## FOC Pianist Had Debut At Age Twelve

On October 8, Van Cliburn, world-renowned pianist, will open the fifth anniversary concert season of the Friends of the College.

Van Cliburn made his Carnegie Hall debut at the age of 12 and graduated from the Juilliard School of Music with honors. His career seemed to have hit its stride in the 1955-56 season when he played 30 concerts. In 1957, he entered the Tchaikovsky International Piano Competition in Moscow, the results of which made front-page news around the world. Since that time, Cliburn has made several tours of Europe, Mexico, and the United States, and returned to Russia as part of the government's Cultural Exchange Program.

Cliburn comes here in his current trans-Atlantic tour during

## PEP

Tonight there's going to be pep-rally type cheering.

The Student Government, the Pep Band, and the cheerleaders will tromp noisily from Bragaw to Riddick Stadium, leading the cheery students, said Rick Ray, head cheerleader. The cheer type rally will begin at 8:30 p.m. Ray added that no march on the capitol will be held.

The cheer rally is in support of the South Carolina Freshmen (See PEP, page 4)

## Greeks Plan Seminar For Its Leaders

State fraternity leaders are getting together again. The occasion is the Second Interfraternity Leadership Seminar, on tap October 12 at the Student Union.

Following up last year's successful seminar, the IFC is incorporating the results of questionnaires with suggestions and new ideas in an aim to make this one of the most outstanding fraternity functions of the year.

Under the hypothesis that the college man is becoming more sophisticated and his education is becoming more difficult, this seminar will be designed to take a critical look at the existing fraternity system,

## RLT Schedule

The Raleigh Little Theater will present the seasons first production of *Wonderful Town*, a musical, during the week beginning October 14. Other scheduled plays are *Blood, Sweat and Stanley Poole*, a comedy; *Ah, Wilderness*, also a comedy; and *Liliom*, the classic from which *Carousel* was adapted.

Free tickets for each play are available to students at the Erdahl-Cloyd Union.

## Two Million Dollars Given In Amount Of AG Grant

By Ernie McCrary

Twelve State scientists have received the largest grant ever made to the school, and possibly the largest ever made to any branch of the University.

The National Institutes of Health funds, which will be administered by the Institute of Biological Sciences, total almost \$2.2 million.

The scientists, who represent three schools (Agriculture, PSAM, and Forestry) and four departments, Genetics, Experimental Statistics, Animal Science, and Crop Science) are as follows:

Dr. Wilfred Schutz, research assistant professor of genetics and crop science; Dr. John Rawlings, associate professor of experimental statistics; Dr. O. W. Robison, assistant professor of animal science; Dr. J. E. Legates, William Neal Reynolds, professor of animal science; Dr. Bruce Zobel, Conger professor of forest genetics; Dr. W. D. Hanson, professor of genetics.

## Theater Group To Present Two Plays

The casts for two of ten one-act plays to be presented this year have just been announced by Ira Allen, director of the North Carolina State Theater.

Acting the lead roles in the first play, *The Boor*, will be Mrs. Maree Loftin as Mrs. Popov and Errol Cahoon as Smirnov. Jerry Pritchard plays the aging manservant Luka. Joe Montfort will be the stage manager and Mrs. Gurdine Bliss will be assistant director.

*The Boor* was written by the Russian author Anton Chekov. The play is a farce which centers about the mourning widow Mrs. Popov, who seven months earlier lost her husband. Smirnov, who comes to her trying to collect owed funds, soon sets the pace for the play, according to Allen.

Reuben Haase plays Chubukov, the father, in the second play of the season, *The Marriage Proposal*. Lomov, the suitor, is played by Jonathan Montague and Andrea Mewborn acts the role of Natalia, the young-old-maid. Both *The Boor* and *The Marriage Proposal* are by the Russian author Anton Chekov.

The Theater, under the direction of Rom Linney, held several drama workshops and presented two television plays during the past year.

In addition to the ten one-act plays, this year the Theater will present longer plays when the new Frank Thompson experimental theater is completed.

