Dr. Brooks Discusses The Point System

Claims That Point System Has Reduced Unexcused Absences Fifty Per Cent

In discussing for the student body, the point system now in effect, Dr. E. C. Brooks stated at the assembly Wednesday morning that already a marked improvement in scholarship is noticeable. There has been a decline in unexcused absences of almost fifty per cent, according to the president. Dr. Brooks also discussed "The Purpose of an Educational Institution."

The system which was adopted this fall allows students extra "points" for meritorious work and deducts these points for unexcused absences. A definite number of points is necessary for graduation.

During the month of September 20 to October 20, 1923, with an enrollment at State College of 1,022, there were 2,098 unexcused absences. During the corresponding period this year, with 1,308 students enrolled; the absences declined to 1,512; a decrease of almost fifty per cent.

Last year, from the opening of the College until November 1, the deficiencies in scholarship by classes were as follows: Seniors, 20 per cent; Juniors, 34 per cent; Sophomores, 66 per cent; and Freshmen, 81 per cent. For the corresponding period this year, 7 per cent of the Senior class was deficient; 29 per cent of the Juniors; 45 per cent of the Sophomores; and 82 per cent of the Freshmen. For the whole school last year, the deficiencies were 62 per cent. This year it was 56 per cent. Dr. Brooks attributes this decline to the "point" system.

"I am not convinced that you are wrong," said Dr. Brooks in referring to the articles that have appeared in the *TECHNICIAN* under the Students' Forum. The president stated that he was aware of the apparent injustices that have caused so much comment among the students, but stated that the defect is in the "absence system" and not in the "point system."

Choosing for his text the proverb, "What the superior man seeks is in himself and the products of himself, and what the inferior man seeks is in others and the products of others," Dr. Brooks outlined the purpose of an educational institution. He urged the students to utilize the great forces within themselves. "There is no magic wand wielded from without that lifts us from mediocrity to success. This relic of the fairy tales of youth can have no part in shaping our lives to the highest goal. The will to do or to be must come from within." College is to place one in possession of himself. It gives the individual the instruments of knowledge that places him in possession of himself.

The president cited several instances which he has noticed this year that caused him to believe the College was carrying out with success the high purpose that it has set for its ideal.

Agricultural Economics Club Organized At State

Students in Department of Agricultural Administration to Hold Discussion Monthly

Last Friday afternoon the Agricultural Administration Students met with Dr. Foster and organized an Agricultural Economics Club. The officers were elected as follows: D. R. Palmer, president; H. D. Moye, secretary; E. D. Cody, treasurer; M. L. Snipes, reporter.

The Agricultural Economics Club will meet once a month for the purpose of bringing together and discussing subjects in the field of Agricultural Economics. Special attention will be given to investigational and research work carried on at the College and elsewhere.

The Seniors at the University of Minnesota have started the custom of carrying canes on the campus. They hope to establish this custom.

Apple Judging Team

State Apple Judging Team Wins Honors At Atlantic City

First Team Put Out by State College Wins Third Place; Team Composed of J. G. Weaver, J. B. Slack and M. W. Long

The State College Apple Judging Team won third place in the Intercollegiate Apple Judging Contest held at Atlantic City, November 13. M. W. Long, who is a junior in the agricultural school, won the distinction of placing third in the individual test, and the other members did exceptionally well—ranking just a few points below their team-mate.

The contest was held under the auspices of the American Pomological Society, which started these contests in 1913. Since that time the contests have been held in various places every year with many of the leading colleges of the North and South and West participating in them. This recent contest was the first one that State College has been represented in. And has the honor of being the only Southern college to carry away such a fine record.

Massachusetts won first place and New Jersey won second by only a narrow margin over our well trained judges that had been coached so well by Professor C. D. Matthews. The other colleges that participated in the contest were very much surprised to see the State College team plow ahead as the different varieties were judged, and they expressed their opinion of our team with many congratulations.

The team, and others who were out for the team, have expressed their opinion that the team's showing was largely due to the thorough and patient training by Professor C. D. Matthews, chairman of the Horticulture Department of State College and the Extension Department. The students seem to be very grateful to him for all the success they have accomplished.

The contest was held under the auspices of the American Pomological Society and the New Jersey Horticultural Society were having joint meetings the entire time the team was in Atlantic City. The members of the team did not get to attend these meetings as they would have

liked to, for they spent the greater part of their time in the Steel Pier where the exhibits were, looking at some of the Northern grown apples on exhibit. Tuesday evening, November 11, the two societies had a joint banquet in Haddon Hall and the members from State College were able to attend it. It was a grand affair and there they heard some of America's greatest horticulturalists speak on some of the vital horticultural problems of the day.

Dr. L. H. Bailey, of Ithaca, N. Y., formerly head of the Horticulture Department of Cornell University, was toastmaster. Dr. Bailey is one of the leading horticulturalists of America and has written several books on different phases of this subject. He made several good remarks along with his wit and humor.

Mr. Emmor Roberts, of Moorestown, N. J., was the first speaker and in his talk he went over many of the problems and remedies that had been faced by the horticulturalists of New Jersey.

Mr. Paul C. Stark, of Stark Brothers Nursery and Orchard Company, also president of the American Pomological Society gave his hearers an interesting talk on advertising the apple to the people of the nation. He had some very good plans for putting, not only the apple, but all fruits before the people of the United States. It

(Continued on page 3)

STATE DEFEATS WAKE FOREST IN ROAD RACE

The cross-country teams from Wake Forest and State met on Riddick Field Saturday between halves of the football game between the Freshmen teams of the two institutions. The distance was three miles and consisted of running to the Catholic Orphanage and back to Riddick Field.

Bailey of Wake Forest finished first, followed by Wright, Sherman, Robinson and Browning of State; Peacock, Wake Forest; Vick, State; the three other Wake Forest runners finishing in 8th, 11th, and 12th places. The time was 15 min. 23 sec. The final score was 21 to 35, favor of State.

State's cross-country team meets Trinity at Durham, Friday. The Freshmen teams of the two institutions meet at the same time.

State And Maryland Battle To A 0-0 Tie

ATTENTION!

All men desiring to obtain reserved seats for the Washington and Lee game on Riddick Field Thanksgiving Day for relatives or girl friends (next to their own) must apply to Director Miller, in his office in the "Y," Tuesday, November 25th, during the hours of 9-12:30 and 2-6.

In order that the student body cheering section be solid it is necessary that these reserved seats be located in the upper end of the concrete bleachers.

This is quite a concession on the part of the Athletic Department and should be appreciated as such. No exception will be made to the rules laid down!

PINE BURR SOCIETY INITIATES FOURTEEN

Fourteen initiates from the senior and junior classes were received into the Pine Burr Society Tuesday night, November 19. The initiation was followed with a banquet which was held in the Y. M. C. A.

Of the fourteen new members six are Seniors and eight are Juniors, thus making a total of twenty Seniors in the organization. This is six more men than any other class has furnished since the organization of the society in 1922. All the new men not only have the required scholastic standing but have shown their ability for leadership in different college activities.

In order to be eligible for membership a student must average 85 on all his work without being conditioned on any course and must be in school at State College at least two years, and in the meantime must take an active part in some college activity.

