Incredibly viscous clouds will hover in your face this morning, with upwards temperatures in the mid 40s. 70 percent chance of a deluge of downwardly mobile rain particles today and Tuesday. Light winds will surreptitiously blow across the land as well.

Board names Valvano AD

Tim Peeler
Sports Editor

The Board of Trustees, as speculated, quietly and unanimously named head basketball coach Jim Valvano as athletics director (AD) Saturday in their regular meeting.

Effective July 1, Valvano will replace Willis Casey, who announced his resignation in November after 17 years as State's AD.

A statement released by Chancellor Bruce Poulton said, "Coach Valvano will continue as head basketball coach for an indefinite period, at least through next season and until he hires a new head basketball coach."

Though the university statement sounds as if Valvano will step down after next season, the coach refused to speculate. He plans to do both jobs until one interferes with the other.

"If it ever got to a point where I felt that I was not competent at both jobs or in some way thought that holding both jobs was detrimental to any aspect of the athletics department, certainly I would think about not coaching," Valvano said Saturday after State's 76-64 win over 16th-ranked Louisville.

"I can't give you a definitive time when that will be. I just think I can do both things."

But according to Poulton, Valvano will likely step down soon.

"It is not our intention for him to handle both jobs on a permanent basis," the chancellor said after

Saturday's meeting. "It's conceivable but not highly likely."

Valvano said, "That's 100 percent true. But you have to go back to it's an indefinite period. We haven't done this before. We have to do what's in the best interest of our athletics department, our university and to all our sports."

"If it became apparent that I was not getting the job done, we would have to look at that."

Valvano, who was both basketball coach and AD at Iona College before coming to State six years ago, said being able to continue coaching was a key in his decision to accept the Wolfpack AD post.

He plans to use the dual role to project a new image into the university's athletic program.

"To be honest with you, we've had some problems here since I've been here the last several years," the 39-year-old coach said. "I think it's important that we start spreading the good news about North Carolina State athletics and the success we've had here."

"I have a unique opportunity as

Three more hours added to next year's visitation policy

Jeff Cherry
Staff Writer

The Board of Trustees, in addition to appointing basketball coach Jim Valvano as athletics director, also approved Saturday the residence hall visitation policy for next year and endorsed stricter academic standards for freshman athletes.

After a 15-minute meeting with Chancellor Bruce Poulton, the board's Personnel Committee announced without discussion the appointment of Valvano, who will replace Willis Casey on July 1.

The board then heard the report of the Student and Campus Affairs Committee on the 1986-87 visitation

policy. Board member Troy Doby asked if student input had been considered in the drafting of the policy, reminding the board that the policy would affect all the students in a way never experienced by the board members.

"In my days (at State), the only thing you couldn't do was kill somebody," Doby said. "This (policy) won't affect a single one of us."

Student Body President Jay Everett responded that a large amount of student input had gone into the policy and noted that a tremendous drop in crime has occurred in Bowen, Carroll and Metcalf residence halls, where enforcement of this year's policy has been greatest.

After Chairman Jim Hackney noted that the Student and Campus Affairs Committee was empowered to change the policy at a later date, the policy was approved unanimously.

The main provisions of the visitation policy include requirements that visitors to a residence hall be escorted by a host at all times and that overnight guests be registered with a resident adviser or other staff member. Visitation hours are 9 a.m. to 1 a.m., Sunday through Thursday, and 9 a.m. to 2 a.m., Friday and Saturday. They begin three hours earlier than the visitation hours in this year's policy.

The relationship between athletics

and academics was the hottest topic of discussion; as both Everett and Faculty Senate Chair Sandra Kirsch urged board members to take steps to dispel State's image as a school giving athletics priority over academics.

"Let people know that academic integrity is alive and well at N.C. State," Everett said.

Kirsch said the negative image of State's intercollegiate athletic program played a role in the rejection last fall of State's bid for a chapter of the national honor fraternity Phi Beta Kappa.

"We were not rejected because we were unworthy... and that's what hurts," she said.

Poulton added that the rejection of

State's bid on the floor of the Phi Beta Kappa convention was the first rejection of a recommended school in 12 years. Kirsch mentioned "denigrating comments" with regard to State athletics just before the floor vote as a factor in the rejection.

Kirsch responded to board members' queries by identifying representatives from Duke and UNC-Greensboro as the ones who had made some of the comments. After board member Clarence Lightner suggested making a better effort in the future to inform State's sister institutions of the facts, Doby responded, "They know the facts; it's a question of what they want to do with them."

In other business on Saturday, the

board heard a report from Director of University Relations Al Lanier on planning for the celebration of State's centennial, to take place from July 1, 1986, to June 30, 1987. He said a steering committee chaired by Chancellor Emeritus John Caldwell had been formed and that a logo and slogan had been developed.

Also, Karen Peterson, executive assistant to the chancellor, presented the board the final report of the University Planning Committee on the university's Dix Hospital property. Peterson said the report contained 71 proposals related to the mission of the university that had been categorized into five broad areas and ranked in order of priority.

Study shows out-of-state transfers fare better academically than in-state

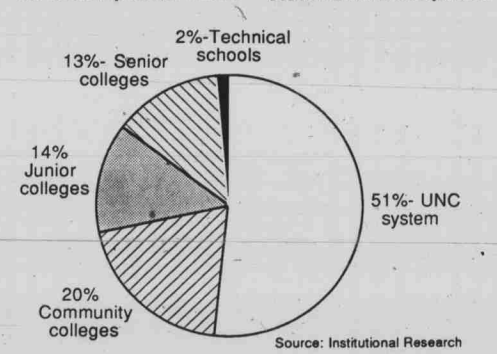

Joe Galarneau
Assignment Editor

A recent report by State's Office of Institutional Research on transfer students showed that out-of-state transfers performed significantly better than their in-state counterparts.

The average grade point average (GPA) of the 360 out-of-state transfer students at State was 2.54, compared to the 2.36 GPA of in-state transfers.

Also, a lower percentage of non-North Carolina transfer students withdrew or were suspended from the university.

The report also detailed the types of institutions that transfers came from in the state. Over 79 different public and private schools were identified. The highest average GPAs came from Wake Forest (3.2), UNC-Chapel Hill (2.99), UNC-Charlotte (2.81), North Carolina A&T (2.75) and UNC-Greensboro (2.74).

Black History Month festivities underway

State's celebration of Black History Month during February will offer a variety of events for the public, including drama, dance, lectures and photographic exhibitions.

Highlights include a student production of *For Colored Girls Who Have Considered Suicide When the Rainbow Is Enuff* today and a lecture by its author, Ntozake Shange, on Friday. Sponsored by the Black Students Board, the play will begin at 7 p.m. in Stewart Theatre. Admission is free and the public is invited.

Shange will lecture Friday in Stewart Theatre at 8 p.m. The lecture is free to students and \$1 for others. For more information about the play and lecture, call 737-2451.

A photographic exhibition, "Spectacular Vernacular: The Traditional Desert Architecture from West Africa and Southeast Asia," is on display through Feb. 16 at the Student Center Gallery.

The exhibition, organized by the Smithsonian Institution Traveling Exhibition Service, consists of 93

color and 38 black-and-white photos documenting mid-style building.

