H. M. RAY PLACES 4TH IN NATIONAL CONTEST AT NASHVILLE MAY 18

First Place Goes to St. Edwards University, Austin, Texas; W. M. Ryan is Winner

AFFAIR CLAIMED TO HAVE BEEN POORLY CONDUCTED

Less Than One Hundred People Present in Audience to Hear One of Greatest of Intercollegiate Contests Ever Staged in South.

Hardy M. Ray, of State College, the only North Carolina speaker in the group of seven, ranked fourth in the Southern Regional Contest on the Constitution, held at Vanderbilt University, Nashville, Tenn., on Monday, May 18. He was thus placed by the three judges: Rabbi Stern, of the Vine Street Temple; Prof. Pendleton, of the Department of English of Peabody Teachers' College, and Robert T. Smith, a Nashville attorney.

First place, involving the right to represent the South in the National Contest at Los Angeles, was won by William M. Ryan, a senior in St. Edwards' University, Austin, Texas, a school affiliated with the University of Notre Dame. Mr. Ryan is a young man of genial personality and warmth of platform manner whose only shortcoming as a speaker is a slight voice defect. His oration was on John Marshall and the Constitution, and was a very good piece of oratorical composition.

The other speakers, with subjects, were as follows: W. R. Parker, Roanoke College, Virginia, "The Constitution"; W. S. Hughes, University of Texas, "The Constitution"; Claude Shouse, Georgetown College, Kentucky, "Washington and the Constitution"; C. W. Lowry, Jr., Washington and Lee University, "Webster and the Constitution"; Thomas W. Hines, Ogden College, Kentucky, "Lincoln and the Constitution."

The two Kentucky orators were hopelessly outclassed, but any one of the other five might have been selected as winner, depending upon the personnel of the committee of judges.

Prof. A. H. Harris, head of the Department of Public Speaking of Vanderbilt University, was chairman of the contest. Local arrangements were in charge of the Nashville Tennessean.

Fewer than one hundred people were present in the audience, and no effort whatsoever was made by Vanderbilt University, or by any other organization or agency in Nashville, to entertain the visiting speakers from the four Southern States involved in the contest. Possibly the fact that no Tennessee orator qualified produced an attitude of indifference toward the contest. It was a poorly-planned and poorly-conducted affair.

INSTRUCTIONS FOR THE RETURNING OF MILITARY EQUIPMENT

Seniors and Juniors may turn in military equipment at the Armory, beginning Tuesday morning, May 26. Freshmen and Sophomores will turn in equipment whenever they have completed their courses, including a practical examination in certain phases of military science.

Rifles must be thoroughly clean and free from oil. Scabbards will be removed from cartridge belts, and bayonets will be cleaned and well oiled.

Cap and collar ornaments, chevrons, stripes, and R. O. T. C. shields must be removed from clothing. Articles of government issue only will be accepted. Articles lost and unreasonably damaged will be charged against the student's account.

Seniors and Juniors will take their clearance papers to Colonel Gregory for his signature. Other students will go direct to the college treasurer.

PEACE CONTEST TO BE HELD MAY 28

Mr. H. M. Ray Will be the Representative of North Carolina State College

LEADING COLLEGES OF STATE TO PARTICIPATE

Contest to be Staged in Raleigh at First Christian Church, Corner Hillsboro and Dawson Sts.

The North Carolina State Peace Oratorical Contest will be held on Thursday, May 28, at 8 o'clock, in the auditorium of the First Christian Church, corner of Hillsboro and South Dawson streets. Representatives of the leading colleges and universities in the state will participate in this forensic encounter. Each oration will be on some aspect of the problem of world peace and international conciliation.

State College will be represented in the contest by Hardy M. Ray, a junior in the School of Science and Business, who was the only speaker from North Carolina in the Southern contest on the Constitution, held in Nashville recently. Ray was worsted in the interstate contest, but he is going to do his utmost to win state honors in the Peace Contest for the Red and White.

Local arrangements for the contest are in charge of the North Carolina Alpha chapter of Pi Kappa Delta. Dr. Elwood C. Perisho, of Guilford College, is the State chairman.

TEXTILE SENIORS MADE AN INTERESTING TRIP TO ROXBORO LAST TUESDAY

The members of the Senior Textile Class, with Professors Nelson, Hart, and Hilton, made a short but interesting trip to Roxboro, N. C., last Tuesday.

The first mill visited was the A. L. Baker Company, manufacturers of plushes, velvets, and velours. The process of manufacturing was very interesting, due to the fact that this is the first time the members of the class have had an opportunity to see the process.

The next mill visited was the Longhurst Cotton Mills. At this mill we were greeted by Mr. Mason Thomas, a member of the Class of '23. Mr. Thomas has achieved great success in this line, for he is now overseer of the card room. This mill manufactures both waste yarn and bleached yarn. The process of bleaching was very interesting and was done with the greatest amount of efficiency the members had seen at any mill. We complimented Mr. Thomas upon the class of products he was manufacturing and upon the cleanliness and general appearance of the mill.

The trip was immensely enjoyed by all the members, and it was ended by stopping at Duke to see State beat them 12 to 1.

The official observation party was composed of R. H. Smith, Bruce Cotten, L. H. Roane, C. M. Senter, O. M. House, J. E. Webber, Joe Moshien, and J. P. McAdams.

ATTENTION, JUNIORS!

Sample Rings Have Arrived If you have received your Ring Order Card, please bring the card and place your order at the Students' Supply Store as soon as possible. It is very important that this be done before June 1st, in order that the rings may be delivered at the opening of school next fall.

Please co-operate with us in this matter.

RING COMMITTEE, CLASS OF '26.

F. K. Fogleman, Chairman.

KAWANIS CLUB IS GUEST OF COLLEGE

Weekly Luncheon Served Members of Civic Organization in College Dining Hall

DR. BROOKS DELIVERS ADDRESS OF WELCOME

Glee Club Furnishes Music for Occasion; Principal Speaker of Occasion is H. M. Ray

State College wrote its name in big red letters across a page of the Raleigh Kiwanis Club history when the College was the host of that civic club at the college dining hall on May 15. The occasion was the regular weekly luncheon of the Kiwanis Club, and a record attendance showed that the people of Raleigh who belong to that great club were quite confident of the ability of the college boarding department to put out a feed "fit for a king" or for a Kiwanian. They were not disappointed, but there was some suspicion that the feed offered did not consist of the regular menu used in feeding the voracious students of State College.

Dr. E. C. Brooks made the address of welcome on behalf of the College, stating that he occupied a peculiar position in that he was at the same time the guest and the host of the Kiwanis Club, but that he was equally happy in either capacity. He spoke of State College as the biggest business enterprise in Raleigh, giving figures to substantiate his statement. These figures showed that the college has 202 persons on its pay roll, drawing a combined annual salary of \$1,100,000, not including the boarding department.

The principal speech was given by H. M. Ray, a student in the School of Science and Business, who gave his oration on the Constitution. It was received with a great deal of appreciation and applause by the Kiwanians.

Entertainment in the form of music was furnished by the State College Glee Club. "Daddy" Price displayed his happiest smile when the boys were repeatedly called back for an encore number.

The Kiwanians went away with a closer bond of friendship for the college, and the collegians went away feeling that they were almost members of the Kiwanis Club.

ALL CONTRACTS LET FOR 1926 AGROMECK

Printing Goes to Nashville; Sidel of Raleigh Gets Photographic Work

The 1926 Agromeck Staff recently let all the final contracts for work on next year's publication. All photographic work will be done by the Sidel Studio of Raleigh. The combined printing and engraving contracts have been given to The Brandon Printing Company of Nashville, Tennessee.

The Brandon Printing Company is the largest printing concern in the South. It is equipped, says the staff, with the very best printing and engraving machinery, and has an able and efficient working force. The staff believe they can put out a prize-winning book since the printing and engraving of Brandon is well above the average and the service offered by the company is unusually attractive. Mr. C. B. Dryden is head of the College Annual Department. He has had several years experience with college annuals and will be able to offer many helpful suggestions to the staff. He will make several personal service trips to N. C. State during the fall.

The staff is beginning to outline the plan of next year's book and would be glad to hear of any clever and original ideas which any one might suggest that would improve the book.

