# Hoy to seek judicial assistance in discrimination fight

News Editor

After being denied membership to Trained Emergency Medical Personnel on Thursday, Bob Hoy, a self-proclaimed gay, has decided to seek judicial assistance in fighting what he terms discrimination.

Hoy said Sunday he plans on pressing charges through the Student Judicial Board against the University organization — if he can.

"Tve talked to Elwood Becton (State's assistant director of legal aid) and there seems to be a problem in that it may not be illegal to discriminate against gay people," Hoy said.

said.

Becton could not be reached for

Becton could not be reached for comment on Sunday. Hoy, who was given the opportunity to reapply for TEMP membership, said he does not plan to take civil ac-tion against the organization. "This could open a can of worms in civil court," he said. "I guess we'll go

ahead and file charges (with the Student Judicial Board) — if we can."
Hoy said he met with Director of Student Development Larry Gracie and Gracie suggested he go to the Student Judicial Board about the matter. Gracie said during a telephone interview he did suggest that Hoy go to the Student Judicial Board if what Hoy told him was true.
"I haven't talked to the other side (TEMP) yet so what I say is going to be restricted by that," Gracie said, adding that if TEMP did deny membership and did not give a reason why it did, then discrimination was present. "It is hard to define what discrimination is."

Wayne Hamilton, assistant chief for TEMP, said he feels that TEMP did not discriminate. Hoy's membership was not voted down by TEMP members, he said, but two-thirds of the members did not vote as is required in the organization's constitution in order to accept members. "It wasn't that he was voted

against," Hamilton said. "He just wasn't voted for. Several members abstained from the vote."

Hamilton said Hoy was asked if he wanted to reapply and that he said yes. Hoy affirmed he agreed to reapply.

"If he is present at the next meeting he will be voted on again," Hamilton said.

Asked if Hoy's non-interest in the organization — which Hamilton said was the reason for holding Hoy's application during past meetings — had anything to do with the vote, Hamilton said Hoy showed members of the organization he was interested at Thursday's meeting. Hoy was interviewed by TEMP before the vote — a practice with all applicants, Hamilton said.

Asked if he felt Hoy was discriminated against, Hamilton said, "I don't think so due to the fact that he was given time to respond to members (during Thursday's meeting)."

Hamilton said he did not know the vote tabulations because the voting was done by secret ballots and the ballots have been sealed in envelopes and locked in a vault. TEMP's secretary counted the votes.

The sealing and locking up the ballots was done so that if there were "any questions about the vote by Student Development they could look at them and know that there was no tampering with them," Hamilton said. Secret balloting was instituted "due to the fact this was controversial... and we wanted to be fair," he said.

"There were some negative votes," Hamilton said. "I voted for him due to the fact that after the preliminary interview (Thursday) his attitude toward the club had changed and I thought he could be an asset to the club."

Hamilton stated in an earlier article that Hoy did not show enough interest in joining the organization to become a member.

every meeting for 25 to 40 minutes and his interest had been obvious because he had received car-diopulmonary resuscitation certifica-tion and multi-media first-aid cer-tification after the beginning of this semester.

The sealing and locking up the allots was done so that if there were any questions about the vote by Stutent Development they could look at hem and know that there was no impering with them, "Hamilton said ceret balloting was instituted "due to be fact this was controversial... and e wanted to be fair," he said. "There were some negative votes," amilton said. "I voted for him due to be fact that after the preliminary in erview (Thursday) his attitude ward the club had changed and I nought he could be an asset to the bub."

Hamilton stated in an earlier article hat Hoy did not show enough interest joining the organization to become a lember.

Hoy said on Sunday, he attended

## Neighborhood groups say student population can become involved

Numerous off-campus organizations have been established in the past few years involving student affairs, especially those living in apartments and homes in the area.

Some of the major organizations include: the University Park Homeowners Association, Wake County Apartment Association, Wade Avenue Citizens Action Committee and Cameron Park Homeowners Association.

According to Isabella Cannon,

Association.

According to Isabella Cannon,
former mayor of Raleigh and president of UPA, the association is working to improve living conditions in the
residential area behind Hillsborough

Street.

One of the major goals of UPA is to encourage private ownership of homes rather than the conversion of homes into apartments which are owned by absent landlords, Cannon said.

absent landlords, Cannon said.
She also said that privately owned homes would help preserve the neighborhood. "Private-home owners would take more pride in the condition of the homes, individual yards and the neighborhood in general," Cannon said.

#### Legal battle

Legal battle

UPA is currently involved in a legal battle to keep the business zone from expanding into University Park.

According to Cannon, UPA is also involved with planting crape myrtle trees on the median on Clark Avenue.

"Students are invited to attend UPA meetings the first Monday of every month." Cannon said.

The Wake County Apartment Association presided by John W. Schrader has been in existence for about six months.

According to Karla Valentine, the

According to Karla Valentine, the primary goals of the group are to improve landlord attitudes, bring people in the same business together, and make people more aware of neighborhood problems.

Geneva Martin, a member of the group, said she participates because she is concerned with apartment conditions. Martin said she puts a lot of money into the upkeep of her apartments which are rented to students.

M.E. Valentine Jr. said the

M.E. Valentine Jr. said the organization is geared toward students because the students need housing and parking near campus. The Wake County Apartment Association helps regulate conditions, he said.

meetings. An \$8 fee is charged to cover the cost of paperwork and a meal. Meetings are conducted at Balentines Buffet in Cameron Village.

Balentines Buffet in Cameron Village.
The Wade Avenue Citizens Action
Committee was organized about 10
years ago in conjunction with Raleigh
government. It was originally involved
with government decision-making
but now acts as an advisory board.

Represents community

According to Vice President
Carolyn Lehman, CAC is an outreach
of eigh government and represents the
entire community. The organization
makes suggestions concerning the
most advantageous use of city funds.