On Feb. 19, film director Billy Woodberry will screen and discuss his film, *Bless Their Little Hearts*, a cinematic portrait of an urban black family man who is thrown into unemployment. The film is at 8 p.m. in the Erdahl-Cloyd Theatre on the second floor of D.H. Hill Library. The film and lecture, the first event in the Southern Circuit '86 tour of independent film and video makers, are free.

The Alvin Ailey Repertory Ensemble will perform Thursday at 8 p.m. in Stewart Theatre. The company performs a range of dance styles that include jazz, classical and modern.

Saturday at 8 p.m. in Stewart Theatre, Daedalus Productions of New York City will present Ntozake Shange's play, *Spell No. 7*, a celebration of black life.

Call the Center Stage box office at 737-3104 for more information.

Group looking to improve suture knots

Bob Cairns
Information Services

Researchers at State are working to untie one of surgery's knottiest problems.

In a cooperative research venture, a team headed by a textile scientist

is attempting to improve the security of suture knots, one of the most unreliable elements of the surgical process.

"The surgical suture is the principal method of holding repaired or torn tissue together, and weakness or slippage in knots is of great

concern in the medical field," said Bhubender Gupta, professor of textile engineering and science.

A goal of the team - which includes Dr. R.W. Postlethwait, a Duke University surgeon, as adviser - is to find ways to produce a simple

square knot that will hold under tension.

Two interlacings - the Boy Scout square knot - make the ideal tie, Gupta said, but this knot doesn't always suffice. With slippery silk,

Trustees endorse Proposition 48

Jeff Cherry
Staff Writer

In response to pressure from Faculty Senate Chair Sandra Kirsch and Student Body President Jay Everett, the Board of Trustees unanimously endorsed Saturday the decision of Chancellor Bruce Poulton to impose stricter academic standards on incoming freshman athletes immediately.

Poulton's decision was in response to the passage by the NCAA on Jan. 13 of Proposition 16, which postponed full implementation of Proposition 48 by two years and replaced Proposition 48's strict standards with a more flexible indexing system.

Proposition 48 required an SAT score of 700 or above and a minimum high school GPA of 2.0 or above in a designated core curriculum for freshman eligibility. Under the newly passed Proposition 16, an SAT higher than 700 can offset a GPA lower than 2.0 and vice versa until Aug. 1, 1988, when all freshman athletes must conform to the standards set by Proposition 48.

Poulton, along with Duke University President Keith Brodie and UNC-CH Chancellor Christopher Fordham, has decided to implement Proposition 48 immediately.

In a letter to the executive officers of the other five schools in the ACC dated Jan. 31, Poulton, Brodie and Fordham said, "We urge you to support our position in the hope that

the ACC will adopt these standards as a conference rule."

Poulton reported to the Board of Trustees meeting that by implementing the policy, State is following the position adopted by the Board of Governors of the UNC system. He speculated that at least three other ACC members would support the policy but confirmed that only State, Duke and UNC had done so thus far.

Several board members expressed concern that the athletics program would "fall behind" competing schools by implementing Proposition 48 two years early. Everett responded that by implementing the more rigorous standards, the athletics program was "stepping forward, not falling behind."

After Kirsch presented the board with a Faculty Senate resolution urging continued support for Proposition 48, both the resolution and Poulton's letter were approved unanimously.

Head football coach Dick Sheridan said he was surprised by Poulton's letter and that he favored indexing in cases where the athlete has a higher GPA but a substandard SAT score.

"I feel that high school grades are the greatest indicator of collegiate success," Sheridan said. He added that four student athletes being recruited by State would be affected by Proposition 48. Declined basketball coach Jim Valvano declined comment on the new policy, saying he had not had a chance to look at it.

Team looking to improve surgical process

(continued from page 1)

surgeons may have to use as many as four or five ties.

"The more throws (loops) a suture takes, the longer a patient must stay under anesthesia, the greater the chance of infection and the larger the scar will be," Gupta said.

Over the past eight years, both non-absorbable and biodegradable materials have been tested at State on a specially developed tying machine. The device allows the researchers to loop knots

made of various materials and test them for strength and security under both wet and dry environments.

"We've been able to tie knots under controlled conditions of tension, heat, length of time and with a differing number of throws," Gupta said. "The ideal, of course, is to have both strength and non-slip performance in a two-throw square knot."

Gupta calls the research team one that has the right mix of expertise.

"Our knowledge of tensile behavior and the physical properties of ma-

terials, combined with Postlethwait's clinical expertise, was essential to understand the problem and to develop a strategy that could lead to a solution," he said.

In one of the team's investigations, they found that relaxing stresses in the structure of the knot by applying heat reduced knot slippage in synthetic fiber sutures.

More recently Bill Milam, a graduate student, and Richard Patty, head of the department of physics, experimented with laser beams to weld the ends of surgical knots.

"Fully welding the two-throw knots caused

the suture to become stiff and to crack," Gupta said. "But when the knot was exposed to smaller amounts of energy for shorter periods of time, the materials relaxed and partially welded, resulting in a non-slip knot with improved strength."

Before 1960, silk, cotton and catgut were the principal materials used for sutures. Today, dozens of man-made synthetics are used in the surgical process.

Nylon, polypropylene, polyester and other non-absorbable synthetics are used in open-heart surgery and other operations that require a suture

that will last indefinitely. In other surgeries, such as obstetrics and gynecology, absorbable polyglycolic acid sutures are used. These materials break down and are digested by the body following the healing process.

Other materials under investigation include a Teflon- and silicone-covered threading of polyester designed to make the stitching process smoother and less traumatic.

"These sutures, however, tend to slip and make a weaker knot, so we're testing them, looking for ways to improve their performance," Gupta said.

Coaches support Valvano

(continued from page 1)

basketball coach to use that office as a vehicle to do that. Who (could be) better right now to tell the story of what we want to do and where we want to go?"

Valvano is confident that he can handle the dual role effectively. He said, "Someone, I forget who it was, once asked a fellow, 'Why do you do this and this and this?' The fellow said, 'Because I can.'"

"I think I am more than able to handle the two positions."

Valvano was selected over 60 other applicants by a special search com-

mittee, which "enthusiastically endorsed" his appointment, according to Poulton's statement.

He also got a vote of support from his fellow coaches in the athletics department, who, Poulton said, petitioned for Valvano to be named AD.

The newest member of the athletic staff, recently hired head football coach Dick Sheridan, attended the Board of Trustees meeting and supported the choice.

"Everybody I talked to said that Jim Valvano would be an ideal AD," he said. "It was important for someone who had been here and knew the situation to take the AD post. Jim has earned that respect."

Black writer to lecture

During 1986 Black History Month, the second week of February is virtually a Ntozake Shange Festival, as two of her major works are performed in Stewart Theatre.

One of America's most exciting and important young writers, Shange first won critical acclaim with the Broadway production of her choreographed poem *For Colored Girls, Who Have Considered Suicide*

— *When the Rainbow Is Enuf*, which later became a best-selling book and a riveting PBS television special. *For Colored Girls...* will be presented by the Black Students Board in Stewart Theatre tonight at 7.

Friday, Shange will be on campus to give a free lecture at 8 p.m. in Stewart Theatre. She will discuss her career and works.

