Weather

More white stuff that doesn't do anything for sinusitis is on the way. Coupled with some cold temps and the overall lack of street clearance, us northerners will have another super day of driving in the great road conditions.

Classes canceled yesterday, delayed today

By Dwuan June
News Editor
and
Meg Sullivan
Assistant News Editor

On Jan. 22, one *Technician* headline read "We never cancel classes," provost says. Today, the headline should read "We never cancel classes. Well, maybe sometimes."

A winter storm dropped freezing rain, sleet, ice pellets and snowflakes throughout the state Monday and Tuesday. Unlike the last time N.C. State University experienced bad weather, the university canceled Monday's classes at 1 p.m. On Tuesday, the university officially closed — for only the third time since 1953. Classes will be canceled today until 12 p.m.

Provost Nash Winstead said in order for the university to cancel classes, people must not be able to get on campus, and weather conditions must be hazardous. George Worsley, vice chancellor for finance and business, said the road conditions played a major part in the decision to cancel classes.

"We took a look at the condition of the highways and in-roads and considered it in the best interest of everyone to close," he said.

In an earlier interview, Worsley said several factors must be met to cancel classes. NCSU officials must make an assessment regarding the ability of faculty and staff to get to campus.

Worsley then consults with Public Safety officials and Chancellor Bruce Poulton. Worsley then makes the decision whether or not to cancel classes.

Another winter storm is expected to hit the Triangle tonight; however, forecasts say this one will not be as severe as Monday's. Should classes be canceled, students should tune in to local radio and television stations. Winstead said students should pay particular attention to announcements concerning NCSU, not the state government.

Despite the bad weather, many NCSU facilities operated with very few problems.

The only problem Public Safety experienced was supplying personnel for student requests for transportation to the infirmary. Public Safety officials said. The only accident Public Safety reported was that a student fell at

Carroll Residence Hall and was taken to Rex Hospital.

University Dining director Art White said the Dining Hall operated regular hours while the Student Center Commons stayed open until 7:30 p.m. Snack bars such as the Cutting Board, the Emporium and the Gallery Line in the Student Center were closed, according to David Rittenhouse, assistant director of Student Center University Dining.

"It's a little difficult to open those places up when you have weather like this," he said. The Library Annex closed at 2 p.m. Tuesday.

Robert Moseley of Student Health Services said nothing unusual happened at the infirmary.

"There were a few people who fell," Moseley said. "All things considered, everything went well."

With no classes to attend, many students took it easy. Some watched soap operas, others sledded. Some, like New Jersey resident Simone Kellum, didn't understand all the hoopla centered around the snow.

"It is nothing to me," she said. "I have driven in it, I have gone to school in it. This is absolutely nothing compared to the snowstorms we have in New Jersey."

Puerto Rico native Lisandra Torres said she has never seen anything like this before. "Everything is white; it's so beautiful. It's wonderful," she said.

Some students were surprised by the weather conditions. Alaska native Tonya Purser said the weather is not what she expected.

"I expected sunny skies and nice weather all year," she said. "This is just like home in April."

Fort Lauderdale native Portia Merritt said the weather was "an interesting experience. You want to go out and play in it."

Tuesday afternoon many West Campus residents participated in the West Campus Free For All Go For Yourself Snowball Bash '87. According to Bragaw resident Cabell Garbee, students from Bragaw, Lee and Sullivan Residence Halls met in the amphitheater between the residence halls and engaged in combat throughout the day.

"It was a blast," Garbee said. "It's a chance to get back at your roommate or suitemates."

"It's a chance to be totally spineless," he added. "It's just a great way to let off steam."

Students on West Campus participated in the West Campus Free For All Go For Yourself Snowball Bash '87 while surf's up on the Court of North Carolina as Blaine Jeffreys hangs ten on the snow waves. An unidentified man just can't get enough of the cold wet stuff as he eats an ice cream sundae from the Golden Arches.

First annual Black History Quiz Bowl held last Sunday

By Stephanie Porter
Staff Writer

The Society of Black Engineers (SBE) sponsored the first Black History Quiz Bowl at N.C. State University on Sunday.

Tabitha Hooker, the president of SBE, and Anthony Roper, the academic chairperson of SBE, had the idea and organized the event. Hooker said "Lawrence

Clark, associate provost and affirmative action officer, said it would be a good idea, so we (SBE) took it and ran." Theresa Hayes, a psychologist at the Counseling Center, was the game host.

Three teams participated in the event with the hopes of winning the \$100 first place prize or the \$50 second place prize. The team that was able to answer the most questions correctly was the winner.

