

PROF. CUNNINGHAM READS FROM "HE KNOWS LINCOLN"

Tells Assembly Ideal Man is a Combination of Attributes of Lee and Lincoln

The people of America are coming to realize that the ideal man is a combination of attributes of both Robert E. Lee and Abraham Lincoln, Professor C. C. Cunningham told the student body of State College at the general assembly last Wednesday.

At the opening of the program two selections and an encore were successfully rendered by the State College Glee Club, after which Dean Cloyd read the scripture lesson and offered a word of prayer.

Professor Cunningham, the speaker of the hour, made a few remarks introductory to the selection dealing with Lincoln's political life which he had chosen to read. The selection was from a book entitled, "He Knew Lincoln," by Ida M. Tarbell.

The book represents much hard labor in compiling the facts of the life of the great man. The author of the book went to Illinois and gathered in-

cidents of Lincoln's life from people who had really known and loved him. The story itself was told in a very gripping manner, which, coupled with the doubly gripping manner in which it was read by Professor Cunningham, held the audience tensely. Those present considered the reading one of the best things they have heard this year. Those who were not present will probably wish they had gone, if they learn of the really good readings.

Phi Kappa Delta Oratorical Contest Be Held On Monday

(Continued from page 1)

ary steps should be taken to abolish federal prohibition of the manufacture, sale, and consumption of light wines and beer." C. L. Straughan of Pullen Literary Society will be one of the speakers. Straughan is an able debater, having won first place in the Freshman Inter-Society Debate last year. The second speaker for State's team has not yet been chosen.

On April 16 State College will debate William and Mary College in the Richard J. Reynolds High School at Winston-Salem. The proposition for debate is: "Resolved, That the United States Government should recognize the Soviet Government of Russia." State will defend the affirmative. Mr. H. R. DeWitt, owner and editor of the *Daily Sentinel*, has offered a cup to the winner of this debate, and State is expecting to bring home the prize. H. H. Rogers, who has previously matched his wits and oratory against Duke and Carolina in open forum debates, will be one of the speakers. The second speaker will be chosen as soon as possible. During the latter part of April or the first of May, State will have a return debate with William and Mary at Williamsburg, Va. A definite date and question have not yet been decided upon.

State will also enter a contestant in the Second Annual Oratorical Contest on the Constitution which is conducted by the Better America Federation of California. The time and place of the Southern contest has not been decided, and there is a possibility that it will be held in Raleigh. The winner of this contest will enter

the finals, which are held in Los Angeles, California.

The State Peace Oratorical Contest will be held at Davidson College some time during the month of April. Winners of this contest receive cash prizes which are well worth working for.

There is also a possibility of an open forum debate with Duke University later in the season. With such an extensive program, it is hoped that there will be fifty or more men out for these different contests. Students who are interested should see Professor C. C. Cunningham at once.

Library Books Comparatively Few at State

(Continued from page 1)

scientific and journalistic types. The leading newspapers of the State are received daily, and papers from other states may also be found there. All volumes are on the ground floor except the reserve and reference books which are on the third floor or main floor as you enter library.

By special arrangement there will be a slot cut in the south basement door for the return of reserve books on Monday morning before 8 o'clock, which have been taken out over Sunday.

The dumb-waiter system for conveyance of books is one of the latest things in libraries. There is a chain having several boxes at intervals. This chain is run by a motor with automatic cut-off. The cut-off allows two boxes to pass, which may bring books from first and second floor on same trip.

There will be a special signal arrangement whereby a light flashes and bell rings on first floor when tube top is opened on main floor. The light on main floor goes out when signal is received on ground floor. There will be a push button for second signal in case the first is not observed.

For the year 1925, the amount spent for books was \$7,000, which will be smaller for 1926 because of increase in overhead expenses. The library has "Library Bureau Standard" equipment and "Art Metal" stacks.