Saturday, her fierce and poetic drama, *Spell Num-*

ber 7, will be presented by Center Stage, also at 8 p.m. in Stewart Theatre. *Spell Number 7*, described as a sequel to *For Colored Girls...*, deals with the harsh realities of black life by using gutsy, humorous skits. Shange's latest novel, *Sassafras, Cypress and Indigo*, places her in the forefront of American fiction. She integrates poetry, drama, dance and music, invoking powerful images of black life in America today in all its

exuberance and beauty. Although *For Colored Girls...* and Shange's lecture are free to State students, admission tickets must be picked up at Stewart Theatre box office. Student tickets for *Spell Number 7* are \$6.50. As an added bonus, following Shange's lecture on Friday night is a showing of the film *The Wiz* at 11 p.m. The movie is free, but tickets must be picked up in advance at Stewart Theatre box office.

Ntozake Shange, author of *For Colored Girls...* will lecture on campus Friday. Shange's best-selling novel, which later became a television special, will be shown tonight at 7 at Stewart Theatre.

Twice unreal

Joshua Miller
Staff Writer

Although advertised as a romantic comedy, *Twice in a Lifetime*, playing at Mission Valley Cinema, is really science-fiction.

Here's the story: A zesty but repressed steel worker named George (Gene Hackman) lives in a working class neighborhood in Seattle. George is married to a dowdy wife (Ellen Burstyn) who cuts hair at a beauty parlor, squeals at "The Price is Right,"

doesn't drink and loves a hot game of Bingo.

They also have three children: a son in L.A., an impatient, foul-mouthed '60s feminist daughter who lives around the corner with her two kids and an unemployed lout, and an unemployed daughter (Ally Sheedy) who looks like she just dropped out of Choate and reads Gabriel Garcia Marquez when everyone else is watching football.

George and his wife (see *Twice*, page 8)

Responsibilities range for chancellor's right-hand 'man'

Suzie Tutza
Staff Writer

"With an annual budget in excess of \$300 million and a population of 30,000, this university is as large as a city," explains Karen Peterson, executive assistant to the chancellor.

Peterson is Chancellor Bruce Poulton's right-hand man, so to speak.

Peterson divides her responsibilities into two categories: providing staff support to the chancellor and coordinating university planning.

Her staff support duties include attending Faculty Senate meetings, responding to inquiries about university policies and researching issues for the chancellor.

She also serves as liaison between the chancellor and the University Planning

Committee. This 18-member committee of faculty, administrators, one student and one alumnus advises the chancellor on current issues. Future enrollment and the use of the Dix property have been the subject of two recent studies.

Peterson does not have a "daily routine." It is a routine, however, to collect information from the Institute of University Re-

search. Daily responsibilities range from phone conversations and correspondence to sitting with a variety of committees.

"We extend his (the chancellor's) eyes and ears as much as possible for all facets of the university," said Peterson of the function she and three other chancellor aids provide for Poulton.

The chancellor's other

aids are: general counsel attorney Clauston Jenkins, who focuses on issues; Bill Simpson, who works with the Board of Trustees, the university standing committees and the Board of Governors; and Tommie Bennett, the chancellor's secretary.

Peterson was born in North Carolina but grew up in California, where her family still lives. She earned a bachelor's degree

in philosophy from the University of Redlands in California. She completed her master's degree at the University of Chicago and continued her graduate studies at Syracuse University.

She said her liberal arts degree gave her "experience in facing issues squarely and intelligently."

Peterson worked for Poulton when he was head of the New Hampshire

University system. She came to State in October of 1983.

Peterson says she "has prelude of all things in this university."

With 10 academic deans, six vice chancellors for administrative functions and 4,000 faculty members and employees, it is reassuring to know that someone can direct you to the right person.

'Sinner Man' to highlight performance

Glee club to give another blissful show

With Center Stage and the UAB bringing in such great musical talent, it's easy to overlook someone who's been around for 20 years.

Milton Bliss, assistant director of the music department, has been arranging choral music for well over 30 years, and this Tuesday the Varsity Men's Glee Club will help premier his latest work.

"Sinner Man," Bliss' adaptation of a 19th century folk tune, will highlight a "choralefest" planned for Tuesday, at 8 p.m. in Stewart Theatre.

THE BRICKYARD By Mark Bumgardner

Bliss got the idea for his latest piece while playing the tune on his guitar.

"I was struck by the simplicity of the words and melody," he said.

The song is about a man's choice between right and wrong, good and evil, and what Bliss sees as heaven and hell.

search. Daily responsibilities range from phone conversations and correspondence to sitting with a variety of committees.

"We extend his (the chancellor's) eyes and ears as much as possible for all facets of the university," said Peterson of the function she and three other chancellor aids provide for Poulton.

The man's soul," Bliss explained.

Bliss took the song's basic words and melody and expanded it greatly. He added three solos, two of which are beautiful prayers by the "sinner man."

The production includes choreography done by Aldo Melito, a professional

dancer who recently moved to the area. Melito will portray the "sinner man," using dance to enhance the decision man must make.

The glee club will complement the dancer by doing simple movements that Bliss designed.

The glee club has achieved national prominence for its consistent style and quality. Melito is a critically acclaimed dancer and Bliss has a

record of writing beautiful choral works. All this should add up to an evening of unmatched entertainment.

If that's not enough, come out to see the latest work by the foremost choral composer in the area. No student should leave the university not having heard one of Bliss' works, and there is no better time than Tuesday's premier of "Sinner Man."

Wakefield Apartments Announces Free Direct Bus Service To And From Campus!

Great Off Campus Living Only \$396.00 Per Semester!

Now accepting limited applications guaranteed for fall occupancy!

One Bedroom from only \$184.00 (shared by two students)
Two bedroom from only \$268.00 (shared by four students)

Located adjacent to Wake County Medical Center and the Bunking, just 12 minutes from NCSU. 9 Month lease available. Up to 4 students permitted per apartment keep your monthly rent per person reasonable. Enjoy Raleigh's most complete planned social program! Year round indoor swimming pool, sauna, exercise room and clubhouse. Tennis courts, volleyball court and outdoor pool. One and two bedroom plans offer modern kitchen, air conditioning and carpeting. Cablevision HBO, and rental furniture available. Direct bus service to NCSU on Route 15. For complete information and a complimentary indoor pool pass, visit us 9-6 P.M. daily and Saturday 10-5 P.M. ATTENTION ALL STUDENTS INTERESTED COOPERATIVE EDUCATION!

The National Security Agency will attend the Feb. 12th orientation in 11 Riddick Hall at 3:30pm.

The National Security Agency plays a vital role in maintaining the security of the United States. Its work is founded on science and technology which, in their constantly advancing state, make increasing demands on the capacities of scientists in many fields. Since these rapid advances in science and technology so directly affect the Agency's responsibility for the security of all U.S. communications systems, NSA has in recent years had an increasing need for able mathematicians, scientists, and engineers to carry on its far-reaching research and development programs.

MAKE A WORLD OF DIFFERENCE

There's an endless frontier of need out there stretching from the Sahara to the Andes to the Atolls of the South Pacific. In 25 years, 100,000 Peace Corps Volunteers have traveled to all of them to work with people in over 60 countries. They've done everything from helping villagers dig wells and build houses, to teaching them languages and skilled trades, to giving advice on farming and health care. Join a phenomenal tradition. The difference is a better world... and a better you.