The team representing the Society of Black Engineers emerged victorious after defeating the

United Student Fellowship team (who came in second) and a group of students who called themselves The Brother and the Sister.

The audience also got into the act by answering questions that the teams had missed. All correct answers from the audience went into a drawing for a \$25 prize. Jessica Brown, a sophomore computer science major, was the winner.

Hooker said, "I think it went well. As long as the

audience enjoyed it, it was a success."

Although the crowd was scarce, SBE members were still glad they had the program. Hooker said, however, "We would like to have more organizations to participate next time. This is a good way for everyone to brush up on black history. How long are we going to stay ignorant?"

SBE would like to sponsor the Quiz Bowl again during Pan African Week, which is the first week in April. They also plan to make this an annual event.

Campus Briefs

Phone-a-thon raises \$35,000

N.C. State University's senior class phone-a-thon has raised \$35,000 from seniors who are contributing to a centennial senior class gift, according to Bryant Allen of the NCSU Alumni Association.

"The phone-a-thon began on Sunday," Allen said. "There's a real festive atmosphere, and alumni volunteers are hard at work calling the seniors."

Stacy Dorte, co-chairman of the Senior Class Gift Committee, said the goal for the project is \$100,000, which will be used to build a campus amphitheater as a gift to the university from the centennial year's senior class.

"The committee discussed several options and decided on an amphitheater for our class gift," Dorte said. "The overall pledge per senior will be \$150, but it will be paid in smaller payments over the next few years."

"All seniors who decide to pledge will receive a centennial pewter plate as a gift."

"The gift committee also hopes to reinstate the five-year class reunion," she added, "and we would really like to have the amphitheater completed by that time."

Landlord-Tenant seminar cancelled

The Legal Defense Corporation's Landlord-Tenant Law Seminar scheduled for today from 3:5 p.m. in the Walnut Room has been cancelled.

The seminar, to be held sometime next week, is designed to assist students who are looking for off-campus housing in the fall.

Ruth Fuller, of Housing and Residence Life, will also be present to provide handouts and answers to questions about N.C. State University's housing.

The seminar will also help those who are looking for prospective roommates or housemates. Those looking for prospective roommates will have the option to register their names, phone numbers, preferences and life styles.

Criteria change for new freshmen

By Stephanie Porter
Staff Writer

Starting in the fall of 1988, high school students must meet certain new requirements in order to enroll in any of the 16 schools in the University of North Carolina system.

Each student must have a high school diploma or its equivalent, with four units of English, which must emphasize grammar, composition and literature. They must also have three courses in mathematics. The courses can include Algebra I, Algebra II and geometry (or a higher level math course for which Algebra II is a prerequisite).

College preparatory students must take two course units in social studies and a unit in life or biological science. The students must take at least one unit in physical science and one laboratory course.

It is also recommended that students take at least two course units in one foreign language and a mathematics course in the 12th grade.

Each university may require other course requirements in addition to the minimum requirements. In order to help high school students become more familiar with the new minimum, N.C. State

University has included them in its Freshman Bulletin.

Nash Winstead, provost and vice chancellor of academics, said the new requirements in high school will help students overcome difficulties in college.

"I think the new UNC standard will result in all students being better prepared in college," he said.

Winstead said NCSU has been using the higher requirements and that the addition of a lab course requirement will be the only difference between 1987 and 1988.

Overall, the provost said he feels the new standard will improve the quality of the students in all the public universities and colleges.

According to Winstead, NCSU and UNC-Chapel Hill are the only two universities in North Carolina currently requesting requirements similar to the ones that are going into effect in the entire UNC system. He hopes the new requirements will help raise the ratio of minority students who take these types of courses, thereby better preparing them to attend major universities.

Dean of Admissions Anna Keller said the new requirements will affect minority universities more so than any other universities. She does not feel NCSU will be affected very much because it is only having to add one requirement

Senior Tevin Binns slams down a duce in the Wolfpack's 107-79 win over Brooklyn College. See related story on page 3.

Internships available at wildlife refuges

By Gina Thompson
Staff Writer

If you have ever wanted to see Alaska, California or the Midwest but could not afford the travel, or even if you just want to spend a summer in the Smokey Mountains, then the Student Conservation Association (SCA) may be just what you need.

For anyone 18 years or older, the SCA offers volunteer work programs year-round in national parks and forests, resource areas and wildlife refuges. And you need not be a forestry major to qualify.

Both Blue, a recruiter for the SCA and a graduate of St. Mary's

College, said that the travel is what attracts most people to their program, "but the work experience is excellent."

The positions range from working in the "back country" of Alaska to working in the visitor center at Yosemite National Park. Each position has specific requirements, but "there is something for everyone," said Blue. "This is for people who want to do something different."

