Debaters Selected To Meet V.P.I. and V.M.I.

Freshman H. H. Rogers Wins a Place on the Debating Team

The personnel of the debate teams which will represent State College in the triangular contest with V. P. I. and V. M. I. on March 23 is as follows:

Affirmative (to meet V. P. I. in Raleigh)—E. G. Moore of Pullen Literary Society and R. J. Peeler of Leazar Literary Society.

Negative (to meet V. M. I. at Lexington, Va.)—R. R. Fountain of Leazar and H. H. Rogers of Pullen. Moore and Peeler are Juniors; Fountain is a Sophomore; Rogers is a Freshman.

This line-up was determined as a result of the try-outs held Thursday, February 26, in Room 21, Holladay Hall. Seven other candidates participated, as follows: J. M. Potter, H. W. Taylor, M. G. Henderson, L. V. Gogate, C. B. Brown, J. B. Britt, G. B. Cline. The committee which selected the speakers consisted of Professors Clark, Johnston and Cunningham, of the Department of English, the three members of the faculty who have been identified with the renaissance of debating at N. C. State.

Each contestant delivered a five-minute constructive speech and a three-minute rebuttal. Each of the three judges then wrote down the names of the four men whom he considered the best. There was practical unanimity of opinion, each judge having on his list three of the four men finally chosen.

Intensive work has already been begun on the proposition to be debated: "Resolved, That the Federal Government should discontinue the policy of leasing to private individuals and corporations the natural resources of the country over which it has control. This question is proving a very interesting one."

Faculty Announce Examination Dates

Make New Ruling Which Will Allow an Extra Examination to Seniors Failing

Last Saturday afternoon the Faculty met in the Y. M. C. A. auditorium to decide on the question of examinations and various other subjects interesting only to the faculty members.

It was decided to begin examinations on Friday, the thirteenth of March, in order to give the faculty a better chance to flunk several more students than they otherwise would have, for it was thought that the student would lay it on the fact that it was Friday, the 13th, rather than the fault of the professor.

Examinations are to be completed on Wednesday, the 18th. Registration Day will be Thursday, the 19th, and the third term will begin Friday, the 20th. A schedule of the examinations are to be found in another part of the paper.

A new ruling regarding senior examinations was made. Under the old system no examinations could be taken over. That is, if a student failed to make as much on the examination as he was supposed to in order to pass, he was required to take the course over in class again, but a new ruling was made Saturday and is as follows: "Any member of the present Senior Class shall be allowed one extra examination on any course in the Senior year provided he has a term average or daily average of 60 or above."

In other words, if a Senior fails on an examination he will be given another examination, but only one. This is done in order that any member of the Senior Class who happens to fail on an examination may have a chance to take another and pass off the work necessary to graduate.

RED-JERSEYED TERRORS

Top row, left to right: Davis, Daily, Luther, Sam Brown, Green. Second row: Huggins, Harry Brown, Correll, Duls, Waters. Bottom row: Manager Slate, Gresham, Dickens, Capt. Johnson, Watkins, Wray, Coach Gus Tebell.

First Annual Dance Sigma Phi Epsilon Brilliant Affair

Given in the Beautiful Virginia Dare Ballroom of the Sir Walter Hotel

The Beta, Gamma, and Delta chapters of the Sigma Phi Epsilon Fraternity on Friday night, the twenty-seventh of February, gave their first annual dance in the Virginia Dare Ballroom of the Sir Walter Hotel. The dance was one of the most brilliant fraternity dances ever given in this city.

The ballroom was decorated with banners, shields and colors of the fraternity. There were a large number of out-of-town people present. Music was furnished by the Dixie Serenaders and the dance was led by Mr. Ed Ruffy of State College and Miss Lucy Neal Carr of High Point.

The chaperones were: Dr. and Mrs. E. C. Brooks, Mr. and Mrs. Thomas Creekmore, Mr. and Mrs. Edwin Hopkinson, Mr. and Mrs. Lynn Phelps, Mr. and Mrs. Willis Smith, Dr. and Mrs. Richard Crozier, Mr. and Mrs. E. L. Cloyd, Mr. and Mrs. B. F. Brown, Mr. and Mrs. Henninger, Col. and Mrs. D. D. Gregory, Capt. and Mrs. Gibson, Mr. and Mrs. Dent Turner.

The members and others attending this dance from the State College chapter were: Ed. Ruffy, D. J. De Vane, W. O. Hay, F. S. Pridgen, Frances Carr, J. S. Neely, T. Gaines, J. P. Nowell, P. D. May, R. D. Beam, H. Webb, J. C. Thompson, V. W. Smith, A. F. Daugherty, Howard White, J. W. Guerard, Hill Carr, Harold Weaver, Frank Wooten, F. W. Hargram, and "Hub" Sullivan.

NOTICE

Mr. Parker has found it necessary to make some changes in the plans for intra-mural boxing. The plans now call for an elimination contest in each weight, instead of the inter-dormitory league, as first planned. The elimination contests begin the first week in the spring quarter, and it is hoped there will be as many as twenty-five men, at least, in each weight.

Plenty of gloves are available every afternoon and evening in the auxiliary gym during the hours of 4:00 to 6:00 and 7:00 to 9:00, respectively, for practice. The winners of the different weights will be proclaimed campus champions and will be awarded intramural boxing medals.

State Quintet Had Successful Season

Varsity Tennis Will Start Soon; Coaching To Be By Mr. Parker

Schedule Consists of 12 Matches and Two Tournaments; Monograms Will be Awarded

Varsity tennis, with a monogram as a goal and a regular coach, both for the first time in the history of the school, is to begin at once. Coach Parker definitely stated that a regular varsity monogram is to be awarded, and that the schedule calling for at least twelve matches, with several trips, has been practically completed. Practice is to begin at once.

Work has been started on the four courts now available, it being the purpose of the Athletic Department to completely resurface them. Until they are ready, regular practice will be held in the gym on Tuesdays, Thursdays, and Fridays, from 4:30 to 5:30. The field above the freshman practice field, now used as pasture, is soon to be converted into twelve first-class tennis courts.

Two meets each with Wake Forest, Duke, Carolina, and Elon, at least one with V. P. I., and the State Championship Tournament, with perhaps Southern Conference Tournament, are what the schedule calls for at present. However, it is incomplete as yet. Coach Parker, who was captain and coach, respectively, of the Springfield College Team, during his junior and senior years there, states that a man does not have to be a good tennis player at first, and that the technique of the game will be taught the individuals who come out, the same as in other varsity sports. Any man registered at State College is eligible. This includes freshmen. Coach Parker wants at least a hundred men out, beginning Tuesday, March 10th, at 4:30, in the gym.

A man went into Cohen's book store and asked: "Have you a copy of 'Who's Who and What's What,' by James K. Jerome." -Cohen replied: "No, sir; but we got 'Who is He, and What's He Got?' by Bradstreet."

N. C. State College Basketeers Startle Southern Conference

Eliminate Maryland With Ease; Accident to Captain Johnson Costs State Second Game

FIRST APPEARANCE IN CHAMPIONSHIP CONTEST

State College's Red Terrors, led by their dauntless red-headed captain, startled the Southern Conference, at Atlanta last Friday, by defeating the much-renowned Maryland team with ease by the score of 30 to 16. Maryland had already eliminated Alabama, and had also been already picked for the semi-finals, at least by sport critics present. But such was evidently not the choice of Fate, and the Techmen had an easy time with the Marylanders, making their initial entrance into a Southern Conference Championship Tournament quite a spectacular one.

After a relatively successful season, though not a very brilliant one, the State College team hardly expected to bring home the championship when they left for Atlanta. When they drew the winner of the Alabama-Maryland game, each of which teams had been pointed out as being expected to go a long way toward the top; there were frank misgivings expressed among the members of the student body. The report came home and there was much rejoicing, for State College had acquitted herself very admirably.

The game was very much like many seen on the Frank Thompson floor this season, in every department save the shooting of the State forwards, which was nothing short of brilliant. The fast-gathering five-man red wall was ever there to block the Marylanders from the danger section, they being forced to extremely

(Continued on page 6.)

