COLLEGE CAFETERIA OPENS FOR BUSINESS AFTER MANY DELAYS

Will Serve Students and Others
At Reasonable Prices,
It Is Said

THE LARGEST IN RALEIGH

All of the Equipment Is Brand New
and Is Complete In Every
Detail

Supplementing the main dining hall service and catering to residents of the city as well as to the student-body, the new cafeteria opened for business with the reopening of college on Tuesday, and served more than 300 customers during the first three meals. The cafeteria, which occupies the mezzanine floor of the new, or west wing, of the dining hall proper, is owned and operated by the college, primarily, it is stated, for the benefit of those students and college employees who prefer to take their meals in quarters less crowded than the main dining hall, which accommodates about 1,600 people.

L. H. Harris, for many years the dining hall steward at the college, will personally supervise the operation of the cafeteria, although Miss Nina Galling, of Charlotte, will be actively in charge of its management. She will be assisted by Mrs. H. G. Lattimore, also of Charlotte, who will act as cashier, and a corps of skilled workers, which includes several young ladies who will have charge of the steam table service.

Home cooking, according to Miss Galling, a choice variety of foods, and moderate prices, will be featured by the new enterprise. The college does not expect to derive a profit from the business, and for this reason patrons will be served at as near cost as possible. By the operation of the cafeteria, however, the college hopes to simplify its boarding problem by providing additional facilities where excellent meals may be obtained at odd hours. A larger variety of food may also be served, which is expected to appeal to those students who frequently voice the age-old complaint against the sameness of "mess hall fare." The cafeteria is 147 by 36 feet, the largest in Raleigh, and every piece of equipment, Mr. Harris states, is brand new and of the latest type. The steam table and kitchen equipment is said to be unusually complete. All cooking is done on an immense gas range, and the dishes and cooking utensils are cleaned by an electric washer which sterilizes as it cleans.

DEBATES WITH ARIZONA AND GEORGIA BE HELD IN MARCH

State College to Number Among
Series Debates Engaged in
by Cactus Jumpers

Two forensic contests of outstanding interest have been scheduled for the State College wranglers this year. They are the debates with the University of Arizona and the University of Georgia, which are to take place in Raleigh some time in March. The Cactus Jumpers are due to appear on the local rostrum on either March 15 or 16, and the Georgia Crackers will probably come some time during the week of March 26. The Arizona debate will be an Open Forum contest, with a decision by the audience; but the debate with Georgia will be an old-fashioned catch-as-catch-can match, with judges. The proposition to be used for each debate is: "Resolved, That the necessary steps should be taken to abolish Federal prohibition of the manufacture, sale, and consumption of light wines and beer." Light wines are defined as those containing less than seven per cent of alcohol; beer is the usual product with an alcoholic content of about five per cent. "In the contest with Arizona, State will uphold the negative of this proposition. Georgia has choice of sides for their contest, and it has not yet been learned which side they choose to uphold.

The debate between Arizona and N. C. State is one of twenty-nine debates to be participated in by the Arizona team. Some of their other

DR. L. H. SNYDER MAKES SCIENTIFIC DISCOVERY

Associate Professor of Zoology
Reads a Paper Before
Scientists

In a paper read before a recent meeting of the American Society of Zoologists at New Haven, Connecticut, Dr. L. H. Snyder, Associate Professor of Zoology at North Carolina State College told of a discovery he had made and a law he had formulated in relation to the inheritance of blood belonging to one of the four known groups.

At this meeting of scientists discoveries and results of experiments and investigations of zoologists from all over the country are presented. They are very carefully studied and tested, and it found to be of sufficient scientific value they are given wide publicity. The paper presented by Dr. Snyder was the only one from the Southern States to receive this honor. Dr. Snyder is a graduate of Rutgers Agricultural College, New Brunswick, New Jersey, and came to State College in January, 1924. Just at present he is at Harvard, finishing up his three years graduate work, which will be completed about February 1, when he will return to this school. Since his arrival at State College, Dr. Snyder has been experimenting and gathering data leading up to his discovery. It has been known for some time that there are four kinds of human blood. It is necessary to know this in many instances, such as blood transfusion, where the two kinds of blood must be the same. It

(Continued on page 5.)

LIBRARY IS GIVING COMPLETE SERVICE

After many weeks of waiting, the students and faculty of this college have been given the privilege of a real up-to-date library.

Since November 1 the new Hill Library has been giving a fairly good service, but owing to the fact that the furniture and equipment was delayed, the main floor has not been used until this week. The building is now one of the best equipped of its kind in the South, and students should take advantage of the opportunity now being offered for reading and reference work.

APPLE JUDGING TEAM PREPARES

Will Participate in the Southern
Conference Meet; Winners
Go To New York

The State College Apple Judging Team is making thorough preparations for the final contest, which will probably be held in Atlanta the first week in February.

The State team came back from Atlantic City last year with third honors. The apple judging contest is held under the auspices of the American Pomological Society, which was organized in 1913. Last year was the first time State College has been represented, and has the honor of being the only Southern college to carry away such a fine record. The team was composed of M. W. Long, J. G. Weaver, and J. B. Stack. M. W. Long, now a Senior in Horticulture, won the distinction of placing third in the individual tests, with the other members ranking just a few points behind. The contest to be held in Atlanta in February will have representatives from thirteen Southern States, and will be known as the "Southern Conference." The other sections of the country will co-operate, and do likewise. Then the winners from each of these sections will meet in a national contest for final honors. The candidates now working for the next contest, under Coach Matthews are: M. W. Long, J. F. Long, J. G. Weaver, J. B. Stack, E. B. Cameron, R. S. Gaston, C. A. Leonard, T. D. O'Quinn, C. R. Lamb and R. E. Reel.

The men who take part in the contest will have to judge in the following way: There will be twenty classes, three plates to the class, and five apples to the plate. Each class and all substitutes of that class will have to be identified as to their variety. By being in the Southern Conference, which will make all varieties more familiar, and the number of men working for the team, including those of last year, they expect to show some other aggies that North Carolina still plans ahead.

STATE COLLEGE POULTRY JUDGING TEAM GOES TO MADISON SQUARE GARDEN

C. P. Fishburne, W. W. Keever,
J. B. Slack, G. W. Knox, and
W. D. Burton Make Trip

WILL RETURN JANUARY 10

For Tenth Consecutive Year State
College Enters Contest Against
Strong Colleges of North

The State College Poultry Judging Team left Raleigh Monday night, January 4 for New York City, where it engaged in the National Inter-Collegiate Poultry Judging Contest on January 6.

On Thursday night, December 17, the Poultry Judging Team was selected to represent North Carolina State College at the Madison Square Garden Poultry Show, at New York City, on January 6, 1926.

All men who were eligible for the team have been training intensively for two months before the team was selected.

It was back in 1915, ten years ago, that North Carolina dared to send a poultry judging team to New York. But each year since that time has seen a team from North Carolina at New York. And no citizen need be ashamed of the record that has been

(Continued on page 2.)

GRADUATE STUDENTS FORM THEIR OWN SOCIAL CLUB

Hope in Future to Finance Club
House for Members and
Faculty

Before the holidays sixty of the graduate students of North Carolina State College met and organized a Graduate Club. J. M. Gray was elected temporary president of this club, and Stewart Robertson, temporary secretary.

Dr. Brooks was present and heartily endorsed the organization of a Graduate Club because he believed it would give the graduate students a sense of solidarity now lacking. He was also very hopeful of obtaining in the future a club house for the graduate students and faculty. Meanwhile, he said he would try to set aside some room for the club.

Dr. Taylor urged the new organization to exercise its influence to maintain scholarship standings in the college.

The purpose of this club is to acquaint various students with research projects under way and their objectives, and to afford some means of social life for graduate students.

DEAN OF AGRICULTURE

SCHAUB APPOINTED DEAN TO SUCCEED DR. KILGORE

I. O. SCHAUH

Appointment Completes Reorganization of Agricultural Work in the State

I. O. Schaub, Director of Agricultural Extension Work at State College since July, 1924, has been appointed Acting Dean of the School of Agriculture, subject to the approval of the Board of Trustees.

Professor Schaub, who is a graduate of State College, Class of 1900, succeeds Dr. B. W. Kilgore, who resigned the deanship of the School of Agriculture last July.

Since the resignation of Dr. Kilgore, the administrative duties in connection with the School of Agriculture have been handled by Dr. Z. P. Metcalf, Director of Instruction, Dr. R. Y. Winters, Director of Research, Professor Schaub, Director of Extension, and President Brooks.

Although the School of Agriculture, under this joint management, has prospered as it never did before, the executive duties, according to College officials, have reached such proportions that it is imperative to place one man at the head of the work. After carefully studying the situation for the past five months and discussing the matter with members of the Executive Committee of the Board of Trustees, President Brooks has elevated Professor Schaub to this important position.

In order that plans for the work of the School of Agriculture, for the coming year, may be fully worked out under the direction of a responsible head.

Naming a new dean for the School of Agriculture, it is said, completes the reorganization of the agricultural

(Continued on page 2.)