TRI-STATE TOBACCO GROWERS HOLD ANNUAL MEETING IN PULLEN HALL

STUDENT BRANCH AMERICAN CERAMIC SOCIETY ORGANIZES

Election of Officers Held; Hardee Chosen as President For Coming Year

SOCIETY HAS 12 MEMBERS

Society Pins Contributed by Pittsburgh Section of the American Ceramic Society

The Student Branch of the American Ceramic Society of State College held its first meeting on May 14, 1925. The meeting was called by Professor A. F. Greaves-Walker for the purpose of organizing the new society and electing its officers for the coming year. A temporary chairman was elected and a constitution submitted by Professor Greaves-Walker was read to the society. After a short discussion, the constitution was adopted.

The election of officers was the next step, since the constitution provided for a chairman, vice-chairman, and a secretary-treasurer. The officers elected were as follows: Chairman, Stanton Hardee; vice-chairman, Joe S. Frink; secretary-treasurer, P. E. Trevathan.

The society shall consist of honorary, active and associate members. Honorary members must be persons connected with the Ceramic Industries of North Carolina. The active members must be students registered in the Ceramic Department and be members of the Sophomore, Junior, or Senior classes. The associate members must be students of State College interested in Ceramics or allied industries.

The society pins were contributed to the new Student Branch by the Pittsburgh section of the American Ceramic Society. Dr. E. Ward Tillotson, one of the associate directors of the Mellon Institute at Pittsburgh and president of the society, advised Prof. Greaves-Walker that he would be appointed councilor of the new branch.

The charter members of the new society are as follows: Active members—Stanton Hardee, Joe S. Frink, P. E. Trevathan, E. N. Brackett, J. S. Boren, R. B. Stamey, L. L. Cheeson. Associate members—P. L. Stuart, L. M. Stuart, C. L. Butler, T. L. Stafford, and Herman Baum.

FRESHMAN CLASS ELECTS ITS OFFICERS

At a lively though poorly attended meeting, the Class of '26 on Wednesday night elected the following officers for next year:

President—U. G. Hodgin, C.E.
Vice-President—W. P. Albright, Agr.
Secretary and Treasurer—Jack Brantley, B.A.

Poet—Luther Shaw, Agr.
Historian—C. W. Jackson, Agr.

The election was very hotly contested. From five to eight men were nominated for each office, and in most cases two or three ballots were necessary to decide the winner.

The new president made a short talk, thanking his classmates for the honor given him, and pledging his efforts to make this the best Sophomore Class in the history of State College.

NOTICE

There are quite a number of men who have not paid their subscription to the N. C. State Agriculturist. We will appreciate your immediate attention to this matter.

R. L. BROWNING, Circulation Manager.

State College is Host to Fifteen Hundred Members of the Tobacco Growers' Co-operative Association of North Carolina, South Carolina, and Virginia.

MUCH DIFFERENCE OF OPINION DEVELOPED

Pullen Hall Filled to Capacity and Enthusiasm Resembled That of a Student Pep Meeting

On Tuesday, May 19, State College was the host to 1,500 members of the Tobacco Growers Cooperative Association of North Carolina, South Carolina, and Virginia. Pullen Hall was filled to overflowing, and at times the enthusiasm was as warm as is customary at a college "pep meeting." They came to attend the annual executive meeting of the association, as representatives of their respective districts. Every district in the association was represented, including South Carolina, Eastern North Carolina, the Old Belt of North Carolina and Virginia, the Sun-cured Virginia, and the Dark-fired Virginia belts.

It was plain that there was much difference of opinion among the members as to the past, present, and future success of the association. Some were ready to acknowledge defeat at the hands of the "Powers that be," some were merely looking on and wondering what would be the final outcome, and saying nothing. The third group were up in arms against any and all who opposed the theory, the practice, or the practicability of selling tobacco under the present system of co-operative marketing. They were quite militant, and hooted and hissed all opposition to silence, if not to their way of thinking. The meeting was given a dose of enthusiasm at the outset by a male quartette from Mecklenburg County, Va., with a repertoire of old plantation melodies with "co-op" words which went straight to the heart of every loyal "co-op," and must have been very strengthening to the weak and wavering members. They were probably the most enjoyed of anything on the much-varied program, and our local quartet would have done well to "listen in" on their close harmony.

The second and most highly concentrated dose of enthusiasm was administered by former Congressman Hallett S. Ward who spoke for an hour, stating every objection that the opponents of co-operative marketing could possibly bring forward, disproving each objection as he came to it.

SOCIAL FUNCTIONS COMMITTEE FORMED

Has Written Set of Rules to Govern Social Functions Conducted by Student Organizations

A committee called the Social Functions Committee has been appointed by Dr. Brooks for the purpose of drawing up a set of rules which will apply to all social functions conducted by any organization on the campus. This committee is composed of three faculty members and three student members.

The committee has already written a set of rules which, after being further discussed, will apply to the final dances and all dances to be held hereafter.

The necessity of such a committee has long been felt among the students and faculty. The rules which have been drawn up will tend to make the college dances functions of which the college will be proud.

Editorials

These are the days of commencement invitations.

Several men have responded to the call for reporters. Have you?

Our sister colleges in Raleigh have been putting on some fine recitals during the past few weeks.

We were glad to have the Kiwanis Club of Raleigh meet on our campus last week. We like to get acquainted.

Faculty baseball games are now the order of the day. Students should not fail to attend and root for their pros, and get that old grip.

Now that Clarence Darrow and William Jennings Bryan have appeared in the Tennessee evolution case we look for a first-class publicity contest.

Along about this time every year the thoughts of seniors turn lightly toward examinations. The rest of us scorn the thought, for we have a whole week yet.

The department of Ceramic Engineering bids fair to be one of the most popular on the hill. We will have more to say about this department later.

The sight at Wake Forest last Saturday showed that we have the right kind of spirit among the student body. When the game was over—and lost—the band played "State College Keep Fighting Along," and the boys sang it. Fellows, as long as we have that spirit State College will, in all reality, keep fighting along.

The P. D. Gold Citizenship Medal, to be awarded at commencement, is the nearest approach to an ideal kind of recognition that has ever been used at this institution. In this case the man who has been the best citizen of this community for four years receives the honor. This is a long step from the old method of giving honors for some particular feat. Citizenship is needed in the colleges as well as in the outside world.

The Glee Club appears in Fayetteville tonight, in its last engagement for the year. This is the first year in the life of this organization and it has been a rather hard fight, financially. It has proven, however, that we have the material here for a musical organization which is a credit to the institution. The civic clubs of Raleigh have taken the fellows to Fayetteville tonight. We take this opportunity to thank these men for their help in this matter.

WASTE-PAPER BASKETS

Every day we see the janitors near the dormitories picking up paper which has been thrown from the buildings. Sometimes this paper blows over the campus before the janitors get it. This paper is thrown from the windows because the floor is about the only other place for it. We know that this is no time to install new furniture in the dormitories, but we have much faith in an article which has not been a part of the regular equipment. This is the waste paper basket. Such an addition to our rooms would have a tendency to encourage cleaner rooms and halls in the dormitories.

GROUCHERS, TAKE NOTICE!

As the time approaches when our seniors will leave us we wonder if there are not many of them who wish to leave a parting thought of some kind. Maybe some have made discoveries which will help some youth who is to follow in their paths. Perhaps another has nursed a grouch for these many years and would like to air it after his last examination is safely passed. Often when the senior looks back over his four years of college life he is tempted to see only the weak points in the course he has just finished. Later he changes many of his conclusions. However, we desire to hear from some of the seniors who have a message, whether it is optimistic or not. Let us hear what you have to say through the Student Forum.

SPORTSMANSHIP

A real sport is admired by friends and foes alike. College athletics develop this spirit probably more than any other phase of college life. Long after many of the tricks learned on athletic fields have been forgotten; long after the irony sinews developed here have softened, the sense of fair play and sportsmanship still lives in the individual. This is a treasure to take into the game of life, and fortunate is he who goes well equipped with this treasure. This is a phase of college athletics which no one can discredit.

Our attention was brought to this subject last Thursday at the Virginia game. When our band played the college song the Virginians stood with bared heads. This is no more than showing proper respect, we admit, but this thing is done so seldom on Riddick Field that we feel justified in calling especial attention to it. Whatever else we remember, or fail to remember, about the University of Virginia, we will not forget this little act which these men did, and which branded them as sportsmen and gentlemen.

THE NEW AGROMECK

In many respects the 1925 Agromeck is the best annual ever published at State College. This represents not only our opinion, but what we believe to be the campus opinion. The book has several new features which add much to its appearance and show originality on the part of those who designed it. To outsiders who look over the book casually it will make a fine impression. The college will be presented to strangers in a very pleasing manner through its pages. Yet we doubt if these are the primary functions of a college annual. The students should receive first consideration. It is unfortunate that so many typographical errors were allowed to go into the book. Many of these seem of no consequence, perhaps, but those who are the victims of these numerous mistakes have just cause to feel that their annual is practically worthless. It is a shame that a book which represents so much talent should be marred by errors, which, to a large extent, are avoidable.