Agromeck Goes To Press On Contract

Mountcastle and Beam Prove Valuable Assistants in the Strenuous Work

The Agromeck staff, by hard work and prolonged hours, have placed the entire book in the hands of the printer. The contract date was March 2d. Wednesday, Thursday, Friday, and Saturday the staff worked most of the night. On Sunday they worked from 9:00 a.m. until noon Monday, without cessation, except for hot coffee and sandwiches at intervals during the night.

The book will have four hundred and fifty pages, seven heavy deckle-edged inserts, onyx fly leaves and the standard cover. It is to be printed in black and soft tones of brown selected to harmonize with the warm color of the cover.

With careful proofreading it should meet with the approval of the students. However, the staff leaves predictions to others and merely states that it has done its best.

Special credit for assistance should be given to E. L. Mountcastle and R. D. Beam, of the Junior Class. Both worked unselfishly and unceasingly until the printer had approved every section and had accepted every piece of copy. Without the work of these two men the editor would have been in a tight place and Wray would have had a broken contract with which to contend.

The present staff plans to work with the Junior Class and render all assistance possible to the 1926 staff, when it is elected. The new staff will probably read copy and help keep an accurate check on the book as it goes through the plant of the Edwards and Broughton Printing Company. The first three hundred books should be delivered on or before May 20.

Editorials

March came in like a lion surely. Here's hoping it follows the old saying and goes out like a lamb.

There's going to be a play over at Meredith Saturday night. Just thought you might like to know.

Think how much luckier we are this year than we were last year. Last year we didn't have but two chances to make a pile of I's, but this year we have three chances. Oh, how lucky?

Didn't know we had a Glee Club at State College, did you? Well, we have. When it comes to making music Daddy Price, with his Glee Club and Concert Orchestra are in it with the very best.

Friday, the thirteenth. We are not in the least superstitious, but we would have liked for our examinations to have started on another day. One thing we can be thankful for is that we will have a legitimate excuse for flunking any exam. this term.

We welcome again the *N. C. State Agriculturist*. The staff on the Ag. publication is doing fine work this year. The only fault we can find is that the magazine does not come out often enough. Many of our good engineering friends would do well to get a copy of this magazine and look it over.

Last week there appeared an article in the Student Forum entitled, "State Students Denied the Privilege of Reading 'The Plastic Age.'" Upon looking into the matter it was found that the book had not been removed from the shelves of the library and that the book was still in circulation, and has been ever since it has been in the library.

At the time the book was called for a professor had it out reading it. If you desire to read the book, go to the library and trace it down, because we feel sure it is not the desire of the library authorities to keep State College students from reading the book and drawing their own conclusions from it.

Let us suggest that if ever anyone wants anything at the library go to the head of the library; in other words, go to Mr. Guldge, the librarian. If he refuses to allow you to have a book that is on the shelf or that has been on the shelf, then you may be justified in saying that the library authorities refused the privilege of reading as we so desired.

This year we are planning to put out an April Fool edition of THE TECHNICIAN and we want this to be the very best one that comes out. If you know of anything funny on anyone in any way connected with the college, let us have it. This edition of the paper is going to be quite democratic and we do not intend to slight anyone, not even the Faculty. The paper will be out the first week in April, so get in anything you want to be in it early.

Last Wednesday history repeated itself for the second time when Calvin Coolidge became President of the United States, having been elected for that office after having served part of the late President Harding's term.

March 4, 1905, Theodore Roosevelt became President of the United States, after having finished out the term of President McKinley. Although there have been several Vice Presidents to take the office of President, still President Coolidge and President Roosevelt were the only ones who followed up with being President on their own election by the people.

While these two men are from the same party they are as different as any two men could be and still be qualified to be the President of the United States. President Roosevelt was fiery and full of talk and speech while Coolidge believes in the old saying that "Silence is Golden." Roosevelt believed in show, while Coolidge is satisfied to lead a very simple life at the White House. Roosevelt was full of overflowing with fight, adventure, conquest, and initiative, while Coolidge is quite unassuming and willing to take the advice of men he believes to know more about government than himself.

It is hoped that beginning with March 4 the country will begin a period of growth and development. We wish President Coolidge and the new administration the greatest amount of success possible.

To Defeat Alabama Is An Honor

Montgomery, Ala.,
March 2, 1925.

MR. E. L. CLOYD,
State College,
Raleigh, N. C.

DEAR SIR:—Please convey to the proper officials and to the members of the State basketball team this message: "I congratulate you on the showing which you made in the tournament. To defeat a team which has defeated Alabama is a very great honor and no small task, for down here we recognize this team as a top-notch. On the other hand, to be defeated by Tulane is not a disgrace, as is evidenced by the final ranking of the teams."

With kind regards,
Cordially yours,
N. ERIC BELL, '06.

Picture of State College Bible Class At Pullen To Be Taken

A picture of the State College Bible Class at Pullen Memorial Church will be taken Sunday morning, March 8th. This Sunday also concludes the "Baggage-Memory" contest which has been going successfully for the past six weeks. During the past six weeks everybody has been thought of as baggage and baggage tags have been used to check each other, thus increasing the acquaintance between the members of the Sunday school. Sunday morning each individual will be given a blank note-book into which he will write the names of all people he has known to attend Pullen Memorial Sunday School during the past six weeks. Each name will count a value of two for the "route" and for the individual. The present standing of the "routes" can easily be changed by the members of each "route" writing a long list of acquaintances into the note-book. The persons belonging to the winning "route" who receive the largest personal credit will receive awards. Lewis Sporting Goods Store, 117 S. Wilmington, will furnish the award to the boy and The Gift Shop, Sir Walter Hotel, will furnish the award to the girl.

The picture to be taken is wanted for publication and it is strongly desired by the officers of the class that 100 per cent of the members and all visitors be present for the picture.

State: "What would you do if I should kiss you?"
Peace: "I'll bite."

Student Forum

Consider the Beauty of Our Campus

It was just the other day that one of the students was seen breaking a twig off one of the small trees on the campus. He had a handful of similar twigs broken from other trees and shrubs. Maybe these were not all broken from the shrubbery on the campus; at least, let's hope not. This fellow did not know or had not stopped to think what a damage he was doing to the plants; and if you want to carry it further, what damage he was doing to the college. When a twig is broken the plant is injured, in that it affects the shape and beauty of the plant; it makes the plant grow in an unnatural way, and it leaves a bad-looking place where the limb was split off. Affecting the tree or shrub in this manner also has a bad effect on the beauty of the landscape.

The beauty that is added to a landscape by trees and shrubs cannot be substituted by any other means, for there is nothing more beautiful than nature. This fact has been known for a good while and has been made use of in beautifying homes and grounds. With this fact in mind, the College is now planning to set out a great deal of shrubbery on the campus. But if the fellows are going to break a twig here and a twig there they will have this shrubbery looking bad in a short while.

So, fellows, when you are collecting twigs or leaves for Botany or any other class where it is required, let's get them off the campus. I know we are all proud of our College and want to do all we can for it. Next time you have to have these things, go out in the woods where we have an abundant supply of many different species of trees and shrubs. It won't take so very much more of your time, and you will get a great deal more good out of collecting them in this way.

Let's all cooperate on this thing and try to make our campus the most beautiful one in North Carolina, if not the most beautiful in the South.

J. G. WEAVER.

On Taking the Basketball Manager to Atlanta

For some reason, the writer does not know why, the manager of the basketball team was not taken to Atlanta last week with the team. What a shame! To go out as manager for three long years, overcome competition, then have the only trip worth going on taken away. Somebody on our campus is responsible for such a shameful deal.

Such things as the above tend to discourage students and cause them to not take any interest in the welfare of campus activities. The writer knows several students who have been treated in such a way that they did not return to college the following year. All this tends to make a psychological atmosphere of discontent on the campus; and, "goodness knows," the atmosphere is bad enough already. The authorities should be careful in not making mistakes like the above. If they do not have enough money to take the managers on trips, then tell them before they have spent three years expecting trips.

