

A picture is worth a thousand words, or so they say. We believe it in this case, but we wrote a story anyhow. (Photo by Wooden)

Betty Marcum Named 'Mrs. N. C. State'

By THOM FRASER

"I'm thrilled to death; I never thought I would make it," was the first reaction of Mrs. Betty Marcum after being chosen Mrs. N. C. State Monday night at the Erdahl-Cloyd Union.

The attractive redhead was named from among 13 original contestants as the most beautiful and talented in Sunday dress, talent, and evening dress competition. In the talent division Mrs. Marcum sang "Moon River."

The Pinehurst native who is 5'4 1/2" tall and weighs 120 lbs., is married to a graduate student in math education. They have no children. She works as a secretary for the North Carolina Department of Agriculture.

Mrs. Marcum has studied voice for seven years and majored in music for a year at St. Andrew's College. Besides this talent, which did much to help her win in the competition, her interests include architectural drafting, arts and crafts, cooking, and horses.

Of the three finalists, Mrs. Patsy Averett was First Runner-up. Her act in the talent competition was a pantomime of Gypsy Rose Lee's strip scene from *Gypsy*. The wife of a junior in agricultural science and zoology, Mrs. Averett works at Ellisberg's and has one child. Among her hobbies are art, sewing, dancing, skiing, and "just being a good wife and mother."

The Second Runner-up was Mrs. Judy Smith, who works as a stenographer in the Poultry Science Department. She and

her husband live in McKimmon Village, and they have no children. In the talent competition Mrs. Smith sang two folk-songs and accompanied herself on the zither.

As the result of Sunday night's preliminary competition, six semi-finalists were named from which the finalists were subsequently chosen. The three non-finalist semi-finalists were Mrs. Elizabeth Alexander, the wife of a math education senior; Mrs. Lenna Edwards, the wife of a mechanical engineering junior; and Mrs. Paula Fahnstock, the wife of a sophomore in mechanical engineering.

'Agri-Life' To Be Out Monday

The *Agri-Life* will be out Monday.

"Students in the School of Agriculture and Life Sciences and the Department of Ag Education may pick up their copy of the Fall 1964 *Agri-Life*, published by the Ag Council, on Monday, Jan. 18, in their departmental offices," said John Arnold, Editor.

Those leaving school may pick up their copy beginning Friday evening at the Alpha Gamma Rho fraternity house at 2304 Hillsboro St. (across from Winston Hall).

Pub Board To Discuss New Budget For WKNC

By CORA KEMP

WKNC's budget will be up for consideration today at the Board of Student Publications meeting.

The meeting begins at 3:30 p.m. in the North Parlor of the YMCA and is open to all students.

Approval of the budget was withheld by the board in the fall pending the recent reorganization of the radio station staff. The budget for the 1964-65 academic year totals \$6,721.

The station closed down for two months this fall in order to rebuild equipment and reorganize the staff. It returned to the air December 7.

Coed Scholarships Now Being Offered

Coeds in the School of Engineering will have an opportunity next semester to receive scholarships from the Society of Women Engineers.

The Lillian Moller Gilbreth Engineering Scholarship of \$500 is annually awarded to a woman engineering student for use in her third, fourth, or fifth year of undergraduate study in an accredited engineering school. Applications are due by February 1, for use during the 1965-1966 academic year. The applications may be procured by writing the Society of Women Engineers, 345 E. 47th Street, New York 17, New York.

-Campus Crier-

The Student Women's Association will hold its weekly luncheon meeting today at noon in the Erdahl-Cloyd Union.

The Engineering Film Series will present "Steel Spans the Chesapeake" and "Challenge" today at 12:10 in Broughton 111.

There will be a very important organizational meeting of the Fellowship of Christian Athletes today at 6:30 p.m. in the north lounge of the YMCA. All athletes in all sports are invited to attend.

A reward is offered for the return of an Engineer's 1510 slide rule which was lost. The finder is asked to contact James Grubbs in 141 Tucker.

Found: Two house keys on the north side of Bragaw before the Christmas holidays. Owner may pick them up in room 112-C Bragaw.

Applications are now available for summer job assistance from the Student Government Summer Employment Commission at the Erdahl-Cloyd Union information desk.

The station is currently operating under a "block program" schedule. Each night a specific type of music is played from 8 to 9. Also included in the schedule are two 10-minute campus news programs at 6:30 and 7:30 p.m. and taped music from 1 a.m. to 3 a.m.