By all means save last week's issue of THE TECHNICIAN. Or if this is too much trouble, then cut out the college song and save it. We have been in need of such a song and now let's learn it and sing it.

Student Forum

Objects To Smutty Stories

There was no "shirt-tail parade" last Saturday night, nor was Dean Cloyd the jinx. Wake Forest won the game, and Lady Luck did not enter upon the scene to cause our ball players to make numerous errors sans hits and runs. Furthermore, we do not believe in jinxes or Lady Lucks.

As a member of the Faculty we do protest against injecting pep into our student-body and faculty members by calling a general assembly meeting in which is permitted the telling of a "Is there any ladies present" story! Honor system, morals, cussing, 'n everything—what chance have we to build up, construct, and reconstruct with the highest ideals as our objective if this sort of thing is permitted and commended (the one who presided at this assembly meeting said the person telling this "Is there any ladies present" story had made two home runs) at our general assembly meetings?

Signed PHILIP SCHWARTZ.

State College Keep Fighting Along!

"Towering Masses"

HERE the new architecture expresses itself in great vigorous masses which climb upward into the sky with a pyramidal profile—gigantic, irregular, arresting. An earlier, conventional building on the near corner is overshadowed, engulfed in towering masses of the newer building which are prophetic of an architecture of the future which is vividly stimulating to the imagination.

Certainly modern invention—modern engineering skill and organization, will prove more than equal to the demands of the architecture of the future.

State College To Be Well Represented At Camp McClellan

Many of the College's Best Athletes Will Spend the Summer in Alabama

WILL CARRY ALONG A FIFTEEN-PIECE BAND

Track Meet Which Is To Be held Near End of Camp Will Be the Biggest Event of the Season

State College will send one hundred and twenty men to Camp McClellan for the annual R. O. T. C. encampment. This delegation expects to make history for N. C. State in the numerous activities which are a part of the camp life.

The athletic features of the camp are of special interest to most students, and it is in this field that the State aggregation is expecting to take a good share of the honors. Never before has this College sent such a large number of real athletes to camp.

The big track meet which is held toward the end of camp is the largest event of the season. Those who are acquainted with these meets say that they are bigger events than the State meet which is held by the North Carolina colleges every year. For this event State has the following men who should give good account of themselves: C. Shuford, Tucker, Sherman, Black, W. Shuford, Cook, Griffin, Curran, and Morris.

Baseball will also be featured, and State has a fine nucleus around which to build a team. These men include Wade, the Shuford brothers, Riff, and others. Wrestling and boxing will be taken care of by Sherman and Thomas.

It so happens that fifteen members of the college band are juniors who are taking R. O. T. C. work. Arrangements have been made with Captain Price for these students to take their instruments along. Nearly every important section of the band will be represented. C. A. Davis, who is at present first sergeant of the band, will be director. This outfit should be able to disturb the peace for quite a distance around the camp.

Much competition is shown by the various colleges each year in these events. Gold, silver, and bronze medals are given to individual winners at the track meet. In addition, a large loving cup is given to the company scoring the highest number of points. The company from State is expecting to bring this cup back with them next fall.

"If I had known that tunnel was so long I would have kissed you."
"Good heavens! Wasn't you?"

"Say! Are you using your bathing suit this afternoon?"
"Yes; I am afraid I am."
"Splendid. Then you won't be wanting your tennis racket. I've broken mine."

He—Haven't I danced with you before?
She—You tried to.

First Co-ed—Why are you so angry at Henry?

Second Co-ed—I told him I was neither pretty nor brainy, and the horrible thing said he didn't care; he loved me anyway.

"Where in Hell did I meet you?"
"What part of Hell did you come from?"

Freshman—Do you take anything off for cash?

Saleslady—Sir!

He—Dear, every kiss just intoxicates me. Won't you let me be a drunkard?

She—Well, er-yes; but on the condition that you won't mix your drinks.

Father—Son, why are you always at the foot of your class?

Son—What difference does it make? They teach the same at both ends.

"I'm going to the dogs," said the student as he walked into a weinie stand.

Fresh No. 1—Have you forgotten that you owe me five dollars?

Fresh No. 2—Not yet; give me time.

"'Tis great to behold," sighed Mark Antony, as he viewed the pyramids.
Whereat Cleo snuggled closer and whispered in his ear, "'Tis greater to be held."

I flunked last term.

Was flunked the term before.

The Profs. say if I flunk this term, I ain't going to flunk no more.

Patriotism is taking your arm from around a girl's waist to clap when the United States cavalry gallops across the screen.

BRAZILIAN STUDENT IN CERAMICS DEPARTMENT

Mr. Charles N. Skalla, Jr., son of Dr. Charles N. Skalla, of Rio de Janeiro, Brazil, will arrive in Raleigh on May 26, preparatory to entering N. C. State College next September.

Mr. Skalla, the father of the prospective student, holds the degree of Doctor of Science from the University of Budapest, and is the owner of the largest metal enameling plant in South America.

Before matriculating his son at N. C. State College, Dr. Skalla had the Brazilian legation to investigate the merits of the ceramic departments of the various colleges of this country. After reviewing these reports, he decided to trust to N. C. State for the higher education of his namesake.

Mr. Charles N. Skalla, Jr., has finished the intermediate work in an English preparatory school in Brazil. He expects to enter State College with the Class of 1929.

Cost of Air

We are quite accustomed to getting air without paying anything for it. Even the filling stations furnish free air service. We have become so sure that air is free that it is startling to find that in sand-blasting the cost of air is the largest item. "The Enamelist," discusses the cost of air as follows:

"The United States Silica Company recently ran an advertisement which, to our mind, was a model advertisement. It brought forth facts which should promote a great deal of thought in the enameling industry.

"Many people consider the cost of labor or the cost of sand as the greatest cost in sand-blasting, but in this particular advertisement the fact is brought out that the cost of air was greater than all the wages paid to sand-blasters, greater than the total delivered cost of abrasives used, greater than the maintenance, amortization, and upkeep cost of all the equipment."

SENIOR ORATORS FOR COMMENCEMENT CHOSEN

Wallis, Webber, and Seymore to Represent Their Respective Schools

After several weeks of uncertainty the Senior orators for commencement have been chosen to represent their respective schools in the annual commencement oratorical contest. All the men chosen have been students of high standing in scholarship and campus activities during their four years at State College, and well deserve the honor of representing their schools in this final test of oratory.

The School of Agriculture will be represented by S. R. Wallis, of Arden, N. C., whose subject will be "The Imperative Plus." Mr. Wallis has been a most useful man on the campus. He has made his letter in both football and basketball; has been on the staff of The Technician, The Agromek, and The Agriculturist; being editor-in-chief of The Technician during the present year; has been active as a member of the Student Council; and with these and many minor activities has made honors in scholarship. Wallis is the first football man to make the Pine Burr Society and the Phi Kappa Phi Honor Society.

G. F. Seymore, of Apex, N. C., will represent the School of Science and Business, with the subject, "Citizen or Serf." Mr. Seymore is well known for his public speaking ability, having done much debating and speaking in both local and intercollegiate contests. He is a member of the Pi Kappa Delta Forensic Fraternity. He has served on the House of Student Government, and was a member of the State College Stock Judging Team at Memphis, Tennessee, in 1924.

J. E. Webber occupies the double role of representative of the School of Engineering and of Valedictorian. Mr. Webber hails from Morganton, and his record there in high school and since entering college leaves no doubt that he is the man for both positions. He was an honor student in high school, and in the preparatory school of Nazareth Hill Military Academy, Nazareth, Pennsylvania. He graduated with distinction. Since coming to State College Webber has made honors in scholarship every year; won both an oratorical and a declamatory medal in one year; is a member of Phi Kappa Phi Honor Society; president of the Pine Burr Society; was president of Pullen Literary Society, president of Tompkins Textile Society, and has been on the Student Council and on The Agromek staff. Not satisfied with these few honors, he has applied for admittance in the Graduate School of Science and Business at Harvard University and has been accepted. He expects to take up his studies there at the beginning of the next college year, in pursuit of a M.S. degree.

Additional Tennis Courts Needed

The students of State College want more tennis courts on Ag. Hill next year so that there will be sufficient room to give everybody a chance that wishes to develop his tennis ability.