Extension Agents Here For Annual Short Course

DR. BROOKS SPEAKS BEFORE ASSEMBLY

Professor Foster Has Distinction
of Being Only Faculty
Man Present

"There is a direct relationship between fidelity to duty and the scholarship standard," said Dr. Brooks in his address to the student-body of State College at the General Assembly on Wednesday morning. The statistics of the college, as pointed out by the speaker, show a growing scholarship standard on the campus. Practically all the students are back here for the second term. The college has the highest standard it has had in examinations. Only fifty-six students were advised not to return. Out of the fifty-six, forty-nine had more than fifteen class absences against them. The total failures in the school is about four per cent, the Senior and Sophomore classes having less than one per cent each, the Junior class having a little more than one per cent.

(Continued on page 2.)

DR. BROOKS APPOINTS FRATERNITY COUNCIL

A Fraternity Council appointed by Dr. Brooks, at the request of the Pan-Hellenic Council, is as follows:

- I. O. Schaub, chairman.
- E. H. Hoesleger.
- J. F. Miller.
- J. S. Meares.
- B. F. Kaupp.
- R. W. Henninger.
- A. F. Greaves-Walker.
- E. L. Clloyd.
- Tal H. Stafford.

This council is to pass on the formation of new fraternities; to consider and recommend any local fraternity which wants representation on the Pan-Hellenic Council; to pass on any local which wants to petition a national fraternity, and to give any help or advice it can to the Pan-Hellenic Council.

DEBATERS' ANNUAL WILL PUBLISH COMING DEBATE

Wilson and Tiddy Will Represent
N. C. State in Open Forum
Contest With Duke

For the second successive year, North Carolina State College will have the honor of seeing one of its public debates published in the University Debaters' Annual. Word has been received by Professor Cunningham from the H. W. Wilson Company, New York, who put out this book, that they desire a stenographic report of the debate between Duke University and State College on the proposition: "Resolved, That the rules of the United States Senate should be revised as suggested by Vice-President Dawes."

This debate will be unique in that it is to be held before a neutral audience who will take part in the open forum discussion and who will vote as to the outcome of the contest at the close thereof. This audience will be the townspeople of Cary, who will assemble as guests of the literary societies of the Cary High School. The exact date of the contest has not yet been set, but it will be some time during the week of January eleventh, probably on Thursday night.

State College will be represented in this debate by W. Edwin Wilson and J. Edwin Tiddy, both members of the Junior Class. The Duke speakers will be G. B. Johnson and Hanselle L. Hester.

FORENSIC COUNCIL TO APPROPRIATE FUNDS

It has been decided by the authorities who have supervised the allocation of the Student Activities Fee that the amount allotted to Public Speaking competition shall be disbursed in accordance with the wishes of the Forensic Council. This Council is to consist of the active members of the North Carolina Alpha Chapter of Phi Kappa Delta, the men who have won the right to be given supervision of this activity by participating in debates and oratorical contests themselves as representatives of the college.

Farm and Home Agents Will
Stay at State College for
Ten Days

PROF. I. O. SCHAUH LEADS

Y. M. C. A. Scene of Much Activity
as Sessions Start Early and
End Late

With their leader and director chosen to lead the School of Agriculture at State College, and a new feeling of progressive action permeating the entire organization, the county home and demonstration agents met at State College on January 5 for a ten-day conference and short course.

Among those who have been invited to talk before the agents are Dr. Paul Kruse, Professor of Rural Education at Cornell; Dr. G. E. Farrell, of the United States Department of Agriculture; Dr. O. B. Martin and I. W. Hill, of the Extension Department, and Harry Fagan, President of the Agricultural Credit Corporation.

Dean of Agriculture I. O. Schaub presides over the joint meetings, while J. M. Gray and Mrs. Jane S. McKimmon preside over the men and women groups, respectively. Many committees have been appointed to look after the detailed work of the several phases of the course.

One of the most important things to come before the agents will include a general State-wide plan for agricultural work in the State during 1926. The agents will also hear from leading farmers in regard to successful methods used in crop production. J. E. Purdie, of Cumberland County, will be one of the speakers before the farm agents during the present week. Dean I. O. Schaub has invited a committee of farmers consisting of R. M. Ralls, of Hendersonville; Dr. S. H. Crocker, of Stantonburg; C. P. Cates, of Mabane; J. T. Albritton, of Mount Olive, and M. L. Alderhot, of Lexington, to sit in on the meetings of the agents and to render a report as to some of the things these workers need to give attention to in order to be of greatest service to the farmers of North Carolina.

It is expected also to have a representative from the committee of trustees of the college board of agriculture to deliver an address during the week. Dr. Clarence Poe, editor of *The Progressive Farmer*, has been invited to make this address.

Dean Schaub will also read a letter to the agents today from Secretary of Agriculture William M. Jardine. Secretary Jardine expresses himself as well pleased with the work being done in North Carolina, and extends congratulations on the accomplishments of the extension forces.

Friday evening a social hour will be held at the College Y. M. C. A. when

(Continued on page 2.)

Committee Suggests Name For Magazine

"The Wataugan" Chosen by Name
Committee; Student Body
Will Decide

At a called meeting, held Friday at 12 o'clock, the Name Committee for the literary magazine decided upon the title, "The Wataugan."

This name will be submitted to the student body at an early date, and it is expected that it will be the word goes. The honor for clanking of the English Department. The purpose of the committee in choosing this name was to commemorate the name of the Watauga Club, which was instrumental in founding the College.

The Name Committee consists of Prof. Stewart Robertson, chairman; Prof. J. D. Clark, J. A. Potter, J. W. Johnson, and E. G. Moore.

NOTICE!

All subscribers who want to change addresses of their papers may do so by calling by office Monday night, January 11, from 6:30 to 7:30.

J. C. DAVIS,
Circulation Manager.

SOCIETY BASKETBALL

There will be a meeting of representatives of all Societies that desire to enter the Inter-Society Basketball League, in the Pullen Literary Hall, Wednesday, January 13th, at 6:30 P. M.

Freshmen To Use English Handbook

Will Be Required of the First-Year Men and Recommended To All Others

A rival to the Y Handbook has made its appearance on the campus with the beginning of this term. It is the Century Collegiate Handbook of Composition, which has been adopted by the Department of English for use in any courses which come within its jurisdiction. Since every freshman will be required to purchase and use a copy of this book, and since its use will be encouraged in all advanced courses in English, including Business English, Literature, Journalism, and Public Speaking, it will not be long before State College students will be as familiar with certain cabalistic numbers pertaining to this book as they are with certain numbers in the Raleigh Telephone Directory.

It is believed by the instructors in the Department of English that systematic use of this handbook, both voluntary and involuntary, will, in time, result in making every State man as good a Johnny Inkslinger as the editors of THE TECHNICIAN.

Reassuring

"Has any one ever been lost in crossing here?" asked a timid woman who had hired a boatman to ferry her across a river.

"No'm," was the reply. "Mah brotkeh was drowned heah las' week, but we found him th' nex' day."

...For... BOOKS and STATIONERY 12 W. Hargett St., Raleigh, N. C.

Kampus Komiks

Dumb: "Foll Negri is Russian, isn't she?"

Dora: "I guess so, those movie stars are pretty fast."

He: "Would you be angry if I should ask you for a kiss?"

She: "I would be delighted."

He: "Ah."

She: "I have just been yearning for a good excuse to hit you."

Conductor: "Is that child eight years old, madam?"

Lady: "Oh, no. He's only seven."

Conductor: "Then you must pay his fare. Only children under six ride gratis."

Terence: "Tis a fine lad ye have here. A magnificent head and noble features. Could ye lend me a couple of dollars?"

Pat: "I could not. 'Tis me wife's child by her first husband."

"I'm sorry I can't come to your party. I would break my other engagement if I could, but I have burnt my bridges behind me."

"Come, anyway blushing furiously. I'll lend you a paid of my brother's."

"Is Nora there?"

"No, she isn't."

"Do you know where I can get hold of her?"

"I couldn't tell you; the boys say she is awfully ticklish."

Nature Lover (gazing at a gigantic tree): "Oh, wonderful, mammoth oak, if you could speak what would you tell me?"

Gardner (near by): "Scuse me, mum."

but 'e would probably say: "If you please, I'm not an oak, I'm a spruce."

Thrilled Spinster: "Oh, he just rushed right up to me, clasped me to his bosom and kissed me! It's certainly lucky you were here, Mr. Policeman."

Man in Uniform: "Yeah, only I ain't no policeman. I'm his keeper."

Now You Tell One

A tall, dark person with the earmarks of a plainclothes man stepped into the thick stuffiness of the subway train. His face was severely stern, his jaw indicative of a grim determination, and his shrewd gray eyes stared searchingly at the young man who sat opposite. The latter squirmed uneasy in his seat, shifted his gaze, and readjusted his newspaper. The gray eyes never faltered. The young man glanced furtively towards the door. Feverishly he rose to start for the exit. A hand fell on his shoulder. A quiet voice said:

"Pardon me, but your left shoe is untied."