The librarians are: James R. Guldredge, head librarian; Mrs. Charlotte M. Williams, reference librarian; Miss Agnes B. Cooper, assistant librarian, in charge of loan circulation and periodicals; and Miss Jeanette Burroughs, assistant librarian, in charge of cataloging. Seven students are also employed at different hours of the day.

State College Graduates Are Widely Engaged

(Continued from page 1)

tion to help them successfully meet the problems that they are facing. If the Bureau is unable to give the necessary information it immediately refers them to places where the advice can be obtained concerning the particular problem. In this it is found that the professors and other agencies used were always willing to co-operate.

On account of the requests for this information, the department has undertaken to sketch briefly the placement of the 1925 graduates.

Mr. W. C. Mull, graduate in Industrial Management, is with the Dressel Hosiery Mills at Drexel, N. C. At the present writing we are unable to say whether Mr. Mull is working toward the distribution or production end of the business.

Mr. D. B. Johnston, Business Administration, is employed by the McFadden Company, cotton brokers, Gastonia, N. C. This is the largest single cotton broker company in the United States. They have branch offices all through the textile industry, both in the North and the South. The company speaks well of Mr. Johnston's work.

Mr. J. C. Mace, Business Administration, is with the Sales Department of the National Cash Register Company at Miami, Florida. Mr. Mace is a junior salesman and is well satisfied with his work.

Mr. A. T. Slate, Business Administration, is Service Adjustment Manager with the Kelly-Springfield Tire Company at their office in Houston, Texas. Mr. Slate began his services with the Cumberland, Maryland, branch, later being sent to New York City and Kansas City before being placed in active service in Houston, Texas. Slate has had some real thinking to do and reports it to be of a different character from his former college days.

Mr. R. H. Raper, Business Administration, is at the present time teaching school at Welcome, N. C. His entering the field of teaching is a distinct loss to the business world, as he had shown a natural aptitude in the field of accounting.

Mr. G. C. "Red" Lassiter, Business Administration, is with the Spring Hope Cotton Oil Company at Spring Hope, N. C., learning the outcounseled oil business. "Red's" success must be sure though slow, for letters brim with optimism. One can almost see his ever-ready smile between the lines.

Mr. J. W. Carpenter, Business Administration, is now Assistant Cashier of the Morris Plan Industrial Bank, Raleigh, N. C. Mr. Carpenter's success depends somewhat on his experience gained while with the National Cash Register Company's office in Raleigh and a determination not to let

anything stop him. The future will probably find him a figure in the field of investment banking.

Mr. Marston S. Gravelly, Business Administration, is salesman with Swift & Company at Charlotte, N. C. Mr. Gravelly's address is Box 1229, Charlotte, N. C. He is exceedingly well satisfied with his present position.

Mr. F. I. Brock, Business Administration, is in the automobile business. He owns half interest in the Brock Motor Company at Trenton, N. C., selling Lincolns, Fords, and Fordsons. The Placement Bureau attempted to connect him with the Ford Organization, but only an agency would satisfy.

Mr. Frank Carr, Jr., is at present with the Investment Department of the Equitable Life Assurance Company of New York. Mr. Carr was engaged by the branch office in Raleigh and was sent to New York City, their main office, for training, and then to Syracuse, N. Y., where he is located at the present time.

Mr. L. J. Worthington, Business Administration, is with Gilmer's Chain Stores, located in Raleigh, gaining experience, with the idea of some time going into the retail clothing business for himself.

Mr. R. E. L. "Bob" Correll, Business Administration, was engaged the past summer by the Raleigh Baseball Club and is spending the winter at his home in Laurinburg, N. C.

Mr. L. C. Salter, Agricultural Administration, is with the Division of Markets, North Carolina Department of Agriculture, acting in the capacity of a junior market specialist.

Mr. W. H. Shearin, Agricultural Administration, is at present Assistant County Agent of Craven County, located at New Bern, N. C. Mr. Shearin is also manager of the New Bern Truck Growers Association, Inc., and manager of New Bern Sweet Potato Storage House. Mr. Shearin indicates that he expects to remain in this line of work.