Tennis is a very interesting sport that has never been developed on State College campus. This year Coach Parker has been spending much time on the courts and has developed a team that has made a creditable showing with the veteran teams.

Four courts do not seem to be sufficient space to give everybody a chance that will probably go out for the team. Since Mr. Parker has aroused new interest in this branch of athletics, why not more courts and a champion tennis team?

B. H. KNOWLER.

A negro was playing his guitar and singing for the amusement of several students after supper, in front of the mess hall.

Our distinguished associate editor, J. J. Wright, approached the darkey and said: "Do you know my best girl?" whereupon everybody laughed.

Good Trading

"Want to buy a mule, Sam?"
"What ails him?"
"Nothing."
"Then what are you selling him for?"
"Nothing."
"I'll take him."—Hum.

Good Taste

He: "Dearest, will you marry me?"
She: "John, I can't marry you, but I shall always respect your good taste."

FRESHMAN FRIENDSHIP COUNCIL HOLDS ITS LAST MEETING OF THE YEAR

Plans Made for Reception and Entertainment of Freshmen Next Fall

Last Monday night, May 18, the Freshman Friendship Council held its last meeting for the year. Most of the members were present at this meeting. Mr. King and Mr. Hicks also met with the council.

Mr. Hicks gave some of the plans that have been worked out for the arrival and the entertainment of the Freshman Class next fall. The new men are to come a few days earlier in order to become a little better acquainted with the college before school starts. It is hoped that this will decrease the mortality of the Freshman Class. He also told briefly of the work that had been done by the council this year, and the work that is being planned for next year's freshmen.

Mr. King spoke for a few minutes on the work of the "Y" here at State College; the necessity of such an organization, and the work that is to be done next year. He said that the "Y" hoped to have more money next year and would be enabled to put on a better program than has been done this year. A few words of praise were expressed by him to those who had

been so faithful in the work this year. He is very anxious that this good work be continued through college.

Mr. J. S. Morris has been chosen as chairman of the committee which is to organize a Friendship Council next fall.

"It was an old, old story," sighed the pretty wife on the witness stand in a divorce court. "A horse and a jackass can never agree."

"Don't you call me a horse," roared the husband, as he shook off his attorney's restraining hand.

Bell and Spigot Joint

THE Bell and Spigot Joint for Cast Iron Pipe adopted over one hundred years ago, is the preferred joint today.

It is tight, flexible, easily made and non-corrodible—there are no bolts to rust out—it makes changes of alignment or insertion of special fittings a simple matter—it can be taken apart and the pipe used over again, without any injury—it is not subject to damage in transit—in fact, it embodies practically all of the desirable qualities in an underground joint.

Wake Forest Defeats Tech For State Championship

State Blows Up in Seventh and Deacons Sew Up the Game With Four Runs

SORRELL PITCHES FOR FOUR HITLESS INNINGS

Tech Infield Looks Like Bunch of Sandlotters; Seven Errors by Veterans Prove Margin of Win

Last Saturday afternoon, under a scorching sun on Gore Field, Wake Forest successfully defended their earlier claims to the championship by turning back a completely routed State College team in what was expected to be the most crucial game of the championship series. The score of 7-3 hardly tells the story, for Wake Forest played top-notch baseball throughout, with Sorrell leading the way, while State put up the sorriest demonstration it has made in two years.

Wake Forest jumped into the lead with two runs in the first frame, which they held until the sixth. State scored one in the fifth and two more in the sixth and it looked as though things were going as had been expected. Then in the seventh the Tech infield went to pieces and before they could be stopped the Deacons had pushed four counters across. They added another in the eighth and that ended the run-making for both sides. And Wake Forest had cleared the last hurdle on the long straight-away to the State Championship.

Sorrell pitched the whole nine innings, allowing only seven hits, five of which came in the fifth and sixth and counted for three runs, State's only scoring. The first four innings he kept the Techmen away from the coveted first sack, being faced by only twelve men in these frames. Davis, who started for State, lasted only one inning, blowing up himself after being accorder rotten support by his teammates. He walked in a run after a hit, an error, and a hit batsman filled the sacks. Hill relieved him and pitched a nice game despite the ragged backing accorded him.

In the first, Timberlake singled, was sacrificed to second by Greason, made third on Gilbert's error, and scored on a fielder's choice. Armstrong was forced across by another State error, a

STATE DEFEATS VIRGINIA NINE

Beal, in His First Varsity Game, Pitches Great Ball Until the Seventh

ANOTHER LATE INNING RALLY TELLS THE TALE

Faulkner Leads Hitting With Three Two-Baggers, His Third in the Ninth Scoring Gilbert With Winning Run

By another late-inning rally, for which the Techmen have become so noted this season, State defeated the University of Virginia by a score of 3-2 on Riddick Field on May 7. By tying the score at two-all in the seventh and pushing the winning run over in the ninth, after one man had been retired, State made it two straight victories over Virginia this season.

This was the first time since 1907 that the Virginians had appeared on a local diamond, but it was the second meeting of the two teams this season. Four weeks ago the Techmen tamed the Cavaliers to the tune of 9 to 6.

"Rooster" Beal, of last year's Freshman team, took the mound for State for his first time. He pitched a great game, allowing the Cavaliers only three hits, until the seventh, when he allowed two runs to come in by his wildness. With two men gone he walked Hushion and Beard, and then McCoy knocked in the two runs by a double. Beal was relieved by McIver, who held the visitors safely during the last two innings.

Charlie Shuford started things in the first inning with a single over short. He came in with the first run of the game on Correll's double to deep right. Things began to look bad for State in the first part of the seventh when the Cavaliers took the lead by bringing in two runs. In the last part of this frame, however, Gilbert cleared things by slashing off a two-bagger to left. Then C. Faulkner slipped one down the first base line for two bags, bringing in Gilbert. This made the score two-all.

With one man gone in the ninth, the same Gilbert-Faulkner combination brought in the winning run. Gilbert got to first by beating out an infield hit. Then he came in with the winning run, when Faulkner slashed out his third two-base hit of the game.

For the first few innings it seemed that the Techmen could not solve the curves of Beard, the Virginian south-paw. In the last few innings, however, Beard was hit freely, but good fielding prevented the score from piling up. Hushion, Cavalier shortstop, made two sensational catches of line drives, turning would-be hits into double plays by catching the State runners at third. "Croaker" Wade, for State, made up somewhat for his failure to hit by nabbing some hard

SPORT COMMENT

We are endeavoring in this column to give the gist of Campus opinion about sports. Because of man's inherent narrowmindedness and conceit it is most probably our own personal opinion that we're actually giving. We hope not.

THE SPORT EDITOR.

ALTHOUGH WE'D HAVE a mighty hard time proving it to any disinterested person we are still convinced that the best baseball team in North Carolina has been taking its regular daily workouts down on Riddick Field all this season.

—N.C.S.—

YET, WE HAVE TO ADMIT that our idea of a CHAMPIONSHIP team does not allow for it blowing up as completely as our team did the other day over at Wake Forest.

—N.C.S.—

AND OUR OUTFIELD is beyond a doubt incomparably better than any other one in the State.

—N.C.S.—

TUESDAY'S EXHIBITION is proof enough that we've got the sluggingest team in the State. Even Sorrell was 'touched for a few in the fifth and sixth.

—N.C.S.—

AFTER THE RETURNS were up from the Southern Track Meet we began to wonder if the rumor about our team being delayed by a train wreck was true.

—N.C.S.—

WE TAKE THIS OPPORTUNITY to congratulate the Tar Heels on their success out there at Sewanee.

—N.C.S.—

WE HAVE ABOUT DECIDED that as a sport prophet we'd make a good wash-woman. If you don't already know why read our last week's comments about the baseball championship and the Southern Meet.

—N.C.S.—

SO NOW WE'LL BE SATISFIED with say only, we think we're better than Carolina. We'll see tomorrow.

—N.C.S.—

OUR HEAD IS STILL DIZZY from last Saturday. We haven't exactly figured it out yet. Perhaps it was too much confidence and—well, that's about as far as we can go. But here's one thing we're certain of: It was not Chick Doak's fault. He has clearly demonstrated within the past two years that he is the best, bar none, baseball coach in the Southern Colleges. We are for Coach Doak and we hereby offer our suggestion, for what it's worth: By all means, Chick Doak should be a permanent fixture on the end of that old baseball bench over there! Those who are familiar with the rest of the program of the P. E. Department know also that "Mr. Charlie" has done his share of the work there, too. We believe that he is one of the most valuable men on the P. E. staff and we'll be mightily disappointed if we lose our baseball-coach-of-all-times next year.

