings while holding State to a single tally in the final frame. Perkin-

son suffered the loss for the Pack and was relieved in the eighth inning by Boughan.

This weekend, the Wolfpack will play its last two home games of the season. Both contests will be at night, beginning at 8 p.m. Friday and Saturday, with Clemson and South Carolina.

Bowling Champions

Handball Champions

Softball Champions

## Horseshoe Champions

A fourth championship was won by the State entry in the horseshoe pitching tournament. State won in the first round of play over Wake Forest by forfeit and then defeated Carolina for the title.

State players were George Setzer, Ron McClamrock, Bill Martin, Raymond Parker, and Claude Greeson.

For late summer and fall applicants, the placement test will be given June 8 to 8:30 a.m. at the main post office on Fayetteville Street.

Lee McDonald at the CU and Bill Bromby at King Religious Center have further information.

## Math Department Gets Grant For Institute

The National Science Foundation has awarded \$7,640 to the Department of Mathematics to conduct an in-service institute for secondary school teachers for the academic year 1963-64.

This is the sixth year that State has conducted the institute. Its principal objective is to acquaint teachers with new developments in mathematics and the impact of these on secondary school mathematics.

Dr. H. V. Park, professor on mathematics and director of the program, said that enrollment will be limited to twenty-five mathematics teachers in junior or senior high schools who live within driving range of the college. Tuition, travel, and a ten dollar book allowance for selected participants will be provided by the NSF grant.

The program includes two courses, one offered each semester and scheduled on Saturdays from 9 a.m. to twelve noon. "Fundamental Concepts of Geometry" will be taught by Dr. Park; "Fundamental Concepts of Geometry" will be taught by Dr. A. R. Noldstad during the

officially enrolled at State College are eligible for membership in the new Association, according to the constitution approved yesterday.

Association dues are to be 50¢ per semester. The meetings will be held weekly on an informal luncheon basis.

According to sponsors, the Association hopes to become a working organization next fall.

## -Campus Crier-

A meeting will be held in Withers 111 at 7 p.m. tonight to organize a proposal to be made to the PSAM school concerning the suggested telescope and observatory to be built at N. C. State.

Joan Baez will be in Durham for a concert May 15th at the B. N. Duke Auditorium at North Carolina College. The time is 8 p.m. and admission is one dollar. Proceeds will go to the Uni-

second term.

Dr. Park also said. "In the past, this program has been very successful and we feel that the students of the teachers who have participated in the program have benefited greatly."

The institute will open on September 14, 1963.

## Seniors: Contact Placement

Do you want future employers to know you graduated from State College?

Perhaps things aren't this bad, but a number of seniors may be out of touch with the College unless they notify the Engineering Placement Office of their plans after graduation.

According to Raymond E. Tew, Engineering Placement Director, a number of seniors in the School of Engineering and the School of Physical Sciences and Applied Mathematics have not yet notified his office of their future plans. Tew reported that it is to the advantage of the student to let the Placement Office know where he will be

# Top High Schoolers Need Attention

Dean J. Bryant Kirkland feels that superior students need to be better recognized as they apply to enter college.

In an interview with *The Technician*, Dean Kirkland of the School of Education stated that he feels that modifications need to be made in the requirements for admissions of students to State due to high-level courses which are being taught in the high schools.

"If a superior student had high-level courses in high school, and as a result has made lower grades than he would have in

the regular sections, we in effect penalize him by our entrance requirements. A "C" on a student's transcript means the same to the Admissions Office no matter what level the course has been taught on. It is possible that many students in high school stay away from these courses for just this reason," stated Dean Kirkland.

This was one of the topics discussed last week at a Region III talent development conference at the University of Virginia which Dean Kirkland and Dr. Harold Corter, Professor of psychology, attended.

This meeting, which was the first of its kind, was sponsored by the U. S. Office of Education and the Departments of Education of the schools composing this region. 250 high school and college representatives discussed the need for developing gifted and talented youth and search-

ed for the best ways to accomplish this, according to Dean Kirkland.

"We have not done as much here at State along these lines as other schools have, although our honors programs are for the most part up to date. Our biggest problem is that the media for teaching these students that we use does not pro-

vide enough opportunity for individual study," stated Dean Kirkland.