What incentive is there to work diligently, if in working nothing is gained? The popular conception that the students make the college is all wrong; they do not. The faculty and men who direct the teaching, research, and business of the college make it. It is the duty of the authorities to direct and guide the students in such a manner that an atmosphere of discontent will not prevail among the students.

JOE W. JOHNSON.

Engineering Exposition Annual

The School of Engineering, which includes the following departments, Architectural, Chemical, Civil, Electrical, Highway, and Mechanical Engineering, Textile Manufacturing, the Engineering Experiment Station, and the Engineering Extension Service, has decided to have another Engineering Exposition this spring.

In order to put across this exposition bigger and better than last year the committee needs the cooperation of all Engineering Departments. The program will be planned by the Engineering Societies as a whole. A joint meeting will be held in the near future of all Engineering Societies to discuss plans for the Exposition. All students of the School of Engineering

OUR WEEKLY MISUNDERSTANDING

By ZIPPY MACK
(Apologies to Stanley, Raleigh Times)

"You say Gus Tebell won't listen to reason?"
"No! No! For his first, 'twas a darn good season!"

will be requested to come to this meeting in order that each department may work together efficiently.

The purpose of these annual exhibitions is to enable the people of Raleigh and the State to become better acquainted with the Engineering School of State College. By inviting them here and exhibiting the type of work that is being done an interest is created in State College which is of great value to both the visitors and the students.

The success of this exposition depends upon the cooperation of every engineering student. When the call comes for volunteers, be true to your Alma Mater and take an active part in your department.

THE ELDER P. D. GOLD CITIZENSHIP MEDAL

The following letter to Dr. Riddick from C. W. Gold, '95, is self-explanatory:

May 25, 1923.
DR. W. C. RIDDICK, President,
North Carolina State College,
Raleigh, N. C.

DEAR DR. RIDDICK:—For some time I have been desirous of honoring the memory of my distinguished father by offering annually a medal to my Alma Mater, the State College, the same to be competed for by the three upper classes—namely, Sophomore, Junior, and Senior.

My father, Elder P. D. Gold, of Wilson, North Carolina, was, to me, the finest American citizen that I have ever known. He combined great elements of leadership, patriotic intent, physical fitness, philosophic temperament, moderation and toleration in all things. He was a great preacher of the Gospel and a great teacher of men. His religion was that of the lowly Nazarene, meek and humble; and he practiced these principles in his walk before the world and in his talks and writings to all men. But he never compromised a principle. He believed, with Roosevelt, that "Eternal fighting for the right is the noblest sport in the world."

I feel that this medal should be given as a memorial to him and in his name for Student Citizenship. Therefore, this medal should be known as "The Elder P. D. Gold Citizenship Medal." It should be bestowed by the President of the College at each Commencement, and be awarded by a committee composed of the President, chairman of the Board of Trustees, and secretary of the Board of Trustees, whose findings should be kept secret until the time of the bestowal of the medal. This committee shall arrive at its conclusions as follows:

Scholarship—The names of the highest ten per cent of the students in scholarship for the three years mentioned shall be certified to by the Faculty on the first day of Commencement of each year, and every precaution shall be taken to keep this result a secret.

Student Leadership—The Student Council shall determine by ballot, on the first Monday in May of each year,

that member of the Senior Class who has most impressed his leadership on the student body, during his Sophomore, Junior, and Senior years, and they shall name their second, third, fourth, fifth, and sixth selections, made in like manner.

Athletics—The Faculty Committee on Athletics shall select by ballot, on the first Monday in May of each year, the student of the Senior Class who has, during the three years mentioned, been the most outstanding figure of the student body in athletics. They shall name their second, third, fourth, fifth, and sixth selections, made in like manner.

Public Speaking—The ranking officer (who is not a member of the Senior Class) of each of the various College societies, in which public speaking is practiced, shall by ballot select the Senior student who, during the three years mentioned, has most excelled in public speaking. They shall name their second, third, fourth, fifth, and sixth selections, made in like manner.

These four lists of six men will be certified to the President of the College on or before the first day of each annual Commencement by some representative of the determining groups.

In order that information regarding the winning and bestowal of this medal may be properly disseminated among the student body, this letter must be read before the whole student body at some suitable time during the first week of each school term.

The committee shall appraise the first man of the first-named group at one hundred per cent, the second at ninety-eight per cent, the third at ninety-four per cent, and so on in the order of their three years scholarship standing.

The committee shall appraise the first man of each of the three last-named groups at one hundred per cent, the second at ninety-five per cent, the third at ninety per cent, the fourth at eighty-five per cent, the fifth at eighty per cent, and the sixth at seventy-five per cent. The student whose percentage totals the largest of these four groups shall receive the medal.

Arrangements are being made to have designed, by an experienced designer and manufacturer, a medal which will be distinctive and valuable.

Trusting that this medal will inspire the student body of my Alma Mater to strive for higher ideals in American citizenship, I am,

Yours very truly,
(Signed) CHARLES W. GOLD.

C. E. Society Puts On Interesting Program

Action Taken on Attendance Question Which is Expected to Bring Out More Men

By S. H. Hassall.

A regular meeting of the Civil Engineering Society was held Tuesday evening in the "Y." Mr. E. D. Wilder was the first speaker on the program. Mr. Wilder gave us a very interesting description of a rather unique bridge, recently constructed by the California Highway Commission. The bridge is of reinforced concrete, trestle type, composed of alternate girder spans and towers. It is located in a pass through the mountains, near Gilroy, California. The new State Highway approaches the bridge at both ends, down long, steep, winding grades. The bridge is on a very sharp curve at the foot of these grades. It is 218 feet long and has a 24-foot roadway between curbs. It is built on a radius of 175 feet and has a three per cent grade. On account of the sharp curve over the bridge, the outside of the roadway was super-elevated 24 inches, which is an exceptionally high super-elevation. At the highest point the floor of the bridge was some 46 feet above the creek bed, and the longest columns were about 34 feet in height from base to cap.

The wide easy approaches to the bridge emphasize its gracefulness, and the exceptionally large super-elevation of 24 inches in the roadway is an attractive feature to the motorist, since it permits him to come down the approach grades at a good speed and cross the bridge in perfect ease. The total cost of the bridge was twenty-eight thousand dollars.

Messrs. P. G. Parrish and P. H. Barnes were also on the program. Each made a short talk which was very interesting.

This completed the program, and the society then disposed of some important business that was before it. First, the question of attendance was brought up. Mr. L. A. Brothers introduced an amendment to the constitution of the society in regard to attendance. After much discussion, the amendment was passed. It is expected that the passage of this amendment to the constitution will increase the attendance at the meetings of the society. The society is for the benefit of all members; however, one can derive very little benefit while in college if he does not attend the meetings, and also take part in the program when called upon to do so. Therefore, it is readily seen that this new amendment is for the good of the members themselves. It would be wise for the members that were not present at the meeting to look into the contents of this amendment.

Further discussion was carried on in regard to the Annual Engineering Exposition. The society voted in favor of holding the exposition on April 8th. However, this does not definitely set the date, since the committee from our society has to confer with like committees from the other technical societies, in order to determine the date which is most suitable to all the societies interested.

After other business was disposed of, the society adjourned.

FRESHMAN FRIENDSHIP COUNCIL NEWS

Sunday afternoon the Freshman Friendship Council had a fine meeting which was enjoyed by all. There were a good many present, although a few absences were noticed.

As Mr. Hicks was unable to meet with us, Mr. King talked to us on "What It Means to Be a Christian." This was an inspiring talk and should be of much help to those who heard it. He also made a good many remarks about campus problems.

In a week or two the Council is to begin having open discussions at the meetings. Then members can hear what the other fellow has to say about certain things they are discussing. There should be some fun in this as well as the warm discussions that are sure to take place.

The Council is always glad to have new men join the group. Any Freshman is eligible to membership in this group, and those wishing to join will find friendship and enjoyable meetings awaiting them.

Boy Scout (to old lady): "May I accompany you across the street, madam?"

Old Lady: "Certainly, sonny. How long have you been waiting for some one to take you across?"

