## State Captures ACC Championship After Tar Heels Defeat Blue Devils

By MARTIN WHITE

The Consolidated University of North Carolina football teams combined this weekend to bring the 1964 Atlantic Coast Conference football title to the West Raleigh branch of the institution. The Wolfpack won more conference games than any other ACC team but needed help from the other half of the 1963 football co-champions to take the title.

Carolina's 21-15 victory over the Duke Blue Devils Saturday afternoon turned the trick for State, who could have taken the crown outright by defeating Wake Forest Friday night.

The fired up Deacons, who earlier defeated Duke to put State into first place, left the championship open to the Devils by defeating State 27-13.

Wake Forest established its domination of the game in the early minutes of play by stopping the Pack in four downs after the kickoff and taking possession for a 64-yard touchdown drive and a 7-0 lead.

### ACC STANDINGS

	ACC	ALL
State	5-2-0	5-5-0
Duke	3-2-1	4-4-1
Carolina	4-3-0	5-5-0
Wake Forest	4-3-0	5-5-0
Maryland	4-3-0	5-5-0
South Carolina	2-3-1	3-5-2
Clemson	2-4-0	3-7-0
Virginia	1-5-0	5-5-0

State had a tying opportunity in the first period when it marched 64 yards to the Wake 11 where on third down with six to go, Skosnik went back to pass and was dropped for a 21-yard loss to end the threat.

The Deacons then took over and promptly marched 68 yards for their second score of the game and a 14-0 lead.

The Pack got back into the game following the kickoff by going 61 yards for its first score. Charlie Noggle reached pay dirt on the eleventh play of the drive on a keeper play from the three-yard line. Gus Andrews converted for a 14-7 score.

With 24 seconds remaining to be played in the first half, Wake fumbled on its 27-yard line to provide the Pack with its second scoring opportunity. Two plays later, Skosnik connected on a 27-yard pass play to Wendell Coleman for the touchdown. The placement by Andrews was wide as the half ended with the Deacons holding a 14-13 advantage.

State's comeback hopes in the second half were running strong until the Pack elected to punt on third down from its 13-yard line. The strategy failed, however, as Wake Forest took over and marched 48 yards for its third score and a 20-13 lead.

For the remainder of the game State's offensive attack could penetrate no farther than the Wake 44-yard line and had to hold the Deacons on four downs within 15 yards of their fourth touchdown.

The score came, however, in the final 40 seconds of the game when the Pack elected to go for a first down on the 23-yard line and failed. An unsportsmanlike conduct penalty gave the Deacons possession on the State eight yard line. Four plays later Wake held a 27-13 advantage.

### STATISTICS

	NCS	WF
First Downs	11	18
Rushing	138	160
Passing	75	128

## Twins Will Be Studied

The University of Maryland is looking for identical twins to participate in its study of heredity.

The University is studying heredity and environmental factors which promote emotional health through the study of twins.

As participants in the study, the University is looking for identical twin pairs, of either sex, over the age of 15, who have been reared by both natural parents.

Twins who are eligible for the study will be given round trip transportation provided by the National Institutes of Health, which is located on the outskirts of Washington, D. C.

Any twins who might be interested, or anyone knowing of twins, may write to Miss Barbara J. Spillman, Clinical Social Worker, National Institutes of Health, Room 3N-202, Building 10, Bethesda 14, Maryland.

## LAST ISSUE

Thanksgiving holidays will begin at 6 p.m. tomorrow. Classes will resume November 30 at 8 a.m. This is the last edition of *The Technician* prior to the holidays. The next publication will be on December 2.

Wake Forest's top ground gainer, fullback Brian Picolo, scores the third touchdown of the night for the Deacons. NCS fullback and defensive stalwart Pete Falzarano moves in on the Demon Deacon. (Photo by Wooden)

## Engineers Will Take Training Exam Again

The Engineer in Training Examination (EIT) is scheduled to be held again next semester for seniors in engineering.

