## Watauga Hall faces renovation

#### Plan calls for transformation into graduate dorm

by Keith Transou Staff Writer

Staff Writer

Plans are being made to renovate
Watauga Hall into a dormitory for
graduate students.

The new residence hall will contain
144 beds.
One-third of the rooms in Watauga
Hall will be single, and the other two
thirds will be double rooms. The
rooms will be divided into suites, according to Edwin F. Harris, University architect and director of campus
Planning and Construction.

The dormitory will be equipped like
the new South Hall complex, with provisions for computer terminals and
cable television, and will also include
private telephones and air conditioning. Each suite will have access to a
galley kitchen. The kitchen will contain a disposal, electrical outlets for

Staff photo by Patrick Chapmar Watauga Hall, currently an office building, is to be converted into a graduate dorm under a proposal currently before campus planning and construction

small appliances, and ventilation. Cooking in the building will be permissible.

missible.

Vice Chancellor George Worsley and Vice Chancellor Banks Talley have not finalized the plans as of yet. As soon as they make a decision, advertisements will be made to accept bids from contractors. After a contractor is selected the project should

only take about one and a half years to complete.

The existing offices in Watauga Hall will be moved to other locations throughout campus. There will be an extra floor added in the attic space to accommodate the desired number of rooms. The existing shell will be used although the interior will be renovated.

## Library joins national organization

The D.H. Hill Library at State has become a member of the Center for Research Libraries. The membership gives State faculty and students access to more than 3 million volumes of specialized research materials.

I.T. Littleton, director of the library said, "Our membership in the Center for Research Libraries will serve to supplement and extend the resources available here and in other area research libraries. It will provide faculty and students at State access to resources for scholarly research which are difficult or impossible to obtain elsewhere."

The non-profit research library is located in Chicago.

Access to the collections is rapid and assured, Littleton said. Requests are made through the Interlibrary Center at the D.H. Hill Library, and the book or periodical is usually shipped the day the request is received.

Unlike the method with most interlibrary loans, the actual volume is sent, rather than a photocopy. Littleton explained that these works are so specialized that there are not usually competing requests for them. If a request deprivational article is not in the center's collection, the request is forwarded to the British Lending Library.

"From its inception in 1949, the

center has acquired materials not readily available in member libraries." Littleton said.

Its collections are strongest in older scientific, technical and engineering journals, monographs and reports, in the fields of literature, history, foreign languages, economics, political science, music, philosophy, religion, social sciences and anthropology.

A complete listing of subjects contained in the collections may be found in the Handbook of the Center for Research Libraries. Copies of this publication are available in the Reference Department and in the Interlibrary Center of the D.H. Hill Library.

## Geologist pioneers use of computers

by Marie Schnell'
Information Services

A State geologist is pioneering the use of microcomputers in geologic field work.

Michael Kimberley, associate professor of marine, earth and atmospheric sciences, said the use of microcomputers in the field could

greatly speed up the work of geologists.

At least one oil company hopes he is right. Exxon Corp. has granted the University \$17,000 for the purchase of microcomputers which Kimberley and his students will use in a geological field camp. State is matching the grant with \$11,000 worth of equipment and faculty support.

#### weather

Raleigh Forecast: Today: Mostly sunny and mild, high of 14°C (57°C). Scattered cloudiness tonight with a low of 1 to 2°C (30·35°F).

(Forecast provided by student meteorologists Craig Hillock, Tom Tasselmyer, Hank Ligon and Joel Cline.)

State's Mary Jane Wild takes it to the hoop over North Carolina's Tresa Brown. Brown dominated the first half with 16 points but State won 97-82.

Staff photo by Scott Montgomer

The field camp, conducted each summer for University geology students, takes them to New Mexico, where they get firsthand experience in identifying exposed rocks and learning how to form hypotheses based on mathematical deductions about rock formations in that area. This summer they will have a microcomputer to help them.

"The computer will be used to make geometric modeling predictions about the rock formations in a given area based on pattern analysis." Kimberley said.

based on pattern analysis," Kimberley asid.

Kimberley and his students will spend the winter and spring developing the computer programs they will need in their work. He plans to publish these programs, called software, so they will be available to other universities and resource industries. He is already the author of a basic textbook, titled "Geomicrocomputing," on the use of microcomputers by geologists.

"The difficulty we've had that we hope the computer can help us solve is the lag between the time the geologist makes his observations and the time it takes him to calculate his model of rock configurations in that area," he said.

## on compromise DUI law by Craig Webb United Press Internat

After undergoing weeks of painstaking scrutiny, Gov. James B. Hunt Jr.'s proposed legislation to combat drunken drivers appears likely to move more quickly through the General Assembly this week.

Sen. Henson Barnes and Rep. Mar-tin Lancaster, chairmen of the two committees examining the measure, said Monday they expect their panels will recommend slightly altered ver-sions during the next few days and send them to the full House and Senate.

Despite the apparent speedup, Hunt's Safe Roads Act still must make many more stops before it becomes law, and lobbyists and

legislators are likely to propose many more changes.
But one major sign of consensus was reached late last week when a Senate Judiciary III subcommittee tentatively endorsed a compromise to the "dram shop" proposal. That section would make bartenders and salesmen liable for civil damages if they-sell liquor to an underage ordrunken person and that person later causes an accident.

Sen. Henson Barnes, D. Wayne, said now that the compromise has been reached the odds are "pretty good" that the full committee could approve the entire 72-page bill today.

The Senate version of the bill then would have to win the full Senate's approval before the House could formally consider it, but Lancaster said Monday he isn't going to wait that long. As

"There is no need for us to struggle with our own compromise without having to take into account what the Senate has done," the Wayne County Democrat said.

Democrat said.

Lancaster's committee has yet to tackle the dram shop section, which lies at the end of the 72-page bill.

Still, he said he hopes the full committee will be able to finish work on the bill by Friday.

Hunt has urged General Assembly members to make the act their first major piece of legislation passed this session.

## Submarine disposal draws criticism

RALEIGH, N.C. (UPI) - A Navy proposal to possibly scuttle decommissioned nuclear submarines about 200 miles off the North Carolina coast continues to draw opposition.

Opponents said during a public hearing Monday the disposal of the subs off the coast would create a dangerous precedent for waste disposal that could threaten the state's fishing and tourism industries. Most of the speakers at the hearing on a draft environmental impact statement on land and sea disposal of the submarines urged the Navy to reject sea disposal. No one spoke in favor of ocean disposal.

Areas off Cape Hatteras and off the California coast are being considered as dumping grounds for up to 100 vessels taken out of service in the next 30 years.

Jane S. Patterson, secretary of the State Department of Administration, said the state opposes offshore dumping of radioactive and other hazardous wastes until a national ocean use policy has been developed. She said a consistent and complete regulatory system is needed. "Our state depends heavily on the good fishing and clean beaches we now have to keep our coastal economy strong," she said. The state also is concerned about protecting the safety

strong," she said. "The state also is concerned about protecting the safety and well-being of her people." Mrs. Patterson said there is no regulatory system for low-level wastes in the ocean and inadequate scientific data on deepwater areas. Thomas C. Jackson of the Oceanic Society, a national marine conservation organization, said the major problem with ocean disposal is that

vessels cannot be retrieved once they have been sent to the bottom.

"Land disposal appears to offer a safer, more sensible solution to the dilemma now facing the Navy."

Jackson said. "If nothing else, the land alternative insures these submarines will not be sent out to sea, out of sight and out of mind."

In statements read at the hearing by aides, Reps. Walter B. Jones of Winston-Salem called for more study of potential ocean sites. Neal's statement said the lower estimated cost of ocean disposal does not make it the desired alternative.

"There needs to be a compelling reason behind any decision in favor of marine disposal, and that compelling need has not yet been demonstrated to me," he said.

## State selects journalist Bill Monroe as commencement speaker

by Michael Smith

Staff Writer

Bill Monroe, moderator and producer of Meet the Press, will be the commencement speaker on May 14, according to Jeff Baker, Student Senate president.

Monroe has won the Peabody Award, has been editor of the Today Show, the NBC Washington Bureau chief, a UPI correspondent, and a free lance magasine writer. He added that he started in the field at the student newspaper at Tulane University.

According to Baker, State's commencement speakers are not usually as popular as Monroe.

"This is the first year of having a socalled big name speaker. In the past they've been on the dry side, and we (Student Senate) thought it would be nice to have a good speaker."

Monroe said he has not yet prepared the topic for his speech, but he said he has spoken at commencements in the past.

"I do not do many commencement speeches. I do a lot of lectures at business conferences around the country," Monroe said.

Monroe was selected by American Program Bureau, a company that manages national and international speakers such as William F. Buckley and John Dean. He was determined to suit the University's needs.

Baker added, "He (Monroe) calls ahead and finds out the makeup of the audience and conforms his speech to the audience. He is one of the few that will do that."

Commencement will be inside Reynolds Collseum — the logistics of having commencement outside in Carter-Finley would not work this year. We may try that in the future." Baker cited unpredictable weather and the logistics of servicing a large crowd as reasons for not having an outdoor ceremony.

## State participates in Eastman Kodak aid program

State Information Services

State has been selected by the Eastman Kodak Co. to participate in the company's Education Aid Program, Chancellor Bruce R. Poulton has announced.

The University will receive a total of \$17,000 in grants to provide financial support to students through the Kodak Scholars Program, and the Kodak Minority Academic Awards Program.

Kodak Minority Academic Awaran Program.

Through the Kodak Scholars Pro-gram. \$15,000 will be provided for scholarships awarded to outstanding students in their sophomore year. The support will continue through the students' senior year or upon comple-tion of requirements for a bachelor's degree. State is one of 69 colleges selected to participate in this pro-gram.

Program will give \$2,000 in scholar-ship money for scholastically proven minority students in science and engineering fields. The program pro-vides 50 percent of tuition costs begin ning in the freshman year and continu-

Quality Education. The program has provided over \$80 million to more than 900 institutions of higher learn. than 900 institutions of higher learning since it was established more than a quarter of a century ago.

## Transfomer blows out

Central campus undergoes temporary electrical outage

by Jeffrey Bender

The temporary electrical outage that occurred on central campus Wednesday afternoon was caused by the blowout of a transformer on the construction site of South Hall.