Pullen Literary Society Wins In Junior Debate

R. J. Peeler of Leazar Literary Society Selected as Best Speaker

Last Wednesday night, in the Y. M. C. A. auditorium, the Pullen Literary Society won the Annual Junior Inter-Society Debate. R. J. Peeler, of the

L. A. WITFORD
President Pullen Literary Society

Leazar Literary Society, was selected as being the best speaker in the debate.

The debate showed fine work on the part of all the speakers and the result was very close, shown by a vote of 2 to 1 by the judges, in favor of the negative.

The question was timely and very much interest was shown in it as it is the same question that is to be used in the Inter-Collegiate Debate between V. M. I., V. P. L., and State College, namely: "Resolved, That the Federal Government should discontinue the leasing to private concerns or corporations the natural resources over which it now has control." The affirmative of the debate was upheld by the Leazar team, composed of C. B. Brown and R. J. Peeler. The negative was supported by the Pullen team, consisting of E. G. Moore and H. W. Taylor.

M. L. Snipes, of the Leazar Society, was chairman of the debate. The judges were Dr. G. W. Forster, Dean E. L. Cloyd, and Professor W. A. Anderson.

On a whole the debate was considered the best work of its kind held here this year. By many it was said to be even better than the Senior Inter-Society debate, held several weeks ago.

INTERESTING DEBATE IN LEAZAR SOCIETY

The Leazar Literary Society met at the regular time Friday evening, February 27th. It was announced that the Junior inter-society debate would be held in the Y. M. C. A. auditorium next Wednesday evening at 7:30. It was also announced that the Peace Oratorical Contest would be held next Friday night immediately after the society meeting, in the Leazar hall. The winners in the try-out for the college debating team were then announced. Out of eleven men, four were chosen. The affirmative is to meet V. P. I. here and is represented by E. G. Moore of the Pullen Society and R. J. Peeler of the Leazar Society, while the negative is to meet V. M. I. there and is represented by R. R. Fountain of the Leazar Society and H. H. Rogers of the Pullen Society.

The following program was then rendered: A debate: "Resolved, That the Student Council should prohibit the practice of allowing the students to keep 'honor boxes' in the dormitories." The affirmative was presented by J. P. Shaw and W. R. Sechler, and the negative was presented by R. E. Reel and K. W. Reece. The judges were A. M. Fountain, G. F. Seymour, and W. P. Shuford. C. E. Vick acted as chairman of the debate. The decision of the judges was 2 to 1 in favor of the negative.

This was a real wide-awake debate, and much interest was shown by the speakers of both sides and by the audience. This debate brought out many points that should be carefully considered by the student-body.

The closing number on the program was three minutes of jokes by J. L. Smathers. The society then adjourned.

A woman is a person who can get a trunkful of stuff into a suitcase.

State Glee Club And Orchestra In Concert

Many People From Raleigh Came Out to Pullen Hall to Hear the Concert

Daddy Price's Glee Club and Orchestra gave a very entertaining concert in Pullen Hall last Thursday night. Many people from Raleigh were out to hear State College's first attempt to make music.

The concert was very good, showing real talent along lines that never, before this year, has State College laid much stress upon.

Especially was the final number enjoyed, "State College Keeps Fighting Along," by both Glee Club and Orchestra.

The program was as follows:
Program

1. Orchestra—
 - a. The Black Mask— (March)Hays
 - b. Panoram—(Overture).....Barnhouse
2. Glee Club—
 - a. Little Cotton Dolly— (Plantation Melody).....Geibel
 - b. Open Up the Gates of Glory— (Plantation Melody).....Geibel
3. Tenor Solo.....Selected Mr. E. C. Smith, '25
4. Orchestra—
 - a. Blue Eyed Sally— (Fox Trot).....Lange
 - b. Organ Echoes— (Serenade).....Hays
5. Glee Club—
 - a. Old Open Bucket.....Macy
 - b. When the Swallows Homeward Fly.....Franz-Abt. (Favorite Songs)
6. Syncopated Five—
Playing New Style
Classes Selected
Intermission
7. Orchestra—
 - a. Please—(Fox Trot).....Cooper
 - b. June Brought the Roses— (Waltz)Openshaw
8. Glee Club—
 - a. Dance of the Volga BoatmanGaul
 - b. Auf Wiederschen— (Waltzes)Bailey
9. Harmonious Nonsense.....Selected
By Foolish Four
10. Orchestra—
Garden of Eden—(Overture)Barnard

Final—Glee Club and Orchestra—
"State College Keeps Fighting Along."

P. W. Price, director of music.

Personnel of the Glee Club

First Tenors—G. M. Britt, '23; John Stocks, '28; A. M. Fountain, '23-'25; E. C. Smith, '25.
Second Tenors—E. L. Key, '25; W. F. Tew, '26; C. M. Caddell, '27; H. J. Carr, '28.

First Basses—I. M. Sawyer, '26; R. R. Fountain, '27; H. I. Wescott, '28; Henry Rodgers, '28.

Second Basses—C. E. Glenn, '25; F. C. Tarleton, '26; P. M. Hendricks, '26; G. A. Munn, '26.

Personnel of the Orchestra
Violins—L. E. Robbins, '27; E. G. Moore, '26; F. A. Fetter, Jr., '25; L. L. Chesson, '28; L. C. Enwick, '28.

Reeds—C. E. Bennett, '25; G. E. Michael, '27; J. N. Mullin, '28.

Piano—L. E. Robbins, '27.
Drums—H. T. Lashley, '27.

"Y" Secretary Entertains Chinese Students' Club

In order to promote Christian fellowship and strengthen the friendly relations between America and China, the two great sister republics on the Pacific coasts, Mr. E. S. King, General Secretary of the College "Y," invited all the members of the Chinese Students' Club of N. C. State College of Agriculture and Engineering to supper last Sunday evening, March the first, at their home. The supper was Chino American style. All the Chinese students enjoyed it very much.

Among the guests invited that evening were Professor and Mrs. Clark of the College and Mr. Johnson of Florida. Mr. Johnson is the "Y" secretary of the University of Florida. He said that there are two Chinese students attending that university, and that the boys in that institution are very fond of them.

After the supper, topics of general interest were talked and stories of great humor were told. It was indeed the finest evening the Chinese students have ever enjoyed in the South.

The reason you can find so much fault is that nobody wants it.

FACULTYFAX

A department devoted to the problem of acquainting our student body and other readers of THE TECHNICIAN with our faculty.—E. G. MOORE.

Prof. William Hande Browne, Jr.

William Hande Browne, Jr. was born in Baltimore County, Maryland. He attended the public schools of Baltimore, and in 1886 entered Johns Hopkins University. He was graduated from this institution in 1890 with an A.B. degree. For the next two years he was a graduate student at Johns Hopkins, and in 1892 received a certificate in Electrical Engineering. For four years he was engaged in engineering work in Baltimore. Following this, he taught Electrical Engineering for two years at the University of Nebraska and for four years at the University of Illinois. In 1902 he entered the journalistic field and was technical editor for the "Electrical Review" of New York City for six years.

Professor Browne came to State College in 1908. At this time Physics and Electrical Engineering were under one division, and he was made head of this department. Later a department of Physics was created, and Professor Browne then became head of the Electrical Engineering Department. He is a member of the American Institute of Electrical Engineers, of the Illuminating Engineering Society, and the American Association for the Advancement of Science.

Professor Browne has the honor of being the only member of the Pine Burr Society (scholarship) who is not a State College man. He is also a member of Phi Kappa Phi Honor Society and of Sigma Xi and Tau Beta Pi honorary fraternities.

Dopey Brown: You're three-quarters of an hour late; what do you mean by keeping me standing around like a fool?

She: I can't help the way you stand.

Kappa Sigs Winners Of Interfrat Championship

Ags Win Intersociety Championship; Other Intramural Games

Tuesday, March 3d, Kappa Sigma defeated Chi Tau in the second game of the championship series between the winners of the two divisions, by the close score of 10 to 9. Having already won the first game, this entitled the Kappa Sig Quint to the championship of the Inter-fraternity League. Each of these two teams had made an enviable record in their respective divisions and the championship was hotly contested.

