## Sky Diving Show Will Be On Drill Field

By WALTER LAMMI  
The Raleigh parachute club "Y-Divers" will present a sky-diving demonstration for the Army ROTC Brigade tomorrow at 12:10 p.m. on the ROTC drill field.  
Four men will jump from 13,000 feet with a free-fall to 2,500 feet.  
Master Sgt. Shafer, N. C. State Department of Military Science, Lt. Proctor, Company B, 13th Special Forces Group (Reserve), Sgt. Bown, 82nd Airborne Artillery, and Cpl. Openheimer, a State student, will carry out the demonstration. All have had from 75 to 400-plus jumps.

The men will leave the airplane, an L-20 "Beaver," almost simultaneously. They will drop in a diamond-shaped formation, trailing violet, red, yellow, and green smoke from canisters on their feet.

According to Master Sgt. Shafer, landing on the drill field will not be difficult. All drops are preplanned, the wind is taken into account, and the parachute can be steered to a certain extent. Shafer pointed out that in international competition one has to land on a six-centimeter disk.

Parachuting, Sgt. Shafer said, is not difficult to learn. There is no fear once the parachutist has acquired confidence in his equipment, but there is a keen sense of anticipation and much competitive spirit. It is a question, he emphasized, not of courage but of knowledge and ability.

Although parachutists carry an altimeter and/or a stopwatch so as to judge accurately when to open their chutes, most fatalities, according to the Parachute Club of America, occur from a failure to open the

chute, followed in frequency by drowning.

Both of these fatality causes arise through human error; mechanical malfunction, such as failure of the chute to open, is so rare as to be negligible. Sgt. Shafer commented on what he would do in such a freak accident. "First," he said, "I would look for a body of water. If there weren't any, I'd look for a tree. If neither was available, I'd either start doing back somersaults, or climb back to the airplane."

## Staggered Schedule PSAM Test Planned

A staggered schedule of all freshman and sophomore level Physical Sciences and Applied Math quizzes has been formulated.

In an effort to help the average student without degrading the quality of the course, the new schedule will coordinate quizzes so that there will never be two quizzes on one day or, if possible, never two in one week. The new quiz schedule is as follows:

PY205	Feb. 18 (Th)	CH103	Feb. 25 (Th)
Mar. 11 (Th)	Mar. 18 (Th)		
Apr. 1 (Th)	Apr. 8 (Th)		
Apr. 12 (Th)	Apr. 29 (Th)		
Apr. 23 (Th)	May 6 (Th)		
PY208		CH107	
Feb. 12 (F)	Feb. 19 (F)		
Mar. 26 (F)	Mar. 19 (F)		
Apr. 23 (F)	Apr. 9 (F)		
May 14 (F)	Apr. 30 (F)		
May 14 (F)	May 7 (F)		
MA102		MA201	
Feb. 12 (F)	Feb. 16 (Tu)		
Mar. 26 (F)	Mar. 9 (Tu)		
Apr. 12 (F)	Mar. 30 (Tu)		
Apr. 2 (F)	Apr. 13 (Tu)		
Apr. 23 (F)	May 11 (Tu)		
May 14 (F)			
MA202			
Feb. 11 (Th)			
Mar. 4 (Th)			
Apr. 8 (Th)			
Apr. 22 (Th)			
May 6 (Th)			
CH101			
Feb. 24, 25 (W, Th)			
Mar. 17, 18 (W, Th)			
Apr. 7, 8 (W, Th)			
Apr. 28, 29 (W, Th)			

The junior, senior, and graduate level courses will not be affected by this schedule.

## HCB Convicts Four Students

Four convictions were handed down by the Honor Code Board in its February 4 trial session.

A junior and senior in Ag Econ were found guilty of stealing flags from the Bell Telephone Company in downtown Raleigh. Both were placed on probation for two semesters beginning February 1965.

A sophomore Liberal Arts student was given one semester's suspension and one semester's probation for selling stolen textbooks to the Student Supply Stores.

A design student convicted of plagiarism was placed on two semesters' probation.

## Sen. Scott Says 'NCSU' Means Deconsolidation

By CORA KEMP

N. C. State alumni should look "a long way down the road and do some soul-searching before they do anything that might get them out of the Consolidated University," Sen. Ralph Scott remarked yesterday in view of the proposed name change for the University.

The name "North Carolina State University at Raleigh" was presented in the N. C. House of Representatives Friday.