Mr. C. J. Roberts, who was taking graduate work in 1924-25, having received his Master's degree in Business Administration in June, 1925, is with the Sales Department of the Ford Motor Company at Charlotte, N. C.

The above placements show the exceedingly wide range of positions which are possible for men in Business Administration and Industrial Management. Another point that may interest many is the fact that the salaries of these men are, on the average, very good, especially since this is their first year out in the business field. They range from \$125 to \$250 a month. There are unlimited possibil-

ities in the business field for men willing to work and who possess stamina. The rapid strides being made by the Industrial South assures openings for the Business Administration, Industrial Management, Agricultural Administration and Engineering men.

Southern and Northern firms doing business in the South are alive and willing to take Southern college graduates of the better type.

The Placement Bureau of the School of Science and Business is composed of Professors R. W. Henninger, L. E. Cook, Edwin E. Stretcher, and Dr. G. W. Forster. Requests for men coming to them and calling for a graduate requiring training not given in the School of Science and Business are referred to the other schools within the college.

Thief Removes Two Radio Sets

(Continued from page 1)

Meredith about seven o'clock and his roommate, leaving shortly afterwards for the basketball game, lowered the window without locking, leaving the lights on, and locking the door. On returning from the game he found the window open and the radio set, which was setting on a table near Webb's desk, missing. Investigating further,

it was found that a second set had been stolen, which was setting just inside the window.

When Mr. Webb returned from Meredith and heard of the robbery he called the police at once to investigate the case, but no definite clue could be found.

One of the sets was a very fine piece of Mr. Webb's work that he had spent all his spare time on for some months in building for Miss Pearce. It had been completed with the exception of varnishing the cabinet which he had removed from the set and was working on the afternoon before the robbery occurred. A number of persons who have recently seen the set greatly admired it. "I would not have taken five hundred dollars for it," said Mr. Webb.

The case is still being worked on by the Police Department, and a twenty-five-dollar reward is offered for any information leading to the conviction of the person or persons who committed the theft.

Our Motto: "CLEAN PICTURES AT MINIMUM COST"

\$15,000.00
Cash Prizes
For Feeders of Dairy Cows and Beef Cattle

Every state fair and livestock show conducts a feeding contest. The premium list is the book of rules. Every contestant must pay an entry fee or stall rent and also buy his feed.

Most of these fairs and shows are commercial enterprises and they are expected to earn a profit. They are supported by all agricultural colleges and livestock associations because they help the farmer and feeder.

We thoroughly believe in rewarding feeders for their skill in getting the utmost out of their feeding materials. They should be encouraged in every way possible, therefore we have launched the greatest feeders' contest of all—

122 Cash Prizes—\$15,000.00

- 14 Prizes for Cow Testing Associations \$3,000.00
- 14 Prizes for Individual Dairy Herds 1,000.00
- 7 Prizes for Championship Cows 1,000.00
- 14 Prizes for Beef Cattle Feeders 2,500.00
- 12 Prizes for supervisors or verifiers 2,500.00
- 24 Prizes for herd managers 1,250.00
- 37 Prizes for co-operating feed dealers 2,500.00
- 122 Prizes, totaling \$15,000.00

Every feeder of six or more dairy cows, or forty or more beef cattle is urged to enter this contest. You can feed anything you like just so the grain ration contains 35% or more of Corn Gluten Feed—the protein feed that makes meat or milk at the lowest cost.

You should enter your college herds. The members of your animal husbandry classes should become certifying supervisors for other feeders. This will be valuable experience in your college course and may earn the supervisors prizes.

This contest starts April 1 and ends September 30, 1926. The simple rules and conditions are given in detail in our new book, "The Gospel of Good Feeding" will be mailed free. Write for them now.

