## UNCSAG decides to add student members to board of governors

by Karen Freitas  
News Editor

The University of North Carolina Association of Student Governments met Saturday at Chapel Hill for its monthly meeting and discussed the possibility of placing a student member on the University of North Carolina system board of governors. A committee will be assembled consisting of board members and various representatives of the 16 institutions. The committee will first meet in

March of this year and will consist of five or six members including State's Student Senate President Jim Yocum. The UNCSAG has been exploring the possibility of placing a student member on the board for several years. "The creation of the investigative body is the first substantive progress that we have had on this issue," Yocum said. Scot Norberg, president of the association, met with administrators of the general administration of the

UNC system Friday to exchange information that both sides have uncovered. "No information has been released because we feel this is a matter the investigative body should review first," Yocum said. The UNCSAG finance committee discussed the payment of dues and changes in the finance committee rules. The black ad hoc committee discussed the improvements of retention programs for the minority students at

predominantly white and predominantly black constituent institutions of the UNC system. The association also reviewed a video tape of UNC admissions programs and offered criticism on the poor quality of some presentations. Yocum made the motion that the black ad hoc committee become a permanent standing committee of UNCSAG with perhaps a name change. It was also suggested that an ad hoc committee be formed to study the consent decree. This motion was referred

to the rules committee for further study. The rules committee met in full session to constitute the Housecleaning Amendment which was a clarification of duties and not major changes. Curtis Massey, chairman of the rules committee, was congratulated by Norberg for a terrific job on the constitutional changes. "Although I feel that this constitution is basically a sound one, I have to thank Curtis for his efforts in examining the constitu-

tion closely so that it will become even stronger," Norberg said. The programs and policy committee reviewed group events that had taken place nationally and on a state government level. "We also discussed postponed factors on raising the drinking age. Pending further study by a legislative research committee, this discussion was tabled," Yocum, chairman of the legislative research committee, said.

## Student Senate passes critical new proposals

by Eiman Khalil  
Staff Writer

The Student Senate met Wednesday and passed several proposals which are of crucial interest to students.

The most crucial bill passed was to continue the vandalism deterrent program. This program, previously in the hands of the student-body treasurer, has now been given to the Inter-Residence Council which will assume the duty of issuing all checks remaining in the office of the student-body treasurer.

"I feel it is an effective program. In it, awards have been handed out for reports of vandalism leading to the arrest in the reported act," Student Senate President Jim Yocum said. "IRC had little to do with the program... Now IRC should maintain the program."

In addition, the Student Senate changed the dates for election of Student Senate president, Student Senate treasurer, board of directors and student-body president. Previously, the election dates were from Monday, March 1 when books open to Fri-

day, March 5 when books close. Now books open Thursday, Feb. 26 and close Thursday, March 4.

The Senate also considered "traditional" business including committee reports, which deal with a wide range of issues, budget reports and officer reports.

Yocum announced a new policy designed to eliminate excessive verbiage in speech making. In this policy, each speaker will have 30 seconds to speak. At the end of 25 seconds, the timekeeper will raise his hand, and if another Senate member is willing to

yield his speaking then, he will raise his hand in the final five seconds of the current speaker's time. If not, the present speaker will be forced to yield the floor.

"Up to this point, senators only had the opportunity to speak when debating a bill or a resolution," Yocum said.

"Now, they have the opportunity to voice opinions on any topic they wish. I feel that this is the first step in my goal to make Student Government more directly responsive to the people."

## UNC system committed to raise enrollment by 1987

by Sam Hays

The percentage of black students attending the 11 predominantly white institutions of the 16 schools of the University of North Carolina system rose from 7.4 percent in the fall semester of 1980 to 7.53 percent in the fall of 1981.

The percentage figures were obtained from the annual report submitted by the UNC system to the U.S. District Court in Raleigh in the desegregation lawsuit between North Carolina and the federal government.

The percentage of white students attending the five predominantly black institutions of the UNC system rose from 10.88 percent to 11.78 percent during the same period, as stated in the report to the court.

The percentage of black students enrolled at State rose from 6.4 to 6.8 percent between the fall of 1980 and fall of 1981, according to figures gathered by the UNC-system presidents' office.

"State's enrollment figures for the 1982 spring semester will not be available until after registration is closed and the enrollment withdrawal date is past," an official of Student Affairs said.

The consent decree that ended in

the federal district court in Raleigh requires that the UNC system file an annual report with the court showing the percentages of enrollment of blacks in predominantly white schools and whites in predominantly black schools in the UNC system.

The UNC system made a commitment in the consent decree to increase racial integration at all of its 16 cam-

The UNC system is required to recruit blacks to attend predominantly white schools and to recruit whites to attend predominantly black schools under the decree.

The UNC system is also required to provide operation and maintenance funds to each predominantly black institution in an amount at least equal to money provided for the predominant-

rose from 21,741 in the fall of 1980 to 21,980 in the fall of 1981. White enrollment rose from 91,882 in 1980 to 92,509 in 1981. Other enrollment rose from 4,026 to 4,416 in the same period.

The percentage of black students enrolled in six predominantly white institutions for the 1981 fall registration dropped, according to the report. These campuses were: East Carolina, N.C. School of the Arts, Asheville, Charlotte, Greensboro and Wilmington.

The consent decree was signed July 17, 1981, and the programs designed to increase minority presence in the system were not completed by fall enrollment time.

The annual report had 38 appendices to show the action the UNC-system general administrations and the various institutions had completed to comply with the consent decree. These actions included:

- Workshops held to make school administrators and counselors aware of the methods available to their institutions to increase minority presence in their schools.

- The appropriations in the current budget intended in the UNC system.

- Implementing promises made by the UNC system to place new degree programs in the predominantly black institutions.

## News Analysis

uses and to further develop its five historically black institutions. The UNC system is required to make a good and faithful effort to increase minority presence, enrollment and employment in the UNC system.

By Dec. 31, 1987, the UNC system is committed to increase black enrollment at predominantly white institutions to 10.6 percent and to increase white enrollment at predominantly black institutions to 15 percent.