Summary follows:

Kappa Sigma (10)	Chi Tau (9)
Correll-Bragg	Brown
Wray	Hughes-Uzzle
Shelor	Grant
Powell	Frazier
Fountain	Gluyas
Referee: Parker	

AGS CHAMPS OF INTER-SOCIETY LEAGUE

The fast quint representing the Ag Club defeated the E. E. Society team by the score of 22-11 in their last game Monday night. The Ags thus completed the season with only one loss and a clear title to the intersociety championship. They have at all times played a fast, aggressive game and well deserve their title.

Summary follows:

Ags	Position	E. E.

Fresh Quint Ring Down Curtain With A Win And Defeat

Wolflets Win From the Carolina Fresh 25 to 19 and Lose to Duke 29 to 7

By playing the best game of the season, the Wolflets defeated the young Tar Heels to a tune of 25 to 19 last Thursday night. The Carolina Fresh started the game off with a rush and gained the lead, which they maintained until the last of the first half. Just before the half ended the Wolflets struck their stride and, with Spence leading the offence, took the lead, which Carolina was never able to overcome.

Last Saturday night the Wolflets journeyed over to Duke with the intention of getting revenge for their previous defeat at the hands of the fast traveling Duke freshmen. However, it seemed that the Duke freshmen were the ones that gathered the revenge. When the smoke of battle had cleared away, the score was 29 to 7 in favor of Duke. The State freshmen were not able to score a field goal. The game had all the aspects of a young football game. During the game "Young" Bremer, in one of the many melees, received a fractured arm.

Indoor Baseball League To Soon Get Under Way

Dormitories Assigned Practice Periods; Anyone Registered in College Is Eligible

The inter-dormitory indoor baseball league is soon to be organized. Mr. Parker has been working hard on plans for this league and now has practice periods for the different dormitories arranged. If enough dormitories enter teams to form a league, this will be done during the early part of the spring quarter.

Anyone registered as a student at State College will be eligible, and some snappy baseball should result. The games will be six innings each. The champions of the league will receive intramural baseball medals. Rules of the game will be explained by the person in charge of the gym during practice periods.

The schedule of practice periods follows:

1911 Dormitory: 6:30 to 7:30 on Monday, Wednesday, Friday.
7th Dormitory: 7:30 to 8:30 on Monday, Wednesday, Friday.
South Dormitory: 8:30 to 9:30 on Monday, Wednesday, Friday.
4th and 6th Dormitories: 6:30 to 7:30, on Tuesday, Thursday; Saturday 1:30 to 2:30.
1st and 5th Dormitories: 7:30 to 8:30 on Tuesday, Thursday; Saturday 2:30 to 3:30.
Watauga: 8:30 to 9:30 on Tuesday, Thursday; Saturday 3:30 to 4:30.

"Mine is no idle tale," said the busy freshman as he bent over a chair.

SPORT COMMENT

We are endeavoring in this column to give the gist of Campus opinion about sports. Because of man's inherent narrow-mindedness and conceit it is most probably our own personal opinion that we're actually giving. We hope not.

THE SPORT EDITOR.

STATE'S 1925 BASKETBALL HISTORY is written. The book is closed; and we are proud to state that this season's basketball record will live long in our memory. We have no regrets; we rejoice in the most successful season in many a year.

—N.C.S.—

SAMMIE'S FRESHMEN HAVE DONE right well, too. Despite the quite frequent turn-over of men on his quint, mid-season and late season found a good team on the floor. We're proud of you, '28.

—N.C.S.—

AFTER REACHING HOPEFULLY into the Christmas stocking and drawing a black walnut, the Red Terrors proceeded to crack it. And Maryland went home. Three cheers! Another draw and another walnut—Tulane. Hard luck took Captain "Red" from us, and Tulane took the game. The crowded bleachers, calling "Give us 'Red' Johnson," seemed as confident as we are that had not "Red" had the hard luck to become injured in the Maryland game the Tulane game would have been much different. We hardly expected to win the Southern Championship when we went down there, but you never can tell.

—N.C.S.—

OF THIS MUCH WE ARE CERTAIN: "Gusteeble" is a plumb good coach. Coach Tebell, we are mighty glad to have made your acquaintance this year, and we look forward to many more pleasant and profitable years here with you.

—N.C.S.—

THE FRESHMEN BEAT Carolina Freshmen two straight this year again. It seems to be becoming a habit with them. 'Attaboy, Frosh!

—N.C.S.—

OUR YEARLINGS SEEM to be much the worse off on account of the football game over on the Duke court the other night. Hard luck, boys, especially you, "Little Bremer," to get all bunged up after the way you've been going.

—N.C.S.—

CONGRATULATIONS, CAROLINA, on your two championships. We'd rather you'd have each of them more than anybody we know—save one. All North Carolina joins you in your rejoicing.

—N.C.S.—

HAIL TO KAPPA SIG, AND AG! champions each! Now let's see a series between the two champs.

Carolina Again Takes Southern Championship

Defeats Tulane in Title Game and Wins Third Championship in Four Years

By defeating Tulane University in a fast game Tuesday night at Atlanta, the Tar Heel Quint defended its title of Southern Champion and won the much-coveted honor of being champion of the Southern Conference in basketball for two years straight and for three out of four years just passed. The Champions had an easy time at the tournament until the last game, defeating with ease, first, V. P. I., then Georgia Tech, and then Georgia. Tulane had come up by the same route, having defeated N. C. State in the second game. Then the title game, as was naturally to be expected, was close and hard fought. The score was tied four times, but Tulane never led, and the final score, which proclaimed Carolina Southern Champions, was 36-28.

Foul-Shooting Contest

Time: Begins Monday, March 9.
Entries: Entries must be turned in to Mr. Parker's office by Monday, 9th, at noon.
Eligibility: Any man, except men who have made varsity letter or freshman numeral, eligible.
Program: Each man given 45 throws, in blocks of 15 at different periods.
Award: Intramural medal to be awarded to the winner

Baker-Whitsett

That's All

Summary Freshman Basketball Season

Team Makes Poor Start, But Ends Successfully; Wins Five Games and Loses Four

The freshman quint, coached by "Sammy" Homewood, has just finished its schedule. From the standpoint of games won and lost, the Frosh had a fairly successful year; they won five games and lost four. From the standpoint of developing varsity material, they had a very successful season. "Sammy" is sending up some mighty good material to the varsity for next year.

Mills Tire Company

On January 15 the Wolfcubs started the season off with a bang by defeating the Mills Tire Company team 35-21. They outplayed in every way this team, which was composed of such ex-basketeters as Van Stringfield, of Wake Forest; Tommie Park, old N. C. State man; and Goodman, of Carolina.

First Duke University Game

In their second game of the season the Wolflets were defeated by the Duke Frosh to the tune of 31-21. The Wolflets played a good floor game, but were inaccurate in their shooting. In spite of this weakness, the Wolflets held the Duke Frosh to a one-point lead till the end of the first half—15 to 16. In the last half, Spence, Bynum and McDowell were unable to play, and as a consequence the game ended with the score 31 to 21 in favor of the little Blue Devils.

First Wake Forest Game

In their third game of the season, with three first-string men on the injured list, the Frosh continued their losing streak by losing to the Wake Forest freshmen by a score of 29 to 14. At the start, the young Deacons took the lead and were never headed by the Wolflets. Williams and Spence showed up best for State.

Raleigh High

In a fast game with the Raleigh High five, the Wolfcubs got the "old spirit" back and won by a score of 24 to 16. The Whirlwind blew all around the Wolfcubs during the first half, and at the end of the period the

CHARLIE CORRELL, Center
Second Year on Squad

GRESHAM, Forward
First Year on Squad

HARRY BROWN, Center
First Year on Squad

score stood 12 to 8 in favor of the high school boys. During the last half, however, the Cubs staged a come-back and tamed the Whirlwind down to a mere breeze, making 16 points to their opponents' 4. Spence, former Raleigh High School star, was the outstanding star of the game, scoring 16 points.