Dr. L. E. Mettler, associate professor of genetics; Dr. D. F. Matzinger, associate professor of genetics; Dr. Robert H. Moll, associate professor of genetics; and Dr. Ken-Ichi Kojima, associate professor of genetics.

Dr. C. Clark Cockerham, professor of genetics and experimental statistics, heads the program. Co-director of the program is Dr. H. F. Robison, professor of genetics and assistant director of the Agricultural Experimentation Station.

Dr. Robison explains that the grant is made by the NIH for the support of research in mathematical, population, and quantitative genetics. He said the results will be used to support theoretical work and experimental studies in a wide range of organisms. The materials used will range from fruit flies to pine trees and large animals.

Why use fruit flies? Dr. Robison says that nearly all laws of heredity were worked out by experimentation with these insects, so they are especially valuable in genetics research of this sort.

The renewable grant, which provides about \$300,000 a year for seven years, was not just dropped in the scientists' laps, Dr. Robison said. These men worked for a year preparing a 150-page proposal for the funds. Last July eleven men representing the NIH visited the campus and examined its qualifications.

Dr. Robinson concluded, "The grant recognizes the international prominence of these scientists at State, where the leading work in the world in this area of research is being conducted."

## Food Prof Writes Own Text Book

Dr. Leonard W. Aurand, professor of food chemistry, should be very familiar with the course's text book. He helped write it.

Dr. Aurand and Dr. Howard O. Triebold are co-authors of *Food Composition and Analysis*, hot off the presses of the Van Nostrand Publishing Company. According to Dr. Aurand, the books was released about the middle of last month. Dr. Triebold, Aurand said, started the book, "but nothing much ever came of it." Aurand then worked on the text off and on for about a year. Five months of intensive work finished it by last spring, he said.

Designed especially for use at State, the book is now being used as the text in food chemistry and food analysis. Aurand said the purpose of the book is to provide a text for teaching and reference in food work on the senior and graduate level.

Dr. Leonard W. Aurand

## Grant

The Danforth Foundation has announced a limited number of Graduate Fellowships to be available for male students entering Graduate school in the fall of 1964. Interested Seniors should contact Dr. Kingston Johns Jr. in 205 Peele Hall as soon as possible. Requirements include an interest in religion and the desire to teach.

Youthful success Van Cliburn who will appear Oct. 8 in William Neal Reynolds Coliseum, 8 p.m., to open the Fifth Anniversary Concert season for "The Friends of the College."

## Open Letter

Fellow students,

We are all very pleased with the performance of our football team this season and can be proud of our success on the road. As the Wolfpack meets Clemson this Saturday, we will probably be facing our toughest opponent of the year.

The team is filled with enthusiasm and will do their best for N. C. State. I urge every student who can possibly attend the game to plan to be in Clemson Saturday. Your support means a great deal to our fine team.

Sincerely,  
John Bynum  
Student Body President

## PP Has Trouble Stamping Out Dark

The PP is having trouble again.

The street lights on the northeast section of campus are not working. When asked about this malfunction, J. McCree Smith, head of the PP, said they are having trouble with the electrical system.

According to Smith, State has a very poor electrical distribution system which is in the process of being replaced.

The cause of the loss of light is a short circuit in the underground power line. Such a short circuit will cause a loss of power from that spot to the end of the line.

Dampness in the underground conduits is the major difficulty in the present electrical system. By using modern cable which is waterproof this problem will be rectified in the remodeling program, Smith said.

## -Campus Crier-

The Young Republican Club will meet at 7:30 p.m. this Wednesday in the north end of the SU Ballroom. The film "A Question of Law and Order" will be shown.

The Women's Association will hold its luncheon meeting every Wednesday from noon till 1 p.m. in the SU Ballroom. The luncheon is open to all coeds, including graduate women at 55 cents per luncheon. Semester dues are 50 cents.

The Christian Science Youth Group will meet semi-monthly for a testimonial gathering in the King Religious Center at 8:30 p.m. on Thursday. All interested may attend.

Students who wish to be wait-

ers at St. Mary's from noon until 2 p.m. or 5 until 7 p.m., five days a week or any day might contact Mr. Rowe at VA 82521 from 3 until 5 p.m.