The major goals of the group are to
get neighbors better acquainted and
help resolve neighborhood problems,
Lehman said.

In the past CAC has succeeded in
getting unpaved walkways in the area
paved, kept the airport from expanding into Umstead Park, and increased the availability of bus service
around State.

The most recent project of CAC
was the planting of crape myrtles on
Clark Avenue Saturday. CAC worked
in conjunction with UPA and Parks
and Recreation. The trees are an attempt to stop the parking on Clark
Avenue median and to beautify the
neighborhood.

According to Lehman, CAC contacts the building inspectors when

neighborhood.

According to Lehman, CAC contacts the building inspectors when members discover overcrowded a partments. They would like to see the population kept down to the density levels set by the city.

CAC is also involved with expanding the Neighborhood Watch Program and ridding Raleigh of transients.

suents.

"We would like to do more for Raleigh residents but we are not sure what else we can do," Lehman said.

Another local organization is the Cameron Park Homeowners Association.

This group was established about 15 years ago and open to all homeowners in Cameron Park, Vice Chairman Mary Lou Eycke said.

mary Lou Eycke said.

According to Eycke the major goal of the Cameron Park Homeowners Association is to keep up a favorable image in the area.

She said the area was once in danger of becoming a business area and the group is striving to retain the residential status.

"We want to upgrade the quality of living for all," Eycke said.

## Women seek **ROTC** positions

Women now have access to ROTC courses and are becoming increasingly involved in them throughout the nation. State's ROTC programs are no exception, according to Col. Francis "Chip" Wanner, professor of military science for the U.S. Army Corps of Engineers.
"Women began in ROTC in 1972 and have continued to grow in number," Wanner said. He also said a total of 11.318 women nationally belonged to ROTC between 1976 and 1977.

Last year a total of 16.314 women participated. The sharpest increase has come over the past five years.
Wanner said the reason for the increase is that "more people are getting the word about ROTC and society is accepting an increasing role for women in leadership positions."

eepting an increasing role for women in leadership positions."

Women can receive a scholarship for ROTC while in high school or during either of the first two years of college enrollment. Such a scholarship pays educational and tuitional fees, books, supplies, and \$100 per month. In order to receive a scholarship, one must have a Scholastic Aptitude Test score of 1260 or better as well as a high grade-point average. This is accompanied by tests which evaluate the individual's physical and medical progress as well as leadership talents.

Women in ROTC, according to Wanner, are treated the same as men as far as possible. He said there are three differences.

"Their uniforms are different, passing levels for certain summer camp," Wanner said.

He said another difference is that women who graduate from ROTC are not allowed to serve in combat positions during wartime.

Women have to perform the same tests as men, but their

He said another difference is that women who graduate from ROTC are not allowed to serve in combat positions during wartime.

Women have to perform the same tests as men, but their passing requirements are numerically lower. For example, men have to do 40 pushups in two minutes to pass the physical tests whereas women have to do a minimum of 16 pushups in the same period of time.

Men also have to do 40 situps in a period of two minutes whereas women have to do a minimum of 27.

Karen Barlow, a junior at State, said she benefits from ROTC in the areas of "leadership experience and confidence."

ROTC in the areas of "leadership experience and confidence."

Barlow entered ROTC in September and will have a job in the army after graduation. She said ROTC paves the way in the army and guarantees a job in it as an officer. She described ROTC as a good experience.

She said she opposes the concept of women in combat. She said women are not "physically strong enough" for combat duty.

That view was shared by another ROTC student, sophomore Jennifer Canney. She said it would be "hard to have men and women in combat together. Men should take care of the combat and women should support them."

Canney said she entered ROTC because of curiosity and now likes it.

Junior Kenny Woody said women make many contribu-

now likes it.

Junior Kenny Woody said women make many contributions to ROTC "and many of them have become officers on
the ROTC staff. Many take the program seriously."
He said women are not harassed by any of the men who
take ROTC. "At summer camp, I thought that there might
be some harassment or other problems but after the first

be some narassitent or other proteins out after the man-few days no problems arose."

But Woody, who is an ROTC drill sergeant, said he op-poses combat roles for women because it "takes a special kind of toughness to go in the combat forces which most women do not possess."

### School of Education helps University search for child-care center site

by Sinthea Stafford Staff Writer

Staff Writer

State's School of Education has been working with the University's child-care committee for the establishment of a center on campus which would provide care for the children of students and faculty.

Wendy Sanchez, a research associate in the School of Education, said finding a building site for the center on campus is not a problem. The problems are in trying to find a structure to house the center and in raising the money to build one.

"There is just nothing available on campus. All the spaces are taken, as can be seen by simply checking around campus," Sanchez said.

She said the University has made some land available near E.S. King Village for the center.

According to Sanchez, even if the center is commercially built, the contractor might experience difficulties in trying to meet the University's needs.

meeds. William Jenkins, assistant vice chancellor of finance and business, arranged a meeting for the groups involved in the development of the

child-care center to discuss specifications for the project.

A composite list of specifications
was drawn up in the form of a proposal
to be sent to private contractors.

The proposal describes a center
that would be able to meet the educational, emotional, social and physical
needs of the children and to meet the
needs of parents through flexible
hours.

A secondary purpose of the center might be its development as a resource for student and faculty in-volvement concerning educational purposes. For example, faculty

research and student internships and employment would be available.

According to the proposal, the center will provide care for up to 100 infants, toddlers and children up to 4 years old.

North Carolina licensing and federal certification will be considered minimal standards.

The proposal also states that the center will operate from 7:30 a.m. 10:30 p.m. Monday through Friday. The schedule will also coincide with University holidays.

Staff and operators will be people from outside the University communi-

degree in education and have experience in directing a child-care center.

The supervisory teachers in age groups 2 through 4 will be required to be certified in early-childhood instruction. Child-staff ratios cannot exceed levels specified as acceptable by state licensing and federal certification requirements, according to the proposal.

