1958 State Grad Safe After Crash

A State graduate, Captain Parker Caswell Peeden, has been found alive and in satisfactory condition after the B-52 crash Monday in Western Maryland.

The co-pilot of the B-52 which crashed and burned in the mountains of Western Maryland Monday was graduated from State in 1958 after being an enthusiastic AFROTC and mathematics student.

While at State Peeden majored in mathematics education and was active in the College Union Photo Committee. Even while

he was in high school he was active in organizations. He was president of the student body according to his former teacher, Virgil Payne, and played center on the Selma football team.

The 29-year-old Air Force captain from Selma was found yesterday after surviving near zero weather in the mountains sixteen miles from the Maryland-Pennsylvania border. The pilot Maj. Thomas W. McCormick, was reported safe Monday night in a farmhouse about ten miles from the crash site. The remaining three members of the crew had not been located last night and the prospects of their being found alive in the 15 inches of snow in that area are diminishing rapidly. McCormick said that he had been the last one to leave the plane and he had no idea where his crew members were.

Search parties from the Air Force, Army, and local officials are in the crash area looking for the downed airmen, investigating the crash, and removing the two unarmed nuclear bombs carried in the bomber. Experts on nuclear safety said there was no danger of the bombs exploding in the crash and there is no radiation danger in the area.

Captain Parker Caswell Peeden ... when he was at State ...

Growing Library Excites Director

By Dwight Minkler
"I sure as heck would rather talk about the 'new days' than the old days!" Brown said, declaring his extreme interest in the future of the D. H. Hill Library.

Harlan Brown, director of the library, holds a vibrant conversation. Every third sentence demands an exclamation mark, and his facial mannerisms add spice to any statement that lacks it.

"Let's tell them first how we're growing," Brown began. The library now has about 280,000 volumes. "However, we are growing at a rate from about 15,000 to 18,000 volumes a year." The library subscribes to over 4,500 magazines and

journals, a third of which are in a foreign language. "At the present time the library is comfortable as far as book and magazines storage is concerned, but we are beginning to feel a pinch as far as study space and facilities for using the library are concerned. By 1968 we will be hurting!" he twinged.

This is the plan for expansion: "Now N. C. State needs a bigger and more adequate Union building, and the plans for expansion of the library are going hand in hand with plans for a more adequate Union," he said. In other words, Brown thinks that the library will be extended to include the entire Student Union, and a more satisfactory Union will be built elsewhere. The present library area will probably be reserved primarily for graduate, research work; and the new Union part will be designed primarily for undergraduates, with open shelves, he prognosticated.

Coed Receives 'No Trial'

A "no trial" was declared last night by the Honor Code Board in the first case in at least three years of a coed accused of violating the Honor Code.

According to Bob Shearin, chairman of the Board, the case will be tried again. Shearin said the Board felt there was insufficient evidence to come to an immediate verdict, but that an ef-

Rifle Team Coach Heads For Germany

State is losing its Rifle Team coach.

Sgt. George Oakley, coach of the Varsity Rifle Team for the last two years, has been transferred to Germany.

When asked about the transfer, Sgt. Oakley commented, "I have enjoyed working with the boys for the last two years. They have all worked hard and I am confident that they will continue to do so. I regret having to leave before the end of the season but my tour of duty here has ended."

Under the direction of Sgt. Oakley a new rifle range was constructed in the basement of Frank Thompson Gym. This facility is recognized by many coaches in the area as one of the best indoor ranges in the South.

In Sgt. Oakley's pursuit of recognition for the Rifle Team a program of inter-competition was developed. The full trophy case at the rifle range is evidence of the success of this innovation.

The record Sgt. Oakley established as coach of the rifle team is usually referred to as a "Coaches Dream." The record stands at 86 wins and eight losses.

COACH GEORGE OAKLEY

Sgt. Oakley intends to bring his wife and five sons back to Raleigh upon completion of his career in the Army. The Sgt. has four more years of service remaining.

Council Sets Senior Refresher Series

By Dick Paschall

The Engineers' Council will initiate a series of lectures comprising a complete refresher course in ten phases of engineering beginning next semester, according to Art Mattox.