The Saddle Club meeting Tuesday, October 8 will be at 6:30 rather than 7:30.

Professor John Farrell will explore the degree to which the founding fathers were Christian after supper this Friday night. This is a Supper Forum of the Baptist Student Union. Supper starts at 5:45 in the King Religious Center.

The Student Government Legislature will meet Thursday night October 3 at 7 p.m. in the Erdahl-Cloyd Union.

# A Resolution

We are now a university.

In truth, we're not coming near being a real university yet. We may have the staff and the courses to offer Arts and Science degrees, but the student body is still a few years away from acting like members of a liberal arts school.

We probably have one of the largest programs of cultural activity in the State. The "town and gown" cooperation with citizens of Raleigh has produced Friends of the College, Friends of the Library, and Triad. Campus organizations have produced the New Arts series, the IDC-CU combo parties, and the Ag School combo parties, to name a few. Lecturers come to campus constantly to expound on the technical aspects of an education, and an increasing number of lecturers are being invited by the schools to talk about non-technical subjects.

We are about to become a university. This implies a greater attendance for programs that interested persons have worked and begged for for years.

We now have on campus, in other words, a cultural program tailored for liberal arts students, with enough scope and variety to interest the technically minded student.

This is a concept that we feel should be applied to other aspects of campus life.

We foresee, in future years, Student Government, IFC, and IDC coming under control of Liberal Arts students. We foresee Publications and the College Union feeling their influx more and more. This is not a good thing, nor a bad thing, but an inevitable thing.

But it would provide a wonderful way to apply the principles that are embodied in our cultural programs to other campus activities.

This should be the year in which every organization on campus would sit back and look at itself; not as it is, but as it will become. This should be the time when plans would be made to organize all student activities in such a way that both liberal arts and technical students can participate in a common effort. By the same token, our technical programs should be examined with the same outlook in mind.

How can this be done? No one knows, and this is the real challenge. If we could find a way for students of these two aspects of education to work together, then we would be, in effect, solving the age-old problem of fitting liberal arts and technical education together. This has never successfully been done.

Should we try it? Yes.

It is too great a challenge to ignore.

GB

They Say They Like It Here

# Rex Nurses Are Coeds

By Cora Kemp

When State opened its doors to liberal arts students this fall, it came 35 nurses.

Betsy O'Neal and Jean Talton are two of the Rex Hospital student nurses participating in a new program at Rex that requires freshman nurses to take all but one of their courses here for a year.

"We like it," both nurses admitted, referring to the University, but lamented "We wish we could live on campus."

All nurses live at the nursing home, although they are officially classified as coeds here.

"Everybody has eight o'clock classes," Betsy said, "so we have to get up bright and early to catch the city bus."

BETSY O'NEAL

"One morning I overslept," she added. "I went to the bus stop anyway. A special bus filled with city school students stopped. I told the driver I couldn't possibly get to the campus on time if I walked. He brought me as far as Hillsboro Street where I caught a regular bus and barely made it on time."

Betsy and Jean, bedecked with slide rules and heavy books, said they had little time to spend on campus outside classes. They are here for classes every morning and Monday and Wednesday afternoons. They must return to Rex every Tuesday, Thursday, and Friday afternoons in time for a fundamental nursing course.

The Union is a popular place for the nurses to unload their burdens. With little time to spend on campus, Betsy and Jean find the snack bar a convenient place to meet and eat with their fellow students.

(Photo by Cashion)

Anatomy and biology are their favorite courses. "So far, so good," Jean commented. "We haven't been burdened with too much homework yet."

The two nurses have an anatomy lab with a number of football players. "At first I never knew who I'd meet from one day to the next," Jean remarked. "Every day has been a new experience."

At the nursing school, both Betsy and Jean pointed out, the rules are lenient.

They have closed study from 7:30 until 9:30 p.m. Monday through Thursday. They are allowed to stay out until 11 p.m. or midnight on either Friday or Saturday nights and until 10 p.m. Sunday.