**SOUTHERN SPINNERS ASSO.
HOLDS CONVENTION HERE**

Many Former State College Students Return for Recent Meeting

Mr. F. Gordon Cobb, secretary of the Southern Textile Association and general manager of the Lancaster Cotton Mills, Lancaster, S. C., addressed the textile students of the North Carolina State College previous to the meeting of the Spinners' Section of the Southern Textile Association last week.

Mr. Marshall Dilling, a former president of the association, also addressed the students.

Mr. Cobb has several State College Textile graduates in his employ and also has a son taking the Textile Manufacturing course at the school.

State College was well represented at the meeting of the Spinners' Section of the Southern Textile Association, the following men being present:

Mr. C. M. Black, Class of 1904, superintendent Borden Cotton Mills, Goldsboro.

Mr. David Clark, Class of 1895, publisher *Textile Bulletin*, Charlotte.

Mr. J. W. Clark, Class of 1906, president Randolph Mills, Franklinville.

Mr. L. R. Gilbert, Class of 1907, superintendent Caraleigh Cotton Mills, Raleigh.

Mr. J. H. Haddock, Class of 1915, Research Department, Erwin Cotton Mills, Durham.

Mr. Carl R. Harris, Class of 1917, assistant superintendent Inman Cotton Mills, Inman, S. C.

Mr. D. H. Hill, Class of 1909, associate editor *Textile Bulletin*, Charlotte.

Mr. E. B. Manning, Class of 1921, designer, Rosemary Manufacturing Company, Roanoke Rapids.

Mr. J. E. McCee, Class of 1921, superintendent carding and spinning, Rosemary Manufacturing Company, Roanoke Rapids.

The Junior and Senior students also attended the meetings.

Last Week's Best Article

The honor for having the best article in the issue of February 6 goes to Robert Haywood for the story, "Glee Club Has Successful Tour of Western North Carolina."

ALUMNI NOTES

(Observations and Communications of Zippy Mack)

The Wake Forest fellows were not so bad, even with the presence of their much-sought Emmerson. If the team keeps up its present stride, it may be that Carolina can be induced to drop another Conference game.

According to a report recently issued by the Alumni News, the total amount subscribed to the Memorial Tower Fund is approaching forty-five thousand dollars. This is a very good start toward the hundred or more thousands of dollars necessary for the completion of the tower. Every "Old Grad" should see to it that he has made a pledge and that that pledge is paid up.

Mr. and Mrs. Dewey Augustus Floyd announce the birth of a son, Buell Pittman, January 30, Trenton, New Jersey.

Mr. Floyd is a member of the Electrical Class of '21, and is a brother of George Floyd, who is now a Senior.

Messrs. T. W. (Gofer) Bridges, of the '24 Agriculturals, and J. J. (Johnnie) Hill, of the '24 Electricals, who are now teaching at Nashville, were visitors Wednesday night for the Wake Forest game.

The Studdert boys, George and Bill, are now in Mexico, following their profession of Civil Engineering. Bill is a resident engineer for the highway construction department, while George is a city engineer. In addition to the Studderts, there are several other State men who are doing well in the turbulent nation south of us. They say that they have good jobs which more than overbalance the unpleasantness of having some one jokingly shoot at them occasionally.

KO-ED KOLUMN

By D. M. B.

It is not news that there have been great changes noted in the Library since it entered the new building. Yet with the complete metamorphosis of surroundings, no great improvement in the amount of reading has been noted.

Very little more reading is being done now in the beautiful new library with its staff of ten members to supply the demand than was done fifteen years ago in the old library, which contained not quite a quarter as many volumes.

The reading has not increased in proportion to the development of the library facilities. One must admit that the old library was a gloomy place to read an interesting book. Yet the fact that impresses both Mrs. Williamson and Mr. Gulleidge is that the professors themselves make very little use of the library, and it is believed that they might set good examples for the students.

