## ASSISTANT PROFESSOR CERAMIC ENGINEERING HAS BEEN APPOINTED

Dr. George Reed Shelton Comes to State College From University of Saskatchewan

## HE HAS SPECIALIZED IN RESEARCH WORK

Will Have Charge of Cement Glass Enamel and Lime Industry, and Aid in Research in Development of Industry

The Board of Trustees of North Carolina State College recently appointed Doctor George Reed Shelton as Assistant Professor of Ceramic Engineering at that institution, the appointment to take effect next September. Doctor Shelton comes to North Carolina from the University of Saskatchewan, Saskatoon, Canada, where he has been carrying on important research on Portland cements for the past three years under the direction of the Engineering Institute of Canada.

Doctor Shelton received his A.B. degrees in Chemistry from Maryville College in 1911 and Cornell in 1912. He taught Chemistry and Physics in the High School at Mitchell, S. D., from 1912 to 1916. He returned to Maryville College in 1916 as Associate Professor in Chemistry, remaining there until 1918, when he became Research Assistant at the University of Illinois. He was granted his M.S. in Ceramic Chemistry at Illinois in 1920 and his Ph.D. in Ceramic Chemistry in 1922, making him one of the three men in the world who hold a doctor's degree in ceramics.

Incidentally, Dr. Shelton is the only one of the three Ph.D. men in ceramics who is engaged in academic work, the other two being in industry.

While at Illinois he carried on considerable research on the viscosity of soda-lime-silica glasses at high temperatures, under Doctor E. W. Washburn.

Doctor Shelton is the author of "The Viscosity Temperature Curves of Six Varieties of Optical Glass," in conjunction with E. W. Washburn, and "The Viscosities and Surface Tensions of the Soda-Lime-Silica Glasses at High Temperatures," in conjunction with E. W. Washburn and E. E. Libman. The report of his work during the past three years on Portland cements will appear shortly.

He is a member of the American Ceramic Society, American Chemical Society, American Society for the Advancement of Science, Sigma Xi and Phi Lambda Upsilon.

In addition to his teaching work, Doctor Shelton will co-operate with Professor A. F. Greaves-Walker, head of the department, in the research being carried on in connection with the development of the ceramic resources of North Carolina. Doctor Shelton will give special attention to the development of the glass, enamel, cement, and lime industries.

—"Charlie" Koonce, "Cato" Littleton, and "Firpo" Wilson spent the week-end in Bedford, where they attended the track meet and dances at Randolph-Macon Academy.

## ATTENTION, JUNIORS!

If you have received your Ring Order Card, please bring the card and place your order at the Students' Supply Store as soon as possible. It is very important that this be done before June 1st, in order that the rings may be delivered at the opening of school next fall.

Please co-operate with us in this matter.

RING COMMITTEE,  
CLASS OF '26.

F. K. Fogleman,  
Chairman.

## COLLEGE ENROLLMENT FOR TERM 1924-1925 APPROACHES 1,700

School of Engineering Leads With Total Enrollment of 753 Students

## SCIENCE AND BUSINESS MAKING RAPID GAINS

Short-Course Men Number 263, 163 Are Rehabilitation Students, and 1,255 Are in Regular Classes

Upon completion of data at the Registrar's office on May 7, it was found that the total enrollment for the college year 1924-1925 was 1,681. Of this number 263 are Short-Course men, 163 are Rehabilitation students, and 1,255 are Regular students.

The most significant of all the data is the steady lead taken by the School of Engineering in the number enrolled. This school has a total of 753 students, 686 of which are Regulars and 67 of which are Short-Course men who have attended the Ceramic and Electrical Short Courses offered during the year. The School of Engineering has maintained a steady and sound growth since the early days of the College, and is at present its largest school, and has the most firmly founded methods of operation. Taking up the school, course by course, we find that we have Engineering students as follows: Architectural, 44; Ceramic, 30 (short course); Chemical, 25; Civil, 157; Electrical, 239 (37 short course); Highway, 7; Mechanical, 100; Chemical Industry and Dyeing, 12; Textile Engineering, 11, and Textile Manufacturing, 128.

The School of Science and Business is largely an unknown quantity so far as stability is concerned, because it is the youngest, most rapidly growing, and most constantly fluctuating of the schools. However, it has had a very rapid growth, and at present seems to be on a steady climb toward the highest place in numbers of any school in the College. It offers a wider range of elective courses, and is growing in popularity with the students. Taking up this school, course by course, we find students as follows: Agricultural Administration, 36; Biology, 18; Business Administration, 230; Chemistry, 14; Industrial Management, 13; Physics, 8; Sociology, 11; Vocational

## TRUE STATEMENT ABOUT ARREST OF BUS DRIVER

Claims That Students Did Not Interfere With Action of Officer in Making Arrest

Because of the misleading news story given out from Durham and published by many of the state papers, we feel that a true statement should be made concerning the incident which happened Monday while our baseball team was on route home from Chapel Hill. Coach Doak and members of the team state that the officer met with no interference in his attempt to arrest the bus driver. Mr. Doak further states that there was no necessity for the officer to bring the blackjack into play, and that this was entirely uncalled for. He also says that the officer called the bus driver to see where some one had cut his (the officer's) tires. When he went near the car, the driver was forced to enter, and the officer proceeded to drive to Durham with haste. Evidently the tires were not mortally wounded else the officer could not have gotten away so rapidly.

—"Gone" Moore, L. S. Pridgen, A. F. Byrum, F. R. Brock, "Jim" Weaver, and others were Greensboro visitors last week-end.

—"Mug" Seawell, "Red" Beam, "Sheik" Webb, John Thompson, and P. D. May were Charlotte visitors Monday.

## Judge Stacy Speaks Pine Burr Society

J. G. Weaver is Chosen as President of the Society for Next Year

Chief Justice W. P. Stacy, of the Supreme Court of North Carolina, delivered the principal talk at the annual banquet of the Pine Burr Society, which was held Wednesday evening in the banquet hall of the College Y. M. C. A. The speaker was introduced by Dean E. L. Cloyd in a few well-chosen words.

Judge Stacy chose as his subject, "Our Government," and explained the organization and workings of our different governments. He pointed out many interesting features of our State and Federal governments, and showed how they work in unison. The legislative and judicial branches were discussed and compared with those of other countries. The courts of North Carolina were next taken up and explained in a highly instructive manner. Among other things, the speaker said that North Carolina is the only State in the Union in which the governor does not have the veto power.

When the talks were over, Mr. J. E. Webber, president of the society, announced that Judge Stacy had been elected to honorary membership in the society. A warm welcome was given the new member by all those present.

Election of officers for next year was then in order. The following

(Continued on page 2.)

## 1925 AGROMECK DELIVERED TO STUDENT BODY

Prized First Copy of the 1925 Annual Became Property of "Red" Lassiter

Wednesday at 1:00 o'clock a long line of Seniors could be seen in the "Y" lobby, waiting impatiently before a closed door on which was the sign—

"AGROMECK"

Those behind the door were frequently interrupted during their work of straightening accounts by cries of "Let's go!" "Let's go!"

Finally the door was thrown open. The first copy of the 1925 Agromeck was handed out to "Red" Lassiter and the wild scramble began. All afternoon the line remained. Sometimes it dwindled to a mere half-dozen men; at other times it reached clear across the lobby to the street.

During the hurry and rush outside the silence was occasionally broken by, "How does it look, Tom?" While inside the air was fanned with the turning of pages and the shuffling of cards.

"He's O. K. here," says Wray.

"One dollar military fee here," says Melton.

"D— the military," comes the reply from the outside as the student reaches for his roll.

Thus the afternoon rolls by till 7:30, when all 465 copies of the book are gone and the tired workers inside thank Providence "there ain't no more."

For tomorrow and the next day they will do the same thing all over again.

## Professor Stretcher To Speak Before Merchants' Association

Professor Edwin E. Stretcher, of the Business Administration Department, will address the annual convention of the North Carolina State Merchants Association to be held in Charlotte, May 19-21. He will discuss one phase of the convention slogan, "More Sales; Same Overhead."