Mattox, chairman of the Council's committee for the study of the need for a refresher course, said that the purpose of these lectures is to give engineering seniors a chance to increase their knowledge of ten subjects in engineering which are covered in the state Engineer-in-Training exam.

The EIT is given by the state as the first part in a two-step program for engineers to become registered for practice in North Carolina. The exam is taken after either four years of college or four years of basic experience in engineering. After successfully completing the EIT and the accumulation of five more years of experience, the engineer becomes qualified to take the engineer's examination for a license to become registered in North Carolina.

Mattox stated that the course will begin the third week in February. Each week, one subject will be covered in two 2-hour sessions. The specific days for each of the lectures will be announced later. The sessions will be held in the evenings, said Mattox.

Out of the ten subjects scheduled to be "refreshed," eight are definitely to be in the program with professors committed to lecture about them. Instructors for courses in mathematics and electricity have not been decided. Physics will be covered by Prof. H. L. Owen; chemistry, by Prof. John W. Morgan; hydraulics or fluid me-

chanics, by Prof. G. W. Middleton; kinetics and kinematics, by Prof. Middleton; thermodynamics, by Prof. J. S. Doolittle; statics, by Prof. Adolphus Mitchell; strength of materials, by Prof. Mitchell; and engineering economics, by Prof. G. E. Tucker.

Duke and State students usually take the exam together, but the Dukes have consistently made a better percentage showing than State engineers.

The EIT exam is scheduled for May 2nd. Seniors interested in the exam should consult Dr. R. G. Carson, associate dean of engineering.

Popsicles? No, Icicles

THE BIG DRIP

"Gee, I wish it'd get cold," Roger Powell, a second-story Welchite, exclaimed.

Building his icicle is not an easy job if the weather isn't willing, he explained. Powell started his icicle Monday night, but it didn't do any growing Tuesday.

Powell stopped up all the holes in his holey garbage can but one, onto which he extended a rubber dripping tube. A hanging string completed the apparatus. Powell has used only one trash can of water so far. He expects some competition in a few days; that's why he got a head-start.

Jim Rea, a State student and graduate of Hebron Academy in Maine, claims that this icicle is puny. He also says that "using a string to build an icicle is cheating!" Of course, it gets a little colder in Maine than it does here, like 30 below.

Tuition Is Due Friday Week

The deadline for paying tuition and fees for the spring semester is Friday, January 24.

Students may mail in their payment with the bill sent to them over the Christmas holidays or they may pay for the bill in person at the student bank in Holladay Hall. The bank is open Monday through Friday from 8:30 a.m. until 1 p.m.

Registration permits may be (See PRE-REGISTRATION, page 4)

Mrs. N.C. State Of UNC At Raleigh

Leadership

Editor's note: This editorial is the second evaluating the overall programs of the campus as a whole.

The greatest challenge facing campus leadership is the general indifference of the average student.

The problem doesn't seem to be student objection to being led, but a lack of caring where they are being led.

This is a vast over-simplification of the situation, however. Students will object to any situation which affects them directly. The cafeteria, an increase in tuition, and a new name for State all will arouse everybody. On the other hand, a situation which appears to have no direct effect, such as the law banning Communist speakers won't arouse the same interest.

The duty, therefore, of an elected campus leader is to be attentive to the demands of the majority of the students on issues with which they are concerned. At the same time, he must make a decision on problems which indirectly affect the student.

As a general rule, the campus leader will decide his position on his personal preferences in regard to the indifferent problems.

While this is often a good means, the transitory nature of the leader's job precludes another judgment he should make. Many decisions should be made in terms of the future.

A great majority of campus leaders will not consider trends or obvious future effects when making a decision; yet these should be considered.

The basic question is: Should the elected leader go against the wishes of the majority of the students if the future bodes ill for the decision?

There is no pat answer, but a good rule of thumb might be to follow the wishes of the majority if the action can be reversed in the future. However, a decision which sets a precedent should be made with some consideration to future effects. Past decisions should always be studied by any student leader.

