Y. M. C. A. Elections Saturday, March 28

The election of Y. M. C. A. officers will be held on Saturday, March 28th, in connection with the Student Government primary.

The election will be by ballot, and the polls will be open from 8 o'clock in the morning until 6 at night. The polling place will be in front of Pullen Hall.

Who Can Vote?

In the past, voting has been restricted to members of Evangelical Churches, but information has been received by the Y. M. C. A. which makes it possible to allow ALL STATE COLLEGE STUDENTS and FACULTY MEN TO VOTE. Therefore, let every State College man come out and cast his ballot in this important election.

The nominees are as follows:

For President (vote for one. The man getting the second highest number of votes will become vice-president):

R. J. Peeler
J. M. Currie
J. P. Shaw
F. L. Tarleton

For Secretary (vote for one):

R. L. Browning
G. D. Humphrey
F. E. Plummer
J. E. Tiddy

For Treasurer (vote for one):

W. D. Russell
H. M. Weedon
H. H. Diggs
H. K. Plott

THE DEBATE COUNCIL MAKES ANNOUNCEMENTS

The triangular debate with V. P. I. and V. M. I. has been postponed until Monday, April 6. The State College affirmative team, consisting of R. J. Peeler and E. G. Moore, will meet the V. P. I. negative at 8 o'clock that night in the auditorium of the College Y. M. C. A. The negative team, consisting of R. R. Fountain and H. H. Rogers, will fight it out with the V. M. I. affirmative at Lexington, Va., on the same evening.

The Sophomore inter-society debate will be held on the evening of Friday, April 17, at 7 o'clock, in the Y. M. C. A. auditorium. The proposition is: "Resolved, That the United States should join the League of Nations." Affirmative, Leazar Literary Society; negative, Pullen Literary Society.

The Freshman inter-society debate will be held on the evening of Friday, May 1, at 7 o'clock, in the Y. M. C. A. auditorium. Subject: "Resolved, That the State of North Carolina should abolish capital punishment." Affirmative, Leazar; negative, Pullen.

A Musical Program Has Been Added To Dr. Taylor's Forum

Beginning with the coming Sunday, and continuing throughout the spring term, there will be a twenty-minute concert of instrumental music preceding each weekly meeting of the Forum. The cream of Raleigh's musical talent is being booked for these concerts, and though the musical programs will be brief they have promise of very high quality. Popular classic favorites will receive first choice in the selection of program pieces. The concerts will be given in the First Christian Church and will begin at 9:45 a. m.

Real dignity requires no acting, and if you haven't that kind, any pretense of possessing it merely raises a laugh.

It would be cheaper for parents to allow their sons to learn how to smoke cigarettes at home instead of sending them to college.

COUNCIL MEMBERS

Senior Council members for next year from which will come the President and Vice-President of Student Government:

M. W. Long, Agriculture.
E. G. Moore, Agriculture.
C. L. Shuford,
Business Adm. and Chem.
Henry Kendall, Civil Eng.
F. L. Tarleton, Elec. Eng.
F. K. Pogleman, M. Eng.
T. W. Church, Jr., Textile.

Junior members of the Council for next year from which will come the Secretary and Treasurer of Student Government:

H. L. Brown
J. L. Campbell
F. M. Chedester
G. F. Hackney
J. F. Matheson

Don't forget to vote. Show you are interested in Student Government enough to come out to the election and take part in it.

T. C. White, Jr., was elected as the Textile Junior representative in the House.

Agricultural Club Hears Mr. Zorman

Chapter of Lambda Gamma Delta, New National Fraternity, May be Installed

Mr. H. J. Zorman, graduate of Michigan Agricultural College, made a very interesting talk to the Agr. Club Tuesday evening. He is visiting the agricultural colleges in eastern United States in order to organize a national honorary fraternity, which is called Lambda Gamma Delta: livestock, grain, and dairy. Any student or graduate who has represented the college in some intercollegiate judging contest is eligible for membership.

Mr. Zorman stated that one who tries out for one of the judging teams will receive more benefit from that experience than he does from the average course that he takes. He also stated that in the grain contest, which is being held each year in connection with the National Livestock Show at Chicago, that he received more benefit from working for the contest than he did from all the other courses that he had in the Farm Crops Department.

In conclusion, Mr. Zorman advised that all try out for one or more of the contests.

The club then had its business meeting. The subject of the spring reception was discussed. It was voted that if the college girls could come, that the reception would be held on the 25th of April.

At the regular meeting of the club, March 31, the faculty will have charge of the program. Dr. C. C. Taylor will act as chairman. The debate for the evening will be: "Resolved, That the North Carolina General Assembly provide a bill prohibiting large opossums from climbing small trees." Dr. Z. P. Metcalf, Dr. P. W. Wells, and Professor D. S. Weaver will uphold the affirmative, while Professors R. H. Ruffner, W. L. Clevenger, and David Gray will debate the negative side of the question. As this is a very important question, it is urged that students and faculty attend.

Let nine men tell you you are wrong and one that you are right and you know there is one man among them who has good judgment.

"Red" Johnson and "Dutch" Holland Are Ineligible for Baseball

Action of Southern Conference Final; Gladstone May Qualify

For some time students and friends of State College have hoped that there was some mistake in the ruling of the Southern Conference which disqualified "Red" Johnson and "Dutch" Holland from playing baseball this year. Several false reports have been circulated which have caused much discussion.

The facts as outlined by Dr. Taylor are these: The Athletic Council received notice from the Southern Conference that Johnson and Holland were ineligible for intercollegiate baseball since they had played professional baseball last summer. The Athletic Council then wrote for the evidence—not intending to question the action or the authority of the Southern Conference ruling, but merely to obtain the evidence which they could not get elsewhere. It is true that Johnson played intercollegiate basketball, but this was permitted by the Athletic Council only after they had received an affidavit from the manager of the Union, S. C., team saying that it had no prearranged schedule and played no more than three games a week. Johnson played catcher and outfielder on that team. However, it appears that the Southern Conference decided that the Union team was a professional team, in which case its ruling is final.

Nothing has been fully determined concerning Gladstone's qualifications. His name has been submitted to the Southern Conference for investigation.

Boxing Tournament Opens Wednesday

All Entries Must be in Mr. Parker's Office by Tuesday Night, March 31

The first matches of the intramural boxing tournament will be held next Wednesday. All entries must be in Mr. Parker's office by Tuesday night, March 31. Any student of State College is eligible and will be classified according to his weight.

The drawing and pairing of the men in each class will be done and announced Wednesday. There will be a chance for every fellow, large or small, to win an intramural medal. The winner of each class will be known as the champion of the college in his particular weight.

The different weights or classes are as follows: 105 lbs., 115 lbs., 125 lbs., 135 lbs., 145 lbs., 158 lbs., 175 lbs., and the unlimited class. There will be only a few short rounds, so no one need fear that he will have to fight to a finish. All scoring will be done on points.

All Seniors who desire to compete for the Orator's Medal must register with Professor Cunningham, Room 98, Holladay, before noon of Monday, March 30. One speaker from each of the three schools will be chosen for the final contest, to be held at Commencement. Get busy, Seniors! Here is a real honor—one worth striving for!

NOTICE

All students interested in Ceramic Engineering, and those who are now registered in or are considering changing to this course next year, are requested to meet Prof. Greaves-Walker in Room 101, Page Hall, at 6:30 P. M., April 1st.

HON. J. STITT WILSON SPENDS 4 DAYS HERE

Dr. J. Stitt Wilson Speaks To Faculty

Opens His Series of Talks on the Failure of Modern Education

Hon. J. Stitt Wilson, of Berkeley, California, opened a series of addresses at a dinner given in his honor by the Faculty. Dr. Wilson came to the College under the auspices of the Y. M. C. A.