## TECHS CRUSH COUNTRY CAKE-EATERS IN USUAL EIGHTH INNING RALLY 7-5

Y. M. C. A. HAS  
A FEED FOR 100  
PER CENT MEN

T. E. Johnson Principal Speaker of Evening; Other Interesting Talks

Last Tuesday evening the new dining hall was the scene of one of the best feeds the Y. M. C. A. has put on this year. At this time the Y. M. C. A. was host to one hundred and twenty-five of the one hundred per cent members of the Bible Study classes that ended after an eight-week's run last fall.

Music was furnished throughout the evening by the Hawaiian Club and the "Y" Edison. An elaborate three-course dinner was served.

Following the dinner a number of short talks were made. The principal one being that of T. E. Johnson, civil engineer, who stressed the value of the Y. M. C. A. training to men after they are out of college. He pictured the influence, be it good or bad, that the college men have on the country after graduation. Mr. Johnson stated that by personal experience he is convinced that a Christian influence is absolutely essential to enter satisfactorily upon an engineering career.

To eulogize the Y. M. C. A. work and its accomplishments, he said: "I do not believe that Percy Marks, author of the 'Plastic Age,' represents what exists on State College campus, when he tries to give a cross section of a typical American college." Mr. Johnson thinks that the author of this popular novel has exaggerated ideas and that insufficient credit is given to those who really stand up for true morals, such as the Y. M. C. A. upholds.

Professor Clark of the English Department, gave a short talk on the great service the Y. M. C. A. rendered during the World War.

John Curry, newly elected President, acted as toastmaster. He urged the boys to back him up in next year's work for the Y. M. C. A.

Mr. E. S. King recommended a letter of gratitude to the steward, Mr. Harris, for the splendid services he has rendered the "Y" during last year.

As a parting thought C. R. Hall, ex-president, led in a number of songs, followed by a yell for Mr. Harris.

## MATHESON TO HEAD JUNIORS NEXT YEAR

He is at Present a Member of Student Council and the Varsity Baseball Squad; Other Officers Elected

At a meeting of the Sophomore Class last Wednesday evening J. F. Matheson was elected, by a large majority, as president of the Junior Class of next year. Matheson was vice-president for the Sophomore Class, and is at present a member of the Student Council and of the Varsity baseball squad.

The retiring president, "Tommie" Harrill, is to be complimented on his success as leader of the Sophomore Class. It is very important that the president of the Sophomores should be a strong man, and we feel sure that "Tommie" has filled his place well. He is also on the Varsity baseball squad.

The other officers who were elected are as well prepared to fill their places as is the president, and there is no reason why the Junior Class of next year should not be just as strong as any that has ever been at State College.

The following are the officers who were elected:

J. F. Matheson, President.  
R. L. Browning, Vice-President.  
F. M. Chedester, Sec. and Treas.  
J. E. Davis, Poet.  
R. R. Fountain, Historian.  
H. K. Plott, Reporter.

Doakmen's Eighth Inning Rally Counts for Four Runs and Sews Up Game

## BOTH TEAMS SCORE IN THE FIRST INNING

Coffee and Gilbert Each Garner a Homer With One On; Good Pitching and Loose Fielding Feature Game

Monday afternoon, May 11th, State's varsity baseball team journeyed over to Chapel Hill and whipped the Tar Heel aggregation in its own back yard.

After being led by two runs for as many innings "Chick" Doak's hard-hitting Techmen staged their customary eight-inning slugging spree, with two away by the fan-out route, and climaxed by Gilbert's circuit-swat with one on snatched victory from defeat, as is becoming their habit. The game was hotly contested all the way, though marred by loose fielding and a seeming lack of pep on the diamond.

The surprise of the occasion was the fact that scoring opened in the first. State was first up and counted once. Carolina followed with two. In the second neither side scored, but in the third each side counted again, State twice, and the count was knotted, 3-all. The Tar Heels pushed over another in the fourth and again in the seventh, while State failed to count until the eighth, when four men crossed the platter for the final scoring of the game. Each team threatened in nearly every frame, with State holding the edge throughout in this respect. The Techmen garnered 10 hits to Carolina's 8 and had quite a number of men left on the big sacks during the game. Selton did an inning go 3-up and 3-down.

The fire-works began in the first, when Shuford, tech's lead-off man, hit for a single, was sacrificed by Gladstone, and scored on Correll's sharp single to center-field. Correll was out at second, trying to stretch his hit. Carolina retaliated full-measure by Coffey's homer over first base, after Hatley had received a free pass. In the third, Hill, Tech twirler, walked, Shuford was safe on Johnson's error, Gladstone filled the bases with an infield hit, and Correll brought in two runs with his second hit of the day. Holshouser then fanned Wade and Lassiter. In the Tar Heel's half of the same inning Gilbert's error gave Gibson a base and Coffey's second scorcher scored him.

Stanton's long sacrifice fly in the fourth scored Thomas for the University boys' fourth run. And in the seventh Jonnston's error at third gave Bonner a base. He stole second and scored on Hatley's hot one to center field. The fourth and fifth found Carolina bats silent and Holshouser and his teammates managed to keep the plate clean of State runners from the third through the seventh.

The Doakmen Rally  
State's ardent fans began to lose hope for the eighth inning rally only after Gladstone and Correll had tried in vain to connect with Holshouser's fast ones. Davis went to bat for Wade who had been there three times with—

## Editorials

Have you tried the new college song?

It is now proposed to give intelligence tests to students desiring admission to colleges. Glad we got in before they started it.

We confess that editorial prospects for next year are rather dull just at this time. The point system is settled, and there will be no Legislature to stir up excitement.

As we look out over the athletic field we see the new Animal Husbandry building peeping over the hill. We almost envy the boys who will come here within the next few years.

While looking through an old *Agroneck* recently we found the following: "WANTED: Several more paths across the campus grass. The checkerboard effect is beautiful and students are urged not to allow the new grass to get a start on them."

Mass athletics have made wonderful progress here this year. It is encouraging to know that we can have the intercollegiate contests and at the same time give the masses a chance for physical development. One of our biggest needs at the present is several new tennis courts. We hope this need will be cared for this summer.

It is somewhat encouraging to note that the deans, in their recent meeting at Chapel Hill, voiced the opinion that college students of today are no worse than those of a decade or two ago. We have always thought this to be true, regardless of the arguments put forth by the Alarmists. The deans are certainly in a position to know conditions as they actually are.

The Music Festival held in Raleigh last week is reported as being a great success. At the same time a college Glee Club contest was being held in Durham. All of which goes to prove that music is constantly receiving a greater share of attention. We are glad that State College has at last fallen in line, and is offering some very good inducements to students who desire to participate in things musical.

Alvin M. Fountain, better known to our readers as "Zippy Mack," has finished his masterpiece and we are proud to publish it this week. Fountain has contributed much to State College, and this song is the result of a desire which he has had since his undergraduate days to leave a song that will grow dearer as it grows older. And we would not forget his coworker, "Bonnie" Norris, who wrote the music for the song. Norris is one of the outstanding musicians of the State and has used his musical ability to give to his Alma

Mater a song which should stir the hearts of State College men for many years to come.

## HUMAN ENGINEERING

A student making a talk before one of the literary societies recently chose the subject of "Human Engineering." He remarked that many men here were studying various kinds of engineering, but that we all practiced human engineering. This, he said, was the art of making people do as you want them to. There is much truth in this thought. Whoever made a great success who did not have the power to persuade others to do as he wished? What chance is there today for the man who lacks this power? Of course all people do not possess this talent to the same extent, nor do they manifest it in the same manner.

College is an ideal place in which to develop this quality. There one is thrown among his fellows whether he likes it or not. Those who learn to work with other people and get along with them are laying a real foundation for the future. Thus are the leaders developed. Every leader in college life is an expert in human engineering, whether he knows it or not. We find this principle playing an important part in the affairs of the world when we leave college. Why not recognize it and seek to direct our talents in this direction? Now every one knows that the State College term for human engineering, when applied to faculty members, is "legging." This practice is often carried to excess and becomes disgusting. However, we can see no harm in students using their personality while in college, when their future success depends so largely on this very factor. Not that we think that college days are preparation for life; we think college days are life. And so, much of the so-called "legging" is just a display of good common sense.