Most of the positions run for 12 weeks, including training. The SCA pays for round-trip airfare costs, provides the volunteers with comfortable housing and pays each volunteer \$40.00 per week to cover

food and laundry expenses. Blue said that unless a person plans to spend a great deal of money, "you can work in San Francisco at the Golden Gate and break even."

Positions in areas like Alaska, Hawaii and California are very competitive, but the SCA tries to place as many applicants as possible. Applications for summer positions will be accepted until April.

"We (SCA) are much more than a placement agency," said Blue. "We evaluate the positions and the applicants, and you've got us to back you up."

The SCA sends an average of three applications to each area with SCA volunteers. The actual hiring is done by the area. "These are

quality positions, not just gopher work," said Blue. In most cases, she added, volunteers work alongside professionals doing a variety of tasks. These are full-time positions, with most volunteers working 38 to 40 hours per week, "but there is always time to go canoeing, backpacking, camping or whatever else your area offers," Blue said.

"The best thing is you can go across the country and you don't have to pay for it," Blue said. "It's a new exposure. This is something different. You get a lot of outdoor experience and speaking experience, and nowadays you need experience in something."

Blue said that in the past, the SCA has gotten very few applica-

tions from N.C. State students. "There's much more potential here (at NCSU)," she said, "and I hope that more students will apply this year."

In some cases, the SCA volunteer positions can also serve as internships.

The SCA also offers positions for the physically disabled and the hearing impaired. Occasionally, said Blue, senior citizens take advantage of the opportunity to travel and work as volunteers in visitor centers. She stressed that anyone 18 years or older can apply, regardless of major. Blue herself majored in finance. While agreeing that it is harder for the humanities

or non-science student to gain a position, it is possible because "they have excellent speaking skills, usually, and that is exactly what the visitor center positions require."

The SCA is a non-profit organization funded by private memberships, corporate sponsors and sponsors for individuals. The program is competitive, so interested persons should apply as soon as possible. For further information and an application, write to: The Student Conservation Association, Inc., P.O. Box 550, Charlestown, NH 03603, or call (603)826-5206, 826-5741. There is a \$5 processing fee per application.

The winter white stuff brought on a flurry of activity as a West Campus snowball fight broke out with over a hundred students taking part in the action.

National Student Exchange program lets students swap universities at no extra cost

By Gary Mobley
Staff Writer

Does all this bad weather have you dreaming of attending school in a warmer climate? Perhaps the National Student Exchange (NSE) is a program worth looking into.

According to Charles Haywood, the NSE coordinator, students are offered the chance to experience diversification in both academic and personal awareness. "I certainly hope we have quite a few students take advantage of this opportunity," he said. "The really unique thing about this program is that it is an excellent opportunity without any significant increase in your educational cost.

That is the real feature — that you could end up in Hawaii, Puerto Rico, Wyoming or California or wherever and have the chance to go to school."

In order to qualify for NSE, a student must be a full-time sophomore or junior at N.C. State University with a minimum cumulative GPA of 2.5. A student may participate in the exchange program for up to one academic year. Tuition is assessed at the current rate paid by the student at NCSU. However, room, board and transportation expenses must be considered.

NSE courses and grades are recorded as transfer credit, so courses selected should be those that are transferable

back to NCSU. Placement is determined by the student's priority of choices and the spaces each institution has available.

"Being able to travel (and) seeing different places and people has been wonderful," said a student from Puerto Rico.

NSE allows students to learn more about their limitations and capabilities while developing an increased appreciation of differences in other regions and the people who live there. According to one satisfied exchange student who has now returned to campus, "If I had to do it again, I definitely would. I learn so much about myself and other people. It has really been a good experience."

Sam Kinison screams it up

By Frank Gershwin
Staff Writer

When Sam Kinison, the overweight comic who appeared on Rodney Dangerfield's *Back to School* film, said the audience was glad he just showed up, Kinison hit the nail on the head.

The small but vocal crowd of 200 people spread out in Page Auditorium at Duke University for Kinison's second show definitely appreciated his appearance after waiting nearly an hour for his act last Sunday.

Nevertheless, he was right: they were happy he showed.

As exemplified on his newly released album, Kinison, known as the screamer from Hell, has the ability to cut to the heart of the matter. Telling the most degenerate and despicable jokes imaginable, he outraged his au-

dience while making them a little bit more aware of this nasty world. But then again, since he is gross and despicable himself, he can look good telling these types of jokes without damaging his character.

His timing, present on his *Louder Than Hell* album, did not appear on the stage; instead, he stumbled over lines and skipped over material, not attempting to make any connection between the jokes.