An advisory board will be established to advise on matters of policy and program development and personnel. It will also develop and implement

procedures for the measurement and evaluations of the center's operation.

The objectives of the School of Education are to demonstrate the need for a center and to raise the necessary funds. According to Sanchez, \$250,000 to \$300,000 is needed.

She said the School of Education has considered using surveys to assess the need, but this would be difficult because the surveys would require

### Technician Opinion

A paper that is entirely the product of the student body becomes at once the official organ trough which the thoughts, the activity and in fact the very life of the campus are registered. It the mouthpiece through which the students themselves talk. College life without its journal is

- Technician, vol. 1, no. 1, Feb. 1, 1920

### A possibility ...

Even though it's still the heart of the season, plans are under way to ensure that ticket distribution for the Carolina basketball game will go

Problems with ticket distribution for this game are foreseen because of the day the game is scheduled. The game is set for Jan. 13; Registration Day for the spring semester is Jan. 11 and Change Day is. Jan 12 Since students will not have their Jan. 12. Since students will not have their registration cards until Registration Day and many will not have them until Change Day, distribution cannot possibly start Jan. 11. The Student Senate athletics commit-

tee currently plans to begin distribution on Jan. 12, according to committee chair-man David Isenhour. But since Change Day is the same day as the first day of distribution, some confusion has been andistribution, some confusion has been all ticipated because of the incompatibility of long lines of Change Day participants and the longer lines of students camping out for Carolina tickets.

for Carolina tickets.

Therefore the athletics committee has proposed a distribution system for the Carolina game that departs dramatically from usual procedure. The committee is to be commended for its foresightedness to be commended for its foresigntedness and effort to eliminate problems before they occur. However, the success of its proposal will have to be evaluated ex post facto.

The committee has suggested that

distribution for the Carolina game abandon the usual priority system. Its sugges-tion is that tickets be distributed on a lot-

tery basis.

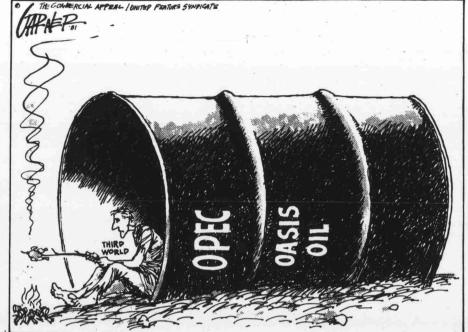

The details of such a suggestion haven't been worked out, but it appears that the plan would work this way: Tickets would still be distributed from the four Reynolds Coliseum windows on a first-come first-served basis. But instead of the tickets for the best seats being given out first, a ran-dom selection would determine which seats are given out when. With this plan there would be no need for students to camp out since the first tickets given out would not necessarily be the best

This new proposal is one way to eliminate students camping out. It is probably not the best plan that students could hope for, but it should be tried this year due to the unusual problem with schedul-

ing. A plan must eventually be devised that will eliminate the problems associated with Carolina ticket distribution and at the same time ensure that the students who camp out the longest will receive the best tickets. The athletics committee's proposal may accomplish the first objective but it not satisfy the second

The plan will not be final until the full Student Senate votes on it at a Nov. 4 meeting. Students interested in the logistics of the plan should attend the eeting and voice their concerns

Issues Foreign and Domestic

### Social Security system can remain solvent

Social Security is, quite probably, the most far-reaching program administered by the federal government, serving practically all Americans in some way. It is the most democratic social program in existence, paying money not only to the poor but also to the rich.

Roughly one-fourth of President Ronald Reagan's last televised address dealt with the administration's plans for the system; Social Security is clearly important to the hearts, minds and billfolds of America.

Most of the attention given the program in recent years has dealt with solving its "problems," both real and imagined. That problems do exist is barely arguable — the points of contention are the size and nature of these problems.

problems.

The faction represented by Reagan and his advisers claim that the situation is critical. They see a system faced with declining revenues and propose sweeping changes as a reaction to these alleged problems. This group's approaches to the problem can be categorized best by two Reagan-backed proposals that recently died before Congress.

One tack that wound up nailed was an attempt to modify the built-in cost-of-living increase structure by postponing the increase for three months, from July 1 to Oct. 1. Reagan eulogized his proposal first by claiming that this change alone would have made the system permanently sound; secondly, he tried to pin the blame for the bill's swamping on Speaker of the House Thomas P. "Tip" O'Neill, D-Mass, and that means ol' Democratic leadership.

Neither of these statements can be sup-

Neither of these statements can be supported: his proposal to postpone the raise represented at best a temporary savings and not a permanent solution. His second assertion was deceptive — sole credit cannot be claimed by the Democrats for the burial of this bill. It was, rather, accomplished by one of Reagan's beloved bipartisan majorities.

tion which would cause sharper-thanexpected increases in the cost-of-living raise.
This same inflation caused — and still
causes — higher interest rates, which lead
directly or indirectly to greater unemployment, another cause of lost revenue for the
Social Security fund. Therefore, the current
problem with Social Security fund shortages,
will correct itself as scheduled tax increases
and any stabilization in the economy provide
greater revenues for the fund.

A mantra common among those who argue
for sweeping changes in the Social Security Reagan's beloved bipartisan majorities.

The other proposal favored by the prophets of doom for Social Security is a raising of the minimum retirement age. Reagan's version of this plan, stalled in congressional committee, called for a drastic increase in the penalty for

early retirement, from the current 80 percent of full benefits to 55 percent. This would mean a yearly cut anywhere from \$375 to \$1.440 or more, depending on the amount of benefits received. Even though this lost money could be restored by working for 20 more months, this would be of little comfort to an elderly citizen sick or otherwise unable to work those 20 extra months.