For more information, talk with Peace Corps on campus, Room 1, Patterson Hall, Monday-Thursday, 1-4 pm, 737-3818.

Opinion

A paper that is entirely the product of the student body, becomes at once the official organ through which the thoughts, the activity and in fact the very life of the campus are registered. It is the mouthpiece through which the students themselves talk. College life without its journal is blank.

Technician, vol. 1 No. 1 Feb. 1, 1920

Remove barriers to handicapped

Apparently, the General Assembly thinks that 10 years of funding for the removal of handicapped barriers on state-supported campuses was sufficient. The Assembly hasn't allocated any money for barrier removal the past two years and won't for the next three, according to the University of North Carolina Association of Student Governments.

The General Assembly began funding to remove handicapped barriers in 1973. A year later, allocations reached a peak of \$84,598. The figure declined steadily after that, and funding was cut off two years ago. Whatever the reasons for the cutoff, the job was far from finished and needs seriously to be addressed as soon as possible.

While handicapped persons may have an easier time maneuvering on North Carolina's college campuses than they did a decade ago, they still face barriers that the rest of us can only begin to comprehend.

Here at State, wheelchair-bound students cannot cross from north to south campus without using Dan Allen Drive or Pullen Road to crossover or under the railroad tracks. Handicapped students can't even think of using the mid-campus tunnels. The steps are too steep, and there are no ramps. And these were the obstacles that the General Assembly's funding were designed to remove.

Most of State's buildings were erected long before architects ever thought of the problems of access for the handicapped. Adding ramps to those buildings is not an easy task. The buildings weren't

constructed with the idea that someone would build a ramp 30 or 50 years later.

As for such obstacles as curb cuts and the railroad tunnels, that's easier said than done, and with no funding available, it is not possible at all.

We live in an era in which governments feel compelled to cut costs, which is admirable. But in cutting funding for removal of handicapped barriers, we are committing physical discrimination against an unfortunate minority, a minority that any of us could join at any time. Just one poor reaction — it doesn't even have to be yours — on the highway and the next person in a wheelchair could be you.

Last fall during Handicap Awareness Day, barriers were constructed on the Student Center Plaza and students were encouraged to tackle them in wheelchairs, opening a lot of previously closed eyes. Those participating in that exercise were subjected to just a taste of what the handicapped face every day as a matter of survival.

All too often, the mere lack of a ramp or a curb cut can prohibit a handicapped person from entering a building. On a college campus, that can retard the educational process that we are trying to advance. The General Assembly certainly has other problems to worry about. But if, in its haste to cut funds, the Assembly must cut funding so that not everyone can have equal access to our educational facilities, the Assembly is undermining the idea of higher education for all.

Quote of the day

...there was one of two things I had a right to, liberty or death. If I could not have one, I would have the other, for no man should take me alive. I should fight for my liberty as long as my strength lasted, and when the time came for me to go, the Lord would let them take me.

— Harriet Tubman, on her escape from slavery

As a principal conductor for the underground railroad, Harriet Tubman led hundreds of slaves to freedom. Tubman also supported women's rights, and during the Civil War she served as a nurse, spy and scout for the Union Army. *Harriet Tubman*, a biography written by Earl C. Conrad, was published in 1969.

Communication skills crucial

JOHN TITUS

Editorial Columnist

Some years ago, industry, roused by a problem (the cause of which it could not pinpoint), warned the academic community that its graduates were weak in the humanities, meaning mostly that there existed some reason for the poor communication between its technical and non-technical workers.

This concern was borne out by the chancellor's Commission on Humanities, which, with the fervor of a Puritan witch hunt, decided that the engineering curricula should be appended with more — nine, I believe — humanities courses. Since last semester, the issue of the proposal died in the sense of death for the stuff on MTV, but certain ground-level assumptions, which went untested, are in need of review.

The most celebrated assumption of the proposal is that engineers are conversant only with science, cannot read, etc. The proponents of this friction seem to forget that besides being better equipped than humanities majors to take humanities courses (SATV: 520 to 450), engineers take four English courses (111, 112, 2xx, 321) and 15 hours of humanities in other areas. (I am speaking here as an EE major; there are minor differences in the requirements of the various departments.)

With a minimum of 27 hours of non-technical load, an engineer who emerges from this university "uneducated" (the vogue term of those insecure with their choice of a major) is ineducable, in which case the proposal would be prolonging a mistake, and probably rarer than certain groups would have us believe.

As things stand, State is providing its engineers with the fundamentals necessary to continue their education, which — and this will be blasphemous to many — can be done outside college under no tutelage. A commission that suggests that 54 hours of humanities courses are necessary for the education of engineers is, besides being a self-appointed parent, hopelessly caught in the worship of college as the sole means of developing intellect.

I am not denying the existence of professional engineers who, upon matriculation at junior high school, were seemingly deprived of any further instruction outside science and math. (I once worked for an engineer who insisted the Magna Charta was an IBM mainframe.)

Such people, however, are only partly responsible for the Age of Information's problem of misinformation. The problem many companies face is one of both transmission and reception. Many a manager has frowned upon the 20 or so solecisms in an engineer's memo that would have been no more meaningful to him if it had been drafted by the hand of God.

What I am suggesting is that too many non-technical majors are grossly underprepared in the sciences. Core courses in

math (trigonometry is not college math), chemistry, biology or physics (calculator needed), and computer science, together with technical electives, should total at least 21 hours by graduation.

Perhaps those who do not find this idea too iconoclastic would be inclined to take the more traditional Latin and Greek college entrance examinations required at the beginning of this century by most schools. The executive who cannot check the gas mileage of his automobile is no better off than the engineer who does not see a difference between a gerund and a verb.

Ah, but what of the engineer who is still scrawling, in number 9 F-lead, bad memo after bad memo? At least three laboratory classes (PY208L, ECE303L, ECE4xxL for an EE major, as an example) should have students' lab reports sent to the English department to be graded on grammatical soundness and clarity, requiring corrections until a grade of 'C' has been obtained.

Humanities courses sharpen English skills, no doubt; however, an essay on Henry VIII and a paper clearly explaining line charge require two different thrusts entirely. The skills needed, to perform the latter task are barely touched upon under the present system.

Let us not forget that communication is a reciprocal process requiring both a competent transmitter and receiver. An institution that equips its students with the ability to express and understand ideas linguistically and mathematically does everyone a favor, including itself.

Blacks face problems at State

DWUAN JUNE

Editorial Columnist

It's hard being black at a predominantly white college, especially at State.

During my senior year in high school, I narrowed my college choices to two: Carolina and State. I chose State because there was a comfortable feeling in the air, something I felt Carolina lacked. State also recruited me, along with other black students, very heavily. They sent brochures, letters and even rush calendars, signifying that State was great academically and socially.

Few schools can match State's academic excellence. State demands a lot from its students, both black and white. The technical courses offered at State are among the best in the nation, and the humanities and social sciences offered here are improving steadily. When I graduate from State, I will know that I got one of the finer educations in the country.

However, State has its problems. Many black students feel they cannot relate to their white advisers. During preregistration, my adviser told me that I had to register for an ED 296-A course. Since it wasn't part of my curriculum, I asked why. Instead of receiving

a full explanation, my adviser told me that State required the course for certain students. I realize that advisers have a lot of important things to do, but a better explanation didn't require that much time.