The entire show had a very informal, intimate tone. After playing to a sold-out audience two hours before, he felt he could tell jokes while lying on his back and staring at the stage lights.

But, as he admitted, the show was not going to make or break his career, inviting the audience to look for the concern in his eyes.

Thus, the show began very slowly. When the show began to pick up pace, hecklers from the audience caused further delay. Not until the roddie produced the heckler, with the help of a two-by-four, to quiet herself, did the show begin to reflect the comic's dark, if not pitch black, humor.

After the show, thinking about the concert and my possible review of it, I decided, at first, to recommend that the reader save the \$14.50 on a ticket and buy his record. But on second thought, I realized that Sam Kinison fans should witness his act in person, in the full presence of his overwhelming voice.

Until then they cannot say they have listened to Kinison; they can only say they have heard the album. Nothing more.

Wolfpack buries Brooklyn

Staff photo by Michael Propst

Bolton, Shackelford and Lambiotte lead Wolfpack to 28-point victory

By Katrina Waugh
Assistant Sports Editor

The Wolfpack soundly defeated the Kingsmen of Brooklyn College, 107-79, Monday night before 4,800 fans who braved a winter storm to come to Reynolds Coliseum.

State now sports a 14-12 record for the season with five games remaining, while Brooklyn fell to 10-13.

The Wolfpack travels to Durham Thursday for a 9 p.m. showdown with the Blue Devils. State defeated Duke earlier in the season. The game will be televised on ESPN.

"We usually play well over there," senior Bennie Bolton said. "It's going to take everything we've got," Walker Lambiotte said. "They are a really good team. You've got to be aware of what they are doing at all times."

State will be without Kenny Drummond, who contributed 26 points to the last win over the Blue Devils and has since left the team. Duke will be playing without starter Billy King, who broke his wrist.

"I feel sorry for Billy," Coach Jim Valvano said. "But they've got a pretty deep team. It'll be a tough game. We've been fairly successful there."

The Pack started still another new lineup against Brooklyn, this one consisting of Bolton and Mike Giomi in the forward positions,

Charles Shackelford at center, and Vinnie Del Negro and Lambiotte in the backcourt.

State took control of the contest from the opening buzzer, executing well on both ends of the court.

The Pack had 19 assists and only seven turnovers, while holding the Kingsmen to three assists and forcing 14 turnovers in the first period. State shot 67.7 percent for the half, compared to 50 percent for Brooklyn College.

"We played hard and got the game basically in hand in the first half," Valvano said.

"We've been stressing getting out and playing hard at the start of the game," Lambiotte said.

Bolton, who limited his shooting to the three-point range, led the first half scoring with 14 points. He went on to mark up 20 points and four assists for the contest.

Lambiotte, back in the starting lineup for the first time since the Virginia game, had 12 points and two rebounds in the first half. Lambiotte hit seven of 11 shots from the field to end up with 16 points, six assists and four steals for the game.

"Walker Lambiotte's playing very well," Valvano said. "Since we put him back in the lineup and gave him some minutes, he's really responded."

Shackelford shot a perfect 4-4 from the field and 2-2 on free

Staff photo by Eddie Gontram

In his first start since the Virginia game, Walker Lambiotte makes a big impact, scoring 16 points, dealing out six assists and making four steals.

Women down Northern Illinois, 84-68

Trice has 28 points and 13 rebounds; Treadway adds 16 to victory

By Trent McCranie
Staff Writer

The Wolfpack women upended first-time opponent Northern Illinois, 84-68, while the sleet pounded Reynolds Coliseum outside Monday night in the first half of a basketball double-header with the men.

The Wolfpack women raced to a 46-22 halftime lead, converting steals and fastbreaks into easy buckets. The NIU offense was stymied by a hustling Wolfpack defense as the Huskies had trouble getting the ball inside and getting the open jumper outside.

"We were playing very well defensively in the first half," Coach Kay Yow said. "Overall our defensive effort was good."

In the second half, NIU cut the lead almost in half by reeling off 11 straight points to make the score 46-33 with over 15 minutes to play. Yow used her bench liberally, frequently making wholesale substitutions.

"The first half was great," Yow said, "but the second half we fell flat."

The difference in the score had a lot to do with it. The bench played a bunch in the first half. I think we let up because of that (the big lead)."

Yow said defense is what makes the 13th-ranked Wolfpack click on offense.

"You can't really look at our offense," Yow said, "because generally our defense creates our offense. Great team defense — pressure on the ball. When we're doing that, we are at our best. We produce points through our defense and transition."

