Registration for Second Semester Is Going Forward

Freshman Lead List of Those Who Have Already Completed the Disagreeable Task

Registration for the winter term began Monday morning at 9:00 o'clock.

Due to a delay in the arrival of term schedules registration was somewhat slow Monday. The arrival of the schedules Tuesday was an impetus to increase the acceleration of the slow-moving registration machine. Freshmen could be seen every once in a while going through the soul-enrailing movements of getting an interview with his Dean. Due to the fact that the Freshmen rosters were made out beforehand there has been a greater proportion of registrations in this class. About all a Freshman has to do now in registering is to turn his shekels over to the Bursar, watch him rub his hands in glee and then see Mr. Owen and get a concert ticket for the winter term.

A good many Sophomores and Juniors have registered. To date or at this writing, 213 students have registered.

PHYSICS CLUB WILL HOLD FEED NEXT TERM

A special meeting of the Physics Club was called Saturday, December 12, to discuss the supper which they had planned to have this week.

At this meeting the members of the club decided to postpone this supper because the time planned came on Tuesday, December 15, the night before exams, start.

The supper will be held sometime next term.

STATE PROFESSORS VISIT CONVENTION

Taylor and Forster Will Read Papers in New York; Brooks Will Seek Pleasure

While State College students are enjoying holidays at home many of the members of the faculty will be in conventions in New York City, and two men from here will occupy important places on the programs of their meetings.

Dr. Brooks will spend Christmas day at his home here, but expects to leave the following day for New York, for a pleasure trip. He will be accompanied by his family.

Dean Taylor, of the Graduate School, and Dean Brown, of the School of Science and Business, will go to New York to attend meetings of the American Economic Association and American Sociological Association. Attending these meetings will include Dr. G. W. Forster, Professor of Agricultural Economics; Professors Anderson, Heninger, Stretcher, Wood, and Moen, all of the School of Science and Business.

Dr. Forster will read a paper before the Farm Economics division and will also be chairman of one of the group meetings. Dr. Taylor will read a paper at the meeting of Economists and will also read one before the Research Division of the American Sociological Association.

KING IMPROVING

J. A. King, Sophomore in Mechanical Engineering, has been confined at his home in Greensboro, as result of a collision he had while driving home on December 5. He suffered a broken arm and other bruises when his car collided with a street car. Nevertheless he expects to return in time to take his final examination, which will be given him orally if he is not able to use his arm.

PRESIDENT OF LEAZAR

J. P. SHAW

Last Friday night Leazar Literary Society elected officers for the second term. J. P. Shaw was elected president for the coming term. "P-Leg" has been very active in Leazar during the four years he has been here. In his freshman year he was a member of the Freshman Intersociety team that debated Pullen. Other things in which he has been active are: the Y. M. C. A., Agricultural Club, Students' Agricultural Fair, N. C. State Agriculturist. He is a member of Pine Burr, local scholarship society, and Alpha Zeta, National Honorary Agricultural Fraternity. Other officers elected were as follows: H. E. Springer, vice-president; J. B. Britt, secretary; W. E. Wilson, treasurer; I. R. Kissel, critic; M. O. Pleasants, chaplain; R. R. Fountain, reporter, and R. J. Peeler, sergeant-at-arms.

FARMERS' SHORT COURSES WILL START SECOND TERM

Work Designed to Suit Individual Needs of Practical Men and Women

Beginning January 6, North Carolina State College will give seventeen courses in agriculture for farmers. These courses will last one term, and all farmers, both men and women, who have had two years practical experience in farm work are eligible for the courses.

The courses are so arranged that the student may select certain ones to prepare himself for general farming in his particular section of the State or he may group his work for specialized raising, such as crop production, stock raising, dairying, truck farming, fruit growing, or poultry raising. The courses are also arranged so they will not seriously conflict with actual farm work.

About 30,000 circulars advertising these courses have been sent to all parts of the State, and indications are that there will be a good attendance at these courses, which will be of great value and cost but little.

FACULTY FRATERNITY TO STUDY FINANCING

Twenty-six members of the faculty who are members of Greek letter fraternities, met Friday evening, December 4, 1925, and perfected an organization.

The following officers were elected: Prof. A. F. Greaves-Walker, president; Dean E. L. Cloyd, secretary and treasurer.

Two committees were appointed. One to select a name and to draw up the by-laws and constitution, the other to study the financing of fraternity houses, especially the proposition made by the Jefferson Standard Life Insurance Company.

The fraternity was organized for the interests of the fraternities that are at State College.

Any member of the faculty who is a member of any National Greek Letter social fraternity can become a member.

UPPERCLASSMEN MAY TAKE EXTRA CREDITS

As a temporary measure for the remainder of this scholastic year, Sophomores, Juniors, and Seniors will be allowed to take three credit hours extra work. This work will be taken only upon recommendation of their instructor and the dean of the school to which they belong.

Has Just Received Appointment as Major in the R. O. T. C.

MAJOR P. W. PRICE

R. O. T. C. Captain P. W. Price has recently been promoted to the rank of Major. This is the highest rank that can be attained by a director of a student R. O. T. C. band.

"Daddy" Price has for several years been very successful in taking such material as happened to come to the College and whipping it into shape as a well-balanced band. At the same time he has won a place in the affections of almost every State College student with whom he has come in contact.

This is not a regular army promotion, but is purely concerned with his work here. It only serves to show that the Military Department and the President of the College appreciate the fine work he is doing, and desire to give honor where honor is due.

SENIORS TO HAVE CAPS AND GOWNS

Also Vote for Canes and Derbies Class of 1926 Establishes Precedent

At a meeting held Thursday night in the Y. M. C. A. the Senior Class adopted caps and gowns for commencement, and also voted in favor of canes and derbies for those who wish to so adorn themselves.

For some time there has been a sentiment on the campus in favor of caps and gowns. Last year there was quite a bit of discussion on the matter, but when brought to a vote it was killed. Many of the prominent members of the present Senior Class have brought the question before the body several times since the opening of school.

The cane and derby will also be something new on this campus. Although everyone may do as he chooses, it is hoped the majority of the men will fall in line with the program, and have the class of '26 set a precedent that will doubtless be followed for many years.

AMERICAN CERAMIC SOCIETY HAS A FEED

On Thursday night the American Ceramic Society had their feed in the Y. M. C. A., which was enjoyed by all. There are twenty-three members of the Society, who are students in Ceramic Engineering.

Lieutenant Passalague was the speaker of the occasion and gave many valuable suggestions as to how to handle labor, most especially negro labor, around such plants as ceramic engineers have charge of.

PRESIDENT OF PULLEN

C. C. CORRELL

Friday night, December 12, 1925, at the last meeting of the fall quarter, officers for the winter term were elected. C. C. Correll was elected president. He has taken a very active part in activities around the campus, being a member of the College Band, the Glee Club, the College Quartet, Mu Beta Psi (Honorary Musical Fraternity), the Basketball team, the student manager of the dining hall. He has been a very consistent worker in Pullen and well deserves the honor that has come to him. Other officers elected were as follows: R. R. Trevathan, vice-president; J. D. Conrad, secretary; H. K. Plott, treasurer; P. E. Trevathan, assistant treasurer; J. C. Davis, assistant secretary; J. E. Tiddy, critic; H. W. Taylor, chairman program committee; B. J. Kopp, reporter; C. E. Hibbard, chaplain.

COLLEGE CAFETERIA WILL OPEN FOR SERVICE JAN. 2

Indications Are That the Long Expected Will Really Appear

Many announcements about the cafeteria that is to be run by the College have been made. But Steward L. H. Harris says it will be opened January 2, 1926, at the dinner hour.

The equipment is sufficient to seat 240 at one time. Many inquiries about the cafeteria have been heard on the campus, and it seems as if Mr. Harris will have a full house when school opens after the Christmas holidays.

Miss Nina Gatling, of Charlotte, will be in charge of the cafeteria. Miss Gatling received training at East Carolina Teachers College, at Greenville. She promises good home cooking, "just like your mother makes." At some cafeterias there is a lack of variety in the diet, but both Mr. Harris and Miss Gatling have promised that a variety as great as can be found at any cafeteria in Raleigh will be furnished.

Miss Gatling announced that the hours for the meals would be:

Breakfast	7:30-9:30
Dinner	12:00-2:00
Supper	6:00-8:00

There are seats for 240 at one time and during a period of two hours several times this many may appease their appetites.

When questioned Mr. Harris gave out that they had adopted the motto: "Quality and Service For All." And that they will see that this motto is lived up to and carried out.

No prices were given out, but Mr. Harris hinted that the prices are to be so reasonable that none will be able to grumble.

COMPANY "C" WINS FROM COMPANY "K"

On Tuesday afternoon Co. C and Co. K played an exciting game, which was won by Co. C by a score of 7-0. The thrills of the game were the line plunges by Pollock; the end runs by Powell, and the end runs by Sullivan.

Work to Begin On System of Campus Walks

Service Driveway From Dining Hall to 1911 Dormitory Will be Closed

The work is to begin at once on the walks to be concreted and cindered on the campus. Evidences of its being under way can be seen at the north end of 1911 Dormitory, where a walk is under construction toward Winston Hall. Several of the new walks are to be concreted and the remainder are to be of the cinder type.