Second Wake Forest Game

The second game between the Wolfcubs and the young Deacons was very much like the first one. The young Deacons took the lead almost immediately after the tip-off and held it during the entire game. The State freshmen again showed their old weakness of fumbling and wild shooting under the goal. Spence played

the best game for State. The game ended with the score 32 to 15 in favor of the young Deacons.

First Carolina Game

Displaying good pass-work and close guarding, "Sammy's" Frosh defeated the Frosh from Carolina in one of the best games of the season by a score of 23 to 22. In the first half the Wolflets passed well, but could not find the basket, and at the end held the tail end of a 12 to 8 score. They picked up in the second half, however, and caused it to end with a score of 20-all. In the extra period the State freshmen jumped into the lead and held it until the final whistle blew.

Davidson

On February 18 the State freshmen defeated the Wildkitten basketeters from Davidson by a score of 31 to 24. All during the game the Wolflets displayed good pass-work and guarding, but were unable to find the basket at times. Despite their inaccurate shooting, the Wolflets kept the lead during the entire game. Bremer and Shirley made a number of pretty shots from the middle of the floor.

Second Carolina Game

In their second game with the Carolina Frosh, the State freshmen played their best game of the season and won by a score of 25-19. Every member of the team was "on his toes" and played well. Spence was high scorer of the game.

Second Duke Game

The second game between the Duke University freshman five and the State freshmen might better have been called a football game. The Junior Blue Devils ran all over the Wolflets and won by a score of 29-7. Bremer's arm was broken in the game, and Crum was also injured. The "28s" have not been awarded

yet, but the following men deserve special mention for their good work: Spence, White, Bremer, Shirley, Edwards, Crum, Williams, Brawley, and Ridenhour. McDowell also deserves mention. He played regular in the first two games, but was forced to stop on account of illness.

SCORING OF MEN ON BASKETBALL SQUAD

11 Negroes Caught Shooting the Bones

"Little Joe" Comes on the Dice; Policemen Come in the Door

Eleven negroes were "pinched" by a policeman and two plainclothesmen last Sunday evening for shooting craps in a shack just back of the college and across the railroad.

Quite a bit of excitement was stirred up on the campus Sunday evening at a time when excitement seldom comes forth around the college by a parade of eleven negroes, who were accompanied much as a drill master accompanies his troops, by a policeman with all of his two hundred and fifty pounds of dignity, and two plainclothesmen wearing the customary derby hats.

The negroes were arrested for participating in their much favored indoor game and African national sport, known in court as gambling with dice, but in the vernacular of the African, as "parading the galloping dominoes," "rolling the cubical ivories," or just plain "shooting craps."

The game was in progress in a little shack just back of the college barn when it was so rudely stopped by the "big feet" of the law. The participants in the game, being real sportsmen, did not seem to object to being arrested as much as they did to having the game stopped before the final score was settled; which means that all of them had not yet lost their hard-earned weekly wages to some lucky or skillful manipulator of the "Ivory cubes."

The players were all dressed in the customary uniforms, which, as a matter of information to those who don't understand thoroughly the technicalities of the game, consist of old clothes, preferably overalls, so that the players can get down on their knees and not be bothered by tight-fitting clothes which interfere with the activity of the players.

The "crap-shooting" army, escorted by "the law," was marched up to the bridge over the railroad just back of Sixth Dormitory and there searched for such accessories to the game as knives, razors (not safety), pistols, and guns, but much to the dismay of the officers none were found; so they were all loaded into a Ford, which was acting as substitute for the patrol wagon, and carried off to jail.

STATE QUINTET HAD SUCCESSFUL SEASON

(Continued from page 1.)

the most part. Dickens has missed but few shots from under the goal.

Gresham, at left forward, has shown speed and form which could not be beaten. His perfect passing with Dickens was a large factor in making State's team a success.

Brown, at center, has ever been steady and reliable in his play. His long shots have won several games.

Watkins, at left guard, has surely held down the score for State's opponents. He may find it rather hard to locate the basket, but if he does, he also makes it difficult for the opposing forwards to do so.

Substitutions have not been so frequent, but when necessary, the substitutes always fitted in well. Duls and Correll have both played an excellent game. Daily, Green, and Walters have shown their skill, and will probably show more of it next year.

Manager State well deserves praise and admiration for his successful management.

New Comedy Funny As A Family Album

Old Men's Battle Royal and Young Men Love in "The Battling Orioles"

"The Battling Orioles," the new Hal Roach Pathe comedy, contains, in its six reels of fun, more good sense on the philosophy of keeping young than can be found in half the books, treatises or systems yet published or invented.

It is a hilarious farce that tells of the rejuvenation of an old time baseball team who once upon a time were the unholy terrors of the diamond, the comedy is now playing at the College Y. Picture Show.

The story opens with a humorous episode showing the team in all its glory in 1874, when whiskers were the mode and every man sported "lady killers." From this delightful satire, as funny as an animated family album, the story leaps to today, and introduces Tommy Tucker, a disciple of cheer and the son of the only missing member of the veteran club.

How he involves the old gladiators in his romance, gets them into a rough and tumble battle with a gang of toughs, and how they emerge from the fray victorious and with renewed youth and fighting spirit provides excellent entertainment and constant laughter.

Hal Roach, who has given the screen many of its best laughmakers, has discovered a new comedian, Glenn Tryon, and features him in this comedy. Blanche Mehaffey is seen in support

of the star and brightens every scene with her beauty. "The Battling Oriole" is a picture that will delight everyone.

TALMADGE IN NEW TYPE OF DETECTIVE STORY

The acme of thrills, woven in skillfully with the fresh young romance of a poor boy and a rich girl, forms the basis of the mystery of photoplay, "Stepping Lively," the second Carlos production made for F.B.O. under the directorship of James Horne. It taps a vein of drama entirely new in the history of detective stories on the screen, and provides its athletic young star with one of the best opportunities of his career, of which Mr. Talmadge takes full advantage. The famous Bertillon system of detecting criminals, hitherto considered infallible, is proved to be fallacious in this remarkable picture, and several police chiefs of the West Coast have admitted that the clever ruse which this picture employs could conceivably have been worked. Mildred Harris and a large cast of capable players support the star. Comedy as well as romance and mystery has been interjected into the story through the medium of a fat-headed detective, who levens the drama with plenty of laughs. "Stepping Lively" is the current feature at the College Y. Picture Show.

Customer: "Are you sure these field glasses are high-powered?"

Salesman: "Madam, when you use these glasses, anything less than ten miles away looks as if it were behind you."

N. C. STATE COLLEGE BASKET- EERS STARTLE SOUTHERN CONFERENCE

(Continued from page 1.)

long shots, few of which counted. Watkins was a tower of strength at all times, taking the ball from the back board as regularly as it hit and giving it to Captain "Red" Johnson, who in turn carried it up to Gresham, Dickens and Brown, not one of whom could miss one.

Gresham was high-score man with nine points, and every man on the team scored.

The Tech system was brand new to most of the Conference teams, and received much favorable comment. Toward the end of the first half Captain Johnson received an injury to his right foot and, little though it was realized at the time, that little unfortunate accident proved to have a heavy bearing on the whole tournament. For he was unable to play any more, and that fact probably cost State the Tulane game and, perhaps—well, you never can tell. Maryland was so completely whipped by the end of the half that his removal had little or no effect on the rest of the game. Thus endeth the story of the triumphant entry of N. C. State into Southern Conference basketball.

Summary
Maryland (16) N. C. State (30)

Umpire: Yates.

Minus "Red," State Loses
The above headline, from the News and Observer, tells the story of the Tulane game. After the outcome of the Maryland game, State little feared anyone, much less Tulane, it being the Tech motto, "The bigger they come, the harder they fall." But Captain "Red" Johnson was hobbling about on a cane, not even in uniform. This practically demoralized the State team, and Tulane had an easy time winning by the score of 41-24. All during the disastrous game the crowded bleachers kept calling, "Give us 'Red' Johnson!" And Coach Tebell was blaspheming against big toes which will get sprained at such times. "Lady Luck" was smiling on Tulane and the other teams ahead.