The federal court decided to keep the case open until Dec. 31, 1988, and the UNC system is committed to filing annual reports on its compliance efforts through the 1986-87 academic year.

ly white institutions offering the same type of instruction. The amounts are measured on the average salary for each full-time equivalent student.

The UNC system goals of expected annual gain of "minority presence" enrollment in the UNC system set forth in the decree are .53 percent for blacks in predominantly white institutions and .63 percent for whites in predominantly black institutions.

Minority-presence enrollment is defined in the decree as whites in a predominantly black school and blacks in a predominantly white school.

The UNC-system black enrollment

Residence Life will soon be installing 15 computer terminals in Tucker Dormitory for student convenience.

## Residence Life to install 15 computers in Tucker Dorm

by Karen Freitas  
News Editor

Convenience is on the way for central campus students in need of computer terminals. Residence Life is presently making plans to install 15 terminals in Tucker Dormitory this semester.

"We are now trying to decide where to locate the terminals," Charles Haywood, associate dean of Student Affairs, said.

The terminals are being provided by Administrative Computer Services. Residence Life will be required to pay extraneous costs such as installation costs, phone bills and electric bills. The expenditure will be approximately \$25,000 from Student Affairs.

Student Affairs will provide space, furniture and renovations necessary to establish a 15-terminal cluster. The space must include a secure area for

the communications equipment. A small bulletin board for notices will also be available.

The telephone and electrical lines for the terminals have already been ordered and should be installed by the end of this month. The conduit will be installed from the telephone room to the communications area before the line can be installed.

The terminals will be available to all students in need of the facilities. There will also be no charge other than being a student enrolled at State.

The operation hours will depend on the normal operating hours at the headquarters at ACS. The facilities will be available approximately 16 hours a day, according to Haywood.

"One reason all 15 computer terminals will not be separated across campus is to cut expenses and to make things more convenient," Eli D. Panee Jr., director of Residence Facilities, said.

## Residence hall conference to be held at State in March

by Gina Blackwood  
Assistant News Editor

The North Carolina Association of Residence Halls state conference will be held at State March 12-14.

"The NCARH is dedicated to bettering life on campus," Chad Hefner, president of the Inter-Residence Council, said. "It is an association across the state for interaction, programming ideas and help with problems."

"The state association has a conference every spring and this year we are hosting the conference. We are hoping to have 150 to 200 students from across the state come in."

The students attending the meeting

will be staying at the Mission Valley Inn. They will arrive on Friday, March 12, and take part in special sessions and business meetings throughout the weekend.

Hefner is the N.C. chairman for the conference. He is also responsible for the business part of the conference and for doing some recruiting across the state.

"We have had some trouble lately because the state association started four years ago with the first conference here at State. We started out with 12 member schools, and now it has fallen off to only four, with UNC-Chapel Hill, UNC-Charlotte, Western Carolina and State as the four active members," he said.

Bill Peery and Skeet Gray, members of State's IRC, are the conference chairmen. They are responsible for the conference itself.

"We are hoping for 250 students total with at least 50 from State," Peery said.

The NCARH became recognized in October by the State Housing Officers' Association as an official student organization.

"Being recognized gave us more credibility and it adds a little prestige," Hefner said. "It lets people know that we represent something."

The purpose of the state association is to design and facilitate programs, communication and information of services that help promote public interest in social welfare of residence hall students across the state, according to the NCARH constitution.

"Our state association has given us a lot of things other states do not have," Hefner said.

## Federal communications modify depreciation rates

WASHINGTON (UPI) - The Federal Communications Commission Thursday modified the depreciation rates for American Telephone & Telegraph Co.'s long-distance operations and 35 domestic telephone companies in a move that will add \$1 billion to the base rate for consumers.

The changes affect AT&T's Long Lines department plant; 24 Bell System affiliates; eight General Telephone and Electronics affiliates; two Continental Telephone Co. affiliates and United Inter-Mountain Telephone Co.

The 1984 Communications Act requires that the FCC prescribe classes of property for which depreciation charges may be included in operating expenses, and the percentages of depreciation to be charged to each class.

Although the commission has generally reviewed depreciation rates

of approximately one-third of the larger carriers each year, this year all the carriers filed for revisions in rates for several types of accounts.

This was because of various changes in FCC rules and in the terminal equipment markets, such as telephone receivers.

The FCC changed its rules to allow use of the remaining-life method for calculating depreciation rates rather than the previously used whole-life method.

The rates being proposed will result in an increase of approximately \$1 billion in annual depreciation expense, the FCC said.

That consists of revisions in the equipment life and salvage estimates (an increase of \$435 million), the implementation of the remaining life depreciation rates (an increase of \$865 million), and revisions of rules for accounting for station connections (a decrease of \$285 million).

# To ratify the Equal Rights Amendment — or not to ratify ERA...

## Equal Rights Amendment does not outlaw traditional roles

Another excerpt from "What America Really Desires" by Thomas Paul DeWitt was printed in the Jan. 13 Technician ("Equal but not the same: Passage of Equal Rights Amendment would defy middle-class rights central to American way of life").

It made interesting reading — a conservative using confused logic to challenge an

accordingly." The opposition should rest easy. There should be enough housewives left around to fill every chauvinist's kitchen. If not, there's always maid service.

DeWitt, along with other anti-feminists, has taken his idea of a female, compared it to his idea of a feminist, and come up with the conclusion that feminists want to "erase distinctions of gender." He defines "feminine" as quiet, deferential, unambitious, dependent and unaggressive, and "feminist" as loud, demanding, ambitious, independent and pushy. It follows, then, that if feminists are feminine, they must want to be treated as men, right?

Wrong. It is hard for men to understand that women could want to be treated as human beings, without regard to sex, and not want to be treated as men. Joanna Russ explains this simple concept to men in *I Am Not an Honorary Male*: "You must understand that someone can be human like you and

## Amendment can never change society

It is time someone came to the rescue of staff columnist Thomas DeWitt, who, against the Equal Rights Amendment. This amendment should never have been proposed and I am glad its death is now so near. No silly worded amendment will ever change the attitudes and beliefs of a free nation. Only through social change can the goal of equality for women be achieved. The problem, then, obviously lies within the ERA ranks.