"We had a transformer problem at the site of the new dormitory," said Carl Fulp, director of engineering at

the Physical Plant. "Power went off about 11:45 a.m., and it was restored to the last building about 1:45 p.m."
"It was the construction company's problem, although it (the transformer) was tied into the University's line," Fulp said.
"We didn't investigate any further than to restore power," Fulp said.
"We put the Student Center on a generator because food services need-

#### IRC back on its feet

After a period of transition, it appears the Inter-Residence Council is ready to get to work. It's about time.

The IRC is the administrative and governing body of all students who live in the dormitories on campus. Recently the IRC underwent almost a total change it is leadership. A new president, vice president and secretary were just elected to replace last semester's officers who quit for various reasons.

president and secretary were just electrony to replace last semester's offices who quit for various reasons.

In the past, the IRC has not been totally effective in dealing with important issues affecting residents. Last year's plan to rearrange the housing assignments in order to create five all-freshmen dorms went unnoticed by the IRC. Only after a loud public outcry by the residents did the IRC finally realize that the majority of residents opposed the idea of all freshmen living together.

The IRC, which is advised by Charles Oglesby, director of special programs for Residence Life, should act as an advocate for students and not as a rubber stamp for the Department of Residence Life. In the past, the IRC has not been as conscientious as it could have been in ensuring that students' needs were adequately met.

Although the IRC is composed of representatives from each of the dorms, many of the representatives are, unfortunately, resident advisors who work for the Department of Residence Life. RAs must find working for the Department of Residence Life while at the same time trying to be a wastchdog on them a terrible conflict of interest.

ing to be a watchdog on them a terrible nflict of interest.

Currently, there are many changes tak-ing place in the Department of Residence Life: South Hall is preparing to open and

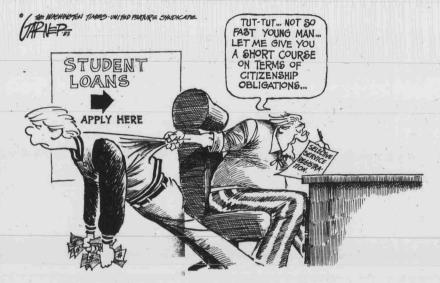

all upperclassmen who made the lottery are guaranteed a place to live on campus. Students need to be aware of how policy changes will affect them. For example,

changes will affect them. For example, students who are currently seniors but who will not graduate will be denied rooms on campus after this year. This is the function of the IRC. Yet the IRC has not been informed of exactly how the freshmen lottery was run this year or how last year's lottery will affect this year's seniors.

Although the IRC opposed the recent increase in dorm rent, little student input went into the determination of the actual final amount. There was little student input into the method used for this year's put into the method used for this year's freshmen lottery. The reason for so little student input was that the IRC was not operating as a functioning body. The lack of leadership caused the group to become unaware of students' problems. Consequently, students suffered.

Students need a group such as the IRC to ensure that their needs are met. But a group which is composed of employees of the Department of Residence Life and of the Department of Residence Life and advised by the director of special programs for Residence Life cannot always act in the best interests of students. The IRC must remain independent of the Department of Residence Life and function as a student advocacy board. Students living in dorms need to participate in the IRC meetings. Only then will they get the respect they deserve. We look foward to seeing the IRC work

We look foward to seeing the IRC work actively for the students who live in the dorms this spring. Many mistakes have been made in the past, it is hoped, that the new IRC will best serve the students.

Congress battles over Social Security

## Helms/Ferrara plan still tops

It is generally conceded that when a crisis arises the American people become sufficiently aroused to affect a solution. Over the past couple of decades, however, this resiliency has been compromised by an increasing dearth of courageous statesmen and a corollary rise in cowardly politicians.

In the shadow of this depressing observation one finds a cowering and frail Social Security system. Those who are currently entering the workforce, or preparing to do so, should be cognizant of the con game that Social Security has become. It is a sham. It is a lie, and it is our generation that shall pay the cost.

cost.

By way of background one must indulge the tedium of reciting some grim particulars.

In 1950 there were 16.5 taxpayers for each Social Security recipient. By 1980 the ratio had dwindled to 3.33 for each retiree. It is currently estimated that this ratio, by 2030, will fall to a ratio of 2 to 1.

Between the years 1970-1981, Social Security benefits rose 83 percent faster than the Consumer Price Index. In this same period pre-tax earnings in the work force actually fell by 14 percent in relation to the CPI. The gap between these two significant figures grows worse when one takes account of the workers' rising tax burden. This means that the real after-tax purchasing power of Social Security recipients has increased, since 1967, 40 times faster than that of working Americans.

In this manner the dollar outlays for Social Security were \$40 billion in 1973. In 1983 they will be \$200 billion plus. It should-come as no susprise that, in order-to-pay for shelp years of supposed generosity, the politicians

From The Right **THOMAS** 

PAUL

DeWITT |

than encouraging gutless politicians to press the spending pedal to the floor.

The only proposal which will alleviate the problems systemic in the retirement system will most likely never be given any consideration. The plan has been embraced by Sen. Jesse Helms. Peter Ferrara, in a study commissioned by the Cato Institute, first outlined the plan's details some months back.

Under the current system a worker entering the work force in 1980 and who earns an average salary and retires at age 65 will receive, in constant 1980 dollars, for himself and his spouse, social security payments of \$15,000 a year.

Now consider what this same worker would receive if the system was made private such as the Helms/Ferrara plan recommends. If he had been allowed to put the same amount of money he paid out in Social Security taxes in the system and the side of the system amount of the system would receive \$28,000 annually. Upon this couple's death they would leave fully \$500,000 for their children to inherit. If they chose not to leave an inheritance they could have an annual retirement income of \$45,000.

This plan would involve no cutting of benefits and no tax increases while it would

\$45,000.

This plan would involve no cutting of benefits and no tax increases while it would also repeal those tax increases already scheduled currently through 1990. This is highly attractive when one considers that the maximum tax is currently \$4,342 a year and is scheduled to rise, by 1990, to roughly \$10,000.

There is no involvement

is scheduled to rise, by 1990, to roughly \$10,000.

There is no intellectually honest analysis which denies the superiority of individual and private retirement accounts over the current system. Still one must acknowledge, as Mason University economist Walter E. Williams notes, that "those above a certain age have already paid so much into social security that they would do better staying in the system than abandoning it. That age is approximately 40."

The younger participants would simply get out and give up the amount already contributed. To ameliorate this problem, one need only note that, with the private system, younger people will be far better off in the end than with the current system. For practical and political reasons the program would be mandatory.

Those over 40 who choose to stay in would

than with the current system. For practical and political reasons the program would be mandatory.

Those over 40 who choose to stay in would continue to pay taxes and in retirement receive the relevant benefits. The benefits of those already retired would be guaranteed—they are not now. A short-term deficit of \$100 billion would accrue and have to be financ@d through general revenues. This figure would, however, rapidly decline.

This reform, over-all, would accomplish two things. Much of the economic burden of government spending and taxation would be alleviated. In addition, the money currently going down a spending rat hole would be diverted into currently strained private capital markets. Martin Feldstein, the chairman of the President's Council of Economic Advisors, estimates that Social Security reduces private savings—the pool of funds from which investment capital arises—by a full 35 percent.

But it appears that the plan will not be ap-

which investment capital arises — by a full 35 percent.

But it appears that this plan will not be approved even though it is the best one around and would solve every problem that currently exists in the retirement system. Politicians consider good ideas an anathema to their power and shrink from logic and sensibility. To his credit, Jesse Helms is less of a politician and more of a statesman. He is, as a populist, the only politician who is being honest with the American people. It is a sad statement on the state of the union to note that this great man's honesty and statesman-ship on this issue may well hasten his downfall. This because of evil politicians and thieves who care more for their own turf than they do the welfare of the American people.

## College kids today parallel Orwell's 1984

WASHINGTON — One disheartening effect of America's economic difficulties was reaf-firmed last week to nobody's glee. In its 17th annual report on attitudes among first-year college students, the American Council on Education declared that American Council on Education declared that this year's freshmen are more materialistic and less reformist than any surveyed before. This fact alone isn't very surprising since freshmen have been on a well-documented ego trip since the mid-1970s. Yet it raises old questions not only about

TECHNICIAN \*\*

the immediate implications of campus "meism" but also new doubts about the political future of the United States. Even if prosperity reappears on America's horizon, recovery may not free the post-Vietnam crowd from manacles forged in the uncertainty of today.

crowd from manacles forged in the uncertainty of today.

Recession-era Americans can judge as they will the career interests inscribed in the results of the council's researchers at UCLA. More than two-thirds of this year's freshmen thought that "being very well-off financially" was "very important," up almost four percent from last year (in 1967, the figure was 43.5 percent). There was a similar increase in the share of freshmen who considered financial gain a "very important" reason for attending college. But exorbitant college costs and the scramble to repay loans have twisted the purpose of higher education. Increasingly, the reason for attending college is to pay for it.

Conclusions about the class's views on certain social issues are more elusive. While freshmen grow more supportive of national health care and abortion, their liberalism may only be self-serving; support for busing to achieve racial balance in schools has increased, but it still reflects the preferences of only 46.8 percent (merely 35.5 percent of all freshmen endorsed affirmative action in college admissions).

There's nothing fuzzy, however, about the regard for "social activism." Little more than one in five frosh see merit in the goals of environmental cleanup or community-action programs. Fewer yet would want to "influence the political structure."

This disincilnation has been unnervingly evident in campus activism. Once-provocative student organizations — blacks, women and environmentalists among others — have seemingly become parochial havens, much like their replicas in Washington. Where new issues — Central America and environmental chave often been veterans of past canipalgns who never turned in their placards.

One might have thought that frenzy over nuclear arms would make activists of many of today. Recession-era Americans can judge as they

their placards.

One might have thought that frenzy over uclear arms would make activists of many

students today. But the freeze became de rigeur last year among students and faculty alike only after town councils and church groups led the way.

And, as the Union of Concerned Scientists discovered, it's been an issue of changing momentum. Despite a more than three-fold one-year increase in the number of campuses involved in last November's "teach-in" on national security, turnout in 1982 was lower than expected. Now that the Soviet Union and Catholic Church seem to be forcing President Ronald Reagan's ear to other points of view about nuclear weaponry, it is unclear whether students will feel similar compulsions again.

again.