All 12 players got into the game and contributed. The bench had substantial playing time and supplied 26 points, led by sophomore Lori Phillips' 12.

"A bright spot coming off the bench was Lori Phillips," Yow said. "She was playing her best defense and as a result had a good offensive night."

Phillips' 12 points increased the double-figure scorers for the Pack this year to 11.

"An opportunity for everybody to play has to be good," Yow said, expressing pleasure with the reserve ranks.

State was led by seniors Trena Trice, with a game-high 28 points and 13 rebounds, and Annemarie Treadway's 16 points and six boards. The game marked the end of the line for playing in Reynolds Coliseum for Trice, Treadway, Angela Daye and Carla Hillman. All will be moving on after successful and productive careers as a part of the Wolfpack women's basketball team.

State, 19-5 overall, will return to the road and the ACC carrying a 10-2 record to Wake Forest Wednesday night in Winston-Salem.

Former student donates \$327,887

Money will go toward Distinguished Professorship in Engineering

By Laura Nuckolls
Staff Writer

In 1993 a struggling engineering student received a loan of \$100 to pay tuition costs so he could complete his senior year and graduate. That student, R.A. Lancaster, recently demonstrated his gratitude by donating an investment portfolio valued at \$327,887.75 to a university-related foundation.

Lancaster and his wife, Mildred, of Fort Myers, Florida, donated the portfolio to a trust agreement with the North Carolina Engineering Foundation. The earnings from the endowment, estimated at \$25,000-\$30,000 annually, will eventually fund a Distinguished Professorship in Engineering. N.C. State officials hope this will help to attract and retain outstanding faculty and research scientists.

The transaction is the single largest transfer of assets from a living individual in the university's history. The assets will be managed by the foundation with a life income to the Lancaster's, said John Kanipe, vice chancellor for development.

Kanipe said Lancaster never forgot the loan A.F. Bowen, NCSU treasurer at the time, made to him. He feels NCSU made a big difference in his life and wants to return something of quality to the school, Kanipe added.

Larry Monteith, dean of engineering, finds the gift a "vote of confidence for his [Lancaster's] education and for the university." He found it reassuring to the university that alumni would look back at their educational experiences and decide to provide a large amount of support.

Lancaster, a retired marine engineer and Craven County native, has made frequent gifts to NCSU. In 1981, the Lancaster's established the R.A. and Mildred Lancaster Meritorious Scholarship.

Booters capture Virginia-Carolinas Classic

Soccer

The State soccer team captured the Virginia-Carolinas Indoor Soccer Classic this past weekend, defeating George Mason in the championship game, 4-2.

State's Chuck Codd, a sophomore from Torrence, Calif., scored three goals in the title game of the eight-team event.

The Wolfpack advanced to the championship game by defeating North Carolina in the first round, 3-2, and ripping Virginia Tech, 5-1, in the semi-finals.

Codd finished the tourney with five goals and an assist to his credit. The Wolfpack also got outstanding play from goalie Kris Peat.

Tennis

The men's tennis match against Elon scheduled for Tuesday was cancelled because of inclement weather. It may be rescheduled for a later date.

"We're trying to work it out," Wolfpack coach Crawford Henry

WOLFPACK NOTES

said. "It's hard to work it in since both teams already have their schedules made out."

The women's team is scheduled to open its season today at 1:30 p.m. against UNC-Charlotte, weather permitting. Henry will decide early today if the match can be played.

The men's team, 2-1 on the year, is scheduled to play UNCC on Thursday at the Wolfpack Tennis Complex. Saturday the men host UNC-Asheville at 2 p.m.

The men are led by a pair of players from Malmo, Sweden. Playing at No. 1 singles is Lars Svensson, a freshman who owns a

2-1 record on the season. Krister Larzon, who plays No. 2 singles, also is 2-1.

Riflery

The State rifle team defeated Virginia Military Institute and Virginia on Saturday to even its record at 5-5.

The Wolfpack shooters scored 4,366 points in the .22-calibre portion of the match, while VMI scored 4,333 and Virginia scored 3,086.

State's Steve Reagan scored 1,115 out of a possible 1,200 to win the individual competition. Three Wolfpack shooters tied for honors

in the individual air rifle competition. Reagan, Michael Masser and Bennett Wilder all shot 361 out of 410.

Team scores
.22 Caliber
1. State 4366, 7. VMI 4333, Virginia 3086
Air Rifle
1. State 1487, 2. UNC 1318, Virginia 978

Tickets

Due to the weather Monday, ticket distribution for Sunday's State-Virginia game has been extended. The Reynolds Coliseum Box Office will be open today to distribute tickets for the game, said box office manager Bessie Steele. The box office will be open from 8 a.m. until 4:30 p.m.