If these ardent feminists supporting ERA spent

time. This alone will do much more for women than the ERA could ever do.

Also, for women to gain equality in society, they must stop using a double standard, a common technique used by black leaders. It seems that a black can put down a white man, but when a white man even hints at speaking against a black, he is labeled a bigot. If women want the advantages of being a white male, they must accept the disadvantages, such as dying in combat.

Terri Thornton

### Guest Opinion

issue he doesn't understand. He claims to know all about "the femaleness of females" and the intent of the ERA. All he really knows, however, is his idea of what is female and that if the ERA passes, he may have to work for one some day.

DeWitt is afraid the amendment will "subvert the natural order" and "erase distinctions of gender," but at the same time he is sure that its ratification "cannot alter reality." The only explanation I can find for this contradiction is that DeWitt emotionally objects to the amendment and therefore cannot rationally explain his objection. The ERA, you see, seems to threaten an insecure male's masculinity.

The amendment wasn't designed to threaten anything, however, except for sexist attitudes and low pay. Nowhere in the amendment does it say "women desiring traditional roles shall be tried and punished

**The ERA seems to threaten an insecure male's masculinity. The amendment wasn't designed to threaten anything, however, except for sexist attitudes and low pay.**

competent like you but come out of, and live in, an entirely different environment."

Although pregnancy is, as DeWitt informed us, strictly a female event, it need not be a

problem to working women. Pregnancy is disconcerting to feminists only because few employers are willing to grant pregnancy leave as an equalizer. DeWitt's objection to pregnancy leave is that it is unfair to men, but in what way is correcting an injustice to women an injustice to men?

Suppose for a moment that the ability to bear children, "the single strongest argument against the amendment," suddenly was given to men. Would that ability cause men to be thought of as unequal or kept out of the work force? I think not. Pregnancy would undoubtedly become an important, macho, masculine event. Men would brag to each other about how long and hard their labor was. Congress would allocate money to fund hospital expenses for all men. Pregnant men would compare to see who's bigger — "I'm bigger than that, man, are you kidding?" Men would be granted leave with pay and given raises when they returned because they "are doing the most important job of all that God granted only to men" (adapted from *If Men Could Menstruate* by Gloria Steinem).

Contrary to conservative belief, feminists are neither socialists nor communists. They are humanists. They are not out to destroy America. They are out to destroy an attitude which is impeding their advancement in society, self-respect and peace of mind.

All quoted passages taken from Gloria Kaufman and Mary Kay Blakely's *Pulling Our Own Strings*.

## forum

one-tenth the time and effort on obtaining equality for women socially instead of parading for a ridiculous amendment. All women would be better off. For an example, I would have much greater respect for women if they would stop being deliberately exploited.

If one acts as an object, one will be treated as one. The "good" people of this nation should band together and enact laws to outlaw all forms of pornography and impose harsh penalties on all pro-

Equality for women can only come through social change. As society exists today, if Tom picks 40 apples and Jane picks 40, Tom should be paid more for his work. Neither Tom nor Jane are on this planet to pick apples and therefore the amount each should earn should be directly related to the amount of financial responsibility placed upon each person. Since society regards Tom as the wage earner, he should be paid more. The idea is simple and accurate.

Harold B. Muma  
SR NE

## Ratification entails affirmative action

For the record, let us acknowledge that discrimination has plagued this nation for hundreds of years. Over those years, we have attempted to prevent such injustices by the implementation of constitutional amendments and certain acts, such as the Civil Rights Act of 1964 and the Voting Rights Act of 1965, all of which I enthusiastically support. But over the past few years, another "act" has been implemented that contradicts all others: affirmative action.

discrimination has now become the instrument of discrimination. This is why I cannot support the Equal Rights Amendment.

Simply stated, affirmative action is the process of giving job preferences, public and private, to minorities and women. Anyone who has any understanding of the situation can see that this is discrimination because people are being hired because of the color of their skin and their sex and not because of merit.

What was designed to be the tool against

If ERA is ratified, I'm afraid that will mean more affirmative action. It won't be long before women, like minorities, will demand that they be given jobs because of the simple fact of their sex.

While I firmly believe in equal opportunity and will admit that women have been treated unfairly in employment, I have an even stronger conviction that two wrongs don't make a right. Maybe someday, and I hope soon, people will be hired according to their ability and not because of race or sex. Then and only then will I support such an amendment.

## Unwilling to take blame

# Presidential rhetoric

President Ronald Reagan is either confused on the issue of unemployment or has just plain lied about the facts. At a recent press conference he incorrectly stated that 1 million more people are working now than when he took office. Actually there are one-half million fewer people working now than when Reagan took office.

At this press conference Reagan also insinuated that the unemployment rate had started to rise before he took office. In fact, according to Reagan's own Department of Labor, the unemployment rate did not start to rise until six months after Reagan took office.

Reagan tried to blame the unemployment problem on the policies of former President Jimmy Carter. This suggestion hardly seems plausible since unemployment didn't start to rise until after the Reagan programs had started to take effect.

When asked about inflation by a member of the press, Reagan correctly answered that the inflation rate has slowed. Reagan didn't give Carter any credit for this development; he accepted full responsibility for it. Reagan must learn that the president is not allowed to choose the economic news for which he will take credit. He is responsible for all economic developments — good as well as bad.

Clearly the news on the inflation front has been good, but unemployment is a different question. Currently unemployment is approaching 10 percent. That means that millions of Americans are out of work and do not have a steady income. Try as Reagan might, no amount of presidential rhetoric will allow him to deny this fact.

Unemployment is not the only problem that is annoying Reagan these days. Budget deficits are at record levels. The simplest solution is to raise revenues. In the wake of the massive tax cuts that were just approved for those people in the upper tax brackets — i.e. the rich — any talk of increasing taxes doesn't go over well with Reagan.