They are allowed to attend all State functions such as New Arts and Friends of the College concerts during the week provided they notify the school 48

Betsy and Jean pause on the steps of the Student Union before making a mad dash to Harrelson Hall. They are taking anatomy, biology, math and physical education at State and an introductory course in nursing at Rex. (Photo by Cashion)

# See No Evil

An out-of-state visitor to the State campus, the student representative of a large corporation, relates the following incident.

He wanted to buy some of North Carolina's lower-priced liquor before he left, so he asked the first young fellow he met the location of the ABC store. The answer: "Goah, I don't know. I'm a student at State."

# Five Teams Remain Undefeated In Fraternity Football

## Soccer Team Victorious Over Appalachian, 6-0

By Ismail Misirli  
State's soccer team won their third straight game Monday afternoon by defeating Appalachian 6-0. The contest was the first of three home games this week before the Wolfpack meets Maryland, the ACC champions for the past ten years, at College Park on October 7.  
The Pack's first goal came during the opening minutes of the first period by Bob Miller. In the second quarter, State jumped to a 3-0 lead as Benito Artinano converted two penalties called against Appalachian. Jaime Ferrand increased the lead to four goals during the final minutes of the first half.  
The final two periods of action were full of incomplete plays by State and personal faults by Appalachian. These faults resulted with two State players, Jaime Ferrand and Mete Kantar, being sidelined due to injuries.

The referee called three more penalties against the visitors; Miller and Ferrand were unable to convert the first two, but Benito Artinano converted the third for a 5-0 Wolfpack lead.  
During the third quarter, goalie Halis Alkis was moved to the offense as Harry Maharis replaced him. Maharis saved two goals by jumping to the feet of the Appalachian center forward

to prevent the score.  
The State offensive combination of Kantar, Ferrand, Artinano, Alkis, and Miller played an impressive game. Defensive standouts were the two full-backs Pablo Schick and Dave Spiegle.  
State plays Guilford this afternoon with Henry Mas, Mete Kantar and Jaime Ferrand sidelined due to injuries.

Last season's first and second place teams, Pi Kappa Alpha and Sigma Phi Epsilon, along with Kappa Alpha, Sigma Alpha Mu, and Phi Kappa Tau are undefeated after two weeks of football in the fraternity intramural league.

Pi Kappa Alpha won a close one over Pi Kappa Phi Monday afternoon, 7-6, to keep their first position in Section #1. Both teams scored in the last quarter of the contest. Delta Sigma Phi downed Sigma Pi 12-0 to take second spot in the section.

In Section #2, Sigma Phi Epsilon tallied late in the final (See GREEK, page 4)

### WORDS: THEIR CAUSE AND CURE

Today let us take up the subject of etymology (or entomology, as it is sometimes called) which is the study of word origins (or insects, as they are sometimes called).  
Where are word origins (insects) to be found? Well sir, sometimes words are proper names which have passed into the language. Take, for instance, the words used in electricity: *ampere* was named after its discoverer, the Frenchman Andre Marie Ampere (1775-1836); similarly, *ohm* was named after the German G.S. Ohm (1781-1854), *watt* after the Scot James Watt (1736-1819), and *bulb* after the American Fred C. Bulb (18'3-1912).  
There is, incidentally, quite a poignant little story about Mr. Bulb. Until Bulb's invention, all illumination was provided by gas, which was named after its inventor Milton T. Gas