Dr. Wilson was presented to the faculty and invited guests, which included State Superintendent A. T. Allen and J. Henry Highsmith, of the Department of Education, by President E. C. Brooks, who paid high tribute to the influence of the speaker upon the occasion of a former visit during the fall of 1923.

"Education must produce character no matter what else it produces," declared Dr. Wilson, as he charged that the educational institutions of today, in so many instances, failed to provide that kind of instruction and inspiration which would tend to develop the moral and spiritual nature of the product of the educational mill. He urged that time be taken to analyze the type of man turned out with a degree and at the same time study the question as to the type of man needed by the world.

"The greatest problem of the business world is not more production; we can reach that if necessary. It is the problem of the relationships of men, women and children in their struggle for existence. The average boy or girl on the campuses of America has no idea that the four years of college life should contribute to the building of their spiritual nature as well as to the development of their intellect."

The colleges of America, according to the speaker, have accepted a tremendous responsibility with the separation of church and state. "The dead hand of organized religion has been removed from affairs of state; we must show that we are equal to the training of character."

The hope of the world, Dr. Wilson said, rests with its youth. In the light of modern research we must restate for the human race the great fundamental principles of life.

DR. WILSON SPEAKS AT STUDENTS' DINNER

After Dr. J. Stitt Wilson had delivered an address to the State College Faculty on Monday evening at a dinner served by the Y. M. C. A. he made another such talk to a representative group of students on a similar occasion at the same place on Tuesday evening.

At this meeting on Tuesday evening Dr. Wilson discussed somewhat in detail the nature of his work, together with some of the problems of modern education. He says that the educational institutions of today are not providing for instruction that will develop the moral and spiritual life of the young men. According to Mr. Wilson, it is getting to be a problem to find men whose character is such that they can be placed in positions of responsibility. He says it is not a great undertaking to find men who are technically trained, but it is hard to find men who are technically trained and at the same time have honor enough to fill the important places in life. Mr. Wilson stated that in his traveling over the country he has seen college presidents who are spending a great deal of their time in search for men that can be trusted at the heads of the different departments.

Mr. Wilson said, "The time to begin the development of character is now, while we are in college. We must not stand back and wait for the other fellow and see what he is going to do, but have courage enough to stand up for our convictions."

"Some Failures of Modern Education: A Constructive Criticism," Was the Theme of His Lectures.

Hon. J. Stitt Wilson came to State College last Monday and delivered a series of lectures. He remained on the campus through Thursday night, at which time he made his last address.

Two dinners were held in the Y. M. C. A. for Dr. Wilson, one for the faculty on Monday night, and one for the students on Tuesday night. Dr. Wilson gave a series of lectures, beginning in a College Assembly, held Tuesday morning at 10:00 o'clock, and the others on Wednesday and Thursday nights at 6:45.

"Some Failures of Modern Education: A Constructive Criticism," was the main theme of the lectures.

In the first address on Tuesday morning Dr. Wilson defined the three dimensions of man and laid the foundations for the three addresses to follow. The three dimensions he declared to be physicality, intellectuality, and a third dimension that includes the ideals, feelings, instincts, and aims of man. It is with this third dimension, the speaker pointed out, that we are now primarily concerned, for "any education that neglects this phase is not education, it is only information."

Considering the pliable and plastic thing called a human being and all of the influences that play upon it, the duty of the educated man, the speaker said, is to see that these influences are of the highest type. No intelligent man can let well enough alone, he said; he must be at the business of reforming and changing.

"What we have now is only standing ground for what ought to be. We are going to put intellectual dynamite under the ignorance of the world and blow it into smithereens." Dr. Wilson declared "The educated man must help the world define its problems. One of the greatest results of real education is to clear the cobwebs out of main's brains and make him think clear and straight."

Dr. Wilson explained that his first address would necessarily be in the nature of a broken message. The others will follow along the line that has been indicated, all dealing with the larger relationships of man and aimed specifically towards the creation of a desire in college students to live right, for in right living they can be of the greatest service to mankind.

In the second address on Wednesday night Dr. Wilson urged a sense of responsibility. "The greatest thing in life is a sense or moral responsibility for the welfare of the human race."

"This was the spirit that actuated Jesus Christ," said the speaker. "You don't think he died to fulfill a theological formula, do you?"

Dr. Wilson made a profound impression on the students, many of whom took notes on his lecture and went forward to shake hands with him at the conclusion of the talk. The speaking was preceded by some unusually good singing by a quartette of young ladies from the Blind Institute.

On the subject of the failure of education Dr. Wilson declared that too little emphasis was being placed on teaching the young men of the country that they do have a real moral responsibility. "Present day education," he said, "has inadequately defined man," while defining rather completely man's physical nature and his mentality.

"Present day education has gone slovenly, not deliberately. You wouldn't dare build a bridge like that and yet it has gone on with the most serious

Editorials

We mean to say that Dr. Wilson low-rated the "suckers" of the weed.

Peace and Meredith are having their Spring holidays this week. Everything comes to them who wait and he that laughs last has the longest giggle.

Did you realize that we have our first real baseball game of the year next week? Too bad we can't see our team in action for the first game. But such is life.

A few stump speeches might help out a whole lot. We would like to have the candidates give us at least their platform. Better start things to going before it is too late.

There doesn't seem to be much politicking going on as yet. What is the matter? Up to date the staff of the paper has not received a single cigar or anything of that nature. Get busy and let's see what you have.

Can one man be found on State College's campus who has not heard J. Stitt Wilson? Is there a man on the campus who has not been benefited in some way by Dr. Wilson's visit here? If there is such a man on the campus he is to be pitied. Dr. Wilson does not talk just to be saying something, but he has a message and he gets it across. Every man who has heard his addresses should feel as though he had heard a challenge; for it was a challenge that he made. A challenge to all red-blooded American College students.

How many dimensions have you? One? Two? Or are you the man with the three dimensions? True, everyone who is has the first dimension—physicality. Probably we have the other dimensions, but how distinct are they? How well developed are they? Do we ever think about such things at any time other than just when someone like Dr. Wilson reminds us of them? Are these things going to go through our minds without stopping? It would be well to spend a little time every now and then thinking over what Dr. Wilson has given us. There is quite a bit of food for thought and it is quite evident that our minds are rather poorly nourished in this particular food element.

Come out Saturday and vote.

TO THE DINING HALL

It is not our intention to kick about the food served in the Mess Hall, for some of us have lived for four years or more on the food and we feel none the worse off. We know that we get as good food there for the money as we could get anywhere, but there is one thing that does not look exactly right that the Mess Hall authorities are trying to make us do.

When we leave school for a couple of days we do not eat in the Mess Hall, but we have paid for those meals we have missed. We do not get any money refunded for the meals missed and we do not kick about this (for a wonder).

All right; here is our real grievance: Suppose when we leave school for a day or two, or happen to miss one meal, and tell some friend of ours he can eat in our place while we are absent. This friend eats there, and when he goes to the Bursar's office to pay up some fees he finds that a meal is charged to him and they demand payment. It is not the big sum of money that we have to pay for one meal, but it is the principle of the thing. We miss several meals and get no refund, but just as soon as our friend eats a meal in our place they want to charge extra for it; in other words they are trying to receive payment twice for the same thing. Is this right?

One case is known where two men were out of town for one meal. One of the men at the table had two girl friends out for dinner to take the places of the two men who were gone; the next day they tried to collect for the two girls' dinner. It is not that the man did not want to pay the money, for this dinner was cheaper there than he could have gotten it anywhere else. But, as we said before, it is the principle of the thing. Again we ask you, is this right?

Probably we are wrong in our judgment, and if we are we stand ready to be corrected. We would like to hear the grounds the Mess Hall authorities have to charge twice for the same meal or else we would like to have the privilege of letting our friends eat in our place without sending them a bill for it.