Instead of calling for a tax increase, Reagan is probably going to call for some type of "revenue enhancement." That will probably translate into an excise-tax increase on liquor, gasoline and cigarettes — a regressive tax that will be borne mostly by those who are least able to afford it. Although Reagan hasn't called for tax increases yet, he is expected to do so in his State of the Union address Tuesday night. Clearly he must do something if the budget deficit is to be checked. The president is finally realizing that the question of how to cut taxes, raise military spending and balance the budget is a difficult one that may not have an answer. Reagan has not yet called for a tax increase, but when and if he does it will signify that he has lost faith in his supply-side economic program. If he does not, interest rates will probably rise even higher and more people will be out of work.

The nation demands an improved economic situation. If Reagan concedes that his economic programs have failed, the 1982 elections might be a Waterloo for the Republicans — perhaps just as well for the sake of the nation.

## Students using 'spoonfeeding' textbooks

LOS ANGELES — On a recent visit to the University of California campus here we found an academic acquaintance overwrought about textbooks.

"Have you seen the text I'm teaching with this quarter?" asked our friend, a professor of government. "It's been so simplified that it might as well be called 'Dick and Jane Meet Uncle Sam.' We're spoon-feeding these kids too much."

We listened to the professor rage on about declining test scores and the wayward habits of "today's students" and then hustled to the campus bookstore to document his assertions.

On first inspection, his complaints appeared right on. Introductory government texts read like foreigners' guides to the U.S. capital: they emphasized graphics and seldom ventured into prose worthy of college-level work. "New" words and concepts were usually highlighted.

Yet, counters David Amerman, former chief of the collegiate-text division at Prentice-Hall, "Our college textbooks for freshmen and sophomores are better teaching texts than those produced 10 years ago. Sure, they may look like high-school textbooks with all their visuals. But we're having to educate students in a different way."

It's dead, of course, to see colleges sink to remedial education with high-school graduates, many of whom lack even basic strength in reading and writing. Faculties and textbook publishers are hostage to this reality.

But the critical issue is less the "spoon-feeding" itself than its effect. As long as undergraduates are digesting sufficiently sophisticated concepts as a result of this

simplified textbook style, professors have only themselves to blame for not capitalizing on their advantage.

Besides, who says one needs a 4.0 college grade-point average to get ahead in this country?

America's top three foreign policy managers can't be characterized as intellectual

the last 10 years. But it's unclear how Americans under 35 have brought the figure down.

Whatever the explanation, the inexperience of younger workers is not to blame, according to "Zero Sum" economist Lester Thurow.

"The baby boom and rising female labor-force participation have had a larger influence on productivity, but not through inexperience," Thurow said in recent testimony before the House Budget Committee Task Force on Economic Policy and Productivity. "Their inexperience was counterbalanced by the fact that these workers... were much better educated than older workers."

"... To accelerate the growth of (productivity in recent years) would have required Americans to invest a much larger fraction of their GNP (Gross National Product) in plant and equipment. There is less equipment per worker (today) not because Americans invest less, but because there are many more Americans in the labor force."

Maxwell Glen Cody Shearer

### Here and Now

heavyweights. President Ronald Reagan rarely earned better than a C average at Eureka College in Illinois. Secretary of State Alexander Haig finished in the bottom third of his class at West Point. And Judge William P. Clark, the president's newly-appointed national security adviser, never graduated from college or law school.

In 1981 Reagan made six trips home to California. At approximately \$50,000 per round trip, that would make his California travel bill last year at least \$300,000.

America's baby-boom generation may be to blame for the decline in U.S. productivity over

### letters-to-editor policy

The Technician welcomes "forum" letters. They are likely to be printed if they:

- deal with significant issues, breaking news or public interest.
- are typed or printed legibly and double-spaced.
- are limited to 350 words, and
- are signed with writer's address, phone number and, if writer is a student, his classification and curriculum.

The Technician reserves the right not to publish any letter which does not comply with the above rules or which is deemed inappropriate for printing by the editor in chief.

Letters are subject to editing for style, brevity and taste. In no case will the writer be informed beforehand that his letter has been edited for printing.

The Technician will withhold an author's name only if failure to do so would result in a clear and present danger to the writer. Rare exceptions to this policy will be made at the discretion of the editor in chief.

All letters submitted become the property of the Technician and will not be returned to the author. Letters should be brought by Student Center suite 3120 or mailed to Technician, Letters to the Editor, P.O. Box 5698 College St. Station, Raleigh, N.C. 27605-5698.

# forum continued

## Schools should teach both creationism, evolution

Your Jan. 11 editorial titled "Evolution . . . 1 Creationism . . . 0" reflects many misconceptions concerning the creation-evolution controversy. Creationism is at least as scientific and as non-religious as evolution.

From the religious standpoint, you state that "creationism is one belief of a particular religion — that of Humanism. The Humanist Manifesto clearly states that "man . . . has emerged as the result of a continuous process" of evolution.

Your statement that "it is inherently wrong . . . to teach the principles of one religion as fact" is precisely the reason for adoption of the law. At present, the principles of one religion are being taught as fact — the principles of evolution as espoused by the Humanist Manifesto. The creation-science law, on the other hand, would have provided for recognition of the two major theories of origins as valid alternatives, neither being fact.

You obviously attempted to refute these arguments by stating that "the theory of evolution is widely recognized in the scientific community" thus shouldn't be considered a religion. This brings us to the scientific validity of the two models.

Evolution is recognized by many scientists and can be used to explain many observable phenomena. Creationism, however, is also recognized by thousands of scientists and it can also be used to explain many observable phenomena.

In recent scientific debates between prominent evolutionists and prominent creationists, the evolutionists have conceded victory to the creationists. Many evolutionists recognize creationism as a viable theory even though they do not accept it themselves, and public opinion polls have shown that as many as 85 percent of the people favor teaching creation as well as evolution.

Therefore the creation-science law proposed in Arkansas was not "an attempt to declare . . . that one religion's version of creation is more correct than another's." It was, on the contrary, an attempt by the legislature to reflect the views of the people of their state and to rectify the present practice of presenting the Humanist version of creation as more correct than the Christian.

The law as it was stated would have presented both views, allowing students the freedom to decide for themselves, on the basis of the evidence, which version to accept. If this nation is to remain a free nation, we cannot program thoughts into student's minds; we must present all sides of any argument.