Harry Brown went to "Red's" guard position and Charlie Correll jumped center. But the defense was shot to pieces and Tulane kept the ball most of the time. Dickens scored high for State and again all had a hand in the scoring, but to no avail, and State made a rather ungraceful exit compared to the resplendent entrance of the previous night. Had "Red" been in, the defense would have kept Tulane's score down lots more and the State score of 24 points would have been quite a bit higher. State would have won in other words! And then what?—And another thing: had "Red" Johnson played that game, he'd undoubtedly won for himself the coveted all-Southern guard position, which he so well deserves.

Summary
Tulane (41) N. C. State (24)

A Lament to Loneliness

Frail and empty as the shadows 'gainst that
Bare wall,
Seems my life! Low cares and courted
custom taint
All Beauty with its pale gall.
A bursting call breaks loud within me
as uncontrollable
Lightning breaks stirring atmos-
pheres!
A sickened shaft of solitude weighs
my heart. I bleed!
Thru' falling tears.
I listlessly see the beauty of you light
that steepens
The dome of its own blue ray.
This music that falls on my ears,
sound on sound, thru' my
Heart gains no penetrable way!
You cold moon with her running rays
draws from out
The blue deep her star.
My want is stronger than her rays,
but stands out proud,
Alloo, afar!
O, could I lay my head where long my
heart has laid,
Alas too mild!
And weep my loneliness away as a
tired, tired child!
—MARY BLAND SILER,
St. Mary's, '24.

Football games remind us of necking parties. The main difference is in

the height at which the tackles are made.

The only way some people will give is up, in, or out.

Smith and Raper Attend Conference

Southern Student Conference on International Relations Meets in Spartanburg, S. C.

The Southern Student Conference on International Relations held its regular annual meeting in Spartanburg, S. C., from February 26-28. There were about forty Southern colleges and universities represented at this conference, and the delegates had the privilege of hearing several notable speakers, some of international fame.

Hon. Theodore Marburg, former Minister to Belgium, being the chief speaker, gave two addresses on international topics and also led a round-table discussion on The League of Nations. Others that were very prominent in the conference were: Dr. E. M. Potat, Jr., of China; Dr. D. D. Wallace, Professor of Political Science and History at Wofford College; Dr. A. M. Arnett, Head of the Department of History at N. C. C. W.; Dr. R. S. Rankin, Professor of History at Tusculum College, and Mr. C. B. Gosnell, graduate student at Princeton University.

The first meeting of the Southern Student Conference on International Relations was held at Greenville, S. C., last spring and it was at this time that the conference was formed. There were twenty-six Southern colleges and universities represented at its first meeting. The institutions that sent

delegates to both conferences make up its charter members.

The second annual meeting, held the past week-end, was attended by delegates from approximately forty Southern institutions. The members of the conference at present are: Furman, Erskine, N. C. State, Davidson, Clemson, Emory University, Peabody, S. C. University, N. C. University, Tusculum, Duke, Agnes Scott, Anderson, Brenau, Coker, Columbia College, Florida State, G. W. C., Judson, Lander, Limestone, Randolph-Macon, Virginia University, N. C. C. W., and Winthrop. There were also representatives from twelve other colleges that do not belong to the conference.

N. C. State was represented by P. E. Smith and R. H. Raper at the conference. The delegates report a good time; from beginning to end it is understood that they helped to keep things moving, and especially in the discussion groups. Raper also acted as chairman of the committee which put the constitution of the conference in final form.

The next regular meeting of the conference will be held next spring. It is the desire of the association to have two delegates from every university and senior college in the South to attend this conference, which will be entertained by Brenau College at Gainesville, Ga.

A Restatement of the Engineering Curriculum

By Henry S. Pritchett, President of the Carnegie Foundation for the Advancement of Teaching.

Out of this conviction a study is now being made by a committee of engineers, in cooperation with the faculties of the schools of the engineering colleges, to restate the engineering curriculum. The expectation is that such a restatement will not only simplify the present complicated and overloaded arrangement of courses, but will relate more successfully the cultural, scientific, and technical purposes to be served. Preliminary to this effort certain underlying facts may well be emphasized.

The first has to do with the nature of the preparation for the engineering college. The school of applied sciences receives its students from the secondary school. The character of the work it will be able to do depends primarily upon the quality of students which it is able to obtain from these schools. The formal requirements for admission which the colleges of technology, as well as other colleges, have instituted for admission have been made more strict with each succeeding decade. The colleges now require a number of subjects which cannot be completed satisfactorily in less than a full four-year high school course. Notwithstanding these requirements, the testimony is overwhelming that the nature of the preparation received by those who are to enter the schools of applied science leaves much to be desired, and in some respects does not compare with the quality of the preparation of twenty-five years ago. A large number of those who come up for admission, duly certificated by the secondary schools, show meager preparation in such fundamental subjects as English, elementary mathematics, and elementary chemistry and physics, and this notwithstanding the fact that the high schools are today well equipped with laboratories. It seems fairly clear that in the past twenty-five years the secondary school has come to accept an ideal of a liberal education quite different from that with which it began. A liberal education in the "people's college"—as the high school was originally called—was construed to mean a training of the habits and powers of the mind. A student did not learn many subjects, but he was expected to master those subjects in thorough fashion and to secure by this process a training which should enable him to apply his intellectual powers to any problem with which he was confronted. More and more, as time has gone on and the courses in the high school have become multiplied, the ideal of a liberal education has come to mean the acquiring of a modicum of knowledge with respect to a wide variety of subjects.

Now the acquiring of knowledge has little to do with a liberal education. It goes without saying that in the process of training the habits and powers of the mind a certain amount of knowledge will be required, but that is incidental to the main purpose. There is much evidence to show that the students who come up today from the secondary school to the engineering college lack that sharpness of intellectual responsibility for the performance of their tasks which develops the power to think. One of the things

which any study of the engineering curriculum must do is to examine the quality of the preparation which the high school gives today to the students that it sends up to the engineering colleges.

A second consideration has to do with the integration of the studies offered in the engineering college itself. The conception of an engineering school resting upon fundamental courses in science is a sound one. When this conception is put into organized form, it tends to develop a series of water-tight compartments in which mathematics and chemistry and physics have little to do with each other, and are viewed by the student as ends in themselves rather than as tools for the solution of his technical problems. In the medical schools there is found the same tendency to develop anatomy and physiology and chemistry as sciences unrelated to the practice of medicine and surgery. The tendency is a fundamental difficulty in all teaching of applied science, but as our engineering schools have become more specialized the tendency has become stronger. One of the most important duties of those who have to do with the restatement of the engineering curriculum will lie in the effort to integrate the so-called fundamental scientific studies in relation to their applications in the various branches of technical industry.

A third matter with which any such effort must concern itself is to be found in the very natural desire to prepare the student for all the many applications of science in the arts, in the industries, and in other technical fields. The lesson of the last fifty years' experience seems to show that the engineering school does its best for the student when it does not undertake to fit him for highly specialized technical problems, but rather to give him that thorough discipline of the mind and that wide comprehension of science which enables him to apply his rational processes and his scientific knowledge to the specific technical applications as they may arise. In other words, that engineering education is most practical which enables a man to think in terms of scientific principles rather than to fit him for a practice of the latest inventions or applications of science.

It would seem clear, therefore, that any group of men that undertake to restate the engineering curriculum, in what may be considered its ideal form for the science of today, need to begin with the question of secondary education first and to consider the engineering training rather in terms of a liberal conception of education than in the narrow sense of expert technical facility. The making of an expert comes in the practice. The preparation of the engineer to perform high service in the field of applied science rests not upon his equipment in special fields, but upon his mastery of the processes of reasoning by which science approaches and solves its problems.

Negation

Dear lady, I don't mind admitting to you
That my heart greatly trembled and shook at
The first time you happened to come to my view;
You were awfully hard not to look at!

Your manner was modest; I know that it was;
But your eyes were so brightly alert with
Sheer fun that I flirted a little, because
You truly were hard not to flirt with.

Then later acquaintance proved this very plain—
Which all who have known you agree with—
To get on without you was sorrow and pain;
You were terribly hard not to be with.