Hon. J. Stitt Wilson Spends Four Days Here

(Continued from page 1.)

undertaking in the world—laying the foundations of a man—and has not adequately gone down to bed rock.

"This misdefinition precipitated the World War and will involve us personally in tragedy and destruction if it is persisted in."

Another fault in college education he found in the thought that there is too little consecration to convictions.

"Students move in masses, dress alike, wait to see what their clubs and fraternities will do and then follow like sheep. This blights strength of moral character and puts cotton strings in backbones instead of nerves."

On the subject of religion Dr. Wilson declared that "the cross is not a symbol: it is something you have in your soul whenever you accept a sense of moral responsibility."

He urged the students to be individual in their religion and not to allow someone else to do their thinking for them.

"There is no greater sin than to believe something just because someone else believes it. Think your own way to God! Your own heart, your own will, your own conscience must lead you!"

"It is not whether Calvin found peace in one creed or whether Wesley found peace in another. It is your own problem and you must go it alone!"

"Some people think that when you go to heaven that they hand you two crowns and a psalm book and say 'Sit there and sing.' Deliver me from a heaven like that."

Editor's Note:—It was impossible to get the write-up of the last address on Thursday night, due to the fact that the paper goes to press before it took place. It is hoped, however, it will be in next week's paper.

We note that Prof. Johnson immediately lit one of those suckers as soon as he got outside after the lecture by Dr. Wilson last Tuesday morning. This goes to prove that Prof. Johnson is still right much of a "Sucker."—College Observer.

C. V. Stevens Injured In Woodshop

C. V. Stevens, a Freshman Electrical Engineering student, had two fingers of his left hand severed while working in the woodshop Thursday afternoon. The accident occurred while Stevens was working on the rip-saw. He was immediately rushed to Rex Hospital, where he received medical attention. A report from the hospital this morning stated that he was doing nicely.

Stevens' home is at Biltmore, N. C.

Student Forum

A Third Dimension Club

Men, I have been thinking for some time that there was something lacking at State College. But I did not know how to express it until I heard J. Stitt Wilson talk about the "Third Dimension." That is one thing which a majority of us lack in one respect or another. If we had it, you would not hear of or see cases of dishonesty, impurity and untruthfulness that we hear and see on our campus.

We have a Y. M. C. A. which does a great deal of good on our campus. But it is not reaching everybody. I sincerely believe that if we had a "Third Dimension Club," it would cooperate with our Y. M. C. A. A club in which the members would always stand for the right thing. We could find no better words than those of J. Stitt Wilson, "Moral responsibility for the welfare of the whole human race." We could come nearer home if each member of this club would assume as his personal task, "Moral responsibility for the welfare of State College students."

Men, I believe a club of this nature would grow among the student body until State College would be turning out men with an education of three dimensions. I would like to hear some of your opinions on this topic.

H. E. SPRINGER.

Why Not Have a Press Club?

Quite a bit has been said pro and con about the number of different organizations on the campus. It seems at times that we ought to do away with some of them. Then, again, when we realize the extent to which the college is expanding, the number of new departments arising and the new courses offered, it seems necessary to start a club or society that will lend its energies toward advancing the interest of students in the subject matter taught in that particular department of the college.

The Department of Journalism has an able man at its head and about fifty or sixty students, out of which the majority of the men composing the staff of the various college publications are chosen. Yet, if you will notice, we have no functioning organization, such as a press club, which will enable these men to meet and discuss the important facts in this particular field of endeavor.

A great number of the larger institutions of the country have met this same proposition and organized a press club. Take, for example, Syracuse University; a press club was organized in 1920 to promote a spirit of fraternalism among the students in the Department of Journalism. Since its formation the club has been active in bringing before it prominent journalists, who have given them the benefit of their experience in the newspaper world.

We could do the same here. There are men here who are interested chiefly in chemical engineering; they have the Chemical Society. Those taking courses in the School of Agriculture have the Agricultural Club, and so on. Yet, those who are interested in journalism have no press club. It would not be wise to organize a new club just for the sake of having it and because we know we could get the fellows to join it. But, rather to be a real live organization, performing a real service to the college.

We have the men. We have the need for such an organization. So, why not have it?

J. PAUL SHAW.

Until somebody invents an automobile that can't speed at street crossings, there never will be much fun in driving in a city.

HOUSE OF STUDENT GOVERNMENT AMENDS CONSTITUTION AND BY-LAWS

At the meeting of the House of Student Government held Wednesday evening, the following amendments to the constitution of the Student Government of the College were suggested.

According to the constitution, any amendments to it must be voted upon by the student body as a whole. The first four below will be brought before the students and will be voted upon on April 4. Any changes in the by-laws or the freshman rules need not be brought before the students.

1. To amend Section 1, Article V, of the constitution to read as follows:

MEMBERSHIP. The Legislative Department shall be known as the House, and shall be composed of the sixteen members of the Council and another group elected as follows: Membership from each school shall be according to the number of undergraduate students enrolled in that school. Two members from each school shall be elected from the freshman class at large. The other three classes shall have twenty-two members, to be apportioned by the Student Council as follows: The total number of undergraduates enrolled in the second quarter shall be divided by twenty-two. The constant thus obtained shall be divided into the number enrolled in each school to obtain the number of representatives for that school. In the event of a fraction, the nearest whole number shall be used. One-third of this number shall be allotted to each class, viz., senior, junior and sophomore. In case this number is not exactly divisible by three, the remaining members shall be elected from the senior class: *Provided*, that no school shall have more than fourteen members nor less than three members of this twenty-two. The

freshman members shall not serve until the beginning of the second term.

2. To amend Section 1, Article VI, of the constitution to read as follows:

MEMBERSHIP. The Executive Department shall be known as the Student Council, and shall be composed of sixteen members, elected annually. All candidates, to be eligible to House or Council, must have entered college as a freshman or must have had one year's residence in the college. Failure to hold class rank, or to make class progress, constitutes ineligibility from that class. The members shall be allotted as follows: Five members from each of the school of Agriculture, Engineering, and Science and Business. These shall be divided as follows: Two seniors, two juniors, and one sophomore. One member from the freshman class at large shall be elected at the beginning of the second term.

In the event that the Board of Trustees of the college shall increase the number of undergraduate schools, the Student Council shall reapportion the number of representatives for each school so as to give the new school representation on the Council, but the total membership shall not be increased.

3. Article VI, Section 8. The Court of Appeals shall be com-

CONCERT PROGRAM (9:45-10:10 A.M.)

By Mrs. W. D. Parry

On the Pipe Organ

Sonata in C Minor (First Movement).....Guilmant
Andante Cantabile.....Tschaikowsky
Elegy.....Tertius Noble
Even Song.....Johnston

THE RAYE ORCHESTRA HAS BEEN ENGAGED FOR NEXT SUNDAY

MEREDITH NEWS

By LEONE WARRICK

Thursday evening, March 9, at eight thirty, Miss Emily Parsons of the faculty of the School of Music gave a vocal recital in the college auditorium. Her program was well-chosen, containing German, French, and Italian songs, some from the Old English and several selections from modern composers. Her encore songs were particularly charming.

Miss Parsons' voice is a beautiful lyric soprano, and she sang the most difficult numbers on the program with grace and ease, which betokens long practice as well as native talent.

Miss Marion Phillips was the accompanist, aiding in the interpretation of the songs without drawing attention to the accompanist, which indicates a high degree of perfection in the art. The auditorium was well filled, and there was much applause. The stage was beautifully decorated with flowers which were gifts from friends. All these testify that Miss Parsons is very popular, both at the college and among the townspeople.

The first of the graduating recitals of the year was given Monday afternoon, March 23, by Annie Elkins.