Whether it's the legality of American intervention overseas or the drinking age

## Prepare yourself

Having been exposed to Thomas Paul DeWitt's ravings in other issues of the Technician, I usually make it my habit not to take him too seriously. However, his recent two-part attack on secular humanism, in particular the Feb. 7 column, 'Feminism destroys family's role," is ridiculous enough to make it worthy of comment. First, his vision of the evil secular humanists secretly plotting the overthrow of all that is right and good is notably unconvincing. And proving the existence of any organized allilance of secular humanists as he hints is likely to remain,' even beyond the abilities of DeWitt's well-known disregard for the-facts.

Second, his absurd statement that "... the rise of militant feminism has been accompanied by a concommittant acceleration in the pornographic exploitation of the female. "is as amazing as it is probably offensive to numerous feminist groups which have among their goals an end to such degradation of women. Equally assime is his statement that "... militant feminism, as the most acute expression of secular humanism, promotes death..."

A little reading might prove helpful in showing DeWitt that there is a serious lack of evidence to support his arguments — provided that such reading includes some material from sources other than the National Congressional Club's approved reading list.

look to the working man's wallet as a means of financing their extravagant (diocy. M. Stanton Evans, contributing editor to Human Events, observes that "the average Social Security tax has increased 2,000 per ent since 1950 (compared to less than 500 percent for wages), and the maximum rate has grown 6,500 per cent since the program was adopted."

was adopted."

The maximum Social Security tax rate tripled in the 1970s. Excluding the recently touted Social Security Commission proposal the maximum tax rate is scheduled to triple once more in the 1980s. The commission proposal includes a \$169 billion additional tax increase that is intended to finance the projected \$200 billion plus unfunded liability of the part feeded.

jected \$200 billion plus unrunded liability of the next decade. Additionally discouraging is that, as Sen. William Armstrong, R-Col., has stated, while on paper only 75 percent of the proposal's short term deficit reduction comes from a tax increase, in the long run 91 percent of the deficit reduction is proposed to consist of tax

increases.

It is all rather depressing. One finds it difficult to find a point at which he might begin to dissect the idiocy and moral criminality expounded by those who wish to maintain this

pounded by those who wish to maintain this status quo.

Alas, one should begin by respectfully noting President Ronald Reagan's chutzpah. Here is a man elected on a platform of reducing taxes, scaling back the growth of government and encouraging the expansion of the private over the public sector.

But Tip O'Neill and his band of perverted Robin Hoods — with the front-line assistance of some rather ambitious and money hungry Republican goats — have corralled Ronald Reagan into supporting the third of several major tax increases, none of which will help anything in any way except to further distort and damage our anemic economy. All of these proposals might have just as well have been authored by Edward M. Kennedy.

Not surprisingly, last summer's \$98 billion tax increase was promoted and passed as a deficit reducing measure. Accordingly—deficit estimates and projections have gone through the roof since its passage.

Six years ago, after passing one of the largest tax increases in history, President Jimmy Carter proudly announced that he had "permanently" fixed the insolvent retriement system. Raising taxes accomplishes little more

## Course provides opportunity for self-evaluation

On Oct. 15, State, in conjunction with the ROTC Department released what has proven to be one of the best-kept secrets of all time: the Wolfpack Leaders' Reaction Course. The WLRC is a six-laned course designed to aid in the development of leadership skills.

Courses comparable to State's are very expensive and in high demand throughout the country.

Students just don't realize how important their leadership skills will be upon graduation. Every effort should be taken to improve these attributes.

The purpose of this course is as follows:

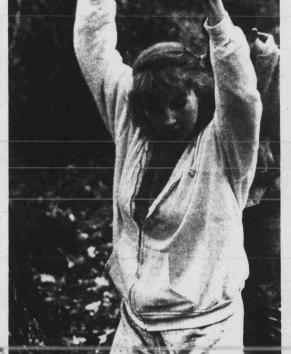

- To measure the degree to which certain leadership traits are possessed by the participant thus forming a basis for counseling in leadership by a course trainer.
- To provide the participant with a means of making self-evaluation to determine more accurately his eadership ability.

• To give the participant an opportunity to apply the lessons learned in his formal leadership instruction.
• To observe the effects of others' strengths and weaknesses on overall team operations.

An informational meeting concerning the University's new project will be held on Thursday at 7:30 p.m. in the Student Senate chambers.

tion in the national conven-tion in Atlanta, Ga.

tion in Atlanta, i.s..

There are exciting opportunities in this fun and productive club. One does not have to have experience in broadcasting — only an interest. So start by picking up a membership application from Jim Alchediak in 2316 D.H. Hill Library.

The Constitution of AERho requires that all

candidates for membership must have:
• completed at least 29 semester hours or be a sophomore,
• completed at least one telecommunications course

if you are a speech communications major or a writing and editing major, earned a minimum of a 3.0 grade point average in telelcommunications

• earned a minimum of a 2.0 grade point average overall.

For those who are not related to the majors in the above statement you need to have:

earned a 2.0 GPA overall.
 Take advantage of this opportunity to become a part of Alpha Epsilon Rho. As

# State's Frisbee Disc Club — the Ultimate in whirling fun If you are interested in checking out a game benign in nature yet subtly exertive, show up at the next game of Ultimate. We don't ask that you join the club to play, just be ready to learn.

STUDIO 1 'Playboy' Late Show Tonight 11:15 P.M. "EROTIC HOLIDAY" 00

by Todd Groshong President State Frisbee Disc Club

State Prisbee Disc Club

For those of you who
think a frisbee is just a toy,
beware. Discs offer a completely new medium to enjoy being athletic.
Ultimate, for instance, combines some of the basic concepts behind basketball and
soccer, yet doesn't rely on
previous skills associated
with either sport.

Those of you who
have attempted to throw a
frisbee at the beach realize
just how much skill it takes
to make a good throw into
the wind consistently. It's
not just a matter of hurling
the "bee" in the right direction but more a combination
of a snap of the wrist along
with an appropriate angle
of release. This lack of
knowledge about the games

disc sports is just what the Frisbee Ciulb is out to change.

Ultimate is probably the most enjoyable event, regardless of previpus throwing inabilities. The game is played on a large field with seven players on each team. The disc is advanced by passing only. A score is accomplished by passing the disc across the goal line to a teammate. It's simple — just catch, pivot and pass — then run all out. You don't have to be competitive, just be able to enjoy a game which is unspoiled by jocks and stereotypical domineering players who could not care less about the others. And in case you are wondering, the club and two members of the Physical Education Department are propos-

ing Ultimate as a viable physical education alternative. Stay tuned to your course schedule.

In the past, the club has supported an Ultimate team which competes against other teams in the state as well as teams as far away as Florida. The problem now, as it has always been, is attracting new players, whether competitive or not, to experience a new sport. Most people feel incapable of enjoying something completely new and challenging. Basic skills required are easily gained in a few attempts at the backhand and forearm throws. The only other requirement is to be able to run. Otherwise the rest of the game comes naturally. Since there is no contact, special equipment is unnecessary.

There is nothing more enjoyable to our team members than to teach new players how to throw. The Frisbee Disc Club currently meets on the lower intramural field on Thursdays from 5-7 p.m. We will probably begin meeting on Tuesdays as well, but lights are hard to come by. Stay tuned to the Green Sheet and the Crier for some good times. rest of the game comes naturally. Since there is no contact, special equipment is unnecessary.

## **AKA** explores its roots during Black History Month

Features Writer

Features Writer

In observance of Black History Month, the Alpha Kappa Alpha Sorority acknowledges its history and contributions to society, black Americans and particularly black college-trained women.

Alpha Kappa Alpha Sorority was founded on Jan. 15, 1908 at Howard University, Washington D.C. The sorority was the first Greek letter organization among black college women. To insure perpetual growth in a national and international level, Alpha Kappa Alpha was incorporated in January of 1913. The sorority has grown to include a membership of over 75,000 women affiliated with graduate and undergraduate chapters throughout the nation and in several foreign countries.

undergraduate chapters throughout the nation and in several foreign countries. For more efficient administration, the chapters are grouped into regions. Serving North Carolina and Virginia is the Mid-Atlantic Region. Formed in 1953, the region currently has 77 graduate chapters and 33 undergraduate chapters, including Kappa Omicron chapter at State. Many sisters from the Mid-Atlantic Region have served as national leaders of Alpha Kappa Alpha, five of them serving on the 1980-1982 Directorate.

The Kappa Omicron chapter of Alpha Kappa Alpha Sorority was the 27th undergraduate chapter to be chartered in the Mid-Atlantic region on April 27, 1976 at State. The chapter has continued the Alpha Kappa Alpha tradition of striving for academic achievement, social maturity and intellectual development as well as being concerned with State's campus and the Raleigh community.

In the past, the Kappa Omicron chapter has been academically successful by having the highest grade point average of the sororities at State. Also, on the accomplishments for the chapter has been a collaboration of Black Greek organizations at State and an annual semi-formal for charity. The service of fered by the chapter has been unlimited in the forms of food/clothes drive for the needy, outings for children, and monetary contributions to various local and national organizations. The Kappa Omicron chapter thrives on the bond of sisterhood to maintain a cohesive effort of service to all mankind as well as growth of the individual sister.

Several of the Alpha Kappa Alpha sisters have

Spring to arrive soon!

growth of the individual sister.

Several of the Alpha Kappa Alpha sisters have contributed to the history of black America judicially, culturally and otherwise. Some of the prominent sisters in the cultural and artistic sector of black history include:

Marian Anderson — the first black opera singer, Maya Angelou — famous author of I Knov Why the Caged Bird Sings, The Heart of a Woman and numerous other books,

Ester Gordy Edwards — senior vice president of Motown Record Corporation who helped introduce talents such as Diana Ross, Stevie Wonder and the Temptations,

talents such as Diana Ross, Stevie wonder and the Temptations,
Ella Fitzgerald — famous jazz singer, and
Toni Morrison — well-known author of Song of Soloman and Tar Babs, sisters have also excelled judicially in the United States.
Included in this area are:
Yvonne Burke — representative of California.

## Student seeks relief from cold

Spring is almost here. The signs all point to its soon arrival. The weather is growing warmer, the sun is shining and gentle breezes waft through the air. Even the groundhog agrees, spring is just around the corner. Or is it?

ner. Or is it?
This winter was supposed to be one of the worst that we were to experience in a long time. The weathermen went bananas when they started to predict the winter of '82.

remember thems mendioning were such things as the frogs digging their homes deeper into the mud on the pond bottom. Wooly caterpillars were seen buying

song underwear and the supply of suntan lotion was depleted as groundhogs bought themselves a good supply.

