Financial Aid Available To Qualified Students

By JIM ROBINSON

Financial aid in a variety of forms is available to qualified students, according to Kingston Johns, State financial aid officer.

Applications for scholarships for the coming year should be made immediately for upper-classmen interested in competing for some 50 available scholarships, Johns said.

The competitive grants, sponsored by such donors as RCA, Texaco, Chemstrand, and Burlington Industries, will be awarded partly on the basis of leadership and scholastic potential. Other considerations are past grade records (a 3.0 is usually required) and evidence of financial needs, Johns said.

Most of the competitive scholarships are open to rising juniors and seniors and will be awarded before the close of the current semester.

Johns said all general scholarships and loans will require new applications for the coming year, including those participating in the Talent For Service Scholarship Program.

Federal work-study opportunities are open to those interested in part-time employment under the Economic Opportunities Act. The jobs will be on campus and not exceeding 15 hours a week at pay from \$1 an hour and up.

To be eligible, one's parents must be unable to help finance his study and he must have a satisfactory academic record. So far 100 jobs have been assigned to State students, according to Mrs. Marilyn Bulla of the Fi-

Financial Aid Office. Applications for employment should be made at 205 Peele.

Five fellowships to the Harvard Business School will be offered students in the Southeast under the J. Spencer Love Fellowship Program. Lester Rollins, assistant dean and director of fellowships at the Harvard Graduate School of Business Administration, will be here Tuesday to talk to candidates for the program.

The fellowships are awarded to those who intend to choose a career that will contribute to the business development of the Southeast.

The awards range from \$1,000 to \$2,500 and are renewable on the basis of good academic performance. Burlington Industries is the donor for the program. State students interested in the fellowships may make arrangements to see Rollins by calling J. J. Stewart, dean of Student Affairs.

Firebug Strikes Again; Blaze In Berry Dorm

A blazing telephone book in a booth in the basement of Berry dormitory around 1 a.m. Saturday added another mystery in the case of the firebugs.

This blaze, the eighth in three weeks, was extinguished by campus security officers before the fire spread to surrounding areas, but there was considerable smoke damage to the booth and walls, officials said.

Haywood Starling, special agent for the State Bureau of Investigation, said the fire appeared as if a match or lighter was held to the telephone book.

State's SSL Delegation Has Its Main Bill Passed

The State Student Legislature convenes in the old legislative chambers in the North Carolina state capitol building. Above, a student delegate delivers an address to the body from the speaker's podium in the Senate chamber. Below, the State delegation listens attentively to debate on the floor.

(Photos by Al Traynham)

The N. C. State Delegation to the State Student Legislature had its main bill passed by acclamation and helped Salem College author another unanimously-passed bill in the conclave last weekend.

The State delegation's main bill was a proposal to create an Aviation Commission under the Department of Conservation to further regional development of tourism and industry. The bill states that each county of North Carolina would decide by bond issue whether or not to build an airport. The commission would give technical aid to those counties approving the bond issue.

A similar bill made into law in Tennessee caused the number of community airports there to increase by 100 per cent in ten years, according to State Delegate John Atkins.

State's secondary bill was planned to set controls on billboards along North Carolina highways. The Salem College delegation had this as its primary bill so, since there was only enough time for each school to present its primary bill, State helped with the preparation.

Thirty schools attended the three-day Legislature and about 20-25 bills were presented. The purpose of the conclave is to educate students in the operation of a general assembly and to provide a forum for the expression of students' opinions, according to Atkins. The bills passed have neither legal power nor persuasion.

The number of legislators per delegation is decided by a proportion of the total student population. Individual State delegations, of whom State had 13, were chosen by Chairman Butch Fields, who was appointed by Student Body President John Atkins and approved by the Student Legislature. Most delegates came either from Student Government or the Young Democrat's Club, according to Atkins.

Atkins termed the meeting "successful" and added that in his opinion the State delegation did an excellent job.

Service To Students Aim Of Print Shop

Service to the student is the foremost aim of the N. C. State Print Shop, according to Shop Manager L. B. Phillips.

Phillips' statement was in reply to a recent Student Government recommendation that a contract be drawn between each client and the Print Shop prior to the beginning of any job.

A. W. Kelly, assistant manager of the Print Shop, stated that many of the complaints arose because of improper job preparation by clients.