## REPORTERS WANTED

THE TECHNICIAN is in need of several reporters. The new staff has not been completed and will not be until every man who cares to help has been given a chance to display his ability. We feel sure that there are many men on this campus who have the necessary qualifications to develop into good reporters. Now is the time to start that journalistic career which you have been thinking about. Here is a chance to do a real service to your college and at the same time gain some valuable experience. Don't be afraid that your services will not be needed, for there are several places vacant. This work will be on a competitive basis, so each man has an equal chance to "land" a job on the staff.

We see no reason why students should not compete for the positions on the staff of a college paper, just as they compete for places on the athletic or debate teams. Many college papers have already adopted this plan. We are especially anxious to enlist men from the present Freshman class in order to have material for the future. Plans are now being made to form an honorary organization among the students who do the best work on the college publications. Such a reward should be sufficient incentive to stimulate some real enthusiasm in our student body, the like of which has not been seen on this campus.

## Judge Stacy Speaks to Pine Burr Society

(Continued from page 1.)

Officers were elected: J. G. Weaver, president; H. W. Taylor, vice-president; Sam Hassell, recording secretary; Col. J. W. Harrelson, corresponding secretary; Flunoy Griffin, treasurer; Mr. E. B. Owen, historian; Dean E. L. Cloyd, chaplain, and F. L. Tarleton, sergeant-at-arms.

The meeting was one of the most successful that the society has held this year, and was enjoyed by all members present.

Regardless of the fact that Judge Stacy had spent a busy day in court, he talked in a pleasing manner and proved to be entertaining as well as instructive. The society, which is the local scholarship organization, feels proud to have Judge Stacy as a member.

## Student Forum

### CHEERING SECTION GIVES DISPLAY OF SPLENDID SPIRIT

The State College supporters gave one of the finest displays of spirit ever seen on Emerson Field, University of North Carolina, Monday afternoon, in helping the baseball team administer a 7 to 5 defeat to the Carolina contingent.

The cheers were given with a volume and unison rarely equaled in this State, despite the fact that there were only about three hundred rooters in the bleachers reserved for State's cohorts.

The rooting was clean and worthy of State College. Absolutely no personalities were indulged in, and the display was one to warm the heart of a lover of State College who was in an advantageous position to hear and see it all.

Ed Ruffy deserves credit for his fine leadership of the section. He literally "worked himself to death" in keeping up the fire of snappy yells and a veritable barrage of hand clapping and chatter.

Such a display of spirit is fine, men. Let's keep it up and have an equal show of support for our team at Wake Forest and at the remaining games on Riddick Field. Our teams cannot lose with such support.

Another notable fact was that the State College stands respected the Carolina hymns and stood with bared heads every time the Carolina stands sang their Alma Mater songs.

Good sportsmanship was much in evidence on both sides, and we must hand it to Carolina, fellows; they certainly can take a defeat in a perfectly gentlemanly spirit. Such sportsmanship breeds good fellowship and better understanding among the students of the sister State institutions, and elevates athletic contests to a high plane.—"Diddy" Ray.

### College Enrollment for Term of 1924-1925 Approaches 1,700

(Continued from page 1.)

Education (including County Farm Agent Short Course), 143; Miscellaneous, 2.

The figures for the School of Agriculture are apt to be confusing as relating to its former standing in the College unless a careful study of the situation is made. It is at present the smallest in number of any of the undergraduate schools. This does not mean, however, that the School of Agriculture is losing strength, but that the other schools are gaining strength. The courses in Vocational Education and Agricultural Administration were once in the School of Agriculture, but were later put in the School of Science and Business, causing these schools to change places in the number of students enrolled. The Short Courses in General Agriculture have also been discontinued, causing a dropping off in numbers, but a raising of the standard of the school. The School of Agriculture is as strong today as it ever was. The enrollment by courses is as follows: Beekeeping (short course), 35; Fruit Growing and Truck Farming, 8; General Farming, 315; Hay Grading (short course), 15; Poultry Production, 69, and Stock Raising and Dairying, 12.

The Graduate School is not mentioned separately in this article because the men taking Graduate work are listed in the schools wherein they are taking most of their work.

### V.P.I. DEFEATS STATE TENNIS TEAM 5 TO 2

On last Monday afternoon, while the baseball team was gaining glory and honor on Hayes Field by defeating Carolina, the tennis team proceeded to make the V. P. I. tennis team exert themselves to the utmost to win on the local courts. The final score was 5 to 2 for V. P. I. The matches were all characterized by close scores. The team as a whole showed a marked improvement over their previous form.

Bud Taylor sprung the surprise of the afternoon by forcing Fink, of V. P. I., to play his hardest to win. Fink is one of the best tennis players in the South. He reached the semi-finals in the Southern tournament last week.

Hero—Cur! Where are those papers?  
Villain—They are at the blacksmith's.

Hero—Ha! You are having them forged?

Villain—No; I am having them filed.

## OUR WEEKLY MISUNDERSTANDING

By ZIPPY MACK

(Apologies to Stanley, Raleigh Times)

Brown, '27.

"You say Bill Fetzer's team lacks the old fighting spirit?"

"No! No! We may not be the best, but we're getting doggone near it!"

### V.P.I. WINS TRACK MEET WITH N. C. STATE 69 TO 57

The Virginia Tech track team last Saturday defeated the N. C. State inter-aggregation by a twelve point margin. State was slated to win the meet, but failed through the inability of field event men to come up to their former marks. This may be attributed partly to the wet field and partly to the cold weather.

Short spikes, combined with the slippery take-offs, are blamed for the failures of Ripple, in the javelin, who has thrown this well over 160 feet, but threw it only a score of 140 Saturday. Creek in the discus, and Mathews in the high jump, to approach their former averages.

Byrum, as usual, high point man of the meet with firsts in the 100, 220, and quarter. No new records were made in the meet.

Summary:  
Shot: Ripple (State), Gray (Tech), Ellis (Tech). Distance 40 feet 1-2 inch.

Discus: Lambe (State), Holly (Tech), Dellabarre (Tech). Distance 115 feet 9 3-4 inches.

Javelin: Dellabarre (Tech), Ripple (State), Gray (Tech). Distance 147 feet 8 inches.

High jump: Ellis (Tech), Matthews (State), Morris (State), tied for second. Height, 5:4.

100-yard dash: Byrum (State), Montague (Tech), Tucker (State). Time, 10 1-5.

Broad jump: Culbreth (Tech), Ellis (Tech), Burnette (Tech). Distance, 21 feet 7 1-2 inches.

Mile: Dance (Tech), Jackson (Tech), Christian (Tech). Time, 4:44 3-5.

Two mile: Crowell (Tech), Blanton (Tech), Wright (State). Time 10:39.

440 dash: Byrum (State), Hogan (Tech), Sides (State). Time, 52 1-2.

880 run: Bremer (State), Sherman (State), Ewing (Tech). Time, 206 1-5.

120 hurdles: Clarke (State), Maurice (Tech), Currin (State). Time 16 2-5.  
220 hurdles: Culbreth (Tech), Clarke (State), Maurice (Tech). Time 26 2-5.

Pole vault: Pridden (State), Bagby (Tech), Culbreth (Tech). Height, 11 feet.

220 dash: Byrum (State), Montague (Tech), Hogan (Tech). Time, 22 1-5.

### STATE COLLEGE BAND WILL GIVE A CONCERT IN OXFORD TONIGHT

The State College Concert Band will leave Friday afternoon for Oxford, where a concert will be given Friday night. This is the annual Spring Concert for the young folks at Oxford Orphanage. For several years the State College Band has made two trips to Oxford each year, one in the fall and one in the spring. The college quartet, composed of C. E. Glenn, E. C. Smith, W. F. Tew, and R. R. Fountain, will accompany the band and entertain the youngsters with a program of snappy songs. "Diddy" Ray, the versatile comic entertainer, a favorite at the Orphanage, will also be on hand to further delight the audience.

The trips to Oxford are looked forward to by the members of the band as well as by the young people. The Masons of Raleigh have aided materially in these trips by furnishing transportation. The band has several engagements through the year, but none which gives any more pleasure to the men than the trip to Oxford.