Pine Burr Society is an honorary organization peculiar to the N. C. State College. Its purpose is to encourage scholarship and participation in various college activities. That it is functioning in its primary purpose is demonstrated by the fact that the membership from each outgoing senior class is gradually increasing. From the class of '22 there were eleven members, class of '23 eight members, from the class of '24 fourteen members and from the present class twenty.

After the initiation the doors to the banquet hall were open to all the members present. The significance of the organization was impressed upon those present by pine burrs and needles which were placed on the tables. After all had satisfied their appetite with chicken, ice cream, etc., several interesting and influential talks were given by Col. J. W. Harrelson, Dean E. L. Cloyd, Dean W. H. Browne and W. N. Hicks, who was the first president of the Pine Burr Society. Also a few words in behalf of the new men were given by J. M. Potter.

New members from the Senior class: D. S. Matheson, T. B. Lee, L. C. Dillard, L. S. Pridgen, S. E. Holt, and T. T. Brown.

Members from the junior class: J. M. Potter, H. W. Taylor, J. M. Weaver, G. W. Dobbins, S. H. R. Hassall, Frederic Tarleton, E. G. Moore and C. W. Wade.

Wolfpack Play Good Defensive Game; Cox Plays Excellent Game Off Tackle.

With last year's defeat hanging over its head, the Wolfpack met the Marylanders on a rain-soaked and snow-covered field at College Park last Saturday and gave them one of the toughest games of the season.

It is generally admitted that Maryland outplayed State in the attack. State only obtained three first downs against Maryland's nine, and while Maryland crossed State's thirty-yard line four times, the Wolfpack threatened Maryland's goal only once, and that was from the thirty-one-yard line. However, that does not tell the whole story. State played a defensive game and played it well. In the second place, Maryland reached State's eight-yard line, but at that point the Red and White machine put up a wall that could not be broken.

In other respects the visitors played a slightly better game. While the penalties were not heavy on either side, Maryland got more than her share. The ball was fumbled time and time again, but this was to be expected, as it was soon covered with a mixture of snow, mud and water and was almost impossible to hold. However, Maryland had more than her share of fumbles, also. Neither team was very successful in the use of forward passes. In fact, it was impossible to use other than short passes. When it was seen that neither team could well break through the line of the other, punting became the real issue of the game. Considering the weather conditions, Ripple's punts on the whole were good. Throughout the game the Wolfpack played under a handicap. While the Maryland eleven had shoes which were especially equipped with mud cleats, the Wolfpack had their regular shoes only.

Game by Quarters

First Period.—Maryland started the game with a kick-off to Lassiter, who was downed on the ten-yard line. The Old Liners held so that Ripple was forced to punt. Pugh returned the kick to the forty-yard line and Maryland made a first down by line plunges. Hall missed a drop-kick from the thirty-five yard line. Ripple punted to Pugh, who was downed in his tracks by Cox on the thirty-five yard line. Alternate kicks followed till State had the ball in midfield. Lassiter gained five yards and Maryland was penalized five yards. State was unable to gain on line plunges and the ball went to Maryland on her forty-yard line. Alternate kicks followed till Pugh caught the ball in midfield and raced down the field for twenty-five yards. But the Old Liners were thrown for losses and State took the ball on the thirty-yard line. The quarter ended as Ripple kicked out of bounds on the forty-yard line.

Second Period.—Beasley opened the second period by a short pass to Burger, who ran thirty yards to State's ten-yard line. Four forward passes were all grounded, so State took the ball on the twenty-yard line. Ripple punted outside in midfield and Maryland was penalized fifteen yards. Alternate kicks followed and State was penalized fifteen yards. The remainder of the half was a game of punting. Neither team could hold an advantage over the other for any length of time. The ball seceded from near State's goal to midfield, towards Maryland's goal, then back again. The half ended as Beasley passed to Supples, who gained fifteen yards.

Editorials

Last week the paper seemed to be an athletic review.

Last Tuesday it looked as if the football team had brought some of Maryland's weather down with them.

Don't forget the coming election for the Norris Athletic Trophy. The election takes place the first week in December.

There was a worried look on quite a number of the Freshmen's faces Tuesday morning at breakfast. The weather man was human, however, and stopped the snow before the Freshmen had real cause to worry.

The TECHNICIAN wishes to praise the newest musical organization on the campus for the fine work it is doing. The Hawaiian Club with its seven stringed instruments is drawing crowds and interest at the same time.

Leazar Literary Society is to be congratulated on the fact that it won the annual inter-society declamation contest last week. Each of the competitors had a spirited talk to present and unusual interest was shown by the audience.

Every year State College is participating more and more in inter-collegiate contests of all kinds. Last year the college was represented by a debating team and also a seed judging team at Chicago. This year these same contests will be entered by State College, and in addition to these the horticulture department of the college sent an apple judging team to Atlantic City. This team made a very creditable showing, one that we can well be proud of.

Have you noticed that there has been more about State College in the newspapers lately than ever before? Do you know the reason for it? There is a class of journalism here now and it is, we hope, the beginning of publicity for State College. Publicity is one thing that we have been lacking in and the reason for it seems to be the lack of trained men in this line. The Journalism Class is not only doing work for the papers down town but also for the papers throughout the State. The class is also co-operating with the TECHNICIAN in regard to writing articles. We believe that from now on State College will get the much needed publicity in the State that she had not had heretofore.

Thanksgiving Greetings

While we rejoice over our victories and our strength, let us not forget to give thanks to the Sender of these blessings

The classes at Meredith are to be congratulated on the stunts last Saturday night. Stunt Night at Meredith is an annual affair in which the four classes compete for the most original and best stunt. This year the stunts were especially good. Every year a number of State men enjoy this occasion and last Saturday there were quite a few State men at Meredith.

It is indeed gratifying to see the interest the students are taking in the *Student Forum*. Last week there were four articles appearing in the *Forum*. All were good and were questions which every loyal State man should be considering. If you didn't read the articles in the *Forum* last week hunt up a copy of that TECHNICIAN and read them. It will be worth your while.

This week the North Carolina Association of Deans of Women met in Raleigh for their annual conference. State College boys have been wondering what they talk about and much interest has been taken in the filling out of questionnaires which the ladies sent to the college. We wonder what was the general opinion about girls among our student body, as shown by the answers to the questions. Figures taken from these papers might prove interesting to the general public.

Sometime ago an editorial appeared in the paper regarding our attitude toward the "help yourself" boxes of candy and apples located at various places on the campus. We are sorry that it is necessary to mention this matter again but there are still too many men who are under the impression that the apples and candy are free. These boxes are put here for your convenience and not benefit. The money these boys make on their boxes of fruit and candy is helping to pay their way through school. When you take an apple from the box and do not leave anything in return you are out-right stealing and you are nothing more or less than a thief.

When you steal money in this way from your college-mate you not only hurt him financially and class yourself as a thief, but you are also hurting the spirit of honesty in the school. As yet the honor system is too young to be a tradition, but some time, sooner or later, honor and honesty are going to be traditions on this campus; and it is our

actions now, that will build up that tradition and make it a reality instead of a dream of the future.