When Mrs. Williamson came to our College Library not quite sixteen years ago the library contained five thousand volumes. These volumes were adjudged from two independent sources—unknown to each other—within the same week as being the best selected group of books gathered together in the South.

Until three years ago the library had only one actual staff member, Mrs. Williamson herself doing practically all of the work—the cataloging, circulating and all. Today there are ten members on the staff, and between eighteen and twenty thousand volumes constituting the library. Yet the depressing fact of all is that, of all the land grant colleges in the United States, N. C. State has the least number of volumes. But with the new library, more books are expected.

The reading by the boys has not increased in proportion to the increase in number of students. Mrs. Williamson has always been eager to help the boys select beneficial books, yet has hesitated in urging her selection for fear the boys would think it censure. It is a splendid thing and one that has been neglected greatly that the boys have one who is so well equipped to direct their reading.

Few books of fiction are taken out or read, but the boys do read periodicals such as magazines and newspapers.

It is to be hoped that with the splendid opportunities now facing the boys they will grasp the chance to increase their knowledge of the book world.

S.O.S. IN TECHNICIAN BRINGS QUICK RESULTS

The Y. M. C. A. wishes to publicly acknowledge receipt of a ten dollar subscription from "Ted" Causey of the '24 Electricals. This subscription came in answer to a notice published in the January 30 issue of THE TECHNICIAN. This issue mentioned carried an appeal to the students to pay up the pledges which were made last fall. We are very happy that Mr. Causey is still interested in the work the Y. M. C. A. is doing. While he was here it will be remembered that he was closely connected with this organization. It seems that "Ted" is keeping in touch with his Alma Mater through the columns of THE TECHNICIAN. "Ted" is making good with the General Electric Company, as every one will be glad to know. We wish for him the very best of success in his field.

"BARNYARD" ORCHESTRA PLAYS FOR SQUARE DANCE

The famous "Barnyard" Orchestra, recently accumulated, amalgamated, dissipated, and synopated, furnished music Sunday afternoon, February 7, for a dormitory square dance. The dancers consisted of the different square dance artists from all over the campus. "Farmer" Munn officiated as caller of the figures. The method used in obtaining sheikesses was making the males wear hats while the males feigned by letting their shorn locks act as sheik bobs.

"Georgia rang tang" and "Georgia buck" seemed to be the dance steps preferred. An occasional jig kept any possible monotony from entering into the occasion.

(Miss) Phil Hendrix was the belle of the dance, while her (his) sidekick and leader Munn were by far the ogical ones to be chosen as leaders of the grande marche.

The grande ball ended by all joining in singing the most melodious and out-enthalling tune, "How Dry I Am."

PULLEN SOCIETY ELECTS SPRING TERM OFFICERS

George D. Cline Chosen to Lead, While His Constituents Munch Crackers

The officers of Pullen Literary Society for the spring term were elected at a meeting of the society Friday night, February 5. The election followed the presentation of a weekly program.

The officers who will direct the destinies of the society for the coming term are: President, G. D. Cline; Vice-President, H. K. Platt; Secretary, B. J. Kopp; Treasurer, R. R. Trevathan; Assistant Secretary, P. E. Trevathan; Assistant Treasurer, C. L. Straughn. The election of the minor officers was postponed until the next meeting.

After the completion of the program, the meeting, which was held in the society hall, adjourned to meet immediately in the "Y" banquet hall, where refreshments and smokes were awaiting them. During the course of refreshments the officers for the spring term were elected. The election was held at this early date in order that the names of the new officers might be placed in the 1926 Agromock.

LITERATURE CLUB IS NOW CO-EDUCATIONAL

Another State College organization became co-educational when on Tuesday night, at their regular meeting, the Brooks Literature Club initiated ten new members, including Miss Boshart.

The meeting proved to be a most interesting one. The work of Zane Grey was the topic for discussion. R. R. Trevathan reviewed the life of the writer, pointing out and describing very vividly some of the most outstanding events, including Grey's

"Come to The Vogue First" RALEIGH, N. C.