She performed with ability, which did credit both to herself and her instructors. Some of those pessimists who say there is no art in America might have been compelled to revise their opinions if they had had the privilege of listening to this recital. The program in itself was one of rare beauty, and the delicacy of touch and sensitive interpretation of the pianist brought out the full meaning of the music.

Miss Elkins is well known and popular at Meredith, being manager of the Glee Club and possessing one of the best voices in that organization. The stage, covered with flowers sent to her by classmates and friends, and the corsage she carried (which was almost as big as her diminutive self) were visible testimony of her popularity.

The ushers were: Misses Elsie Elkins, Mary Katherine Elkins, Inez Herring, Mary O'Kelly, Daisy Holmes, Grayce Butler, Blanche Dellinger, and Burvelle MacFarland.

We feel that Miss Elkins has cause to be proud of her achievements in music and we predict success for her along that line in the future.

In the inter-class basketball series three games have been played. The first of these was between the Juniors and Freshmen. The score was 39 to 4 in favor of '26. The line-up:

| | |
|--|-------------------|
| Juniors | Freshmen |
| Forwards | |
| Dorothy Yates | Sara Oliver |
| Bessie Jackson | Lillian Walters |
| Guards | |
| Margaret Eagles..... | Katie Lee Walton |
| Jane Beavers..... | Aurelia Garren |
| Center | |
| Grace Neathery..... | Mary Cheves |
| The other two games were between the Sophomores and Seniors. The Sophs won in both games, with scores of 56-19 and 49-12. Line-up: | |
| Seniors | Sophs |
| Forwards | |
| Edith Morgan..... | Lois Stafford |
| Iona Daniel..... | Lorraine Sawyer |
| Margaret Overton..... | Genaria Honeycutt |

Winnie Rickett.....Mary Herring

The Freshman Class has elected the following officers for the year 1925-'26: President, Madeline Moore; vice-president, Dorothy Dunning; secretary, Dorothy Turlington; treasurer, Charlotte Curtis; cheer leader, Mary Rodwell Hunter.

Tuesday afternoon, March 24, the Glee Club was entertained with a swimming party and wienie roast at the School for the Blind. There were present several of the faculty of the School for the Blind and a number of friends, among whom were noticed Dr. J. A. Ellis and Mr. R. M. Warren. The event was a grand success from every point of view; the water was fine and the eats—words are inadequate to describe the banquet which was set for us! Suffice it to say that an invitation in the future will be snatched at by any one who was present Tuesday afternoon.

Breathing Troubles

"How are you feeling, ol' man?" inquired the ward doctor of one of his patients.

"Not so bad, doctor," replied the patient, "but my breathing troubles me."

"Well," assured the doctor, "I'll see if I can stop that tomorrow."—Everybody's Magazine.

There wouldn't be much of a "boy problem" if more parents tried to make themselves young instead of expecting their boys to be old.

When a man gets "more money than he knows what to do with" he always seems to know what to do with it.

Come out Saturday and vote.

FACULTYFAX

A department devoted to the problem of acquainting our student body and other readers of THE TECHNICIAN with our faculty.—E. G. MOORE.

Dr. Bertram Whittier Wells

Dr. Bertram Whittier Wells was born in Troy, Ohio. Dr. Wells' father was a "perambulating Methodist preacher," therefore very little of Dr. Wells' boyhood was spent in any one place. All

his primary education was received at the place the family happened to be, some town in the southwestern part of Ohio.

His high school education was received from the Steele High Schools of Dayton, Ohio, then considered one of the best in the country. After graduating from high school Dr. Wells then entered the freshman class at Ohio State. He received his A.B. degree from this college.

After receiving his Bachelor's degree Dr. Wells was connected with the Botany department of the Knox College, located in Galesburg, Ill., and a few years later became associated with the department of Botany at the Kansas State Agricultural College at Manhattan.

In 1916 Dr. Wells received his Master's degree from Ohio State. In 1917 he received his Doctor's degree from the University of Chicago. After completing his Doctor's work at the University of Chicago Dr. Wells became head of the Botany department at the University of Arkansas, where he remained until he came to North Carolina State College in 1919.

Since 1919 Dr. Wells has been head of the Botany department here. Besides his class work he has been very busy with research work on "galls." At the present time he has the largest collection of insect galls in America. His research work on the "development of evolutionary inter-relation of gall structures" has attracted more attention than any other one thing that

he has accomplished. He has published numerous papers on the over-growths in plants.

Many of Dr. Wells' summers have been spent studying the ecological conditions of North Carolina. Last summer he printed a paper entitled "Major Plant Communities of North Carolina."

Dr. Wells belongs to many societies in America, among the best known being: American Association for the Advancement of Science; American Botanical Society; Entomological Society of America; Ecological Society of America; Eugenics Society of America; North Carolina Academy of Science, and a Fellow in the Ohio Academy of Science.

Dr. Wells is also a member of Phi Beta Kappa and Sigma Zsi.

"Cramming"

and studying makes strong eyes tired and weak.

Coaching and Physical Education Courses In State's Summer School

Announcement Sent High School Teachers; Messrs. Miller and Parker to Conduct Courses

The State College Summer Quarter Curriculum for 1925 will include regular courses in coaching and physical education. The purpose of the courses is to enable young men now teaching in high schools to fit themselves for coaching athletics and directing physical education programs in their schools. Also to supplement the knowledge and ability of college graduates along these lines.

This is the first time State College has attempted this, but the organization, as completed, resembles a much more mature and stable department. The courses will be in football, baseball, basketball, and track. Courses will be given in physical education and outdoor and indoor recreational direction.

Mr. Miller and Mr. Parker, of the P. E. Department, will have charge of this work. It will be both theoretical and practical.

The following announcement has been sent out to all male teachers in the high schools of North Carolina and surrounding states:

ANNOUNCEMENT

Of Department of Physical Education N. C. State College Summer School

The summer session of State College will offer opportunity for coaches and teachers of physical training to take specialized courses in the department of Physical Education.

These courses in athletic coaching and physical training are arranged especially for instructors already engaged in teaching during the regular school year, and for others who wish to supplement the preparation they may have received in college. The courses take up the more important problems of coaching and are designed for the purpose of fitting men more completely to take charge of athletics and physical training in schools and colleges throughout the country.

Leaders in education now recognize the fundamental need of athletics as an important part of any broad educational program. The demand for competent teachers, supervisors, and directors far exceeds the supply. This is especially true in case of men qualified in coaching and also conducting classes in physical training. Our schools are seeking men who are college trained to take charge of their athletics; men who are versed in all phases of athletic coaching and administration. Approximately thirty states in the Union now have adopted legislation making physical education a prescribed part of elementary and secondary school program.

State College is situated in Raleigh, the Capitol of North Carolina. West Raleigh, the college community, is accessible to the city by seven minute

SPORT COMMENT

We are endeavoring in this column to give the gist of Campus opinion about sports. Because of man's inherent narrowmindedness and conceit it is most probably our own personal opinion that we're actually giving. — THE SPORT EDITOR.

THE SPORT EDITOR IS VERY ILL, with a severe case of disappointmentitis. We haven't anything to talk about and we are sorely grieved because of it. Added to this vexing circumstance has been the illness, nigh unto death, of our favorite child, The Sport Page. Despite all our efforts The Sport Page has mighty nearly petered out the last couple of weeks. We take pleasure in announcing, however, that the turning point has been reached, and both the Sport Editor and his Page are on the road to recovery, though still weak. By the first of April both should be well and going strong again, to your pleasure, amusement, or disgust, as the case may be. Meanwhile, there are one or two comments we'd like to make.

—N.C.S.—

IT LOOKS LIKE CHICK DOAK is his same old reliable self these days. He goes right along, plugging the gaps and building a team—regardless of what happens.