Station Manager Bill Powell has conducted two surveys on student reaction since the station returned to the air.

Two hundred questionnaires were mailed to dormitory students prior to the Christmas holidays. Only 66 were returned.

Comments from listeners ranged from "... you've done a remarkably good job of conjuring up a schedule that should capture everyone's interest" to "It could stand improvement. Announcers seem nervous and unassured."

One listener suggested the station "put an ad in *The Technician* saying you take requests and give the station number (600 kc)."

Of the 66 students, 48 indicated they listen to the station. They rated the station as follows: good 14; fair 21; poor 8; and undecided, 8.

Powell expressed disappointment in the lack of response to the questionnaires. He noted that only 40 of the 150 cards sent out the second time were returned. Seventeen people said they listened to the station.

Powell stated that no questionnaires were sent to Watauga Dormitory in the first survey because the transmitter there was not set up. However, 20 were mailed to Watauga residents the second time. One was returned.

A number of students indicated that they were receiving interference. Others recommended that "more light classical music" be played, while some suggested more folksongs.

One student in Owen had this to say: "Thanks for the post card. It's the first one I've had in a week."

GM Rep: 'We Hire All - Even Forestry Majors'

Opportunities for college graduates from almost all curricula may be found in the General Motors Corporation, according to P. B. Hutter of the GM personnel staff.

In a talk given at the Sigma Phi Epsilon fraternity this week, Hutter pointed out that positions with GM, one of the world's largest corporations, were "by no means restricted to engineering majors."

He added that GM "even hires some Forestry majors." Hutter emphasized the summer employment program for college students at GM annually employs approximately 1,500 students.

Army Rifle Team Has New Coach

A new coach is now heading the Army ROTC rifle team.

Sergeant Edward B. Hutchins, who started as the team's coach this September, was replaced by his assistant coach, Sergeant Edgar E. Vincell, when he retired from the Army, according to Cadet Captain Charles A. Coffey, III, team captain.

Advisor for the team is Captain Albert L. Norton. The members of the team are Cadets James E. Giles, 1st Sergeant; Michael D. Lanier, squad leader; Mickey A. Angell, Jonathan W. Bost, Timothy M. Cleary, James P. Cunningham, Charles A. Wolf, Joseph Elekes Jr., Richard S. Hosey, David A. Penning, and Thomas J. Taylor. Seven of the team members are MS I cadets.

Tutors Get Official OK

Superintendent of Raleigh City Schools Jesse Sanderson, meeting with Student Government President John Atkins and Tutorial Commission Chairman Jim Robinson, gave the go-ahead to the tutorial project sponsored by N. C. State.

Sanderson indicated that he had suspended the project due to a lack of information on the program and the individuals involved. During the hour and a half discussion Monday with Atkins and Robinson, Sanderson agreed to the majority of the proposed services of the project.

He further suggested that, instead of operating solely at Ligon and Broughton high schools, the project also include Enloe High School.

The tutorial project, now preparing orientation for the student volunteers to be recruited after semester break, primarily involves State students tutoring in basic math and English. An "enrichment" program, which offers extra material to challenge better students in high school will also be operated as a part of the project.

Chancellor John T. Caldwell, upon hearing that the project had been reinstated by Sanderson, stated, "The desire of our students to serve in the tutorial project is another clear piece of evidence that this generation of young people wants to be involved in building a better society. I hope that they will succeed in the objectives of the tutorial project."

Frosh Diners Club Slated To Host Caldwell, Others

Chancellor Caldwell will be one of the eight speakers at the 1965 Freshman Diners Club programs which begin February 9, at 6 p.m. in Harris Cafeteria.

Designed to help 60 freshmen meet with members of the faculty on issues concerning the entire campus, the Diners Club is in its fourth year of operation under the auspices of the campus YMCA.

Scheduled for four Tuesday evenings beginning on February 9, two speakers will be presented at each program followed by dialogue between the students and faculty.

"Campus Morals" is the topic to be discussed by Chancellor Caldwell at the fourth program on March 2. Appearing with the Chancellor will be Dr. Roger Crook of Meredith College. Prof. Harry Hargraves of the Department of English and

Prof. Howard Miller of the Department of Psychology will speak the preceding week on "Faculty Attitudes Toward Students."