The dire predictions of the Reagan ad-

The dire predictions of the Reagan ad-inistration and others notwithstanding, the Social Security system is, on analysis, not in

bad shape. Many of Social Security's pro-blems can be traced to the general economic malaise through which this country has suf-fered in recent years. No one could have predicted, when the last raise in Social Securi-

tion which would cause sharper-than-

Trent

Hill

tended to become a sole source of retirement income. According to this line of thought, the program was originally meant to provide a supplemental income only. This reason, in itself, is a weak rationale on which to base an isset, is a weak rationale on which to base an argument; everything connected with government — be it federal, state or local — has expanded beyond its original size and purpose. The reality still exists, however, that many if not most retirees base their post-retirement financial independence solely on Social

The program's expansion was not a political "accident" which a scheming group of Democrats or Republicans foisted on an unsuspecting American public. Rather, these expansions took place gradually during a period when the United States was extending its employment, industrial and population bases. As long as each of these areas grew, increases in the scope of the program were economically feasible; and socially desirable. Economic planners in the 1950s and 1960s did not envision today's scenario of minimal population growth and a stagnant, inflation-ridden economy.

All of this is not to say that Social Security faces a smooth transition into the 21st century. Something will eventually have to be done to reconcile declining revenues from a shrinking work force with a surge in the number of retirees as the post-war "baby boom" grows old. But "eventually" is not the same thing as "immediately"; Social Security, barring unforeseen disasters such as war or depression, will remain solvent into the next century. The best action to take would be no action, at least for the time being.

This is not so passive a course as it may sound. The economic trends which threw the system into a temporary crisis should not prove to be a permanent state. It would be foolish, then, to try to plan any far-reaching changes for the system based on these same trends. The temptation to apply the bold, sweeping stroke of change should be firmly resisted. All of this is not to say that Social Security

### 'The Club,' i.e., P-O-W-E-R

The Congressional Club, the ultraconservative political-action committee of N.C. Republican Sen. Jesse Helms, has changed its name to the National Congressional Club. The name change is appropriate because what funds the club gets come mainly from out-of-state contributors. Therefore, the National Congressional Club is probably the most sophisticated and powerful political machine in North Carolina's political history. The facts and figures about the club are staggering. Since 1973 the club has raised more than \$10 million. In 1978 the club raised an estimated \$7.8 million for Helms's reelection. In 1980 the club came in second only to the National Conservative Political Action Committee in raising campaign funds. The club raised \$7.873,974 and spent \$7,212,754 in 1980.

Sen. John East, R-N.C., got about \$2 million, plus staff members, from the club. The organization spent \$4,574,940 as an "independent" effort for Ronald Reagan's presidential election. In its latest endeavor, an effort to defeat Gov. James B. Hunt Jr.'s proposal to raise the gas tax, the club raised \$250,000 to fund advertisements against raise.

effort to defeat Gov. James B. Hunt Jr.'s pro-posal to raise the gas tax, the club raised \$250,000 to fund advertisements against rais-ing the tax. The group is able to do all this because before the 1980 elections the club organized itself into a corporation so as to avoid legal limits on the amount of money and services it could provide its candidates. The club has a list of 300,000 contributors

from across the country that was compiled by Richard Viguerie, the direct-mail czar of the New Right. The club employs 45 part-time and full-time workers and has its own com-

and full-time wants.

The tactics the club uses on behalf of its candidates are borrowed from Joseph Goebbels, Adolf Hitler's propaganda minister. Goebbels philosophy was if one repeated a lie often enough, people would begin to believe

In 1980 the East-for-Senate campaign repeated a number of lies about then incum-bent Democratic Sen. Robert Morgan. in 1980 the East-for-Senate campal repeated a number of lies about then incu bent Democratic Sen. Robert Morga Morgan was linked with Sen. Ted Kennec D-Mass., and Sen. George McGover D-S.D., by comparing him with Helms. Achie Bunker would seem like Geor McGovern compared with Jesse Helms.

The club also linked Morgan with union bosses. That came about because Morgan voted against a bill sponsored by Helms that would have allowed corporations, but not unions, to use treasury funds to communicate with employees on political issues. The club further claimed that Morgan voted against the B-1 bomber, when in fact he did not.

One interesting fact about the National Congressional Club is that it does not have any blacks on its staff. Its members explain this

**Jarrett** 

Henry

by saying no blacks have applied. Their explanation is probably true. Who could blame by saying no uncast into the planation is probably true. Who could blame blacks for not applying? After eight-and-a-half years in the Senate, Helms has yet to vote in favor of any civil-rights initiative. Also, an article in the August 1981 Playboy exposed Tom Ellis, the club's chairman, as director of the Pioneer Fund which was created to conduct research into a postulated genetic inferiority of blacks.

blacks.

The National Congressional Club has more money and power than any political organization in North Carolina. The danger does not lie in the money and the power per se, but in how they are used. The club has clearly shown a willingness to use hit-them-low-and-frequently tactics. Therefore, the club endangers any candidate who might decide to run against it and also jeopardizes the reputation and progress of North Carolina.

Henry Jarrett is a staff columnist for the Technician.

#### Entrez-vous, laissez faire

In reference to Mr. Trent Hill's editorial column of Oct. 7, "Speech describes usual Reagan antics," I would like to comment on statements made con-

Price controls on oil and gasoline lasted from 1971 until 1980. Prices were held below market levels to supposedly give the public lower energy prices. Actually, price controls caused higher prices.

prices.

The artificially low prices encouraged consumption and discouraged domestic production by eliminating profits oil companies could use for exploration. Also, the government's reluctance to allow drilling on public land discouraged production. It is estimated that 85 percent of our oil reserves lie under public land. So the high demand and lack of domestic production created a shortage, a shortage that caused the importation of more oil.

Through the decade of the '70s our need for imported oil steadily increased. Imports rose from 35 percent of our consumption needs in 1973 to 50 percent of our needs in 1980. Prices almost tripled during this time.