All walks in the North Carolina Court are to be of the latter type. There is to be a concrete walk from 1911 to the mess hall. This is to be eight feet in width. From Holliday Hall will run another walk to the mess hall and will intersect the one from 1911. From the north end of Holliday to the postoffice entrance to the campus will be another walk of concrete construction and also eight feet in width.

A six-foot concrete walk will run from the bridge, past Fourth, Fifth, and Sixth Dormitories and past the new library and Watauga Hall to the rear of Holliday Hall. The side of the drive toward Pullen Park and parallel to this walk is to be curbed and guttered by the City of Raleigh. This work is already under way.

The present service court on the north side of the mess hall is to be closed and a new one made on the other side of the building. This will be necessitated by the closing of the drive from the mess hall, past the ceramics building and Paige Hall to 1911. Thus there will be no driving in the North Carolina Court after this driveway is closed and the walk made.

HARRISON TELLS OF OLD ENGLAND

Gives Word Picture of Haunts of Scott, Stevenson, Burns, and Shakespeare

Dr. I. P. Harrison gave an interesting lecture Monday evening, in the Y. M. C. A. at 6:30. His subject was "A Trip Through England." The lecture was largely historical, as Dr. Harrison gave most of his time to descriptions and traditions of old England castles and homes and birthplaces of many highly honored English writers.

Among the writers mentioned were Sir Walter Scott, Robert Louis Stevenson, Robert Burns, and Shakespeare.

The lecture was illustrative and many interesting scenes were shown and some traditional story told which made the lecture very interesting.

CHI ALPHA SIGMA LOCAL FRATERNITY ORGANIZED

Plans for organizing a new local social fraternity were concluded Friday, December 11, when the approval of the faculty fraternity council was received. The new fraternity proceeded at once to the decoration and furnishing of its quarters. The chapter room of the new local is located in the south end of the second floor of Seventh Dormitory. The name of the fraternity is attractively displayed by an electric sign before the door of the chapter room.

The Chi Alpha Sigma stands for the best in scholarship, athletics, and social and campus activities. Mr. S. E. Rodgers was chosen as the honorary faculty member of the fraternity. The charter members of this new local are: Messrs. M. L. Rockfield, L. J. Salley, M. W. McCulloch, H. K. Plott, J. W. Fagan, W. E. Wilson, B. W. Garvin, J. L. Smathers, W. E. Mathews, H. H. Rogers, Z. E. Whitley, W. F. Bell (pledge).

Paragraphics

Merry Christmas to everybody.

Hope you passed all your exams.

Seven days since last issue and only six new clubs.

"They shall not flunk" would be the motto of our ideal professor.

Now that we have a new pencil pointer we hope to write some pointed paragraphs.

"There's music in the air" when State College music clubs tune up at Wynne's broadcasting station.

Organizing a Bachelors Club at this season of the year shows rare judgment on the part of someone.

North Carolina College officials seem bent upon intelligence tests for applicants. Better go slow on this business.

The apple-sauce industry seems to be enjoying a rapid growth since its beginning on the campus a few weeks ago.

We give the other colleges until January to dispute our claim to the honor of being the only college in America having a club for red-headed men.

All things come to those who wait. We never believed this so much as we have since the work started on the new tennis courts. Go to it, and may you have some real courts for us next spring.

Congratulations to Fred Logan, Sam Brown, and R. E. Nance. These men have won their honors in games which require all that a man has to give. They represent the spirit that has made State College teams something to be feared by all opponents.

Better late than never. That is the way we feel about the cuts of the football men which are being run this week. The cuts were not made until recently, and we were not able to pay for so many at one time. We are very grateful to Mr. Stafford for the loan this week, even though it is a bit late.

THE REASON WHY

For the past two or three years it has been the custom to get out a special Christmas issue of THE TECHNICIAN. For the benefit of those who are wondering why we have departed from this custom we have a few words of explanation.

In the first place, such an issue as that published last year is expensive. The very pretty red and green front page cost the Business Manager several advertisements. This year, as most of our readers know, we have not received the usual amount of business, so it did not seem wise to the financial department to assume this extra-burden.

On the other hand, the editorial department has come to look upon this as a newspaper. As such, it should devote its greatest space to giving the news. When special numbers are published, emphasis is diverted from current news to the special feature. If we were publishing a magazine we would like very much to decorate it, but since we are publishing a newspaper instead, we feel that our first obligation to our readers is to tell, in the best way we can, what has happened this week.

We respect customs, but we also endeavor to hold before ourselves an ideal for a student newspaper, and toward this ideal we are constantly striving.

CHRISTMAS THOUGHTS

For many years people have looked upon the approaching season as the happiest time of the year. To no class of people does this statement more truly apply than to students. Possibly the thoughts of home and vacation is partially responsible for the cheerful spirit, but underneath it should lie the expression of a gladness that has filled the hearts of men and women for nineteen hundred years.

Christmas should mean more to us than home and vacation. It should mean the basis for a hope, a faith that is builded upon the experiences of our forefathers, as well as in our own lives. It reminds us that there was One who came and showed men how to live. It was He who gave men the prescription for many of the problems that face us today, in our complex social organization. It was He who gave men the principles upon which to build a successful life.

In our superficial excitement about Christmas let us not overlook its real significance. Truly this is a time for joy and gladness. And possibly somewhere in the dim horizon there may be now appearing a day when there shall be "On earth, peace, good-will toward men."

As this is the closing of the first school term of the year, it is well, perhaps, to pause a moment and turn our mind's eye backward over the straight-away of this first lap in the race of journalistic achievement.

Early in the season we started bravely (to all outward appearances, at least) forward on our mission to supply to the student-body of State College the full value of our part of the publications fee, which is extracted most mercilessly from each student at the time of the fall matriculations.

As capital stock we had the skeleton of an organization, a strong determination, a little 2x4 office for a laboratory, and a wealth of material on and around the campus on which to conduct our research work, and a regular schedule of classes which had a way of interposing themselves in the way of putting out the then current issue of THE TECHNICIAN.

We have lacked a great deal of coming up to our ideal of a college newspaper, but feel that we have laid the ground work for a better publication during the next two terms. The Journalism classes have been an invaluable aid to us in securing material, and for the last several weeks it has been found necessary to discard much really good material.

Much improvement in the form of manuscript turned in has been noticed, and has received much favorable comment from the printers.

Just at this point it is well to say that the greatest kick coming from the Managing Editor in regard to articles turned in is the tendency prevailing among some to try to put headlines on their articles. In justice to the students, however, it must be said that articles turned in by professors are much more likely to be found guilty of this unpardonable sin. Those students who have studied journalism are never guilty. Headlines must be made to fit, and this is rarely possible when only guesswork is employed.

We have been brought to realize fully the truth of the statement, "Everybody is either trying to get something out of the papers or to keep something out of them." With the coming out of each edition, we are faced with a horde of dissatisfied ones who have sent in articles that did not get published. A few have brought us to account for articles which they thought should not have been published.

In the choice of articles for publication, we must first ask ourselves, "What is its news value?" Several articles, well written and showing much care in their preparation, have been turned in by students and members of the faculty which we could not publish because they were long and of the nature of magazine articles. We wish to assure all concerned that such articles were not left out carelessly or because of any personal animosity.

Many campus organizations report their weekly meetings. That is co-operation, and is appreciated by the staff. But the bare fact that a club met in its regular session is not news. If anything unusual happened, that is news, and should be played up.

We wish to thank all contributors for the interest shown during the term, and hope that they will continue to help us toward our goal—the best college paper in the State.

In sending in manuscripts, please remember that if an article is not well written it stands a poor chance when good articles are available.

Take note of the following recommendations, turn in your article, and we predict that it will be published, and we know that it will be thoroughly appreciated:

1. Let article have news value.
2. Make length in accordance with importance of subject matter.
3. Do not write headlines.
4. Leave three inches blank at top of first sheet.
5. Write legibly, preferably with typewriter, double spaced.
6. Have article in office by Wednesday noon.

MANAGING EDITOR.

HETERO COLORS

M. W. L.

The Faculty of North Carolina State College has overstepped its responsibility. If we as students are not equal to student government, then let's change back to faculty government. But so long as Article II of the Constitution of Student Government reads:

"It shall be the purpose of the Student Government to handle all matters of student conduct, honor and general student interest; and to promote, in campus life, self-control, personal responsibility, and loyalty to the College and student body."

The faculty, nor any other body of men, have the right to pass a dictatorial command down on the student body that they must sign a pledge on all examination papers, and there shall be no smoking in the room during examination.

Personally, I do not have any objections to the rules, but if the faculty felt or thought there was a need for such why not ask the legislative body of Student Government to pass the rules, with suggestions from the faculty, or at least have student representation with the body that did pass such rules.

The signing of a pledge will get nowhere. A man or student who is dishonest will surely handle a pledge with just as much freedom as he does his own name on examination.