Disaffiliation from NSA, for example, has come up about every four years, in an unchanging cycle. The arguments are the same, the decision is the same. "NSA can be a valuable asset . . . but the students should have a greater voice in it." For the first time this may be possible—or can it? Are there any assurances that NSA cannot become ineffective in the future, and that the cycle will repeat itself? One way to overcome this might be to establish NSA as the campus center of information about other schools. Another way might be to set up NSA as the primary means of liaison between other institutions for a meeting of any type.

In other words, any judgment on NSA should be made in consideration of both past actions and future trends. In this example, the obvious course of action should be to prevent the past from repeating itself.

The Erdahl-Cloyd Union has been following a precedent for a number of years. With the inclusion of Friends of the College, New Arts, and the IDC-CU combo parties, the Union appears to be subordinating its leadership role so that it may develop a service role. The future Union may be willing to act as a partner to any organization which has an original idea and a portion of the funds necessary to carry the idea through.

The problem in this example shows the necessity of charting a future course of events.

The student leader in this situation needs to recognize a trend which a set by precedent-making decisions of the past, decide how he wishes to shape this trend during his tenure of office, then make sure his successor knows what he and others have done.

Although the students may not be aware, as a whole, of these future trends, there may come a time when events force them to notice this. The decision then falls upon the student leader to follow the trend or to follow the wishes of the student body.

It is up to him.

"IT'S FINAL EXAM TIME AGAIN"

Some Hints For Exams

Editor's Note: Worried about your final exams? Well, if you are, stop . . . and start studying. But if you are interested in a sure-fire method of flunking all your courses, The Cavalier Daily at the University of Virginia gives the following advice.

For those few who didn't study over the vacation or accidentally dropped their notes in an egg nog bowl, here are a few study hints to help you through the semi-annual Ordeal by Blue-book.

STUDY equipment: Before you set out for the library or down the road, be sure you have the following: four well-sharpened pencils (no.2), two ball-point pens (one blue, one red), one ink pen (permanent blue-black), two legal pads (yellow), two boxes of NO-Dox (white), four dollars (green) for coffee, and a pack of simplex paper. If you still have some room, you might also take your texts. It's not necessary though, you can just sit in the lobby and sell supplies and finesse the final.

TAKING the exam: First, before you go into the examination room, carefully remove half the pages in your blue books. The professor will then be very impressed when he sees that you have filled two blue books on his final.

Find out how many graders the professor has. If he has only one, you are fat. This poor grader will be very bitter and involuted, considering himself overworked and underpaid. Consequently he will only scan the finals. So when you take your exam, write. It makes no difference what you write or how you write it, just write reams. Put everything you know about the course in the first paragraph and write a brilliant conclusion. In between just put anything that comes to mind, just so it's long—write Jabberwocky from memory, copy your draft card, describe Liz Taylor in Yiddish. Just fill up those pages. Of course, if you have a multiple choice final, hang it up.

If you do have a multiple choice final make your A, B, C, D, E look alike, so the grader can't tell the difference and give you the benefit of the doubt. Of course the professor can retaliate by making your "A" look like an "F."

THE ROLE of luck on a final: At the Naval Academy there is a tradition that throwing pennies at the statue of Tecumseh will bring good luck on exams. Here at the University we have a similar tradition, only we throw twenty-dollar bills at professors for luck.

Remember, praying will not be tolerated during the exam period, since it is asking for out-

side help. Besides, the courts have ruled it illegal.

If it is any consolation, just keep hoping that everybody else in the class is as stupid as you are. Then the curve will resemble an inverted rotunda and the professor will go mad trying to cast the grades.

Chicago Ballet Opera Begins Two-Night Stay

The Chicago Ballet Opera will give the first of its two performances at the Reynolds Coliseum tonight at 8 o'clock. The opera will present the same performance again Thursday night. Students whose last names begin with the letter A-M may attend tonight's performance and others may attend tomorrow night.

The opera will be highlighted by "The Merry Widow" and "Carmen."

The Friends of the College is sponsoring the opera's appearance here. Students will be admitted free.