## Author of anti-gay 'Joe Rat' cartoon owes apology to State's gay students

We, the undersigned, feel that Karl Zorowski — alias K. Zoro — owes an apology for his "Joe Rat" cartoon in the Jan. 11 Technician. This is the second anti-gay cartoon by Mr. Zorowski in the Technician in the past six months.

We wonder if Mr. Zorowski would so readily draw anti-Semitic or "Uncle Remus" cartoons. The

*The time has finally come when the gay students of State are not going to allow and stand for such ridicule.*

time has finally come when the gay students of State are not going to allow and stand for such ridicule. We believe that an apology is in order by Mr. Zorowski and the Technician for allowing the cartoon to be printed.

This apology should also be extended to UNC-Chapel Hill, The Carolina Gay Association, the NCSU Gay Educational Committee, The NCSU

Gay Community, and to the Rev. June Norris of St. John's Metropolitan Community Church, a member of the NCSU Campus Cooperative Ministry.

We hope that in the future the Technician will not allow cartoons to be printed that are offensive to the gay community anymore than it would allow offensive cartoons about any other minority group on our campus. Rivalry between institutions is a fine and healthy thing, but not at the expense of any minority group.

Chris Bransford  
SO EE  
Robert K. Hoy  
MR SOC  
Board of Directors  
NCSU Gay Educational Committee

Editor's note: Your point is well taken. We would like to extend apologies to anyone who was offended by our printing of the cartoon.

## Creation, evolution both unprovable

Once again, the Technician has taken a potentially intelligent editorial and destroyed it by introducing emotions and unclear definition of the subject. The Jan. 11 editorial concerning the evolution-creationism controversy ("Evolution . . . 1 — Creationism . . . 0") states quite correctly the need for a separation of religion and state. Without this separation, situations develop such as that existing in Iran. However, the definition of religion needs clarification.

Religion implies faith. It concerns belief in something which cannot be proved and is certainly outside of the scientist's jurisdiction. It does not imply intellectual suicide. Creationism does include a measure of faith and, although it does — contrary to your belief — contain a great deal of scientific evidence, science cannot determine its validity.

In the same way, evolution — evolution between species not evolution within a species — is beyond the reach of science to prove since, contrary to the scientific method, it is neither repeatable nor truly observable. In addition, it violates several scientific laws including the Second Law of Thermodynamics. Macroevolution is no more fact or science than is creationism and it also requires faith.

In all honesty, scientific creationism is truly a watered-down version of Genesis. I appreciate the fact that it is part of a religious doctrine, but since we are merely searching for the truth, creationism should not be discarded if it aids in that quest. There are intelligent scientists and valid evidence backing both theories.

I am not suggesting that creationism is correct or even better than is the evolution theory. The thought I wish to express is that although neither theory is or can be shown to be fact, both are intelligent. Although it is foolish to present high-school biology students with both theories and expect them to decide, it is important to have them realize that there is more than one intelligent idea.

## Get a new slant on math.

"The Texas Instruments new TI-40 and TI-55-II calculators have angled displays for easy-to-see-answers."

The slanted display makes these calculators easier to use at arm's length—and that's just the beginning. The economical TI-40, with built-in functions like trig, stat, logs, roots, reciprocals and more, will help you through math and science courses—especially since it comes with the informative book, *Understanding Calculator Math*.

The book explains how to use the TI-40 to work through, and understand, common problems.

If you're an advanced math or science major, you'll be

more interested in the TI-55-II, which comes with the *Calculator Decision-Making Sourcebook*. The TI-55-II features 56-step programmability, multiple memories, scientific and statistical operations, conversion factors and much more—a total of 112 functions.

An extremely powerful calculator, at an excellent price. Both calculators have LCD displays, long battery life and fit right in your pocket.

TI-40 and TI-55-II calculators. Two new slants on math from Texas Instruments.

Look for them wherever calculators are sold.

## Here's to Great Innovators... and a dedicated team you'll really like.

Tom Monaghan, President of Domino's Pizza, hands an employee the hot pizzas he will be delivering in a new DeLorean automobile. The use of the new car illustrates Domino's pledge to deliver hot pizza to its customers in less than 30 minutes.

In the competitive world of inventions and innovations, only a handful of men and women find success in coming up with a new, marketable product that gains immediate acceptance with potential consumers.

Those who succeed find out what the market wants—and they proceed to supply it in marketable terms.

John Z. DeLorean of DeLorean Motor Company marketed the world's first stainless steel automobile, a truly unique driving machine guaranteed to go rust-free for 20 years.

And under the direction of president Tom Monaghan, Domino's Pizza pioneered the use of the "hot box" that keeps pizza warm on deliveries. The company also was the first to use corrugated boxes to protect its pizza on its way to your door.

So now, Domino's and DeLorean team up to have your pizza delivered HOT to your door in less than 30 minutes. The DeLorean sports car will be delivering Domino's Pizza in Raleigh from January 29 through February 1, 1982.

## From mountains to coast — legends and ghosts

by Liz Blum

Assistant Features Editor

North Carolina has been blessed with many resources. Most are recognized nationwide: textiles, tobacco, furniture, and famous people such as Andrew Johnson, former president; James Taylor, folk singer; and Andy Griffith, actor and "former sheriff of Mayberry."

Another resource that North Carolina is drenched in is a little less well known. Our legends and ghosts extend from mountains to coast. No area seems to be exempt from a haunt or unsolved mystery.

The most famous of our mysteries is the Lost Colony. According to historians, a colony of 121 persons under the leadership of Gov. John White came to Roanoke Island to establish a permanent settlement in 1587. The colony thrived for awhile, setting up farms and permanent housing.

The first English child born in America was born to Eleanor and Ananias Dare and named Virginia after England's virgin queen, Elizabeth. The child was the granddaughter of White.

After Virginia Dare's birth, White returned to England for supplies. Due to England going to war with Spain, he was unable to return until 1590. He found a deserted colony and the word "Croatoan" carved on a tree. No trace has been found of the colony's whereabouts to this day.