This exam is the first step toward engineering registration, followed by four or more years of work experience, then another exam in the particular field of interest of the individual. According to Dick Summers, senior in nuclear engineering, North Carolina law requires that anyone practicing or offering to practice engineering where life, health, or property are involved must be registered. The individual must submit evidence to an examining board of engineers of his qualification to practice engineering.

Summers further stated that State's past record shows a high percentage of failures among seniors taking the EIT exam. He also pointed out that only about one-third of the graduating seniors take the exam. Stressing the importance of taking the exam in their senior year, Summers stated that the exam may be taken any time after graduation, but the chances of passing decrease with time due to "forgetting" much information.

As a means of correcting the high failure rate, the Engineers' Council has started a series of review sessions for those students desiring to take the exam. This year the sessions

will start in February and continue until all sections of the exam have been covered. The EIT exam includes questions on physics, chemistry, statics, electricity, mathematics, thermodynamics, engineering economics, kinematics, kinetics, strength of materials, and hydraulics and fluid mechanics. Summers commented that professors will conduct two night review sessions each week on each area.

The review sessions started by the Engineers' Council last year were open only to students at that time, but this year will be open to post-graduates in the state who wish to attend. According to information received from a similar review conducted at Duke University, about 20 persons have indicated interest in attending sessions at State because of shorter travel distances, Summers stated.

## Pre-registration Will Be Held Nov. 30-Dec. 11

Plans are underway once again for preregistration.

All students, both graduate and undergraduate, returning for the spring semester, may preregister between November 30 and December 11. Students may obtain registration course schedule cards from their advisors.

In lieu of the confusion created in preregistration for the fall semester, the administration will supplement computer registration with manual registration. Manual operations will be used for roster changes and for all students who do not preregister.

Students taking only evening classes should not preregister, but should report to Room 12,

Peele Hall.

All enrolled undergraduate students will be billed by mail during the Christmas holidays. Students not planning to return in the spring and students using scholarships and loans may notify the Office of Business Affairs on cards that will be enclosed with the bill.

The deadline for payment of tuition and fees for all students is January 18.

Students may complete pickup of their rosters January 19-21 in the Coliseum. Students who complete registration and do not need to change their rosters need not return after exams until their first scheduled class for the spring semester.

## Campus Chest Drive Slated

By THOM FRASER

The Campus Chest Drive will be held during the week of December 6 through 12.

The Board of Directors, composed of representatives from selected campus organizations, is headed by Harvey George of the Alpha Phi Omega service fraternity.

This year's members include John Handal, Student Government; Fred Willis, Interfraternity Council; Herb Sanborn, Er-dahl-Cloyd Union; Robert Boisky, Interdormitory Council; and Ronald Pearson, Board of Publications. The McKimmon Village Council failed to send a representative. Two non-voting members are the secretary, Merrit Wayt and the Rev. O. B. Woolridge, advisor.

The Board has decided to retain four of last year's five Campus Chest Drive recipients and their percentages of receipts. But on the motion of John Handal, the Board voted to drop Radio Free Europe and add the American Friends Service Committee in its place.

The Board further voted to direct the Solicitation Committee to conduct the campaign as in the past with individual canvassing in the dorms, but it also commended the use of collection booths placed in strategic points in order to reach off-campus students.

The final list of recipients of this year's collections are World University Service, 40 per cent; the American Friends Service Committee, 10 per cent; the Student Emergency Fund, 20 per cent; the Catherine Zeke Caldwell Memorial Fund, 20 per cent; and the Raleigh United Fund, 10 per cent.

## Old Stickers To Be Zilched

Old parking decals must be removed from automobile windshields, according to the Traffic Committee.

The traffic rules and regulations require that only the current parking sticker should be displayed on the vehicle. The campus police reported that many automobiles have out-of-date decals behind the current parking decal. The difficulty in determining the proper display of stickers has resulted in an increase in the time required for routine inspection of parking areas.

The Traffic Committee indicated that tickets may be given for the display of more than the current parking decal.