So though I have struggled to keep my heart whole,
It seems to be useless, and therefore I've fallen in love with you, body and soul;
You are frightfully hard not to care for.

I'd resolved I'd remain in a bachelor's state;
I thought I was cautious and wary;
Yet I march to the altar with manner elate;
You're impossibly hard not to marry!

—By Berton Bradley.

Agricultural Club Changes Its Name

"Rural Life Club" New Title, Being Adopted by Unanimous Vote

A program was rendered by the Agricultural Economics Club, in Ricks 208, at 4:30, on the afternoon of February 27. Mr. J. B. Hutson, of the United States Department of Agriculture, was expected to be present and to give a talk on "Nature and Scope of Research in Farm Accounting." However, Mr. Hutson failed to reach Raleigh in time for the meeting.

Dr. G. W. Forster gave a very interesting discussion on the subject that was to have been given by Mr. Hutson. Dr. Forster stated that it was rather hard to give a discussion of some one's talk which had not been given. Mr. C. F. Parrish was next on program with a report on the agricultural situation in general. Mr. A. L. Eagles reviewed the history of Agricultural Cooperation.

In taking up the business, Mr. D. R. Palmer explained the purpose of the Agricultural Economics Club and called for discussion on the proposition that the Agricultural Economics Club should include by name Rural Sociology. Dr. Forster and Prof. Anderson agreed that the name Rural Life Club would include both fields. Therefore, it was unanimously voted to change the name from Agricultural Economics Club to Rural Life Club.

M. L. SNIPES.

AG. CLUB ELECTS OFFICERS

At a regular meeting Tuesday night, the 24th, the Ag. Club elected officers for the Spring Term, as follows:

- President, T. T. Brown.
- Vice-President, E. G. Moore.
- Secretary, G. W. Knox.
- Assistant Secretary, J. A. Ward.
- Cor. Sec., V. R. Ferguson.
- Treasurer, J. A. Wilson.
- Assistant Treasurer, J. F. Bullock.
- Reporter, R. B. Winchensher.
- Critic, G. F. Seymour.

A lady phoned the water office relative to hours for watering the lawn. "What is the proper time to put on my hose?" she asked.

"Really, madam; I believe immediately after your B. V. D.'s," came the ready response.

Employment For Students!

This is Your Opportunity
If you intend to work during the summer months, it will pay you to investigate our proposition AT ONCE. This work is of a religious and educational nature for which you are specially fitted. Students employed by us need have no further worries concerning finances for the next college year. Our guarantee assures you of a minimum of \$300, with opportunities of earning several times this amount. Many of our student representatives earned from \$500 to \$1,000 last summer. No capital or experience necessary. Write today for full particulars and organization plan.

EPWORTH LEAGUE HAS ENJOYABLE SOCIAL

Several students from State journeyed to Edenton Street Friday night to enjoy a social given by the Epworth League of Edenton Street Methodist Church. Plenty of girls were there and refreshments were served so, needless to say, every State man thoroughly enjoyed himself.

All State College students are invited to attend Epworth League Sunday evenings. Come out and see what you are missing.

STUDENT VOLUNTEER MEET AT UNIVERSITY

The Fourteenth Annual Conference of the Student Volunteer Union of North Carolina was held at Carolina last week. It opened on Friday and lasted through Sunday night, almost every college in this State being represented. The total number of representatives from these colleges was about 110.

The delegates received a very hearty welcome from Carolina and the people of Chapel Hill, for as the separate delegations arrived they were either assigned to private homes or to a good place to stay on the campus. The meals for the conference group were all served in the dining hall.

The opening meeting was held at 5:45 p. m. in the form of a prayer service. Then again at 8 o'clock the delegates all met in Gerard Hall for the opening address, which was made by Dr. North, of Rocky Mount, N. C. This was a very impressive service, and it created a spirit of interest which lasted throughout the entire conference.

Immediately after this opening address every one went to the Sunday school room of the Baptist church for a reception or, as "Tom" Quickele called it, "A Get-together, Get-acquainted Struggle." It was here that every one got acquainted with every one else and was filled with pep which helped as much as anything else to make the conference a success. The entertainment was in the form of yells, songs, readings, and many other forms of amusement given by different groups of representatives.

On Saturday morning every one met in Gerard Hall for the sunrise prayer service. Then, beginning at 9 o'clock, the meeting lasted until 11, and during this time some very interesting talks were made. The principal

speakers were Mrs. Schwartz, a returned missionary from Japan, and Mr. Shaver, who made a very interesting talk on education on the campus. After this, four discussion groups were organized, and the topics were: "The Christian Student and Prayer," "The Christian Student and Society," "The Christian Student and the Bible," and "The Student and Service." These discussions were very interesting and every one took an active part in them. The meetings Saturday afternoon were also very interesting. The stereopticon lecture on the mission fields, which came Saturday night, was especially good.

On Sunday morning, special services were held in the various churches of Chapel Hill. Then in the afternoon some good talks were made, and the conference closed Sunday night with the installation of new officers.

State College was represented at these meetings by D. R. Pace, E. N. Brackett, and H. K. Plott.

Outlines of Love

GRADE SCHOOL

Rosee ith red,
Violets ith blue;
Sugar ith thweet,
And tho-ith-oo.

HIGH SCHOOL

Chrysanthemums are beautiful,
And so is marmalade;
Without you, dear Gwendolyn,
My life's a dead whendolyn.

UNIVERSITY

The moon is silver-sheathed
As you my golden symphony.
'Tis you I crave to wed,
My agonizing ecstasy!

TEN YEARS WED

I have a knife,
Its blade is true;
For thirty cents
I'd murder you.

Alumni Notes

Observations & Communications of Zippy Mack

Well, our part in the tournament wasn't the most brilliant of them all, but we think it did right well for the beginning. An alibi isn't always the best thing to advance, so we shall not stop to discuss the fame of the teams against which we were pitted. It is sufficient to say that the last of them, Tulane, saw the thing through to the finish, when Carolina repeated her former championship victories.

Last week's wedding goes to the Class of '23. Mr. M. E. King, of the '23 Electricals, and Miss Florence Garland Wallace were married February 28 at Calvary Episcopal Church, New York City. Mrs. King is the daughter of Mr. and Mrs. W. C. Wallace, of Warsaw, Virginia. She is a graduate of Southern College, Class of '24.

"Elmer" King is also a native of Virginia. He had an unusually good record at State College, and was active in several branches of college affairs. He is now in the employ of the Western Electric Company at LaGrange, Illinois. The bride had as her maid-of-honor Miss Marion Lindner, a former schoolmate, of New York, while the groom had as his best man his classmate, Mr. W. M. Cummings, also of New York.

We had a nice long talk the other day with J. Guy Stuart, of the Agricultural Class of '20, who was down to see Jackson Springs and Wilmington lock horns in our gymnasium. He took occasion to recall the good old days when he was the first business manager of the Technician ever had, when, in his Senior year, he and

Marion Trice took it in its swaddling clothes and began what is now the strong campus paper you see here. We remember it ourselves, a little semi-monthly, four-page, three-column affair, that looked as though it never had any possibilities or even probabilities. They needed help so badly then that we began then and never have been able to quit since.

Mrs. J. A. Rickards is now in Raleigh visiting her parents. Although technically she is not classed as an alumnus, she seems almost as much a part of the old acquaintance group as the boys themselves. All the boys remember Emily or, rather, "Smiling Bobby" Jones who used to cheer up the fellows at the post office when their girls forgot to write them. But such a perfect congeniality as hers was too good to last. Joe Rickards, of the '23 Mechanicals, was the lucky guy. They now live at Hazleton, Pennsylvania.

Messrs. J. C. Harwell, '23, and T. O. Evans, Jr., '24, were in Raleigh last week-end on "business." Harwell is superintendent of the Yadkin River Power Company at Maxton, while Evans is in business with the senior Evans at the same place.

Mr. M. T. ("Mount") Wilson, of the '24 Textiles, was on the campus last week.

Meredith, '26: What attitude do you take toward kissing?

State, '26: O, body at thirty degrees, head back, lips apart, and eyes veiled.