"Regardless of what the alumni say, this name (NCSU) will not be recognized in the University setup as it is now constituted," Scott said.

The name change bill was introduced by Rep. George Wood of Camden, who is also president of the NCS Alumni Association. Senator Scott is a past president of the Alumni Association.

"They've had two years to think about the name," Scott continued, "and they're just as emotional as ever."

The senator from Haw River said if the name is changed, it should become the University of North Carolina at Raleigh, in accordance with the name given to the universities at Chapel Hill and Greensboro.

Scott believes the issue over the controversial name is primarily emotional. "Take Charlotte College, for instance. The State people fuss over such things as the name and the Dixie Classic, but the Charlotte people are interested in the academic end. I'd hate to see us (State) traded off for the Dixie Classic."

Scott pointed out that State alumni will never compose a majority of the legislature. "State people are not inclined to run for public office," he added.

"It's the faculty and research that makes a great university. It takes money and the only way they can get money is at the legislature regardless of what people think."

The name change bill, "HR 24," has been referred to the House Committee on Higher Education. The chairman has not been named yet.

Scott is chairman of the Senate Committee on Higher Education.

Peter, Paul, and Mary played to a packed house Saturday night in Reynolds Coliseum. A review of the performance may be found on Page 2. (Photo by Wooden)

## Permanent Director Sought

A permanent director is being sought for the water resources research institute to be established here.

Consolidated University President William Friday will make the appointment upon recommendation of the institute's board of directors. Dr. F. J. Hassler, head of the Department of Agricultural Engineering, is acting director of the institute.

Dr. Hassler said last week the institute may be located either

here or at Carolina. However, President Friday said he knew of "no reason why the research center wouldn't be at State."

The center is sponsored by the federal government and is for land-grant institutions only.

Hassler explained that there was some question concerning an interpretation of general statute 116-30. The 1963 legislature changed the words "such College," referring to N. C. State, to read "such University," in accordance with State's name change.

The statute gives the board of trustees the power to accept and receive on the part of the state any donations from the U. S. Congress for use by the institution.

Hassler said a broad interpretation of the statute could mean that the term "University" referred to the Consolidated University.

However, Friday said he knew of no intentions of anyone to interpret the Consolidated University as a land-grant institution.

## Diners Club Has Meeting

The Freshman Diners Club will convene for their first meeting tomorrow night in the basement dining room of the Harris Cafeteria.

The meeting will feature Rev. Phil Cato, the Episcopal chaplain, and Dr. Don Shriver, the Presbyterian chaplain.

The program is entitled "How Can a Student Discover Himself?" A question and answer period will follow the presentation of the speakers.

The freshmen will also meet on the next three Tuesday nights. On February 16, the program is entitled "How Effective is Student Government?" and features Tom Covington, assistant director of Student Activities, and Bob Cook, former President of the Student Body.

Closing out the 1965 series will be the program "Faculty Attitude Toward Students," presented by Dr. Howard Miller of the Department of Psychology and Dr. Harry Hargrave of the English Department.

## Campus Crier

Students wishing to sign a petition advocating "N. C. State University" will find such in the Erdahl-Cloyd basement.

There will be an open meeting of Alpha Chi Omega National Service Fraternity Tuesday night at 9. The meeting will be held in the basement of the King Religious Center.

The American Institute of Chemical Engineers will have a guest speaker for the Air Products and Chemical Company Tuesday at 9 p.m. in Riddick 242.

The Student NEA will meet tonight at 7:30 in the Erdahl-Cloyd Union Theater. Dr. A. C. Dawson, Jr., will speak on "Legislation Affecting Education to be Introduced to the N. C. General Assembly in 1965."

There will be a meeting of all persons interested in college radio broadcasting and interested in becoming members of the WKNC staff tonight at 7 in the WKNC studios in the basement of the E. S. King Religious

Center.

The Furniture Club will meet Wednesday night at 7:15 in the Erdahl-Cloyd Union. Guest speaker will be John Conway, a 1962 State graduate, now with Henderson Furniture Company, who will speak on quality control in furniture plants.

The Industrial Arts Club meets Wednesday at 7 p.m. in room 4, Tompkins. (See CAMPUS CRIER, Page 4)

## Tutorial Meeting

There will be an orientation meeting for new tutors for the N. C. State Student Government Tutorial Commission tonight at 7:30 in Room 230 of the Erdahl-Cloyd Union. Speakers on the application of the project and its subsequent worth to N. C. State and the City of Raleigh have been invited.