# HE WAS ONE OF US

The death of President Kennedy on November 22, 1963, was a shattering impact to the American people. But the youth of America suffered perhaps the greatest loss, for the President's interest in the young people was a primary concern.

The Kennedy image was profound. His youthfulness and maturity took hold the American people and the image lives on despite his death.

The assassination will indeed be remembered, but it is John Fitzgerald Kennedy, a great American man, whom we wish to remember today.

The following editorial is reprinted from the November 25, 1963, edition of "The Technician." It was written by Dick Paschall, a "Technician" staff writer at the time.

America's youth has been cheated.

The assassin's bullet from a \$12.78 rifle left the nation's youth totally cheated, void of the leadership and influence of John Fitzgerald Kennedy.

For a president, he was youthful; but youth never belied his maturity, a maturity which elevated him to statesman of the world.

Yet in his maturity, he was never too old for youth, for vigor, for ideals and the idealistic, for laughter and those who liked to laugh.

He was one of us.

The popularity of this great man was apparent among the youth of the nation and the world. And in youthful hearts the memory of this man will live on.

Those who might have at times disagreed with his policies, or held different opinions, or possessed other faiths, now join together in recognizing the importance and immense popularity of this great compatriot of youth.

Youth soon realized that President Kennedy pointed his administration in the direction of the young people of America, whom he frequently called "tomorrow's leaders."

He wanted his leaders to be strong. His own youthfulness inaugurated a program of increased physical fitness for all the American people, but especially, the young people.

He wanted to aid humanity. And in this he enlisted the aid of youth. Though the nation's Peace Corps is composed of people of all ages, by far the majority in the service are under thirty.

John F. Kennedy has left his legacy—a belief in youth and youth's potential. Though youth has been cheated by the assassin, youth must not cheat him nor his memory.

### CONVICTION

To the Editor:

Have you (the students) ever heard of conviction without trial? This is a process used in "Kangaroo Courts." Did you know that there was a "kangaroo court" on the campus of North Carolina State? Well, there is. It is being run by the administration of WKNC.

At the present time, George Stockton, personnel director of WKNC, is holding training sessions for those people who signed up to join the staff at the meeting held two weeks ago last Sunday night. In comparison to a court of law, this training program is to be the trial. This trial was enacted to determine which of those apprentices are capable of working as announcers at WKNC. We, as former staff members, co-operated with Mr. Stockton, Ronald Pearson, and William Powell in an effort to improve ourselves as announcers. However, before our trials, "Judge" Stockton handed down a verdict of "elimination from the station" on ourselves and Michael Edens.

Are we to assume that Mr. Stockton has the superhuman ability to predict the outcome of our trials or did Mr. Stockton rub his Magic Ampex, which determined for him the outcome of the trial before it was held? At the meeting held one week ago last Sunday, it was stated that there would be no prejudicial views held against anyone before his trial. This past Sunday night, prior to the publication of a letter in *The Technician* informing the student body of certain fallacies pertaining to the new policies of

the administration of WKNC, Mr. Stockton learned of this letter. However, also on said Sunday night, the administration of WKNC decided that three of us were not qualified for work at WKNC without holding our trials.

Messrs. Powell, Pearson, and Stockton, are we to assume that the latter is a conclusion from the former? Are you denying us of our Constitutional right of free speech without fear of reprisals by our dismissals? Or, have you ignored the Constitution of the United States also?

James L. Marsh  
David T. McCutcheon

### WAKE UP!

To the Editor:

I would like to make a few comments concerning the recent letters in *The Technician* about the Physics Department. The Physics Department is being seen by a great many students as the great ogre devised to prey on the poor helpless student. Now, while many of the comments made about it have some basis of truth, I would like to tell some of these poor preyed-upon students what the world is really like.

Any organization as large as the Physics Department is bound to have some faults, and perhaps a few people who shouldn't be there. These people, good or poor as they may be, are, however, trying to teach the student to reason and think for himself. In my physics class, over half of the students don't even try to do this, as evidenced by their failure to do even the simplest problems assigned. Things on the "outside"

are not handed out on a silver platter, and the effort required by the student here will serve him in good stead there.