—N.C.S.—

NEXT WEEK WILL WITNESS the closing of our athletic program for 1925. All in all we've had a good year and we hate to see it draw to a close. Especially do we hate to think of not seeing the old nine down there working. But such is life—and then, we will kinda welcome the summer vacation.

—N.C.S.—

THESE FACULTY BASEBALL GAMES are the stuff. We surely did enjoy the one Wednesday. It was a joy to our soul to see Dr. Riddick beat out that infield hit of his. We wonder if the old-timers had as much fun out of it as we did?

WAKE FOREST DEFEATS N. C. STATE IN TENNIS 5-2

On last Saturday morning the Wake Forest tennis team defeated the State College team by five matches to two. State won one singles and double match.

The feature of the match was the playing of Johnny Matheson of State. This youngster has been out for the varsity baseball team this year and has not had time for tennis. Last fall he came out as winner of the tournament to decide who was the best player at State. State won both matches in which he participated. The State team played hard and every match was hard fought.

Singles

Newton of Wake Forest defeated Taylor of State 6-2, 6-4.

Agelasto of Wake Forest defeated Chang of State 6-2, 6-4.

Matheson of State defeated Slate of Wake Forest 6-2, 8-10, 3-6.

Powers of Wake Forest defeated Shelor of State 6-1, 8-6.

Sawyer of Wake Forest defeated Holloway of State 6-2, 6-4.

Doubles

Taylor and Matheson of State defeated Newton and Agelasto of Wake Forest 13-11, 6-3.

Slate and Powers of Wake Forest defeated Shelor and Campbell of State 6-2, 6-4.

STATE FRESHMEN LOSE TO DEMON DEACONS

Tuesday evening the State Freshmen nine lost to the Wake Forest Freshmen on Gore Field by a count of 2 to 0. Phelps, of Wake Forest knocked a two-bagger in the sixth inning, scoring two runs, after an error and a walk had put two men on base for the little Deacons.

After the fourth inning Joyner of Wake Forest was relieved by James, the two tossers working out a fine game. Biggers allowed the Wake Forest yearlings to collect six hits, while Joyner and James distributed four bingles among the State Freshmen. Phelps of Wake Forest and Kendall of State led the stick work with two hits each.

N. C. STATE BEATS DUKE UNIVERSITY

Hill Holds Methodists to Three Hits; Techs Gather Fourteen Safe Hits

On last Tuesday afternoon the Techs, still smarting under their defeat at the hands of Wake Forest on Saturday, journeyed over to Durham and proceeded to hand the Blue Devils the best licking of their young lives. When the smoke of the battle had cleared away the exhausted scorer's book showed that the Techs had gathered a total of fourteen hits for twelve runs off the Duke twirlers. Duke was only able to collect four hits for one run.

"Lefty" Hill, Duke's jinx, was master of the situation. He held the slugging Devils to three hits for the eight innings he pitched. The south-paw also decided that his batting average needed fattening and proceeded to slam out three hits out of four times that he was at bat.

Thomas pitched seven innings for Duke before he was relieved by Thompson. These two twirlers pitched better ball than the score would indicate. Their support was rotten. Duke's star infield was up in the air and made five bad errors and pulled some bonehead plays which helped pile up the score. The Techs gathered nine hits off of Thomas in seven innings and three off of hompson in three innings. Thomas showed remarkable ability as a pitcher several times when Duke was in bad holes. Captain Dempster, Duke's ace, did not leave his place in right field during the game.

RESUME VARSITY TRACK SEASON

While the Team Did Not Corner All the Glory, It Demonstrated Its Ability

Beginning the season with a couple of victories and showing up well in other meets, the N. C. State track team came to the close of its schedule not entirely covered with glory, but with the knowledge that its work had been discharged to the fullest of its ability.

Coch Shaw was handicapped from the first day by the lack of material. Good men were out for places, but there were too few men to push them, and because of this the team was not the success it might have been. It is safe to say that if there had been more men out the varsity cindermen would have shown up far better.

State 68—V. M. I. 58

In the first meet of the season State defeated the Virginia Cadets by the score of 68-58. In this meet the team was able to grab six first places and tie for the seventh, while seconds and thirds seemed fairly strong, bringing up the score to win by a ten-point margin. At no time till the very last event was either team assured of victory. Foster, V. M. I., and Pridden, State, tied for high-point honors with ten points each.

State 88—Duke 38

In the second meet of the season the Duke team was defeated 88-38. State took ten first places and tied

for another, while other places were good for quite a few points. Byrum was high man with eleven points, while Ripple, Clark, Pridden, of State, and Mabry of Duke each took two first places. In this meet Pridden bettered the State College record for the pole vault, topping the high bar at 10 feet 8 1/2 inches.

State 52—W. & L. 74

State lost to the Generals in the first meet of the year away from home. Though the score, 74-52, seems one-sided, State's team was hard at it during the meet and at no time till the end were the winners sure of victory. Captain Byrum featured in the meet by taking three first places—the hundred, the furlong, and the quarter. State took six firsts in all, and had too few men in the events to make up the difference by taking other places.

State 46 1/2—Carolina 79 1/2

In the Carolina meet State surprised them by taking six first places early in the meet, running the score higher than Carolina. However, numbers began to tell, and State's lead was overcome and forgotten, as Carolina consistently placed more than one man in one event after another. Byrum was high-point man of the meet, with two firsts and a second. Byrum lowered a State record in this meet by stepping the furlong in 22 seconds. Pridden, also, set a new State record by vaulting 11 feet 7 inches.

The Freshman meet, held at the same time, resulted in a victory for the "Tar Babies" by the same score as the varsity.

The State Meet

State's cindermen took 55 points in the State meet, held at Chapel Hill. Several State records were shattered. Ripple broke his own mark with the shot, putting the metal ball 41 feet 11 1/4 inches.

Jonas, of Carolina, set a new record for the 880, when he stepped that distance in 2 minutes 2-10 second.

Byrum again ran the furlong in 22 seconds and was tied by McPerson, of Carolina, who dashed the hundred in 9.9 seconds.

McDowell, Tech Freshman jumper, broke the North Carolina college record for the high jump when he topped the bar at 6 feet 1/4 inch in the Freshman State meet held at the same time and place.

Carolina won the varsity meet by taking 108 points.

State 57—V. P. I. 69

In the last meet of the season, held at Blacksburg, Va., with V. P. I., State lost, the score being 69-57. The meet took place mostly in the rain and on a wet field. State took eight first places but, due to the failure to take more first places was unable to win. Byrum was high man, with three firsts to his credit.

Sewanee

At the Southern meet, held at Sewanee, Tennessee, State sent only her best, but was unable to take a point in the whole array of events.

STATE FRESH DEFEAT THE BURLINGTON HIGH

On last Saturday afternoon the State Fresh track team defeated the championship Burlington High School team by a score of 76 to 32. The Freshmen were stronger in all departments; especially was this shown in the field events. State took all places in the shot and discuss. Kilgore and McDowell were the high scorers of the meet, with ten and nine points respectively.

Summary

100-yard dash—Powell (State, 1st; Brow (B. Hi) 2d; Huffn (B. Hi), 3d. 10.6.

220—Brow (B. Hi), 1st; Powell (State), 2d; Huffn (B. Hi), 3d.

STATE FRESHMEN TAKE TRACK MEET FROM LITTLE DEVILS

Last Tuesday evening the State Freshmen track team nosed out Duke University Freshmen on Riddick Field by a two-point margin, winning 64 to 62. The teams were evenly matched, but State's superiority in capturing firsts in eight of the fourteen events proved fatal to the Duke Freshmen. State having the advantage in the field events and especially in the shot-put and discuss, by making a clean sweep in the two events, while Duke gathered most of the points in the dashes.

So close was the score that it was not until the last event, when McDowell leaped 21 feet 4 inches, to take first place in the broad jump, that the winner was decided and gave the State Freshmen a victory over the Duke first-year champions of North Carolina. McDowell also won first place in the high jump by clearing the bar at 5 feet 7 inches.

Brantley, of Duke, was the high scorer of the meet, with 13 points. He won the high hurdles, the pole-vault, and placed second in the low hurdles. Bruton of Duke and McDowell of State were tied for second with 10 points each.

Summary

100-yard dash: Won by Bruton (Duke); second, Cliff (Duke); third, Powell (State). Time: 10 4-5 seconds.