"How Effective is Student Government?" will be discussed by a former president of the student body, Robert Cook, and Tom Covington of the Division of Student Affairs, on February 16. For the first program, Presbyterian Chaplain Don Shriver and the Rev. Phil Cato of the Episcopal Church will talk on "How Can a Student Discover Himself?"

Chairman of the Freshman Diners Club is Bill Iler and Co-Chairmen are Howard Slack and Dave Bissett. Tickets for the series of four dinner programs may be obtained for \$5 from any member of the Freshman Planning Committee or the YMCA office.

Tutorial Project Offers New Range Of Activities

It has been estimated that State students spend half of their time studying and one quarter of their time eating, sleeping, and drinking. The other one-fourth of their time just seems to slip away without any particular use.

A good way to employ part of this one-quarter of lost time would be working with the N. C. SG Tutorial Commission.

The aim of this new Student Government group is to keep high school students in school by showing them the value and necessity of furthering their education.

Next semester the commission will open projects in several Raleigh high schools. In order to provide tutorial services, the commission will need a large number of volunteers after semester break.

By helping a high school student learn basic math or English, or introducing him to a new area of learning, the volunteer will gain some appreciation of the social and educational problems of our society.

The anti-poverty war begun by President Johnson needs implementation on the local level. The causes of poverty can frequently be traced to the lack of even basic education on the part of the poor which prevents them from earning a living. The need for "anti-poverty" bills will continue, so long as the initiative is not taken and the development of ignorance is not prevented before it becomes a problem.

By working in this project, the college student with only a small amount of free time can make a concrete contribution to his society. Two hours a week, or every other week, can mean the difference between a high school student continuing his education or dropping out of school.

When someone cares enough to pay attention to what one is accomplishing, it is easier to work at an unpleasant task. For many high school students, school is an unpleasant task made more difficult by personal problems only an adult could help solve, and only a young adult could understand.

The effect on an underachieving student of having a friend who has the time, the patience, and the knowledge to help is unmeasurable. When a person one admires and trusts counts a goal as important, it becomes important to oneself also.

The administration has given support, the Student Government has given sponsorship and funds to back this program. The Superintendent of Raleigh city schools has given his sanction to the aims of the commission, and faculty members have volunteered to act as advisors for the group. But only the students of this campus who are concerned both for the future welfare of their community and for other individuals can make this project a success.

Tutorial Project: Help, Where It Helps.

ATHLETES VS. NON-ATHLETES

To the Editor:

In the aftermath of Coach Case's retirement, it was inevitable that from the ranks of the depraved a student would speak out against the tributes that have been laid at the feet of Coach Case.

Mr. Richard Phillips is so distinguished.

Coach Case did his job as he saw it and did it well. I am sure that Coach Case did not recruit members of his squads with the knowledge that they would become involved in a scandal. What coach can anticipate such an event? Certainly no coach, let alone Case, would recruit an undesirable individual, no matter how good the athlete.

If Case was wrong in the Moreland case, he was just as wrong as every coach in college is in wanting an outstanding player on his team.

As for nocturnal activities, athletes are no different from any number of non-athletes in wanting to enjoy themselves. If it is wrong for an athlete to drink, then it is just as wrong for a non-athlete. It is unfortunate that some people cannot "hold their liquor" as well as others. It is also unfortunate that individuals, athletes or non-athletes alike, can and do get in trouble while drinking too much.

The same applies with the grades of athletes. There are smart people and not-so-smart people, athletes and non-athletes. Anyone can get bad grades.

I am sure that other people, other than myself, do not appreciate the "cut" on out-of-state athletes. It is a credit to N. C. State that individuals, athletes or non-athletes, have chosen this school. It just might be that State is a fine school to learn at, as well as to play a sport at.

If using rough language was a fault of Coach Case, let it be his only one. Many people do use rough language, and I know quite a few that would like to use a few well-chosen words on Mr. Richard Phillips.

The tributes have been said,

great man in this school, scandal and Case is gone. Case was a dal or no. He was and is a credit to North Carolina State as unfortunately Mr. Richard Phillips cannot be.