**N. C. Alpha of Pi Kappa Delta Installed at N. C. State College**

**One Hundred and Eighth Chapter of Country's Largest Forensic Fraternity**

The formal installation of the North Carolina Alpha Chapter of Pi Kappa Delta, national honorary public speaking fraternity, was held on Thursday, May 14, in the College Y. M. C. A. Professor Cunningham was in charge of the ceremonies, as the accredited representative of the National Council.

Promptly at five o'clock the initiates and their guests assembled. R. J. Peeler, president of the local chapter, delivered the address of petition. Professor Cunningham then spoke at some length concerning the history and purposes of the fraternity. With Professor Cunningham acting as Cancellarius, R. R. Fountain as Malleatorius, and J. M. Potter as Triangularius, the following members were formally initiated:

E. L. Cloyd, Degree of Fraternity, Graduate, Membership, Orders of Debate and Oratory.  
Murray G. James, Degree of Fraternity, Graduate Membership, Order of Debate.  
R. J. Peeler, H. H. Rogers, R. R.

Fountain, E. G. Moore, Degree of Proficiency, Order of Debate.  
G. F. Seymour, J. M. Potter, M. L. Snipes, R. H. Raper, Degree of Fraternity, Order of Debate.  
S. K. Marathe, Degree of Fraternity, Order of Oratory.

The impressive installation service of the order then followed, and the one hundred and eighth chapter of the largest forensic fraternity in the United States was definitely established.

At the conclusion of the ceremonies the members of the order and their guests, Messrs. H. M. Ray, J. A. Wilson, A. M. Fountain, J. E. Tiddy, and W. E. Wilson, partook of a banquet served in the Y dining-room.

The following series of speeches concerning public speaking activity at State College was then listened to with much enjoyment and enlightenment:

The Past, E. L. Cloyd; The Present, R. H. Raper; The Future, H. H. Rogers. Professor Cunningham acted as Toastmaster.

The serious and the frivolous were neatly combined in the services of the day, and the chapter received the proper kind of launching. It is believed by the National Council that North Carolina Alpha will prove to be one of the strongest and most influential chapters of the order.

**GLEE CLUB TAKES TRIP TO LOUISBURG SCHOOL**

**Puts on Program for First Time in Over a Month, in Neighboring College Town**

For the first time since the return from the engagement at Smithfield, on April 3d, the State College Glee Club and Orchestra rendered its program Monday night at Louisburg High School. Grown bleary with over a month of idleness save for the concentrated training for the State-wide glee club contest in Durham, the organization revived itself to the point of giving one of the best programs of the year.

The entertainment was very well attended, especially when there is taken into account the fact that at the same time there was being given a recital at Louisburg College, for which there was naturally no admission charge.

The feature of the trip was not the program nearly so much as the pleasant ride to and from the place of the entertaining. On the unpaved portions of the road, in the late afternoon, the dust was rather stifling, and it was necessary for "Daddy" Price to call the roll occasionally to see that all his charges were present, but all the unpleasantnesses were compensated for by the steady stream of wit which was in evidence throughout the passage.

At the close of the program, as the Tech songsters were preparing for the homecoming, there floated through the air a thin rumor that "Chick" Doak and his eighth-inning specialists had failed to make good on the trip to Chapel Hill, and the gloom of this, coupled with that of the small attendance received by the singers, served to put a frown on every member of the party. As the big bus glided out of the town there was scarcely a sound save that of an occasional snort from some sleepy-headed canary, or an unpleasant muttering from someone who did not have as good a seat as he thought his position in life demanded.

At the Deacon village of Wake Forest it was found that there was one small eating place still open, though all good students were long since in bed. The entire party unloaded themselves for a dope or perchance a piece of pie or cup of coffee. While the several musicians were satisfying their appetites, each to his own manner, someone sought to verify the report of the loss of the game at Chapel Hill. No one could tell exactly what happened to the crowd just at that time, but there was one thing a certainty, there was no more order to be kept in the bunch during the remainder of the trip.

Around the campus of the Deacons the bus swung, its motor humming an accompaniment to the enthusiastic words of Diddy Ray's immortal song, "State College, Keep Fighting Along." Yells were given for the team, for "Daddy" Price, for the driver, and for everybody who happened to need one. Nor did the bedlam cease. When the party swerved around the grounds of our sister Baptist institution in Raleigh the words of Diddy's song were still ringing. On out Hillsboro Street went the noise till it finally disinte-

grated in front of Pullen Hall and died out in the rooms of the tired but happy pilgrims. It was midnight and all was still.

**THE WOODSHOP IS AIDING STUDENTS FINANCIALLY**

**4,893 Hours of Work Have Been Given to Students During the Past Year**

A wonderful opportunity presents itself to students who wish to earn part of their college expenses, by working in the College woodshop at odd hours. This is shown by figures given us by Professor Wheeler. According to the figures, Professor Wheeler has given students 4,893 hours of work from January 1, 1924, to April 1, 1925. The wages paid ranged from 30 to 60 cents per hour. This work has enabled a number of boys to earn a greater part of their expenses. The woodshop being near, makes it possible for boys to work at all off-hours. In addition to the compensation, students obtain experience which is of great help to them in after life.

**FROSH WIN FROM DUKE YEARLINGS**

The State Freshmen defeated the Blue Devil first-year team Wednesday evening, May 6, by a 6 to 5 decision, on Hanes Field. Although outbit by the Duke Freshmen the State aggregation hit the offerings dished out by Swift, Duke pitcher, at opportune moments, making 9 hits, which resulted in 6 runs. The Duke batsmen also hit well, collecting 12 safe hits, but were

unable to hit when one would have meant a run.

Both sides made three errors, which somewhat distracted from the smoothness of the game, but because of the close score the game was interesting throughout the entire contest. Biggers, State pitcher, allowed the Blue Devils to cross the plate only in the third and fifth innings, while the State Frosh scored in four different innings. Vick led the hitting with three hits, while McDowall and Kidd registered two hits each.

**FACULTY BASEBALL LEAGUE ORGANIZED**

The Department of Physical Education is promoting as part of its Intramural program an elimination series in baseball between the faculties of the different schools. Managers of the teams are as follows:  
Agriculture—Professor Mathews.  
Engineering—Professors Dana and Foster.  
Science and Business—Professor Saville.

A definite practice schedule has been announced for the teams. The first game of this elimination series will be Wednesday, May 20, on Riddick Field, between the Ags. and Engineers.

These games should afford a lot of amusement for both the students and faculty of State.

After this elimination series has been played off it is hoped that an all-faculty team can be chosen to play a team representing the Senior Class. It is hoped that a game between the Faculty and Seniors can be arranged each year. A Senior-Faculty game should be an annual event at State College.

### ELON SWAMPED BY N. C. STATE

#### Techs Gain Easy Victory Over Christians by the Count of Thirteen to Four

On last Friday afternoon State College journeyed over to Elon and administered a 13 to 4 licking to the Christians. State rapped on Fowler for a total of fifteen safeties for thirteen runs and had no difficulty in defeating the Christians. Four tallies and five hits were all that the home team could get from the two State moundsmen, Davies and Morrison.

The game was sewed up by State in the third frame, and after that the outcome was never in doubt. Morrison relieved Davies at the end of the seventh inning and allowed only two hits for the remaining two innings.

Erratic playing on the part of the Christians was responsible for a number of the State College runs.

### STATE FROSH TAKE SECOND GAME FROM THE BLUE DEVILS

Last Wednesday evening the State Freshmen won from the Duke Frosh by a 7 to 4 score on Riddick Field, while the varsity was defeating Carolina in Chapel Hill. This being the second defeat handed to the Blue Devils by the State Freshman within a week.

Rowe, who started on the mound for the locals, gave way in the second inning to Letty Hunsucker, who pitched winning ball for the remainder of the game, only allowing one run and three hits. State yearlings were able to collect 13 hits from the offerings of Swift, Duke's tosser.

Pitcher Hunsucker secured three hits while Vick, McDowall, and White knocked out two hits each. Hennesa's four-bagger contributed to the total score for the State Freshmen.

Score by innings: R. H. E.  
Duke 030 000 100—4 7 3  
State 301 000 30x—7 13 2  
Batteries: Swift and Weaver; Rowe, Hunsucker, and Brantly.