In 1981 President Ronald Reagan ended oil price controls. Skeptics said that prices would skyrocket and that oil companies would squander their profits. Prices rose sharply at first, but when the higher price-induced drop in demand created a

surplus of gasoline, prices started falling. Prices have almost fallen to the level they were before decontrol

decontrol.

A big factor in the price drop has been the worldwide oil glut. The oil glut forced OPEC to lower its prices. Decontrol helped cause the glut by dropping our demand for OPEC oil.

In conclusion, we have seen how price controls affected the market. Also, we have seen the market work on its own. I think Reagan was correct when he said the market can supply our energy needs.

# A small village stands where aqua paint once peeled

Picture this if you will — a quiet little village street filled with all sorts of tiny shops. Walking down the street you see a butcher shop, a bank, a bakery, a haberdashery, a livery stable, a post office, a movie theater and a flower shop.

Sounds like a scene out of a storybook, right? Wrong. This picturesque little community actually exists right here on State's campus — more specifically, in the basement of Berry Dormitory.

Called the Village of Berry, this street scene is painted on the hall wall in the basement. What started as an effort to beautify ugly, peeling walls, snowballed into a project that involved the whole floor. Theme halls like this one are going to be allowed in other dorms now and all because senior resident adviser, Patricia Winter, decided her new hall needed some renovation.

"When I got hired in the spring of 1980 as an RA, I went down to look at my new hall," Winter said.

Needless to say she wasn't too happy with her findings. The basement was dark and dreary with pipes hanging everywhere. The walls were painted an aqua color but the paint was chipping with other colors showing through.

Rather than resigning the situation to being part of the life of a student, Winter wanted to get permission to have the hall painted.

"I worked for Residence Life and Residence Facilities that summer. I asked Eli Panee (director of Residence Facilities) if I could paint our hall in the fall, thinking, at that time, of just straight painting. He said it was a good idea.

"Panee and Charles Oglesby (director of Residence Life) had just come back from a seminar at a school that had murals painted in the dorms. Panee suggested that this might not be a bad idea for our hall. He also suggested that this might cut down on vandalism," she said.

Winter presented the idea at her first meeting for the floor. Somehow, the mural idea expanded and the girls decided to paint the whole wall. Then they started talking about themes.

"The village theme was the most popular one," she

said. "Another idea was to paint it like the hall was underwater — you know, the basement and everything. But the village finally won."

Winter said they picked out five interested girls to

Winter said they picked out five interested girls to sit down about every other night and work out the details. They ended up taking about three rooms a night and deciding what shops to turn them into. They also used a color chart for the paint but kept it simple to keep the colors from clashing.

"We worked on the project quite a while. Our hall was ideal for this because it has only 13 rooms. And because it is a basement, the hall has a lot of interesting nooks and crannies. We incorporated fuse boxes, pipes and the water fountain into part of the mural," Winter said.

Residence Life approved the whole idea and supported Winter's efforts. It told her it would get them anything they needed for the mural. By the time all of these plans were made, exam time had rolled around so the actual work didn't start until January. Winter said each set of roommates painted their door and the wall area around it. The only problem they encountered was the fact that many people aren't artistically inclined. But the girls brought in friends who were and, with the varying degrees of talent, the mural began to emerge.

The ideas for the different shops display considerable imagination. The bathroom became a movie theater and the maid's closet next to it was turned into the ticket booth. The General Store is the largest shop, taking up two rooms.

Remember those ugly steam pipes mentioned earlier? Well, you can forget those. The alcove is now a forest and the pipes are three-dimensional tree limbs covered with leaves. Talk about transformational

tions!

Anyone who hasn't seen the mural really should drop by to see it. The girls on the hall are proud of their job and love to have visitors. Dorms interested in a theme mural for their walls should contact Edna Collins of Residence Life, as she has to approve the design before a mural can be painted.

Such a project can be beneficial in lots of ways: new friends are made, shy folks tend to come out of the woodwork to help out and plain walls turn into works of art that add pizazz to dorm life. So come on, campus, here's a chance to be artistic!

### **Turlington Dorm** Halloween treat

Thursday and Friday nights, several State students were greeted by ghostly faces, screams, moans and rattling

greeted by ghostly taces, screams, moans and reasonables.

A new-wave concert? No, it was Turlington Dormitory and their second annual "Haunted Dormitory."

"This is our one big fund raiser each year." said Bob Winstead, vice president of the dorm and organizer of the event. Most of the dorm residents become involved in some way with the project, either by donning the frightening costumes or helping with the lighting and special effects.

"The people here at Turlington have really been super." Winstead said, "This year's event was twice as big as last year's."

Winstean saw, "June 9.2."

The tour began on the first floor, led up to the second and then down into the basement for the finale.

This year's haunted dorm featured such horrors as the wolfman, Dracula, a wall of groping hands and "The Texas Chainsaw Massacre," complete with a real, working chain-

saw.

Judging by the screams and shouts of students touring the house, the resident monsters at Turlington took their jobs very-seriously and were very convincing.

Turlington plans to stage another haunted dorm next year and if it is anything like this year's, you should not miss it — unless you are a bit on the squeamish side. Or to put it in the doorman's moaning cry. "If you have a weak heart, go back."

### No. 17 State rams North Carolina, 4-2, for 14th win

Assistant Sports Editor
Francis Moniedafe booted a penalty kick with 6:57 remaining to break a 2.2 standoff and lift nationally 17th-ranked State to a 4.2 victory over North Carolina. This win occurred in an important ACC contest Saturday afternoon on Lee Field.

The Tar Heels's Mike Fiococ was assessed with a hand-ball to afford the sophomore fullback his second penalty kick of the day. Prince Afejuku scored an insurance goal with 1:31 left on a Steve Green assist.

The Wolfpack increased its record to 14:1-1 overall and 2:1-1 in the conference, while creeping one step closer to its seasonal ambition of earning a berth in NCAA play. The Heels, which scored the second-highest number of points on the Pack this year, slipped to 15:3 and 2:2 in league play.