Extension Agents Here For Annual Short Course

(Continued from page 1.)

the home and farm agents will meet and mingle with their co-workers at

tached to the staff here at the college. Refreshments will be served and entertainment provided.

In addition to the speakers invited from outside of the State, the college will use its regular staff in the School of Agriculture for most of the lectures.

The conference will conclude on Friday, January 15, with a joint conference between the agents and the agricultural committee of the North Carolina Bankers' Association. Dr. D. H. Otis, of the American Bankers' Association, will be present to attend this conference. J. Hooper Alexander, of Scotland Neck, will also lecture to the agents on Thursday, January 14. Mr. Alexander will use as the subject for his lecture, "The Banker and Extension Work."

There are exactly 80 farm agents, exclusive of the five supervisory agents and the State agent. Under Mrs. Jane S. McKimmon, there are 50 home agents. These men and women, together with the specialists and teachers, make up a group of some 250 persons who take part in the deliberations.

State College Poultry Judging Team Goes To Madison Square Garden

(Continued from page 1.)

made by these representatives. In all the contests among all the competitors a North Carolina team has never been as low as fifth place but once, and that was in 1924. Most of the placings won by the teams have been seconds and thirds. This was the results given out by Dr. B. F. Kaupp, head of the Poultry Department and associated with the N. C. Experiment Station.

In 1921 W. F. Armstrong, then a Junior at this College, was a member of the State College Poultry Judging Team, and he won a silver medal at the Madison Square Garden Poultry Show for scoring second highest in the utility judging. Since his graduation "Bill" has been Assistant Professor of Poultry at State College. During this time he has won his masters degree in poultry. Since his graduation he has been coaching the students for the poultry teams. His teams have made excellent showings at New York. At the 1925 show State College won second place with a total score of 1,911.5 points, while Connecticut won first place with 1,972.5 points. The State team won first place in utility judging

of White Leghorns. A loving cup was given for this honor. Another cup was given for the best standard judging of White Wyandottes.

Three colleges tied for three other cups and State College lost in each case by the flip of a coin.

The men who made the highest scores in the judging here were selected to go to New York.

C. P. Fishburne, of Watterboro, S. C.; W. W. Keener, of Lincolnton, N. C.; and J. B. Slack, of Seagrave, N. C. were selected to represent State College.

G. W. Knox, of Clover, S. C., was selected as alternate. W. D. Burton, of Jacksonville, N. C., was the fourth highest man, and although not a member of the team he made enough money selling handkerchiefs to pay his way to the poultry show.

Dr. Brooks Speaks Before Assembly

(Continued from page 1.)

while the special students had about two per cent failures.

It is not always the student who has the highest grades but is often the one who has a desire to accomplish something who wins out in every contest. Success depends upon the conviction that one has a duty of some sort to perform.

Dr. Brooks said there was plenty of room for suggestions on the problem of finding a parking space for the large number of automobiles on the campus. In spite of the number of cars, there seems to be a greater tendency to take care of the property than there was last term.

On Friday at 12 o'clock there is to be started a course in government for Seniors and graduates, the classes to be held in Professor Clarke's room. This course may be taken either for credit or without it. The great discoveries in modern science change to a great degree modern government and law, and the purpose of the course is to train students in the relation between the two and in their own relation to the social group of which they happen to be members.

The meeting was fairly well attended by students, although not more than half the seats were occupied. The only faculty member in the audience was Professor J. M. Foster. Dean Cloyd was present and read a passage of Scripture.

Schaub Appointed Dean To Succeed Dr. Kilgore

(Continued from page 1.)

tural work of the State, which began shortly after Dr. Brooks came to State College. Present in 1923, the lines between the work of the State Department of Agriculture and the Schools of Agriculture of State College are now sharply drawn, there is no duplication of effort, and these two great agencies, which are charged with the promotion of the vast agricultural interests of the State, are now working side by side in complete harmony, without the friction that characterized other regimes.

In discussing Professor Schaub's appointment, President Brooks said:

"At the last meeting of the Board of Trustees it was decided not to fill the deanship of the School of Agriculture until such time could be allowed to study thoroughly the situation and select the most suitable man that may be obtained for this important position."

"Since that time the three directors of instruction, research, and research and extension, together with the President of the College, have administered the details of the School of Agriculture, but owing to the fact that an agricultural program may be mapped out for the year 1926-27, and the work for the remainder of the year must be directed toward that end, it is necessary to fill the position of the deanship, at least temporarily, subject to the action of the Board of Trustees."

"The one becoming more and more pressing—such that the President is unable to give the personal attention to the work that it deserves; and neither of the directors has the authority to take the lead. Consequently, the work may be somewhat handicapped for the remainder of the term without an active head."

"Therefore, after discussing the situation with a few members of the Executive Committee, I am appointing Prof. I. O. Schaub, Director of the Extension Service, as acting dean for the remainder of the year, subject to the approval of the Executive Committee."

"Mr. Schaub has had unusual training and experience for this work. He was born on a farm in Stokes County in 1880. He is a graduate of State College in 1900, and pursued graduate work at Johns Hopkins University for three years following his graduation at State College. He is a member of the Kappa Sigma and Alpha Zeta fraternities. He has held the following responsible positions since his graduation: Assistant chemist, Illinois Experiment Station, 1903 to 1905; assistant professor of soils, Iowa State College, 1905 to 1909; in charge of boys' and girls' club work in North Carolina, 1909 to 1913; agriculturist to the Frisco Railway Lines, 1913 to 1918; agriculturist and field agent of the States Relation Service, United States Department of Agriculture,

1918 to 1924; director of the Extension Service of State College since July 1, 1924.

"As agriculturist and field agent for the United States Department of Agriculture, Mr. Schaub was in charge of the agricultural extension work in the Southern States."

College Cafeteria Opens For Business After Many Delays

(Continued from page 1.)

Small, rectangular, marble-topped tables, accommodating four persons, are used in the cafeteria proper. The large room is splendidly lighted, and with its new furnishings and growing potted plants presents a very attractive appearance.

Entrance to the cafeteria is from the open court, between the two wings of the dining hall, which faces Hillsboro Street. For the present the following meal hours will be observed: Breakfast, 7:30 to 9:00; lunch, 12:00 to 2:00, and dinner, 6:00 to 8:00.

A few self-feeders built to handle the spring livestock crop will be found a paying investment according to those farmers who have tried them.

Young Married Man: I'm afraid I'm going to develop insomnia.

Friend: Is that so; what are the symptoms?

Y. M. M.: Twins.

Patient: What's good for a headache, doctor?

Doctor: Stick your head in a bucket of water three times and take it out twice.

He: "I've had hallucinations lately."

She: "Why didn't you use lieterine?"

First Cowboy: "What's Mame so peevish about?"

Second Cowboy: "She was taking the part of opportunity in a peasant, and somebody embraced her."

"Red Terrors" Open Inter-Collegiate Season Tonight

Will Travel Westward to Engage High Point, Lenoir-Rhyne, and Davidson

MUCH RESERVE STRENGTH
Coach Tebell Well Pleased With the Team in Early Practice Games Played

The State College Cagers, after winning their first two contests by decisive scores, will meet their first real collegiate competition on the western trip this week-end.

Beginning with the High Point Collegians on Friday night, the "Red Terrors" will journey on over to Hickory to meet Lenoir-Rhyne on Saturday, and then drop down to tackle the Wildcat Cagers on their home court on Monday.

Coach Tebell is well pleased with the showing of his team in the last practice game with Sammie's Freshmen, and is expecting a banner season if his men keep up the passing and shooting which they have done so early in the season.

Most of the regulars from last year's quint are back in action, and an excellent reserve, which was lacking last year, is available for Tebell to use when needed. Captain Dickens, Gresham, Bremer, and Williams are all showing up well in the forward position and will keep any guards in the country strictly on their toes. Williams has recently been shifted from the guard to forward position, and seems greatly improved by the change. Harry Brown and "Hooker" Spence will hold down the pivot position, and they both can handle the ball and shoot the basket.

Davis and Watkins are working hard to fill the shoes left vacant by the "sorrel-topped captain," Red Johnson, and bid fair to succeed. Watkins is at present favoring a bad ankle and will probably be out of the next two games, as he was the one with the Durham Y, because of this. This soreness prevents his usual swift pivoting and running, but he is expected to be in shape for the Davidson tilt next week. Waters and McDowall are the most likely looking candidates for the back-guard position, and both will be seen in action in the games to come.

These ten men are the ones who, barring accident, will accompany Coach Tebell and Manager Jones on the trip beginning Friday.

This trip will begin the State schedule in earnest, as a game will be played practically every other day thereafter, starting with the Demon Deacons' invasion of the Frank Thompson Gymnasium on Thursday, January 14.

Debates With Arizona and Georgia Be Held in March

(Continued from page 1.)

opponents will be: Emory University, Texas University, Oklahoma University, Duke University, Boston University, University of New Hampshire, Kansas State Agricultural College, Tufts College. The most noteworthy contest on their trip will be that with the University of Porto Rico. Two debates will be held with the island university, one in English, the other in Spanish.