Duke	6	.600
Guilford	3	.333
Lenoir	1	.167
Elon	1	.125
Davidson	1	.125

## SPORT COMMENT

We are endeavoring in this column to give the gist of Campus opinion about sports. Because of man's inherent narrow-mindedness and conceit it is most probably our own personal opinion that we're actually giving. We hope not.

THE SPORT EDITOR.

**ELON, GUILFORD, CAROLINA, they're all the same to us. If we don't get 'em in the first, we will in the eighth.**

—N.C.S.—

**AND TOMORROW WE'LL DO our talking in this heretofore one-sided argument about the State Championship.**

—N.C.S.—

**NOW THAT WAKE FOREST has lost their one-game advantage over us, due to the raining out of their third Duke game, we can be sure that the little argument over on Gore Field tomorrow afternoon will definitely name the champions.**

—N.C.S.—

**HERE'S THE SITUATION AT PRESENT: Wake Forest had one more game with Lenoir than we did. Since their third game with Duke was rained out the other day they are now on a parity with us in regard to the total number of games to be played. They have lost one game to Duke. We have lost two, to Guilford and to them. A Wake Forest victory Saturday will give us three losses and them the championship. A State victory will mean that each team must win the rest of its games to have a chance. We have another game then with Duke and one with Carolina. Wake Forest only has Carolina left. If we win tomorrow and each of us wins the rest of our games, a tie will result between us, and an extra game will probably be scheduled. Having beaten Duke twice we should win from them next Wednesday without a whole lot of trouble. And we have Carolina here next Saturday, while Wake Forest must go to Emerson Field for their battle with the Tar Heels. Taking it all in all, we predict a Tech victory (possibly in the eighth) tomorrow, and two more next week. Then, if Wake Forest survives the Tar Heell fray, we'll dare them to play us and give us the clean title.**

—N.C.S.—

**IN REGARD TO TOMORROW, we warn Mr. Sorrell or Mr. Simmons to be mighty careful in the eighth. And remember, two men down doesn't mean a thing to the Techmen when they decide they want some runs.**

—N.C.S.—

**THE TECH STRIPLINGS seem to be keeping pace with their Varsity big brothers these days, too. We're glad to see they're profiting so wisely by our fatherly advice we made bold to offer last week. We're proud of you and your boys, "Gusteeble."**

—N.C.S.—

**WHILE WE'RE THINKING OF BASEBALL (as if we thought of anything else!) we wonder just how much of the Yanks' hard luck is due to the absence of "Babe"? We'll be glad to see the Bambino back at his old tricks again—especially for this reason.**

—N.C.S.—

**WE HEARD A BOY SAY the other day, "We won, the Freshmen won, and Raleigh won, hot dog! Everything's coming our way!" Then we realized for the first time just how glad we are that Raleigh is going so well this season. Atta Baby Raleigh! We've been waiting four years for this. We're betting on you to cop the old rag this time!**

—N.C.S.—

**COACH SHAW AND HIS TEAM, consisting of Captain Byrum, Joe Ripple, and Pridgen, left for Sewanee Wednesday night for the Southern meet. Nope, we don't s'pose he's expecting to win the meet, but we will predict that State will be heard from before it's over with. We will even go so far as to predict that those three men will count for between 15 and 20 points at least, and that should set State well up in the list, say about fifth or sixth place, anyway.**

—N.C.S.—

**WHEN JOHNNY GILBERT got his homer Monday our hearts filled with joy, not only because he cinched that game, but because Johnny had got his homer. Now that completes the rounds, save for Gladstone. All right, "Rock," you've got three more games to do it in. You've got to have it, and we know you can. Why not do it Wednesday with Bobby Correll, off Mr. Dempster?**

### N.C.S. TENNIS TEAM DEFEATS RALEIGH COUNTRY CLUB 6-1

On last Friday afternoon the N. C. State tennis team decisively defeated the Raleigh Country Club to a score of 6 to 1. The State team lost only one match. This match was won by Coach Parker, who played for the Raleigh Country Club.

Score by matches:  
Singles  
Parker of Raleigh defeated Taylor of State, 6-4, 6-3.  
Change of State defeated Lazzard of Raleigh, 6-1, 6-3.  
Shelor of State defeated Neal of Raleigh, 6-4, 6-4.  
Harren of State defeated Rose of Raleigh, 6-3, 6-2.  
Campbell of State defeated Matthews of Raleigh, 6-9, 6-1.  
Doubles  
Chang and Taylor of State defeated

Lazzard and Rose of Raleigh, 6-3, 6-4. Shelor and Campbell of State defeated Neal and Matthews of Raleigh, 6-4, 6-3.

### WOLFPACK BATTER QUAKER TEAM FOR AN 11 TO 2 VICTORY

#### Pack Wouldn't Wait Till Eighth; Unlimber Heavy Artillery in the Third

The Wolfpack hammered their way through the Quaker team to an 11 to 2 victory last Saturday afternoon on Riddick Field. In one game of the year, at least, the usual eighth inning rally was not needed—the third was just as good this time.

The feature of the game was the third inning, when the heavy artillery of the Wolfpack camp was turned loose. Lefty Hill started the merry-go-round with a triple. Shuford singled. Correll cleaned the bases. Wade placed a nice one under the bleachers out of reach of the centerfielder. Holland placed his crown with Wade and Correll by setting one in the bleachers and gleefully trotting around the sacks, for the third home run in one inning. It looked as though Ty Cobb, Babe Ruth, and several other of the big boys were down with.

Al Johnston never did like to be outdone in anything. Accordingly, after he took Holland's place, he followed in Dutch's footsteps by neatly laying one down in right field. This was the mighty eighth, and the eighth inning ralliers could not stop with one home run, so four men followed with singles, bringing in three more tallies for State.

Ferrell, the catcher from Guilford, became jealous of all the hitting and slammed one deep into center field for a home-sweet-home. (This took place in the fifth frame.)

Hill started the old game, but gave way to McIver in order that he might be fit for the Carolina game on Monday. Guilford hit quite a few, but they were well distributed throughout the six innings.

It was a grand treat to see the boys get revenge on the Quakers. It was a pity that Shirt Smith was kept from the game, for when the Wolfpack is in a hitting frame of mind they wham out a few regardless of

who is tossing them down the old alley.

That is about all there is but the box score, and here it is:

Guilford:	Ab. R. H. O. A. E.

**STATE-CAROLINA IS PUT OVER TO MAY 21**

**Debate Postponed so That Prof. Cunningham May Accompany Team**

The open forum, Oxford-plan debate with the University of North Carolina, which was scheduled for Monday, May 18, has been postponed until Thursday, May 21. This was done at the request of the local debate council, in order that Professor Cunningham might be able to accompany the State College team to Chapel Hill. His absence in Nashville, Tennessee, where he will accompany the North Carolina representative, H. M. Ray, prevents his being present on the former date.

In the Carolina debate, J. A. Wilson, the State affirmative speaker, will be paired with T. S. Bledsoe, and the State negative speaker, A. M. Fountain, will have as his colleague L. B. Kennett. These two men are experienced debaters of the University. A close and interesting contest is anticipated at Chapel Hill.

**THRIFT IS THE ANSWER**

Do you want to own a house? Do you want to purchase an auto? Are you trying to earn an education?

Are you planning a vacation, or trip somewhere?

Or is it a new suit of clothes or an engagement ring—or a baby buggy.

Whatever you want you must save for it—you must practice self-denial.

You must learn to save something each week—because it is saved money that buys everything.

**Faculty Interviews**

**Dr. E. C. Brooks**

The editor admits with rare bits of wits, as he sits having fits trying to make hits with you, that the biggest stew he ever did brew is an interview with Dr. Brooks, for it's not as easy as it generally looks.