Denis Duffy

REGRETS

To the Editor:

Perhaps, being neither an atheist nor an extremely emotional supporter of conventional religion, I am not enough of an extremist to make a pertinent reply to Mr. Barick's letter (*The Technician*, January 6) which supposedly dealt with "religion." However, after reading such choice lines as "if this be so" and "He is true. He is truth," my first reaction was to wonder if he were serious, but unfortunately I am forced to believe that he was. My main objection to this letter is that while Mr. Barick talks of the N. C. State delegation to the NSA being unable to "see straight," he seems to have missed the significance of the amendment which he was condemning. I feel certain that all our delegation was trying to do was to insure religious freedom, and the fact that Mr. Barick (and many of us at State) happen to agree, in a personal sense, with the statement which the amendment proposed to delete does not mean that it was a personal attack on his coveted opinions, and in fact has nothing whatsoever to do with the issue at hand.

Religion has always tended to be a personal matter and in our predominantly Protestant and secular society it has become even more so, and whether Mr. Barick is aware of it or not, our constitution and the American tradition in general have always taken a strong stand in that they demand that the individual should be entirely free to worship in nearly any way, shape, or form that he desires. Public meetings dealing with more or less random groups of people, unless specifically for that purpose, should steer clear of any type of religious observance.

The traditional - American Protestant concept of God may seem quite general and unspecified to many of us, but the best of our religious theologians

STEAMPIPES

By Bill Fishburne

OMEGA

There are two organizations on this campus that have received no notice in this column to date. Since this is the last column to be written under the head "Steampipes," I shall attempt to give them their due.

The Students Supply Store operates under the guiding philosophy that the students on this campus do not deserve to be subsidized. A very high figure in the Supply Store hierarchy once said, "I don't think the students should be subsidized, for when they graduate they will be used to this subsidization and will think that the world owes them a living." This person went on to say (while patting himself on the back), "State College is one of very few major colleges that has no outside competitors near the campus. This is because we have deliberately kept our prices so reasonable that it would be unprofitable for competition to come in."

The first of these statements is so fallacious that it merits no discussion. As for the second, Hillsboro Street has several shops that are in competition with the Students Supply Store, and until two years ago the zoning laws prevented the erection of others. Mobleys, Carolina Blueprinters, Case Blue Print and Supply Co., and Raleigh Blue Printers are all in direct competition with the Students Supply Stores.

Yes, it is true that there is no store directly across from the campus that sells everything the SSS does. However, it isn't often that a private merchant can afford to invest money in a seven-foot tall cotton-stuffed St. Bernard.

To continue, this high official told me that the Students Supply Store is, or was, the only bookstore in the U.S. that sells all the graph sheets made by K&E. "Most of these are never called for. We have a larger stock than the factory."

I learned many years ago in a basic business course that a merchant cannot meet the prices of the competition or conduct a realistic business if he ties up much of his money in useless inventory. This is what these K&E graph papers are: useless inventory.

Enough about them.

Next up is the N. C. State Print Shop.

This group has a habit of not quoting a price in writing, and always underestimating the price verbally. What this means is that the Print Shop will tell you one price and charge you another. Their second bad habit is in estimating time required for producing a piece of work. They always estimate low.

The last word, however, is spoken by the *Southern Engineer*, in the last issue. I quote: "Cover: A sketch of an offset printing press such as is found in the plant of the North Carolina State Print Shop serves to indicate the dependence of publications on high quality, versatile printing (*sic*)."

The italics are mine.

Obituary

Next semester Jim Robinson will fill this space on Wednesdays in place of this column. That is to say, "Steampipes" will be no more. The discontinuation of this column will hopefully allow me to devote more time to studying and to my other *Technician* duties. To those who have lent encouragement to me during the past seven months, I return a sincere thank you. To those who have not enjoyed this column, but read it for lack of something better to do, May All Your Headaches Be Curable.

Bill Sargent

(Editor's Note: According to Mr. Barick, the sentence which read "And observe what to His Messengers when they have done so" should have read "And observe what has happened to His...")

Subs Instrumental In Team's Success

One of the most difficult tasks in basketball is for a reserve to come off the bench cold and have to pick up the game tempo, but North Carolina State has gotten some hot performances from substitutes in compiling a surprising seven-game winning streak.

"A sub's value usually won't show up in the box score. But take the South Carolina and Virginia games," says Maravich. "Where would we have been without Sam Gealy and Ray Hodgdon?"

When South Carolina got close, it was Hodgdon's outside shooting which sparked a second-half rally as the Gamecocks had pulled back their defenses and left the outside shot.