*many fine citizens were severely injured*

who, strange to tell, had been Bulb's roommate at Cal Tech! In fact, strange to tell, the third man sharing the room with Bulb and Gas was also one whose name burns bright in the annals of illumination—Walter Candle!  
The three roommates were inseparable companions in college. After graduation all three did research in the problems of artificial light, which at this time did not exist: All America used to go to bed with the chickens, and many fine citizens were, alas, severely injured falling off the roost.  
Well sir, the three comrades—Bulb, Gas, and Candle—promised to be friends forever when they left school, but success, alas, spoiled all that. First Candle invented the candle, got rich, and forgot his old friends. Then Gas invented gas, got rich, bankrupted Candle, and forgot his old friends. Then Bulb invented the bulb, got rich, bankrupted Gas, and forgot his old friends.  
Candle and Gas, bitter and impoverished at the ages respectively of 75 and 71, went to sea as respectively the world's oldest and second oldest cabin boy. Bulb, rich and grand, also went to sea, but he went in style—as a first-class passenger on luxury liners.  
Well sir, strange to tell, all three were aboard the ill-fated Lusitania when she was sunk in the North Atlantic. And strange to tell, when they were swimming for their lives after the shipwreck, all three clambered aboard the same dinghy!  
Well sir, chastened and made wiser by their brush with peril, they fell into each other's arms and wept and exchanged forgiveness and became fast friends all over again.  
For three years they drifted in the dinghy, shaking hands and singing the Cal Tech rouser all the while. Then, at long last, they spied a passing liner and were taken aboard.  
They remained fast friends for the rest of their days, which, I regret to report, were not many, because the liner which picked them up was the Titanic.  
What a pity that Marlboros were not invented during the lifetimes of Bulb, Gas, and Candle. Had there been Marlboros, these three friends never would have grown apart because they would have realized how much, despite their differences, they still had in common. I mean to say that Marlboros can be lit by candle, by gas, and by electricity, and, no matter how you light them, you always get a lot to like—a filter, a flavor, a pack or box that makes anyone—including Bulb, Gas, and Candle—settle back and forswear pettiness and smile the sweet smile of friendship on all who pass!

period to edge Theta Chi 6-0. Quarterback Doug Monday tossed to Mike Wagoner for the lonely score. The Sig Eps hold first position in this section. The loss dropped Theta Chi into a tie for the number two spot with Kappa Sigma, who defeated Alpha Gamma Rho 18-0.

Kappa Alpha and Sigma Alpha Epsilon are tied for first place in Section #3 with 2-0 records. These two teams will meet Monday to decide the section leader. In this week's games, Kappa Alpha defeated Tau Kappa Epsilon 34-0. Wrenn was the offensive leader with three touchdowns.

In the other Section #3 contest, Sigma Alpha Epsilon edged Lambda Chi Alpha 12-6, the winning touchdown coming with less than a minute to be played in the game. LCA's only score was a pass from Bob Stamply to Neil Styers. Both of the victor's passes were from Chet Penninger, one to Ralph Bowman and

the other to Oscar Everett.

Phi Kappa Tau holds first position in Section #4 by downing Sigma Nu 12-7. Emmors threw to Thorn for one PKT score and Harrison ran 40 yards with an intercepted pass for the other score. Brock threw to Henderson twice for Sigma Nu's seven points. Sigma Chi defeated FarmHouse 21-0 in the other Section #4 game. Wheelless hit Millsaps for two Sigma Chi scores while Cook scored on an interception for the third tally.

## No Judges Needed

Contestants in the Miss Consolidated University contest will have two preliminary judgings to go through.

The first judging will be held on October 9 at an informal coffee hour in the Reception Room of the Erdahl-Cloyd Union at 8 p.m. Judging will be based on personality and poise. Suit and heels should be worn.

There will be a panel of three judges: Jimmy Capps of WKIX, John Maddox of State's Visual Aids, and Mrs. Bill Cook of Hardbargers Business College.

The beauty judging will take

place in the Union theater at 8 p.m. on October 13. For this event, contestants must wear a party dress and heels.

- \* Receive and store 3,000 words from Paris

### MAKING ALUMINUM SLIPPERY-ER

Industrial designers are excited about a great advance in lubricants from G-E research. Aluminum, though popular with metal fabricators, has always been tough to lubricate. A new family of lubricants now developed has friction coefficients about 1/5 those of conventional lubricants. This produces an affinity for aluminum which assures a wear-resistant film that adheres to the surface.

P.S. During 1962, 6,871 G-E employees gave \$330,544 to the colleges they had attended in appreciation for what their education had done for them. This was matched dollar for dollar by the General Electric Foundation.

Progress Is Our Most Important Product

GENERAL ELECTRIC