I feel more at ease with my minority coordinator and prefer her to my adviser. During the fall semester, I had trouble with MA 111 and went to talk to my minority coordinator. The talk proved to be very beneficial. She told me that several groups hold meetings for students who have trouble in math. Since that meeting, I have gone to see her three times and my adviser none.

Socially, State is great — if you're white. For white students, there is Fraternity Court. Every week, at least one fraternity has a party. You may say that fraternity parties are open to everyone, regardless of race. It didn't look that way early in the fall semester

when a white fraternity representative overlooked several black students while passing out party fliers.

Fraternity Court gives white students something to identify with, and since there is more than one fraternity on the court, there are a lot of items for white students to identify with. Blacks, however, only have the Cultural Center.

On the weekend, the Cultural Center is the place to be, at least at night. But the Cultural Center is inadequate and does not meet the needs of black students. On any given weekend, the Cultural Center is packed. With windows that don't open, the Cultural Center becomes a heat box.

If State recruits blacks heavily, then the university could help improve the quality of the old Cultural Center, or better yet, build a new one.

A new Cultural Center would give blacks something to identify with. It would show them that State cares for them as a race, not as a way of increasing minority enrollment.

But the courts say minority enrollment must increase, not that race relations must improve. That's how it is in America.

Forum

Ticket distribution economically fair

Every year, when basketball season comes around, there is discontent over the distribution of basketball tickets. People argue that "camping out" is unsafe for the campers and has a detrimental effect on their studies.

The people making these claims, however, are not the ones who camp out. We don't hear any complaints from those who actually do the camping. I suspect the real source of discontent is that the distribution is perceived as being "unfair" to those who are unable to camp out.

From the point of view of economic efficiency, the present policy is probably the best available alternative. Every student is endowed with 24 hours per day which he may allocate among many different uses, such as studying, eating, watching TV or camping out for basketball tickets.

Each student places a different value on each of these activities and allocates his time accordingly. Some students value basketball tickets very highly and are willing to give up other activities to organize a group and camp out for tickets.

Although the money price (your athletics fee) is the same for all tickets, camping out is the "price" that must be paid to obtain the best tickets, i.e., the best tickets are more expensive in terms of effort that must be put forth to obtain them.

The process ensures that the people who value

the tickets most are the ones who are inside the coliseum watching the game from sideline seats. This is like auctioning off each ticket to the highest bidder, where the best seats bring the highest bids.

but in this case the bids are in terms of time given up rather than cash.

My argument is that camping out serves a useful purpose by matching up tickets with the people who value them most. If people love basketball so much that they are willing to go to the trouble of forming organizations, let them do it. Sure, I'd like to sit in sideline seats, too, but I have better uses for my time than camping out for tickets.

Ticket policy change draws students' ire

I have been privileged to attend State for the past three and a half years, and I will be leaving in May with an education, a degree, a promising future and volumes full of special memories. Some of the fondest revolve around State's great and growing athletic tradition. Our 1983 basketball championship stands out, for those of us lucky enough to be a part of it, as a time and event never to be forgotten. Camping out is part of the memory.

Every year that I have been at State, the ticket distribution policy has been one of endless cold nights, cold beer and hot debate. Each year the student body winds up with a "something-must-be-done" attitude, and there are arguments in dorms, classrooms, Student Government meetings and between friends, but with all the 1,200-plus SAT scores and future managers at State, nothing is ever accomplished. Instead, one silly policy after another appears, each lacking research, support and common sense.

The Student Senate has again shown remarkable capacity to repeat the errors of history. Currently our amazingly out-of-step government, out of concern for the welfare of the devoted fans camping out in front of Reynolds Coliseum, has decided the campers must go across the street and the tents must go back to the dorm rooms.

Moving the campers across the street is a very good idea, which would make the campers much less obtrusive. But I fail to see how depriving campers of the structures that prevent them from contracting pneumonia is concern for their welfare! The tents were described as unsightly — just wait until all the coolers, sleeping bags, radios, etc. are strewn all over the ground. So we again have an unpopular, short-range solution, which actually borders on ridiculous.

There are some alternatives which will reduce camping out:

- 1) Random distribution. I wouldn't want to tell the students. This one is very unpopular, except among those who would like something for nothing.
 - 2) Enforcing a 48- or 72-hour limit of camping out before each game. Maybe Public Safety has the will and the manpower to do this, and maybe they don't.
 - 3) Priority seating for upperclassmen for "big" games. Everyone who sticks around will get their chance, and everyone who doesn't, shouldn't.
 - 4) Build a new, 25,000-seat coliseum. In our dreams.
- Maybe it is time to just face the facts. Camping out is a tradition that is here to stay. It is probably not fair to everyone, but no reasonable solution that is fair to everyone seems to exist. Camping out has survived repeated attacks, and it looks as if it is here to stay as a side effect of a winning ACC team. Maybe the students' and Student Senate's efforts would be

better spent regulating camp-outs, making them as comfortable and convenient as possible for those who would like to participate and appreciating the growing enthusiasm expressed by camping.

Lisa Connor
SR CSC

There has been a great deal of controversy of late over the ticket distribution policy. I have been a student here at State for almost five years (yes, I started in engineering) and have seen several approaches tried to alleviate the ticket distribution problem.

However, I feel there is no real solution. As long as we have a team of the caliber of the Wolfpack and a coach with the flair and talent of Coach V, there will be problems getting tickets. It is tough for 25,000 students to fit into 2,500 seats.

It only stands to reason that the best fans should get the best seats. You cannot tell me the fans did not make the difference in the game against Kentucky. Our fans were awesome!

If I were coach, I would want the best fans in the best seats where they will make a difference, not in pairs in the last row of the end zone a la random distribution.

Team support is contagious, so evidenced by the fact that even some of the alumni stood up during the game. That support begins at court-side more times than not. Personally, I wish every student could get a seat in Reynolds, but such is not the case.

Like everything else in life, one must work the hardest for the things one wants the most. To expect good seats at a State game, where so few seats are available, and without camping out, is like expecting good food at the dining hall. It ain't gonna happen.

The Student Senate made some changes in the ticket distribution policy. Their goal is to enhance student safety, alleviate an eyesore and reduce camping out. No more tents will be allowed, camping out will be across the road and Public Safety will supervise an "orderly" crossing of the road 12 hours prior to the game.

First, I would like to thank the Student Senate for their concern over my safety — primarily that I don't freeze to death on one of those cold nights. Since I can no longer have a tent to keep the wind off my person, I will certainly be more likely to freeze to death and solve one of their problems: I will be one less corpse that can camp out, and I will be quite safe in my coffin. Good mark!

Second, are sleeping bags, foam pads, tarps, ponchos and lawn chairs less of an eyesore than a single tent with everything stored neatly inside? Does anyone need glasses to see what is wrong with the above picture?

Third, moving tents across the road is really not a bad idea. I'll give the Student Senate this one.

Fourth, Public Safety is going to move the campers across the road. The only time I have seen a near riot was when Public Safety attempted this at last year's Carolina game. Good luck!

I hope the athletics department has the good sense to drop this policy change which is so obviously in our best interest.