M. W. L.

Some girls go to boarding school,
Some girls go to college;
But the girl that goes with a traveling man
Accumulates more knowledge.

This Week's Limerick

by ZIPPY MACK

There lives an old codger named Santy,
Who visits each mansion and shanty;
He is loaded with toys
For the good girls and boys,
But his store for the grown-ups is scanty!

Agromeck Yelps

"Do Your Christmas Shopping Early." To us that means, "Buy Your Christmas Cards Now."

To those boys who still have extra pictures in the office we urge that you get them before you leave for the holidays.

Speaking of the depth of these Yelps, we can only say, "The moving finger writes, and having writ, moves on."

Someone has suggested Aunt Ella Macguire for sponsor of the Pressing Club. That would add color to the book and we would like to hear some discussion on the subject.

If you have any good ideas for your friends' or enemies' cartoons, turn them in to Mountcastle.

To keep up the age-old custom, the Agromeck is now the proud owner of a fifteen dollar, yellow Ford. It is not as good a boat as THE TECHNICIAN'S but it is a darn good car for the fix it is in. It is somewhat of a nervous wreck, but on the level it is a good car.

We announced that the boy who turned in the prettiest sponsor picture would not have to pay the twenty dollars. It was also announced that the editor and business manager were to be the sole judges. Here are the results: After much deliberation the judges eliminated all but their own sponsors, then called it a tie and decided to put in both of their sponsors' pictures free. Congratulations.

To each and every student, Alumni, and member of the Faculty, the 1926 Agromeck wishes you a Merry, Merry Christmas and a Happy New Year. In exchanging gifts it is well to bear in mind that the gift without the giver is bare. We still contend that better the gift than the giver be bare. Merry Christmas! May Santa Claus bring you even more things than Chester Gump wants.

INGENIOUS PROFESSOR BRACES BROKEN FORD

It was a dark and stormy night in the city of Raleigh recently, with plenty of moisture to dampen the spirits, when the rear axle on a Ford sedan decided to say good-by to its surroundings.

Knowing that even a Ford balks at trying to be coached along on three wheels, the problem arises as how to tow "friend-Lizzie" to the garage on four wheels. In other words, how can one bring in any automobile wreck without a wrecker? It happened that night that every wrecker in town was busy as bees. Who wants their automobile stripped while parked on the highway, awaiting several hours for the nearest wrecking crew to come for assistance?

The economical automobile owner will do something like a practical member of the North Carolina State College faculty did on this dark and stormy night: borrow a plank at least six inches wide and six feet long from the near-by fence or any other source, then place it against the hub of the wheel that is trying to let go, with about one foot extending beyond the rear wheel. This end is lashed to the tire rack, while the other end, extending toward the front wheel, is lashed to the running board with chain, wire, or rope. To keep this board from wobbling, a short piece of planking is placed between the longer piece and the mud guard, extending up along the edge of the front part of the rear mud guard. These are held together by means of wire. Now hail some willing automobilist to tow you home.

Wintered and Summered

You think you know a lot about The boy you're going with. No doubt You do, my dear. Along in spring The world looks fine as anything; But spring will pass and time will tell. I hope you like your man as well As you like your beau. No doubt you will, (I ain't a-meanin' to condemn), And yet you never know until You've wintered 'em and summered 'em.

You can't judge climate by a day, Nor husbands by what fellows say. They talk a lot, and mean it all, But wait till summer comes, or fall, With fadin' dream and fallin' leaf, Or winter brings its shroud of grief, And—well, a girl can't tell, I guess, By any ring or sparkling gem; You never really know unless You've wintered 'em and summered 'em.

"Hark from the tomb the doleful sound," You likely say when I'm around. But that ain't what I'm aimin' at: You like the boy, and all of that, And yet the husband you may find A lot more gentle, lot more kind, Than you have dreamt of—better still, More worthy of God's diadem Than you will ever know until You've wintered 'em and summered 'em.

(Copyright, 1924, McClure Newspaper Syndicate.)

CLARK ARRANGES LIST OF CHRISTMAS BOOKS

The true Christmas spirit is the Christ-spirit. It is the spirit that promotes good will, kindness, sacrifice, and love of everything that is beautiful and noble. It is tolerant and has no particular creed, party, nation, or race as a favorite. It is a spirit that lifts humanity upon the plains of great endeavor and constructive aspiration. The short list of Christmas readings, compiled by Mr. J. R. Culledge and myself, is not exhaustive but merely suggestive.

J. D. CLARK, Asso. Prof. of English.

- C. Dickens—Christmas Stories.
- C. Dickens—A Christmas Carol.
- C. Dickens—Christmas Books.
- E. Field—Christmas Tales and Christmas Verse.
- J. R. Grant—The Bachelor's Christmas.
- B. Harte—How Santa Claus Came to Simpson's Bar.
- W. Irving—"Christmas," "Christmas Eve," "Christmas Day," in The Sketch Book.
- W. Irving—Christmas at Bracebridge Hall.
- O'Henry—The Gift of the Magi.
- C. A. Miles—Christmas in Ritual and Tradition.
- J. Milton—On the Morning of Christ's Nativity.
- W. H. Murray—Holiday Tales.
- W. H. Murray—Christmas in the Adirondacks.
- E. Ricket—Ancient English Carols.
- J. H. Snowden—Wonderful Night.
- C. H. Spurgeon—Twelve Christmas Sermons.
- R. L. Stevenson—A Christmas Sermon.
- H. Van Dyke—The Other Wise Man.
- H. Van Dyke—The First Christmas Tree.
- H. Van Dyke—The Spirit of Christmas.
- H. Van Dyke—The Night Before Christmas.
- H. Van Dyke—Prayer for Christmas Morning.
- L. E. Walter—Christmas Carols.
- K. D. Wiggin—The Birds' Christmas Carol.
- Christmas in Many Lands (published by Doubleday, Page & Co.).

"I'm crazy over animals," he heard the flapper squeal. So he took her to the library to see the college seal.

**READING SURVEY INDICATES
"TECHNICIAN" IS FAVORITE**

**"News and Observer" Runs a
Close Second in Green's
Classes**

Reading habits of 52 students in "Citizenship" classes at State College were disclosed in a survey made by Prof. R. W. Green in two sections of his classes. The survey covered only newspapers and periodicals read by the students, most of whom are Freshmen.

The Technician ranked first in the list, with all of the students stating that they read it. The list of newspapers with number reading each paper regularly follows: News and Observer, 48; Raleigh Times, 17; Charlotte Observer, 12; Greensboro News, 4; Asheville Citizen, 4, and "Home Town" paper, 38.

Among the weeklies the Saturday Evening Post led with 21, followed by Life, 12; Judge, 11; Literary Digest, 11; Progressive Farmer, 9; Liberty, 3; Colliers, 3; Time, 2; Pathfinder, 2, and Dearborn Independent, 1.

Choice of monthly or semi-monthly publications showed a wide range with the American Magazine leading with 17, while College Humor came second with 12. Popular Mechanics with 6 readers ranked third with the Country Gentleman, National Geographic, Cosmopolitan, Science and Invention, and True Story tied for fourth place with 5 each. Short Stories had 3 readers while World's Work, Western Story, Popular Science, Church Papers, and True Confessions claimed two readers each.

Publications represented by one reader each included: Atlantic Monthly, Boy's Life, Radio News, Ziffs, Sport Stories, Golden Book, True Romance, Fraternity Magazine, and LaParisiennne.

Six students stated that they read their high school papers while miscellaneous periodicals, occasionally read, numbered 26.

In commenting on the figures, Prof. Green quoted Addison, who said that "reading is to the mind what exercise is to the body," and pointed out that at least these students were exercising their minds when they average about seven publications read regularly.

Last Week's Best Article

The honor for having the best article in The Technician of December 11 goes to A. L. Aydlett for his article, "Champion Crops Judging Team on Assembly Program."

R. E. NANCE

C. B. BROWN

**NANCE WILL LEAD
'26 DISTANCE MEN**

**C. J. Goodman Elected Manager
of Cross Country Teams
for Next Season**

On Tuesday, December 8, the members of the cross-country team met in the Y. M. C. A. and elected a captain and a manager for the team of 1926. The men chosen were: R. E. Nance, captain, and C. J. Goodman, manager.

Nance is a junior in the School of Agriculture and has been an outstanding man in cross-country during the 1925 season. With a late start he was able to overcome the lead of the other men out for the team, and ran in every meet of the year except the one with Elon. He did not run in this meet on account of injuries. He was a consistent scorer throughout the season, always placing well up toward the front and tying for tenth place in the state meet. At the end of the season he stands second in the line of scorers for State.

Mr. Goodman is also well qualified for his position as manager, having served the team well during the past season as assistant manager.

**FOSTER TO LEAD THE
AGRICULTURAL CLUB**

Tuesday night the Ag Club held a spirited meeting which ran an hour over-time. This was due to the celebration of the recent decisive success of the Crops Judging Team and the election of officers for next term.

R. B. Winchester, J. F. Bullock, J. E. Foster, R. J. Peeler, Associate Professor J. B. Cotner, and Professor W. H. Darst made short talks on different phases of the crops judging contest, the trip to and from Chicago, etc. They are the ones who made the trip and won the cups.