The North Carolina coast was made for producing legend. Its rough shoreline and shallow inlets caused many a ship to flounder along the beach. The waters are haunted to this day by such vessels as the Carroll M. Deering who ran aground on the Diamond Shoals off Cape Hatteras in February 1921. The Coast Guard found it during the morning watch. There had been no storm the night before, no distress signals during the night and nothing had been seen by the last watch the night before.

Going to investigate, it noted that the lifeboats were gone and a ladder hung down the side. There was no sign of life and still no distress signal. Nor was there any response to calls from the Coast Guard.

Clambering on board, it found the reason for no answer to its calls. The ship was completely deserted. The only living thing on board was the ship's cat.

The steering apparatus had been smashed, most of the ship's papers were gone and the rudder swung free. But the bunks were neatly made, a meal cooked, the tables set and food left on the plates, not fully

consumed. Lights still burned in the salon.

Even though exhaustive investigations were conducted, no light was thrown on what could possibly have happened to the crew and captain. There was no sign of a struggle and there were no values listed as being in the ship's cargo, ruling out pirates. The crew simply disappeared. And still no clue exists as to what even might have happened.

Let's leave the coast for now and move into the Piedmont. Raleigh itself is rich in ghosts. A government office downtown is reported to have its own resident ghost that performs day and night — usually when someone is in the office alone. But more than one has heard the phenomena, leaving out vivid imaginations.

Another Raleigh ghost is found in one of the really old residences downtown. If you change portraits hanging in the house, a musical protest ensues, according to residents. The strains of eerie notes from obsolete stringed instruments issues through the rooms and halls.

The story goes that once a beautiful woman lived there, taught music and loved art. The portraits apparently hung there when she died, and have hung so since. Presumably any effort to change her efforts results in a direct musical objection from her.

Another residence in Raleigh has a ghost, apparently without any purpose. The house at 209 E. Morgan St. known as the Holman House at present and previously as the White Mansion, has its own resident ghost.

Unfortunately, no one can identify the person that this ghost used to be. The ghost sounds to be

peg-legged and sticks to the backstairs, according to residents.

The stairs are located in the original portion of the White Mansion. The stairway is concealed and the ghost bothers no one except those who might be disturbed by the ghostly footsteps that trod up and down, up and down.

There are speculations that the ghost is of a slave who once served the White family. The reasoning behind this is that he — the ghost is assumed to male since there were few peg-legged women during the days of the Whites — sticks respectfully to the backstairs and bothers no one in a fine antebellum tradition.

There is no mistaking that the ghost has a peg-leg for the hollow clack of a wooden pin alternates steps with that of a man's shoe.

Ghostly figures appear in the strangest places — one never knows whom or what you might meet around the next corner.

Staff photo by Clayton Brinkley

The Holman House stands to this date after 150 years, every wooden peg and handwrought nail firmly in place. And just as firmly, the ghost continues his nocturnal walks.

Working our way towards the mountains, another famous ghost comes to mind. The Little Red Man of Winston-Salem has been brought to a halt by an over zealous preacher who exorcised him. But his memory still remains among Salem minds who still use his name in swearing an oath or fealty, saying something like, "... and may the Little Red Man get me if I don't!"

The Little Red Man was once Andrew Kremser, a single brother in the Moravian settlement of Salem. He lived in the Brothers House, a residence for single men.

He was killed while digging out a sub-basement when the overhang of dirt collapsed and he was unable to escape. At the time of his death, he was wearing a red jacket.

Since his death, brothers reported hearing unusual sounds at night such as the tapping of a hammer or light steps hurrying through the halls. Occasionally, one would catch a glimpse of a little man in red slipping through a passage.

Even with the passing years and changes in the house, the ghost was still active. During the period of time when the house was used for widows, a child reported to her grandmother that she had seen a little man in red and he beckoned to her as another child calls one to come and play.

Other ladies in the house reported seeing him. But these were met with understanding smiles until one day a substantial member of the Salem community and a visitor saw the Little Red Man in the deep cellar of the house.

It was after this that the visiting preacher laid the Little Red Man's soul to rest and halted his activities forever. The Moravians are still unsure whether the preacher did them a favor or disservice for they all miss the ghostly activities of a former brother.

The legends and ghosts of North Carolina have been handed down from grandfather to grandson, mother to daughter, and storytellers to writers who have recorded them in books and short stories for today's generation benefit.

There are those who have actually experienced the phenomena and those who heard from those before them. But it is a resource that will go on and on until the day when there are no more children who lean on their father's or grandfather's knee begging to hear the story of the Lost Colony, the Little Red Man or the ghost ship mysteries of the Outer Banks.

And not only is it a resource of former occurrences but there are new ghosts, legends and mysteries being formed everyday in spite of the attempts by scientists and disbelievers in that "supernatural nonsense" to disprove the fact. The fact is that there are occurrences that can only be explained by saying a "ghost did it."

#### Speedy Pack streaks past Pirates, 63-53

by William Terry Kelley  
Sports Editor

If the Wolfpack round-ballers seemed to be zipping up and down the court a little faster Saturday night, maybe it's because they were.

The Pack has found a sort of happy median between offenses and used it to pound East Carolina 63-53 in Reynolds Coliseum before a crowd of 11,000.

The Pack, which entertains Georgia Tech Tuesday in a 7 p.m. game in Reynolds Coliseum, had been using a half-court offense all season but added a touch of a running offense to the game to come up with a new tempo, one which will entail using more players due to more action.

"Last year, we ran like crazy, but had no half-court game," State head basketball coach Jim Valvano said. "This year we've played a half-court and had no up-tempo game. We tried to push the ball upcourt tonight, and did a pretty good job. We've got to find a balance."

The Pack ran but they did not exactly run away with the game at first. State took its biggest leads in spurts as they darted out to a 14-6 lead only to see the Pirates come back to within two at several points in the first half. State was able to extend the lead to as much as 10 before settling for a 39-32 halftime score.

The game was clouded, however, by a dislocated finger on the hand of Sidney

Staff photo by Clayton Brinkley  
State reserve point guard Max Perry unleashes a rare shot.

will have to use more players. Some of the players were winded quickly in Saturday's game because of being used to the slower tempo.