Phillips added that many clients also underestimated the time involved in doing a job. He said that because of a shortage of up-to-date equipment, small jobs usually take about a week and student publications usually take around 30 days.

Both men stressed the fact that costs would vary widely on most jobs due to the numerous variables involved in the printing business.

Review Sessions Held For Engineers' Exam

The Engineers' Council is aiding graduating seniors by holding review sessions for the Engineer-in-Training exam to be held this spring.

Under the provisions of Chapter 89 of the General Statutes of North Carolina a person practicing engineering where life, health, or property are involved must be registered by the North Carolina Board for Professional Engineers and Land Surveyors or another State Registration Board.

The EIT Examination I is the first step toward engineering registration followed by four or more years work experience and a second exam.

The sessions, extending over the next nine weeks, are for the first exam only which will cover physics, statics, chemistry, electricity, mathematics, thermodynamics, engineering, economics, kinematics and kinetics, strength of materials, and hydraulics.

The second exam will cover the person's field of specialization. The review sessions will be held each Monday and Friday from 7 to 9 p.m. in either Riddick 11 or 242. The sessions are open to anyone preparing for the exam.

The topic for each week will be listed in *The Technician's Interview Schedule* every Monday.

Interview Schedule

Students may sign up for interviews at 239 Riddick with the following companies February 23. The companies will be on campus March 9.

Warner Robins Air Material Area, Civilian Personnel Div.—CE, CEC, EE, IE, ME, MEA, MTE, CHEM. (March 9 & 10).

The Jeffrey Manufacturing Co.—EE, IE, ME.

The State Road Commission of West Virginia—CE, CEC, Landscape Arch.

Pittsburgh Plate Glass Co., Chemical Division—CE, CHE, EE, IE, ME.

Yale & Towne, Inc.—IE, IATO.

Employers to sign up for on February 24. (On campus March 10)

Goodrich-Gulf Chemicals, Inc.—CHE, CHEM.

U. S. Army Engineer District, Norfolk—CE, CEC, EE, ME. (March 10 & 11).

Johnson Service Company—EE, ME.

Armco Steel Corp., Metal Products Division—CE, CEC, ARCH.

Factory Insurance Association—CE, CHE, EE, IE, ME.

Buffalo Forge Company—IE, ME.

The American Tobacco Company—CHE, ME, LA, AMA, CHEM, PPT.

This week's Engineer-in-Training review will cover hydraulics and will be conducted in Riddick Hall by Michael Ameen, assistant professor of Civil Engineering.

State Men Win In ACU Contest

One hundred and twenty N. C. State students participated in the Association of College Unions' annual tournaments held here last week.

Neal Upchurch, a State student, won the three cushion billiards competition, and Henry Griffin and Margaret Long both won honors in bowling and will go on to the National Tournaments.

Colleges in Virginia, North Carolina, South Carolina, Kentucky, and Tennessee were represented in the tournaments. Duke won both the table tennis and chess competition, while N. C. State won billiards, and the University of Tennessee took the men's and women's bowling.

How Do You Like Them Apples?

The Frank Thompson Theatre has come a long way since the first steps were taken about three years ago to introduce the idea of an on-campus theatre to State students.

At that time, the Frank Thompson building was still a gym and the theatre was still in the workshop stages, with very little student interest. Now the scene is completely changed.

The old gym is a remarkable theatre, unique in many ways. It is set up basically for a theatre in the round. The stage can be arranged in any shape or form the play calls for. The audience and the cast are practically thrown together, making the small setup an intimate arrangement.

When Director Ira Allen came here two years ago, he was faced with insurmountable odds. First there was no drama school from which to draw for talented actors and Raleigh already had its own Little Theatre to attract the non-university talent. And second, he was following in the footsteps of Rom Linney, a young novelist who had tried the year before with little success to arouse interest in the theatre.

But despite these factors, Mr. Allen survived. In fact, he must have made quite an impression on somebody here, because he not only stayed for a second year but he was given an assistant, Charles Stillwell.

By the fall of 1964, the finishing touches were being put on the new theatre. This was an overwhelming change—the theatre had previously been operated from the Erdahl-Cloyd Union, but now it had its own building and its own atmosphere.

Early in the fall, Mr. Allen made it clear what his ambition was. "I want to bring theatre here," he said. And he has.

Mr. Allen's views were that the theatre could not be totally effective if he relied solely on campus talent. Consequently, he attempted to make the best of what he had.