In recognition of his ability, J. E. Foster was unanimously elected president of the club for next term. Other officers elected were:

- Stewart Gaston, Vice-President.
- W. M. Ginn, Secretary.
- M. O. Pleasants, Assistant Secretary.
- R. J. Peeler, Treasurer.
- Chas. Lambe, Assistant Treasurer.
- J. B. Britt, Reporter.
- E. A. Davis, Critic.
- "Shorty" Burnette, Corresponding Secretary.

**COLLEGE STUDENTS OF
RANDOLPH TO ORGANIZE**

College students of Randolph County are planning to get together during the Christmas holidays.

This meeting, the first of its kind to be held in North Carolina, will be a sort of county family reunion of all its collegiate sons and daughters. The gathering will take place December 23 in the county courthouse at Asheboro.

The purpose of this meeting is to get a closer association among the college students from the county and if possible to form an association which will meet annually and in any way possible to help one another and also to help the county as a whole.

**BROWN WILL LEAD
THE CINDER PACK**

**Will Take Place of Captain Pridgen,
Who Did Not Return
to College**

C. B. Brown, a senior in Vocational Education, will captain the Tech cinder artists for the 1926 season.

Wade Pridgen, star pole vaulter and broad jumper for the past four years, was elected to the captaincy last spring, but he found himself unable to return to lead his team-mates in the coming track meets. His absence made the new election necessary, and Brown was chosen as the man best fitted to take his place.

Brown was a consistent runner of the quarter-mile race all last season, and should do even better this year. He is a hard, steady runner, and sets a pace that is hard to beat.

Captain Brown and Manager "Bull" Thomas have some good material to pick from, in spite of the loss of Pridgen and Captain "Buck" Byrum, but they need many more fellows out for the squad. For the past few years State has received its share of first places in most of the meets entered, but has fallen woefully short when it came to getting the second and third places and winning the matches. This year, with a new coach, Dr. R. R. Sermon, a larger squad than ever before should be practicing daily down on Riddick or Freshman Field. Whether or not State will have a winning team next spring depends largely on the number of contestants there are for each place, so the captain and manager are trying hard to get a large number interested enough in their college to at least see what they can do in the track or field events.

**HAIG RETURNS FROM
LIVESTOCK SHOWING**

Last week Professor Fred M. Haig, of the Animal Husbandry Department, returned from the International Livestock Exposition, which was recently held in Chicago. He reports an excellent show, and states that he had a fine time interviewing breeders, herdsmen, and judges.

In an account written for local papers he describes very interestingly how the grand champion steer was auctioned off for three dollars (per pound). This animal was bought by Armour & Co. and was used in the Biltmore Hotel in New York. The price paid was \$4,680.

CHI TAU INITIATION

Beta Chapter of Chi Tau fraternity has initiated Thomas J. Stewart, of Kernersville, a member of the Sophomore class.

The initiation was held at Page Hall at seven-thirty. Besides the active members present there were two alumna: Mr. Floyd Lutz and Mr. H. G. Overall.

Stewart is a member of the State College Band and German Club.

**"Red On The Head"
Club Is Organized**

**R. M. Currin Will Lead the Knights
of the Flaming Locks Toward
Social Distinction**

On December 9 all the red-headed boys on the campus were asked to meet in the Y. M. C. A. About 40 responded and they formed a club. A better name being lacking they will be known as the "Red-on-the-Head" Club.

After much discussion and due deliberation as to who were the best social leaders, the following were elected as leaders:

President, R. M. Currin; vice-President, H. J. Carr; secretary-treasurer, H. J. Stafford; reporter, J. D. McColl. All these men are "red on the head" and they were selected from different schools. In this way the club will get the viewpoint of them all.

Red Currin is a Senior in E. E. He

has had four years experience in Raleigh society and was elected as the "big cheese." All the others were sophomores from different schools.

Red Carr is taking vocational education. Red Stafford, business administration, and Red McColl is taking agriculture.

This is to be a social organization and they planned to give a reception after Christmas. At the reception all red-headed men who were not at this meeting and are acceptable will be initiated.

A canoe is like a small boy—both behave better when paddled from the rear.

Varsity and Freshman Team Show Strength In Encounter

SPENCE STAR OF GAME

McDowall, Brown, and Williams Look Good for Varsity, But Freshmen Show Fight

The Varsity basketballers cracked the ice that hitherto had covered the basketball season last Monday at the gym, and completely sunk the Freshman crew under the cold and icy waves of a 33-22 score. This was the first practice game for either side, but many were the thrills that were interwoven at various intervals. The fast dribbling, dodging, accurate passing, and still more accurate shooting, the excellent guarding of McDowall and Williams, and the ability of Holden and Spence to cover the court, were some of the features of the game that delighted the spectators.

The contest started with Goodwin getting the tip-off and deftly passing to Holden. He then lost the ball to Brown, who shot it to Gresham as he came rushing in. Gresham then caged the ball from a difficult angle. For a while thereafter it looked as if the Varsity was to have no competition, for it rang up eleven points before the yearlings were able to find the basket. But theirs was not to be an easy path to victory. The Freshmen took heart when Goodwin caged a beauty, and from then on the Varsity found that it would have to play basketball to win.

Twice in the first half the '29's brought their total within three points of their opponents by the excellent shooting of Holden and Goodwin, but each time the Varsity would sink a goal or two to put them out of immediate danger. The half ended 17-12 in favor of the Varsity. The final period was harder fought, and it witnessed the deadly accuracy of Spence, who shot five goals. In this time Brown got two, Owens, substituting for Goodwin, two, and Holden one. Three times did Sammie's Freshmen try desperately to tie the count, but, regardless of all effort, Tebell's Terrorers were able to keep a three-point margin.

Spence, with 12 points, and Brown with 8 were the main cogs in the Varsity's offensive, while the guarding of McDowall was a feature of the game. Holden, Goodwin, and Owens, each with 6 points to their credit, were the most outstanding players for the Freshmen.

Line-up:

Varsity (33)	Freshmen (22)
Gresham	Taylor
Bremer	Holden
Brown	Goodwin
Williams	Troglen
Davis	Scott

The fact is, doctor, I see specks in front of my eyes. Why not take them off?

WOLFPACK ENTERTAINED BY THE R. H. FERGUSONS

Bevy of Beautiful Young Ladies Assist in Celebration of Victory

The members of the 1926 Wolfpack were the guests of honor at an entertainment last Saturday night at the home, near Neuse, of Mr. and Mrs. R. H. Ferguson, '08, who gave the team a barbecue for beating Wake Forest 6 to 0.

The boys, thinking that they were going on a stag party, were very much surprised when they entered the home of Mr. Ferguson and found a room full of good looking girls. After they got over their shock they fell into spread formation for a short while. Then they shifted into bull formation while the delicious barbecue, Brunswick stew, cake, salad, buttermilk, and many other delightful things were served. During this formation, talks were given by Mr. Miller and Mr. Ferguson.

After the battle was won, the party had a short intermission while the team went off to elect the captain and manager, of the 1926 football team. Short talks were made by Charlie and Walter Shuford, Coach Tebell and "Tubby" Logan, after he was elected captain of the team for next year. Then the team went back to their girls and danced for a while.

Just before the team left the joyful party, Mr. Ferguson said that he would give them another barbecue next year if they would beat Carolina, and yet another if they beat Wake Forest. The team grunted and said, "Well, we'll get fat on barbecue next year." As they were ready to leave they gave the Fergusons and their young ladies some very enthusiastic Wolfpack yells.

HORTICULTURE STUDENTS VISIT LINDLEY NURSERY

The Junior Class in Horticulture went to Greensboro to visit the nursery and greenhouses of the J. Van Lindley Company last Friday.

The object of the trip was to study the methods of the propagation of flowers and nursery stock. The large greenhouses were inspected with a view in mind of getting practical knowledge along floricultural lines.

From the greenhouse the class went to the Lindley Nursery branch farm on the Winston-Salem road and observed the operations that were being practiced in commercial production of fruit trees and ornamentals.

The trip was gotten up by Prof. G. O. Randal of the Horticultural School and his class in plant propagation, consisting of "Country" Ginn, R. S. Gaston, T. D. O'Quinn, and E. B. Cameron.

"What was that noise?" "A fellow with balloon trousers sat down on a tack."

F. G. "TUBBY" LOGAN

Captain of the 1926 Wolfpack and one of the foremost centers in the State.

LOGAN IS ELECTED WOLFPACK LEADER

Habel Succeeds the Elongated Morris as Manager of Eleven

F. G. "Tubby" Logan, of Shelby, State center for the past two years and one of the outstanding pivot men of the Southern Conference, was named captain of the 1926 Wolfpack Saturday evening at a barbecue supper tendered the squad by Mr. R. H. Ferguson, a State College alumnus of '08. F. W. Habel, of Raleigh, will manage next year's team.

With the election of center Logan, the captaincy of the Techs returns to the line after an absence of one year. This year the captain, Al Johnston, was a member of the backfield, but "Fighting Cleve" Beatty, 1924 captain, and the famous "Big Dick" Bostian of the 1923 'Pack, were both linesmen and both centers at least part of the time.