Some students may think that the problem of conflicting problem solving methods, and different ways of expression among instructors is a local problem. This, however, is not so. I have had physics in two other schools, and the problem is universal. The answer may lie with the student and in human behavior. First, anyone knows that when a problem comes up, one usually finds a method of solution by the easiest method possible. The same applies to the instructors teaching physics. It is up to the student to put enough effort into his solution to see that it matches the book's method. Add to these problems of comprehension the fact that this year's physics classes are larger, and the number of instructors insufficient, one can see that maybe the Physics Department is doing their share after all, and that the students are not.

It is up to the student to work to get the material. The instructors can't pour the study and reasoning habits in, and even if they could, they wouldn't have that much time for each individual. WAKE UP! Life after college is a lot tougher than you have it here. No one will hold your hand and point the way then. You will be on your own, and now is the time to start preparing for it. By the way, I am passing the course.

Jim Jacques

ETR-2 (SS) USN

As has been pointed out by Jim Marchman of the Baptist Student Union, current chairman of the project, the programs can provide a valuable link between the State campus and the City of Raleigh.

The site of the project, as explained to Student Government leaders last week, is the overall improvement of the educational and social atmosphere of the city. Included in their goals is the benefit to the State students who will be working in the tutorial project in gaining an insight into the problems of community development, as well as the benefit to the high school students to be tutored.

The tutorial project is already an effective program, and promises to become even more effective after its reorganization. Student Government has been offered a program that can do nothing but contribute to its stature both in the City of Raleigh and on the State campus. If it adopts the program as a president's commission or a sub-committee, Student Government can make a concrete contribution toward bettering society. The degree to which the world is bettered will depend largely on such groups as the Student Government taking positive action. Its decision to consider this project for its own may be a turning point between a fruitful or an unfruitful year for the student legislature.

## Fraternity Bowlers Begin Third Round

Action in the fraternity intramural bowling league continued last week, leaving only two teams with unblemished records. The two squads, Pi Kappa Phi and Sigma Nu, are both from Section #1 and have 8-0 records. Sigma Phi Epsilon and Delta Sigma Phi are tied for third place with 7-1 marks. In Section #1 action, Pi Kappa Phi won 4-0 over Sigma Alpha Mu, Sigma Nu took four from Sigma Chi, Sigma Phi Epsilon and Delta Sig won 3-1 matches over FarmHouse and Alpha Gamma Rho. Thomas and Jones sparked the PKP win with series of 526 and 508. Thomas' 526 was high

for the section, and included the matches' high game of 196. The PKP's won 2391-2200 in total pins, the high team series of the night. The Sigma Nu team was led by Rogers with a high series of 470. The final pin count was 2056 to 1931. Parish and Grant with series of 513 and 521 led in the 3-1 Sig Ep victory over FarmHouse. SPE won the first two games but fell in the third game to a 831 score by FarmHouse. This was the high game in Section #1. Delta Sigma Phi lost its first point of the season by six pins in the third game of their match with Alpha Gamma Rho. Delta Sig won in total pins, 2259 to 2062. Pritchett rolled a 214 game for AGR. Phi Kappa Tau took over first place in Section #2 with a 4-0 win over Sigma Pi. Harrison of PKT was the leader in the victory with a 504 series. PKT now has a 7-1 record. Pi Kappa Alpha went into third place in the section with a 4-0 win over Sigma Alpha Epsilon for a 5-3 record. The Pikas won in total pins, 2335 to 2116, with Warren having the best series at 525. Kappa Sigma played its first match of the season last week and won 3-1 over Lambda Chi Alpha to take over second place in Section #2. Lee of Kappa Sigma had the high game and high series of the match with a 223-539.