Yep, we were to have the worst winter in history. The question is, however, where the heck did it go?

Except for a few rare oc-casions, I saw shorts up un-til Christmas. Trees were showing their buds and flowers were starting to bloom.

bloom.

The weathermen were going crazy. How could they keep up with their predictions; of glooms and smew when the sun was shining and it was 60 degrees outside the studio? They must have been relieved when the first foul weather hit.

Speaking of snow, where the heck is it?
All this week I kept hear-ing on the radio and TV about the inches of snow we were supposed to have this weekend.

were supposed to nave one weekend.

If I remember the forecast correctly, there was supposed to be showers Thursday evening, changing to snow during the night and continuing to snow all Friday.

I go to bed Thursday night with visions of missing classes Friday moning because I'm snowed in. I wake up, and what do I see?

Yet grass. Let me tell you, this can be very disappointing.

At least they got the

month? The weathermen predicted a bad snow storm that was supposed to last all weekend. We all went to bed expecting the biggest snow fight on campus and wake up in time to spread some suntan lotion on at Tucker Beach.

Tucker Beach.
Where did it all go?
You would think that the
weathermen would get
their forecasts right once in
a while. The law of
averages is on their side.
But then, Murphy's Law is
also on their side.

So if you're smart, take all this talk of an early spr-ing with a grain of salt.

If you're smart, you'll start buying the heavy supplies now, while the weather is good. We're in for a doozy of a spring.

Azie Taylor Morton — former treasurer of the United States and Constance B. Motley — New York federal judge. The Kappa Omicron chapter applauds the accomplishments of these and other sorors for becoming a memorable part of black American history. The Alpha Kappa Alpha Sorority took it upon itself to recognize the accomplishments of not only members of the sorority, but of all black women in America. This recognition is in the form of a short biography on the background and accomplishments of these women. Titled the Heritage Series, these

Women in the Judiciary
Women in Politics
Women in Business
Women in Medicine
Women in Dentistry
Founders, Incorporators and Past Supreme Basilei of
Alpha Kappa Alpha Sorority.
These booklets are available for public information, you are encouraged to seek any or all of these
booklets from any member of the Alpha Kappa
Alpha Sorority.

## Freshmen views revealed

by Patricia McCormack UPI Education Editor

College freshmen are attached to personal stereos much of the time, munch pizza some of the time and wear jogging shoes a lot, as everyone familiar with the type knows.

the type knows.

Other things not so advious about college freshmen are between the covers of a report on a survey that probed their characteristics and attitudes. The term freshmen means females as well as males in the first year of college.

The profile of college freshmen is credited to a survey of attitudes and characteristics of 188,692 of the nation's 1.7 million college freshmen. It is said to represent all freshmen.

represent all Iresamen.

The American Council on Education study was conducted by Alexander W. Astin, a professor of education at the University of California at Los

Angeles.

The no surprise in the study: the freshmen expect a college degree to help them make money, preferably enough to be well off. This is not as altruistic a goal as those of college freshmen in the 1960s when everyone seemed to aim first to save the world and lift the down and out.

The shift to a money goal is not mysterious, however, in this era of the most expensive college educations in the nation's history, including some with \$50,000 and up priectags.

Fields of study most popular are the high-paying ones — engineering, business, computers. That offers some hope the freshmen might reach their monetary dreams — if the applicants don't crowd themselves to death.

Another no surprise in the survey: these freshmen

Another no surprise in the survey: these freshmen with dollar signs in their eyes are not showing a lot of interest in careers with low pay: teaching and social work. The proportion heading for those fields continues to decline.

Life goals considered important by about seven off financially, raising a family and becoming an authority in his or her field.

authority in his or her field.
Politically, Astin found three-fifths of the freshmen in the middle of the road; 20.9 percent liberal or far left; 19.4 percent conservative.
Support for legalization of marijuana dropped from 34 percent among last year's freshmen to 29.5 percent in the new survey.
This year for the first time pollsters asked the

freshmen if they supported increased spending for national defense. About four out of 10 said yes. There was no space to answer in the negative so one must presume six out of 10 would not favor increased spending for defense.

Percentages agreeing with these other statements

were:
Government isn't protecting the consumer, 68.8
percent; government isn't controlling pollution, 78.8
percent; government should discourage the use of
energy, 77.5 percent.
Criminals have too many rights, 69.8 percent; in
flation is the country's biggest domestic problem,
69.8 percent; the death penalty should be abolished,
28.4 percent.

1811on is the country's origest domestic problem, 28.4 percent, the death penalty should be abolished, 28.4 percent, and the should provide a national health-care plan, 57.5 percent; abortion should be legalized, 54.8 percent; grading in high school is too easy, 54.5 percent; women's activities should be confined to the home, 25.5 percent; couples should live together before marriage, 42.8 percent; divorce laws should be discouraged, 37.3 percent; divorce laws should be liberalized, 44.6 percent; it is all right for people who like each other to have sex, 48.2 percent.

Women should have job equality, 92.5 percent; busing to achieve racial balance is all right, 46.8 percent; homosexual relations should be prohibited, 47.2 percent.

College has the right to regulate off-campus behavior, 14.5 percent; students should help evaluate faculty members, 70 percent; college grades should be abolished, 14.7 percent, student publications should be regulated, 40.6 percent.

The report said some 11 percent need remedial work in English; 22.1 percent in mathematics; 9.3 percent in sciences.

For eight out of 10 of the freshmen, getting a college diploma will put them one up on their parents—if they have the staying power.

Seventeen percent have mothers and 20 percent fathers who graduated from college.

Other points:

88.2 percent of the freshmen are white; 8.5 percent black; 1.0 percent, American Indian; 1.4 percent, Oriental; 0.9 percent, Mexican; 0.9 percent, Puerto Rican; 1.4 percent, other.

Current religious preferences include Jewish, 3.0 percent; Protestant; 33.7 percent; Roman Catholic, 38.9 percent; other, 17.2 percent; none, 7.3 percent;

## Taiwanese celebrate **New Year with festivities**

by Shawn A. Dersch Feature Writer

Feature Writer

On Feb. 13 over 170
Triangle Area Taiwanese
gathered to celebrate the
lunar New Year. Sponsored
by The Triangle Area
Taiwanese Association, the
celebration included more
than 50 State students and
faculty, many who are
members of State's
Taiwanese Student
Association. The celebration was held at 7 pm. in
the West Presbyterian
Church, near State's cam
pus. The event also provided an opportunity for some
non-Taiwanese to sample
an Asian culture different
from their own.
The Chinese calendar
runs in a cycle of 12 years.
This year, 1983, is the year
of the pig, the 12th year in

the cycle. Every 12 years the cycle repeats itself, fast year was the year of the dog. Next year will be the year of the the year of the rat. The rat is first, followed by the cow, tiger, rabbit, dragon, serpent, horse, ram, monkey, bird, dog and, finally, the pig. The Chinese calendar has 12 months a year, each month having 29 or 30 days. Secure of the year of the year and the year of the year, The lunar new year is a 5-day celebration held an extra month to the year. The lunar new year is a 5-day celebration held an extra month to the year. The lunar new year is used from southest Asia to China and Japan Many Japanese feel that some women born in the year of the horse make bad wives. They also believe that

those born in the year of the dragon have the greatest chance to become persons of power or influence in society. People born in the year of the cow are believed to be patient.

Three important events take place in the lunar years. The most important event is the New Year celebration, followed by the Dragon Festival on May 6 and the Full Moon celebration in the fall.

On Saturday the celebration included traditional music and foods – raw fish, seaweed, squid, and rice. A special cake, made from a special kind of rice, eaten only at this time of year, was served for dessert.

#### Kilgore Conservatory displays tropical plants

If you would like to visit the tropics without leaving campus, take a walk over to State's Conservatory in the greenhouses behind Kilgore Hall.

The sound of running water and the green lushness of the tropical plants is a welcome change from the barren trees outside.

From the Roots Up-

#### D.J. HAMRICK

Feature Writer

While State's Conservatory isn't nearly as large as the National Conservatory in Washington, it con-tains many nice plant collections. " just a few hun-dred square feet you can see pla-.s ranging from Bromeliads and houseplants to unusual cacti and suc-

dred square feet you can see pla. s ranging from Bromeliads and houseplants to unusual cact and suculents.

The carnivorous plant terrarium is one of the most interesting parts of the conservatory. In the terrarium are sundews, pitcher plants and our North Carolina claim to fame, the venus fly trap.

The tropical pitcher plant (Nepenthes), from South America, is the most unusual carnivorous plant in the conservatory. It is insect-catching pouch is suspended from the main plant and looks like the bowl on Sherlock Holmes' pipe.

If you would like to see what your houseplants are supposed to look like, go check out the Dracaena and the Aglaonema collections. They are the large mass of leafy plants on the left as you walk in the door. Common ivy makes a nice hanging basket and the conservatory has on display any variety of ivy you could ever run into. You can buy ivy starts in the spring or take cuttings from ivy already planted to start your own basket.

Many of you have seen the Walt Disney character shrub forms at Disneyworld. The conservatory has a form on a smaller scale that you can imitate for your own plant conversation piece.

The form is actually bendable chicken wire filled with peat moss in the shape of a watering can. It is in the process of being covered by creeping fig. Before the form becomes completely covered, you can see for yourself how it's done and start your own. The conservatory was begun in the early 1950s for education and enjoyment. Hours for the conservatory are 8 a.m.-noon, and 1-5 p.m., Monday through Friday.

For whatever reason, walk over to State's Conservatory for a few minutes. You'll be glad you did.

Who knows, maybe one day someone will adsunlamps, lounge chairs and pina coladas to make you think you really are in the tropics.

#### ure Club debut **English funk wave hits with**

by Clif Thornton
Entertainment Writer

English funk. What is the music world coming to?
A question asked about seven years ago when the first wave of 'disco' — dance' strutted across America. But, with its departure it left a void in the music world to be filled by another trend in imagination.

With a well integrated blend of reggae rhythms, including steel drums and bongos, synthesized percussion and Latin horn interludes, Boy George and his band Culture Club are the number one act in England.

England.

A first reference to the name Boy George and all indications are that he is a guy. A glimpse of him in his mid-chest length plaited locks, lip balm, eyeshadow, mascara and ribbons give thoughts of a transvestite or a David Bowie clone.