220-yard dash: Won by Bruton (Duke); second, Powell (State); third, Ervin (Duke). Time: 24 4-5 seconds.

440-yard dash: Won by Barnes (State); second, Pegram (Duke); third, Litaker (Duke). Time: 56 1-5 seconds.

Half-mile run: Won by Crum (State); second, Tuttle (Duke); third, Barnes (State). Time: 2 minutes 16 1-5 seconds.

Mile run: Won by Tuttle (Duke); second, Walker (State); third, Preslar (State). Time: 5 minutes 2 2-5 seconds.

Two-mile run: Won by Brimley (State); second, Hester (Duke); third, Warriner (Duke). Time: 11 minutes 4 4-5 seconds.

220 low hurdles: Won by Cliff (Duke); second, Brantley (Duke);

third, Frazier (State). Time: 28 2-5 seconds.

120 high hurdles: Won by Brantley (Duke); second, Hamlin (Duke); third, Gorham (State). Time: 18 seconds.

Shot-put: Won by Rush (State); second, Kilgore (State); third, Maness (State). Distance 36 feet 4 inches.

Discus: Won by King (State); second, Gibbs (State); third, Kilgore (State). Distance, 109 feet 4 inches.

Pole vault: Won by Brantley (Duke); second, Warren (State); third, Reed (Duke). Height: 10 feet 6 inches.

Javelin: Won by Kilgore (State); second, Bennett (Duke); third, Carpening (Duke). Distance: 138 feet 1 inch.

High jump: Won by McDowell (State); second, Woodside (State); and Aycock (Duke) tied for second place. Height: 5 feet 7 inches.

Broad jump: Won by McDowell (State); second, Aycock (Duke); third, Cliff (Duke). Distance: 21 feet 4 inches.

GAS EXPERIMENTS SHOW MANY FUEL ECONOMIES

"Nation-wide interest in obtaining the greatest heating values for the money expended for fuels, both in homes and industry, led engineers em-

ployed by a public utility company to figure out what 1,000 cubic feet of manufactured gas will do. The experiments resulted in a discovery, among other things, of interesting figures showing what 1,000 cubic feet of gas will do when applied to cooking, as follows:

- Boil 275 gallons of water.
- Prepare 18 meals for six persons in the home.
- Bake 50 one-pound loaves of bread in the home.
- Roast enough coffee to last a person drinking two cups a day for 70 years.
- Barbecue enough ham to make 1,750 sandwiches.
- Prepare 330 single meals in a restaurant.
- Broil 70 three-pound steaks.
- Incidentally, it was found that a thousand feet of gas would make 500 brick, light two cigars a day for 500 years, do the work of two hens in hatching eggs, Japan 3,600 talcum powder cans, melt sufficient lead to make 375 feet of cable covering, or heat enough water for 1,000 days of shaving."—The General Engineering News.

CIVIL SOCIETY HOLDS ITS REGULAR MEETING

Prof. Tucker Addresses Society on "The Essential Qualities for Success in Engineering"

The Civil Engineering Society held its regular meeting Tuesday evening in the "Y."

Professor Harry Tucker of the Highway Engineering Department was the speaker of the occasion. The speaker spoke on "The Essential Qualities for Success in Engineering."

Professor Tucker said that "the practice of engineering demands that the individual engineer possess a character of the highest." He spoke of five qualities which he thought an engineer should possess, and illustrated each by references to eminent engineers who have especially honored the profession.

First is honesty. The speaker gave as an example George Washington, first a surveyor and then an engineer, whose whole life was actuated by this principle.

A second essential is thoroughness. Our famous Robert E. Lee, who was also a well-trained engineer, had thoroughness for his guiding principle.

A third essential is vision. The needs of the present and the future are different from those of the past. The engineer must be able to visualize these needs and build for the future. James Buchanan Eads, designer of the "Monitor" and the Eads Bridge at St. Louis, is a good example.

The ability to specialize is a fourth essential. "This is an age of specialists," said the speaker. That engineer who selects a special field of work and becomes an expert in that branch of engineering is bound to reap success. Professor Tucker named John A. Roebling, the designer of Brooklyn Bridge, as a good example of an engineer who became a specialist in his line.

Professor Tucker named one other quality that an engineer should possess. He first called it patriotism, then humanitarianism, and lastly, good citizenship. "What I mean," he said, "is the ability to put service ahead of any selfish or personal desires." The speaker gave Herbert Hoover, an eminent mining engineer, also the head of a department of our Government, as an example of one

who has made service the watchword of his life.

Professor Tucker said "If honesty, thoroughness, vision, specialization, and good citizenship are made your watchword, you will be a success in engineering, or in any profession for that matter."

Professor Tucker's talk was enjoyed very much by all present.

A short business meeting was then held. It was decided to have a banquet next Monday night and thereby close a successful year.

Tri-State Tobacco Growers Hold Annual Meeting in Pullen Hall

(Continued from page 1.)

He reached the zenith of his oratorical enthusiasm when, at the close of his speech, he said that the opponents of the association were the greatest liars in the world except the man who wrote five volumes trying to prove to the world that man descended from monkeys.

Richard R. Patterson, General Manager of the Association, gave a detailed report of the activities, assets, and liabilities of the association, stating that there must be a reduction of operating costs before the business could be run on an economical basis. He outlined an economy program in which he would dispense with the services of 178 employees, a reduction in the salaries of those retained to the amount of \$445,961 a year, and the closing of 25 receiving stations throughout the three states. His policy was retained by the membership.

On the whole, it was a very interesting, enthusiastic, and instructive meeting, and it is believed that much good for the cause of co-operative marketing will come from it. At the same time, it cannot fail to work to the advantage of State College, because it brought the farmers of three states face to face with what we are doing and trying to do, and when their sons and grandsons arrive at the age to attend college these men will remember the favorable impression that State College made upon them.

Dr. E. C. Brooks, in his address of welcome to the delegates, stated that it was very fitting that such a meeting should be held here, because it was the duty and pleasure of State College to co-operate in every way possible with the farmers and business men of this and other states.

Alumni Notes

Observations & Communications of Zippy Mack

After the game Saturday afternoon we about decided that there would be no use to mention that struggle in our usual waste of space here each week, but the Duke game Tuesday served to enliven us a bit, so we will just take this occasion to congratulate the Demon Deacons upon their well-deserved place at the head of the list of North Carolina baseball teams. This year certainly has been one calculated to cheer the heart of the most morose Baptist. Great stuff, Wake Forest.

Mr. J. R. ("Jimmie") Allen, captain of last year's championship team, was about town for the week-end and for the game at Wake Forest Saturday afternoon. One of his friends says that "Jimmie" is in the mule-selling business at Louisville.

Mr. G. R. ("Slim") Logan, Junior football star, has been about the grounds for the past few days. "Slim" has been working at home since the Christmas holidays.

Mr. A. C. ("Crouse") Jones, of the Class of '21, is now in the city on business. He has made several visits among the old fellows on the campus. Jones is the owner of a dairy farm at Tyro, North Carolina.

June 8, Monday of Commencement week, is designated as Alumni Day. There will be organized reunions of the Classes of '95, '00, '05, '10, '15, '20, and '24. Elaborate plans are being made for the entertainment of these visitors, or rather of these old boys coming back home, and no member of either of these classes will do himself justice if he fails to be among those present. And any one who does not happen to belong to either of those classes will be just as welcome as any one.

State Defeats Virginia Nine

(Continued from page 4.)

chances with his trap in right field. "Peanut" Gilbert covered the space between second and third with the precision of an old timer. Faulkner, Tech catcher, played the best game of the evening, getting three two-base hits and playing a good game behind the plate.

Wake Forest Defeats Tech For State Championship

(Continued from page 4.)

hit batter, and a walked batter. The Deacons failed to score again until the seventh. Greason was safe on Holland's error. Small popped out to Johnson, attempting to bunt. Armstrong hit for one base and Simmons walked, filling the bases. Hill bobbled Hood's bunt and they were safe all around. Holland errored Motsinger's easy hit and again all were safe. Holland errored his next chance, from Holt's bat, and everybody was safe once more. Sorrell's double counted for the fourth run of the inning. In the eighth Wake Forest counted again on one hit, a sacrifice, and Gladstone's error.

State's runs came in the fifth and sixth when the Tech batters finally managed to solve Sorrell's offerings and hit him for five safeties. After the seventh State threatened each time but Sorrell held complete sway and the Deacon's took the game.

THETA KAPPA NU FRAT ESTABLISHES CHAPTER AT UNIVERSITY OF N. C.