The members of the Arizona team are: Richard Fettes, a senior in the College of Liberal Arts, who is a veteran debater. He was a member of the team which won the undisputed university championship of the Far West last year, and was leader of the team which defeated Oxford University, England, by an overwhelming decision. Pennington Cooper was a member of the debate squad at Arizona two years ago, and is an experienced speaker. He is the son of two of the most important families of Arizona and Northern Mexico, being half American and half Spanish in blood. Carlton Weart, the third member of the squad, is one of the leaders in Arizona in literary and dramatic activities. He was a member of the team which successfully invaded Oklahoma two years ago. He has recently been selected as Rhodes scholar from Arizona.

All three members of the Arizona team were under the instruction of Professor Cunningham two years ago, and two of them made successful debate trips with him.

This debate will mark the high tide of our local forensic activity this year. If we can send against these excellent speakers from the Southwest two debaters who are ready in thinking and fluent in speaking, the contest should be one of the best ever held in North Carolina.

NO CHANGES IN FOOTBALL RULES

Tebell and Miller Return From Meeting of Athletic Coaches From All Over Country

"Gus" Tebell, head coach in football and basketball, and John F. Miller, Director of Athletics, recently returned from New York City, where they attended meetings of college athletic authorities from all over the country.

Coach Tebell was a member of the American Football Coaches Association and participated in the discussions of this body, which has the controlling influence in collegiate football. This organization went on record as being strictly against professionalism in football, and decided that no man who plays in a professional game can become a member of that association. The new system of calling forty plays a quarter instead of timing was discussed thoroughly and voted down. Other suggested changes were brought up, but it was decided to make no difference at all in the rules for 1926.

Fresh Quint Beats Raleigh High Team

First-Year Men Show Stuff at Local Basket, While Raleigh Are in Passing Game

State's Freshman basketball season started with a rush Tuesday night, when the smooth-working Raleigh High team lost to the '26s by the score of 48-21.

The Freshmen started off at top speed and amassed 15 points to the High's 5 in the first period. The tables were turned in the next stanza, however, and the half ended with the score 22-17 in favor of the Freshmen. It was in this quarter that the excellent floor work and passing of the Raleigh lads was most noticeable, and their shooting was also good.

The first-year men came back in the last half with all their strength, and Goodwin, Young and Holden made the score 48-21 in their favor. The teamwork of the Purple Quint was much more developed than that of the Freshmen, but the individual goal shooting of Goodwin and Young, especially Goodwin, more than made up for this difference. The Freshman team looks good already, and gives promise of being one of the best first-year teams to represent State in years, as soon as they get a little more used to working together.

The line-up and summary:
Raleigh (21) State Fresh (48)
Morris (7) Taylor
Left Forward
Smith (2) Holden (6)
Right Forward
Sadler (6) Goodwin (19)
Center
Bristow Trogden
Left Guard
Cox Loughlin (3)
Right Guard

Raleigh High substitutes: Bagwell (6), Roberts.
Freshman substitutes: Mason (2), Young (13), Owens, Lawrence (1), Scott, Ford, Rhedey, Vinson (4).
Referee: Doak (Gullford).
Quarters: 10 minutes each.

Double Program At Gym. Saturday Night

Freshman Basketeers Engage Farmville, While Grapplers Tackle Cabarrus Y. M. C. A.

The Frank Thompson Gymnasium will be the scene of a double athletic program Saturday night when the State Freshmen entertain the Farmville High School Quintet and the Tech Grapplers lock horns with the Cabarrus Y. M. C. A.

The basketball game will start at 7:30, followed by the wrestling as soon as the ball game is finished. For those other than students or faculty members, there will be an admission charge of fifty cents, which will include both events.
The Freshmen Basketeers, judging from their pre-season game with the varsity and the game in which they more than doubled the score of the smooth-working Raleigh Hi team, should have little trouble in overcoming the Farmville Five, while "Red" Hicks and his neck artists face an unknown quantity in the Cabarrus "Y." Two of the Tech's first-string men will probably not be on the mat that night, and, too, the Cabarrus team has a whole county to pick from and might contain some excellent and experienced men.

Tech Tossers Trim Atlantic Christians

Terrors Have to Fight Furiously to Overcome Little Team From the East

The Saturday before Christmas a little bunch of basketball players came over here from Atlantic Christian College and for the first half of an excellent opening contest gave Tebell's tossers the time of their lives, and only in the last half did they succumb to the superior passing and shooting of the Techs. The final score was State 37, A. C. C. 20.

The Christians presented a really good quintet and at the first of the game led by as much as 4 points. Captain Dickens, who was his highest scorer of the night, and his teammates then came back and piled up a lead that was never overcome, though often threatened by the boys from Wilson.

Tebell's famous short distance passing attack got well under way after the interval, and the State score rose rapidly while the opposing forwards were held almost helpless by the fast moving guards.

The line-up and summary:
State—37 A. C. C.—20
Dickens (Capt.) (14) Munn (7)
R. F.
Gresham L. F. Rigan (6)
Brown (7) Fulgham (7)
C.
Watkins (2) Brenkley
R. G.
McDowall L. G. Reel

Substitutions: Bremer (6), Spence (8).

FRESHMAN BASKETBALL SCHEDULE

- Jan. 5 Raleigh H. S.—Here.
- 9 Farmville H. S.—Here.
- 16 Wake Forest—There.
- 19 Duke—There.
- 20 Mars Hill—Here.
- 22 Oak Ridge—Here.
- 30 Wake Forest—Here.
- Feb. 2 Carolina (tentative).
- 6 Greensboro H. S.—Here.
- 11 Davidson—Here.
- 16 Oak Ridge—There.
- 17 Greensboro H. S.—There.
- 18 Catawba College—There.
- 19 Davidson—There.
- 22 Carolina.
- 24 Duke—Here.

INTER-FRATERNITY BASKETBALL LEAGUE

The Inter-Fraternity Basketball League will start Tuesday night, January 12th. There are eighteen fraternities entered in this league which have been divided into two divisions—A and B. The winners of each division will play a post-season series for the fraternity championship.

There will be an added feature this year, in that each fraternity has deposited a fee of \$1 to purchase a Silver Loving Cup to be given to the winning fraternity. This cup will be the permanent possession of the team winning it this year.

The games will start fifteen minutes earlier this year so as to make it possible to play four games in one evening.

The schedule for the first week is as follows:
Monday January 12th:
6:45—Kappa Sigma vs. Alpha Lambda Tau.
7:30—Sigma Nu vs. Sigma Tau Beta.
8:15—Kappa Alpha vs. Kappa Iota Epsilon.
9:00—Phi Kappa Tau vs. Sigma Delta.
Friday, January 15:
6:45—Pi Kappa Alpha vs. Tau Rho Alpha.
7:30—Sigma Phi Epsilon vs. Pi Kappa Phi.
8:15—Lambda Chi Alpha vs. Alpha Gamma Rho.
9:00—Sigma Pi vs. Theta Kappa Nu.

The main gymnasium will be available for practice Saturday afternoon and Monday night after supper. A definite hour can be reserved by communicating with Coach Parker. The Y. M. C. A. gymnasium is available for practice every afternoon and night for practice for all intramural teams. Definite hours can be reserved by communicating with Coach Parker.

GRAPPLERS MEET CABARRUS Y.M.C.A.

Nicholson Has Not Returned to College, and Lambe Has a Bad Leg

The State wrestlers go on the canvas for the second time Saturday night of this week. They meet the mature and experienced team of the Cabarrus "Y" from Kannapolis, N. C.

The State team is partially crippled in that the regular light-heavy and heavyweight wrestlers will probably not be in the line-up for this contest. As yet, "Nick" hasn't been able to re-enter school on account of work that needs to be done at home. Charles Lambe is on the job, but he is suffering with a defective "calf" that will soon be well again, we hope. The substitutes in these classes are working hard, and it is hoped that in some way the places of these "main-stays" may be filled for the meet Saturday night.

What the line-up will be is only a matter of speculation on the part of those who are interested, for nothing has been available for publication as yet. However, it will be a determined, hard-fighting aggregation that goes on the mat for State on Saturday night. Experience is a great asset to any team, but a fighting spirit and a true college loyalty are not to be under-rated.

FAMOUS CAGE ARTIST WITH FRESHMAN SQUAD

E. M. Waring, a new N. C. State man, has registered in the School of Engineering, majoring in Ceramics. For the past six months he has been with the State Laboratory of Hygiene, while residing at home in Raleigh with his father who is now coroner of Wake County.

Waring is a graduate of Raleigh High School and St. John Preparatory School, one of the biggest in New York

State. While there, playing with the Manly Basketball Team, he was picked as one of the All-American Basketball Quintet. A State man with such a reputation will no doubt be seen in action with our Freshman quintet in the near future.

WRESTLERS BEAT RALEIGH Y.M.C.A.

Spry is Star for State, While Captain Gattis Stars for Capital City

The first match of the season for the State grapplers showed that the Red and White team has possibilities. Spry was the star of the evening for State, while Captain Gattis was the star for the Raleigh aggregation. The meet proved to be interesting from start to finish. There were flashes of brilliant work, and also a certain amount of slow work. On the whole, however, the State team presented a potentially good and well-balanced team.