## Class Rings

Class rings may be ordered by second semester juniors and all seniors in the lower lobby of the Erdahl-Cloyd Union today.

Juniors who wish to purchase a ring must have a 2.0 average. The factory representative will take orders from 9 a.m. until 4 p.m. today through Friday.

## Interview Schedule

Students may sign up for interviews at 239 Riddick with the following companies February 9. The companies will be on campus February 23.

General Foods Corporation, Maxwell House Division—ME, IE, ChE.

Humble Oil & Refining Company—CE, ChE, EE, ME (Feb. 23 & 24)

Potomac Electric Power Company—EE, ME.

Talon, Inc.—EE, EM, EI, IE, ME.

Thomasville Furniture Industries—FMM.

Employers to sign up for on February 10 (on campus February 24):

Applied Physics Lab., The Johns Hopkins University—EE, AMA.

Caterpillar Tractor Company—CE, CEC, EE, IE, AgE (Feb. 24 & 25)

Atomics International, Div. North American Aviation—ChE, EE, EM, ME, MTE, NE, PY. (The other divisions of North American Aviation will not interview on campus).

## Nothing's Changed

Nothing's changed about the name change.

North Carolina State University is still alive and kicking, even with the addition of "at Raleigh" to the proposed name.

The bill, introduced into the House of Representatives by Rep. George Wood, who is also president of the NCS Alumni Association, proposed that North Carolina State University at Raleigh be State's new name. This action indicated that State's alumni are willing to fight for the name.

Sen. Ralph Scott has pointed out the underlying danger in the stubbornness of State's alumni in the General Assembly. If the fight over a name were to lead even to a partial deconsolidation of State from the Consolidated University, it would be a silly and useless fight indeed. State would be given a name, but it would lose many other advantages.

It should not be forgotten that Charlotte College will probably gain university status. Although this may be an excellent political move, there are people who question Charlotte's educational status as a university. On the other hand, if State's name were to affect the University's consolidation, the logical place to transfer the engineering and textile schools would be to Charlotte's industrial areas. State would lose and Charlotte would gain.

A separate identity for State would also hinder appropriations for the institution.

Realistically, NCS alumni will never outnumber Carolina alumni in the legislature, as Senator Scott has pointed out. The very nature of the different types of training offered at Carolina and State guarantees that the majority of the politicians will come from Carolina. If appropriations are considered separately, Carolina will be assured of the larger amount of money.

North Carolina State University at Raleigh is a good name, but not at the expense of the other advantages that consolidation has given to this institution.

Winning the battle for this name might very well cause State to lose the war—the war that everyone is fighting to insure that State has a reputation for being one of the finest institutions in the country.

## Reassuring News

It is reassuring to have President Friday confirm that N. C. State's status as a land-grant institution is in no danger.

Last week, Dr. F. J. Hassler, acting director of the water resources research institute, mentioned the possibility of interpreting certain terms to mean that not just State, but the entire Consolidated University is a land-grant institution. However, President Friday has stated that it just isn't so. State is still the land-grant institution.

Two years ago, the N. C. General Assembly changed the wording of a general statute so that State would be referred to as "such university" rather than "such college." This raised the question of whether the statute could refer to the Consolidated University rather than State alone.

If such an interpretation were possible, State would be in danger of losing potential gains from the federal government. The water institute is an example of such a loss. As the situation now exists, State will get the institute because it is the only land-grant institution in North Carolina.

But what if Carolina were also considered a part of the "land-grant University"? It would be to Carolina's advantage to have the institute at Chapel Hill, rather than Raleigh, in order to direct the research from their own location. Also, if and when it becomes a branch of the Consolidated University, Charlotte College might also want such projects to increase its research potential.

In addition, scattering the land grant institutes around the state could hurt the Consolidated University.

It is an advantage to the Consolidated University for the institutes to be located at State, where the center of the state's research in agriculture and engineering is presently based. The water resources research institute, for example, will need to drain heavily upon the technical knowledge and technical ability already present in State's schools of agriculture and engineering.

### 'LAB JUST AS BAD'

To the Editor:

I thought I had a gripe about the Physics Department, but I've found a new one. The lab has turned out to be just as bad.

My lab is from 4 to 6 p.m. on Thursdays. This past lab was one solid laugh. We had a substitute "teacher" and were given a pop quiz. The quiz included six true-false questions which we were told to answer in Russian. We were given the Russian symbols for true and false and were informed that the question would be marked wrong if these, or some other foreign language, were not used. The "teacher" said this was because the English Department had asked the Physics Department to place more emphasis on language.