The position of manager makes a great change, too, since the honor takes a great tumble from the heights. From the "heights," of course, of "Flop" Morris's well elevated shoulders to the much lower but no less sturdy ones of "Diddy" Habel.

FRATERNITIES CONSIDER FINANCING OF HOUSES

Harry Hartsell, former coach of this institution, who is now with the Jefferson Standard Life Insurance Company, was a frequent visitor for the purpose of devising ways and means of building fraternity houses with little capital. His plan will build a fraternity house with several little insurance policies. These policies are gifts made to the fraternity by active and alumnae members. They are not high enough to be a burden to any member. This policy should be made by graduate students so as to help their fraternities for a period of years at little expense. These policies will keep the active members from bearing all the burden of building houses if the alumnae cooperate.

HICKS WILL WRESTLE

"Red" Hicks, contrary to the announcement last week, will continue to hold down his place in the 149-pound class on the State mat team. Last year "Red" was one of the mainstays of the team and his loss would have been badly felt.

FOOTBALL MONOGRAMS AND STARS HAVE BEEN AWARDED

Fourteen Receive Monograms, While Seven "Old Timers" Receive Their Stars

Seven "Wolves" of the 1925 Pack have been awarded stars, and fourteen received monograms for the first time. Stars went to captain-elect Logan, White, Donnell, Johnston, Jennette, and the Shuford brothers, Charlie and Walter, and Bynum, Black, Nicholson, Evans, Lambe, Austell, Beatty, Kilgore, Watkins, Thomas, McDowall, Hunsucker, Wilson, and Manager Morris were awarded monograms.

The football monograms are given on a basis of the amount of time a player takes part in Conference games. Austin, Anthony, and a few others got in some games, but did not play a sufficient amount of time in Conference games to win monograms.

College Rifle Team Getting Into Shape

Second Battalion Team Wins From First and Third Battalions in Recent Match

Saturday afternoon, at 2 o'clock, the Second Battalion defeated the First and Third Battalions of the North Carolina State College Cadet Corps, by a margin of 14 points. The shoot was held on the College rifle range.

Last fall when Captain W. E. Vernon came to State College, he brought the idea that there should be competitive rifle shooting among the students. So when the Cadet Corps was divided into battalions, forty men were asked to volunteer and go out for the rifle team from each battalion. The call was answered and the last eight weeks have seen active firing practice on the college range.

On Saturday, December 5, the sixteen highest scoring men from each battalion was selected to practice more intensively for the battalion team, and on Friday, December 11, the ten highest men from each battalion were selected for the battalion rifle team.

On Saturday the three battalions held a shoot and the Second Battalion, composed of

Name	Score
Greene, L. M. (Capt.)	175
Barnhardt, M. L.	186
Hales, J. E.	182
Vinson, A. J.	175
Baxter, W. K.	177
Oliver, S. C.	164
Wooten, J. B. C.	168
Smith, W. H.	161
Smith, L. C.	153
Rives, H. R.	154

won the match shoot by a score of 1695. The Third Battalion had a score of 1678.

The First Battalion had a score of 1632. The men for the College rifle team will be selected from the highest scoring individuals of the three battalions. Already there are a number of matches arranged for the College team to shoot, the first being on January 9, 1926.

GRAPPLERS WILL OPEN SEASON FRIDAY NIGHT

The Raleigh Y.M.C.A. Will Meet Local Team in Initial Encounter

After a month and a half of hard work-outs, the wrestling team is well rounded into shape for their first meet of the season Friday night.

The State grapplers will meet the strong Raleigh Y. M. C. A. team here at that time with the determination to begin the season right. Competition has been unusually strong in several of the weights, but the keen observation of Coach Hicks can be trusted to pick the best men for his team this year.

A previous article in THE TECHNICIAN stated that Coach Hicks would not be eligible to wrestle on the team this year. This statement was incorrect, and the line-up for Friday night will show Red back in his old place, in tip-top shape.

A probable line-up for the State team is as follows: Spry, 119 pounds; Ginn, 129 pounds; Kelam, 139 pounds; Hicks, 149 pounds; Harrell, 162 pounds; Nicholson, 175 pounds, and Lambe, heavyweight.

Misjudged Seniors

In last week's TECHNICIAN our editor was unduly harsh on the brainier part of the student-body, namely, the Seniors.

The greatest test that a real he-man has to face is to be dubbed "sissy," "old maidish," and the like.

The delectable game of gently tossing rolls, bread, beans, and other handy missiles at others in the dining hall did not originate with the dignified Seniors, but rather with the more youthful members of the student-body on the east side of the mess hall.

The sport migrated to the west through an act of necessity. The classic was partaken of by so many of the under-classesmen, and so thoroughly enjoyed by them that the Senior side of the house was dubbed "sissy" until they too joined in the gentlemanly art of eating one roll and giving two to your neighbor—beside the head.

This athletic function of the Seniors will persist until they or some one petitions the childish under-classesmen to postpone their youthful antics to a different time. When this is done, the Seniors can regain their poise of dignity and yet retain their self-esteem against epithets of being "old maidish."

Habits are terrible. To greet the future in-laws with a bowl of soup or the thigh of the turkey at the Christmas day feast would undoubtedly interfere with the future love nest.

J. B. BRITT.

Little Edna (seeing mother's new evening dress, just arrived): Oh, mamma, how lovely! Will you wear it tonight?

Mother: No, dear, not tonight. This is for when ladies and gentlemen come to dinner.

Edna: Oh, mamma, let's pretend just for once that papa's a gentleman.

W. H. BEATTY
Running Mate of Austell and a Fast Flanker

FRESHMAN CLASS RUNS SPEEDY DISTANCE RACE

First Fifteen Men That Finished Will Receive Intra-mural Sports Medal

Monday afternoon the department of Physical Education put on their big event of the fall term in the form of a cross-country race. All the freshmen except the basketball squad, the football squad, and the cross-country squad participated. The race was long and hard, as the course went through the park, around by the Catholic Orphanage, back by the barns, and finished on the Freshman Field.

Brimley, of the varsity cross-country team, led the way and set the pace. The time was very good as the leading men finished in twelve and one-half minutes, and every one finished within the eighteen minutes allowed.

Mr. Parker states that he is intending to make this an annual event, and that hereafter it will probably be run at the first of the term, so as to discover good material for the cross-country team.

The first fifteen men who finished will receive the regular Intramural Medals. Those winning the medals were: T. Freeman, A. I. Tanfield, L. R. Cain, J. F. Mitchlin, C. R. Prevatt, G. R. Williams, Stokes White, W. Munch, R. E. Kimble, W. M. Daughtridge, H. T. Cherry, F. T. English, J. A. Clayton, H. W. Cartner, and C. E. Craver.

The above names are given in the order in which they finished.

HOMEWOOD PICKS ALL-STATE FROSH ELEVEN

(By JAMES W. COOPER.)

Coach Sammy Homewood, of the Wolflets, has picked his All-State Freshmen football team as follows:

Ends: Dedmon, State, and Leonard, Wake Forest.

Tackles: Ellis, State, and Zimmerman, Wake Forest.

Guards: Ford, State, and Shuler, Carolina.

Center: Swartz, Carolina.

Quarterback: Adams, Duke.

Halfbacks: Melton, State, and Foard, Carolina.

Fullback: Outen, State.

State placed five men; Carolina, three; Wake Forest, two, and Duke, one. Davidson was the only member of the "Little Five" that did not place a man.

His ends are very good handlers of passes, run good interference, and can go down the field well under punts. At tackle these two hefty men are terrors on both the defense and offense, and are always giving the opponents' backs a hard time. In guardsmen he is well fortified. Foard and Shuler both know their business, and always get their man. Swartz is the best pivot man of practically any Freshman team in the South. For the past four years he has been a regular member of the All-Southern High School Team picked annually by the "Lakeland News" of Lakeland, Florida. His last year at Charlotte he was made captain of the All-Southern Team, having been a member of it for three years in succession.

In Adams, at quarter, he has a very good field general, daring at times and very brainy. Foard and Melton are fast, sure tacklers and good receivers of passes. Outen, at fullback, is a hard line plunger, an excellent passer, a splendid kicker, and follows his interference well.

Gladys: "Are you going to be busy tonight?"

Edith: "I don't know. This is my first date with him."

N. B. NICHOLSON
Tech's Only All-State Man This Year and a Really Great Linesman

Frats Form Real Basketball League

Regular Schedule of Games Will be Played, Commencing on January 11

On December 15 there was a meeting of the representatives from all the fraternities on the campus that were interested in basketball. It was at this meeting that the decision was made to give a silver cup to the team that won the inter-fraternity championship in basketball.

There were nineteen fraternities represented at this meeting, all of which are more than anxious to secure the cup. There was, last year, much interest shown in intramural athletics by the participants, but there wasn't, however, much outside interest. But with a year's experience along this line and more teams taking part, the inter-fraternity basketball league is going to put out some real stuff, which will no doubt cause quite a bit of interest on the part of outsiders.