We met on the street one day, so to speak, and we stopped and went his way. We talked as we walked, and he spoke of folks who poke through college with a pretext of a thirst for knowledge. Once in a while, with no outward smile, he spoke with words of great size, and I thought him wondrous wise. Our powers of comprehension created quite a tension, and we were left as dumb as e'en before our thoughts were in suspension, and the only outward mention that we could bring to your attention is the fact that he's too wise for you and me. We often sit and think as we try to dry the ink: "What men these mortals generally seem to be." If we had half his sense, and didn't look so dense or our words seemed near so wise as his, we're sure we'd win the prize, for the speakers of our size, and the matter as it now stands is: The boss won't feel the loss when the

**N. C. STATE FRESHMEN GET REVENGE ON M.P.C.I.**

On May 7 the Freshmen took revenge on Mount Pleasant Collegiate Institute with an easy 9 to 0 victory on Riddick Field. It was the second meeting between the two teams this year, the up-State youngsters winning the first encounter on their home grounds by a count of 8 to 2.

Coach Tebell introducer a new hurler in "Lefty" Hunsucker, who worked out a fine game, only allowing the opposing team four scratched hits, and nine goose-eggs, while the Freshmen hammered out eight hits for a total of nine runs, with the aid of seven errors by the visitors. Lytch and Kendall led the attack with two hits each.

Score by innings: R. H. E. M. P. C. I. 000 000 000—0 4 7 State 000 020 34x—9 8 3

**FACULTYFAX**

A department devoted to the problems of acquainting our student body and other readers of THE TECHNICIAN with our faculty.—E. G. MOORE.

**Prof. Robert Edward Lee Yates**

Robert Edward Lee Yates was born in Wake County, North Carolina. He attended the Raleigh Male Academy, from which he was graduated. He then entered Wake Forest College and completed his work there in 1899. He was awarded the M.A. degree. He was a graduate student at the University for one summer.

Professor Yates was principal of an academy in Granville County for a year after finishing his studies, and then came to State College as Adjunct Professor of Mathematics. In 1906 he was made head of this department.

While in college Professor Yates was especially strong in mathematics. He showed the ability to complete the necessary work for a master's degree in four years. He was graduated salutatorian of his class.

Professor Yates' success as a teacher and as a man has rested on three principles: he is able enough to know what to do; he always has character enough to do his duty, and he has a heart warm enough to love his fellow-men, both young and old. The students have always found in him a thoughtful, considerate friend who wished to help all who were willing to help

themselves, and who never spared himself to benefit others.

**Techs Crush Country Cake-Eaters in Usual Eighth Inning Rally 7-5**

(Continued from page 1.)

out so much as touching one. The pinch-hitter pinched! He got a clean hit to right. Lassiter followed with a clean single to center and Davis took third on the play. Holshouser tried to catch Lassiter off on first and Davis scored and Lassiter took second on Stanton's error at first. Lassiter scored the tying run on Johnston's clean single to center. Smith ran for Johnston and stole second. Gilbert hit hard through third. The ball bounced over Hatley's head and rolled into deep left. Gilbert completed the circuit in record time, nearly running over Smith, who started from second. The game was won and the Tech stands were wild with joy.

Gloom settled over the Carolina stands as their team was retired with nothing more than a threat each in the eighth and ninth. Despite the ten State hits Holshouser pitched a good game. He fanned 9 Tech batsmen and only his failure to weather the N. C. State eighth inning kept him from a well-earned victory. Johnny Hill, diminutive Tech moundsman, was, as usual, his cool, calm, confident self and never wavered, ever apparently sure that the game was his for the taking. Hatley was leading hitter of the game with a double, two singles, and a walk. Correll contributed the feature playing of the game by driving in three State runs with clean hits and nabbing a hard-hit Coffey-ball that was labeled for the circuit and would have added two runs to Carolina's total as he trotted down the cinder path on Emerson Field, near where it enters the woods.

## Banquet Is Given By Thea Tau Fraternity

Twenty-nine Present at Affair;  
Given at the New Tea Room;  
New Men Are Initiated

On last Friday evening, May 8th, from seven to nine-thirty, Rho Chapter of Theta Tau Fraternity gave a banquet in the New Tea Room for its members and a few visitors. The banquet was attended by twenty-two active members, three alumni members, and four visitors, the visitors being Mr. W. L. Craven, Dr. W. C. Riddick, Mr. D. K. Stewart, and Mr. S. T. Strickland.

The hall in which the banquet was held was beautifully decorated in garnet and old gold, the colors of the fraternity. The walls were covered with pennants and banners, while the table was well decorated with various kinds of flowers of the two colors.

Col. J. W. Harrelson acted as toastmaster, introducing the following speakers: Mr. W. L. Craven and Dr. W. C. Riddick.

The first speaker was Mr. W. L. Craven, a graduate of N. C. State College and head of the bridge department of the North Carolina State Highway Commission. Mr. Craven's subject was, "The Function of the Bridge Department." He began his speech with a brief description of the department, then told of the larger projects now under construction, with their cost and a few of the difficulties encountered in the construction of these structures, and finished by briefly comparing the bridge department of this State with those of other states.

Dr. W. C. Riddick, dean of Engineering at N. C. State College, was the next speaker, his subject being,

"The Ethics of Engineering." Dr. Riddick is the first man, born in North Carolina, to have taken an engineering course in college, who came back to the State to practice the profession, having graduated from Lehigh University in 1890 in Civil Engineering. Dr. Riddick gave a very brief account of his life as an engineer, followed by a description of the growth of the engineering profession during the past forty years, both in size and importance; but at this place he did not forget that there were many defects yet in the profession which can be greatly improved, and mentioned several methods by which these can be brought about.

The semi-annual initiation of the fraternity was held on Wednesday night, May 6, and the following men were initiated into the fraternity: John A. Anthony, M.E. '27; T. C. Dickerson, M.E. '26; J. P. Mason, E.E. '26; E. L. Mountcastle, M.E. '26; W. W. Studdert, C.E. '27; E. Lee Tucker, Arch. '27; J. E. Williams, C.E. '26.

## TO PLAY OFF HIGH SCHOOL CHAMPIONSHIP ON MAY 13

By winning in their respective groups, defeating Charlotte and Winston-Salem, Shelby and Bessemer will meet Wednesday, May 13, at Salisbury to decide the Western High School Baseball Championship.

The Shelby team won the High School Championship last year and Bessemer won the non-accredited high school title.

A good game is anticipated. Young Hoyle of Shelby has been pitching stellar ball, striking out as many as seventeen men in one game. Briggs, of Bessemer also has a good record.

The winner of this game will meet the Eastern Champions at Chapel Hill on Saturday for State honors.

## Alumni Notes

Observations & Communications  
of Zippy Mack

"Chick" Doak and his charges have made this eighth-inning rally stuff into a science, and it has been working with scientific accuracy, as our cookie-pushing backwoodsmen, friends from Chapel Hill can testify. That is mighty fine, Mr. "Chick," but don't ever forget which inning it is in which you are supposed to get reckless. Keep it up.

The game Saturday afternoon with Guilford served to bring out of the hedges several of the old boys. Among the ones we saw were: Mr. H. N. Kelly, '23, who has been teaching at Evergreen; Mr. F. B. Mewborn, '24, who is a traveling salesman for Marshall Field, with a territory extending throughout the South; Messrs. F. G. Elliott, '23, and T. A. White, '24, who are teaching at Moyock; Mr. G. T. Bostic, of the '23 Textiles; Mr. R. B. Keys, class of '23, and Mr. L. L. Hedgepeth, '25, who has already finished his work and has been out on the job since Christmas. Mr. Hedgepeth is editor of the '25 Agromeck, which has appeared this week.

Mr. and Mrs. C. B. Williams announce the engagement and approaching marriage of their daughter, Francis Moring, to Mr. Thomas Needham Park. Mr. Park is a member of the Class of '22, and was a star on the Wolfpack, where his punting ability was one of the wonders of the State at that time. Miss Williams is the daughter of former Dean of Agriculture C. B. Williams, who is now superintendent of the college farm. Mr. Williams is himself an alumnus of State College.

Mr. Paxton Thomas Dixon, of Jasper, and Miss Eliza Sherrill, of Lebanon, Tenn., were married in Ghent Wednesday, May 8. Mr. Dixon is a member of the Agricultural Class of '24, and was president of the Y. M. C. A. during his Senior year.

June tenth has been designated as the date of the marriage of Mr. A. Jones Yorke, of Concord, and Miss Martha Best, of Warsaw. Mr. Yorke was formerly a member of the Class of '26, but has not been in school since early this school year.