Tickets are also currently on sale for the ACC women's basketball tournament, to be held Feb. 28-March 2 at Cumberland County Arena in Fayetteville.

A complete book of tickets is priced at \$12, with single-day tickets \$3 for the first round and \$4 for the semifinals and finals.

Pack puts Kingsmen away in first period, then has fun

Continued from page 3

throws in the first half to knock in 10 points. Shackelford ended the contest with 18 points, three rebounds, two assists and two steals.

State scored 12 unanswered points in the final 2:29 of the half to take a 55-34 lead into the locker room.

"We kept up the pressure and pushed it up on the defense and created some things," Bolton said. "We played well defensively, and our shooting as a team was better.

Everybody continues to work hard - it's a good sign."

The second half was more of the same.

State shot 61.8 percent for the game while Brooklyn College shot 55.4 percent.

Kingsmen forward Keith Grady produced more than one third of his team's points and ended the game with 28 points, five rebounds and two steals.

Brooklyn's Frank Gregov was the second leading scorer for the Kingsmen with 15 points, four

rebounds and three assists. Spious Kilpatrick was Brooklyn's only other player in double figures with 13 points, three rebounds, five assists and three steals.

The Wolfpack finished with 35 assists and 14 steals, with Quentin Jackson leading in the assist category with nine. Lambiotte led the team in steals with four.

Freshman Andy Kennedy hit three of his six second-half shots, all from the three-point range, to notch up nine points, three rebounds and three assists.

State played everyone on the roster against Brooklyn, and for the first time this season everyone scored. Sophomore Kenny Poston rocked the house when he scored his first points of the season on a three-point shot with 1:09 left in the game. It was the first time

Poston had scored since the Pack beat up on Brooklyn College last year.

A job or a future?

As one of the largest high-technology companies in the world, we can offer you more than just a job. We can offer you an option on the future.

Most people know us by our products. But our real product—and our real pride—is the development of new talent, the fulfillment of unlimited potential.

Our representatives will be on hand Tuesday, February 24, to explore possible matches between your career interests and opportunities at United Technologies. If a match can be identified, seniors and graduate students will be invited back for a personal interview on Wednesday.

We hope you'll stop by the **Student Center Ballroom from 9 a.m. until 4 p.m. on Tuesday, February 24.** Bring a resume. But come prepared to talk about the future. Not just a job.

United Technologies employs more than 180,000 people at 300 facilities in about 50 nations around the world. The corporation's best-known products include Pratt & Whitney jet engines, Carrier air conditioners, Otis elevators and escalators, Sikorsky helicopters, Norden defense systems, Essex wire and cable, and Hamilton Standard controls.

Opinion

A paper that is entirely the product of the student body, becomes at once the official organ through which the thoughts, the acts, and in fact the very life of the campus are registered. It is the mouthpiece through which the students themselves talk. College life without its journal is blank.

We stand corrected

We stand corrected. Jim Valvano, our famous coach and athletic director, must feel snowpiled by the problems — both on and off the court — that this basketball season has blown in. Certainly it has been a winter of discontent.

Although the surprise ending to point guard Kenny Drummond's brief career is the shock of the season, Valvano's response shows good judgement.

Valvano told the *News and Observer* that from now on, "we will build our program with four-year players, with kids we bring in as freshmen, with kids who have strong academic skills."

This answer absolutely addresses the major criticism of the program made by a recent *Technician* editorial.

To underline the point (for us), Valvano added, "In the coaching business you can never say never, but I think I can say I've changed my philosophy."

We think that a program of four-year players is absolutely in the best interests, academically, of any college program. In college ball, still, it's not only whether you win or lose, but how you play the game.

We were concerned not only with the academics of a high player turnover. Like others, we were wondering whether Jim Valvano is being realistic with the duties and

pressures of his added responsibilities. After all, it is an awesome load.

But the answers in the press and in the recent meeting with students, and the way the team has banded together in the wake of the Drummond situation, suggest that maybe he is.

Nobody can be blamed for the team's record in the recent difficult stretch of games. Certainly, that scheduling has Chris Washburn's name on it.

Furthermore, the team seems to be finding its chemistry. After beating Brooklyn College (no Duke or Virginia, to be sure), the attitude was upbeat and positive. It suggests Valvano is doing a good job again.

Although this season is not what we hoped, we are not out of anything yet. We expect post-season play, and if the team plays well, the NCAA's are still possible.

Regarding the dual role of coach and AD, we guess that Valvano can do both as long as both remain his top two priorities.