The Raleigh "Y" team, led by the popular Captain Gattis, proved to be a stronger team than the team of last year. The State squad and supporters wish them the best of luck for the coming season.

Score: Raleigh "Y." 3; State, 19.
Referee: C. S. Wood, Director of Playgrounds, Durham.

Matches

Spry of State threw Bone of the "Y."
The bout between Ginn of State and Newton of the "Y" resulted in a draw.

Kellam of State won decision over Nixon of the "Y."
Hicks of State won decision over Bremer of the "Y."

Captain Harrel of State lost decision to Captain Gattis of the "Y."
Nicholson of State won decision over Lambe of State threw Captain Gattis of the "Y."

HARDWOOD TEAM DEFEATS DURHAM "Y" AGGREGATION

All-Star Y. M. C. A. Team Receives Trouncing at Hands of Tebell's Tossers

The Durham Y. M. C. A. basketball team came over to State with an All-Star aggregation and determined to avenge last year's defeat at the hands of Tebell's Techs, but they were badly disappointed and took home with them the sting of the small part of a 45-12 score.

From the very beginning the Red Jerseyed Warriors showed their superiority in every department of the game and piled up the points until the final whistle blew. "Sis" Perry, former Carolina star and much touted center of the Durhamites, lost his reputation and was able to garner only one lone point, the result of a free toss.

Dickens and Brown were the stars of the game, Dickens alone getting four more points than the whole "Y" team. Gresham and Spence, with 8 and 7 markers respectively, were not far behind in the scoring part of the game.

The constant bickering and arguing on the part of the "Y" players and coach was the worst feature of the contest.

Line-up and summary:

State—45 Durham "Y"—12
Dickens (Capt.) (16) O'Neal (2)
Bremer L. F. Starling
Brown (11) R. F. Perry (1)
C.
Davis (2) Montgomery
L. G.
McDowall Heflin (1)
R. G.

Until the dairy cow is given enough to eat, there is no need to worry about anything else in producing larger amounts of milk.

When the runners are bunched on the track—and suddenly Chuck, your own superman half-miler, spurts ahead on the finish and wins—have a Camel!

WHEN the lithe half-milers are fighting for the lead. And your own dauntless champion suddenly soars ahead and wins—have a Camel!

For you'll never find another friend so attuned to your triumphs as Camel. Camels are made of the choicest tobaccos grown—they never disappoint your taste. Camels annihilated cigarette after-taste. Regardless of price, you'll never buy better tobaccos, or blending, or flavor than you get in Camels.

So this year when the old school's men go through for victory after victory—taste then the smoke that's choice of the world's victorious. Have a Camel!

Our highest wish, if you do not yet know Camel quality, is that you try them. We invite you to compare Camels with any cigarette made at any price.

Paragraphics

If you don't believe we are imitators just notice the rough paper and the increased size.

Haven't broken a New Year's resolution yet. Probably due to the fact that we didn't make any.

Correct this sentence: College students eagerly returned to work this week, after spending the holidays at home.

The opening of the cafeteria will serve at least two purposes. It will provide a new place to eat and it will serve as the object for some of our witless remarks.

However, ye scribe will not be a slacker. If the remainder of the Senior Class can learn to manipulate a cane to good advantage we will do our best to imitate them.

Our faith in the Senior Class was restored when they voted to use caps and gowns for Commencement next year. Then they spoiled it all by favoring canes and derbies.

Cecil Wilson, columnist for *The News and Observer*, thinks that college debaters are professional bull artists. Granting this to be true we feel quite sure that Mr. Wilson was an excellent debator in his college days.

Problem: If 500 students visit the library each day and each one carries in 3 cubic inches of red mud at each trip, how long before the expense of sweeping the building would amount to enough to make some suitable walks leading to it?

We make our bow to *The Teco Echo*, recently established student newspaper at East Carolina Teachers College. Of course there is room for improvement, but this can be said of almost any college publication. We shall watch with much interest the developments at our sister institution.

On behalf of the student body THE TECHNICIAN wishes to extend a most cordial welcome to the home and county demonstration agents who are attending the short course. We will not express the desire that you become "collegiate," but we do hope your stay here will cause you to become better acquainted with the work being done here.

This issue would be incomplete without some reference to our new neighbors, the Meredith girls. It is wasting ink and space for us to say we are glad to have these ladies "check" by as they go to town. However, we hope the Legislature doesn't hear of this, for they will surely start proceedings to put an end to this practice. Just think how much money would be spent in a special session.

ABOUT YOUR PAPER

Many of our readers will doubtless be surprised to note the change in appearance of our paper this week. In making this departure from the old to the new we are doing so after considering the proposition from many angles. We will be frank enough to admit that one of the reasons for the change was to conform to the present-day type of college paper. The tendency for the past few years has been to increase the size of college papers as they become more like the real newspapers. Also they are discarding the high-grade paper that was formerly used and are using regular newspaper paper or something very close to it in quality.

Another, and possibly a more logical reason for changing to six columns, is that it affords more latitude for the imaginative mind of the managing editor. In courses in Journalism he is acquainted with the art of newspaper make-up. The natural result is that he outgrows his job unless it, too, can be made to catch the spirit of progress. With the present size a much better looking paper can be worked up.

The final and by far the most important of all the reasons is that the paper was not large enough for State College. Each week we have received more news than we could find space for. Such a condition naturally brings forth many embarrassing situations for the editors and contributors as well. The classes in Journalism have turned in enough material each week to fill the paper if nothing else had been secured. It is true that with six pages we have not added materially to our total number of inches, but even as it is we have about a column and a half more than the old size gave. However, we have not reached our goal yet. As soon as the business manager gives the signal we move up to eight pages of the present size. At present this is what we are looking forward to as our aim. When we reach that point, however, we promise to set our stakes up higher and begin immediately to work toward the new goal.

Our change in size does not affect our policy. Barring student uprisings, expulsions, and things of a kindred nature, we shall hold fast to the promise made by the editor in his first issue last spring, which is to say that we shall try to depict State College life as accurately as possible. If we offend anyone it is not done intentionally. If we praise anyone it is not done to be conventional. In either case it will be the result of honest conviction. Our first consideration is to give the news. After that is done we propose to discuss those subjects in which we feel the students are interested. If in these discussions we are unjustly critical, we shall welcome differences of opinion from students or faculty.

A CHALLENGE

In these days it is customary to characterize a college as a place where a fine athletic stadium is built. The picture usually includes a few scattered and dilapidated classroom structures. The impression, of course, is to make higher education appear ridiculous.

In contrast to such a picture is that which presents itself when one enters our new library for the first time. He is impressed with the atmosphere of quiet dignity which pervades the structure. If any man fails to find here the inspiration to mental achievement, something is lacking in his imagination. This building will stand as an answer to the arguments propounded by those who seek to show that North Carolina is spending money unwisely on the youth within her borders.

Now we are not superficial enough to suppose that a fine building makes a fine library. No one on this campus admits with more chagrin than we the actual size of our library collection. However, we have the first essential for a real library, and as the years go by volumes may be added until this institution may some day boast of one of the best libraries in the south.

We are proud of the Frank Thompson Gymnasium. It has filled a gap in our scheme of things, but it is a different kind of pride that takes possession of us as we enter the Hill Library.

As long as North Carolina continues to invest its money in educational facilities it is need have no fear for the morrow. A generation of educated citizens will be enough reward for the money being spent.

H. G. Holt, a freshman in Architecture, was called to his home in Burlington, Wednesday morning by the death of his aunt.

OUR NEW DEAN

After a careful survey of the agricultural leaders available as executive head of the School of Agriculture, the position of Dean has been tendered to I. O. Schaub, formerly in charge of agricultural extension work for State College. Professor Schaub has accepted the position and has begun his new work. This is a source of gratification to every one connected with the College, whether student, faculty member, or field worker. The position of Dean in this important part of the College organization has been vacant since the resignation of Dr. B. W. Kilgore, in June, 1925, and while the affairs of the School have not been neglected, there has been no one with authority to make plans or to give decisions. In the meantime the duties and responsibilities of the School have been greatly increased, due to the reorganization of all agricultural work in the State, whereby the College takes full charge of the experimental and extension work in agriculture.

It is fortunate that the College could search out and find among its own alumni a man fitted for this important position. The School of Agriculture, more than any other department of the College, comes into closer contact with the people of the State. At its head, therefore, is needed a man with just such qualifications as Dean Schaub has. His being a graduate of this college is a minor matter, but proves that the College is capable of turning out men with ability, scholarship, and an ideal of service.

The appointment of Dean Schaub seems to have given universal satisfaction. He is beloved and respected by the entire extension organization which he has headed for over a year; he has the confidence of the farmers and business men of the State and he has that happy faculty of working with his associates in the faculty with harmony and efficiency. In addition to those fine traits of personality Dean Schaub is well equipped for the position to which he has been elevated. Since his graduation from the College, in 1900, he has been engaged in some form of educational work with farm folks, gradually winning higher positions of trust and honor. He began the agricultural club work with boys and girls in North Carolina, and during the past few years, before coming back to his native State, had charge of extension work for the United States Department of Agriculture in the thirteen southern states.