—N.C.S.—

THE P. E. DEPARTMENT has done right well, if we may judge by the demonstration they put on over there Wednesday afternoon.

—N.C.S.—

WE ARE GLAD TO LEARN that we're going to have a coaching school here this summer. That's the kind of thing we need.

—N.C.S.—

WHAT WITH VARSITY BASEBALL, Track and Tennis, Freshman Baseball and Track, and the P. E. Classes there seems to be quite a number of State College men training their physical side. Yet, we have to hand it to Dr. Wilson, in his first address, when he so graphically and clearly demonstrated his point by the two questions, "How many men here are on the football squad?" and, "How many are not?" Did it make you think a minute? Well, there is still a crying need for more men on the field, especially on the track.

street car service. Excellent paved roads make it accessible by automobile from all leading parts of the State.

The Frank Thompson Gymnasium. This \$225,000 building is without doubt

the finest and best equipped gymnasium in the south. The main floor is 130'x110', with an intercollegiate basketball court of maximum size and seating capacity for 2,500 spectators, without using the gallery. Two maximum sized cross courts make it possi-

ble to run off class and tournament games. The auxiliary gym or exercise room is 110'x40'; it and the main gym are equipped with full gymnasium apparatus and handball courts. The basement is equipped with 1,000 private steel combination lockers. Team training rooms equipped with private showers, and lockers, towel service room, equipment room, wrestling and boxing room complete one-half of the basement. The other half is given over to the Armory. The swimming pool is located in a separate white tiled natatorium, which is lighted by windows and sky lighting. It is 75'x30', being intercollegiate in size with sufficient room to accommodate several hundred spectators.

The Athletic Fields.—Riddick Field is the field used for intercollegiate contests. It has a seating capacity for 10,000 spectators and is equipped with football and baseball fields and track.

The new athletic field adjacent to the gymnasium is 400'x400' and is used for intra-mural sports and for all freshmen intercollegiate sports.

The Y. M. C. A.—The Y. M. C. A. is adjacent to Riddick Field and is equipped with showers, small swimming pool, bowling alleys, reading rooms, and game and society rooms.

Curriculum of Courses:

1. *Football and Baseball.*—This course will deal with both theory and practice of the sports. Equipment, rules, conditioning, systems of play, offense, defense, formations and teamwork, strategy and generalship will be covered. Fundamentals will be stressed.

2. *Basketball and Track.*—A thorough study will be made of the systems, fundamentals, rules, equipping of teams, formations from center and out of bounds, floor systems of basketball. Each individual event in track and field will be taken up and best form studied. Organization of practice and of running off meets will be discussed.

3. *Gymnastic Training.*—This course will cover the systems of physical training, conduct of classes, graded exercises in both heavy and light apparatus, drills, nomenclature and organization. Not only will sufficient work be given to be able to do the simple exercises on each piece of apparatus, but stress will be laid on the work from the teaching view-point.

4. *Group Games and Mass Athletics.* This course will include the rules, the playing and the teaching of all games suitable to the playground and the gymnasium. Stress will be laid on members of class getting practice in the putting on of these games.

NOTE.—In the coaching courses theoretical classes will be conducted five periods a week. Practice periods will be held twice a week after four o'clock.

Staff.—Mr. Miller and Mr. Parker of the regular staff will be retained to present this work in the summer session. Mr. Miller has had twelve years successful coaching experience, combined with a thorough study of physical education before becoming director of the department at State College. He was head coach at the University of Missouri for five years; during this time his teams never finished below second place in the Missouri Valley Conference. Mr. Parker had his training at Springfield College, the leading college of Physical Education. He was captain of basketball here where the game of basketball originated. Mr. Parker, in addition to his study of physical education, has had three years of successful coaching in the colleges of Michigan. (Signed)

T. E. BROWNE,
Director Summer Session.

That's All

IS NORTH CAROLINA AIDING HER FURNITURE INDUSTRIES?

By HERMAN BAUM, '26

He hailed from Michigan, not Missouri; nevertheless, with him, seeing was believing.

"When one mentions Grand Rapids," he said to me one day, "naturally the first thing that one thinks of is furniture."

"Of course," I replied; "and when one mentions the name of another city in your state, Battle Creek, the first things that one thinks of are those somewhat synonymous terms, sawdust and breakfast foods. Is it true that breakfast foods are nothing more or less than by-products of the furniture industry?"

"Hardly that; but, you see, Michigan is the center of the American furniture industry. We make practically all of the furniture used in this country, at least all the good furniture,

purpose of our visit for fear that Professor Wheeler would say that there was no instruction given in furniture manufacturing and that the state was really doing nothing to help these industries. I expected such an answer, and was more than agreeably surprised when I was told the opposite.

Under his guidance we were taken on a tour of inspection of the shops. Surprises came thick and fast. We were conducted to a classroom where a group of students were at work. "This is a class in furniture designing," said Professor Wheeler. "Here the student begins to learn the fundamentals of the furniture art. They make a study of the various periods under which furniture is classified and are taught to design pieces representing the various periods. In addition,

edges on wood and flutes columns. There were saws of every description: rip saws, universal saws, band saws, jig saws, and dado saws which cuts grooves in boards. There was a boring machine for cutting round holes in wood. To my great surprise I saw a machine for boring square holes. This was known as the mortise machine. There was also a machine for making the other part of that joint, the tenon. There was a drum sander, a disc sander, and a belt sander. The use of all these were explained in detail. We were shown the paint room where the finishing of furniture is studied—where birch and poplar are transformed into mahogany.

"Now that you have seen the equipment," said Professor Wheeler, "I will show you what is being made by them." He then showed us a collection of articles that had been made by the students. Here I received my real surprise.

"Do you mean to say that all these beautiful articles were made here in the shop by students?" I asked in surprise.

"Yes," was the reply. "These things that you see are only a small part of the things that are made here annually."

There before us was a collection of beautifully carved floor lamps, cedar chests of every shape and description, table lamps, candlesticks, various kinds of tables and chairs, a walnut four-post bed, smoking stands, and in fact practically everything that one would find in a well-stocked furniture store. We were told that, besides these, practically all the furniture for the college dormitories and laboratories are made here. All of the tables and desks used in the new dormitories are products of the woodshop. These articles have an annual value of approximately five thousand dollars at a saving of more than twenty per cent to the college. Besides these, the articles which the students make for their personal use will amount to several hundreds of dollars each year.

"The college is offering a two-year course in furniture designing and manufacturing to mechanical engineers, as their professional training is especially suited for this industry. North Carolina now ranks second in the states in the production of furniture, the value of the products running into the millions each year," stated Professor Wheeler. "Michigan is the only state that is ahead, but it

won't be long before we pass them, also."

"I think it is time for us to leave," said my friend from Grand Rapids. With him, seeing was believing, and he had seen!

STANDING OF COLLEGE RIFLE TEAMS OF SOUTH

The North Carolina State College Rifle Team has practically won the Fourth Corps Area Rifle Match by winning the third stage of the shooting. We are now fifteen points ahead of the nearest competitor.

The scores for the third stage are given below:

Back pluck to win against luck and you'll sometimes lose, but always win if you keep on doing it.

Natural Mistake
Tommy, with clothes obviously in need of repair, was selling his papers on a cold and windy street in Chicago. "You poor little boy! Where is your mother?" inquired the pious old lady. "She's in a land of sunshine, where there's flowers all the time, and no cold wind ever blows," chanted Tommy.

"Ah, so sad!" sighed the good lady, "to die and leave you so young."

"What-de-ye-mean, die? Me mother ain't dead. She lives in Los Angeles."

There are lots of jokes about the young father's walking the floor at night with the baby, but in your own experience, was it the father who did the walking?