He interested State students in the technical aspects of the stage as well as the acting roles. But he also looked beyond the campus and found talented men and women who were willing to contribute to the new theatre. He also decided to work hand in hand with the Raleigh Little Theatre. And now, the theatre is becoming an astounding success.

The Frank Thompson Theatre is currently presenting its second production of the 1964-65 season—two one-act plays by Edward Albee, *The American Dream* and *The Zoo Story*.

Those who saw *Who's Afraid of Virginia Woolf?* when it was performed here by a touring company can expect more of the same type of simple themes with biting bits of truths.

We recommend that you see the plays, and after you have, tell us, how do you like them apples?

Pro's Of S G Hailed By Diners

By GORDON SHEPHERD

The limitations and powers of Student Government were brought to light by a former SG president, Bob Cooke (Class of '61) and Tom Covington, assistant director of Student Activities, at the Freshman Diner's Club meeting Tuesday.

The two men rendered the following observations:

State's student government has more power than most student governments because of the past responsible decisions made by effective leaders elected by the students. Their effectiveness has resulted in numerous campus improvements as well as high standards among students.

Although the campus is not run as a strict democracy, the students have nearly all powers short of those which would qualify them as faculty members.

Faculty restrictions have posed no obstacles for student legislation. Since the beginning of student government here, the faculty veto power has not once been used. Decisions made by the student government are

backed by an open-minded chancellor and faculty. Major actions taken by the faculty are first presented to the student government for approval.

One of the greatest problems the student leaders and faculty face lies in the lack of communication between the students and their leaders. Too many students offer open, destructive criticism in place of efforts to get at the base of the problems. Examples of this are the cafeteria criticisms and the gripes about the SSS.

The channels of communication remain open between students, their leaders, and the faculty, more than the average student realizes. Student actions toward improvements should take advantage of these channels. Action in other directions is very limited in scope as to gaining results.

The results of action in worthwhile directions can be seen in the standards that have been set by the students. The Honor Code Board is an example of the fact that the students chose to

trust each other as well as provide appropriate steps to deal with those among them with apparently lower standards.

The problems of raising and maintaining standards fall into the hands of the judicial branch of Student Government.

The other two branches of SG have problems characteristic of their functional roles. The legislative branch has problems due to its size. The large numbers of members evidently cause some to feel unneeded, resulting in absenteeism. The amount of work done is not realized by the average student, and this work is usually done only by an active few.

The executive department has the most important problems. The president has to coordinate the activities of the other branches as well as make important appointments to numerous committees. The president is the center of criticism and he must cope with all problems.

The key to future success is open minds, open communications, responsible decisions, and work.

CONTENTION

CAMPUS PYROMANIAC

beauty or meaning in those gallowases!

To the Editor:

Bascombe J. Wilson

May I offer a suggestion to the campus pyromaniac? While he is busy attempting to destroy our revered chapel, administration building, and dormitories, perhaps he can work into his busy schedule an attempt or two to do something useful for the campus. I refer, of course, to the destruction of those two monstrosities standing behind the Union. . . . Although I believe that a man's art should be given a fair evaluation in the minds of the public, I find it hard to call Mr. Musselwhite's "art" art.

To elaborate, since when do a few railroad spikes in some rotten wood constitute "art"? Perhaps also molten solder dropped in cold water is also "art"? If so, then I demand equal time for exhibition!

Granted, some of Mr. Musselwhite's art is art . . . for example, the small, carved figurines in the Union. But those large planks which are bolted together to form a perfect likeness of a grand imperial nothing strike me as absurd. My dictionary defines art as that which has definite aesthetic value . . . I find railroad spikes highly un-aesthetic. Perhaps my opinion shouldn't condemn Mr. Musselwhite's "sculpture" to the pyro's torch, but I still challenge anyone to show me

FAVOR CHANGE

To the Editor:

Having read all literature available and having talked with several people connected with the proposed calendar change, we, the members of the N. C. State Veterans Association, lend our full support. We would like to suggest one small change in connection with the Thanksgiving holidays. We are of the opinion that instead of one day for Thanksgiving there be two days, which will in effect give a long weekend to the majority of the student body. The final exam period could be deferred one day and this would compensate for the extra day given for Thanksgiving.