State College is fortunate, therefore, in having such a man as Dean of the School of Agriculture. It is believed firmly that this part of the college organization will now grow in power and strength and that more students will be attracted from the farms of North Carolina to receive training for their life work under the direction of Dean Schaub and his associates. And, already, it appears that there is a new feeling of confidence and enthusiasm among the agricultural workers of the College.

HETERO COLORS

M. W. L.

There has been inspiration in the air during and since the holidays, but when this department had to stand in line for two hours to get the privilege of paying the treasurer money which he had rather invest in Florida real estate, there is too much static to get tuned in and tell you what has been or is in his mind—so the rest is static, need not read if you like.

The latest suggestion for THE TECHNICIAN, that there be an asbestos page for hot stuff. The "Yelper" has applied for first column. This department thinks the "Yelper" will be able with this new addition to our weekly magazine to say what is on his mind about women, faculty, and other interests of his.

With the canes and derbies as part of the paraphernalia that distinguishes Senior dignity, pink pajamas have been added. See "Pop" Taylor for the details, size, length, etc.

This department has decided not to say anything about New Year resolutions since recent reports are that King Tut broke the most valuable ones about .0005 B. C.

The weather report shows there has been an increase of about 10 per cent in the consumption of cigarettes in the female colleges over last week. Next week, fair to cloudy.

Some Dome!

Student Forum

STUDENT DESIRES DRAMATIC CLUB

Rising in the minds of many during the last year or two has come the question: What about a dramatic club at State College?

First we ask ourselves, do we have the material for a good dramatic club? Many of the students here would make an exceptional showing on the amateur stage and some on the professional stage. It is not always the literary student that makes good in a dramatic club, the writer is inclined to believe that there is more material here than a profession is being sought, for many actors could have been good mechanics and vice versa.

Many students here will welcome the day when they can "try their hand" at acting.

T. S. STUART.

THE ORATORICAL CONTEST

Is there something wrong with our student-body, or is it that some hold the wrong attitude towards certain facts of our college life?

Are the things of college life that are obtained by the intellect unimportant to the average student? Is it due to the lack of mental stimulus, or are those things that so many of our students keep clear of really not worth while?

An inter-society oratorical contest will take place the latter part of January. So far only four students have indicated that they are going to try for the contest.

The athletic field does not hold a greater thrill nor a deeper significance than the matching of wits on the platform against a worthy opponent.

J. B. BRITT.

SCHOLARSHIP AND THE FRATERNITIES

There has been numerous criticisms of the scholastic standard of the fraternity men on the campus.

There are several factors that affect directly and indirectly this situation, but it is generally thought that it is the men themselves and not any outside influence working against them.

The one biggest factor causing lower scholarship among the fraternities is the long period that exists for fraternity rushing, and the system used in connection with rushings.

There is a rule that any Freshman who doesn't complete his work satisfactorily for the first two terms cannot be taken into a fraternity. This is an exceptional good policy, but instead of teaching him how to study and making him do his work, he is rushed by the different fraternities until he hasn't a chance to study, and consequently he loses interest in his studies and thinks of pleasure and the social side first. He is rushed until December 4, only one week before examinations, which makes it impossible for him to make high marks or even pass some of his subjects.

If rush season was shortened and have a week of open work then each fraternity would have an equal chance, and the freshmen, the faculty, and the Pan-Hellenic Council would be benefited.

Rushers as well as the rushees are faced with the same thing, they are forced to do the rushing if they get the men they want by the system that exists here.

OUR FRATERNITIES IN COLLEGE LIFE

There is a tendency in most colleges to have a marked dividing line between fraternity and non-fraternity men, but this is a misunderstanding between both. We are all made of the same material, but as all men are born equal and reach different points in life, so is the college student. Some have a desire to mix more social activities with their academic work than others. It is not exactly a question of fraternity or non-fraternity when we leave college, but the question that arises is: Have you obtained the social side of your education?

A college education is two-fold: the academic side and the social side. The academic side is obtained on classes each day and the student failing to get this side is a miserable failure in college. The social side is received in your mixing with the students every day from all sections of the country and from this contact you get your new ideas and glimpses of life. A college education of academic work only is also a failure.

Naturally fraternity men lean nearer to their brothers, but the one who carries the air of superiority, as the editor says, has made a fool of himself in the eyes of the world. The great man of today is not the one that realizes his superiority but the one that can have a superior place in life and still have equal contact with all men.

It is not the pledges or the student that did not receive bids who need sympathy, but it is the student that allows this phase of college life to affect him in regard to his fellow-man that needs all the sympathy. Fraternity or non-fraternity, we all come here for a purpose, and it is every

This Week's Timmerick

by ZIPPY MACK

This is now the New Year, Twenty-six;
We must all of our vows firmly fix,
Lest the passing of days
Send them forth on their ways
With their broken forerunners to mix.

There was once a black derby and cane
Which appeared in each highway and lane;
The Seniors with daring
Their new garbs are wearing,
But the whole bunch looks strangely insane.

Agromeck Yelps

'Tis said that canes and derbies are now in style.

There are those who would make the Raleigh Religious Forum a Raleigh religious furor.

An experiment for boys who have girls whose birthdays are in January: Try to forget them—and see if they will let you.

Any clubs, societies, fraternities, or other organizations who want space in the 1926 Agromeck must make reservation by January 15.

All group pictures which have not been made will be taken Sunday, January 17. Groups which want pictures made after this date will have them taken at their own expense. Make your appointment at once.

We hope every one had a most prosperous Christmas and returned with plenty of money. If you have any more money than you can use, drop around to see us. We shall be glad to invest some of it for you.

Last call for Sponsor Pictures. If you cannot get a sponsor by January 15, you don't deserve the honor of selecting one, so we shall let some one else in your organization have a chance. Get busy—Meredith, Peace and St. Mary's are now open.

Our professors are indeed a darning crowd—they all passed us. One gave the courage to give us a "2." Congratulations, Professor!

Senior write-ups are due January 15. They should contain between 100 and 200 words. If you want the truth written about you, get a good enemy to write you up. If you want sweet talk, let your girl try it.

We have often wondered why the younger members of the fair sex appeared to be so shallow-minded. Dr. T. P. Bailey, of Sewanee, probably explained the cause in a recent lecture

student's duty to follow in the way he desires and not be bothered by petty opinions that may seem personal to him. The more a student puts into college life the more will he get out of it. If he falls in the ranks of the students, he can blame no one but himself.

J. L. CAMPBELL.

when he said, "Promiscuous petting is a cause of insanity."

All Senior and Junior Questionnaires must be completely filled out by January 15. The Agromeck office will be open daily from 12 to 1, and from 6:30 to 7:30, for that purpose. We cannot put your honors in the book unless these records are filled out.

Ye Yelper is kept busy retracting statements and apologizing for remarks which appear in this column. All of which pleases us immensely since the indications are that this column is being read. Our latest apology is to M. D. H., who informs us that we misquoted her in the December 11 issue of THE TECHNICIAN. We quoted her as saying, "The younger generation is going to the dogs." She informs us that she does not think it and does not care to be quoted as having said it. She attributes the quotation to "some of the older and wiser heads of the day," and suggests that we watch our punctuation marks more carefully hereafter.

"RED" LACKEY HAS SET THE STYLES

"Red" Lackey has made a most conspicuous social debut on the campus, coming out in red.

There might be many reasons for this. First, he is a typical college student, believing that it is his privilege and his duty to make himself conspicuous. He is a patriotic State College student, and believes in flashing the colors of his Alma Mater, which happens to be red and white. He places especial emphasis on the red, displaying white only in the matter of a tie. Even his face is of a very ruddy hue.

It is believed, however, that the main reason for all the red is that he is legging for a high official position in the "Red-Head Club," which has lately been founded.

Lackey has typified and exemplified himself by wearing red shoes, red golf socks, red riding breeches, and red lumber-jack shirt. In addition to his wearing apparel of red, he continuously moves his head rapidly, that the admiring audience may enjoy the full effect of his flaming, crimped, stay-combed, crimson hair. It is said that he longs for an opportunity to contract porrhoea, that he may show to advantage his red gums when he smiles. "Red" has put himself in the limelight, and his thousands of friends eagerly watch his success as a debutante among the hundreds of conspicuous collegiates.

CUNNINGHAM SUCCEEDS CLARK AS CHAIRMAN ENGLISH DEPT.

Came to N. C. State College in 1924 From Northwestern University

With the beginning of the new year, Professor C. C. Cunningham takes up the duties of chairman of the Department of English, succeeding Professor J. D. Clark. Professor Cunningham is head of the Public Speaking division of the department, and he is probably the only teacher of Public Speaking who is also chairman of the entire department of English. This is his second year as a member of the faculty of State College. He came to this institution from Northwestern University, where he had been instructor in Argumentation and Coach of Debate, and where he has for four consecutive years taught all the practical public speaking work offered in the Summer School of the University.