The series of games to be played will start January 11, 1926. Coach Parker has arranged the teams in two divisions. The arrangement is so that each team plays every other team in its division once. Then the winners from each division play off the championship by either one or three games, which will be decided later. The games are run on a percentage basis, the same as last year. The team in a division having the highest per cent after playing all other teams in that division is automatically the winner, and will compete for the championship against the winner of the other section.

A. H. THOMAS
Diminutive quarterback of the 1925 Techs

NOTICE

Lambe, Wilson, Kilgore, Beatty, Watkins, and Manager Morris also were awarded monograms, but cuts of them are not available for this issue.

CHANGE NECESSARY IN CAMPUS STREET

The problem of connecting the driveway in front of dining hall and "Y" has attracted much attention since the building committee has closed the street by extending the Textile building on the east end instead of the west as was first planned. Several solutions have been submitted but the landscape engineer has decided to let the new street wind its way between Pullen and Primrose Hall. It will leave the "Y" street near the rear of Pullen Hall and make connections with the main entrance near the front of Primrose Hall. By making a double curve the street will miss all the beautiful shade trees as well as the buildings. The street will be twenty-five feet wide, of gravel construction, and curbed with concrete.

R. E. BLACK
A Sub-center Who Shifted to Guard and Made an Enviably Record in that Position

Noted Chemist Here For Recent Meeting

N. C. Section of Chemical Society Hear Dr. J. F. Norris, President National Society

Dr. James Flack Norris, of Boston, president of the American Chemical Society, and one of the most noted chemists in the country, was the principal speaker Monday night at a special meeting of the North Carolina section of the society held here.

Mr. Norris stressed the importance of the laity having a knowledge of chemistry, due to the fact that chemistry has a vital relation to the intricate modern life of today.

He said that chemistry had done much to solve the food problem, becoming increasingly difficult with the increase in population. He enumerated various processes which had been discovered, including that for the fixation of atmospheric nitrogen and the solution of problems of soil fertility.

Chemistry, he said, had contributed to facilitating the clothing of the people by discovering a substitute for silk, and would soon offer a substitute for wool.

He predicted that as a result of chemical discoveries the working day could be cut to four hours.

Dr. Norris is a member of the National Research Council, vice-president of the Institute of Pure and Applied Chemistry, and professor of organic chemistry at the Massachusetts Institute of Technology, Boston.

At the dinner which preceded the

JACK McDOWALL
State's fast-stepping, accurate-passing, and hard-kicking halfback

address a business meeting of the state chemists was held, at which they went unanimously on record in favor of a resolution which asks the State Salary and Wage Commission to adopt a regulation to the effect that the terms of employment, salaries, and promotions of technically trained employees of the State be established by the particular department, board, or commission by whom such technically trained person is employed, in accordance with the individual merit and worth of the employee.

Dr. F. E. Rice, of State College, is president of the North Carolina section of the American Chemical Society, and L. B. Rhodes, of the State Agricultural Department, is secretary and treasurer.

"Where are you going?"
"No place."
"You must be going some place."
"Uh-huh; I'm coming back."

The COFFEE SHOP CAFE

225 S. Wilmington Street

QUALITY —plus— SERVICE

When the second act has come to an end—and the curtain is rung down amidst whirling applause—when you mingle outside with the excited throngs in the lobby—have a Camel!

Into the making of this one cigarette goes all of the ability of the world's largest organization of expert tobacco men. Nothing is too good for Camels. The choicest Turkish and domestic tobaccos. The most skilful blenders. The most scientific package. No other cigarette made is like Camels. No finer cigarette can be made. Camels are the overwhelming choice of experienced smokers.

WHEN the thrilling second act has come to an end. And you join the crowds outside just as pleased and thrilled as yourself—have a Camel!

For no other friend is so cheerful, so resting between acts as Camel. Camel adds its own romantic glamour to the brightness of memorable occasions. No other cigarette ever made—and kept—so many friends. Camels never tire your taste, no matter how liberally you smoke them. Camels never leave a cigaretty after-taste.

So when you leave the theatre pleased and inspired for greater things—taste the mellowest smoke that ever came from a cigarette.

Have a Camel!

Our highest wish, if you do not yet know Camel quality, is that you try them. We invite you to compare Camels with any cigarette made at any price. R. J. Reynolds Tobacco Co.

ANIMAL HUSBANDRY MEN ORGANIZE AND BANQUET

New Club to Promote Livestock Interests in This State; Worth President

At a banquet given by the students and professors of Animal Husbandry Saturday night, December 12, an Animal Husbandry Club was organized.

The first thing on the program was a banquet. The first course was made up of dairy and meat products. The dairy products, consisting of sweet and buttermilk, butter and cottage cheese salad, was prepared by the students taking Dairy Manufacturing. The meats: pork sausage, pork chops, and bacon were obtained from the farm meats class, which butchered, cured, and prepared the different meats.

To balance these things chipped potatoes, pickles, and finger rolls were added. Following this grape nut ice cream and cakes were served, after which cigars and cigarettes were passed around.

The entertainment consisted of music by P. M. Hendricks on a mouth organ, and clog dancing by B. A. Sides. Jokes were then in order. Professors Clevenger and Ruffner told some very appropriate and original jokes.

An Animal Husbandry Club was then

organized. The students of Animal Husbandry have felt this need for some time and the occasion offered an excellent opportunity. In order to keep progress with the growing facilities offered here in Animal Husbandry the students felt that organization would be a means of progressing with the better and enlarged program.

The purpose of the club is to stimulate interest and cooperation along animal husbandry lines.

In order to take care of the fun and social side of the program to be carried out, an affiliation with "The Ancient Order of the Scrub Bull" was made.

The officers elected are D. C. Worth, president; R. E. Nance, vice-president; J. E. Foster, secretary-treasurer, and B. A. Sides, reporter.

The room was appropriately decorated with pine trees and beautifully tanned hides. The hides were tanned by the students.

The Club adjourned well pleased over the outcome of the meeting and enthusiastic about their future program.

CHAMPIONSHIP TAG MEN WILL RECEIVE MEDALS

The South End of 1911 team won the tag football championship of the league, and the following men of that team will receive Intramural Medals: C. B. Utter, C. B. Browne, G. D. White, P. A. Raper, J. C. Winchester, R. B. Winchester, R. G. Christopher, E. L. Jordan, E. P. McKaskill, F. C. Winston, J. N. Woodside, B. A. Sides, R. H. Bullock, W. N. Case, and W. F. Fowler.

TOSS OF COIN DECIDES GAME FOR "A" AND "H"

Saturday afternoon, December 12th, witnessed the best game, so far, of the inter-company football league. At that time Co. "A" defeated Co. "H" by a "flip of the coin," after playing two extra periods. In case Co. A wins the championship, Co. H has the right to play Co. A again. The tie was scoreless.

A CORRECTION

In justice to Mr. S. F. Peterson, a sophomore in the School of Science and Business, we wish to correct an error which appeared in these columns last week. A news item stated that this gentleman had received a hair cut at the hands of Sophs. The recipient of the free hair cut has the same name but different initials. We are glad to correct this error.

ALUMNI NOTES

(Observations and Communications of Zippy Mack)

Before we begin the chatter about the old fellow, let us pause here long enough to pass along a little Christmas spirit in the form of congratulations to those fellows who have distinguished themselves of late, namely, "Tubby" Logan, new captain of the Wolfpack; "Charlie" Correll, new president of Pullen Literary Society; "Pe-Leg" Shaw, new president of the Leazar Literary Society, and last but not least, "Daddy" Price, the newly promoted Major. We're right proud of all of you. And now, may the happiest of Christmases and the most prosperous of New Years be upon you, and all of State College.

Mr. Early C. Smith, of the '25 Civils, and Miss Blonza Holleman were married Saturday, December 12, at New Hill. The newlyweds passed through Raleigh on their tour, but left no information as to the places they plan to visit.

Mr. and Mrs. J. F. (Sheriff) Turnage, of Jacksonville, Fla., announce the arrival of Sheriff, Jr. The elder Sheriff was for a time a member of the Class of '23, Electrical, later aligning with the Class of '24, and still later going to Florida, where he is doing well in the contracting business.

Mr. J. K. (Jake) Wells, of the '24 Mechanicals, was on the campus recently. He is now stationed at Greensboro, in the employ of the Trane Company, heating specialists, whose home office is located in LaCrosse, Wis.

Mr. F. B. (Bruce) Newborn, of the '24 Textiles, paid us a visit the other day. He is still with Marshall Field, operating out of Grifton.

Mr. S. R. (Sam) Wallis, last year's editor of THE TECHNICIAN, came around the office last week. He is now doing demonstration work in Buncombe County.

Mr. T. W. Bridges, of the '24 Vocationalists, came through town the other day to tell us that he is still getting along with his job of teaching Agriculture at Nashville, N. C.

Mr. T. R. (Tom) McCrea, '25 Chemical, was in town Tuesday to make a talk before the meeting of the State food and dairy inspectors. He is with the State Department of Fisheries, stationed aboard the floating laboratory, Pamlico, at Morehead City.