As to all the other activities, we can only implore him to use good judgement. We know Valvano's style is to keep all valves open.

The last thing *Technician* wants is a running feud with Jim Valvano. We couldn't win and wouldn't want to.

But if we have constructive criticism, and think that our criticism will help, we will not be afraid to offer it.

What exactly is education?

BLAIR HAWKINS

Some suggest education already works this way.

Anyway, that is just one multi-faceted view of education. And God said let there be others.

It is said that the goal of education is to open doors, not close minds. But which doors? Which minds? Education had better not instruct my kids right and wrong, good and evil. But it does.

It is said that education leads to an open mind. Therefore, the more educated a person, the more open-minded she is. We need but one counter-example to debunk that myth, such as James Watt.

It is said that education should instruct nothing but the truth. If theories are just highly educated guesses based on I do not know what, then why present science in public school at all? Why attempt anything but the basics?

It is said that education should enable man to control his environment and his destiny. Man has certainly learned how to deface the landscape and pollute the planet. In this sense man is controlling his

destiny. He is freely choosing to make his future as dark as death.

So far, these well-known views have been relatively uplifting. But the ax must always fall.

It has been said that education civilizes human beings. And for some reason, being civilized is far superior to being uncivilized. But what is civilized? What makes living harmoniously with nature uncivilized? Is education, included in its definition, civilized?

It has been said that education makes war more likely since it enables man to kill by remote control. Few terrorists would dream of slitting a baby's throat in the dark of night. But many do not hesitate to plant bombs: bombs invented by a few educated elite, bombs that kill the same baby just as dead.

The purpose of all this rhetoric is to point out that many views of education, vie for acceptance as truth. That education is inherently necessary or beneficial is not a given.

This writer does not pretend to have the final answers about education and postulates. On the contrary, no one has the definitive answer. Beware of those who claim they have that answer.

Maybe education is, indeed, the search for answers.

Blair Hawkins is a junior in MY.

There is no excuse

- Take this short test:
1. What did you wear last Sunday?
2. What did the brickyard and the library look like before construction?
3. Who was the football coach before Dick Sheridan?

Not knowing the answers to these questions will not prevent you from being admitted to graduate school, but it does prove that the ole noggin' just does not retain everything.

Now students could keep a journal of everything that happens to them while they attend N.C. State. But even if they did, they might forget how their friends and their campus looked. To remedy this, they could all take pictures of everything on campus. While they kept all those notes.

All this sounds pretty time-consuming for the average student,

but there is a better way. Buy an *Agromeck*, NCSU's student yearbook.

Students do not have to rely on their often distorted memories. They do not have take pictures of all their friends, fraternities and dormitories. They just have to buy a yearbook.

So, don't forget your college experience. Invest in the *Agromeck*.

Just as a reminder, *Agromeck* is taking portraits of all students interested in being in the yearbook. They do not charge a sitting fee; there is no cost whatsoever. Students just have to spend five minutes to have their picture in the book.

Portraits will be taken from 10 a.m. to 5 p.m. in the Student Center, Room 2104, until Feb. 19. Don't forget. There's no excuse.

Many concerned people like to address themselves to the problem of education. Too often, unfortunately, they wind up presenting one narrow view based on prejudice. If only one view existed, that would be fine. However, many different views exist. Here are just some of them.

Let us not forget the most necessary mission of education is somehow to endow individuals with the power to read, write and calculate. As a nation, we allow no deviation from this theme. We hold this notion so dear and dogmatic that we force all children by law to attend school up to some arbitrary age.

However, the idea that education includes much more luxurious concepts, such as college and graduate school, is a sophisticated example of expanding the use of a word until it has no meaning. There is a point where education must end and free-lance learning begins.

Taxpayers have no obligation to finance or even encourage free-lance learning. The president is right to cut funds to so-called higher education. Do these cutbacks mean that higher education dies? No, not if democracy, capitalism, free enterprise and free flow of information flourish. Even if taxpayers don't pay for higher education, research and such endeavors will continue, even if it continues in quest of the almighty dollar.

Forum

'Star Wars' price tag much too high

The column in last Wednesday's *Technician* in favor of SDI, or 'Star Wars,' reminded me of the fears I have about this venture.

Naturally, the price comes to mind. If upper estimates on its cost range around \$1 trillion, previous experience should teach us to expect a \$2 billion price tag. We would still need to maintain our normal armed forces, also. You don't need to be an economist to know the effect on our deficit.