"We haven't been used to it so we got a little tired," State guard Derek Whittenburg said. "We win when we run. We can get some more easier baskets now."

Valvano had room for celebration after the game. A year ago the Pack won 14 games and lost 13 and to date the Pack has already won its 14th while losing only three. East Carolina dropped to 6-9 in the season.

"I'm going to celebrate now," Valvano said. "Last year we won 14 games. We've already tied last year's win total both in the league and out of the league. Break out the Asti Spumanti."

The Pirates shot their way back into the game in the second half once again but the Pack hit most of its foul shots down the stretch to win the game.

"Our players followed the game plan as close as they could," East Carolina head coach Dave Odom said. "We were able to find some holes in State's zone, and I think we did a good job defensively. They only got 15 shots off their half-court offense, but they got nine off the break in the first half. Anytime you do that, you're in good shape."

As Valvano went to the bench to rest some of his starters, freshman Dinky Proctor was one of the first

called in and saw considerable time.

"I think he's trying to see where I'm most effective at," the versatile Proctor said. "I feel like he's using me where I'm needed."

The Pack finally pulled ahead by as much as 14 late in the game and the Pirates chose to uselessly foul even in the final seconds. The East Carolina shooting trailed off toward the end and the Pack clung to the win.

After a couple of early leads that the Pack was not able to hold onto, State has chosen this new style of running.

"We've been a little tentative lately," State senior Scott Parzych said. "We've been getting a 10- or 11-point lead and passing it around a little, but not going to the hoop the way we used to."

State gets a date with the ACC's doormat Tuesday night. The time of the game has been changed from 8 p.m. to 7 p.m. since the game is on television and it would conflict with President Reagan's State-of-the-Union message at 9 p.m.

Although Georgia Tech is still on bottom of the conference the Yellow Jackets doormat no longer says welcome to anxious ACC foes.

Tech is only 1-6 in the conference and 5-10 overall but the Jacket's only victory was a league opening win on the road at Maryland. In the pair's first meeting in Atlanta, State held on for a 55-49 win.

# Grapplers zap Monarchs

by Bray Teot  
Sports Writer

Thursday night State's wrestling team lifted its overall record to 3-1 — it now stands at 4-1 as State defeated Maryland Sunday, 31-8 — with an impressive victory over Old Dominion. In a match in which the Pack never trailed, State defeated Old Dominion by a score of 32-8. The loss dropped Old Dominion to 2-3.

The match began with State's 118-pound Chris Henry wrestling Jeff Ryan. Henry trailed most of the match, but in the last 25 seconds he pulled even with Ryan to force the match to a draw.

Chris Wentz showed why he is an All-America with his victory over Old Dominion's Wayne Martin. Wentz steadily increased his lead throughout a match in which he never trailed. Wentz scored a superior decision over Martin with a score of 17-5. The victory increases his overall record to 7-1.

State's Vince Bynum scored a major decision over Frank Stillo. Bynum, a sophomore, defeated Stillo by 10 points. Throughout the match Bynum came close to pinning Stillo, but Stillo refused to be pinned. With his victory, he increased State's team score to 11-2.

In the 142-pound class

Staff photo by Jim Frei

Both wrestlers seek a takedown in a recent State-Iowa State match. The Wolfpack matmen stopped Old Dominion and Maryland in their last two matches.

Steve Koob shut out Ben Ward in their match. Koob won the match, 3-0, but Ward put up a fight all the way. The match was not decided until the final buzzer because it could have gone either way with one takedown.

The highlight of the match with the Monarchs came when State's Frank Castrignano pinned Carlos Mincheff at 6:09 into the match. It was Castrignano's

first pin and victory of the season.

Chris Mondragon increased State's team score to 23-2 with his victory in the 158-pound class. The sophomore grappler defeated Larry Corey by one point. The match ended in a draw but Mondragon was declared the victor because he had compiled over a minute of advantage time.

Old Dominion won the next two events to cut into State's lead. Brad Anderson defeated State's Craig Cox in the 167-pound class and Old Dominion's Greg Gritua won a close match over Greg Fatool.

Fatool was in the match all the way but he could never pull ahead. At the end of these two matches Old Dominion had pulled within 15 points of the Wolfpack.

In maybe the most unusual points in the match, Old Dominion forfeited the next match to the Pack in hopes that its heavyweight could compete against State's Jerry Rodriguez. After a few minutes State's John Connelly was declared the winner of the 190-pound class. With the forfeit State had been assured of its third victory of the year.

The Wolfpack's Rodriguez defeated Bill Sabo by a score of 4-0. Even though Sabo was a larger opponent, Rodriguez showed why he was considered the top wrestler of his weight class last year. Later in the match it was discovered that Old Dominion's coaches feared that Sabo might be injured if he wrestled State's regular heavy-weight wrestler, Tab Thacker.

## Time changed for Tech game

Ticket distribution for the State-Georgia Tech basketball game has been extended through today. Please note the time change in the game. Originally scheduled for 8 p.m., the game which will be seen locally on WPTF-TV Channel 28 at 7 p.m. to avoid conflict with President Ronald Reagan's State-of-the-Union address.

## Tankers return to action with Pirates, Hokies

by Pete Elmore  
Sports Writer

State's men's and women's swim teams will return to action tonight against East Carolina and Virginia Tech in a double-duel meet in Greenville.

The Wolfpack men will be looking to stay undefeated as they bring a perfect 5-0 record into the meet.

East Carolina and Virginia Tech will bring two very different programs into the meet. The Pirates have been struggling as of late and will have to swim one of their best meets of the year to be competitive. The Hokies, on the other hand, will provide a very good test to the Wolfpack as their times match up very well with State's.

"Virginia Tech will bring a solid, well-coached team into the meet," swimming coach Don Easterling said. "They match up very well down the middle of the lineup with us and the diving will be very close."

"ECU is not as strong as

Virginia Tech. Their weaknesses are our strengths. The main thing is we can't look ahead to Clemson (who meets State on Jan. 30)."