Boy George is neither. He is a person with no standards. By dressing the way he does he invokes attention from all — a way of closing the gap between genders and releasing the tensions of suppression and dominance.

tion from all a way genders and releasing the tensions of suppression and dominance.

Culture Club's debut album titled Kissing To Be Clever accents on that tension and relenquishes it to passive meditation. Twenty-one year-old Boy George is the vocals with Jon Moss on drums and percussion and Linn drum programming. Roy Hay handles guitars, keyboards, piano and electric guitar with Michael Craig at bass and heavy culture.

Side one of the album consists of five compositions.

guitars, Reyodards, piano and electric guitar with Michael Craig at bass and heavy culture.

Side one of the album consists of five compositions of which the first three "Do You Really Want To Hurt Me," "I'm Afraid of Me" and "You Know I'm Not Crazy" are attempts to project for the listener an attitude of his theory for conformity in society. The hit single "Do You Really Want To Hurt Me" includes a chorus line of: "Do you really want to hurt me/Do you really want to make me cry."

A question of why is there exploitation of his personal ethics? The next cut "I'm Afraid of Me" is his own outlook of himself. An arrangement which tells how he feels about his image. In the second verse there is a tendency to believe he made a mistake:

Always survive days
Cut and discretion
Touched in a sane way
Leave no impression
He must be someone
Ye even you

Toucia.
Leave no impressive He must be someto
Ye even you
Foll my direction

Some wish to see

Love without treason
Who will love me.
The third trac
Who will love me? A question which he doesn't know
nova influenced

the answer to, and one where he seeks compassion in

his methods.

The third tract "You Know I'm Not Crazy" a bosanova influenced score with high intensity calypso

percussion and quick staccato horn interludes is performed with lyrics that are his best at trying to explain himself.

Talk about the love we feel
The passion our hearts conceal
Kiss and Run
The fools we trust
Love inside a blinding lust.
You know I'm not crazy.
You know I'm not crazy.
Hold me to my every word
Forget about the things you've heard
Time will conquer
Time will state
We owe our every tear to fate.
The remaining two songs on the first side "Till tumble 4 ya" and "Love I'wist" are both calpyso-dance tracts with a foundation of Latin-oriented rhythms.
Side two of the LP includes five cuts in which three are expressions of the type of music the band is writing, an intergration of 'disco' pop and funk reggae.

The second track 'White Boy' is an attempt to bring black-oriented dance music into the limelight.

reggae.

The second track 'White Boy' is an attempt to bring black-oriented dance music into the limelight. The first verse influences this effort.

Black boys employ salassie
We kiss we define
White hands white hearts
The gender
How can I make you mine.
Your white dance like an enemy
Your es ow white.
An attack on the rock dominated dance style of most
blue-collared whites. This is a notice of a type of
music which is currently popular and is soon to control the dance trends.
The next couple of cuts "Boy, Boy" and "White
Boys Can't Control It" are of the same idea with all
three of the songs containing funk-syncopated bass
lines and rap session lyries.
Culture Club is exactly what its name depicts — a
group into an aspect of certain refinement, with
membership available to anyone with an open mind
and a sense of progressiveness.
And with a large following in the dance circuits in
England and rapidly improving airplay time on major FM channels, Boy George and his band Culture
Club is the boat leading a wake of English funk
groups to dock at our shores for an extensive summer campaign. Be prepared!

## Air bands drift on stage, raise money for WKNC

WKNC, State's own student radio station and The Bears' Den, located in the Cameron Village Subway are holding the first Bears' Den — WKNC Air Guitar Contest this month.

In Feb. 8's competition, 10 bands competed with the top score going to the Tekes, who had 30 points.

The competing air bands faced the crowd in the semifinals last night at 9:30 p.m. on Tuesday the 22nd at 9:30 p.m. the eight best groups will take to the stage to make their bid for first prize in the finals of the contest. The best group will receive a \$100 first

prize, while the second place group will receive \$50, and the third place group will get a case of

The competition is designed to raise funds for WKNC. According to Bears Den co-owner Steve Thanhauser, the money taken at the door will go to the station. Thanhauser said, "KNC has been a big help" throughout the contest.

Air band members entered in the contest are encouraged to use props, wear costumes appropriate for their band's image and generally "rock out." All bands are limited to one song, but there is no time limit. This means that air WOMEN'S HEALTH
CARE YOU CAN ABORTION: a difficult decision

# Rashomon epic comes to Thompson

Thompson Theatre presents "Rashomon." a Japanese story about a search for truth. Rashomon is not a character, but an ancient Japanese gate around which this tale is relived by three witnesses who all tell the story in very different ways.

The gate of Rashomon is decayed and far beyond

repair. This state of disrepair lends a haunting reputation to the legend that takes place there.

The murderous trial of husband, wife and the ban-dit moves from tenderness and heroism to death and total depravity.

ntormation, Please Cal. 919) 489-8720 =

the forest outside Rashomon gate. He has tied her husband to a tree to witness this beinous crime — the rape of his wife. Later the husband is found murdered, a brightly jewelled sword thrust into him, right after the bandit is heard boasting of his escapades. is near to lossing of his escapades.

Was the bandit the victor in a fair fight of self-defense or did he commit murder as well as rape? Did the wife secretly submit to a staged violation or was she a victim in a horrible crime of TASM 🖰 LSAT - MCAT - GRE GRE PSYCH - GRE BIO GMAT - DAT - OCAT - PCAT VAT - MAT - SAT VAT • MAT • SAT

# **New Clapton should satisfy fans** of the 1988 tune "Crazy Country Hop." This song is also a simple rock 'n' roll number with a simple rock 'n' roll message: "Ooh wee oh oh ooh la la/Let's rock and roll." And that's exactly what this album is all about — good, strong, basic music. Clapton recently recovered from illness and has also just switched his label to Duck Records, and these two factors seem to have inspired him. After 20 years of living on blues power, everyone's ultimage guitar hero may have a' few strands of gray hair, but he still knows how to put out good music. On this album, Clapton gets down to the essentials — the money and cigarettes — with a no-frills, assertive effort.

by Craig Dean atertainment Writer

Entertainment Writer
Eric Clapton has just released a new abum, but to understand new Clapton, it helps to know a little about old Clapton. Back in England 17 years ago, it mental to the sease the phrase "Eric Clapton is ofod" embellishing walls and alleyways, spray painted there by fervent. worshipper/vandals. Clapton attained this glorious title by cranking out some pretty mean blues guitar lieks with The Yardbirds and John Mayall's Bluesbreakers.
After leaving Mayall, Clapton continued to dazzle audiences with his lightning fast solos in Cream, Blind Faith and Derek and the Dominoes, and consequently, he augmented his title from God to Everyone's Ultimate Guitar Hero. But in the early 705 Clapton was incapacitated by his heroin addiction. After a long struggle, he remerged clean with the 1974 release of 461 Ocean Boulevard.
Heroin, however, changed everyone's ultimate ed veryone's ultimate ed veryone's ultimate

1974 release of 461 Ocean Boulevard.

Heroin, however, changed everyone's ultimate guitar hero to a laid back, almost self-conscious pop musician, and all of Clapton's records since then have suffered from this nearly ashamed (often confused with superstar slack) style. Clapton's new album, Money and Cigarettes, follows in the same vein sort of.

Clapton seems to be more assertive on this LP than on recent releases such as Slowhand and Another Ticket. The opening three numbers are the strongest cuts on the album, and probably the strongest opening a Clapton album has ever had.

The first song is a cover of Sleepy John Estes' 1940 blues tune "Everybody Oughta Make a Change." Clapton, Ry Cooder and Albert Lee jam on electric and slide guitars, while Donald 'Duck Dunn, one of Booker T's MG's (remember "Green Onions'"), and Roger Hawkins pound out a strong rhythm. Clapton's characteristically rough baritone is a little smoother than on past recordings, and he sings with more confidence.

The next. song. "The Shape You're In," is a strong boogte-rocker reminiscent of "After Midnight" and "Blues Power. In "The Shape You're In," Clapton writes about his woman deteriorating into an alcoholic, and Clapton, speaking from the wise voice of experience, sings. "But I love you girl, I don't loye no one else!" The third song is "Ain't Going Down," and it is also a blues-based rocker with Clapton and Cooder trying

to outplay each other on guitar.
Clapton wrote both "The Shape You're In" and "Ain't Going Down." He also penned four other songs on Money and Cligarettes, and on all of them but one, Clapton reaches back to the blues for inspiration. "Preture of the songs on the blues for inspiration." Preture of the songs of the s

With an incredible cast of international stars, this story of a World War II P.O.W. camp in Germany is packed with excitement. Based on a true story, the film features Steve McQueen in one of his finest roles as the "Coder King."

## North Carolina **Ducat Pickup**

Ticket pickup for Saturday's State-North Carolina basketball game begins Thursday at 6 a.m. for students presenting a valid registration and whose last names begin with A-G. Tickets will be distributed until 4 p.m. Students whose names begin with H-Z may pick up tickets from 8:30 a.m. until 4 p.m. on Friday. Saturday's match with the Pack's arch-rival begins at 3 p.m. and will be an ACC TV network game.

## Rules to aid State against Seahawks

Out of Bounds-

Assistant Sports Editor

State's men's basketball team will get one last preparation session for its final, five-game stretch of ACC battles tonight when it hosts UnC Wilmington at 7:30. But the Wolfpack mustn't take this game lightly and look ahead to Saturday's skirmish with North Carolina.

The Wolfpack is expected to have not only a home-court, talent and a size advantage, but should also have the aid of the ACC's 30-second clock and the three-point line.

"This is another important week for us as we get down the final stretch," says State coach Jim Valvano, whose squad is 13-8 coming off a 43-42 heartbreaking loss to Notre Dame Saturday. "We had won five of our last six games before dropping that one-pointer to Notre Dame. We did that by playing hard. We must continue to play tough and with determination. We're in a stretch run now, and every game is important.

"The Wilmington game is a must for us. People may think we'll be a little bit down, but we plan onto theing down. We plan to give the same effort as we have lately."

The Seahawks, a Division I independent, will bring a 9-12 slate to Reynolds Coliseum.