THE POINT SYSTEM

Probably too much has already been said about the Point System from the students' point of view, but, since the question far from settled to the satisfaction of either faculty or students, we feel assured that more concerning the matter is in order. No doubt many who heard Dr. Brooks last Wednesday morning in chapel were disappointed in so far as they were expecting the system to be explained. It is the general opinion on the campus that the real issue of the question was evaded (that of unexcused absences) purposely? Yes. Why?

There seems to be quite a difference of opinion as to the answer of the question. Why? Whatever the answer to the question is, probably only Dr. Brooks knows, but it is evident that "It is right not to excuse students that are sick," etc., was not brought up and that is what the students want explained. It might have been Dr. Brooks' plan to put some facts before us and let us do some independent and individual thinking on the subject.

As yet there are several points about the system that are not clear, not only to the students, but also to the faculty. It is believed that here is where the trouble lies. The students are not quite sure of the Point System, since, there has been no authoritative explanation of the matter, and you can not blame people from objecting an issue when they do not understand it in every detail.

It seems unfortunate from the standpoint of both faculty and students that the system was not explained at the very beginning of the year, for in all probability much of the dissatisfaction regarding the matter which has arisen would have been averted.

The most logical way in which to clear up the question seems to be to hold an open forum in Pullen Hall and let the whole matter be discussed. This will give the students a chance to ask any questions that they are in doubt on. The matter has gone far enough without some definite action. The faculty and students all will feel more at ease when the matter is understood by all interested.

OUR WEEKLY MISUNDERSTANDING

By ZIPPY MACK

(Apologies to Stanley, Raleigh Times)

"You say the police have made a complaint?"

"No! No! They just feared we were ruining the paint!"

A NEW DISCOVERY

Dr. B. F. Kaupp and Associate Research Professor R. S. Dearstyne have just isolated for the first time the germs of contagious pneumonia from a fowl. Similar germs produce pneumonia in human beings and animals but heretofore have not been isolated from fowls.

The North Carolina Poultry Association will meet in Greensboro on December 2. In connection with this the Tenth Official State Poultry Show will be held. Dr. Kaupp is secretary of the association.

Data being assembled by Director of Extension I. O. Schaub and Dr. Kaupp, chairman of the poultry group, shows that the poultry industry in North Carolina is rapidly growing. This year the total hatching capacity is

close to 1,000,000 eggs, which means that during the hatching season nearly 500,000 baby chicks will be hatched and sold each week.

J. A. Wilson spent the week-end visiting in Greenville and Washington, N. C.

CORONA FOUR

A New Portable Typewriter
for the office

HERE at last is a typewriter which any standard machine operator can use interchangeably with her present typewriter. It has the same *standard 4-bank keyboard*, the same time-saving devices and the same light touch and speed. But she can carry it anywhere about the office—and home if necessary.

It will pay every office to have a Corona Four on hand for emergencies.

Agricultural Reception Held Saturday Night

Peace and Town Girls Help Make Reception a Success; Hawaiian Serenaders Entertain

Saturday night, November 15th, the agricultural reception was held in Patterson Hall by the members of the Agriculture Club. This is an annual event as it is held each year directly after the Students' Fair. The fifty Peace girls present contributed much to its success.

A spirit of enthusiasm seemed to sweep through the boys as the Peace girls came up the steps and through the door of Patterson Hall. An excessive number of boys was present, but no one seemed to realize this or give it a thought during the evening. Troubles were forgotten, if there were any, while the joyous crowd moved to and fro through the rooms and halls of the Agricultural building.

The decorations added much to the grandeur of the occasion. Every one present took note of the fact that much effort had been spent in making the building as attractive as possible.

The entertainment was started by a contest which consisted of a psychology test of mental inaptitude. This kept every one guessing for some time. The Hawaiian Serenaders then entertained with a few favorite selections, after which five-minute dates were arranged which lasted until refreshments were served. The Hawaiian Serenaders gave a few more selections. They were thoroughly enjoyed by all.

As it became somewhat late and the Peace and town girls began thinking of their homeward journey, prizes were awarded to the winners of the contest. Mr. C. W. Wilson and Miss Catherine Parsons won the first prize. Due to the discovery of an abnormal intelligence, Miss Dorothy Dick and Mr. Laster Ford were awarded prizes. The Peace girls then gave a yell for State, and the State boys for every institute and college in Raleigh.

The reception peacefully came to a close as the Peace girls boarded the chartered car for home, and the boys withdrew silently and triumphantly to their respective rooms. A. B. H.

At the University of Michigan it costs the average student \$700.00 to attend one year. This does not include clothing or traveling expenses.

FACULTYFAX

A department devoted to the problem of acquainting our student body and other readers of THE TECHNICIAN with our faculty.—E. G. MOORE.

DR. CARL C. TAYLOR

Carl C. Taylor was born on a farm in Shelby County, Iowa. He attended the elementary rural schools and at the age of 19 entered Eureka College at Eureka, Illinois. Here he did his preparatory work for college. In 1921 he received his A.B. degree from Drake University, at Des Moines, Iowa. After graduation he spent two years in the University of Texas as an instructor in public speaking. The summer of 1912 found him a graduate student at the University of Missouri. The next summer he spent at Columbia University. In June, 1914, he was awarded his master's degree from the University of Texas. Following this, he spent another year teaching at the University of Missouri. During the summer of 1916 he held a teaching fellowship at the University of Chicago. In the fall he went back to the University of Missouri. Here, the following spring, he received his Ph.D. degree. He taught at Missouri until the fall of 1921 when he came to State College as professor of Sociology which position he held until the reorganization in 1923. At this time he was made dean of the graduate school. Dr. Taylor is also chairman of the faculty council and acts as president in the absence of Dr. Brooks. He is also chairman of the faculty athletic committee.

Since coming to State College Dr. Taylor has been one of the most versatile figures here. He has taught students ranging all the way from freshmen to graduates. He has coached an athletic team, directed Bible study courses, organized the Cosmopolitan and the Commercial clubs, besides many other activities too numerous to mention. During the early days of student government he was one of its most outspoken champions. In addition to his work at the college he has taken an active interest in the civic life of Raleigh. Dr. Taylor is now a member of the executive committee of the Country Life Association of America.

Mr. I. O. Schaub, director of extension, has recently been made secretary of the National Association of Land Grant Colleges.

Dr. C. C. Taylor attended the meeting of the American Country Life Association at Columbus, Ohio, November 7 to 11, where he took an active part in the proceedings.

Mr. W. L. Mayer attended the meeting of the American Association for the Advancement of Agricultural Teaching, held in connection with the Land Grant College Association, last week in Washington.

Mr. Earl H. Hosteller will attend the International Livestock Exposition in Chicago next week.

HAWAIIAN CLUB GUESTS OF RALEIGH ROTARIANS

The members of the North Carolina State College Hawaiian Club were the guests of the Raleigh Rotarians Monday afternoon at their luncheon held at the Sir Walter Hotel.

Mrs. Roy Dearstyne sang two very pretty solos while Mrs. F. W. Staudt accompanied her at the piano. Three Boy Scouts made short and interesting talks. Then the Hawaiian Club "opened up."