The reason or justification behind this suggestion is, very few students live close enough to the campus to go home and come back in one day. Everyone wishes to be with his or her family on Thanksgiving. When one day is given, a safety factor is involved, everyone will rush to get home and will likewise wait until the last minute to return. This floods the highways with people rushing to and fro, when this is the case safety and care are not considered and many more accidents than normal are possible.

Albee's Plays Are Success

By THOM FRASER

The Frank Thompson Theatre is now following the performance of *Who's Afraid of Virginia Woolf?* with a pair of one-act plays also by Edward Albee.

The first of the pair, *The American Dream*, is the rather bizarre vignette of a day in the life of a couple known only as "Mommy" and "Daddy" portrayed by Helen Crisp and Charles Tant respectively. Anne White ("Grandma"), Rhonda Blanton (Mrs. Barker), and Den Stone (the young man) complete the cast.

The Zoo Story, Albee's first drama, is a surprisingly simple but effective portrayal of a conversation between two men in Central Park. Art Anderson, a Raleigh Little Theatre regular, handles the lead with professional skill while Lloyd Kay does a good job of backing him up.

Both plays are staged in the round with a minimum of props, but the effect is anything but stark and cold. The seating of the audience on all four sides provides an intimacy and warmth that adds tremendously to the performance as well as insuring that no person is more than three rows away from the "stage."

The current production runs daily at 8 p.m. through February 28. Reservations may be made by calling 755-2454.

SG and Me

By Bob Holmes

A group of newspapermen are apparently attempting to help Student Government out of its name-change quandary. The following editorial appeared in *The Charlotte Observer* on Saturday.

A group of newspaper people had gathered in a Raleigh motel room after the recent opening of the North Carolina General Assembly to discuss events of the day.

Their attention was turned to the controversy over the name of State College. Rep. George Wood of Camden County had announced his intention to reopen the fight by asking the legislature to change the name to North Carolina State University. (It is now "North Carolina State of the University of North Carolina at Raleigh.")

"This thing won't ever be settled," said one newsman, "until some compromise name is agreed on."

"It may not be settled then," said another. "The fight over the name change is only a smoke-screen for the desire on the part of some State alumni to wreck the concept of the single University system."

"We'll have to cross that bridge when we come to it," said the other. "But right now there could be a settlement of this name business in one word."

The audience was uniformly skeptical. "Name it," said one.

"Okay," said the newsman. "The bone of contention is the word 'State.' This is what the alumni claim to want to preserve. On the other hand, the University administration fears 'North Carolina State University' because it seems to denote separation from the University of North Carolina.

"Assuming that Charlotte College becomes the fourth branch of the University, the campus names would go like this.

"University of North Carolina at Chapel Hill."

"University of North Carolina at Greensboro.

"University of North Carolina at Charlotte.

"So," remarked one of his listeners, "who's quarreling about those names?"

"All right," said the innovator, "here's the clincher. It has the merit of putting proper and first emphasis on the Consolidated University but retains the word 'State.'

"UNIVERSITY OF NORTH CAROLINA STATE AT RALEIGH."

There was a moment of silence.

"Sounds good to me," said one newsman finally.

"The administration'll never buy it," said another. "It's a foot in the door."

"Maybe," said another, "it's such a simple and sensible solution that it wouldn't get serious consideration."

A few days later the newsman who had suggested the solution was talking with his editor.

"You know," said the editor, "for some reason I had a dream last night about the controversy over the State College name. I dreamed that the legislature was in the midst of debate when the University people threw out a name. It was a compromise that met the State alumni objections so well that it caught them off guard and they went along with it."

The newsman felt in his bones what was coming. But he put the question.

"And the name was?"

"I don't know why someone hasn't thought of it before," said the editor. "University of North Carolina State at Raleigh."

Wolfpack Swimmers Lose First In ACC

The tankmen from the University of Maryland put the regular season ACC swimming crown into a three-way tie for first place this weekend, losing to Carolina Friday and defeating State Saturday, 55-40. Each of the three teams has lost only one dual meet in ACC competition: Carolina lost to State, State lost to Maryland, and Maryland lost to Carolina. Maryland is the favorite to take first place in the ACC tournament next month in College Park, but the Tar Heels and the Wolfpack have the capabilities

to pull an upset.

Saturday's meet between Maryland and State saw the Terps take first in the all-important opening relay and coast through the rest of the meet to victory.