Rick Allen

Shuttle far from useless technology

I was appalled at the attitude Tom Mekus displayed in his Feb. 3 letter entitled "Shuttle explosion not so big a tragedy." It is remarkably surprising that a student at this university — the site of the first privately operated nuclear reactor and the first successful hydrogen atom observation experiment — would take such a negative attitude towards technical progress, especially regarding efforts made by a space administration that has been slaving for decades to provide safe interplanetary transportation for a nation loaded with ungrateful Mekus.

One might wonder what Mekus would do without his scorned technology. Mekus, it took technology to provide you with a roof over your head, water to drink, clothing, food and the heat that kept you from getting hypothermia this winter. It is quite likely that, were you alone in the wilds with no means of procuring sticks, rocks, fire or clothing, you would die.

Let us bear in mind that the space shuttle, while much more sophisticated than these, is another such tool, a technological implementation akin to those which enable us to survive.

Furthermore, the space shuttle serves more than nationalistic and militaristic purposes. Companies are already advancing the production of items manufacturable only in the negligible gravity situation of free fall.

Plans are also afoot to utilize the shuttle in orbiting the Hubble space telescope, a device that will help clarify some of the past mysteries of the universe. The shuttle is thus useful as a means of gathering new knowledge, Mekus, and if you are as quick to lampoon learning as you are to criticize technology, you don't deserve the thousands of dollars taxpayers waste to keep you an unwilling member of the state-operated institution.

The real tragedy of the explosion of the space shuttle goes far beyond the deaths of seven people. I remind the Technician readership of Mekus' description of thousands of starving people. Once our lengthening life spans and our

fruitfulness and multiplying have caught up with us, we will be those people, starved in a world of depleted resources. (Read Melthus.)

But the space shuttle program was the first to make the promising invitation to carry an ordinary civilian into space. It is becoming evident that the technology is here now, however hampered by the recent explosion, for us all to leave the "cradle of intelligence," "the shores of the cosmic ocean" and "the surly bonds of Earth" (to quote Jerry Grey, Carl Sagan and Ronald Reagan, respectively), and to get all the elbow room we want.

So I put this question to you, Mekus: Do you continue to strive to obliterate technology like Don Quixote, or do you join us in the pursuit of a dream?

High-Tech Co-Op

The Army's New Work-Study Coop

THE PROGRAM:

The Department Of the Army announces a new work-study co-op program for students majoring in high-tech disciplines. Under this new program, if qualified, you will be given the opportunity to apply your academic training to real-life situations at local Army Engineering facilities.

THE BENEFITS:

Besides having the opportunity to work in high-tech fields related to your academic discipline, you gain a number of other benefits including the opportunity for continued employment upon graduation, possible tuition, books, and fees paid while in the co-op program. You will receive up to \$1,000 a year stipend during your last 2 years of college and be paid as much as \$6.63 per hour while earning retirement, vacation, sick leave, and career tenure credits with the Department of the Army.

ELIGIBILITY:

To be eligible for the program, you must be a sophomore as of school year 84-85, enrolled in a baccalaureate program leading to a degree in science or engineering and enrolled in Army ROTC.

TO APPLY:

For more information on application procedures, call Cpt. Randy Hill at 737-2428

'Wash,' Pack pluck Cards

Phil Pitchford
Sports Editor

It's getting to be a pretty familiar scenario for State's basketball team — shut down the opponent's all-America candidate on defense and force the ball inside on offense.

Senior Milt Wagner and his Louisville teammates were the latest victims to watch the drama unfold, falling to the Pack 76-64 Saturday afternoon in

Reynolds Coliseum. Wagner, averaging 15.4 points per game for the Cardinals, attempted just five shots and finished with only eight points, before fouling out with just over a minute left in the game.

Just like Maryland and Len Bias. Just like Kentucky and Kenny Walker.

State got 50 points from its starting frontcourt. Sophomore center Chris Washburn led the way with a career-high 27

points and got good support from forwards Bennie Bolton (11 points) and a career-best 10 rebounds) and Charles Shackelford (12 points).

All of which persuaded the scoreboard operator, remembering State's win over then-eighth-ranked Kentucky, to type in: "Wolfpack: Kentucky State Champions."

"The way things went tonight, we're going to be tough to beat," State coach Jim Valvano said. "A lot of things went our way."

Senior guard Nate McMillan turned in another fine all-around game. He played the entire 40 minutes and finished with 12 points, 12 assists and five steals.

State outscored Louisville 11-4 in the last 1:44 to take their 16th win against six losses. The 16th-ranked Cards fall to 15-7.

After Louisville used an 8-2 spurt to draw within five, 65-60, with just under three minutes left, State went into a mini-delay. After breaking Louisville's press, the Pack ran the 45-second shot clock down to single digits before looking for a shot.

More often than not, the shots were there, with the Pack putting it up as the crowd counted down the seconds.

To start the string, McMillan dribbled 39 seconds off the clock before trying to get the ball inside to Washburn. When the Cards' Pervis Ellison de-

flected the pass out of bounds with .06 left on the shot clock, State was forced to go into its scramble offense.

Translated into English, that means, "Give the ball to Ernie and get out of his way." Myers responded, driving to the hoop for a short jumper with .01 left on the clock.

A pair of free throws by McMillan and a Washburn steal and slam kept State comfortably ahead, 71-60, with just under a minute left.

After a U of L layup, Bolton put down one of two free throws. Myers spoiled any chance of a Louisville comeback by grabbing the long rebound from Bolton's miss.

Myers got the ball to McMillan, who was fouled and hit both free throws to push the lead to 74-62 with :19 seconds left. Ellison and Washburn traded layups to account for the final margin.

"We just couldn't seem to be able to keep them from getting the ball inside," Louisville coach Denny Crum said. "When they needed something, they always seemed to get it."

For nearly the whole game, the getting was good, with Washburn getting plenty. He finished the game with a 10-14 shooting performance, including five dunks.

State returns to Reynolds tonight against Brooklyn College.

Valvano looks to make changes as AD

Tim Peeler
Sports Editor

When basketball coach Jim Valvano gets his hands on the athletics director position July 1, he plans to immediately begin changes in the athletics department.

The first thing to go, Valvano said, will be the image. He wants to bring out the positives in Wolfpack athletics, which he said hasn't been exactly predominant in the last couple of years.

"Every program has stages," he said Saturday after State's 76-64 upset over Louisville. "Current AD Willis Casey has done an absolutely fantastic job here in 17 years. I've been at six schools, and he's the best AD I've ever been around."

But there is a point where we need facilities in a constant attempt to improve the (athletic) program. I think that the time has come.

"Victor Hugo said, 'There is no army stronger than an idea whose time has come.'"

What ideas does Valvano have for the athletics department? First comes image marketing. He said the negative image that has somehow been associated with State has to go.

"One of the first things we want to do is marketing image and marketing products," he said. "Tell the story of N.C. State. Tell who we are, where we're going, where we want to be and all the good things we have."

What's that image going to be under Valvano and where will it take the university's athletics department?

Wolfpack Club President Charlie Bryant said the Valvano administration will closely resemble the 39-year-old coach's personality.

"I think we've got a very extroverted athletics department," he said. "I think we've given the appearance of being otherwise. I think Jim will bring out this outwardness."