Mr. and Mrs. Luke P. Hahn announce the birth of a daughter, Elaine Huilt, May 4, 1925, at Baldwin Park, California. Mr. Hahn is a member of the Class of '24.

Teacher—Jonnie, name a bird that is now extinct.  
Jonnie—Our canary; the cat extinted him.

## AGRICULTURAL CLUB HOLDS GOOD MEETING

The program at the Agricultural Club on Tuesday night, May 12, was the best one given this spring. J. F. Bullock gave an interesting talk on "The Relation of Cold Storage to the Farmers of North Carolina." Then "Red" McColl told of "The Attitude of the Farmers of North Carolina Toward State College." The last number on the program by "Railroad" Pountain was an interesting and amus-

ing discussion about "The One-Crop Farmer."

Next Tuesday night officers will be elected for the fall term. The treasurer will pass the smokes around, and an interesting speaker will be secured to give some things to think about along the line of agriculture in North Carolina. Agricultural students! much of the success of the Agricultural Fair depends on whom you elect to hold these offices next year. Let every agricultural man resolve to be there next Tuesday night at 6:30

1. Where the winds of Dixie'sart-ly blow,  
2. Shout a-far our trib-ute loud and strong,  
3. Though the years may come and go their way.

O'er the fields of Car-o-line; Where the pine tree sen-ti-nels stand, as a guardian at thy shrine; Where the bravest hearts of men are found  
that the whole wide world may hear, Tell the sto-ry to all the land, ye her sons and have no fear, As she grows the greater ev-ry hour,  
down the path where a-ges trod; Though the work-ings of men may lead, as we leave our na-tive sod; Yet no time nor clime can e'er dis-pel

Chorus  
that are loy-al thru and thru, There stands, ev-er cher-ished, N. C. State, firmly strong and true.  
as she scales the top-most height, Our voi-ces will blend in tri-umph songs, for the Red and White.  
a-my love that holds thee near, Nor keep from our hearts thy mem-o-ry; Al-ma Ma-ter dear. Then lift your voi-ces!

Loud-ly sing our Al-ma Ma-ter's praise! O-ver all the earth her song shall ring, whose notes we proudly raise; Her glo-ries we shall

sound a-far, from hill to o-cean side; Our hearts ev-er hold you, N. C. State, in the folds of their love and pride.

### CLASSES IN THE SUMMER SCHOOL FOR HI COACHES

J. F. Miller Will Conduct Instruction in the Department of Physical Education

High school coaches throughout the State will be afforded the opportunity this summer of learning the business of coaching from the scientific angle. North Carolina State College, through the director of the Summer School, Prof. T. E. Brown, announces that special attention will be given to the Department of Physical Education and that Coach J. F. Miller, Director of Athletics, will conduct the instruction.

Coach Miller announces that there will be courses for coaches in Football and Baseball, and classes in Basketball and Track. Instruction will be given in gymnastic training, group games and mass athletics.

Recreation in the form of tournaments in tennis, play-ground baseball, basketball, volley ball, and swimming will be organized for the summer school student-body.

The new Frank Thompson Gymnasium, just completed, is one of the finest and best equipped gymnasiums in the South. The main floor is 130 feet by 110 feet, with an intercollegiate basketball court of maximum size, and a seating capacity of 2,500 spectators, without the use of the gallery.

The swimming pool is located in an annex amply lighted both by windows and skylights, and finished with white tile. The pool is 75 feet by 30 feet with sufficient room to accommodate several hundred people. The pool itself is one of the largest and best equipped in this section. It has a water chlorination purification apparatus that keeps the water pure and clean all of the time. It has a heating system that can regulate the temperature of the water. Red Cross life guards will be on duty all of the time, and swimming instruction will be given by authorities on the subject.

In view of the fact that thirty states in the Union have adopted legislation making physical education a prescribed part of preparatory schooling, leaders in education now recognize the fundamental need of athletics as an important part of any educational program. The State of North Carolina has felt the need of competent men to direct school athletics throughout the entire state.

The courses that are to be given have been placed in the regular college curriculum, and college credits will be given in these courses.

## History of State's Alma Mater

In the fall of 1919 a throng of more than four hundred lads, who, the spring before had completed the course of study at the various high schools throughout the State, registered as members of the freshman class at State College. This was the class of twenty-three.

As the freshman year passed slowly away there arose from the ranks of these boys two who were forever to write their names across the history of State College. These boys lived in adjoining rooms and, perchance, this was the cause of their early friendship and the influence which each came to bear upon the other. The one was a green country lad, on his first escape from the jungles of Onslow County; the other was an embryo cake-eater from the hustling cotton mill town of Gastonia.

One of these boys, the Gastonia lad, immediately upon entering college became affiliated with the musical organizations which existed upon our campus at that time. The other turned his attention to literature and poetry.

During the fall of that year the plan was conceived to publish a college paper, under the name of THE TECHNICIAN. This plan materialized at Christmas, 1919, and in the first issue of this publication appeared a poem, written about the student dining hall manager and titled "Zippy Mack." At its appearance the student body gave voice to its appreciation of the work and set about to find the author of "Zippy Mack." Closely following upon the heels of this poem appeared another, which originally had been signed "By the Author of 'Zippy Mack.'" Through a mistake of the

printer part of this was omitted and the poem appeared signed "Zippy Mack." The author was located and his real identity was found to be Alvin Marcus Fountain. From that day to the present THE TECHNICIAN has continued to publish poems under the name of "Zippy Mack."

The musically inclined freshman started the music department by his wonderful performance upon his magic clarinet. During his four years at this institution he was the outstanding member of the college musical organizations. This boy was Bonnie Frank Norris.

During the sophomore year of this pair "Daddy Price" noticed the poetic ability of Fountain and had delivered to him a piece of music with the request that he write suitable words to it to be used as the Alma Mater of State College. The tune was not original and the song did not meet with approval, so it died a natural death.

Then came the junior year and the summer following it "Zippy" and Bonnie journeyed to Camp McClellan, at Anniston, Ala. On the way down students from other colleges gathered together in groups and sang their college "Alma Mater." All during the stay at camp it was constantly being brought to the attention of the two that State College did not have an Alma Mater. It was then that they pledged themselves to relieve this condition by writing an original college song. This was to be the gift of the class of '23 to the college.

In the fall of the year 1922 Norris came back to school and assumed his duties as Captain of the Band. Fountain was Editor-in-Chief of THE TECHNICIAN. Lack of time prevented much work on their plans for the song. Then

followed graduation and turmoil. A year quickly passed. Incidentally, Norris became connected with several musical organizations in his home community. Fountain came back to State in quest of knowledge and a Master's degree.

Louder than ever rose the cry from the student body for an Alma Mater. "Zippy" and Bonnie again began work on the fulfillment of their pledge. Near the first of this year Norris presented his original music for Alma Mater. Immediately Fountain started his work on writing the words of the new song which were completed shortly afterwards. The next job was to have it arranged for the band. The job of arrangement was given to the noted musician, Carl Fischer. This has not been completed. The song above is the original arrangement as it was written for the piano and solo.

Extra copies will be printed for the students of the college and the Alumni Secretary will have copies printed for distribution among the alumni of State College.

It is the duty of every student to learn to sing this song. It is your song—your Alma Mater, your college anthem. Let its words go with you while you are in college and make them a part of the many traditions that you take with you when you go out of the doors of State College. N. C. State has long needed an "Alma Mater" song. Here it is, composed in its entirety by the children of that institution. Its words have more meaning than the mere context implies. They are the outgrowth of the affections that have sprung up while their writers were on the campus. Sing its words, and keep ever alive the spirit of love in which they were written.

### Coach Parker Awards Intra-Mural Medals At Chapel Assembly

Dr. S. S. Heubner Gives a Very Interesting Address Following Presentation

At the College assembly period Friday morning Mr. Parker, of the Physical Education Department, presented the intramural medals to the championship teams in football, cross-country, intramural basketball, and company basketball teams.

The football championship was won by Company "E," the team being made up of Utter, Hurley, Woodleaf, Folley, Dunn, Fountain, Pruden, Shelton, Springer, Trevathan, Roberts, Moss, Hill, Habel, Clarke, Brewer, Smith, Harrill, and Holloway.