Ron Wirth of State took first in two events to lead the Pack, winning in the 200 individual medley and the 200 backstroke. Other State firsts came in the 200 butterfly by John White, the 500 freestyle by Pat Gavanhan, and the 400 freestyle relay.

Three Undefeated In Fraternity Basketball

Three of the four section leaders in the fraternity intramural basketball league are still undefeated after the fifth week of action. Phi Kappa Tau, last year's champions, Sigma Phi Epsilon, and Sigma Nu each have 5-0 records and are assured of berths in the upcoming playoffs.

The PKT's kept their record clean with a 57-33 win over Pi Kappa Alpha last week. Harrison paced the winners with 22 points. Sigma Chi retained second place in Section 1 with a 50-34 victory over Sigma Pi. High scoring honors went to Bob Dillinger of Sigma Chi with 21 points.

Kappa Alpha and Sigma Alpha Mu each won games in Section 2 to maintain a tie for the

number one spot. Each team has a 4-1 record. The KA's took their victory over Alpha Gamma Rho, 34-27, while SAM trounced Lambda Chi Alpha, 72-47. Corrigan, Wise and Williamson paced the winners with 18, 17 and 15 markers respectively.

Sigma Phi Epsilon remained in first place in Section 3 with a 52-24 defeat of Kappa Sigma. Delta Sigma Phi holds second place in the section after downing FarmHouse, 53-45.

Sigma Nu continued its dominance of Section 4 with a 53-38 victory over Theta Chi this week. Hindrix led the Nu's with 23 points. Sigma Alpha Epsilon, idle this week, holds second place with a 3-1 mark. In the other Section 4 contest, Tau Kappa Epsilon defeated Pi Kappa Phi, 38-31.

Fraternities Begin Handball

Handball action in the fraternity intramural league began last week with eight matches. The stronger teams in the league quickly rose to prominence as seven of the eight

matches were swept by 3-0 scores.

In the closest match of the night, Sigma Pi edged Theta Chi, 2-1. Winning by 3-0 marks were: Sigma Chi over Pi Kappa Phi, Sigma Nu over Kappa Alpha, Phi Kappa Tau over Delta Sigma Phi, Kappa Sigma over Pi Kappa Alpha, Sigma Alpha Epsilon over Tau Kappa Epsilon, and Sigma Phi Epsilon over Alpha Gamma Rho.

Last year's fraternity champions, Sigma Alpha Mu, drew a first round bye.

NOTICE

Candidates for the freshman and varsity tennis teams should report to Coach Kenfield in room 211, Carmichael Gym on Wednesday, February 24, at 5 p.m.

The Ant and the Grasshopper

One sunny day, a grasshopper hopped merrily across the campus. An ant passed by, diligently bearing two bags of coins to his bank, Wachovia.

"What's bugging you?" asked the grasshopper.

"I'm laying up sustenance for winter quarter," replied the ant, "and recommend you do likewise. This is for my Wachovia Savings Account, where I earn Daily Interest every day on every dollar."

"Hum'oh!" scoffed the grasshopper.

"And this is for my Wachovia Special Checking Account. It helps me keep track of my money. Wachovia sends a statement every month. And my money is protected by Federal Deposit Insurance. No minimum balance required, either. Wachovia even prints my name and address on checks and deposit slips absolutely free."

"So what's the matter with Father?" snorted the grasshopper. "O! Dad sends me a nice, big check every Friday."

Paying no heed, the ant went industriously on his way . . . the Wachovia way.

Then winter came . . . and one bleak Friday, O! Dad failed to remit the usual sum to his indolent son.

The grasshopper was in a quandary. For he had a date with a social butterfly and his pockets were empty. In a black moment he even considered insecticide.

Meanwhile, the ant and his ladybug strolled by, deeply involved in Daily Interest.

On Campus with Max Shulman

(By the author of "Rally Round the Flag, Boys!", "Dobie Gillis," etc.)

THE BEARD OF AVON

Topic for today is that perennial favorite of English majors, that ever-popular crowd pleaser, that good sport and great American—William Shakespeare (or "The Swedish Nightingale" as he is better known as).

First let us examine the persistent theory that Shakespeare (or "The Pearl of the Pacific" as he is jocularly called) is not the real author of his plays. Advocates of this theory insist the plays are so full of classical allusions and learned references that they couldn't possibly have been written by the son of an illiterate country butcher.