Under the chairmanship of Professor Clark much was accomplished to improve the department of English internally and also with regard to its relationship with the other departments of the college. High standards of scholarship are maintained in the courses offered by the department, and it is making itself felt so strongly as an influence on the campus that many students are electing English in their upper-class years, even though they know that the work will require much time and effort in a field that is not easy for the average "tech" student.

TAYLOR TO SPEAK AT PURDUE UNIVERSITY

Dr. Carl C. Taylor, Dean of the Graduate School, has accepted an invitation to deliver three lectures during "Farmers' Week" at Purdue University and will leave Raleigh Monday, December 11, for the Illinois institution.

He will speak twice before the County Agents and will deliver an address before the entire convention. This is a signal honor for Dr. Taylor and State College.

SOUTHERN COLLEGE YOUTH AND THE RACE RELATIONS PROBLEM

(Editor's Note: The paper from which the following paragraphs are quoted won the first prize of \$75 in the South-wide college contest conducted last year by the Commission on Interracial Co-operation.)

"The presence of ten million negroes in the Southland offers a tremendous and unique challenge to the citizens of these thirteen Southern States. We have woven the negro into our history and modern life until now it is almost impossible without him. We bear the indelible stamp of the negro and he bears the indelible stamp of the white man. The race problem is a very concrete, human one; it cannot be separated from life and treated in the abstract. To understand it one must consider the whole urban, industrial, and factory life, the life of the white home, and the religion of the negro. One must consider the courts, the prisons, the schools, the hospitals, and the recreational centers.

No one statement of conditions can apply to all the South. Atlanta, Memphis, Nashville, New Orleans and Lynchburg each present a different situation. Neither is the problem of the negro any longer peculiar to the South. Because of the extensive migration of the negro to the north, some of the worst riots of past years have occurred there—not in the South. Neither is the problem of the relationships of unlike races solely an American problem; it is a world problem. Students cannot be indifferent to it. Henry Watterson has called the problem of race "God's shadow upon the dial of American progress."

Upon the Southern youth of today has fate placed, particularly the burden of responsibility in the long process of readjustment. We find ourselves in the midst of a spirit-crushing struggle of class and race. Muddy negro alleys with tumble-down shanties stare at us from many a corner. The cold wind moans through the cracks and broken glass in these homes, singing the death song to the tubercular. Little curly-headed babies peer at us timidly from dreary door steps—little tots whom the world will never give a chance. Yonder on the hill bright-eyed negro boys recite their lessons on an old church pulpit. The young girls who keep our parlors neat must entertain their own company in their bedrooms.

In tiny shacks among our hills negro farmers eke out a pittance from the soil. Children's brown fingers pick the cotton for our cloths, and young black arms cut the sugar cane for our candies—all for half a wage. Black "mammies" soo our babies to sleep, while their half dozens shift for themselves in the street. Should a sick colored mother need to go on some long journey, there would be for her on our trains no sleeper or diner accommodations. Should a hungry negro youth go wrong and steal, we give him a mockery of justice in the courts. Yes, in this free Christian land of ours we pour oil on black bodies and burn them white to the shrieking of mobs.

When such conditions exist as do these, though not universally, we cannot expect to find the black man absolutely unquestioning. Among the negroes there is, in fact, a rising tide of racial consciousness and racial pride. There are those who add their voices to the ringing cry of DuBois against injustice. Some follow Garvey's slogan, "Africa for the Africans." Another group, educated youths from such institutions as Hampton, are demanding here in America a man's right to be a man. They realize the ignorance, poverty, and moral laxity of their people; they are students of history and lovers of peace. Co-operation is their plea.

Among the white people there are those, as always, who grow small-eyed in the economic strife and small-hearted with indifference. On the other hand, there is an ever-increasing number in the churches and in the schools who are making a worthy effort towards progress, who say with determination, "Let there be light." The colleges more than any other modern institutions, have the responsibility for training such leaders. College men and women, more than any other group, should seek the breadth of mind and the vision clearly to analyze this problem, and the courage to work it out."

"Rastus, who is dat solvent looking gentleman speculatin' up an' down de isles wid de god obstacles?"
"Don' yuh organize him?"
"No, Ah don' organize him. Ah's never been induced by him."
"Ise franchised yuh don't organize him. He's de most conficated man in our whole diaphragm. He's de new pasture at our church."

Band Will Play At State Institutions

Transportation To Be Furnished By the State Highway Commission

Frank Capps, director of the Extension Department; Captain P. W. Price, music director, and others, have arranged to take the State College Band, Glee Club, and Orchestra to the different charitable and State supported institutions of the State, to give free concerts each Saturday during the remaining school year.

Transportation will be furnished by Frank Page, chairman of the State Highway Commission, who has kindly agreed to loan cars, trucks, and other means of conveyance. These will be week-end trips and will not conflict with the class work of the students. This is a new branch of Extension Service and it will receive the hearty co-operation of every one involved in that work.

This is a new phase of Extension work, and it will give the unfortunate of the State a chance to hear the finest college band and glee club in the South. They are going to visit such institutions as the Caswell Training School at Kinston, the Orthographic Hospital at Gastonia, the State Sanatorium and other State institutions.

This is a special Extension Service and would cost as much as five hundred dollars to bring in as good a band as the State College Band.

Dr. L. H. Snyder Makes Scientific Discovery

(Continued from page 1.)

It is also known that certain of the races of man have a high percentage of some of these groups while certain others have a low percentage.

From such data as these, and from some gathered by his own experimenting, Dr. Snyder formulated his new law of inheritance. The discovery is one which will be of great import in certain medico-legal cases, such as those to determine the parentage of a child. It can practically always be determined that the child is not the offspring of its alleged parents, yet it cannot always be proved that it is. For instance, if the blood of the child is of group four and that of its alleged father and mother of groups one and two, then it is shown that both the adults are not parents of the child. If the blood of the child should be of either group one or group two, then it might or might not be an offspring of the parents. Several cases like this have come up recently in the courts in some of the larger cities.

To gather part of his data Dr. Snyder has worked among the Cherokee Indians in Swain County, and he has also tested approximately 500 families to substantiate his theory.

ALUMNI NOTES

(Observations and Communications of Zippy Mack)

The winter quarter has just started, hard on the heels of the New Year's resolutions. If we be allowed to venture an opinion, we should say that of the two, the quarter will have the longer life.

Mr. and Mrs. Patrick Henry Ray announce the marriage of their daughter, Johnnie Clarice, to Mr. William Plummer Batchelor, Wednesday, December 23, Raleigh, North Carolina.

Mr. Batchelor is a member of the Civil Engineering Class of '24.

Mr. and Mrs. A. B. Webster announce the marriage of their daughter, Grace Sneed, to Mr. John Wesley Whitehead, Thursday, December 24, at Franklinton, North Carolina.

Mr. Whitehead was for a time a member of the Electrical Class of '23, but later studied dentistry at the University of Maryland. He is now practicing his profession in Smithfield.

Mr. Jessie Meachem Henly and Miss Reta Wilson were married December 29 at the First Baptist Church, Roseboro, North Carolina.

Mr. Henly is a member of the Vocational Class of '20.

M. C. W. Clarke and Miss Fleta Wallace were married December 30 at Star, North Carolina.

Mr. Clarke is a member of the Agricultural Class of '16, and is at present engaged in fruit farming at Castletown, Alabama.

Mr. and Mrs. Warner M. Vernon announce the birth of a daughter, Annabelle, December 28, at Muscatine, Iowa.

Mr. Warner is a member of the Poultry Class of '19.

Mr. and Mrs. Macon Grey Williams announce the birth of a son, Gene Grey, December 16, at Fort Myers, Florida.

Mr. Williams, Senior, is a member of the Civil Engineering Class of '25.

Mr. Thomas McCrea, of the '25 Chemicals, was in town during the week, for the purpose of addressing the meeting of the State Board of Sanitary Inspectors.

Mr. and Mrs. Milton Ray Harden

announce the birth of a son, Milton Ray, Jr., December 22, at Burlington, North Carolina.

Mr. Harden, Senior, is a member of the Textile Class of '24, and since his graduation has been in the employ of the Aurora Mills at Burlington.

Mr. S. E. (Sam) Holt, of the '25 Electricals, has recently been made local manager of the Carolina Power and Light Company properties in the towns of Zebulon and Wendell, North Carolina.

Mr. and Mrs. John Summerell Chamberlain announce the birth of a son, John Summerell, Jr., January 4, at Raleigh, North Carolina.

Mr. Chamberlain, Senior, is a member of the Agricultural Class of '20.

Among the County Agents in convention at the college this week we have seen the following alumni: A. R. Morrow, '21; W. R. Anderson, '23; S. R. Wallis, '25; J. I. Waggoner, '19; C. A. Sheffield, '20; C. W. Tilson, '24; H. H. Gordon, '19; W. H. Shearin, '25.

Lady: I would like to have some powder, please.
Clerk: Gun, face, or bug?