However, my main argument against 'Star Wars' is very simple. It probably won't work. The Soviet Union has hundreds of inter-continental ballistic missiles; if two of them made it through the 'space shield,' our nation would be finished. These bombs are much bigger than they were in 1945; there is no margin for error. In addition, the Russians could build enough cheap decoys to overwhelm our system. It is utterly foolish to believe that we could build in the next 20 years a system of satellites that could shoot down thousands of flying objects within a few minutes without making any mistakes. It all boils down to ancient wisdom: If you build a bigger castle, the other guy will build a bigger catapult.

People believe in foolish things usually for three reasons: they are on drugs, wearing diapers or inspired by religion. Since many sober adult Americans are complacently accepting this ridiculous program, it must reflect our nation's worship of technology. Technology won't get us to heaven, but blind faith in it might send us to the other place. It is ironic but encouraging that many scientists realize this and have signed pledges not to participate in SDI research. I don't know the solution to the arms race, but throwing away huge amounts of money on a high-tech pipe dream is no answer.

Gary Huber JR/CH

Downtown coliseum unfair to students

To Chancellor Poulton Mr. Valvano and Wolfpack Club Members:

The idea of supporting the city of Raleigh in its endeavor to build a new sports arena is a very noble gesture. I support the idea of a new sports arena that will house Wolfpack basketball, but the idea of a downtown site is unfair to students. The students have always been a

backbone of the Wolfpack basketball program. Will the students' interests be respected when a city-owned and operated arena is built? Has the university considered building an arena, in cooperation with the city of Raleigh, on the new Centennial Campus? Why not?

Isn't the Centennial Campus, a gift from the great state of North Carolina, going to be a public and private venture? Look at the facts: Downtown Raleigh's streets are already congested. Would the city be able to expand these thoroughfares to accommodate the traffic of 19,000 fans? Think of the cost. The Centennial Campus is located in an area that is easily accessible by Interstate 40 and the Beltline. Also, the parking problems that would be incurred downtown would be lessened by the proximity of the Centennial Campus to NCSU's main campus.

The welfare of N.C. State students should be the main concern. The students at UNC, yes the school with Dean's Dome, receive the worst seats in the house for basketball games. Remember, the Dean Dome was built with private, university-related funds. Would the city of Raleigh want to capitalize on its arena by taking the prime seats in the house and selling these tickets to non-students? Think of how boring a Wolfpack basketball game will be without roof-raising hoop-la done by all the Wolfpack student fans. It will be extremely detrimental and unfair to the students of NCSU if the university doesn't have a major say in the building of a new arena.

I pledge to you, Chancellor Poulton, Mr. Valvano and the Wolfpack Club: If you are going to use University money — student money — think about the students first. Isn't that what the university is here for anyway... T.E. Students!

Stuart Nunn JR/LSE

West campus will not become a prison

I am responding to an editorial entitled, "Students, prevent West Campus Prison." The author of this article has been grossly misinformed. If anyone is interested in the truth, Housing and Residence Life has not chosen to enclose West Campus residents, the courts have. The judicial system has made the university-resident relationship analogous to that of the landlord-tenant. Two of the many court rulings follow.

First, in *Duarte vs. the State of California, 1979*, a mother brought a suit against the California State University. San Diego, after

her daughter was raped and murdered in her residence hall room. In the case, the court judged that the university could foresee another rape occurring. Because the university did nothing to protect its tenants, the judgment was against the university.

The second was *Mullins vs. Pine Manor College in 1983*. A girl was abducted from her residence hall room and raped on the campus. The college was held liable even though the college's location is in a low crime area. This case stated that residential colleges have a general duty to exercise due care in providing campus security. In other words, universities must take steps to safeguard its tenants if a criminal activity is foreseen.

Criminal activities have been foreseen on West Campus for several years. Two prominent examples are the rape case which occurred in the fall of 1984 in Sullivan and the bomb threat this semester in Sullivan. If these examples do not indicate a strong threat to residents, I do not know what will.

If you lived in New York City and your landlord did not provide some type of security, you would sue him for negligence. West Campus has approximately 2,400 people living in this small area. This is an extremely dense population, just like New York City. The individual wants protection that does not resemble a prison.

Finally, the "Feasibility Study (Task) Force" is, as stated so many times before, deciding if any type of enclosure is feasible. If an enclosure appears possible, it will definitely not resemble a prison. Any enclosure will hopefully contain facilities desperately needed by West Campus residents, such as a better laundry, accessible to all West Campus residents, a computer room (those like Leazar) and meeting rooms. Any enclosure is not only to protect the students, or tenants, as the court views us, but to also keep West Campus from becoming a prison.

Ricky Schenck JR/EE

Quote of the day

As soon as any man says of the affairs of state. What does it matter to me? the state may be given up as lost.

-Jean Jacques Rousseau