To which I reply "Faugh!" Was not the great Spinoza's father a humble woodcutter? Was not the immortal Isaac Newton's father a simple second baseman? (The elder Newton, incidentally, is one of history's truly pathetic figures. He was, by all accounts, the greatest second baseman of his time, but baseball, alas, had not yet been invented. It used to break young Isaac's heart to see his father get up every morning, put on uniform, spikes, glove, and cap, and stand alertly behind second base, bent forward, eyes narrowed, waiting, waiting, waiting. That's all—waiting. Isaac loyally sat in the bleachers and yelled "Good show, Dad!" and stuff like that, but everyone else in town sniggered derisively, made coarse gestures, and pelted the Newtons with overripe fruit—figs for the elder Newton, apples for the younger. Thus, as we all know, the famous moment came when Isaac Newton, struck in the head with an apple, leapt to his feet, shouted "Europa!" and announced the third law of motion: "For every action there is an opposite and equal reaction!"

Figs for the elder Newton, apples for the younger.

(How profoundly true these simple words are! Take, for example, Personna Stainless Steel Razor Blades. Shave with a Personna. That's the action. Now what is the reaction? Pleasure, delight, contentment, cheer, and facial felicity. Why such a happy reaction? Because you have started with the sharpest, most durable blade ever honed—a blade that gives you more shaves, closer shaves, comfortabler shaves than any other brand on the market. If, by chance, you don't agree, simply return your unused Personnas to the manufacturer and he will send you absolutely free a package of Beep-Beep or any other blade you think is better.)

But I digress. Back to Shakespeare (or "The Gem of the Ocean" as he was ribaldly appellated).

Shakespeare's most important play is, of course, *Hamlet* (or, as it is frequently called, *Macbeth*). This play tells in living color the story of Hamlet, Prince of Denmark, who one night sees a ghost upon the battlements. (Possibly it is a goat he sees; I have a first folio that is frankly not too legible.) Anyhow, Hamlet is so upset by seeing this ghost (or goat) that he stabs Polonius and Brer Bodkin. He is thereupon banished to a leather factory by the king, who hollers, "Get thee to a tannery!" Thereupon Ophelia refuses her food until Laertes shouts, "Get thee to a beaery!" Ophelia is so cross that she chases her little dog out of the room, crying, "Out, damned Spot!" She is fined fifty shillings for cussing, but Portia, in an eloquent plea, gets the sentence commuted to life imprisonment. Thereupon King Lear and Queen Mab proclaim a festival—complete with kissing games and a pie-eating contest. Everybody has a perfectly splendid time until Banquo's ghost (or goat) shows up. This so unhinges Richard III that he drowns his cousin, Butt Malmsey. This leads to a lively discussion, during which everyone is killed. The little dog Spot returns to utter the immortal curtain lines:

Our hero now has croaked,
And our prima donna,
But be of cheer, my friends,
You'll always have Personna.

©1965, Max Shulman

Yea and verily. And when next thou buyest Personna, buyest also some new Burma Shave regular or menthol, which soaks eth rings around any other lather. Get thee to a pharmacy!

"when can I interview IBM?" March 17 "for what jobs?"

Manufacturing, Product Development, Programming, Research

If you are majoring in Engineering, the Sciences, Mathematics, or Business Administration, see IBM. The development, manufacturing, and marketing of information systems and equipment offer many opportunities to show what you can do.

See your placement office for our brochures—and an appointment with the IBM interviewers. Ask where your ideas can best be used at IBM, an Equal Opportunity Employer. There are 20 laboratories, 17 plants, and over 200 sales and service offices coast to coast.

If you cannot attend the interviews, visit the nearest IBM office. Or write, telling us about your interests, to Manager of College Relations, Dept. 882, IBM Corporate Headquarters, Armonk, New York 10504.

IBM

Are you still wearing those creasy kid slacks?

Get into some wised-up Post-Grads that know where a crease should always be and where it should never be, and how to keep things that way. The reason is the Koratron fabric of 65% Dacron*/35% cotton. No matter how many times you wash and wear these trimly tapered Post-Grad slacks, they'll stay completely neat and make the iron obsolete. In tan, clay, black, navy or loden, \$6.98 in poplin or gabardine, \$7.98 in oxford. At swinging stores.

Press-Free Post-Grad slacks by **h.i.s.**