CLASS IN FURNITURE CONSTRUCTION AT STATE COLLEGE

that made elsewhere being of an inferior quality, and even the amount of that is negligible, and then—"

I don't know what he intended to say next, but he had said too much already. "Wait," I said; "what about North Carolina?"

He laughed. "North Carolina! You have a few chair factories, but what are you doing to develop your industry? In Michigan we have schools that are training men in furniture making. They are continually working to develop better furniture; they are not 'jack-legs' who take a hammer and a saw and build a chair. Our furniture is designed and is built scientifically."

He talked on for some time, telling me of the fine quality of Grand Rapids furniture. He was a booster for Michigan and I was a booster for North Carolina, and for a while I thought he had me beat, and would have been glad to change the subject under discussion to that of cotton mills or highways, but he would not give me that opportunity. He talked on about furniture, more furniture, and still more furniture.

I was thinking of his question. "What are you doing to develop your furniture industry?" I knew that North Carolina had furniture factories, dozens of them, but then, what was the state doing to develop the industry? Surely something, but what was it, and where was it being done? I must confess I did not know.

Just at the moment when it seemed that I must acknowledge my defeat and admit Michigan's superiority, a happy thought struck me. What about State College! Perhaps something in the line of instruction in furniture manufacturing was being taught there. It was a long chance, but it was my only one. "Come with me," I said to him in as confident a manner as I was able to assume at that time. "I will show you what North Carolina is doing for her furniture industries."

He seemed surprised, but he agreed to accompany me, and together we rode out Hillsboro Street to the North Carolina State College of Agriculture and Engineering. Here we were directed to see Professor F. B. Wheeler, who is in charge of the woodshops at the college. Professor Wheeler, as I afterwards learned, is a graduate of State, having received a B.S. degree in 1912 and an M.E. two years later. He had recently studied furniture manufacturing and designing at Grand Rapids. During the war, Mr. Wheeler was chief draftsman for the Chemical Warfare Service in France. He has had a wide range of experience in shops and is probably the most capable man in the state for directing the department of which he is in charge.

I hesitated a little in explaining the

they are taught to recognize graceful curves and use them in their designing. The different types of construction and the relative strength of furniture joints are studied. Besides the classroom instruction, shops are maintained where the students do actual work.

We were led up a flight of stairs to a long room in which were rows of benches. "Here," our guide explained, "is where the freshman gets his first experience in wood working. He is first taught how to use the simplest tools, such as a saw and hammer and square. Next he must learn the use of the plane, chisel, and marking gauge. He constructs by hand a mitre box and the various joints. When this course is completed, he learns to use the wood-working machinery which I will now show you."

He led the way down stairs again and to a very large room which was filled with every conceivable kind of machine, each driven by a separate motor. There were two long rows of lathes for making round articles; a planer for smoothing lumber; a jointer for smoothing the edges of wood; a sticker which cuts a long piece of wood to the exact same dimensions throughout; a shaper which makes moulding and cuts various kinds of

"St. Elmo" History Rivals Story In Its Romance

The new William Fox offering, "St. Elmo," starring John Gilbert, showing at the "Y" Picture Show, Tuesday, March 31, has a history that in romance and thrills even rivals the story of the impassioned novel.

Augusta J. Evans, author of "St. Elmo" and many other popular novels, published this book in 1866. For it, she received the enormous sum of \$25,000, and in 1866 \$25,000 was a fabulous figure for a novel. It isn't so small now!

The book swept the country by storm and was the literary sensation of the day. Towns, steamboats, and hotels were named after it and even "St. Elmo punch" became a popular beverage throughout the South. "St. Elmo" took an important part in the literary development of young Americans. It does to this day.

Notwithstanding the wide popularity of the novel, Augusta Evans refused all offers from stage producers until a few years before her death.

On December 13, 1909, the stage version of "St. Elmo," adapted by Willard Holcomb, opened in New York at the Academy of Music. Interesting enough, William Fox, who has made the screen version of "St. Elmo," now owns the Academy of Music, where "St. Elmo" ran so long and so successfully as a play.

After its Broadway run, "St. Elmo" toured the country and was accepted enthusiastically by the theatre-going public.

In the screen version of the famous

novel, William Fox offers a striking picturization of the dynamic, the impassioned St. Elmo. John Gilbert in the title role gives a performance that will make new friends for him. He fairly electrifies with the intensity of his work. Barbara La Marr as the girl who nearly ruins his life—the languorous, soft-spoken feminine Janus—has a role that gives her ample opportunity to demonstrate her histrionic powers. Bessie Love, the winsome one, completes the triangle. Others in the cast include Warner Baxter, Nigel De Brullier, and Lydia Knott. Jerome Storm directed the picture, which was adapted by Jules Furthman.

"The Alaskan" is True Picture of Sturdy Pioneers

To do justice to the men who pioneered Alaska was the primary motive of every one connected with the film production of James Oliver Curwood's gripping novel, "The Alaskan," says Thomas Meighan, the star of the photoplay.

"In playing the title role, I felt a weight of responsibility towards the men of Alaska, both the sturdy pioneers of yesterday and the native Alaskans of today.

"It isn't so long ago that the whole world was ringing with the stories of gold found in the far north. The magnetic cry drew adventurous hearts from every quarter. Scarce a town or village in the whole American continent but contributed one or more of its sons to the mad stampede.

"The struggles and privations

through which they went, often in vain, have formed the basis of many a stirring story. Jack London, Rex Beach, Robert W. Service and many others have painted the Alaska of those days in colors which will never die.

"Then came James Oliver Curwood with another story of Alaska, a different story. 'The Alaskan,' while it is planted in the days of the gold rush, spreads its branches into a more recent period.

"The desire to make 'The Alaskan' a true picture of the pioneers prompted Herbert Brenon, who produced it for Paramount, to make the most elaborate preparation. He believed, and rightly, that the subject merited careful treatment.

"The trip into the north was not a pleasant one. We worked too hard for pleasure, and all the time we fought bad weather and unexpected difficulties. Only the determination to make the photoplay a really fine representation of the hardy northerners held us together. In the face of constant discouragement, the fast which supported me, headed by Estelle Taylor, John Sainpolis, Charles Ogle, Frank Campeau and Anna May Wong, maintained a cheerful outlook.

"Having realized, for the first time, something of the terrible hardships of those northern pioneers, it is with humility of heart that we offer 'The Alaskan' to the world, and particularly to the men whose lives it portrays.

"We made it with the idea that the world might know them as they were and are. If, from them, there comes a word of praise, we shall feel that our work has not been in vain."

"The Alaskan" opens at the "Y" Picture Show, Thursday, April 2.

House of Student Government Amends Constitution and By-Laws

(Continued from page 2.)

posed of the dean of students and the president and vice president of Student Government. The purpose of this court shall be to determine whether a student convicted by the Student Council shall be entitled to a new trial by the Council. It shall not have the power to reverse a decision of the Council. To obtain a new trial, the student must prove to this court that the Student Council committed error in conducting his trial. A simple majority shall decide the verdict of this court.

4. Article VII of the by-laws shall read as follows:

Student Council trials shall be secret, but a full account of the evidence for the prosecution shall be read to the defendant after he has given his evidence. He shall then be given an opportunity to refute this evidence against him. No part of the trial shall be made public except the verdict of the Council.

5. Article VIII of the by-laws shall read as follows:

Any rule, regulation, by-law, or amendment to the constitution must be advertised in the college paper for two weeks before it can be brought before the House of Student Government for action. This rule may be temporarily suspended by the unanimous consent of the House members present.

6. That Section 7 of the freshman rules read as follows:

The freshman class shall be required to meet on the first and third Thursdays of each month throughout the year for the purpose of learning and practicing yells and songs. Absences will be excused only on the same basis as class absences.