Mr. L. L. (Hootchie) Hedgepeth, of the '25 Chemicals, is in town for the meeting of the food and dairy inspectors. He is with the Department of Sanitation of the city of Thomasville, North Carolina.

MEREDITH NEWS

(By LEONE WARRICK)

Dr. Brown's organ recital at the First Baptist Church Monday, December 7, showed the ability of our music director to be of a very high grade. He gave the following program:

- RomanceChauvet
- Barcarolle, Op. 110, No. 2.....Godard
- Santa, Op. 42.....Gullmunt
- Introduction
- Allegro
- Pastorale
- Finale
- Andante CantabileWidor
- FantasiaCallaerts
- GavotteThomas
- Overture RaymondThomas

Some of the meetings of the State Literary and Historical Association and the North Carolina State Art Society were held at Meredith on December 10 and 11. On Friday evening, the eleventh, an address, "Art for Every One," was given by Homer St. Gaudens, Director of Fine Arts, Carnegie Institute of Pittsburgh. This address proved that it is entirely possible for a lover of baseball to be also a lover of art. Mr. St. Gaudens' lecture was deep enough to entertain the most intellectual and simple enough for the least artistic to understand. A series of stereopticon pictures of great paintings and art museums was used in the course of the lecture, in connection with the problem of an art

museum for Raleigh. The illuminating and entertaining character of this address deserves a vote of thanks to the Art Society and to Mr. St. Gaudens. The society is also to be thanked for the exhibit of paintings and copies which was on view in the parlors.

Saturday night the Junior class entertained the Freshmen with a theatre party at the State. The program was Keith's, and was enjoyed by everybody, hostesses and guests alike.

Our Christmas holidays will begin December 22 at 2 o'clock, and will end Wednesday morning, January 6, at 8:30. By that time we expect to be installed in our new buildings, and to have all of our earthly possessions removed from Old Meredith. The problem of the Sunday check is solved at last in a way that is satisfactory to all concerned.

We note with pleasure that all the

men at State College are not so indifferent to women as the editor of THE TECHNICIAN professes to be. Mr. Long's Ten Commandments are perhaps a bit too idealistic, but of sound principle. It has been suggested that some one write a set of requirements for men. Personally, we think Moses did the job much better than we could ever hope to, and so we will let it go at that.

Bell and Spigot Joint

THE Bell and Spigot Joint for Cast Iron Pipe adopted over one hundred years ago, is the preferred joint today.

It is tight, flexible, easily made and non-corrodible—there are no bolts to rust out—it makes changes of alignment or insertion of special fittings a simple matter—it can be taken apart and the pipe used over again, without any injury—it is not subject to damage in transit—in fact, it embodies practically all of the desirable qualities in an underground joint.

"THIRTEEN" CLUB ORGANIZED HERE

Will Seek To Improve Social Life on Campus; Has Thirteen Members

A new Junior organization has been founded on State College campus. This organization is called the "13" Club, limiting the membership to 13 active men who are outstanding men on the campus. The purpose of this organization is to create a better spirit among fraternity and non-fraternity men on the campus as well as to create stronger friendship among classmates. The men will soon be noticed on the campus wearing a characteristic lapel button which signifies men of this order. This organization further purposes to sponsor social functions which will be outstanding at State College and Raleigh. These will take the form of formal dances, one each term, one banquet a year, and frequent smokers on meeting nights.

Such an organization has been needed on the campus for several years and the fact that it is now established and well under way will do a great deal towards bridging the distance between fraternity and non-fraternity men on the campus.

The following men are active members of the "13" Club:

1. "Aze" Jones.
2. John Dolterer.
3. Skeet Green.
4. Kirt Stringfeller.
5. Hugh Fields.
6. Robert Swindell.
7. Jack Davis.
8. "Nick" Avera.
9. Ed. Poole.
10. Carter Hudgins.
11. Bill Shope.
12. Bill Ward.
13. Snooks Nowell.

Kampus Komics

First Boy: "I'm embarrassed awfully; I've got a patch on the seat of my pants."

Second Boy: "Don't let that bother you; think how you would feel if it wasn't there."

Sinner: "Do you believe I'll recognize my loved ones in heaven?"

Saint: "Not at the distance you'll have to look at them from."

Dr. Simmons: "How did David kill Goliath?"

Student: "He rocked him to sleep."

Error!

Prof.: "You made 99 in that last exam. Why did you not get a hundred?"

Freshman: "There must have been a misprint in the book, sir."

He Knew

Soph.: "Do you keep a diary?"
Fresh., from city: "No, but my uncle does and has thirty cows in it."

Dumb Dribbles

Aviator (after doing a nose-dive): "Half the folks below thought that we were going to fall, didn't they?"

Passenger: "Yes, and half of them up here thought so, too."

Billie: "What do you call baby pigs?"

Helen: "Hamlets."

She had just been kissed. "You will pay for this," she stormed.

"I'll tell my father and he'll—"

"But, dear—" he started to object.

"Sh! Here he comes now."

He hated to have his photograph taken, but he at last consented. When his wife saw the proofs she cried "Oh! George, you have only one button on your coat."

"Thank goodness," he replied. "You've noticed it at last. That is the only reason I had the picture taken."

ANOTHER CLUB

Running parallel to the Ancient Order of Postal Card Givers for Christmas is the Effervescent Lodge of Photograph Donators. It is reported that three-fourths of the boys had extra pictures taken during the *Agromeck* rush, and since a fair exchange is no loss many boys will probably have the likeness of the one they left behind when they return after the holidays.

Freshman Friendship Council Has Banquet

Otis R. Hinnant, of Wilmington, Lectures on the Subject of "Personal Influence"

On Monday evening, December 7th, at 7 o'clock, the Freshman Friendship Council of State College enjoyed a delightful banquet and an address by Mr. Otis B. Hinnant in the increasingly popular banquet room of the Y. M. C. A. This event was a pleasant and inspirational climax for the work of the council for the fall term of this year. Approximately forty members of the council were present. Mr. Hinnant, Secretary E. S. King, and Mr. J. A. Morris were the guests of the evening.

"Abbie" Holden, president of the council, was in charge of the meeting. During the last course of the banquet several most pleasing selections were rendered by the State College Freshman Quartette.

Before Mr. Hinnant's address, Secretary King stated briefly the purpose and goal of the Freshman Friendship Council.

Mr. Otis B. Hinnant, of Wilmington, one of the leading Boys' Work secretaries of America and a great friend of this college, spoke in a challenging and inspirational way. He urged that every man stop and analyze the powerful, though subtle, factor of our daily relationships, usually referred to as "personal influence." In essence, he said: What the boys on State College campus do is what the boys of State College brand as popular. Whether our college has high or low standards of conduct and life, incidentally a good or bad reputation, depends on whether our students have conviction, and how strongly this conviction appears in the realm of "personal influence," as we go the rounds of our daily work.

Mr. Hinnant's theme brought a deep and powerful response from those who heard him. This meeting helped to bring about the proper and strong relation that must be established between the members of the council, if the purpose and ideals of the organization are to be attained. With a new energy and greater determination, we turn to the work of next quarter.

CERAMIC SOCIETY IS EXCEEDINGLY ACTIVE

The American Ceramic Society, although one of the newest societies on the campus, is, without a doubt, one of the most active.

This is exemplified in the fact that there were twenty of the twenty some odd members in attendance at the regular monthly meeting held December 1st in Page Hall. Among those present at this meeting were Prof. Greaves-Walker and Dr. Shelton, both executive heads of the Ceramic Department of N. C. State.

After the regular business of the organization was completed, including the formal initiation of four new members, we were favored by a short talk on the Science of Colloids, by Dr. Shelton. Dr. Shelton introduced his subject by first quoting the names of several noted chemists, and at the same time mentioning their achievements in the Science of Colloids. He then told us where colloids might be found in our every-day life, and also described and demonstrated several preparations of colloids. It is needless to say every one found the talk very interesting as well as instructive, and agreed that the study of colloids was one that we might pursue farther with no end of personal satisfaction.

The "Smoker," which the society held on December 3d, was also well attended. We had as our guest on this occasion Lieut. Passallaigue, a new character in our midst, and who is now connected with the local organization of the R. O. T. C.

After hearing one or two short talks, the fellows got next to the "Inner Man" and satisfied his cravings, and passed a most enjoyable social hour together.

POULTRY SCIENCE CLUB WILL ELECT OFFICERS

The Poultry Science Club met Thursday night, December 3d, in Ricks Hall, and a very interesting program was given. The election of officers was put off until the last meeting of the club before Christmas.

The first speaker was W. E. Donnell on "The Five Fundamental Factors in Incubation." He described the different stages of development of the

chick embryo and showed how the absence of any of the five fundamental factors might affect the developing chick.

"Why we should work hard to make the Poultry Judging Team" was discussed by W. W. Keever. Keever was alternate on the team last year, and is eligible for it again this year. He made a very interesting talk and discussed the advantages of making the Poultry Judging Team from the business as well as the social standpoint. J. J. Barnhardt concluded the program by discussing "Success With Fancy Market Poultry."