Their tallest player, senior center Scott Prudhoe is 6-7 and averages 6.2 points per game. Only one inside player, 6-5 junior forward Carlos Kelly, averages in double figures with a 10.3 clip. Terry Shriver, a 6-4 junior forward leads the team in rebounding with a 5-9 average, while hitting at a 6.3 socring mark. UNC-Wilmington is strongest in the backcourt, where senior guard Shawn Williams leads the team in scoring with a 16.1 average. Junior guard Tony Anderson scores at an 11.2 rate per outing.

State leads the brief series, 3-0, with its last victory coming last season, 77-43.

Statistically, the ACC rules have been State's most potent weapon, scoring-wise. According to State's sports information office, in 13 games played under the NCAA rules, State has averaged 85.5 points per contest. In the other eight games, played under the NCAA rules, State has averaged just 49.9 points per game, a difference of 35.6 points per

#### Women tankers to host ACCs

State's hard-luck women's swimmers will be hoping for a major change of events Thursday when coach Bob Wiencken's team plays host for this year's ACC Championships.

More than a rightful share of misfortune has befallen Wiencken's squad recently, and he hopes things can be turned around in the conference meet.

Senior co-captain Kelly Parker is coming off an illness, and backstroker Patri Pippin is still questionable for the meet.

"It will be a big blow to us if Patti is unable to swim," Wiencken said. "We would have to change a number of relays."

Defending champion North Carolina is favored to capture the three-day event once again. According to Wiencken, State should end up in a dogfight with Virginia and Clemson for second place.

"The real excitement will be the race for second," Ill meets between us, Virginia, and Clemson during the regular season, the home team has won every time. Luckily, we'll have the home-pool advantage."

well have the home-pool advantage."

A major obstacle for the Wolfpack will be overcoming an obvious lack of depth. Wiencken's roster only lists 13 swimmers and divers — including Pippin. The top 12 places in each event will be scored, so State is at a definite disadvantage.

antage. State's senior co-captain

Beth Emery is the only defending individual conference champion returning for the Pack, and the results will greatly depend on another strong showing

from Emery.
"We'll be counting heavily on our co-captains — Beth and Kelly," Wiencken

said.

Hope Williams and Tricia
Butcher. the Pack's outstanding freshmen duo, will hopefully perform well in their first conference meet. Although freshmen, Wiencken feels they will come through.

"You hate to put a lot of pressure on a freshman," Wiencken said. "But I think

they can handle the pressure, and do a good job for us. I look for them to score a lot of points."

Also scoring for State should be freshmen divers Jackie Devers and Susan Gornak. Coach John Candler's pair has consistently won or placed throughout the season.

Beating the Tie. Heels may be a little too nuch for wiencken's team, but a second place showing is extended to the season. Beating the season will also be looking for a number of his swimmers to qualify for the NCAA Championships to be held March 17-19 in Lincoln, Nebraska.

#### Gridders get wrist slap as ACC issues reprimand

(UP) — The Atlantic Coast Conference has publicly reprimanded State for recuting violations during the 1981-82 school year, NCSU Counsel Clauston Jenkins said Monday.

Jenkins said ACC Commissioner Robert James told the university by letter that the conference voted 7-0 to reprimand it "for violations of the NCAA Contact Rule and for providing more than the allowable number of campus visits to a prospective student-athlete."

Jenkins said State's own investigation indicated the school violated the rules in the recruitment of one player. Former football coach Monte Kifin has identified that player as Reggie

Singletary, a defensive tackle from the Whiteville

Jenkins said the universi-ty would not comment fur-ther on the matter because State must appear later this month before the NCAA's Committee on In-fractions.

James was not available for comment, but State Chancellor Dr. Bruce Poulton told Raleigh's News and Observer Monday that he was not surpris-

"To be truthful, we were expecting that," Poulton said. "I am obviously unhappy with it, because it is an embarrassment to an otherwise outstanding university."

## Pack returns favor

Tom DeSchriver Sports Writer

Angie Armstrong came out and played the type of game State fans learned to expect of her in years past. Behind Armstrong's careerhigh 28 points, the Wollpack women's basketball team took revenge on North Carolina Tuesday night in a 97-82 win that was really closer than the score indicated.

Armstrong scored eight points in the last 2:30 of the game, including three

points in the tast 200 states are including three breakaway baskets, inflating the score to the final 16-point margin. Linda Page scored six of her 20 points in the final minutes, including one breakaway basket of her own.

"I thought Angie played just great," said State coach Kay Yow. "She's really a ball of fire. She played hard at both ends of the court. It seems that she could go on forever. I think she was the difference in the two games," Armstrong hit 13 of 19 shots from the floor, including an assortment of twisting and spinning moves down the lane and along the baseline to put up layups over the tall UNC frontline. Seven of Armstrong's buckets came on breakaways, and two more Armstrong fast breaks were broken up by Tar Heel fouls.

The win avenged a 68-68 sebtack to UNC. Jan. 18 in Chapel Hill. The senior point guards' inspired play Tuesday made amends for what Yow called a laid back performance on Armstrong's part last month in Chapel Hill.

The Wolfpack took a nine-point lead into the dressing room at fautting.

dressing from at hadtine, a lead that would have been much greater had it not been for a severe-for-eight shooting performance and 16 points by Tar Heel center Treas Brown.

Brown finished with only 19 points for the game, and Yow credited a halftime defensive adjustment as the key to keeping Brown in check in the second half.

"We tried a box-and-one on defense, but we were so aggressive we couldn't get the box packed in." Yow said. "So we decided to go with our two-three zone and pack it in."

Yow was pleased with the way the Pack was able to get the ball inside, a part of the offense she has streased in recent weeks. Especially tough inside for State were center Priscilla Adams and forward Claudia Kreicker, who scored 15 and 14 points respectively. Kreicker also chipped in with four steals, while Adams hit the offensive boards for five of her six rebounds.

"I thought Claudia "It hought Claudia"

boards for five of her six re-bounds,
"I thought Claudia Kreicker did a great job in-side," Yow said. "She just wants to bust loose one time. She is one of the hardest workers and most dedicated players on the team. I couldn't be happier-

that she had a really good game tonight."

North Carolina scored the first basket of each half, but that was the only bright spot for the Heels. An 11-3 spurt which began four minutes into the game gave the Pack an eight-point lead, and the two teams played fairly evenly the rest of the half.

With 9-45 left in the game, the Pack scored three quick baskets to open a 14-point lead. At 6:13, UNC made its final run, scoring four straight baskets to cut the lead back to 10 points.

scoring four straight to 10 points.

That was the closest the Tar Heels would get, for the Wolfpack defense forced a flurry of turnovers which led to breakaway baskets and blew the game open. During that threeminute stretch, the Wolfpack outscored the Tar Heels 16-4, giving State a crowd-pleasing 20-point lead, 95-75, with 0:56 remaining.

That victory-sealing run gave the Wolfpack its 17th win of the season against six losses. The win also moves the Wolfpack win of the season against six losses. The win also moves the Wolfpack one step closer to wrapping up the top seed in the upcoming ACC tournament. State is now 9-1 in conference

play, one game ahead of Maryland, which comes to Reynolds Coliseum Saturday seeking revenge in a 7.30 p.m. showdown.

The Wolfpack spoiled the Terps hopes of an unbeaten season, beating them 76-71 at Cole Field House Jan. 29. Yow said that the Maryland win was the catalyst for the Wolfpack's current stretch of good play.

"Since the Maryland game, we've played at a higher level and with more consistency," she said. "That was the first game we put together 40 minutes of overall good play. We talked about maintaining the level of play that we've been playing the lest weeks."

Wolfpack scoring leader Linda Page played a fairly routine game statistically routine game and rou

#### Interesting things found in old S&S magazines

#### BRUCE WINKWORTH

When I was a kid. I began buying, and saving, sports magazines, hoping they would someday have something more than just aesthetic value. So far, they would someday have a something more than just aesthetic value. So far, they would someday have a following the something with the way of dollars and cents but they are loads of fun to dig out and look through. The very first Street & Smith's basketball annual came out during the 1970-71 season, and I managed to buy that and every one since. The other night, I pulled out the ones from the early 1970s to see what the guys at S&S were saying about the state of the game. If you're into recruiting, it should be duly noted that David Thompson did not make the S&S high school all-America squad his senior year of 1971. Over the years, in fact, there have been some very strange entries and omissions in high school all-America lists. On its 1973-74 pre-season high school list, Street & Smith listed a first team of Ellis Files, Fuec Campbell, Moses Malone, Don Williams and Mark Wulfemeyer. Ellis Files, Fue Campbell, Moses Malone, Don their second through sixth teams, S&S included the likes of Earl Evans,

Lucius Foster, Terry Drake, Leon Baker, Steve Malovic, Kea Koenigs, Lovelle Joiner, Jim Hardy, Chris Patton, Mike Mitchell, John Long and Alan Wise. Wow.

Giving credit where credit is due, S&S did manage to include Phil Ford, Mike Phillips and Jackie Givens, but only the mothers of those other guys could tell you what became of them.

Those of you who are recruiting fanatics should take note of this. While 1973-74 was an unusually slow year for high school prospects, the point here is that high school all-America lists and recruiting scoops do not deserve anywhere near the ridiculous amount of attention they get.

I'm sure there were people in the ACC area just drooling to get Mike Mitchell to attend their school, yet rumor has it that Mike is now working in one of those drive in film developing booths at a shopping center in his hometown of Atlanta.

Street & Smith did include on its honorable mention list some pretty good players in 1978-74. Among them were Rick Robey,

## Final event rescues Heels

In front of a cheering crowd, the State men went to the final race before losing a 59-54 decision to North Carolina in swimming Tuesday night. After the lead switched places four times, the score was State 54, North Carolina 52 entering the 400-yard freestyle relay. State between the second but that was not enough to hold off the league's fastest time by more then two seconds but that was not enough to hold off the league's fastest time by the Tar Heels.

State led after the first 100-yards of the race by only a slim margin. In the second leg. North Carolina made a comeback but it was only enough to get them about the same margin state had enjoyed after the first leg. The third and fourth legs were two of the closest 100-yards to call. It was meck-to-neck after the touch for the fourth swimmer. State's final swimmer had a slight lead after the first 50 yards and stayed with North Carolina all the way to the touch. The Tar Heels finishing time for the event was 3:05.800 and State's time was 3:05.800.

less then three-10ths of a second behind. The four swimmers on the relay team were Todd Dudley, Craig Engel, Jon Randall, and Rocco Aceto.