7. That the House of Student Government respectfully requests the faculty to include instruction in the constitution and by-laws of Student Government in the course in citizenship to be given each year to the freshman class.

Kampus Kindergarten

Lesson One

I see the professor. He is a funny looking man. The professor does not get very much money. He has got a book in his hand. In the book are the names. Behind the names there are marks. The marks do not mean much. I do not like the professor. The professor has got a necktie. He wears the necktie every day. The professor goes into the classroom. The pupils are afraid of the professor. The professor makes the pupils laugh. If they do not laugh they do not pass. They like to pass. The professor calls on the pupils. The pupils were out late. They cannot answer the professor. The professor gives a test. The pupils do not like a test.—Minnesota Daily.

"THE ALASKAN"

Kampus Kracks

By WRIGHT

Father: "My son, I'm afraid I'll never see you in heaven."
Son: "Whatcha been doing now, Pop?"

A freshman had just deposited a nickle in a pay station.

Operator: "Number, please?"
Freshman: "Number, hell! You had better give me my chewing gum."

Smoth Brother: "I think there's company downstairs."

Smaller Ditto: "How'd you know?"
Small Brother: "I just heard mama laugh at papa's joke."

Sweet Young Thing: "I'd like to buy a petticoat."
Floor Walker: "Antique department on the third floor, Miss."

Tillie: "I thought you were going to kiss me when you puckered up your lips just now."

Willie: "No-er-er, that was just a piece of grit in my mouth."
Tillie: "Well, for heaven's sake swallow it, you need some."

Caller: "What a cute baby! What's he saying?"
Perplexed Father: "I don't know; his mother carries the code book."

No. 1: "Let's walk around the corner and get a drink."
No. 2: "Hell, no; let's run!"

Tom was a bashful chap, so he decided to propose over the telephone.
"Mabel, I love you," he blurted out,

when he got her number. "Will you marry me?"

"Of course I will, Jack," came the answer. "Why didn't you come and ask me, you silly boy?"

As soon as Tom recovered his wits, he called back. "Then you'll have to break the news to him yourself. I'll be hanged if I will."

Willie (at table): "I want my pudding now; I don't want any old meat and—"

Father (sternly): "You keep your mouth shut and eat your dinner."

"My goose is cooked," said the proud housekeeper, as she announced her Christmas dinner."

He (after the show): "Shall we walk or ride back home?"
She: "I never walk back home."
He: "Hot dawg! Let's ride."

Yes, girls, our sheiks are like Fords, only their clutch is different."

First Frosh: "Why is it that cats are always whining?"

Second Frosh: "Don't know. Why?"
First Frosh: "Cause they have so many ukulele strings in them."

Prof.: "Mr. Smart, what is work?"
Sleepy Stude (stretching and opening one eye): "Everything's work."

Prof.: "Do you mean to tell me that this table is work?"
Stude (closing eye and assuming former attitude): "Sure; woodwork."

Mrs. Nubbs: "Will my boy learn to drink at school?"

Professor: "Sorry, but we can't hardly find enough for the faculty."

You Tell Him!

Student (homeward bound, to conductor): "I think my ticket blew out of the window."

Conductor: "Don't try to fool me!"

Student: "But it did."

Conductor: "Maybe it did, but don't try to tell me you were thinking."

They Were All Wet

"My daughter sprang from a line of peers," said the ardent father.
"Well," said her feller, "I jumped off a dock once myself."

They sat alone in the moonlight,
And she soothed his troubled brow.
"Dearest, I know my life's been fast,
But I'm on my last lap now."
—Gamecock.

Phil: "Why do you wear those riding clothes when I never see you on a horse?"

Betty: "Oh, it's just a habit."

The Height of (?)

Goin' down by the post office?
Yeh.
Mail a letter for me?
Sure.
Wait'll I finish it.
All right.
Gotta stamp?
Yeh.
Put it on for me?
Uh-huh.
Say, what's your girl's address?

The man entered a store. "Have you an adding machine?" he asked.
"No, sir," answered the clerk, "but we have some nice counters."

Dumbest: Why do you only use one finger when you type?
I'm saving the others for an emergency, you egg.

"Do you like Lamb's Tales?"
"No, but I'm crazy about beef stew."—The Miami Student.

Rastus: "Wyfo' you call your gal 'Vaispar' Sambo?"
Sambo: "'Cause all the boilin' water in the world ain't gonna turn her white."

N. C. S. Senior: Do you know how to roller skate?
N. C. C. W. Senior: Yes, but it took three of them to hold me up the first time.

Whistle This on Your "Uke"
Tramp, tramp, tramp, the "Cakes" are walking;
Cheer up, "Flappers," they will check, they will check,
And beneath the starry sky you shall kiss their lips again
In the prison of their own beloved arms.
—College Observer.

SHORT JABS AND LONG HOOKS

Prof. Williams: "What is all that noise out there, Mr. Morse?"
Morse (who was knocking the ashes and burned tobacco out of his pipe):

"I am just shaking down the furnace, professor."—College Observer.

Upper Classman: "Brown appears to be a pre-developed man."

Unsuspecting Frosh: "What do you mean? I always thought him rather uncouth and ignorant."

U. C.: "Quite so; I mean that he is

a rather seedy individual."—College Observer.

"Oh, Min!"

I took her by the hand,
I led her to the altar;
Now she has me hitched
With a matrimonial halter.
—College Observer.

Full range of sizes, 14½ to 17.

Traction Tom says:

"SPRINGTIME
IS OUTDOOR TIME"

DEAR FOLKS:

You know, there's not so much difference between us humans and the rest of the animal family, after all.

And Springtime proves it.

Just as soon as the snow disappears and the earth begins to get warm and moist, and the soft breezes and pleasant sunshine get back on the job, we all feel like kissing stuffy houses good-bye and lighting out into the big outdoors where we can watch the most beautiful thing in the world—the birth of Spring.

And we can all do it.

Just take a car to Lassiter's Mill and spend a few hours there in the woods and fields.

I'll say life's worth living in the Springtime!

I thank you.

Yours for real pleasure,

Traction Tom

Sunshine Garage Re-opens Its Doors

"Skipper" Stephens Sells Out;
Garage Goes Under New
Management

FAGGED FAMOUS FORDS FIXED
FROM FENDER TO FENDER

When in his palmy days "Goat" Stephens, alias "Skipper" Stephens, owned, operated, bossed, claimed, and reclaimed the garage generally known as "Sunshine" garage, this piece of real estate investment occupied the entire space from the northwestern wing of 1911 Dormitory to the extreme southwestern wing of the same building. The general offices were in the north end of the locality, and all business matters were transacted therein. The greater jobs were done by old Skipper himself, while those of lesser importance were handled through the lesser department, which came under the class of "Friday Fixing Funny Freakish Fords."

Ole "Goat" became famous as a fixer of Fords, and after a long course of study under "Oil Can" Riddle, Doll Baby Hodges and Levi Hedgepeth, left for a cruise on the deep, to mingle 'mong marine motors on the tempestuous waves that roll in the Charleston harbor. The following year he returned to complete his work and receive the degree of M.F. (Master of Fords). On his fifty-first final departure to South Carolina, he sold out all of the tools and gave away all he could not sell.

This spring, the garage has reopened under a new management, with a greater number of tools, helpers, parts and other things. The owners include such characters as Levi Hedgepeth, "Romeo" Melton, Tom McCrea, and several others of noteworthy fame. In full operation, Hedgepeth is monkey wrench expert and spark plug cleaner, Romeo Melton acts as squirt can pusher, valve grinder, and puncture patcher. Tom McCrea is general overhauler, overseer, and overlooker. Freshman Brint Quinn, the side kick and funky of the place, draws his salary as "Toter of tools." He tampers, tinkers, teases, takes taps, and troubles toilers.