The club consists of two Hawaiian guitar players, W. A. Hays and L. S. Ford; three guitar players, E. D. Wilder, C. J. Goodman and R. D. Bonnet; two ukulele players, D. R. Pace and G. P. Stout.

Coaching is a subject now included in the curriculum of Ohio State University. This department will be presided over by Don Peden who is reported to be one of the best athletes ever developed at the University of Illinois.

State Apple Judging Team Wins Honors at Atlantic City

(Continued from page 1)

was a very interesting talk and also very beneficial.

Professor J. C. Blair, of the University of Illinois, also gave interesting and educational facts about horticulture in Illinois.

The next speaker on the program was a distinguished horticulturist from Ottawa, Canada, who gave the audience the conditions that the fruit growers of Canada had to contend with and how they had been overcome.

Professor C. D. Matthews, State horticulturist of North Carolina, gave some very good ideas as to advertising the apple and its products to the buyer. He stressed the idea of putting on an "Eat More Fruit Campaign" by the growers of the various sections of the country; something similar to what California has done in the past five years.

The last speaker of the evening was Mr. Paul O. Sampson, one of America's foremost food experts. He stressed the importance of eating apples for health and other reasons.

With these interesting lectures the program was concluded and the mem-

bers of the team met several of the leading horticulturists, among whom was Professor C. P. Close, U. S. Pomologist, Washington, D. C.

The different exhibits in the Steel Pier were well worth the time that was spent in looking them over. There were displays of sweet and Irish potatoes, many varieties of beautiful apples, wonderful flowers, which will only grow in the fine New Jersey soil, and then the display of vegetables

which represented the truck growers display of the State of New Jersey. The students who were members of the team report that they had a wonderful time—being both very pleasant and instructive. The only regret they say they have is, they will not be eligible to try for the team again next year.

A Memo for Roads Scholars

THERE will always be engineers who will be attracted by every novelty, anxious to try every new experiment. Let them gamble, if they wish, with their reputations—play safe with your own.

When you come to your first paving project, advocate brick, specify brick, pave with brick and continue to do so—then you'll never have a skeleton in your paving closet. Remember this—no vitrified brick pavement ever wore out from the top down. Get your sub-construction right, surface it with brick and don't worry. (You won't need to.)

Wake Forest Prepares For The State Game

Martin of "Old Gold and Black" Prophecies Hard-Fought Game

By Z. Edward Martin.
Wake Forest, Nov. 17.—With all other foes vanquished and N. C. State the only remaining obstacle between Wake Forest and the coveted goal of state honors in North Carolina, Coach Garrity is ironing out all the rough spots in his team of Demon Deacons, and preparing to put the best team Wake Forest has ever had in the fray with the Technicians next Saturday.

The game with Trinity on Armistice Day showed the Deacons up the best they have looked this year. The most highly optimistic Wake Forest supporter had not hoped to whip the fighting Blue Devils by more than two touchdowns. However, Trinity did not put up the opposition they were doped to show and the 32-0 score gives a pretty good comparison of the two teams as they appeared that day. It is true that the Deacons took advantage of every break in the game, but that all goes with football.

Unless some injuries are sustained in scrimmage this week the Garrity men will all be in good shape for the crucial game with State. None of the regulars played more than a third of the game with Elon last Saturday and every man that starts the game against State will have the advantage of two weeks rest. Clyde Jones, who was hurt in the Washington and Lee game, stayed in practically all the Trinity contest. Armstrong's knee is again in good shape after having given him trouble all the first part of the season. Greason has been given all the rest possible since he received the injury to his nose in the Washington and Lee game. He is in the best shape he has been in since the Carolina game the beginning of the season.

The line-up that will start against State will in all probability be the same that started against Trinity on Armistice Day. The only changes at all probable will be Collier for Ellerbe and Daniels for Pegano. Ellerbe has not been in the best shape for several weeks and Pegano has had class work that has taken practically all his time during the entire fall. He has not been out for practice regularly for several weeks.

Since the defeat of V. P. I. by State, the two teams are comparatively evenly matched. Up to this game Wake Forest supporters had thought the Deacons would have an easy time with the Tech lads, but the Wolfpack showed some of their old-time form and fight in this contest and it is now a certainty that the Wake Forest team will meet stronger opposition than it has met in the state when it runs up against the N. C. State eleven in Raleigh Saturday.

Following is the list of men Garrity will take to Raleigh, their weight, and number of years on team:

Name	Pos.	Yrs.	on team	Wt.
Pegano	E.	3	170	
Riley	E.	2	162	
Daniels	E.	2	170	
Hood	E.	2	158	
Moran	T.	2	187	
Ellerbe	T.	2	189	
Collier	T.	3	179	
Presslar	T.	2	177	
Person	T.	2	185	
Johnson	G.	4	195	
Lentz	G.	4	190	
Jones	G.	3	175	
Caudle	G.	2	176	
Emmerson	C.	2	180	
Harris	C.	3	184	
Reitzel	H.	4	170	
Rackley	Q.	2	150	
Ellington	Q.	2	158	
Karleskint	F. B.	2	170	
Sykes	F. B.	2	168	
Greason	H.	3	140	
Armstrong	H.	4	168	
Vickers	H.	2	148	
Meekins	H.	2	162	
Ober	H.	2	166	

Greek philologist will have new letters of the alphabet to worry about. At the University of Kansas, the Dambda Phi Care, the Dambda Phi Data, and the Dambda Phis are three chapters of new Greek letter organizations that have banded together.

SPORT COMMENT

We are endeavoring in this column to give the gist of Campus opinion about sports. Because of man's inherent narrow-mindedness and conceit it is most probably our own personal opinion that we're actually giving. We hope not.
THE SPORT EDITOR.

MARYLAND AND THE WEATHER MAN apparently framed up on the Wolfpack last Saturday.
—N.C.S.—

THE WASHINGTON POST last Sunday said State would have whipped Maryland on a fair day and a dry field. Maryland was praised for keeping the Wolfpack from scoring as it was. 'Atta boy, Washington, you know your stuff!
—N.C.S.—

THE OLD GOLD AND BLACK, of Wake Forest, states that "State may put up a hard fight Saturday." They've got the right idea—our version of that would be like this: State may have to extend itself to win Saturday.
—N.C.S.—

WE'RE NOT UNDERESTIMATING the Deacons' strength—nor are we underestimating the Wolfpack's strength. We prophesy a Wolfpack win.
—N.C.S.—

CAPTAIN JACK McDOWELL and his team-mates clearly outplayed the Young Deacons last Saturday and deserved to win. Hard luck, Jack. Better luck next time.
—N.C.S.—

THE CINDER 'PACK DID ITS STUFF Saturday by leading the Wake Forest cross-country team home. They look good for championship again this year.
—N.C.S.—

BOTH CAROLINA AND DAVIDSON are to be congratulated on last Saturday's game. It's too bad only one could win.
—N.C.S.—

BUNN HACKNEY, OVER AT CAROLINA, seems to have the educated toe in this neck of the woods.
—N.C.S.—

RED GRANGE IS OUT FOR THE REST of the season. Hard luck, Red, you deserve your much-coveted "all-American fullback" again this year.
—N.C.S.—

WALTER JOHNSON HAS BOUGHT himself a baseball club. We hate to see you go, Walter, but best o' luck to you!
—N.C.S.—

IN THE HIGH SCHOOL CHAMPIONSHIP RACE it is interesting to note the close scores, to say nothing of extra periods.
—N.C.S.—

AND THEN COMES WASHINGTON AND LEE! Well—V. P. I. hadn't lost to a Conference team before, either. Then, too, look at this: Wake Forest 10-Washington and Lee 8; V. P. I. 0-Washington and Lee 0. Come on, Generals.
—N.C.S.—

Results Of The High School Championship

Eight Teams Are Now in Race—Three in the East, Five in the West

Rockingham won one of the most important games of the season when she defeated the strong Sanford team Friday by the score of 3 to 0.