The North Carolina Gamma Chapter of Theta Kappa Nu Fraternity was installed at the University of North Carolina Thursday, May 7th.

The installation was conducted by Grand Archon W. S. Anderson and several other members of the national order.

This is the twenty-ninth chapter of Theta Kappa Nu. There are two other chapters in the state, one being at Wake Forest College and the other at N. C. State. The chapter at State has the honor and distinction of being one of the founding chapters of the fraternity.

If This College Man Can Make It Pay Big So Can You

HE worked his way through college. The girl he married was a school teacher. Long before he graduated, they decided that they would build a flower shop with a greenhouse attached. Build it right along the State road, where they could catch the auto trade.

So we designed for them the entire outfit. From the very start it started paying. Each has their part to do. Each are having the time of their lives.

It's a wonderful business for a man and his wife. Can't you just see that girl of yours, buzzing around in a charming flower shop like this, arranging the flowers, and humming one of your college songs the while?

Say man, here is living. Healthful, joy-filled, money yielding, living. Write us. Ask all the questions you want. Keep right on asking them.

Someday we'll get together and design a flower shop and greenhouse for you, and that wonderful girl.

If interested write to the Manager of our Service Department, Ulmer Building, Cleveland, Ohio, who will give your letter his personal attention.

WILL THIS STATE BECOME FAMOUS FOR COAL MINING

North Carolina's Two Coal Regions and Their Mining Possibilities

(By E. Conrad Clark, Jr.)

For about one hundred and fifty years coal has been known to occur in North Carolina, and for many years there has been more or less interest aroused amongst our people as to the possibilities of developing commercial coal fields. Considerable prospecting and some mining has been done during this period, but most of the work was a failure, due to several causes, chief of which, perhaps, was the lack of capital and having in charge of the operations men that were not familiar with coal mining. Perhaps another great contributor to the failure thus far in the coal mining was that a considerable amount of the coal that was first used was weathered and did not have the heating properties of other coal, and that was naturally expected of the coal mined in North Carolina.

There are two areas in the state in which coal occurs. One is known as the "Deep River Coal Field," covering portions of Chatham, Lee, and Moore counties. The other field is known as the "Dan River Coal Field," covering portions of Stokes and Rockingham counties.

First, taking up the Deep River coal field, we find that it extends from a short distance northeast of the Cape Fear River in a southwesterly direction to Carthage and in the other direction from Sanford on the southwest to a few miles beyond Gulf. The field is known as Deep River coal field, because all of the investigations have been made near Deep River at the point where it joins the Haw River to make the Cape Fear.

The extent of the workable coal and the available tonnage is estimated by geologists at approximately sixty-eight million tons of recoverable coal in the area just west of the Deep River fault, and that mining can be carried on profitably at a depth of about two thousand feet. The area in which this tonnage is included is about twenty-five square miles, and it is considered reasonable to assume that the coal bed throughout this area is three feet in depth of recoverable coal. The character and quality of the coal has been very carefully studied, and physical and chemical analyses have been made of the coal taken from the various sections of the area. One interesting feature of the chemical composition of the coal found in this region is that it contains nearly two per cent nitrogen, which could be obtained in the form of ammonium sulfate as a by-product in the coking of the coal. It was also estimated that there would be approximately twenty-two gallons of tar per ton of the coal.

The people, even in the districts, are ignorant of the quality of the coal now being mined. The people of the state as a whole regard the project as a worthless one because of the poor quality of the coal. The Cumlock Mine in the Deep River area has for seven years belonged to the Norfolk Southern Railroad, and practically the entire output of this mine is used by

that company. J. J. Forbes of the U. S. Department of Bureau of Mines has analyzed some of the samples and finds that they compare very favorably to that of other fields in regard to its high voltage content, by-products, and future in the production of gas and coke. Potentially this field is of great industrial value.

An examination has been recently made by the U. S. Geological Survey of the Dan River District in Stokes and Rockingham counties to determine whether or not it contains any important coal fields. The work was carried on by Mr. R. W. Stone, who examined all the prospect pits and had a number of them reopened. It was found that the coal-bearing rocks consist of a narrow belt of black slaty shale, which extends from a point just north of the Virginia line southwesterly through Leaksville, Madison, and Walnut Cove to Germantown. It has been thought by those living in the region that these black shales would lead to good coal with depth. This is not warranted by fact, however. Scarcely more than a foot of good coal has been found in any one bed in the district for a distance of thirty miles along the outcrop. This fact further diminishes the probability of finding thicker beds below the surface.

During the Civil War coal was mined on the Wade plantation three miles above Leaksville and shipped to Danville by boat. Although the coal is semi-anthracite, the bed is so broken up by the shale that the operations were soon discontinued. There have been fifty pits dug in the vicinity of three miles of Walnut Cove, and it is true that there has been high-grade coal found but not enough to warrant mining it.

After a careful and thorough examination of the coal found in the Dan River field Mr. Stone came to the conclusion that there was no reason to expect to find commercially valuable coal in this region. The beds of semi-anthracite found near Walnut Cove and Leaksville are only a few inches thick and of small lateral extent, and being so thin are wholly unimportant. It is, therefore, useless to expend money and energy in this region in the hope of developing a coal mine.

The summary, therefore, of the mining of coal in North Carolina is that the Dan River coal field is of very little importance from a commercial view, but that the Deep River coal field holds many possibilities in developing into a very good coal region.

STUDENT FORUM

(Continued from page 4.)

the State baseball circles was low, and all seemed dark.

The day came. The dread and fear that was in the State team evaporated in the heat of the frenzied afternoon, and in the two games that took place in succession there was a birth of a spirit that won, that gained, that installed itself into the very being of the State College, and today it is as the phantom ship of the Flying Dutchman that sailed on and on forever. The spirit lives on; it grows and goes forever until the magnitude and fullness thereof is not measureable in the inadequate standards of an everyday being, but is gauged in the hearts of the students with an indelible recollection that we can play the game, fight like men, and even though we lose or win, we are behind the teams, behind the boys to the fullest measure.

Before the fever of the baseball season subsided we had the banner of the State Champions safely nestled in our camp. This year no banner of victory is with us, but the spirit is here, the fight is still in us, and though we lost the championship, we won the fight. We have conquered the fears and dreads that were once wont to abide with us.

To Georgia Tech we owe a debt of gratitude. Though the team that we played was not a representative of the teams that won them their athletic prestige, nor was it a representative team of Southern baseball, it seemed to impart to us in a certain degree that spirit that characterizes the Georgia institution, and with the potent enthusiasm that was dormant in us, we arose to meet the grandeur of the enlightenment that we were worthy of the best laurels of victory that had too often passed on to others while we slept. But now we have risen to the fray, let our banners wave, shouted out our chorus loud and strong, for wherever we go we want the whole world to know that State College keeps fighting along.

THOMAS N. SPENSE.

"Your sister is spoiled, isn't she?"
"No; it's just the perfume she uses."

AGRICULTURAL CLUB ELECTS ITS OFFICERS

R. B. Winchester is Named President for Next Year at Last Meeting of the Term

Smoking, election of officers, and farewell speeches from each of the departing seniors were the outstanding events at the last meeting of the Agriculture Club to be held this term.

The seniors gave the other classmen a real inspiration to do greater things for the club and the whole college. "Work Harder" was the motto that each senior sanctioned as the best for all students. They had passed through the various stages and knew from experience. Another thing they encouraged was the regular attendance of all students to the departmental clubs and literary societies. Before these informative and inspiring talks were made there were several announcements made about the next year's Students' Agricultural Fair, which is expected to be the largest that the farmers have ever put on.

Then the cigars and cigarettes were passed around. Within a few seconds the room was full of smoke and every one was enjoying it to the fullest extent, but officers had to be elected for the coming fall term. After the battle was over the following was on the board:

- R. B. Winchester—President.
- R. R. Fountain—Vice-President.
- R. H. Bullock—Secretary.
- R. L. McCall—Assistant Secretary.
- G. B. Cline—Treasurer.
- C. L. Straughn—Assistant Treasurer.
- R. J. Peeler—Critic.
- E. A. Davis—Corresponding Secretary.
- W. M. Ginn—Reporter.

BLUE RIDGE!

Have you ever been to a conference at Blue Ridge? Have you ever seen that beautiful place in the mountains of the western part of this state? Well, have you ever heard of that place?

The last question will, no doubt, cause you to smile or laugh, for every one at this institution has heard something about Blue Ridge. If you want to hear more about this place of places in "The Land of the Sky," just mention Blue Ridge to any one that has been there. After hearing what any of these people have to say you will wonder why Blue Ridge is not counted as one of the seven wonders of the world.