The Wolfpack women, sporting a 4-2 record, should also be favored.

Virginia Tech's women also have a strong team, which has just come off a couple of impressive wins over Virginia and West Virginia.

However, the Pirate women, don't appear to be as strong as either State or Virginia Tech. East Carolina is coming off a loss to Old Dominion, a team the Wolfpack handled very easily recently.

"Virginia Tech is for real," women's swimming coach Bob Wiencken said. "Their strength will be in the sprinting events and they should provide us with a good meet."

"ECU is not as strong as Virginia Tech. They are stronger in the shorter events, but the meet should come down to us and Virginia Tech."

Staff photo by Clayton Brinkley

Dr. John Reibel diagnosed State guard Sidney Lowe as having a chipped bone in his right hand Sunday but said "he's going to be able to play." Lowe injured the hand against ECU Saturday night.

## Pack women cagers knock off strong Cavaliers, continue road trip tonight with Virginia Tech

(continued from page 6)

After shooting an arctic-like 22 percent the first half, Virginia cut the margin to 41-39 in the second period. State then blitzed out to a 54-45 advantage, but the Cavs sliced the lead to 66-64 with 10 seconds remaining. Rouse, who sat out the Wolfpack's previous game

against Wake Forest due to back pains, then connected a free throw to end scoring as the Pack stopped Virginia for the ninth-straight time.

"The key to the game was our pressure defense," State women's head coach Kay Yow said in Sunday's *News and Observer*. "We had a hand in people's faces all night. Ronda (Falkena) came off the bench and did a super

job of intimidation, blocking six shots."

Angie Armstrong added 13 points to the Wolfpack effort, while Connie Rogers added nine. Cathy Grimes paced the losers with 17 points.

The Hokies, 10-7, don't appear to be as strong as the Pack, but should provide a strong test, nonetheless.

Freshman Robin Lee leads Virginia Tech with a 14.5-per-game scoring average. Junior forward Cathy Hanover hits at an 11.2 clip and center Tammy Edwards is shooting at a 10.1-average per game.

Duke, which lost to State, 70-68, earlier in the season, is the only common foe. The Hokies dropped a 71-58 decision to the Blue Devils.

# ENGINEERS, YOUR SHIP IS COMING IN.

It might be a nuclear sub or a billion dollar aircraft carrier. At the Norfolk Naval Shipyard, you can provide engineering support for the maintenance and testing of the most sophisticated technology in the world, with hands-on experience that will challenge your personal creativity, stimulate and enhance your engineering knowledge, and accord you a good measure of responsibility on important projects.

Our shipyard recruiter will be on campus on Jan. 26, 1982.

A General Information Meeting will be held on Jan. 25, 1982 7:00-8:00 PM in 321 Dabney. An Equal Opportunity Employer U.S. Citizenship required.

Located in the Tidewater, Virginia area, the shipyard is surrounded by a vast array of recreational and cultural activities. Just minutes away, the resort city of Virginia Beach hosts water activities of all types and descriptions. Also, the shipyard is just a short drive from the Blue Ridge Mountains with its spectacular fall foliage and numerous winter ski resorts.

**THE NUMBERS GAME**

Ever had the feeling you were always being assigned a number? Like when you stand in the registration line, wait at the deli, visit the bank machine, or try to get a parking sticker?

Well, at Domino's Pizza we're doing something about it. Instead of assigning you two Pepsi Colas with our 12" pizza or four Pepsi's with our 16" pizza, we want you to tell us exactly how many you need.

Then we'll rush them along in durable 16 oz. plastic cups with tightfitting lids—to perfectly compliment our hot, delicious pizza. The cup and lid are both dishwasher-safe and reusable in a variety of ways.

The cost? Only 15 cents a serving. That's a deal you can't beat anywhere. So get as many of the sturdy, reusable 16 oz. cups filled with Pepsi as you need.

At Domino's Pizza our business is pizza—not assignments.

We use only 100% real dairy cheese. Limited delivery area.

### 4 Free Cups Of Pepsi!

4 free cups of Pepsi with any size pizza. One coupon per pizza. Expires Jan. 31, 1982. Fast, Free Delivery.

# NEWS BRIEFS

(UPI) — Social Service officials in some eastern North Carolina counties say their employees are being blamed unfairly for errors in the federally funded food-stamp program.

Two weeks ago Human Resources Secretary Sarah Morrow reported that North Carolina's counties made millions of dollars in overpayments and payments to people who were ineligible. She said counties underpaid other clients by \$6 million. But Social Service directors from nine counties said the methods used to determine errors reflected unfairly on their workers.

CHAPEL HILL (UPI) — A new University of North Carolina study indicates that women who use birth control pills containing the hormone called progestin along with estrogen are only half as likely to develop cancer of the uterus lining. The study by five scientists at the school has been published in the current issue of the *Journal of the American Medical Association*.

(UPI) — Economic recession has caused more worker layoffs across North Carolina. In Rockingham county last week Fieldcrest Mills laid off 1,400 workers. The company said it might do the same to 1,300 more workers in the near future.

Meanwhile the Bendix Corporation has announced its Charlotte plant will close for nearly a month beginning tomorrow. That will put about 300 people out of work.

COLUMBIA, S.C. (UPI) — The Carolinas Brown Lung Association claims the Reagan administration is trying to sabotage the current standards on cotton dust. The Occupational Safety and Health Administration recently said it would review and possibly change the standards for cotton dust levels in textile mills.

Paul Cline, president of the Brown Lung Chapter in Greenville, S.C., said, "It's a dark day for the working people."

Brown Lung, or Byssinosis, is a disease caused when an agent in cotton dust clogs the lungs.

(UPI) — Friends of I. Beverly Lake Jr., who lost to Gov. Jim Hunt last year, have formed a committee to persuade the Republican Party members to run again in 1984. Lake and some Republican Party members said the former state senator is considering another bid for the governorship.

Lake said the committee was organized by Ira Schwartz, who was co-chairman of Lake's 1980 campaign in Forsyth county.

Mrs. Wolf brings a smile to this little girl's face with a personal autograph.