Chapel Hill was defeated by Durham 10 to 7 in a very closely contested game at Chapel Hill Friday. It being necessary to play an extra quarter as the score at the end of the fourth quarter was 7 to 7.

Wilmington and Rocky Mount battled to a scoreless tie at Wilmington for five periods. The tie was played off at Goldsboro Monday, with the result that Rocky Mount was eliminated by a score of 3 to 0.

New Bern had an easy victory over Mount Olive, defeating them 33 to 0.

High Point eliminated Greensboro in a hotly contested battle by a score of 14 to 13. This victory determined the winner in the first zone of the Western division of the State.

Charlotte eliminated Winston-Salem at Charlotte by a score of 23 to 6. Mount Holly was defeated by Shelby to the tune of 30 to 0.

Salisbury was eliminated by Spencer; the score being 13 to 0.

There are now only eight teams left in the race. In the East these are New Bern, Wilmington and Rockingham, and Charlotte, Shelby, High Point and Spencer in the West.

It might be interesting to note that one of the games played Friday went

five periods with the result of a 0-0 tie. In the Durham-Chapel Hill game when the fourth quarter ended the score was 7-7. All the teams eliminated put up a strong fight and allowed no extra large score to be piled up on them. The high schools are following in the foot-steps of the colleges this year in that more field goals have been scored than were before.

RALEIGH HIGH SCHOOL IS DEFEATED AGAIN

Raleigh High was defeated by Henderson Friday 6 to 0. Although she was eliminated from the championship race by Durham, the coach states she will continue to play the rest of the season for the practice it will afford. This practice will help the Purple Hurricane to come back strong next year.

Sixty-eight students, including 26 men and 42 women were elected to membership in the Phi Beta Kappa, national scholarship fraternity, at the University of California this term.

N. C. INTERCOLLEGIATE FOOTBALL

Team	To Date	Won	Lost	Tied
Wake Forest	4	0	0
Carolina	3	1	0
N. C. State	1	1	1
Davidson	1	1	1
Trinity	2	3	0
Lenoir-Rhyne	1	1	0
Elon	0	2	0
Guilford	0	3	0

STATE PREPARES FOR LAST GAMES

Wake Forest and Washington and Lee Are Last Two Obstacles

With the game with the strong Maryland team out of the way the Wolfpack this week has been preparing for the last two games of the year—the one with Wake Forest on November 22 and the Turkey Day game with the Generals from Washington and Lee.

The Wake Forest game will be perhaps the hardest fought game of the season. The Wolfpack at the beginning of the season and in fact up until the V. P. I. game showed very little promise. Three weeks ago Wake Forest would have been doped to win over the Wolfpack by about 2 or 3 touchdowns. However, as Coach Shaw promised, the Wolfpack has been gradually shaping up and now their supporters are claiming that the Wolfpack is the strongest team in the State.

However, Wake Forest supporters claim that the Demon Deacons will turn in another victory next Saturday. This little dispute will be settled for good and all Saturday afternoon on Riddick Field. This year Wake Forest has been in the habit of turning in a victory each Saturday. Each team is confident of a victory Saturday and it will only be with a great struggle that either one wins.

Each team is in the best shape that they have been since the opening of the season. All the first string men of each team were in shape to play in the last games and no one was hurt in either of these games.

The Thanksgiving Day game will have a direct bearing on the Southern Conference honors. Washington and Lee, Georgia and Alabama are the only Southern Conference teams that have been undefeated this year. Georgia and Alabama play on Thanksgiving, which will definitely eliminate one of these teams, and should

Davidson Is Stopped By N. C. University

Carolina Helps to Untangle State Championship Puzzle; Wake Forest and Trinity Win

Last week served to clear the air for the most important game of the North Carolina football season. Namely the game between the Wolfpack and the Demon Deacons.

Carolina helped untangle things by definitely putting Davidson out of the race. Determined to shatter the proud boast of Davidson of not a defeat on their home field for ten years, the Tar Heels journeyed to Davidson last Saturday with a determination to do or die. They did. After three scoreless periods the nimble toe of Hackney did the dirty work in placing two field goals through the uprights. The playing of Merritt and Hackney featured the game.

Trinity was too much for the Wolford Terriers and sent them back to South Carolina smarting under a 12 to 0 defeat.

Wake Forest had their easiest game of the year with Elon. Practically all the varsity had a day of rest. The substitutes playing most of the game and winning to a tune of 41 to 0.

The other games of interest were the Freshmen games. The young Deacons defeated the Wolf Cubs 7-6 after completing a 50-yard forward pass for a touchdown. The Carolina and Virginia freshmen battled to a scoreless tie.

The Trinity-Wofford and the Carolina-Davidson results show that the Thanksgiving clash between Davidson and Trinity ought to be mighty close. The eleven that gets the breaks ought to win.

State defeat Washington and Lee, that would eliminate them. Washington and Lee will fight to keep their record clean and the Wolfpack is determined not to lose another game this season.

These next two games are causing widespread interest and should draw very large crowds.

N. C. STATE'S FOOTBALL RECORD

J. H. Jenkins Talks On Associated Press

Member of the Associated Press
Speaks to State College Class
in Journalism

Mr. J. H. Jenkins, who is manager of the Charlotte office of the Associated Press, at the request of Professor Robertson, spoke to a class in journalism Thursday morning, November 13, on the phases and operations of the Associated Press.

Mr. Jenkins first took up the organization of the association.

"As its name implies," stated Mr. Jenkins, "it is a co-operative organization of newspapers."

The idea of the cooperative association was originated by a number of daily writers who use to get together to exchange news items. This small body of men has grown into an organization of over 2,000 paid employees, 1,000 of which are telegraph operators. The association is made up of 13,000 newspapers. There is no capital stock and no dividends. Before a man is taken on as an employee he must have had quite a number of years of newspaper experience.

Mr. Jenkins also stated that this section of the country had the only strictly football circuit for the transmission of the results of the games played during the day. Mr. A. L. News introduced the idea at the Press meeting last September. The circuit includes the following cities: Baltimore, Md., Washington, D. C., Richmond and Norfolk, Va., Asheville, Charlotte, Greensboro, and Raleigh, N. C., Columbia, S. C., Atlanta and Savannah, Ga., Tampa and St. Petersburg, Fla.

Order of Importance in Which News Is Rated

First: Flash form is the quickest news we have. Usually it consists of not more than ten words.

Second: The bulletin form always follows the flash and does not contain over fifty words. (Football scores are bulletin news.)