The meet was highlighted by two swimmers taking two individual honors. Eric Wagner, a freshman from Merced, Calif., easily won the 200-yard individual medley with a time of 1:264.155 and the 200-yard breaststroke with a time of 2:208.561. Glen Barroncini was the only Wolfpack diver to take both boards. He won the one-meter diving by 32 points and the three-meter diving by 39 points.

This was also a very special meet for three State seniors, Sean Dowd, Bob Menches, and Peter Solomon. Sean Dowd Had an excellent meet. While not scoring he still had some outstanding times. Dowd is none of the oc-aptains of the team and is from Andover, Mass. Bob Menches, from Cary, brought the crowd to the North Carolina swimmer the whole 40 laps until be began to sprint the last 100-yards (4 laps). He led

going into the last 50-yards then took over completely with one lap to go. His winning time in the event was 9:32.43, just nine-10ths of a second ahead of North Carolina. The last senior and other co-captian, Peter Solomon, from Riverside, R.I., had one individual second place in the 200-yard backstroke with a time of 1:55.503 and swam a leg on the second place 400-yard medley relay.

For State this was

the second place according to the medley relay.

For State this was a tough loss. It brought its overall record to 7-2 and ACC record to 3-2. The Wolfpack lost the first race, so they were down 7-0. Then they came back to win the next five events and take the lead 30-22. The lead started changing hands at that point, and after the diving, which State took one-two, all they needed to do was take first and second in the 200-breaststroke to win the meet. They got the first half but not the second to take the meet into the final event.

"I had a lot of fun in this great meet," said assistant Wolfpack coach Roger Debo, who is filling in for

head coach Don Easterling during his illness. "We are looking good toward next week the ACC Championshipsl and I have more confidence in our guys after watching them tonight. We looked very strong."

With this victory the Tar Heels bring their record to 5-3 overall and 3-1 in the ACC. "I expected it to go down to the final race." said North Carolina coach Frank Comfort. "We had planned for this to be the deciding race all week. It was a great race and it did not make a difference what the time was. It was just a great race. I am very thankful that we won the meet."

The individual first place

that we won the meet."
The individual first place
winners for State were
Aceto, Barroncini, Dudley,
Menches, and Wagner. Also
placing in individual events
were Joe Fessemmeir, Tom
Neunsinger, Kevin Oyler,
Jon Randall, Solomon, and
Jeff Trowbridge.

Both State and North Carolina have the rest of the week off in preparation for the ACC Champion-ships. The Championship, which State has won for the last 12 years, will be held at Duke, February 24-26.

## Time running out on shot clock

by William Terry Kelley Sports Editor

For ACC basketball fans

this season, games have fallen under two categories — games with the clock and games without the clock. State has fared better

overall playing with the clock this year. Unfortunately, one of those dreaded non-clock games came Saturday afternoon in the Pack's 43-42 loss to Notre Dame.

The Pack as 43-42 loss to Notre Dame.

The Pack has continuously been able to get better play out of certain people in games using the 30-second shot clock this season. Players like freshman Ernie Myers and senior Thurl Bailey seem to fare far better by playing an up-tempo game. Ironically, State may have to rely on wins with a clock to get to post-season play where there will be no clock — in either the NCAA or the NIT.

There are other players who are unaffected by not having a clock but play better with one. Senior Sidney Lowe seems to be undaunted by the use of the clock or lack thereof. Then there's Lorenzo Charles. He seems to be adjusting to the slower tempo in every game he plays without it.

"I feel like I'm getting more comfortable with it," asid the State freshman who led the Pack with 15 points Saturday. "If we domake the NCAA or the NIT, they!" I play with NCAA rules. We've got to top thinking about the clock. I'm trying to get more consistent. I think I'm working toward that goal in wy game."

For the Pack it has been a season of highs and lows as well as up tempos and down tempos.

"It's unconfortable," State head basketball coach Jim Valvano said, "That's what we definitely thought about

with this game after our Clemson game, especially the way we've been playing. It was important that we get a lead, which we didn't. This is not our style. We had to make the tempo. If you know you're going to have to shoot, you don't have to create something." Balley said the up tempo is easier on some of the bigger guys.

Bailey said the up tempo is easier on some of the bigger guys.

"With the clock, you go up and down a lot," said aliely, who has been slowed by illness the last couple of games. "Some of the big guys get fatigued. When you slow it down, the big guys don't get as tired. There's really some good and some bad with and without the clock.

"We've played good with and without it. Without the clock. I can post up and get the ball inside and soore. If we get into a game with a team that runs its offense over and over, we can get into trouble. I think were getting used to it. It depends on the type of team you're playing. You can let them control the tempo."

Even in a loss. Lowe felt

team you're playing. You can let them control the tempo."

Even in a loss, Lowe felt the team is improving on play without the clock.

"I think each game we play without the clock helps us," he said. "Lorenzo is a big guy, and he likes to slow it down. When we start running up and down he gets a little tired. He had a super game. He's coming along. Ernie is getting to where he knows what he has to do. He knows that each possession is valuable and he's done a super job.

"I think I can play either way. I hated Saturday's game. I like to go up and down the court. There's-no excitement in it (a slow game). We don't like this

type of game. We've got guys who like to run and shoot. We need this kind of game, though. If we get into post-season play, we have to slow it down."

As far as coaching goes, there may be just as much involved, but it takes place at a different time.

involved, but it takes place at a different time.
"With the clock you have to do more coaching in practice," Valvano said. "You run your offense in 30-second segments, and you have to be more prepared to execute. Playing without the clock offers more time to coach on the sidelines."
Charles netted 12 points

sidelines."
Charles netted 12 points for the Pack in 33 minutes Saturday, He usually has to have more rest than that. The 12 points is a career high. Not surprisingly, his previous high was 11 in another non-clock game. Memphis State.
"Charles plays well in a half-court game." Valvano said. "He played well against Louisville, Missouri and Memphis State. Really though, it's easier for us in an up-tempo game."
For the Pack, it is welcomed news to see Myers coming on in games of a slower tempo. Recently, there was debate over whether the rules should be used in the ACC Tournment. Last year's tournament Last year's tournament finals with Virginia and North Carolina is one reason that the rules were instituted. ACC rules will be used in the Tournament. Regardless of whether they should or shouldn't be, the Pack vill have to see them in post-season play if they have any intention of going. The picture looks bleak for the clock next year as the NGAA has ordered conformity throughout next

## McGuire passes test after Wolfpack crash course

When Al McGuire arrived in Raleigh, Thursday might, he knew two facts about State basketball. First, the Wolfpack had beaten his Marquette team in the NCAA finals in 1974, and second, Whitten... what's his name?' had broken his foot.

Forty hours later, McGuirer attled facts off to a national television audience about State and Notre Dame players as if he had known them since their all-star days in junior high. McGuire and play-byplay man Dick Enberg make up the NBC team that covers college basketball. McGuire's job is to analyze the game and provide the expertise which took him to a national championship in 1977 over North Carolina.

The other half of McGuire's job is to provide the interesting tid-bit facts which keep the audience awake and the trivia fans scurrying to the record books to verify his statements.

McGuire's preparation or a game is unique and gives a new definition to the term 'filing-system'.

He soaks information from any source and writes it on anything.

McGuire's briefcase buiges with envelopes scraps of paper and anything else he can use to write down a piece of information useful to a broad-

mation useful to a prose-cast.

Two hours before
showtime, McGuire pulls all
his notes from his briefease
and begins to assemble the
information gathered in the
past 38 hours.

Most of his facts on the
State team are scribbled on
a hotel envelope. McGuire
reads off facts he's not quite
sure of.

reads our facts he's not quite sure of.

"Lowe and Whittenburg went to high school together. It was at Dematha, right?" McGuire asks.

The listener nods his head.
"Okay, Charles and Bailey are the forwards, and the center is...is," McGuire asks.
"McQueen," the listener responds.
"Okay read me this article on Paxson," McQuire asks the listener. "I might be able to use something from this."
The listener reads the ar-

sass the instener. I might be able to use something from this."

The listener reads the article while McGuire changes into his game suit. After reading that Paxson's dad played in the NBA and was the third draft choice behind Bill Russell and Tommy Heinsohn on the 1956 draft, McGuire comes to life.

"That's good. I can use that," McGuire can use that," McGuire aays. "Write that down. Dick will never get that."

It's obvious that McGuire kaeps pride in stumping the play-by-play man.

An hour before game time, McGuire heads to the press table to rehearse the press that and the says, pointing to Enberg, who's splitting his time between talking with engineers and shooting the bull with just about everybody.

Enberg's time is valuable and wanted by everyone; he to be broadcast, McGuire stands by, going over facts and signing autographs.

As air time approaches, the TV Al McGuire

As air time approaches, the TV Al McGuire awakens.

awakens.
While still joking and kidding around, McGuire tenses, and he blocks out the fans shouting at him that State is the Wolfpack, not the Tar Heels.

Banquet Rooms Available at no charge

"Homemade breads & pies"

Monday - Saturday 11:00-2:15 4:00-8:00 512 Daniels St. Sunday 11:00-8:00 Cameron Village

McGuire says what is on his mind and does whatever he feels like, which makes basketball fans either love or hate him.

Now look here, Dick.

Making a point!

or hate him.

Ever the showman,
McGuire made friends
when a chant for Billy
Packer started through the
crowd at halftime. McGuire
turned to the crowd, waved
at them jokingly and
mouthed "ah, come on."

Minutes later, a 'we want Al' cheer went through Reynolds Coliseum.

As if forgiven for his past sins against ACC basket-ball, McGuire didn't wait long to give ACC fans another reason to buy an Al McQuire voodoo doll.

Midway through the se-cond half, NBC flashed McGuire's list of the toughest conferences — the ACC tied for third place — which immediately in-furiated fans sitting direct-

ly behind the NBC-TV monitors at McGuire's table on press row.
"You gotta be kidding Al," a fan said. "Why don't you try again."
McGuire never flinched, never moved. He was obsessed with the game. McGuire is more than just a commentator when he does a game, though. With every missed basket, excellent pass or skying rebound, he fights to hold back a cheer.
He's not a fan for a certain team, he's a fan of the game.
After Lorenzo Charles

game.
After Lorenzo Charles
missed a follow-up layup.
McGuire jammed his pen in
his notes.