"It's just like his basketball team. He's always taught them to play within themselves. I think he will tell everybody in the department — the coaches and the administrators — the same thing."

But the big question on

every Wolfpack fan's mind is, "How long will Valvano continue as basketball coach?"

Right now, that depends on who you ask.

Valvano seems to think he can do both jobs for quite a while — after all, he said, several football coaching counterparts have done just fine in the dual role.

"How do football coaches be ADs?" Valvano asked. "Vince Dooley (of Georgia) has been AD (and football coach) for 20 years. Is there something intrinsic about a football coach that allows him to do that that a basketball coach couldn't do? I think I can do both for a time."

Never mind that Valvano becomes the only AD/basketball coach at a Division I school with a football program.

Valvano thinks there is a misconception about what an AD is expected to do.

"I'm not going to be sitting back there deciding that our soccer team will be playing Wofford Nov. 13," he said. "You have to remember that we have some great administrators — Frank (Weedon) and Kevin (O'Connell). I'm more of the song and dance man."

But Chancellor Bruce Poulton has suggested that he wants only an AD, not a double-duty coach. In his released statement Saturday, Poulton hinted that he intends for Valvano to step down as hoop coach sometime in the next couple of years.

Others in the profession tend to agree that dual roles are difficult.

Louisville coach Denny Crum said Saturday, "I think he's crazy. I already told him that. There is no way you can do both jobs well. He might be the first AD in history to fire himself if he's not doing a good job coaching."

Casey, who was State's swimming coach for one year after he became athletics director in 1969, also has talked privately with Valvano about the difficult nature of holding both positions.

"Mr. Casey has been very supportive of me in this decision," Valvano said. "Not only do I talk to him, his advice is word. If Willis Casey said to me, 'I don't think you should do this,' I wouldn't do it."

Asked what Casey told Valvano in terms of being basketball coach and AD, Valvano said, "That's between Willis and me."

Valvano's immediate plans, of course, are to get his long-term plans are much more exciting.

"Someday I hope I'll be a part of opening the doors to a new place to play basketball," he said.

Women gymnasts down Radford; men fall

Becky Sisson
Staff Writer

It was a night for setting records. State's women's gymnastics team not only beat Radford 177.6-165.1 Saturday night, but also set a record for total team score.

The men's team was defeated, 251.85-163.85, at William & Mary. Individual winners for the Pack were Joey Saccio on the rings

and Greg Blanchard on the high bar.

Freshman Angie Fontana set a new school record for freshmen, placing second in the all-around competition with a score of 38.75.

Giving solid performances in all four events, senior Leah Ranney captured first place all-around with a personal best score of 37.40.

"I was really psyched for this meet," Fontana said. "After I got through the other events, I was able to relax out on the floor and have some fun."

Sophomore Suzi

Grandbois placed third all-around with a score of 34.70, while freshman Portia Propst scored 34.65 to take fourth place.

The team scored a record 46.05 for all five floor scores, with Fontana, Propst and Ranney each scoring a 9.5 on the floor exercises.

Coach Mark Stevenson was pleased with the team's performance, especially on the floor exercises. In addition, he is confident about his squad's position going into the ACC tournament later this month.

"The team that hits (performs flawlessly) will be the team that will win," he

said. "We had five falls on the beam tonight. If we do that in the tournament, we'll knock ourselves right out of the running."

The Tar Heels are favored in the tournament because they have more Elite Class gymnasts on the team. However, State has the advantage of hosting the tournament at Carmichael Gym.

State 177.60, Radford 165.10.

Women drub Tech, bow to Tar Heels in overtime, 81-79

From staff reports

The women's basketball team split a pair of ACC basketball contests this weekend.

The Pack lost an overtime heartbreaker Sunday in Chapel Hill to arch-rival North Carolina, 81-79. Friday night, coach Kay Yow's squad downed league cellar-dweller Georgia Tech, 92-57.

Sunday, the Wolfpack Women lost a 12-point advantage midway through the second half as the Heels forced the game into overtime. Darlene Cannon sparked UNC's comeback with six points in a six-minute, second-half stretch.

"Our downfall came in two areas. We didn't keep Carolina off the boards, and we allowed them too many chances at the free-throw line," said Yow, whose team was out-rebounded 54-36.

UNC's Tia Poindexter grabbed off 16 rebounds and scored 23 points to lead the Heels. State's Trena Trice led all scorers with 28 points but did not get a rebound in the second half.

Friday night, State jumped out to a 30-point halftime lead against Georgia Tech and coasted to a 92-57 win in Reynolds Coliseum.

Behind Trice's 26 points, State put the game out of question early. After Tech scored the first basket of the game, the Pack scored 14 straight points, including four apiece from Trice and forwards Angela Daye and Teresa Rouse, and never trailed again.

By the time Tech scored another field goal at the 8:55 mark in the first period, State had raced to a 24-8 lead. The Wolfpack's biggest lead in the first half was the 30-point intermission margin.

Little Spud 'sniques' up on teammate Dominique, wins NBA dunk contest

The rest of the country found out this weekend what State fans have known all along — former Wolfpack basketball player Spud Webb can get off the ground.

Webb used a pair of perfect slams in the finals to outdistance Atlanta Hawks teammate Dominique Wilkins, who hails from Washington, N.C., and win the National

Basketball Association's Slam Dunk Contest Saturday.

Webb won \$12,000 for doing what he used to do on an average afternoon in Carmichael Gymnasium last year. His 100 points surpassed Wilkins, who compiled 98 points, by a field goal.

"I can't describe them; it's just something I do,"

Webb told *The Associated Press*. "I didn't know what I was going to do until I got the ball."

What Webb did do was vintage Spud. Throughout the competition, held in his hometown of Dallas, Webb thrilled the crowd of 16,500 and the panel of five judges, which included, of all people, former football star Roger Staubach and

Auburn sweeps pair from tankers

The men's swimming and diving team lost to Auburn, 70-41, Saturday, while the women fell 88-50.

In the men's meet, State's Rich Shinnick won the 500-yard freestyle event, and Tom Neunsinger placed first in the 3-meter diving competition. Holly Kloos was the only individual winner for the Pack women, taking first in the 100 breaststroke.

ATTENTION ALL STUDENTS INTERESTED IN COOPERATIVE EDUCATION. The National Security Agency will

attend the Feb. 12 orientation in 11 Ridcked Hall at 3:30 pm. The National Security Agency plays a vital role in maintaining the security of the United States. Its work is founded on science and technology which, in their constantly advancing state, make increasing demands on the capacities of scientists in many fields. Since these rapid advances in science and technology so directly affect the Agency's responsibility for the security of all U.S. communications systems, NSA has in recent years had an increasing need for able mathematicians, scientists, and engineers to carry on its far-reaching research and development programs.

ATTENTION WATERSKIERS! The NC State Waterski Club will be holding its first meeting of the spring semester on Thurs, Feb. 13, at 7:30 pm, in Room 2037, Carmichael Gym. We will discuss upcoming Intercollegiate Tournament, a possible campus-wide tournament, Novice Ski Days (learn how!), a trip to the Cable course and much more. All are welcome.

ATTENTION INTERNATIONAL STUDENTS: Feb. 28-Mar. 3 come with us to Charleston, site of S.C.'s first permanent settlement. We'll be staying with American host families. For more info, call Donna, 787-9263. Sponsored by InterVarsity Christian Fellowship.