"It was a great win," said

the Pack this year, slipped to 15-3 and 2-2 in league play.

"It was a great win," said State coach Larry Gross, whose booters have a tough ACC road schedule this week in Wake Forest on Tuesday at 4 p.m. and Duke on Friday at 3 p.m.
"Everyone did a great job. Pat Landwehr did a helluva job. Carolina played a great game. They were just unbelievable. They were just unbelievable. They were aggressive on our large field. (UNC coach) Anson Dorrance is a class coach and a credit to the Carolina program," he said.

The Heels's Tony Johnson opened early scoring 13 minutes into the close battle on an unassisted header from directly in front of State's net.

But the Pack evened the count just a minute and a half later when Moniedafe lined his first penalty shot into the top left-hand corner of the net; just out of reach of UNC goalie Geoff Drayton.
"I just aimed the ball and

halftime, the Wolfpack had taken just three goal at-tempts, while Carolina shot only four times. State goalkeeper Chris Hutson saved one prospective point and Drayton stopped two

Finally, at 36:41 of the second half, Gerry McKeon put the Pack up 2-1 on a neat shot into the right side of the net on a quick assist from Green. Chris Ogu fed the ball to Green and was also afforded the assist.

score once again when sophomore midfielder Robert Kelly booted an unassisted goal into the left corner, just beyond a diving Hutson's reach.

Shots were traded from there, with neither team to connect until

Gerry McKeon looks for an opening in State's 4-2 win over North Carolina Saturday.

Moniedale scored the penalty kick, much to the excitement of the many State rooters.

For the game, the Wolfpack took 14 shots to the Tar Heels's 10. Drayton had nine saves, while Hutson stopped seven shots.

"We can't spot N.C. State two points and expect to win," Dorrance said of the penalty shots. "I think the number of penalty shots indicates which team had the ball closer to the opponent's net. We had excellent opportunities inside the box. Just like in wrestling in which a person can get an extra point for riding time, a team can get points in soccer on negatly kicks. But it's

with.

"They are an incredible team," added the UNC coach, whose team also fell to the Pack 4-0 a year ago. "On any given day, I think they could beat just about anyone. They have excellent players in (Sam) Okpodu, Moniedafe, McKeon, Ogu and Afejuku."

State, which has four games remaining, battles a Wake Forest team which lost to nationally ranked

In Friday's pool play, the Wolfpack trounced Wake Forest, 15-5, 15-7; Virginia,

Assistant Sports Editor

If one relied on tradition, ne would have foreseen a North Carolina win in the ACC Volleyball Tourna-

ACC Volleyball Tournament.

A year ago the Tar Heels, lost a pre-tournament match to State and rebounded in the conference tournament the following weekend to defeat the Wollpack in the finals of the initial year of the event.

Last Tuesday night State handed North Carolina an astounding three-game match loss heading into the weekend's league tournament.

But, as tradition stands, the Heels bounced back to take top honors in the second-annual ACC Tourna-ment Saturday night in Canmichael Gym, pounding the Pack, 16-14, 15-11, 13-15, 15-13.

Pack. 16-14. 15-11. 13-15.
15-13.

North Carolina capitalized on numerous State errors and bounced back from a 7-0 deficit to take the fourth game of the best-of-three match and remain conference champions.

"We didn't chang anything since Tuesday," North Carolina coach Beth Miller, whose team went to 27-5, said. "Tuesday we just made mistakes which hurt us. Tonight we corrected them. We stayed together. We made the comeback because we stayed together. We took it one point at the time."

State, which fell to 30-5, struggled throughout the match as it had throughout the tournament.

"They wanted to win

match as it had throughout the tournament.
"They wanted to win more than we did," State coach Pat Hielscher said.
"We lacked the intensity to beat them. We should have won. I still say we have the better team and we could have beaten them without any superhuman effort. If everyone did their part tonight, we might have won."

won."

The Wolfpack jumped to a 7-2 lead, but the Tar Heels pecked back and knotted the count at 12-12. State got two more points, but Carolina's Mercedes Ballbee served four-straight points to give the squad the first game.

In the second game, State with the second game wi

her squad the first game. In the second game, State again took a 3-0 lead, but North Carolina went on a scoring binge, tallying eight-straight points. Stacey Schaeffer then served five points to tie the count, but a number of hitting and block-

15-4, 17-15; and Clemson, 15-5, 13-15, 15-5. The Tar Heels demolished Georgia Tech, 15-2, 15-0; singed Duke, 15-8, 15-6; and burned Maryland, 15-2, Momentum finally seem ed to change hands in the fourth game as Susan Schafer and Joan Russo served the Pack to an 8-0 lead. Both teams scored evenly, with State still owning an eight-point advantage at 12-4 and in a position to carry the match to five games. North Carolina made a devastating comeback, tying the score at 13 before taking the match.

"When we got the early

Tournament team, including Kelly Halligan. Schaefer and Schaeffer. North Carolina's Donna Meier, Maryland's Sue Vance and Clemson's Lisa Harbison were also selected to the team. The Tar Heels's Sandy Schmidt received the MVP awa-4.

#### Ticket Distribution

Ticket distribution for Saturday's State-Penn State football game begins Tuesday with priority for letters P-Z.

### Abraham wins award; secondary shines while State falls for 3rd straight week

mark when State's Frank Bush broke through to block Chris Norman's punt and Dee Dee Hoggard recovered it in the endzone for the score. South Carolina closed the deficit to 12-6 before the half on another field goal.
"I'm excited about us winning the game when our offense didn't play well, South Carolina head football coach Jim Carlen said. "The field goals had to hurt them.
"Our defense played well, the kicking game was good except for the blocked punt and our offense struggled, but we won. This is by far the best defensive team I've ever had."
While Carlen's defense

but we won. This is by far the best defensive team I've ever had."