Campus Comments

Across The State And Beyond

CHAPEL HILL DISCRIMINATION VARIES

A survey conducted by The Daily Tar Heel indicates that discrimination in service exists in 25 per cent of 116 service and accommodation facilities in Chapel Hill.

The survey was based on interviews with managers and employees at eight types of retail facilities listed in the Yellow Pages of the Chapel Hill phone book. Businesses included barber shops, beer and ale service, billiard parlors, drug stores, grocers, hospital facilities, ice cream parlors, motels, restaurants and service stations.

The survey did not include employment or housing discrimination.

The types of discriminatory policies included segregated rest rooms, take-out or standing service in restaurants, and complete segregation.

The survey disclosed that N. C. Memorial Hospital has two floors with predominately Negro patients. It also showed that three of Chapel Hill's five motels do not accept Negro lodgers while the other two are predominantly Negro with some white patronage.

CONFLICTING BILLS FACE LEGISLATURE

Two bills have been introduced in the UNC Student Legislature dealing with student demonstrators—one urges that arrested students be exempt from student judicial procedures while the other calls for their cases to be heard by the Honor Councils.

The first bill praises the non-violent demonstrations as being "in the highest American tradition" and urges that arrested students "not be subject to any disciplinary action by the student judiciary whatsoever."

The other asks that the legislature go on record "as feeling that there is no violation in participating in peaceful and lawful demonstrations," but as being unable to condone "the willful, premeditated, and persistent violation of the law."

The two bills have been referred to committee for consideration.

A 'Firery' Candidate

Linda Edwards apparently knows how to handle fire. As a candidate for the Mrs. N. C. State title, she twirled a fire baton in the talent competition. She is the wife of David Edwards, a junior in Ag Education. (Photo by Cashion)

Ag Ed Club Names Heads

The Ag Ed Club has named its new officers for the spring semester.

Heading the club are Ray Baker, president; Bill Revels, vice president; Bryan Brooks, secretary; Lewis Forrest, treasurer; Glenn Parrish, reporter; Ronald Hayes, Sentinel; and Larry Mabry, social director.

The officers were elected at the final meeting of the fall semester last Thursday night.

McKimmion Library Asks For Books For Residents

McKimmion Village Library is requesting donations of books.

The small library was set up in 1962 by the Erdahl-Cloyd Union to be used by the wives and children of married students.

Books of interest to the general reader, such as novels, short stories, and poetry, as well as books on homemaking, interior decoration, sewing and cooking are requested. Children's books are also needed.

Both paperbacks and hardbacks will be accepted. They should be turned in to the Erdahl-Cloyd Union Main Desk or arrangements to have them picked up can be made by calling Mrs. Brita Tate, extension 378 at the University.

Technician Sports

UNCR Meets UNCCH

The freshman and varsity basketball teams of the Consolidated University of North Carolina will meet in Chapel Hill tonight beginning with the frosh contest at 6:15. The varsity game will follow at 8:00.

WUNC-TV, channel 4, will carry the video portion of the game while the sound can be found on several radio stations.

The State frosh defeated the baby Tar Heels in Raleigh earlier this season, 76-65. The Carolina freshmen will feature Bob Lewis, currently averaging 38

points per game, who has scored over 50 points twice and has been over 40 in most other games. State guard Eddie Biedenbach held Lewis to 16 points in the last meeting between the two schools. Biedenbach leads the freshman with an 18.4 average.

The older Wolfpack will be trying to break a three game losing streak since the Christmas holidays. All three losses have been on the road and against ACC competitors.

Coach Lou Pucillo seems to be describing a typical basketball to his starting five freshman players. The players are: Merv Guttschall, Jerry Moore, Paul Hudson, John Sellers, and Eddie Biedenbach; all five are averaging in double figures.

Pi Kappa Phi and Bragaw North No. 1 Win Bowling Crowns

Pi Kappa Phi set a series high in the fraternity bowling league Monday night by defeating Theta Chi, 2641 to 2310, in the championship match. Bragaw North #1 came from 76 pins behind to defeat Bagwell 2541-2491 in the dormitory finals.