CERAMICS BUILDING READY JANUARY 11

The new Ceramic Engineering Building will be ready for occupancy by Monday, January 11th. The two classrooms are being completely furnished with new furniture and electrical fixtures. Classes would have begun there on Wednesday if the rainy weather had not held up the operations on the painting. However, the office staff will be located in its new office facing the west end of the dining hall before the end of this week. The laboratory and kiln rooms are rapidly getting into shape for use.

Husband: "Knowest thou how to bring uppe thy childe?"
Wife: "Certainlie, slug-arde."
Friend Husband: "Then snappe to. Thy childe is at the bottomme of yu cisterne."

The Home of Better Values

A sidelight on N. Bonaparte

[which your course in European History quite probably failed to give you]

EVEN though his life was filled to overflowing with wars, politics and intrigues, Napoleon wasn't too busy to be a shrewd and far-sighted judge of paving materials.

There are paved roads in Holland built at his command which are still in use after a hundred years' resistance to traffic. Napoleon knew good paving—he specified *Vitrified Brick*.

FIFTH ANNUAL MEETING OF HIGHWAY RESEARCH BOARD

Discussion Emphasizes Need of Cheaper Methods of Building Our Modern Highways

The fifth annual meeting of the Highway Research Board, held in the National Academy of Sciences Building, Washington, D. C., December 3 and 4, marked a further step in the progress of road building and maintenance. Reports, some of which were final, while others were progress reports, relating to practically every phase of road building and maintenance, were given by the various committees assigned to those subjects. These reports are given only after most comprehensive tests or surveys. Hence the data may always be relied upon, and the conclusions are indeed valuable to highway engineers and officials.

Raleigh's Largest Drug Store

most valuable report at this meeting was given by Mr. C. A. Hogentogler, of the Bureau of Roads, on the "Economic Value of Steel Reinforcement in Concrete Roads." The survey for this report covered 27 states, and the data proved quite conclusively that steel reinforcement always reduces the cracking of concrete pavement, and in numerous cases is the sole factor in preserving the life of the pavement.

Another report of more than ordinary interest was one showing that the addition of calcium chloride has only a slight effect in giving early strength to concrete, something like 10 per cent at the age of ten days, much more extravagant claims having been previously made.

The one thing dwelled upon in the general discussion more than any other was the fact that more study must be given to the finding of cheaper methods of constructing many roads where funds for hard-surfacing cannot be obtained. A particularly timely article in this respect was given by Mr. Wm. Catchings, of the North Carolina Highway Commission, describing the method of applying asphaltic oils to gravel surfaces in this State.

The Highway Research Board, under Mr. Chas. M. Upham as director, assumes the position of a clearing house for highway research studies and tests. It does not attempt to do anything like the major part of the actual research work, but serves to co-ordinate the efforts of those capable of carrying it on, and thus promote research and at the same time eliminates duplication of effort.

L. E. WOOTEN.

NOTED HUMORIST AND ENTERTAINER PASSES

Ralph Bingham, widely known as a humorist, entertainer and after-dinner speaker, died suddenly at his home in Philadelphia on December 27. He was born in Richmond, Va., 56 years ago.

Mr. Bingham was stricken ill with acute indigestion. A heart attack followed, and he died before a physician reached the house.

For years he has appeared in vaudeville and on the lecture platform. He was a member of the Lambs and Actors' Club of New York.

Mr. Bingham will be remembered by students here, as he appeared on the lyceum course in November. His talk was received with much enthusiasm by local townspeople as well as by the students.

SERGEANT SLOO COMPLETES SEVENTEEN YEARS' SERVICE

Has Served in Navy, Coast Artillery, and Infantry During His Five "Hitches"

On the 26th of December, 1925, Sergeant J. R. Sloo completed seventeen years of active duty in the service.

Sergeant Sloo enlisted in the Navy in November, 1906, and sailed at the head of the Big Fleet on the trip around the world. Upon his discharge from the Navy, he re-enlisted in the Coast Artillery, where he remained for two years. Since that time he has been with the Infantry. He was sent to Panama in 1916, serving with the 29th and 33d Infantry on guard duty.

In 1922 he returned to the States and was assigned to the 18th Infantry, and was discharged shortly afterward. He re-enlisted in the 23d Infantry at Fort McPherson, Atlanta, Ga. On August 15, 1923, he was transferred to State College on R. O. T. C. duty.

Sergeant Sloo has served five enlistments. During his service he has visited nearly all of the eastern countries. He re-enlisted the day after his discharge, which was on the 26th of December.

COURSE IN OPERATION OF PUBLIC UTILITIES

It is interesting to note that a new elective course dealing with Public Utility Operation and Regulation was instituted in the College Curriculum with the beginning of the winter term. This course will no doubt appeal to many Engineering and Business Administration students.

Public Utility Operation, which will be given in the winter term, deals with the operation, management, control and business of central electric stations, gas and water systems, and street and interurban railways. In the spring term, Public Utility Regulation will be given. In this course a close study of the regulation of public utilities by governmental authorities will be made.

Dr. H. B. Shaw, Director of the Engineering Experiment Station, will teach these new subjects. Dr. Shaw has had much experience in this particular field, and is therefore very capable of making this course very worthwhile for those interested.

ORATORICAL CONTEST TO BE HELD JAN. 29

At a meeting of the prospective contestants before the holidays, the date for the annual inter-society oratorical contest was fixed as Friday, January 29, 1926. At this time the picked orators of Pullen and Leazar literary societies will meet on the rostrum to settle the question of supremacy for the year in the highest type of public speaking, the delivery of original orations. The members of Pullen have sternly resolved to do their utmost to turn the tables on their rivals, by winning both first and second places in this contest, as did Leazar in declamation. To do so would more than compensate for the defeat suffered in the first contest of the year, for oratory is admittedly a higher type of speaking than is declamation.

The date for the final contest may have to be changed on account of a conflict with Glee Club engagements. In that event, it will be held early in March.

Soccer League Championship

The 8-9 Tuesday and Thursday Physical Education Class won the soccer championship by defeating the 8-9 class of the Monday and Wednesday division in a post-season game, 6-0. This was the first soccer league ever conducted on the campus and aroused a great deal of interest. Some real good soccer was played in the semi-final and final games. This should lead to the formation of soccer as an intercollegiate sport if suitable competition can be found. The winning team will receive the regular Intramural medals. The following men were members of the winning team: Crawford, P. H., Moore, Rockwell, Noblin, Knowles, Broadwell, McKaughn, Morgan, Wescott, Webb, Bailey, Carr, White.

Inter-Company Football Series

The final game in the Inter-Company football series will be Saturday afternoon, January 16th, at 2:30 p. m. This game was held over from the fall term so as not to interfere with examinations. The Company Football League was conducted on the elimination plan. Co. A has reached the finals in the lower half, while Co. C has reached the finals in the upper half.

Teacher: "Sammy, name the four seasons."
Sammy: "Salt, mustard, vinegar, and pepper."

Men say: "You can't equal Williams"

IT'S the lather. Williams Shaving Cream bulks large. It softens all of every hair. It's soothing to sensitive skins; your face responds to its use as to a massage. Large-size tube 35c; double-size 50c, containing twice as much.

Tie a tin to trouble

A TIDY red tin of Prince Albert, to be exact. There's the greatest little trouble-chaser in the known world. Smoke P. A. and pipe-grouches choose the nearest exit.

Yes, Sir, P. A. is right there with the Pollyanna stuff. Sunshine, gladness, the light heart, the bright smile. Because Prince Albert is the cheeriest, chummiest tobacco that ever tumbled into a briar or cornucop.

Smoke P. A.—and smile. Cool, comfortable P. A. Fragrant, friendly P. A. Not a tongue-bite or throat-parch in a ton of it. The Prince Albert process hung the "No Admittance" sign on Bite and Parch the day the factory opened.

Get a tidy red tin of P. A. today and give pipe-worries the gate.

PRINCE ALBERT

—no other tobacco is like it!

P. A. is sold everywhere in tidy red tins, pound and half-pound tin humidors, and pound crystal-glass humidors with space-resistance top. And always with every bit of bite and parch removed by the Prince Albert process.

Where motorized power is virtually unknown, men toil yet accomplish little. The United States has over one-quarter electrical horsepower installed per capita. Japan, leading country of the Orient, has but 0.4 horsepower. Electric shovel and storage battery locomotive are shown at a completely electrified open-pit coal mine, at Colstrip, Montana.

Work without Toil

Ten or twelve hours a day toils the coolie. If he carries all he can, he moves one ton one mile in one day. For that he receives twenty cents.

Cheap labor! Yet compared with our American worker, receiving at least twenty-five times as much for an eight-hour day, the coolie is expensive labor. In America we move one ton one mile for less than one cent. The coolie, working by hand, accomplishes little; while the American, with electricity's aid, accomplishes much.

Plenty of electricity and cheap electricity—these are two great advantages which America enjoys over the rest of the world. While our present generating capacity is 20,600,000 kilowatts, new developments call for 3,000,000 kilowatts more per year.

To college men and women—potential leaders—will fall the duty of finding more and still more work for electricity, with less and still less toil for our workers. For the task is but begun!

GENERAL ELECTRIC

GENERAL ELECTRIC COMPANY, SCHENECTADY, NEW YORK