No one could ever forget a few days spent at Blue Ridge. Eating and sleeping in that bracing atmosphere puts the real pep into your life. You will want to get up early in the morning and take a dip in the lake of clear and pure water from a mountain stream, or play a game of tennis while the air is cool and fresh and the courts are covered with shade, or take an early morning hike to the Spanish Castle and there hunt for the hidden lake, or try your skill at mountain climbing at 3 o'clock in the morning when everything else in the world is fast asleep (except your empty stomach); but, never mind that vacuum in your stomach, you'll be determined to be on High Top in time to see that beautiful sunrise. You will also have chances to go to Chimney Rock, Mt. Mitchell, Sunset Mountain, Grove Park Inn, and other places that you have always wanted to see.

While attending a Blue Ridge conference you will have the privilege of hearing some of the finest speeches delivered by a number of the greatest men of this country. You will have the privilege of associating and talking personally with these men. Problems that have baffled you and blocked your further progress will be discussed and threshed out so that your way will be clear and your future bright.

Not last and not least is the social life. A number of the finest girls that may be found in our Southern colleges are there to wait on the tables in the dining hall and make life at Blue Ridge more pleasant for every one.

Go over to our Y. M. C. A. and ask Mr. King if there isn't some chance for a fellow like you to go to Blue Ridge. If you have a chance to go to that finest place in "The Land of the Sky," grab it. You will come back bigger and better in all four dimensions.

GOING ON IS GOING UP

If you are satisfied with what you are there is no hope for you. There is no hope for a person who is satisfied to stand still. You must GO ON. No one single hour of your work-

ing day must you lose the thought that there is a better position and more money waiting for the one who deserves it. And YOU must decide to deserve

it, and make your superiors realize that you deserve it. Work for it, study for it, strive for it—and soon you'll be GOING ON and UP!

QUARTET AND CONCERT BAND HAVE PLEASANT TRIP TO OXFORD, N. C.

Raleigh Masons Furnish Cars for the Trip; Barbecue Supper Served

One of the most pleasant events to all concerned is the biannual visit of the Concert Band and Quartet to the Oxford Orphanage. The most recent occasion of the sort was on Friday, May 15, when "Daddy" Price and 35 of his musicians trekked to that city to entertain and be entertained.

They were as usual motored through the country by the Masons of Raleigh, who are ever ready and anxious to lend themselves and their cars to the cause of brightening the days of the children at the Masonic Orphanage at Oxford. They enter into the full spirit of the thing, becoming children at heart again, and seem to enjoy the whole program as well as do the children or the lads from State College. Those who left their business and carried the band over on this occasion were: J. B. Cullins, Edwin Yates, J. E. Rudy, J. L. Woodward, C. T. McClenaghan, A. T. Arnold, L. R. Allen, C. T. Wheeler, J. R. Kee, and H. H. Turner.

The Orphanage gave a barbecue supper, finishing off with strawberries and cake that were "like mother used to make." No one seemed to be troubled with a fear of indigestion, and all partook quite heartily. In the concert which followed, "Diddy" Ray literally "outdid himself" at his old trick of clown for the entertainment of the orphans. At the close of the program Colonel Olds, who accompanied the band, told the children that Mr. Ray would not be back next year, as he expects to take up his studies at Northwestern University next year.

PERSONAL and SOCIAL NEWS

(All social and personal news turned in THE TECHNICIAN office will be appreciated by the editor.)

—"Rooster" Beal, "Skinny" Warrington, Warren Hadley, John Jennette, "Mike" Eckerson, "Legs" Faulkner, "Pete" Little, and Burnard Falkner went on their usual week-end tour. They journeyed to Nashville to witness the Nashville and Bailey baseball game. A good time was reported by all.

—Ira Thompson and Monty Wilks spent the week-end in Greensboro.

—Carl Jones was in New Bern during the week-end.

—George Holloman spent the week-end in Rocky Mount.

—Buck Bynum was in Sewanee the last of the week, taking part in the Southern track meet.

—"Bob Ormand and "Shorty" Mills were in Greensboro Sunday.

—W. L. Vest spent the week-end with his parents in Winston-Salem.

—Herman Baum visited fraternity brothers in Chapel Hill over the week-end.

—M. C. Commer spent the week-end in Greensboro.

—E. A. Feimster spent the week-end in Greensboro.

E. E. SOCIETY ELECTS NEXT YEAR'S OFFICERS

Members Vote as Opposed to Changing Date of Engineering Exposition

The State College chapter of the American Institute of Electrical Engineers, on Tuesday evening, elected the officers of the society for the coming year.

President Seamon presided at the election, and the following members of the Junior Class were named to head the society in its work for the 1925-1926 term: President, F. P. Dickens; vice-president, F. L. Tarleton; secretary-treasurer, Herman Baum.

After the election, the meeting was turned over to the incoming president, who made a very stirring inaugural address, assuring all members of the society that nothing would be spared to put before the society next year an interesting program.

The matter suggested by the Agricultural Society to put on the engineering exposition at the same time as the agricultural fair, met with disapproval and was unanimously voted down. A committee was appointed to confer with the other societies and set the time of the exposition at such time as when an educational convention was being held in Raleigh.

As Coach Parker, who was to demonstrate to the members of the society the method of resuscitation from electrical shocks, did not appear, the society adjourned.

Freshmen Get "A" On Drill

Lieutenant Lee announced last Monday to all freshman companies that the members of those companies who have missed no drills would be given an "A" for the quarter. Students who have missed drills and who were excused would have ten points deducted for each absence. Students missing two excused drills would be given a "B" plus, and any student who has missed as many as ten excused drills would be given an "F" for the term.

EXAMINATIONS SCHEDULE

Senior Courses

Classes holding their first weekly meeting on—

Monday, 8, will take final examination Wednesday, 8:00-10:00.

Monday, 1, will take final examination Wednesday, 10:30-12:30.

The Snake—May I look you in the eyes, madam?

The Rabbit—Charmed, I'm sure.

"Did you heard about Willard, the bank cashier, stealing fifty thousand dollars and running away with his friend's wife?"

"Good heavens! Who'll teach his Sunday School class tomorrow?"

DR. RANDOLPH ADDRESSES MEETING IN NEW ORLEANS

On May 11 Dr. E. E. Randolph, Professor of Chemical Engineering, addressed the joint meeting of the American Oil Chemists and Cottonseed Crushers Association in New Orleans, describing the college courses in vegetable and animal oils and other chemistry subjects. The work of the college was very heartily endorsed by the associations. Our College is the first in the South which has made a start to give instruction in this field with actual semi-plant equipment.

The American Oil Chemists Association has nearly 300 members of the leading chemists in the oil industry. The Crushers Association has over 800 members of the managers and superintendents of the various oil mills of the country. In this number are many chemists of allied industries, including all of the large soap manufacturers.

Cottonseed oil and by-products now rank as a major industry in this country. Cotton seed crushed in the United States during the past nine months totals 4,358,691 tons with an additional 144,271 tons on hand at the mills. Cottonseed products manufactured during this period were: crude oil, 1,323,123,943 pounds; refined oil, 1,131,454,426 pounds; cake and meal, 2,004,838 tons; linters, 840,709 bales. At this meeting leading men in the soap and oil industry asked for graduate industrial chemists from State College for immediate employment in their plants. Seven definite requests were made, as well as assurances of other openings in the near future.

"DOC" PRENTIS GUEST OF THE '26 TEXTILES AT DINNER TUESDAY EVE

A very delightful dinner was given in the "Y" on Tuesday night by the members of the present junior textile class in honor of "Doc" Prentis, teacher of fabric analyses, who is now serving his last year at State College.

The dinner was given by the juniors of their own accord, because of their love and respect for their teacher. Every one that has been taught by "Doc" Prentis or even knows him, knows that he has a winning personality, and because of this fine quality of his he has made many friends here who will regret very much to see him leave.

After the dinner, a three-course affair, John Currie, the toastmaster, called upon several members to make short talks. A ready response was given by every man called upon, and the many witty sayings kept the crowd highly amused. The last of the series of short speeches was made by "Hog-

Face" Brown who presented the present, an Eversharp Pencil with the words "To Doc Prentis, from the Textile Class of '26" engraved upon it.

And then, as the evening neared its close, "Doc" himself got up and gave a talk in which he expressed his appreciation for the dinner and for the present. He also assured the boys that he had enjoyed teaching them and that he would always be glad to see them should they run across him at any time in the future.