The PKP's rolled an 829 first game to take an early lead over the Theta Chi's. Their 934 second game put the match out of reach while an 879 in the final game iced the cake. Sills led the champions with a 559 series, followed by Billings, 545; Bouley, 532; and Beck, 501. Caldwell had 505 to lead Theta Chi.

Bragaw North #1 trailed by 20 points, 1695-1675, at the end of their second game with Bagwell before rolling an 866 in the final game to win the match by 50 pins. McNeil had a 579 series on games of 199, 188, and 192, to lead the champs while Blackburn, 502, and Southard, 500, aided in the cause. Cathy, 514; Swain, 525; and Steel, 529, led the losers.

Coach Case Enters Hospital For Rest

Everett Case veteran basketball coach at N. C. State, is in Rex Hospital suffering from gout and shingles, Athletic Director Roy Clogston said Tuesday.

Case, 63, entered the hospital Sunday and is expected to be there for several days.

"Doctors feel that he needs a complete rest," Clogston said. Case missed the recent South Carolina and Virginia games due to illness. In his absence,

assistant coach Press Maravich has charge of the team.

Case, now in his 18th season as head coach at State, had a won-lost record of 370-122 prior to this season.

fort would be made to obtain more information on the case. The coed is accused of book theft.

In another trial, two students, one a freshman and the other a sophomore were found innocent of cheating charges.

The two defendants were accused by a fellow student of collaborating on a History 261 exam.

The Board found them not guilty by a unanimous vote after a deliberation of approximately ten minutes.

First U. S. Satellite Instrumented By Manring

By Dwight Minkler

Dr. Edward Manring. Does this name of Manring ring a bell in your earring? Probably not. He's been at State only a week.

A teacher in general physics and optics, Manring comes from the Geophysics Corporation in Bedford, Massachusetts. There he built and fired the first sodium-vapor rockets, used to study upper atmospheric conditions.

"During twilight, evening and morning, we sent up a rocket which ejected lithium and sodium vapor," Manring said. The vapors are released in a long

stream, extending from 50 to 200 kilometers above the earth. By studying photographs of these vapor streams, speeds and air pressures at upper altitudes are determined.

In fact, three vapor rockets are to fire from Wallops Island, about 180 miles from here, this week, weather permitting.

Manring emphasized that observant students may be able to see the fluorescent vapors illuminate the coastal horizon during the twilight hours.

Why weren't the rockets fired from near Bedford, where they were made? "You can't fire rockets at Boston because people don't like things coming down over their heads," Manring explained.

In addition to building instruments in Explorer I, Manring received and interpreted the data from the satellite.

A GUIDE FOR THE GUIDERS

One of the most interesting academic theories advanced in many a long year has recently been advanced by that interesting academic theorist, E. Pluribus Ewbank, Ph. D. who holds the chair of Interesting Academic Theories at the St. Louis College of Footwear and Educational Philosophy. Dr. Ewbank said in the last issue of the learned journal, the *Mount Rushmore Guide to Scholastic Advancement and Presidents' Heads*, that we might be approaching the whole problem of student guidance from the wrong direction.

Dr. Ewbank, a highly respected pedagogue and a lifelong smoker of Marlboro Cigarettes, (I mention Marlboros for two reasons: first, to indicate the scope of Dr. Ewbank's brainpower. Out of all the dozens of brands of cigarettes available today, Dr. Ewbank has had the wit and taste to pick the one with the most flavorful flavor, the most filtracious filter, the most soft soft pack, the most flip top Flip Top box: I refer, of course, to Marlboro. The second reason I mention Marlboro is that I get paid to mention Marlboro in this column, and the laborer, you will agree, is worthy of his hire.)

But I digress. To return to Dr. Ewbank's interesting theory, he contends that most college guidance counselors are inclined to take the easy way out. That is to say, if a student's aptitude tests show a talent for, let us say, math, the student is encouraged to major in math. If his tests show an aptitude for poetry, he is directed toward poetry. And so forth.

She set the entire math department agog

All wrong, says Dr. Ewbank. The great breakthroughs, the startling innovations in, let us say, math, are likely to be made not by mathematicians—whose thinking, after all, is constrained by rigid rules and principles—but by mavericks, by nonconformists, by intuitors who refuse to fall into the rut of reason. For instance, set a poet to studying math. He will bring a fresh, unfettered mind to the subject, just as a mathematician will bring the same kind of approach to poetry.