The experiment for the day was latent heats. We were told to take data on part one and leave. The class finished taking data about 5:15 and it would have taken only about 20 minutes to write up the lab. But the "instructor" said leave. He had somewhere he wanted to go. Our labs were to be turned in to Room 417 by 12 the next day. We had to leave! We were not even allowed to remain in our room till our lab period was over, but were run out after one hour and fifteen minutes of our two-hour lab.

This, in my opinion STINKS! Does anyone still think we 205 students do not have reasonable gripes?

### PRICES AND ALL

To the Editor:

After reading Mr. Allen's contribution to "Contention," (concerning the Student's 'Clip' Stores), I can say but one thing—Amen.

Every time I enter the supply store, I become aware of the strange atmosphere of the place. The mirrors on the wall, the guards at the doors, the quiet, polished gentlemen with their suave mode of speaking—all

### P P and M

# 'Audience Gets What It Deserves'

By JIM ROBINSON  
Peter, Paul and Mary, appearing in a two-hour concert Saturday night at Reynold's Coliseum, drew almost as large a crowd as pianist Artur Schnabel the previous week.

The folksing trio performed many of their well-known pieces, among them "Puff, the Magic Dragon," and "The Times They Are A-changing."

The audience was fairly enthusiastic to the group. The re-

sponse to their numbers generally varied with how well known the song was: the more accustomed the audience to the piece, the better the reception.

At one point in the show, students who had moved to sit on the floor in front of the stage were "dispersed" by police, despite pleas from the trio to let them stay. The action received enthusiastic boos from the audience, but the police were firm. Immediately afterward the trio sang, "That's

entirely without foundation! It appears that he, from the view from the 4.05 average he holds, cannot see nor understand the problems of mere mortals. He needs a telescope to bring his vision from the extremity of his very puggy nose into the affairs of real human beings.

Mr. Lakin's wife was in the hospital with asthma for a period during the semester. I am sure that you will admit, even you, sir, that a sick wife is a great burden upon one's intellectual and physical potentialities. Even if this had not been the case, Mr. French, Larry has proved that he possesses the ability to attain the minimum requirements of achievement by returning after being down so far last year.

In the future, I would like to see Mr. French aim his blasts at ideas and things, not people! After all, according to the old proverb: "Big people talk of things, and little people talk of other people."

James L. Sutton  
P.S. Don't you wish you could average 20 points per game, Mr. French?

Donald Bryant

THANKS  
Editor's note: Chamberlain Caldwell has referred the following letter to "The Technician" in order that the students participating in the inaugural activities may be duly thanked.

Dear Mr. Caldwell:

On behalf of the Inaugural Committee, I wish to thank North Carolina State for participating in the functions of the Inauguration of the Honorable Dan K. Moore.

The State College glee club, band, Army ROTC units, and Air Force ROTC units who participated helped to make this historic occasion a successful one, and we are indeed grateful.

With best wishes and highest personal regards.

J. Ruffin Bailey  
Chairman

Mr. French's comments were

# SG and Me

By Bob Holmes

NCSU?

North Carolina State University at Raleigh? Here we go again. The last Student Government expended much time and effort agitating over the name of this institution; this year promises even more of such activity.

Undoubtedly the "NCSU at Raleigh" bill recently introduced in the N. C. House of Representatives will produce a beehive of activity within the State Student Government. However, the bill has several outspoken opponents in the Senate who have also felt called upon to comment on the sanity of several student leaders with regard to the name-change issue.

One result of this fascination with the university name is that other issues which may be of greater importance have been relegated to rear positions. Included among these is the gag law which is probably of more far-reaching consequence to the student body in general. Little or nothing has been heard from SG on this subject so it can only be assumed that the gag law is regarded as lower in importance than the name of the university.

National Student Association Affiliation with the National Student Association has been a recurring issue on this campus and possibly may again arise during the impending spring general elections. This year the NSA question has not been heatedly debated other than by the Young Americans For Freedom, whose only reason for existence appears to be to agitate for the demise of NSA.

Student Government has had several NSA Coordinators and a scheduled investigation of the organization by the SG Investigations Committee was postponed. However, the interest in disaffiliation with NSA has appeared at irregular intervals for some time. Fifteen years ago the membership of N. C. State in NSA was a highly controversial issue. Some of the points raised at that time are very similar to the dissatisfaction being expressed now.