Third: Market reports come next, giving the latest quotations on stocks, bonds, livestock, grain, etc.

Fourth: Routine reports of today's games, etc.

Fifth: General news. "The main job," Mr. Jenkins said, "is to cover news promptly and accurately and to get it into a publishable form." Getting news in a hurry is a big factor of the Associated Press. Every detail of any extraordinary happening, such as a fire, storm, or flood, is thoroughly covered and in the least time possible.

Mr. Jenkins also told the members of the class how, as county agents, engineers and State workers, they could be able to help by getting the news of meetings and happenings to an Associated Press man. Also he told the students to never try to keep the details of an accident from newspaper men—to always give an accurate account of happenings. Failure

to do this may be the cause of inaccuracy in the publication of the truth.

State and Maryland Battle to a 0-0 Tie

(Continued from page 1)

Third Period.—Lassiter opened the third period by a kickoff to Maryland's ten-yard line. Beasley carried the ball to the ten-yard line. State was penalized five yards. Osborne then broke through the line for a pretty run, but Logan downed him neatly in the middle of the field. Heine punted to State's ten-yard line. Ripple's punt was blocked, but Cox recovered the ball. Maryland was penalized fifteen yards, and then lost twenty-five more by a fumble. Alternate punts followed till Maryland had the ball in midfield. Beasley then broke through the line for a twenty-five-yard run on the fourth down. Pugh made ten yards and followed it by a two-yard gain, but Cox threw Beasley for a loss. Beasley fumbled and Donnell recovered for State. Ripple punted and Beasley again fumbled, losing twenty yards. Maryland punted over the goal line and State took the ball on the twenty-yard line. Lassiter and Johnston carried the ball fifteen yards for a first down.

Fourth Period.—State opened the fourth period by a series of line plunges but Maryland held, so Ripple was forced to punt. Heine returned the punt to midfield and Johnston ran five yards. Shuford and Lassiter hit the line for nine yards, but Johnston fumbled and Maryland recovered the ball. Heine punted, and Shuford made eight yards, but Johnston fumbled again and Maryland recovered. In attempted end runs the Old Liners were thrown for heavy losses by Ripple and Cox. Heine fumbled and Lassiter recovered. Ripple punted and Pugh ran for ten yards, but Heine was soon forced to kick. State completed two passes, Johnston to Shuford and Lassiter to Wallis, but failed on line plunges. Ripple kicked and Pugh gained forty yards in two downs, but Beasley fumbled and Beatty recovered. Lassiter fumbled and Maryland recovered. Hall tried two drop kicks from the thirty-five-yard line but failed in both. The whistle blew as he made his third attempt.

Lineup		
N. C. State		Maryland
Wallis	Left End	Supples
Cox	Left Tackle	Bromley
P. Beatty	Left Guard	Bennet
F. Logan	Center	Lewis
White	Right Guard	Hough
G. Logan	Right Tackle	Burger
Ripple	Right End	W. Beatty
Jeannette	Quarterback	Heine
Johnston	Left Halfback	Pugh
W. Shuford	Right Halfback	Beasley
Lassiter	Fullback	Hall

At Wellesley College a course is offered which deals with "Husbands' Relations"—a course in love and marriage. Many students on our campus are in favor of having a similar course installed here which deals only with the love of flappers.

Alumni Notes

Observations & Communications
of Zippy Mack

Don't you think this cool, snappy weather would make a perfectly good setting for a football victory? And a nice little parade and everything?

Shorty Lawrence's football aggression from Rockingham won a most important football game Saturday when they defeated the Sanford crew. This places the Rockingham High in a handsome position for the State championship race. We're pulling for you, Shorty.

T. O. Evans, Jr., last year's Technician Business Manager, was on the campus last week-end. He brought back a good many of his old memories by attending the Stunt Night exercises at Meredith. "Toe" is doing the safe thing by staying in business at his home in Maxton.

C. L. Walton, of the '24 Vocationals, made us a visit the other day. "Shorty" is teaching at Churchland High School, near Linwood, N. C.

H. B. ("Ike") Summerel, of the Textile boys of '24, was among the week-end visitors. Ike is doing his stuff in one of the Burlington mills, where he has as his companion Ray Harden, of the same class.

If the confession magazines had been printed in the long ago, we might have read:

THE AG. CLUB HEARS AN INTERESTING SPEAKER

"We will not be dominated" is what started the co-operative movement in America, said B. W. Gause, of California, speaking on the subject of "Co-operation and Its Relation to Agriculture" to the members of the Agriculture Club Tuesday evening at 6:30 in Patterson Hall. The speaker spoke for an hour and a quarter telling of the early history of co-operative marketing and answering questions pertaining to it. The speaker outlined the difference between autocrats and democrats in the industrial life.

Mr. Gause, in his account of the settlement of California, told of the movement westward of the American

people. And how these people finally reached California and there settled down and started the "Worlds Fruit Co-operative Marketing Association."

According to Mr. Gause, the co-operative plan is the best plan in that it does not allow any one to become a millionaire at the expense of the rest. The reason why our marketing plan in the East has not been successful as in the West is because the people do not think for themselves; do not help attend to the business of the as-

sociation; and just take it for granted that things are going all right.

Mr. Gause was one of the best speakers the Club has had this fall, and all the members seemed to be very much interested in the subject of marketing and showed much interest in the speaker's subject matter.

Auburn University has more alumni engineers in the Westinghouse Engineering School than any other college in the United States.

Meeting Of Registrars Is Held At N. C. C. W.

Ways of Handling the New Students' Credits Discussed Fully

The second annual meeting of the North Carolina Registrars' Association met at the North Carolina College for Women on the 14th and 15th of November. The officers of this association are Dr. T. J. Wilson of Chapel Hill, president, and Miss Mary Taylor Moore of the North Carolina College for Women, secretary. The colleges represented were the University of North Carolina, North Carolina College for Women, North Carolina State College, Wake Forest College, Salem College, Greensboro College for Women, Lenoir College, St. Mary's School, Peace Institute, Guilford College, Lenoir College, Teachers College at Greenville, N. C., Mars Hill College.

There were three meetings, one on

Friday afternoon, another in the evening and a third meeting on Saturday morning. The first meeting consisted of a discussion of the proper sequence of registration on the opening days.

The afternoon meeting was devoted to a discussion of the value of intelligence tests in classifying new students. This discussion was led by Dr. J. A. Highsmith of the Department of Education in the North Carolina College for Women. Doctor Highsmith's discussion from records kept for several years showed a very high efficiency in these tests, far above the entrance certificates which come in from the high schools. This was not a plan for determining the fitness of students to enter college, although that was mentioned as a possible method and discussed briefly.

That method, as but few will know, was used here this fall under the direction of Professor Meyer, and seems to supplement the entrance certificates very well. Its use in our college, so far, has been among the freshmen, soon after their entrance, and the records of its efficiency will not be complete enough to form any conclusion for two or three years.

Dr. Highsmith showed a very striking agreement between the students' intelligence tests, taken the freshman year, with their later four-year record, as regards their natural ability to carry on college work.