## Goalie Halis Alkis Important To Success Of NCS's Soccer Team

By WALTER LAMMI  
Soccer goalie Halis Alkis, mentioned as a possible All-Southern candidate, has been essential to the success of State's soccer team this season, according to coach Max Rhodes. At 6'3" the tallest man on the team, Alkis has been playing soccer for 16 years and goalie for 11 of his twenty years. In high school he participated in volleyball, basketball, 440-yd. dash, high jump, and soccer, in addition to playing in one of Turkey's amateur soccer clubs. At State he is co-captain of the Wolfpack Big Four Champion volleyball team and plans to go out for the high jump in track next spring. However, Alkis lists soccer as his favorite sport.

Alkis, at State on a scholarship from a government-controlled textile company in Turkey, is a junior majoring in Textile Chemistry. He has a 3.45 average, and plans to go on to graduate school following his graduation next year.

# ROTC Counterguerrilla Unit Practices Field Maneuvers

By DOUG LIENTZ  
1st Battalion PIO, Army ROTC  
"Those trees are only eight to twelve inches apart," complained members of the Army ROTC Counterguerrilla unit when their section returned from a night search march on which they walked ten miles.

Area searches like this were the biggest part of the field exercises held by the unit over the weekend. The training also included daylight training in crawling, rushing, and so forth, sliding across obstacles on a rope, and a practice raid.

The unit was formed two years ago to give interested students taking Army ROTC a chance to obtain some field

training in tactics on this campus, and to promote interest in the ROTC program. At the present time it consists of two sections under the command of Cadet Captain Don Macland.

The unit left the campus at 5 p.m. Friday and returned at noon Sunday. Each section ran an area search for the other during the nights, and the other training was done during the day Saturday.

Typical of the problems encountered during the exercises were those that came up during the search operations conducted Saturday night and Sunday morning. The section that had done the hunting Friday night moved out to the closest point to the headquarters its leader felt he could get away with. The search section started its long march to the point where it would begin systematically covering the area.

Three hours later the search section, after escaping one herd of cows it encountered, arrived at the point where it was to start crisscrossing the area, and moved into a section of woods where thick pine growth made progress slow.

On the third trip across the area, two members of the search section were unable to continue; one had passed out from fatigue, and the other was sick from drinking bad water. After these casualties were sent back to the headquarters, the section moved through the rest of the area, and was moving toward the unit

command post with every intention of attacking, when a cold member of the hidden section a few hundred yards away accidentally fired a shot and distracted the unit. The search section moved on, rather than return to the point where the shot was fired, rested for three hours to give the hidden unit time to go back to sleep, then moved out again and hit the hidden unit by surprise within ten minutes. The feelings of the hidden section at this point were best expressed by the cadet who commented, "We thought you had given up and gone to bed."

The night work was done during twenty degree weather, lasted until around four in the morning both times, and brought most of the cadets to the point of exhaustion. The cadets in the search section complained that they had to walk too far, and the ones in the hidden section complained that it was too cold to stay in one place as long as they had to. But both groups, when hiding, picked places that would make the search group walk the longest possible distance.

The exercises were the longest of three which have been held this year by the unit.

ROTC Counterguerrilla unit on maneuvers.

## Campus Crier

Anyone interested in learning Sky Diving call Dennis Quinn at 467-1696.

Found: Ladies' wrist watch behind Winston Hall. Owner please contact 118 Winston.

Blue Key will meet tonight at 10:30 p.m. in the King Religious Center. Selection of new members will be discussed.

Guitar lessons on Tuesdays at 4 p.m. in the Erdahl-Cloyd Union will continue for the next three weeks.

Plans for a campus talent show are now being made. The show will take place December 10 in the Erdahl-Cloyd Union theater at 8 p.m. Anyone desiring to participate sign up at the Union information desk or contact George Barnett at TE 4-8304 after 5:30 p.m.

The Ag Council will hold its annual fall combo party December 4 for all ag students, graduate students, and faculty. Dress for the performance of the "Playboys" combo will be coat and tie. Admission will be by I.D. card.