The cross-country team representing South Dormitory, and composed of Robinson, Sherman, and Schrader, won the cross-country championship.

The Kappa Sigma fraternity won the inter-fraternity basketball championship. The team consisted of Shelor, Powell, Fountain, Wray, Bragg, Witherspoon, Long, and Correll.

The Agricultural Club team, with Bullock, Cline, Raper, Goodman, Morrison, Furgerson, and Zimmerman, won in the inter-society basketball tournament.

The inter-company basketball league was headed by Company "F," with the following men on the team: Brimley, Evans, Polk, Pressler, Strout, Robertson, Bostic, and Edmondson.

The other intra-mural teams will receive their medals at a later date. Mr. Parker stated that over 600 men had taken part in these intramural sports, and that the work should continue to grow from year to year.

After the presentation of the medals the college assembly was turned over to Dr. S. S. Heubner, who gave a very interesting and instructive lecture on the value of insurance. His figures on the value of a man to his community were most interesting.

### RESPECT JUST AUTHORITY

All society is based on regulated authority.

Oftentimes the particular man who fills an office of authority is changed—promoted, demoted, dismissed—but the office itself is perpetuated.

Regulated authority is necessary and must be respected. And just as YOU must respect a certain man in authority, so must HE respect another man. Remember this: Unless you respect the man put over you, the men put under you will never respect you.

## Junior Embarks On Sea Of Matrimony

### Second Member of Class to Join Ranks of the Benedicts Since Christmas

Of great surprise to their many friends was the marriage of Miss Joanna Matthews to Mr. Ernest Meadows Mitchell in Lillington last Saturday morning. The action was the culmination of a long romance and, although not expected so soon, had been expected at a future time. Accompanied by Mr. Will Mitchell, brother of the groom, the couple motored over to Lillington, where the ceremony was performed by the Rev. Mr. Stansbury, pastor of the Methodist Church. While they were gone the news leaked out, and upon their return they were greeted by their many friends.

Mrs. Mitchell is one of Raleigh's most beautiful daughters, and is one of the most popular of the younger set. Since completing her education at St. Mary's School, she has held a position as secretary to Dr. Metcalf.

Mr. Mitchell is the son of Mr. W. Z. Mitchell, of Oxford, and is one of the most popular men at State College.

Both the bride and groom have a host of friends throughout the State who wish them much happiness.

## Serious Accident Is Narrowly Averted

### Elevator Shaft Falls When Small Whirlwind Strikes New A. H. Building

One afternoon last week two workmen were injured and others narrowly escaped death when the newly-completed elevator tower at the Animal Husbandry Building now under construction on Ag. Hill was blown down by a strong gale, accompanied by a terrific whirlwind.

The guy wires to the tower were broken, causing the whole tower, which was one hundred feet high, to be raised about ten feet from the ground and then dashed across the brick wall which was under construction. It fell across a platform on which two bricklayers were standing at work, crushing the platform to the ground and slightly injuring the men with the flying timbers. The tower fell across a ditch where a negro laborer was at work. When he heard the cracking timber of the falling tower he was frightened so badly that all he could do was jump up and down in the ditch, being too badly frightened to try to escape to a place of safety. It crushed down across the ditch, nearly burying him in the wreckage. He was able to go to work again only when he discovered that he was still alive.

The tower had been completed only about ten minutes before the storm. One of the workmen had just climbed down on seeing the storm approaching, saving his life by a matter of seconds only. The carpenters got busy the next day rebuilding the tower. That, of course, took several days and will entail a cost of about two hundred dollars and a week's delay in that part of the building program.

## PERSONAL and SOCIAL NEWS

(All social and personal news turned in *The Technician's* office will be appreciated by the editor.)

—"Bill" Shope went to Charlotte the past week-end to attend the races.

—"Bob" Armand and "Joe" Powell spent the week-end in Greensboro.

—"Biddie" Robertson, "Dick" Lashley, John Boren, and "Duke" Weathers attended the races at Charlotte.

—"Shorty" Mills is back in school, after an operation.

—D. R. Pace and E. L. Turbyfill visited friends in Greensboro last week-end.

—G. T. Bostic and W. N. Cantrell of Winston-Salem spent the week-end with fraternity brothers.

—"Doggie" Allen spent the week-end in Louisburg.

—E. L. Mitchell spent the week-end at Oxford.

—"Sam" Davis spent the week-end in Greensboro, visiting his sister.

—"Cigar" Hoey went to Shelby this past week.

—"Bill" White, "Doug" Scales, M. G. Comer, "Sam" Pierson, and "Tubby"

Logan attended the auto races at Charlotte Monday.

—P. H. Crawford spent the week-end at his home in Kinston.

—J. J. Wright spent the week-end in Danville, Va.

—Wallace Whitehurst spent the week-end in New Bern with his family.

—George Fountain spent the week-end at his home near Tarboro.

—Mr. Ivey Faircloth visited friends on the campus Sunday and Monday.

—C. H. Brewer spent the week-end in Henderson with his parents.

—J. P. Nowell was a Bethel visitor this past week-end.

—J. R. Lang spent the week-end at his home in Farmville.

### Meditations

By MCBAB

I don't know why, but for some reason I decided that I wanted to be an engineer—an electrical engineer at that. Perhaps it was because while still a child (a younger child) I was happiest when I could take a screwdriver, or the more persuasive hammer, and reduced to junk some mechanical contrivance in the attempt to improve the product of the inventor's ingenuity. Strange to say, I never succeeded in my undertaking, but I placed the blame on the fact that I had no training along mechanical lines and so decided to acquire that training. Hence I turned to the engineering profession,

having no more idea of what an engineer's work consisted than I have of going on a five-mile hike in snow shoes at Camp McClellan this summer.

I would have my own way and so here I am, trying to complete my third year of electrical engineering. For three months I fussed and cussed over saturation curves of generators. Not satisfied with that, I had to take A. C. also and now in my dreams I see myself being chased by vector diagrams from one room to another through Winston Hall. I dodge one arrow of the "star connection" only to find myself faced by another. If I cut off one of the arrows, like the mythical dragon, two "delta connections" grow in its place. It is a hopeless task.

The more vector diagrams I see, the more respect I have for the sound judgment that the Ags and B.A.'s use in the selection of their course.

### FRESHMAN FRIENDSHIP COUNCIL TO MEET MAY 18

The Freshman Friendship Council will hold its meetings on Monday night at 7:30 o'clock for the next two or three weeks. The time has been changed from Sunday afternoon to this hour because it is felt that more men will be able to attend. Heretofore the Council has been meeting on Sunday at 1:30, and, for the last few times, the attendance has been low.

This hour, it seems, has been unsuitable for some to attend.

The hour has been changed, and now every man who has attended any of the meetings is asked to come out next Monday night. It doesn't make any difference whether you have been to but one meeting, or whether you have attended for a while and stopped, you are urged to be present just the same. And you who have been attending regularly, be sure to be there.

Some important business concerning next year's freshmen will be discussed at these meetings. This should be of interest. Remember, the hour is 7:30 each Monday night. Don't forget this, and be sure to be there.

Will you have some pie?  
Is it compulsory?  
No; apple.

## Sailing West to India

SINCE the days of Christopher Columbus men have felt the call to "sail due west to find India." In an organization like Westinghouse, such pioneering spirits find happy haven as research engineers. Their every thought is a question—every energy bent to discover new and more effective answers to baffling problems.

Immediately Westinghouse began to build alternating current machines of high voltages, for example, the problem of insulation became acute. For thirty-five years high voltages and insulation have formed an endless chain of problems. As voltages have been increased, improved insulation has been demanded. As insulation has

been bettered, voltages have been still further increased.

One striking contribution of Westinghouse research engineers has been the perfection of an entirely new insulation material—Micarta. Possessing many of the qualities of metal, paper, fiber, mica, gum, rubber, Micarta differs in radical respect from all of these.

It serves industry indirectly as improved insulation material, and also directly because of superiorities when used for gears, propeller blades, and the like.

Only the imagination can set a limit on the field for the research engineer—or for an organization that centers around him.

This advertisement is one of a vocational series, outlining the fields for engineering achievement in the Westinghouse organization. A copy of the entire series will be sent to any one requesting it.