While Carlen's defense played well Kiffin's was all but perfect. The State "D" allowed the Cocks only 124 yards in total offense, the same amount that McIntosh had for the game.

McIntosh's output gave him 914 yards for the game.

McIntosh's output gave him 914 yards for the season, a new Wolfpack freshman rushing record, eclipsing the mark set by Ted Brown in 1975 of 913.

McIntosh also moved into sixth place in best single-season total by a running back on the Pack list, 100 yards behind Willie Burden's fifth-best mark in 1973.

The crowd of 56,517 watched the Cocks take the lead late in the third quarter on an 80-yard march after Auten had missed a 21-yard from the one and Mark Fleetwood added the extra point.

Eric Williams intercepted

point.
Eric Williams intercepted a pass, linebacker Robert Abraham picked off two more attempts and LeGrande recovered a fum-

ble during the course of the game to give the State offense good chances to score. The offense, however, could not reduce its mistakes enough to score.

Neither Kiffin nor center Jeff Nyce could explain the center-quarterback exchange problems.

"I don't know what the problem was," Kiffin said. "I think maybe it was the Astroturf. If we knew, we would have tried to solve it. We haven't had that problem in the seven other games."

games."
Nyce was just as curious as to the cause.
"I couldn't even begin to tell you what happened," he said. "I don't know. It could have been the turf, it could have been that you fail to read to soon or maybe it was my fault. It think there was just a lot of pressure on winning the next game and not just losing it."

next game and not just los-ing it."

State went with backup quarterback Ron Laraway in the fourth quarter after Avery had completed only three of eight passes with two interceptions. Larway finished with a five-of-11 performance and one pick-off. State had chances to win

State had chances to win the game or go ahead in the fourth quarter. Auten missed another attempt from 30 yards and a roughing the kicker penalty put the ball back in the Gamecocks' hands late in the game.

The clincher, however, came when the Pack was forced to pass late in the game. With 38 seconds left in the game, Laraway's pass

oning room after picking off a G
was intercepted by Chuck
Finney and returned 55
yards for the score. Fleet
wood's extra-point attempt
was good and the Cock's had
salted away the eerie win.
Abraham won the Dick
Christy award for being the
outstanding State player in
the game. The award, given
in memory of the late State
player who scored all 29
points in State's 29-26 win
over the Cocks in 1957, was
only part of the praise given
Abraham for his play.
"It was Robert's game here," Kiffin said. "Id
already penciled him in for a
game ball. But when you
don't win the game you don't
give out game balls."
Abraham summed up the
reason for the loss, which

(Belt loops or beltless) BACK THE PACK AT CARTER-FINLEY

STADIUM.

Gordon Seckham poss.
dropped the Pack to 4-4 as
the Gamecocks upped their
record to 6-3.
"We just turned it over a
little more than they did,"
Abraham said. "We knew
we had to stop their running
game and give the offense a
chance to do their job. It's
always going to be a
frustrating time when you
lose. We've just got to get
our heads up and go for it."
LeGrande, who led the
Pack's superb play in the
secondary, felt the Pack was
in it until the end.
"I thought we were going
to be able to pull it out," he
said. "Even before the last
interception I thought that
maybe we did have a chance.
That interception put the icing on the cake."

## Wolfpack golfers take 3rd in Cardinal

Sports Writer

After winning two tournaments, State's men's golf team finished out its fall season with a loss in the Cardinal Intercollegiate. The tournament, held at Guilford, was the Pack's worst performance of the year.

year.
After the first round,
State led North Carolina
by four strokes, finding
itself in first place after one

day of play.

Roy Hunter led a field of 60 golfers by at least two strokes to finish the individual leader after one day of competition. Hunter was the only golfer to break par.

On the final day of the tournament, State's four-stroke lead quickly vanished as North Carolina shot a blistering score of 699 to win the tournament. East Tennessee State was the only team to finish even near North Carolina. State finished third followed by Guilford, Temple and Wake Forest.

John Spellman of North Carolina won the individual honors by one stroke over

Carolina won the individual honors by one stroke over Hunter. Hunter shot a second-day score of 80 to ruin his first-day lead.

Other State golfers who participated in the Inter-collegiate were Neil Harrel. Eric Moehling, Nolan Mills, Thad Daber and Bill Swartz.

### Thompson Theatre's Lysistrata scores with laughter

Assistant Entertainment Editor

Assistant Entertainment Editor

Thompson Theatre's newest production Lysistrata is billed as a bawdy play. It is often difficult to fill seats when the subject of the play is lewd and obscene, especially with older people. However, Thompson Theatre should have no trouble in that regard. Standing-room-only crowds should be expected for its next few performances. It is very difficult to stay afloat in the realm of comedy while one is treading water in a sea of perversity, but Aristophanes' Lysistrata usually achieves success with much class and humor.

Lysistrata was Aristophanes' third try at a litterary attempt to end war. In the play, Lysistrata is a woman who convinces her fellow females that they have the power to end the war. All they have to do is become celibate.

But giving up sex for peace brings cries of despair

But giving up sex for peace brings cries of despair from the women. However, they agree to the plan to because "they have a reputation of bitchiness to live

While all the men are off at war, the women take control of the city-state of Athens. It isn't long before the hard-up men realize that something must be done — and fast. In a state of mutual desire, Athens and

and hast. It is for make peace.

It is interesting that Aristophanes chose women at at

It is interesting that Aristophanes chose women as the force to create peace because women sat at the bottom of Athen's social totem pole.

Judy House did a very good job as the domineering, yet compassionate, Lysistrata. She did not ostensibly use the lead role as a chance to push the women's movement. Rather, House subtly showed through confidence in herself that women ought to be given more respect.

through confidence in herself that women ought to be given more respect.

Myhrine is the female character who had to set the example of celibacy for the other women in a very funny scene when her husband returns from a long hard battle and seeks some comforting.