Perhaps to show no favoritism toward the Pack. McGuire shook his foot in nervous anticipation while McGuire shook his foot in nervous anticipation while describing what State had to do to get the ball back. The watcher got the feeling that McGuire didn't care who won the game, but rather how it was played. The game finished, McGuire knew that one job was down, but he had one more to do. He and Enberghad less than 24 hours to prepare themselves and do it all over again Villanova had beaten the weather and was to play North Carolina the next day.

## Adams ignores norm, becomes freshman star

by Tem DeSchriver Sports Writer

The freshman year in col-ge usually represents a ear of learning and aiting for the student-

waiting for the student-athlete.

The newcomer faces the challenge of being away from home for the first time challenge of being away from home for the first time with no mommy to run to when things go sour. School is more difficult, and the athletes are bigger, faster and stronger than the ones encountered during their prep days.

Coaches pray that their young stars can mature fast enough to help in their rookie campaign, but few do, and the first year is spent learning and watching the veterans.

Exceptions do occur, and the Wolfpack women's basketball team has found a the Wolfpack women's basketball team has found a freshman who has worked her way into the starting lineup and made a valuable contribution.

Granted the maturation

contribution.

Granted, the maturation of Priscilla Adams took a while, and it is still going

Adams started the year like all freshmen — on the

As 1982 faded into 1983, As 1982 faded into 1983, Adams began to see more playing time, and the reason was simple — she could rebound.

At 6-1, 190 pounds, Adams holds her own under the boards with the most seasoned of veterans.

"It's her board work that got her into the lineup," Wolftack cash Kay Volftack cash Kay Volftac

Adams worked her way into the starting lineup mid-way through January and has led the Pack in reboun-ding four of the last eight

games.
Three times this season, the Ringgold, Ga., native has snagged 11 rebounds in

the Ringgold, Ga. native has snagged 11 rebounds in a game.

While most highly regarded freshmen possess the physical tools to play college ball, that usually isn't enough. Adams was recruited by national powers Tennessee and Maryland, but she still had to pay her dues.

"It's hard to find a freshman who plays with the intensity that Priscilla has been playing with for us." Yow said. "She plays hard and thinks all the time. That's why she's improving so quickly."

Yow enjoys talking about her prize frosh, but a note of surprise can be detected regarding Adams' success this season.

"In ever really thought of

this season.
"I never really thought of her starting this year."
Yow said. "I thought she was a person who could help us this year. With her strength, we thought she could get some playing time."

Adams' play on the boards brought her to Yow's attention, but Adams has worked on the other facets of her game.

racets of her game.
"It was her board work
that got her in the lineup."
Yow said. "Then she improved on her defense, and
that got her more playing
time. Then she started to
improve on offense, and

While Yow talks with great pride of her freshman, Adams is quick to credit her coach with this

to credit her coacn with this season's success.

"At the beginning I wasn't talking and contributing," Adams said. "I talked to her (Yow), and she really got the desire out of me. The desire to show my coaches and my teammate how I can help."

Help is a big word in Adams' vocabulary as evidenced by her career goals.

evidenced by her career goals.

"My major is criminal justice," Adams said. "I want to work with juvenile kids in a correctional in-stitute."

Adams, the next to youngest of four sisters and a brother, has seen the pro-blems that kids can get in-

blems that kids can get into.

"A lot of kids living in a
city like Atlanta get into
trouble," Adams said. "I
just love kids and want to
help."

While a few years away
from helping children,
Adams knows there is more
she can do to help her teammates.

Adams knows there is more she can do to help her teammates.
"I still have a lot I can work on," Adams said. "I can always find something on defense to work on. I can help out more on defense than I am."
With the pressures of defense and rebounding placed on Adams, the rookie has gone into a slump at the offensive end of the floor.
"I'm not scoring enough right now," Adams said. "I gotta work on that. I'm not sure what happened."
Yow feels that Adams' offensive problems stem from uncertainty, but Yow is confident that Adams will

hoop team.
pull herself out of the
slump.
"She's getting some good
shots that she should be
putting down," Yow said.
"She's shooting some off
the board and some on the
rim. She's gotta make a
decision one way or
another.

those shows and the mow."

Even though Yow is pleased with the way Adams is playing, she may be even happier that she has Adams at all.

"I was recruited for soft-

ball by Florida State before I was recruited for basket-ball," Adams said. "I wouldn't have minded going to Florida State and playing softball, but I was so impressed with State and a comment that coach Yow made.
"She told me that if I

played softball (on a softball scholarship), there would be no more basketball."

Adams, a first and third baseman, will play softball this spring for State, and Yow will probably be at every game with a hoop beyond the left field fence for Adams to shoot at.

#### Men gymnasts stop W&M; women edged by Duke

John Cooney totalled 52.50 points to lead State's men's gymnastics team to a 256.75-293.45 victory over William & Mary Saturday in Carmichael Gym.

Coach Mark Stevenson's Wolfpack women had ar rougher time with ACC-foe Duke Saturday, being edged 172:199.9 to the Blue Devils.

Rick Crescini was also a

tory, racking up a 51.15 total. Other State participants included Tony Horneff, Greg Blanchard, and Doug Ernst. The men are coached by Sam Schub.
Leah Ranney led State's women with a score of 34.95. Vicki Kreider finished at 34.1, Angela Ragan 34.05 and Colleen Bosnic 33.7.

33.7.

Duke was led by Rona Riggs with a\34.95.

## Will Ralph become best player ever?

College Basketball Review

AL **MCGUIRE** 

WELCOME to Miller Time

Sports Columnis

Ralph Sampson will be the greatest basketball player who ever lived. But it won't happen overnight; it'll be five or six years down the road.

The reason for this is that he comes from a very small town in Harrison-burg, Virginia, and has been relatively cloistered at the University of Virginia. He's never had the opportunity of a Kareem Abdul-Jabbar in the Big Apple. a Wilt Chamberlain in the City of Brotherly Love, or a Bill Walton in Tinsel Town, where they played against college and pro players on local playgrounds while still in their teens.

That kind of competitive edge matured them to reach their potentials early in life. But once Ralph gets his competitive edge through pro ball, hell be the greatest big man that ever played hoops. Great basketball players are made from April through October, not November through March. That's when they get the edge on the competition.

Another reason Ralph is going to need some time is because his upper body strength is only now coming through weight training and age. When you're 7-4, all the vitamins go vertically rather than horizontally.

ly rather than horizontally.
But Sampson is awesome:
There is no glaring
albatross in his arsenal.
He's mobile and quick off
his feet. He intimidates. He
can one-man zone the paint
(free throw lane), and on the
offensive end he can bottom
it out from 18 feet. He can
play facing-or with-his back
to the basket. And, he can
put the ball on the floor.
I think, if there is a Nobel
Prize out there for setting
examples for young people.

sports Columnis
it should belong to Ralph
Sampson. He truly has put
the degree ahead of the
moola. Red Auerbach
(president and general
manager of the Boston
Celtics) offered him
\$400,000 after his
freshman
year; Dallas offered
\$800,000 after his
sophomore year. And last
year, the Los Angeles
Lakers offered him MGM,
Warner Brothers and Columbia Pictures.

But give the kid credit. He's living in the age he's at, enjoying the moment he's in. Not enough people do that.

Another thing. He's get-ting a degree in communica-tions, and it's no back door or side door thing. He's got one of the prestigious rooms on the lawn.

After he leaves, Virginia goes back to a nice, comfortable, academic environment again. They've had their run, won the NIT, been to the Final Four of the NGAA. And I believe they'll be taking their last heavyweight trip to Albuquerque, New Mexico, for the Final Four in late March.

Sampson is a lot like Kareem — quiet, intelligent, his own man. He likes to cook spaghetti, he makes some of his own clothes, likes to play soft ball on a mixed team, guys and girls.

and girls.

The closeness of his family is unbelievable. I spoke to his mother once. She's a cutter in a pan factory. She told Ralph, "If you want to stay (in college)—another year. I'll work another year in the pan factory." Thanks, Mom. But after this year, they could own that pan factory.

## Thompson became great player without track

Winford Boynes, Pat Cummings, Butch Lee and Kyle Macy. But for every Phil Ford or Moses Malone mentioned, there is a Mike Mitchell or Ellis Files who deserves to go unmentioned, and a David Thompson or Jim Spanarkel who deserves to be mentioned but isn't.

**DAYTONA INN BROADWAY** SPRING BREAK

**HEADQUARTERS** 

and reservations 1-800-874-1822

DAYTONA IN BROADWAY

A decade ago, State's basketball team was cruising along with a 19-0 record. 80 in the ACC, and a No. 2 national ranking. Street & Smith's didn't have a preseason Top 20 back then — I guess their high schoolistings were bad enough — but they did attempt to predict the outcome for each individual conference. In the ACC, S&S predicted a second-place finish for the Wolfpack behind Maryland. Of the Wolfpack's incoming sophomore Thompson they said, "Thompson may be one of the finest athletes in the history of the ACC, depending of course if he decides to extend his numerous talents to track and field."

Thompson somehow lived up to that prediction

and field."

Thompson somehow lived up to that prediction without setting the track and field world on its ear. Street & Smith went on to say that Thompson had all

turning over the ball with absolutely no coercion at all from the UNC defense.

On Feb. 14, Villanova resisted the temptation to repeat the Cavaliers' collapse and beat UNC 68-53 at Chapel Hill. Still, that doesn't change the fact that with their win over Virginia. North Carolina has now defeated 17 consecutive ACC opponents.

That's still a bit shy of the league record, but with xix regular season conference games, three possible ACC Tournament games and the NCAA playoffs left, the Tar Heels could run that streak to 26 or more by the end of the season. That is too close to the record.

The record is 32, set by State during the 1972/3 and 73-74 seasons. The Wolfpack won the Big Four and ACC Tournaments both years in addition to going 24-0 in regular-season league play. Many people thought that record would stand for a long time, and it should. But somebody besides Villanova needs to deal with the Tar Heels before too long.

Anyone who saw North Carolina beat Virginia last week must have wondered how it happened. The Tarleels played one of their worst games in years and still beat a Virginia team that played extremely well for 30 minutes. It's the other 10 minutes — the last five in particular — that did in the Wahoos.

It was reminiscent of the old joke about the football team that went home at halftime after building a huge lead. The other team scored five minutes later, and that's about what happened to Virginia. With five minutes to go, the Cavs started boarding the team bus for the ride back to the airport.

The most incredible thing about that game was that Virginia blew most of their lead in the final five minutes while called the short of the time when a team is supposed to be able to sit on a lead, but Virginia began