In 1950, Hal Brown occupied exactly the same position now held by Terry Lowder: vice president of SG and chairman of the Virginia-Carolina Region of NSA. Brown resigned his regional chairmanship stating that he was maneuvered into the job by a group which sought to keep State in NSA and at the same time he called for disaffiliation. The SG vice president maintained that "NSA has not benefited the students of the nation; in fact, it does not represent the students of the entire nation. The students, the Student Government, and the NSA itself do not know what the National Student Association is or what it is for."

The other side of the issue, led by Jack McCracken, SG President, also has a familiar ring. McCracken argued that "NSA is neither a lottery nor a stock brokerage. It should not be sold as such. If we have never gotten our money's worth from NSA, I feel that it is because we never really tried to." As usual, the pro-NSA forces, led by then NSA national president Al Lowenstein, emerged victorious. The battle over disaffiliation continues.

One of this year's Student Government officials has observed that the apathy on campus is not really surprising when the majority of SG time is spent rehashing old issues, such as the name change and NSA with no real resolution to either problem being developed.

## SPE, Alexander Pace Intramurals

Sigma Phi Epsilon, with one first place, one second place, and two third place finishes in the four fall sports, is currently leading in the fraternity intramural program while Alexander with two firsts and two seconds is ahead in the dormitory league.

The Sig Eps totaled 505½ points while Alexander tallied 607 points during the fall season. Theta Chi with 394 and Kappa Alpha with 352½ are second and third in the fraternity race while Syme, with 400 and Turlington with 385 are the top challengers for the dormitory crown.

Interest was the highest ever in the football season as the total participation of 914 for the 126-game schedule is an all-time high. The gridiron crowns were won by Theta Chi and Syme.

Golf in the fraternity and dormitory leagues suffered from a streak of bad weather and resulted in less participation than in previous years. Pi Kappa Alpha and Turlington won the titles in the pitch and putt tournament.

Kappa Alpha and Turlington copped the track meet this fall despite the cold weather which kept the participation down to 269.

Volleyball, the last of the four fall sports, was again very popular with 527 boys competing in the 126 matches played. The winners of these titles were Sigma Phi Epsilon and Alexander.

Participation in both the dormitory and fraternity leagues was slightly higher this fall than in previous years with 884 competing in dormitory action and 736 taking part in the fraternity program for a total of 1,620.

## Wolfpack Wins Thirteenth As Tournament Time Nears

The Wolfpack made it another thriller Saturday night against Clemson, coming from 12 points down to win 78-74. Tri-captain Tommy Mattocks paced the State scorers with 22 points, followed by the Pack's other captains, Larry Lakin and Pete Coker with 16 and 14 points. Billy Moffitt also scored in double figures, adding 10 markers.

Clemson played a strong first half and battled to a 46-39 lead over the Pack at half time. In the second period, the Tigers

increased their lead to 12 points at 58-46. At this point, State began a rally that netted 26 points while holding Clemson to only six and took a comfortable 72-62 lead with seven minutes remaining.

The Tigers put together a rally of their own late in the game and pulled to within two points of the State lead at 76-74 with 35 seconds to play. A time-out called in the forecourt nullified a Tiger basket that might have sent the game into an

Tom Thomsen wanted challenging work

He found it at Western Electric

T. R. Thomsen, B.S.M.E., University of Nebraska, '58, came to Western Electric for several reasons. Important to him was the fact that our young engineers play vital roles right from the start, working on exciting engineering projects in communications including: electronic switching, thin film circuitry, microwave systems and optical masers.

Western Electric's wide variety of challenging assignments appealed to Tom, as did the idea of advanced study through full-time graduate engineering training, numerous management courses and a company-paid Tuition Refund Plan.

Tom knows, too, that we'll need thousands of experienced engineers for supervisory positions within the next few years. And he's getting the solid experience necessary to qualify. Right now,

Tom is developing new and improved inspection and process control techniques to reduce manufacturing costs of telephone switching equipment. Tom is sure that Western Electric is the right place for him. What about you?

If you set the highest standards for yourself, enjoy a challenge, and have the qualifications we're looking for — we want to talk to you! Opportunities for fast-moving careers exist now for electrical, mechanical and industrial engineers, and also for physical science, liberal arts and business majors. For more detailed information, get your copy of the Western Electric Career Opportunities booklet from your Placement Officer. And be sure to arrange for an interview when the Bell System recruiting team visits your campus.