Laura Arwood gave a nice performance as Myhrrine. On the other hand, Tommy Harris goes a little overboard as the husband in trying to play his role for all it's worth.

verboard as the husband in trying to play his role or all it's worth.

Most traditions of the Greek theater were carried ver. For example, the chorus plays an intricate part in the movement of the play. The male chorus adds ome timely slapstick, led by David Smart as a drunk. The female chorus is equally good. The old women eemed to a cross between Gilda Radner's Miss atilla and Joan Rivers. Joy Keener was outstanding is an aggressive old lady.

In ancient Greece the female characters were

Theatre's newest production. This bawdy comedy centers on the effort of women using celibacy as a tool to stop war. The results are downright hilarious.

### Jazz genius puts out two-faced LP

Pat Metheny — string virtuoso, cosmic composer, composer, composer, controlled into one explaining the personality of one of the most electrifying figures in modern jazz today.

Metheny is no mere guitar craftsman, he originates jazz guitar.

Putting this man beside the musical muses, though justified, is much too hard for any one man to live up to. Once you' have been declared a genius, as Metheny has been many times, the pressure can build up, as shown on his latest release, As Falls Wichita, So Wichita Falls, on ECM Records.

This duo album — with a small amount of participa-

tion by Nana Vasconcilos on percussion — recorded with keyboardist Lyle Mays takes Metheny's improvisions to the extreme. Even the energy that Metheny entices into the depths of guitar exploration cannot make this journey.

The collaboration between Metheny and Mays seems to clash not collaborate. The planning that must have been put into composition did not carry into the studio for half of this album.

Good jazz relies on a degree of spontaneous improvision among the musicians especially in a duet.

Good pazz reites on a degree of spontaneous im-provision among the musi-cians especially in a duet. Half of this album is frivolous and disoriented, though not in an extreme sense. Side two bails the listener out of Metheny's ex-perimental audiospace.

Side one is a 20 minute ti-tle track living up in

every way to the rambling, exploring nature of its creator. It's a musical world of crowd noises and bombs exploding leading into a song that finds Metheny's guitar presence virtually non-existent saving the space for Mays's layered keyboards which guide the listener in the same manner as a two hour psychology lecture.

After reaching for a bottle.

as a two hour psychology lecture.

After reaching for a bottle of No-Doz the listener can flip the album to side two and, luckily, relief is in store. The first song "Ozark" is a frolicking footstomper that takes the listener back to the work on New Chataugua. The next two songs are reconfirmations of Metheny's genius.

"September Fifteenth" is a subtly evolving composition built upon layers of Metheny's chords to a chorus of Mays's keys. The

textured rhythms flow like a cool stream — smooth and exhilarating. Mays's synthezied melodies are as tender as can be produced by electronics.

"It's for You" is reminiscent of past Metheny recordings. His lucid hands glide over the frets pampering every note.

over the frets pampering every note.

Metheny's guitar wonderland extends into countless musical environments making him the one-of-a-kind jazz guitarist. While innovative, Mays has catching up to do if he is to reach the level of Metheny.

Side two of this album is some of the most innovative jazz released this fall. It is hoped that the mistakes learned from side one's fate will lead Metheny's invocations futher into musical space, but with better navigation.

# calls. In Lysistrata's playbill, there are a few director's notes. Normally these are frowned upon, but in this case, they are necessary. They explain the purpose for a Greek play at State, and mention that it the purpose of the play is not to shock or offend but merely to offer a part of our literary heritage. Finally, the graphic actions and language that are in the play are geared toward humor and should be taken innocently. Lysitrata is free to State students and future performances are scheduled Wednesday— Saturday. Hall and Oates' new album

Erdahl-Cloyd Theatre

The Spy Who Came in from the Cold

many new albums. One that can be overlooked is the new Daryl Hall and John Oates

just around the corner and is Private Eyes is con-evident in the release of sidered new in the fact that

it has just been released, but there is nothing new about the music. Hall and Oates seem to be caught in a time warp dating back to 1975 and 1976 when their singles "Sara Smile" and "Rich Girl" STATES SHIVER SCREEN made everyone stand up and take notice of their clean

pop sound.

What has happened since then? - absolutely nothing, which is the reason Private Eyes is so BORING! They by Karl Sams Entertainment Writer

Eyes is so BORING: They have refused to become in-novative and have held on to that upbeat, popish style in the "Rich Girl" tradition. Musicians that remain in a sterile mode tend to lose Monday. 8 p.m. Admission: Free sterile mode tend to lose that once captivating sound. In the case of Hall and Oates repetition is the name of the game. Despite this repetitiveness in style, Hall and Oates proceed to sell albums, evident by last John LeCarre's novel of cold-war espionage is brought to the screen by Martin Ritt (Norma Rae). Richard Burton stars as an aging agent who isn't really what he seems. The film, which lacks the typical Hollywood spy cliches, is an excellent portrayal of an embittered spy nearing the end of his career.

same old thing year's gold-certified album Voices and their number-one hit off that album, "Kiss on My List."

Ironies in taste

It is ironic that as adolescents, Hall and Oates preferred obscure local music to top 10 tunes and yet they have become a pop vehicle.

Utilizing the same backup band from the Voices album, Hall and Oates' Private Eyes is the second album that they have produced themselves. Most of the songs on the album sound very much like Hall and Oates' earlier compositions. Visions of "Rich Girl" come to mind on the songs "Private Eyes" and "Unguarded Minute."

These cuts are very

predictable from the start and ramble on through their ceremoniously guarded style. The tempo and in-strumental style of the songs have not changed since the early days. The vocal style and rhythm also take on the form of Hall and Oates "Rich Girl" period.

Hall and Oates defend their repetitive style through "Unguarded Minute" by suggestings." I could have changed/I could have changed/I could be anything that ya want/But it wouldn't be me."

To avoid change and rely on the past for insight is terribly dry.

Weighing the good points with the bad ones, Private Eyes is an effort which Hall and Oates could have kept to