The garage officially opened for business last week, and the management guarantees that they will build a Ford around any Ford part that might be left in their place of business over Sunday. They guarantee to make Fords run as smooth as a red nose in cold weather, and to get wind out of wind-shields and to remove knocks from horns. They state that they will give a prize of \$50 to the owner of a car that they cannot get a knock out of, even if it necessitates shutting the motor off to stop it.

Nearly every married man knows there are two sides to every question and that one of them should never be mentioned.

Come out Saturday and vote.

PERSONAL and SOCIAL NEWS

(All social and personal news turned in. This Technician's office will be appreciated by the editor.)

—"Skinney" Warrington attended the automobile show and dances last week in Rocky Mount with friends.

—W. L. Hadley visited home last week in Charlotte.

—"Rip" Summerell spent the week-end in Lillington with friends.

—George Hurst visited his relatives in Jacksonville last week.

—"Foy" Beal was on the campus last week, visiting his fraternity brothers.

—"Pete" Little attended a dance in Rocky Mount last Friday night.

—W. R. Taylor spent last week-end in Monroe and Rutherfordton.

—Robert Browning spent most of last week with friends and relatives in Monroe.

—J. J. Wright spent the week-end in Salisbury.

—W. R. Taylor's shoulder, which was dislocated in an accident some days ago, is very much improved and he is able to be out for tennis again.

—Joe Parnell spent a few days in Tarboro last week.

—Bob Ormond went to Greensboro for a short visit last week-end.

—Carlyle Bailey spent a few days in Goldsboro last week.

—"Dutch" Holland made a short visit in Middlesex last week.

—Foster Jordan and "Bill" Shope visited friends at Carolina during the week-end.

—Charlie Shuford spent the week-end in Greensboro.

—George Studdert went to Winston-Salem last week.

—Jim Weaver, Stuart Gasten, Frank Chedester, and Jimmie Campbell flivvered to Asheville Wednesday and returned Sunday.

S. E. Holt and S. E. Shepard spent the week-end at the latter's home in Greensboro.

GOING TO BLUE RIDGE?

The Annual Student Conference will be held at Blue Ridge, June 16-25. Five hundred outstanding students, representing the colleges and universities of the South, and a number of student secretaries and college professors are expected.

Some very noted men have been secured to give daily addresses at 11 o'clock each morning. Among these are the following:

John R. Mott, New York.
J. Stitt Wilson, California.
Robert E. Speer, New York.
Kirby Page, New York.
Henry M. Sweets, Louisville.
David R. Porter, New York.
J. M. Culbreth, Nashville.

Ben M. Cherrington of Denver, who has taken special training under Bruce Curry, will have charge of the Bible Study.

There will be special classes to fit "Y" officers for their jobs. There will be classes studying social, international and economic questions which will be of interest to all.

Blue Ridge will help to answer personal questions. Are any of these questions vital to you?

What is my own religion?

How does it affect me?

How does it affect my fellows?

What are the fundamental elements of Christianity?

What do I actually know about God, Jesus, Faith and Reason, Prayer?

What is the Church?

How am I related to it?

How does all this gear into my college days?

How can I adjust myself rightly to my share of the world's job?

How can I achieve a personality which will, unconsciously to myself, convey power to my fellows?

If some of these questions are real to you, you can be assured that you will get help toward their answers at Blue Ridge.

Recreation a Big Feature

The Conference program is well balanced by work and play. The entire afternoons are given over to recreation. The Blue Ridge grounds are situated in one of the most beautiful spots in Western North Carolina, and contain about thirteen hundred acres. There is plenty of mountain climbing for those who like it, and nature study trips conducted by an expert. There is a lake on the reservation covering about ten acres which provides boating and swimming.

The tennis courts are good, and plentiful. There is a good baseball diamond, basketball court, and volley-

ball court. Intercollegiate tournaments are conducted in all these sports, and pennants awarded to the winners.

State Should be Well Represented

Last year State sent a delegation of nine, headed by "Sammy" Homewood, the Freshman coach. The University of North Carolina has been sending delegations of forty and more. This year State should send a larger delegation and one that represents every phase of campus activity. Any college student is entitled to go. If you are interested, drop by the "Y" office and talk it over with the secretary.

"Flash" Dickens Returns

Fletcher Dickens, the champion Room Stacker of all times, returned Monday to find that others had done to him even as he had done to them on other occasions. Dickens has been noted for his accomplished art, and many were the rooms that he had stacked. Many friends waited and waited for a chance to stack his. Many long moons they tarried in patience, waiting for the time when he and his room-stacking cohort, Kemp Reese, would leave town for a week, or even a day.

The day came. They went home, and, as the old saying goes, "Rafs will play in the cheese box when the cat is away." Well, verily, they did play. There was a regular reunion of his friends down in his room. For three days there was a continual hammering and rumbling like distant thunder. Debris mounted high. Chair upon chair, mattress and bed upon table, and up they mounted and down they were nailed until there remained nothing that was free to move even with the earth's vibrations.

The following Monday the honored ones returned to their abode of quietude, and as the seasoned veteran, Dickens, of many a stacked affair, looked on the job, he compared it with

the past accomplishments, and remarked, "Well done; well done."

"Y" CABINET LEADS AT MEREDITH COLLEGE

Last Sunday afternoon the Y. M. C. A. Cabinet had charge of the Sunday afternoon meetings of the Y. W. C. A. at Meredith College. At 6 o'clock the meeting began and continued for about three-quarters of an hour.

After a hymn, the president of the Y. W. C. A. at Meredith introduced Mr. S. R. Wallis, who was to act as the chairman of the meeting.

The first number was a solo, which was rendered by Mr. Buck Zuckett, well known in the churches of Raleigh for his good singing. Following Mr. Puckett's singing, Mr. W. D. Russell made a short talk on the national organization of the Y. M. C. A. The third number was a talk made by Mr. Henry Bremer on the subject "Fidelity to Duty." This was followed by the singing of another hymn, after which the meeting was dismissed by Mr. Wallis.

Dr. Metcalf (to his housekeeper): "Hannah, you have been in my employ 25 years, so as a reward for faithful service I have decided to name after you this species of water beetle I have just discovered."

The nation-wide Good Roads program spells OPPORTUNITY for hundreds of engineers—

THE unceasing growth of the automobile industry, the development of long and short-haul trucking, the spread of motor-bus routes and the vital national need for bringing farm produce to its markets more speedily and at less cost—these factors have put an impetus and a pressure behind the paving industry which cannot lessen until every state is a network of hard-surfaced trunk highways with myriads of paved "feeders" reaching out into each smaller center.

The corollary to this is that the young engineer who decides to specialize in paving as a life-work is certain to find a constantly active market for his service.

VITRIFIED
Brick
PAVEMENTS

The **A₂C** of
Good Paving

ASPHALT for Filler because it makes the traffic-bearing surface a water-proof, flexible armor not subject to the cracks which follow rigid slab construction, and because repair costs are insignificant where each brick is an easily removable unit.

BRICK for Surface because it furnishes the best surface for traffic; hard, but not brittle—tough, but not rough—dense, and non-absorbent—smooth, but not "slipky"; because its fire-hardened toughness resists wear and tear so sturdily that upkeep expense is squeezed to a minimum and because any margin of higher first-cost is speedily offset by low maintenance, long life and uninterrupted service.

CONCRETE, CRUSHED ROCK, CRUSHED SLAG OR GRAVEL for Base because some one of these bases meets any conceivable sub-soil condition, and with a bedding course of sand or screenings makes the best sub-structure yet developed for modern street or highway traffic.

Send for free handbook, "THE CONSTRUCTION OF BRICK PAVEMENTS."