By way of evidence, Dr. Ewbank cites the case of Cipher Binary, a youth who entered college with brilliant test scores in physics, chemistry, and the calculus. But Dr. Ewbank forced young Cipher to major in poetry.

The results were astonishing. Here, for example, is young Cipher's latest poem, a love lyric of such originality that Lord Byron springs to mind. I quote:

*He was her logarithm,
She was his cosine.
Taking their dog with 'em.
They hastened to go sign
Marriage vows which they joyfully shared,
And wooed and wed and pi r squared.*

Similarly, when a freshman girl named Elizabeth Barrett Sigafoos came to Dr. Ewbank to seek guidance, he ignored the fact that she had won the Pulitzer prize for poetry when she was eight, and insisted she major in mathematics. Again the results were startling. Miss Sigafoos has set the entire math department agog by flatly refusing to believe that six times nine is 54. If Miss Sigafoos is correct, we will have to re-think the entire science of numbers and—who knows?—possibly open up vistas as yet undreamed of in mathematics.

Dr. Ewbank's unorthodox approach to student guidance has so impressed his employers that he was fired last week. He is currently selling beaded moccasins at Mount Rushmore.

© 1964 Max Shulman

We, the makers of Marlboro, know only one kind of guidance: the direct route to greater smoking pleasure. Try a fine, Altered Marlboro, available wherever cigarettes are sold in all fifty states of the Union.

[Eagle Shirtmakers Proudly Announces]

NO. CALDWELL, N. J. MAN or a MISS LAUREN WINS COVETED AFFLERBACH FELLOWSHIP!

AFTER what is possibly the world's record rumination over who won a color-naming competition we have reached a decision. If you can remember that far back, more than a year ago we explored the uninspired names given to colors (light green, dark blue, etc.) as well as the sheer flights of fancy that conveyed nothing at all (Kumquat Blossom Time, December Showers, Teaneck, etc.). We asked your assistance in conjuring up new, evocative names for shirt colors, but names that also had some connection with reality; such as Whizzer White, Well Red, Navel Orange, and so on. ★ To make the enterprise more tempting we dangled a Grand Prize of a Traveling Afflerbach Fellowship: a glamorous weekend at Quakertown, Pa., our HQ (with a free sightseeing trip into romantic Philadelphia), or a dozen Eagle Shirts. Additionally, there were 9 Stationary Afflerbachs of 1/2 dozen Eagle Shirts offered as second prizes. ★ Well, here it is: The winner is none other than either W. R. Goodwin of No. Caldwell, N. J. or Janet Lauren of New York, N. Y.! They were so close, which is what held us up, that they both win the grand prize. Second prize winners will be notified by mail. Congratulations, all! ★ Among the thousands and thousands of splendid names submitted—some of which we shall surely use—were the following:

Forever Amber
Chat Aqua
Freres Aqua
Come Azure
Sick Bay
Editorial Beige
Gar Beige
Noblesse Beige
Shan Franshisco
Beige
Hole of Calcutta

PLEASE DO NOT FILL IN THIS COUPON!

THE only reason this coupon is here is: we are going to make this page into an easel card to sit on the counters of stores that sell Eagle Shirts; and where this space is we are going to have a pad of entry blanks which people who buy shirts (as opposed to people who merely read ads like this and who at any rate have already had a chance at color-naming) may fill out with their color name entries. Fair is fair. Incidentally, this sort of effort is called "merchandising", possibly because it is intended to brighten the eyes of the merchant who sells Eagle shirts. If you don't know who that might be in your town (they don't all have neon signs announcing same in their windows, you know) you might write Miss Afflerbach; you may use the coupon for that if you like.

Dear Miss Afflerbach
Eagle Shirtmakers,
Quakertown, Pa.:

Where is my nearest Eagle Shirt dealer? (Psst, how about _____ for a color name?) Sincerely,

Name _____

Address _____

City _____ Zone _____ State _____