ATTN: UAB Women's Board meeting Tues, Feb. 11 at 7 p.m. We will discuss Pornography Forum, Rape Prevention Week, and the Yellow Ribbon Project. All students invited to attend.

Business, Economics and Accounting Majors: Join the Business Activities Board and get involved in planning the Fall '86 Business Program as well as other important projects. Call Carol Schroeder, x2396/3273 for more information.

Business, Economics, and Accounting Majors: if you want to know more about summer internships, attend a meeting on Thursday, Feb. 20, 4-5 p.m., 05 Patterson. No sign-up necessary.

Co-op Students! You must check in with your school co-op office if you are returning from a work session. This is a program requirement and you will receive a "U" for the fall session if you do not complete a work review.

COLLEGE REPUBLICANS will hold first general meeting of the spring semester Tues., Feb. 11, at 8:30 pm, in the Senate Hall. New members welcome.

College Democrats will be meeting Tues., Feb. 12, at 8:00, in the Brown Room. There will be an election of officers and 4th Congressional District candidate Dr. David Price will be speaking.

Dr. Theoyl Melton, associate professor of microbiology, will be featured speaker at the AFRO-AMERICAN COLLOQUIUM, Thursday, Feb. 13 from 12:1 in the Faculty Senate Chambers of the D.H. Hill Library. The topic of discussion is, "Mastering the Gene." A question-answer period will follow the presentation. Students, faculty and staff are invited to bring their lunches and participate in this Colloquium.

Dr. Tom Regan speaks on "The Role of Culture in Animal Rights." Don't miss this slide show presentation by the author of "The Case for Animal Rights." Sponsored by Student

Speakers for Animal Rights. Refreshments served. Everyone welcome.

ENGINEERS! Hurry, register now for the Student Professional Awareness Conference for Engineers (SPACE). Learn what it takes to succeed in your profession. Don't miss it! 1:30, Wed., Feb. 19, in Ballroom. Door prizes (Compact Computer, Digital Multimeter, etc.) given away. Register today in Daniels.

English Club meets Thurs, Feb. 13, 7:00, 129 Tompkins. Dr. Larry Rudner will read from his latest work.

Twice latest version of myth

(continued from page 3)

haven't had sex in years, but he has a good relationship ("C'mon, we've been hanging out like a couple of old fags for years!") with a buddy (Brian Dennehy) down at the corner bar.

On his 50th birthday, George chooses to spend the evening with his buddy rather than his wife. But before he gets into anything kinky, George looks across the bar and sees the new bartender, Ann-Margret. During the celebration, George asks Ann-Margret to dance. Instead, she asks for a kiss, and during the kiss they fall in love.

Now George has a real choice to make. He can return to the three weird women at home or go off with Ann-Margret. If the marriage had some life left in it, or if the bartender weren't Ann-Margret, we might have an interesting story here. Call me sexist if you will, but I say the deck is stacked.

Twice in a Lifetime is the latest version of an old American myth: the fresh start, breaking off your ties with others and shucking your commitments and vows will give you a new lease on life. The pain of a deadening job can be washed away by a new character in your love life. It's an old story, but no one has told it so vehemently in years.

Among many others, Blake Edwards took up the same theme in 10. But in

10, Dudley Moore learns that Bo Derek's beauty is only skin-deep. Hollywood, for a short time, began to question the faith that a beautiful new face was not a substitute for the difficulties and rewards of commitment. *Twice in a Lifetime* gives us the old-time religion.

According to the writer, Colin Welland, and the producer-director, Bud Yorkin, divorce may be painful, the wife may cry, the kids may kick and scream, but ultimately, it's better for everyone.

George gets Ann-Margret, and the kids learn a lesson about marriage.

Once George leaves, his wife is catatonic for awhile, but later buys some new clothes, pierces her ears, dyes her hair blonde and takes her daughters to a male strip show. This is how Hollywood portrays a working woman growing up and becoming independent.

She shows how healthy she's become because she now talks like people from Beverly Hills, clearly stating her needs and desires. Maybe she consulted the same therapist who convinced Sally Field to go to the Academy Awards and shout the idiotic and untrue line, "You like me!"

I do not know if the moviemakers accurately portray the working class. The principal players, except for Sheedy, managed to tone down their glitter. They were at least trying to act like working people. But Sheedy did not for a second make me believe she went to a working class high school, just as she didn't seem like a college graduate in the execrable *St. Elmo's Fire*.

Sheedy is a leading member of a group of young Hollywood stars known collectively as "The Brat Pack." Never has the American screen been burdened by the images of so many talented young people at one time. Compared to "The Brat Pack," "Our Gang" was the British National Theatre.

Divorce may not always be a sign of defeat. The notion that two human beings unrelated by blood can make a lifetime commitment may be illusory.

And yet, I do not believe this movie tells the whole truth about this marriage and its demise. I do not think that the makers of *Twice in a Lifetime* were deliberately lying to the audience, but perhaps they were not being completely honest with themselves.

APPLICATIONS AVAILABLE

Sign-up for University Student Center President and four(4) at-large members of the University Student Board of Directors will begin Monday, February 17. Prospective candidates need to sign up in the Program Office (3114 Student Center) and in the Student Government Office (4130 Student Center) by 5:00 pm February 26. Candidates for Student Center President must have served at least six (6) months as a chairperson or a member of a Union program committee or as a member of the Board of Directors. Candidates for the Board of Directors must be fee paying students who do not hold offices in the Union.

SPLIT.

Split up your training in the Army Reserve into two summers. You can do it if you're a high school junior and 17. Take your Basic Training between your junior and senior years, then your Special Army Skill Training the next summer.

You miss little or no school, and you get a big edge on the future competition for jobs, experience and opportunities. You also get paid. You earn at least \$1,000 for each summer, plus over \$1,225 a year for serving one weekend a month, normally, and two weeks annual training.

Before you think about splitting for summer, think about splitting summers, and talk it over with us.

832-0660
SPC Shelwell
ARMY RESERVE
BE ALL YOU CAN BE.

Are You Good Enough To Join The Best In The Nuclear Field?

The Navy operates the most advanced nuclear reactors in America. The men who maintain and operate those reactors have to be the best. That's why officers in the Nuclear Navy get the most extensive and sophisticated training in the world.

College juniors and seniors who qualify for the program can earn over \$1,000 a month while still in school.

Navy Representatives will be interviewing at the Hilton on Hillsborough, Feb. 14th-12th. Stop by and get more information or call the Navy Officer Programs Office: 1-800-662-7231.

Navy Officers Get Responsibility Fast.

8 ways to get a man to ask you out again.

1. When he mentions "The Bears," know they're from Chicago.
2. Seem unimpressed when he tells you he scored a hat trick in the third period.
3. Take his word for it when he tells you that 1984 was a very good year for Chardonnays.
4. Laugh at his jokes, even when he forgets the punch lines.
5. Avoid, at all costs, letting him see you reapply your lipstick.
6. Order something more exotic than a white wine spritzer.
7. Compliment him on his taste in colors, even if he arrives in jeans and a T-shirt.
8. Tell him you'd ask him up for a Suisse Mocha, but you only do that on second dates.

Celebrate the moments of your life with General Foods® International Coffees.