The final number on the program was the discussion of unaccredited high schools in the state. At present, the list of schools not on the accredited list is relatively very small. There are two lists, one prepared by the State Department of Education under the direction of Dr. J. Henry Highsmith, and another by the Southern Association of College Executives. The Southern list is somewhat larger than the list prepared by the State Department, but under the contract which was accepted for four years, the colleges after the fall of 1925 are to adhere to the state list, rather than to the Southern list.

The meeting of registrars adjourned about 12 o'clock on Saturday, after re-electing all of the old officers and discussing the place of meeting for the next term. It seems now probable that Meredith College may be selected for the next meeting.

Lyceum Number Saturday

Saturday evening at eight o'clock the second number of the regular college four number Lyceum course will be presented at Pullen Hall.

This number will be Richmond's Little Symphony Orchestra which will render good music of every sort Saturday evening before the students and any of Raleigh's good people who care to come out. Our Lyceum numbers are always good and no admittance is charged, everyone who will come being welcome.

Alpha Zeta Holds Fall Initiation

The North Carolina Chapter of Alpha Zeta, National Honorary Agricultural Fraternity, held its Fall Initiation November 13, 1924. At this time G. F. Seymour, E. G. Moore, and J. E. Foster were initiated. The night of the 12th the members enjoyed a feed over on AG. Hill, and November 13th, the new men were taken in.

New Club Launched At N. C. State College

National Rifle Association Club is Latest Addition to List of College Clubs

A new phase of sport has recently been inaugurated by the Military Department, consisting of pistol and small bore rifle shooting. A club, known as the N. C. State Rifle Club, was organized last Monday afternoon and is enrolled as an affiliated organization of the College Class, National Rifle Association of America. By reason of being a member of the National Association individual members are thereby enabled to win for themselves certain medals and qualification badges for proficiency in pistol and rifle marksmanship. In addition to twenty-four individual matches there will be eight team matches during the year 1924-1925 for which highly prized trophies and cups are awarded the winners.

All college students and faculty members are eligible for membership in this club. Those who join before 4 o'clock Monday afternoon, November 24, will be allowed to enter as charter members. It is expected that at least 50 students and 12 to 18 faculty will make application for membership. Faculty members are not allowed to compete for medals or qualification in the National Association but will take part in matches within the club.

The Military Department will pay the annual dues of the club. Membership dues within the club are one dollar per year and fifty cents initiation fee. It is a distinct advantage to those desiring to join that they make application before next Monday afternoon in order to avoid the initiation and the accompanying fee.

Members competing in individual matches will pay their own entry fees which are one dollar per entry. Fees for team entries in all matches will be paid from the club treasury.

Rifles and ammunition will, at present, be furnished free by the

Military Department.

The following are the officers of the club:

- President, J. J. Wright.
- Vice-President, B. L. Black.
- Secretary, J. E. Griffith.
- Treasurer, J. C. Powell.
- Executive Officer, C. R. Jones.

Application for membership will be made to the Secretary who will be found at the Y. M. C. A. or 127 South Dormitory when not on class. Annual dues will be paid at time of making application.

Tompkins Textile Society Meets

The Tompkins Textile Society met last Tuesday evening. The meeting was marked by a larger attendance than usual. The discussion of several important present day textile subjects featured the evening's program.

Mr. F. E. Plummer gave a very interesting discussion of "Designs." He brought out their rising importance to all connected with the textile trade. He also gave a very good origin of several prominent fabrics, and the origins of their names.

Mr. Tom White gave a very interesting discussion on "The Spinning Value of Cotton." The different

kinds of cotton grown were discussed along with the best way to spin in order to make them most valuable.

Professor Nelson closed the program by giving a very interesting discussion of the importance of antique fabrics and the inspiration they offer for deriving new designs.

POULTRY SCIENCE CLUB

Some students may wonder just what is the function of the Poultry Science Club and in the way of explanation I will try to explain its work. The Poultry Science Club is made up of men who are interested in the production of poultry in a scientific way. These men discuss problems that face the poultryman on his farm, such as feeding, housing, and caring for the flock in general. The latest scientific facts are presented and a study of their application to poultry practices is made. In other words the club deals with the work of the Poultry Department which works with all phases of the poultry industry. The program committees tries to give subjects on which the student can get ample material. The club is open to membership to any student on the campus who is interested in the poultry industry and is

not restricted to those men who are specializing in Poultry Science. The regular bi-monthly meeting was held November 6, 1924, at 6:30 p. m. After the business of the meeting had been carried out the following program was given: "The Best Poultry Story I Ever Heard," By J. B. Holloway. "Feeding For Winter Egg Production," by L. M. Green. "The Baby Chick Business," By G. L. Floyd. "How to Double Our Billion Dollar Poultry Business," by C. E. Glenn. After the above program was carried out the meeting adjourned to meet again November 20, 1924. "Guess I'll leave you now?" said the biscuit on being pulled out of the oven. "You'd better go now," retorted the oven, "after the hot time we had together."

**Leazar Society Wins
Declamation Contest**

**H. M. Ray Wins Laurels and
Brings to Leazarites Their
Fifth Consecutive Victory**

H. M. ("Diddy") Ray, of Leazar Literary Society, was declared the best speaker in the annual inter-society declamation contest Friday

H. M. RAY, Leazar

night, when, using the theme, "The Rough Riders," by Harry Emerson Fosdick, he met and defeated his fellow-Leazarite and the strong aggregation from Pullen Literary Society. The old story of the fusion of the hitherto divided elements of the Nation in the Spanish-American War under the leadership of the master Rough Rider, Theodore Roosevelt, seemed to live anew in the colorful and excellently delivered speech of Ray. His frequent characterization of the Rough Riders as being "made of the stuff that makes America" was at once an inspiration and a challenge to present-day Americans.

J. M. Potter, veteran orator of Pullen Literary Society, was designated as holder of the second place for honors. He chose as his theme "Abraham Lincoln," by Henry Waterson. The other contestants were Messrs. R. E. Winchester, of Pullen Literary Society, who used as his subject "Sparticus to the Gladiators," by E. E. Kellogg, and R. E. Reel, of Leazar Literary Society, with the theme, "The Nation's Need of Men," by David Starr Jordan.

The committee of judges was composed of Professors Wilson and Clarke, of the English Department, and Robertson of the Journalism Department.

An Acknowledgment

The Editor of the Technician.
Dear Sir:

I wish to make the following acknowledgement: Several weeks ago there appeared in the Technician an announcement concerning a short course to be given by myself and my colleague on the subject of "Legging and Grade-Getting" and since then here has appeared an ad in which I made known the fact that I was searching for a sponsor for our Y. M. C. A. The first ad was answered by innumerable Freshmen, not to mention numbers of Sophomores and Juniors who applied for aid. The second ad brought greater returns than the first. On one mail I received nine letters from young ladies desiring to be the lucky ones. Other mails have also had their burdens of letters from ardent admirers of mine who, immediately upon reading my ad wrote to me offering their services. This acknowledgement is unsolicited and given of my own will. I just want to let the world know that your ads do bring the best of results.

Yours very truly,
LEROY ARGUS BROTHERS,
President of the Y. M. C. A.