"And talk about pressure, what about Sam Gealy's four-for-four from the free throw line at Virginia when we only had three and four point leads near the end. Virginia had picked him out to foul in an effort to get the ball if he should miss," noted Maravich.

Hodgdon, a regular last year as a sophomore, hit for three field goals in the first half and then added two more after intermission as the Wolfpack sought to protect its slim lead in the 73-67 victory over the Cavaliers.

Since State plays a full-court press defense, Maravich has to do more than the usual amount of substitution to get some fresh shock troops into the game.

"By playing a lot of boys, it would help us by tournament time. After all, that is the important season, even if it is only for three days, if you are lucky," states Maravich, whose team is 8-1 overall entering the North Carolina game January 13 at Chapel Hill.

NOTICE

All candidates for the varsity baseball team should come by Coach Vic Sorrell's office, Room 122 Reynolds Coliseum, to sign eligibility forms. This is very important and should be done before February 1.

State Fencers Split In Three Way Meet

The N. C. State fencing club entered its first competition over the weekend and came away with an even 1-1 record. The meet was held in Carmichael Gymnasium last Saturday with fencing clubs of State, Duke, and Wake Forest competing in the event.

The win for the State club came against the Wake Forest squad while the loss was to Duke. Five of the State fencers came out of the competition with respectable 4-2 records for the day's action.

Discover the difference in the '65 Chevrolets (As different from other cars as they are from each other)

CHEVROLET—As roomy a car as Chevrolet's ever built. Chevrolet Impala Sport Coupe

When you take in everything, there's more room inside this car than in any Chevrolet as far back as they go. It's wider this year and the attractively curved windows help to give you more shoulder room. The engine's been moved forward to give you more foot room. So, besides the way a '65 Chevrolet looks and rides, we now have one more reason to ask you: What do you get by paying more for a car—except bigger monthly payments?

CORVAIR—The only rear engine American car made. Corvair Corsa Sport Coupe

You should read what the automotive magazines say about the '65 Corvair. They're wild about its ride. They think there's nothing else this side of the Atlantic that can touch its styling. They say if you haven't driven a new Corvair Corsa with a 180-hp Six Turbo-Charged you just don't know what you're missing.

Drive something really new—discover the difference at your Chevrolet dealer's

Industrial Arts Club Puts Money In Kitty

Efforts to get the Industrial Arts Club "off the ground" have resulted in money-making projects for the club members.

The club, which has been "off and on" for a number of years, according to Publicity Director Sid Newman, recently completed its first project for the fall semester.

The club built a bicycle rack in their shop in the basement of Tompkins Hall. The rack was sold to the A. B. Combs Elementary School. The price included cost of materials and a small amount that will be put in the club treasury, Newman said.

Plans to get the club back into full-time operation this se-

mester have been successful, Newman said. The club has about 20 members and is open to any students in the Industrial Arts Department.

The club's next project will be building about 15 distribution boxes for *The Technician*.

John S. Hudgins (left), principal of the A. B. Combs Elementary School, thanks the members of the Industrial Arts Club for building the bicycle rack. Members include Sid Newman (from left), Dick Ferree, J. D. Hair, Tom Brady, and Eric Vann.

If your roommate
says the Bell System helped invent
hi-fi, stereo and talking movies,

don't bet. You'll lose.

In the course of their studies of the nature of sound, Bell System scientists have been able to make significant contributions to all three forms of entertainment.

You might say that it was because the discoveries were there to be discovered by the first explorers to come down the trail.

When the century was still young, we realized that if the telephone were to come up to its potential, the nature of sound had to be much better understood than it was then.

This led to the largest, most comprehensive

study of sound ever undertaken by anyone.

To capture sound for study, Bell Telephone Laboratories developed the first electronic recorder for phonograph discs. For the first time, performers recorded into microphones.

Then, in 1925, Bell Labs perfected an electronic system that synchronized sound and action on movie film. The talkies were born.

To get better sound reproduction, they started experimenting in 1933 with ways to separate high and low frequencies to prevent distortion. The result was a single-groove,

multi-channel disc—the basis of today's stereophonic industry.

Nevertheless, these contributions were by-products of the real effort, which was to make telephone service better. We are proud, of course, that they helped build and improve whole industries.

But we're prouder of the sound qualities in the telephone of today.

If you'd like to do business or engineering work you're really proud of, we'd like to talk to you.