It was decided to have another meeting before Christmas, and to elect officers for the next term at this meeting.

S. B. LEE, ASST. PROF. SOILS AND GEOLOGY

Mr. Samuel Bogard Lee arrived at State College recently as an assistant professor in the Geology and Soils Department. He will teach mainly Soil Fertility and Soil Management.

Mr. Lee was born at Four Oaks, North Carolina. He did his high school work at Benson High School, then entered the University of North Carolina, where he received a Bachelor's Degree in 1920 and a Master's Degree in 1921. He was one of Carolina's strongest intercollegiate debaters.

Mr. Lee spent two years instructing and doing graduate work at Ames College, Iowa. He has also had two years of graduate work at Cornell University. In the spring of 1925 he was awarded a Research Fellowship in the University of Chicago.

On November 4, 1925, he was married to Miss Alma Marie Weigmann, whose home is in Chicago.

Mr. Lee is a man of high ability and a pleasing character, and we wish to welcome him to State College.

COMPANY "C" WINS FROM COMPANY "E"

Company "C" won from Company "E" in Inter-Company Football on Wednesday evening, after a hard-fought game, by a score of 15 to 0. There was some brilliant work on both sides, although Company "E" went scoreless. During the entire game there was plenty of fight displayed by each side.

MILITARY DEPARTMENT TO STAGE AN ENTERTAINMENT

Vaudeville and Musical Program Will be Given for Benefit of Infantry Memorial

In connection with the musical organizations of State College the Military Department is planning to give an entertainment. The entertainment will be given some time after the Christmas holidays. There will be vaudeville acts with the music.

This entertainment is for the purpose of raising money for a contribution to the Infantry Memorial, to be erected at Fort Benning, Ga., which is being erected in commemoration of the American soldiers who gave their lives in France. It is being erected by contributions from all divisions of the U. S. Military Department.

Lt. Col. Abe Jones is at the head of the entertainment and it is urgently requested that anybody having vaudeville talent report to Colonel Jones and help make "Abe Jones's Scandals" a success.

The program is to be composed of the best material that can be secured on the campus and also several community people. The entertainment should be worth the few cents that it will cost to be there. No one should begrudge a little money that is to be spent for so worthy a cause. It should make every American's heart swell with pride to know that he can honor the "Doughboys" who gave their lives on the fields of France.

The place and price of admission will be published later in THE TECHNICIAN. Let's go.

SUMMER LECTURES ON A.S.M.E. CONVENTION

Mark Sumner, president of the student A. S. M. E., gave a very interesting talk before the society on Tuesday, December 15. Mr. Sumner has just returned from New York where he attended the National A. S. M. E. Convention. Forty-five student branches were represented. N. C. State had the distinction of having the only representative from the Southern States at the convention.

Mr. Sumner told of the various meetings of the student representatives, and suggested a number of ways in which our student A. S. M. E. might be improved. It was pointed out that the N. C. State Student A. S. M. E. was one of the most active in the country.

A tour through the Brooklyn Edison plant was one of the most interesting experiences of the trip. "Preacher" Wooten, E. E. '24, is employed by this company, and acted as a guide for Mr. Sumner while at the plant.

The society was very much amused at some of Mr. Sumner's personal experiences in New York. His talk was one of the most interesting given this year.

CERAMIC ENGINEERING FRATERNITY INITIATES

Beta Pi Kappa, a professional Ceramic Engineering fraternity, organized on the campus last year, held an initiation ceremony in the Y. M. C. A. last Thursday evening when Albert J. Terry of Kingston, N. Y.; D. B. Hall, of Hornell, N. Y., and A. B. Thomas, of Acme, N. C., were taken into membership.

The fraternity also extended bids to A. McKinley Greaves-Walker, Raleigh; T. R. Dean, North Wilkesboro, and L. O. Dixon, Mebane, Freshmen, who will be initiated at the end of the spring term, providing certain scholarship standards are maintained.

Beta Pi Kappa has for its main objects the promotion of scholarship and a high moral standard among Ceramic Engineering students.

BACHELORS' CLUB IS BEING ORGANIZED

Keeping up the fad of organizing, several students here have formed a new club known as the Bachelors' Club. Details of the organization have not been completed yet, but it is understood that membership will be very selective. It is rumored that one of the requirements for membership is that the candidate must have been "kicked" by at least six different girls. Just what their attitude toward women will be has not been learned.

The charter members have not been announced, but it is generally known that many prominent Seniors are affiliated with the society. This paper hopes to be able to announce further details in the next issue of this paper.

S-O-C-I-E-T-Y

All Social and Personal News turned in to The Technician office will be appreciated

Just what is all
This Christmas cheer,
The bards recall
Anew each year?

'Tis but the lays
Within our heart,
Which sets, of days,
This Day apart.

ZIPPY MACK, '23.

Mr. Joe Powell, '26, spent Saturday and Sunday with his parents in Tarboro.

Freshman John Gorham, who has been in Tarboro since December 5, because of injuries received in an automobile accident, returned last Sunday to resume his studies.

"Nut" Smith, of Carolina, was in Raleigh for the week-end with his parents and visited friends at State.

Mr. R. R. Fountain, '27, visited

friends and relatives in Burlington during the week-end.

Stuart Gaston, '27, was in Burlington visiting last week.

Geo. Fountain, '28, visited his parents and friends in Tarboro for the week-end.

Ed. Poole was at home with his parents in Rocky Mount for the week-end.

C. L. Bland, Jr., of Rocky Mount, was on the campus Tuesday visiting friends. He is now at Poughkeepsie Institute of New York taking a commercial course.

"Pete" Little, of Cheraw, S. C., is visiting his Fraternity brothers on the campus.

"Rip" Summerell, "Rooster" Beal, and "Mike" Eckerson spent the week-end in Lillington, with Mr. C. M. Thacker.

Lady (to tramp): "You want work, my good man, but what can you do?"

Tramp: "Well, lady, I've been a carpenter, a school teacher, and a barber; I can shingle your house, your son, or your daughter."

SOCIETIES APPOINT JOINT COMMITTEE

Has Charge of the Inter-Society Contests to be Held in Future

Desiring to facilitate and simplify all inter-society relations and contests during the year, Pullen and Leazar literary societies have appointed a joint committee on co-ordination.

This committee will have charge of all contests held throughout the year.

At its first meeting, Friday, December 11, recommendations were made concerning the dates and conduct of the oratorical contest and the four class debates. All recommendations were passed by the societies at their regular meetings Friday evening.

Most notable of all the rules in regard to contests was the exclusion of men who have participated in inter-collegiate contests from taking part in events of a like nature in inter-society contests. This clause will exclude all Pi Kappa Delta men, except that they can still take part in debate if they have represented the college only in oratory and declamation or vice versa.

SLACK NEW PRESIDENT POULTRY SCIENCE CLUB

At its final meeting for the term, which was held in Ricks Hall Thursday night, December 10, the Poultry Science Club elected the following officers for the next term: J. B. Slack, president; G. W. Knox, Jr., vice-president; "Red" Utter, secretary-treasurer; C. P. Fishburne, reporter, and C. O. Dossin, graduate student from Connecticut, as critic.

Among other things discussed was the annual poultry feed, which is made possible by birds raised by the class of incubation and brooding. This will be held during February.

Lab Lightning

Douglas F. Miner

SOME of the men at Clark University mentioned it first. "Doug surely lives in the Lab," they remarked. Later, too, at Worcester Polytechnic Institute, instructors made the

same comment. And Douglas F. Miner, himself, agrees that he did—and does. That makes it unanimous.

"Big league lab work" was his aim as he turned to Westinghouse after graduation in 1917. But not until his return from overseas service two years later could he settle down to the lab. Now—at thirty-three—he's in charge of experiments at our Engineering, High Power, and High Voltage Laboratories, with a staff of twenty-five to direct.

He can unleash artificial lightning of 5,000,000 horsepower in 1/1000 of a

second. At his bidding the world's largest single-unit transformer will step current up to a million and a quarter volts.

He has demonstrated the greatest artificial arc on record—fifty-five feet in length. To further his experiments a single generating plant, capable of producing on short circuit a million horsepower, has been erected.

There is a practical reason for these super-tests—for this equipment in advance of what the world uses now in its daily work. This, for instance, is frequently the attitude of a Central Station customer: "Of course your apparatus meets our needs today—takes every test to which we can put it now. But what of 1950? Will this insulation stand the load we will

The question is sometimes asked: Where do young men get when they enter a large industrial organization? Have they opportunity to exercise creative talents, or are they forced into narrow grooves?

This series of advertisements throws light on these questions. Each advertisement takes up the record of a college man who came with the Westinghouse Company within the past ten years, after graduation.

use then? And how many volts will these arresters bear?"

They come to Miner for the answer. He gets it from the laboratories. He produces under a roof the same conditions which nature, or time, may be holding in store for Westinghouse equipment.

Such is the pioneering of Westinghouse Laboratory Engineers. They are "experimenting in the tomorrow"—the step between research and application. They are finding growth, reward, congenial work, while following a bent for trying things out.

Westinghouse