Sandhill Club Has Initiation

Last Monday night in Page Hall the Sandhill Club held an initiation for new members. Those initiated were: John Currie, E. P. McCaskill, C. P. Fry, R. E. Leslie, W. D. McGill, J. E. Hendron, W. P. Phillips, E. J. Barnes, and J. C. Ferguson.

The motto of the club is "Raising Sand." One Freshman said immediately after the initiation the words are inadequate for the treatment I received, but I enjoyed it.

The officers of the club for the fall term are: H. W. Steel, president; B. H. Butler, Jr., secretary, and N. M. Smith, treasurer. The meetings are held every two weeks with a definite program carried out.

Are our representatives at State College. Theirs is a two-fold purpose: First, to make available to all students the service of Pilot Insurance. Second, as our agents they are the proprietors of their own business, the remuneration from which assists them in defraying their school expenses.

There are several advantages, not encumbrances, in investing in insurance while you are at college age—advantages which our representatives will be glad to explain to you in detail.

Traction Tom Says:

"I'm Proud of My Job
on the Cars"

Dear Folks:—With all due modesty, I want to say that it isn't every man who can run an electric car.

Every day some of the men who apply for jobs as carmen fail to pass the examination. Our company is mighty careful as to the kind of man it employs.

First, he must possess good health. A sick man, or one with poor eyesight, or other ailment, cannot be trusted with the safety of you and your children.

Second, he must be honest. Both for the protection of you and the company.

Finally, he must have ability as a salesman. Particularly ability to get along with folks. A crab has no more business trying to sell rides than he has trying to sell taffeta, sugar, or kiddie kars.

Haven't I reason, then, to be proud of my buddies, the work they do, and their jobs?

—I thank you.

Traction Tom

Civil Engineering Society Has Meeting

Joint Meetings of C.E. and E.E. Societies a Probability of the Future

State College Chapter of the American Society of Civil Engineering held its regular meeting Tuesday, November 18th, at 6:30 P.M. President Bremer presided while a very interesting program was rendered.

Mr. L. C. Dillard, who was first on the program, explained to the society how the experiment station at North Carolina State is finding the resistance or friction caused by the different types of roads. He also described very thoroughly the contrivance used in making these experiments. Mr. Dillard's subject was very interesting and well delivered.

Mr. P. L. Welch next told us in a short talk some of the hardships in building a dam in Canada in the winter, and how these hardships may be overcome.

Last, but not least, on the program was Mr. I. J. Tucker, who gave a humorous oration and such an oration as Irene only can give.

Mr. Brothers, who was chairman of the committee selected to find out what was wrong with the C.E. Society and how to remedy it, next made his report. The committee finds that the chief trouble is lack of interest among the members themselves. They could find nothing wrong with either the officers or the program committee. The remedy for the trouble is, the boys must take more interest in the society and the work it is doing, and attend the meetings, which are on the first and third Tuesdays of each month.

Mr. K. W. Reece, who was chairman of the committee which met with a committee from the A.I.E.E. for the purpose of learning their attitude toward the idea of having joint meetings of the two societies on nights that either of the societies have a good speaker of practical experience on the program. The committee decided that it was a very good idea and would be beneficial to both societies. The E.E.'s are willing to co-operate in every way they can with our society to put this idea across.

It is time for the Engineering students to start thinking about the Engineering Show for next spring, as we want to make this one of the best ever.

Get Our Terms on Victrolas

We have a plan by which hundreds who felt they "couldn't afford" the best Talking Machine made,—a Victrola, are now enjoying its unequalled variety of entertainment. This plan makes it so easy to own your Victrola, it almost seems you can't afford not to have one. Come in and choose the Victrola you want.

We will deliver it the same day.

PERSONAL and SOCIAL NEWS

(All social and personal news turned in THE TECHNICIAN office will be appreciated by the editor.)

G. F. Seymour, E. G. Moore and J. E. Foster were initiated into the North Carolina chapter of Alpha Zeta Fraternity November 13.

G. L. Uzzle, C. E. Shelton and "Bill" Frazier motored to Louisburg last Sunday afternoon.

Dr. E. C. Brooks, Professor Greaves-Walker, ceramic engineer, and Dr. Clarence Poe, editor of the Progressive Farmer, spent the week-end in Moore County looking over the pottery and other ceramic industries there.

The Agricultural Club held its annual fall reception Saturday night in Patterson Hall.

The German Club gave its fourth dance of the term at the Woman's Club on Friday night.

There will be a Wake Forest-State dance at the Auditorium Saturday night after the State-Wake Forest game.

Mal Faley attended the Sanford-

Rockingham game at Pinehurst. After which he spent the week-end at his home in Aberdeen.

R. D. Beam, V. W. Smith, and D. J. DeVane, spent Saturday night in Wake Forest.

The girls of the Asheville high school recently voted "not to primp in public," either at school or outside of school. How long will it last?

Miss Nell Battle Lewis Addresses Journalism Class

A lecture on newspaper and literary style given by Miss Nell Lewis, who is connected with the News and Observer, Tuesday morning in Ricks Hall put Journalism students at State College in a thinking mood.

Through the diplomacy of Professor Robertson in selecting an able speaker, the students of journalism had the pleasure of listening, for one hour, to a discussion of literary and newspaper style and the columnist. Stress was also laid on the practice in writing as being essential to become a good writer.

Newspaper style, according to Miss Lewis, is characterized by simplicity, clarity, accuracy, force, movement and beauty. Each were taken up and discussed in detail. While all play their respective parts in newspaper style, simplicity and selection of words were elaborated on as being extremely important.

A columnist was defined as one who writes columns of personal news

in daily newspapers. He must be personal, informal and humorous. The columnist became active when the editorial page failed to supply adequate personality. His chief purpose is to fill in the personality lacking in the editorials.

When the hour was gone Miss Lewis was just in the heart of her discussion and was asked to come again and continue the lecture.

All of the students unconsciously showed their appreciation of the mes-

sage by the appearance of a peculiar stare when the whistle blew. The facial expressions seemed to say, "Why did he blow the whistle in the middle of the class period."

Centers and Quarterbacks

A GOOD basketball center or football quarterback knows more than the resources of his team. He knows what resources to call upon at decisive moments. To him, the condition of his opponents, their weight and style of play, the time left to go—all dictate a strategy, which he follows.

There is in industry a group of engineers whose position resembles that of field general. They keep their eyes continuously upon all fields of human activity. They observe how each is affected by changing economic situations. They calculate what demands the future will make upon each. Then they bring to its aid new discoveries and beneficial methods.

In 1886, George Westinghouse saw that industrial growth could not be furthered by direct current alone. The "game" required a new style of play. So when the rudiments of a transformer came along—

opening the way for alternating current, Westinghouse adopted both, perfected them, and paved the way for the electrical era of the present time.

In an organization like Westinghouse, these "quarterbacks of industry" are called "application engineers". They are mechanical and electrical engineers who apply the forces of electricity to every variety of human need.

Westinghouse application engineers first applied motors to the steel industry, the textile industry, the automobile industry. They introduced electricity to railroads and ships. They developed it for heating purposes.

Application engineers are needed in industry—they fill an important and expanding place. Westinghouse service to industry starts with their efforts.

Westinghouse