"VOGUE SUITS ME" 10% Discount on Clothing to College Students

freshman days at college and his uphill struggle to gain recognition of his first writings.

P. L. Stuart reviewed one of the writer's recent novels, "The Vanishing American." W. E. Wilson made some critical comments on the writer's works. He insisted that on the whole Zane Grey was not in the class of

Horatio Alger, but instead was a writer of artistic ability, having a keen insight into the philosophy of life, and a wonderful descriptive ability.

After the program the meeting was thrown open for a discussion of the merits of Grey. He was severely criticized, but it was decided that his work was at least decidedly interesting.

FOR BETTER SHAVING—WILLIAMS

When it's a rainy night—and with three crafty bridge players your luck is running wild—have a Camel!

WHEN the dark skies are pouring rain outside. And fickle fate deals you hands at bridge that you play with consummate skill—have a Camel!

For Camel is the silent partner that helps every deserving player win his game. Camels never hurt or tire the taste, never leave a trace of cigarette after-taste. Regardless of the gold you spend, you'll never get choicer tobaccos than those rolled into Camels.

So this evening as you ply your unerring skill, evoke then the mellowest fragrance that ever came from a cigarette.

Have a Camel!

Camels represent the utmost in cigarette quality. The choicest of Turkish and Domestic tobaccos are blended into Camels by master blenders and the finest of French cigarette paper is made especially for them. Into this one brand is concentrated all of the knowledge, all of the skill of the world's largest organization of expert tobacco men.

Our highest wish, if you do not yet know Camel quality, is that you try them. We invite you to compare Camels with any cigarette made at any price. R. J. Reynolds Tobacco Company

TRUCK FOR TESTING ROADS OF STATE READY FOR USE

Designed by Engineering Experiment Station for Use on Highways

Test truck number three, constructed by the State Highway Commission according to plans devised by the Engineering Experiment Station, the purpose of which is to determine the power required to propel a motor vehicle on the different types of roads, and to determine the type of surfacing that will allow the cheapest operation of such vehicles, has been completed, is ready for use, and in a few days will be placed on exhibit at the college by members of the Engineering Experiment Station who will gladly explain its use and operation to any person interested in the project.

The chassis of the truck is a three-quarter ton General Motors Company truck chassis, upon which is placed an eight-cylinder Cadillac high-speed engine driving a ten horse-power direct current series generator. The generator furnishes electric power for use in driving two five horse-power motors connected in series on the drive shaft of the truck, in place of the usual gasoline engine.

The exterior appearance of the truck differs very little from the appearance of an ordinary delivery truck. Within the wire mesh which forms the sides of the body of the truck is placed the Cadillac engine with the generator situated just in front. The generator is connected by electric cables to the two motors under the hood at the front of the truck. These two motors are connected directly to the usual drive-shaft of a motor vehicle, thus retaining the transmission and differentials which are in some cases omitted.

Also within the body of the truck is a specially constructed anti-vibration frame for delicate instruments. This frame is absolutely necessary because the bouncing and jostling of the truck when in motion would jar the data recording apparatus and blur ink all over the graphical charts upon which the results of the tests are recorded.

The first trial run of the test truck was made February 8 by a two-way run of a mile course on the Raleigh-Durham Highway between the railroad crossing just beyond the State

All Social and Personal News turned in to The Technician office will be appreciated

Whereas, God in His infinite wisdom has seen fit to take from this life the mother of our friend, William Fountain, be it

Resolved, That we, the members of the Chi Chapter of Phi Kappa Tau fraternity, extend to the bereaved family our most sincere sympathy; and be it further

Resolved, That a copy of this resolution be sent to the bereaved family, incorporated in the records of the chapter, and published in the State College Technician. (Signed)

PHI KAPPA TAU

H. M. Jenkins, Jr., spent the week-end with his parents in Tarboro.

Ed. W. Hadley, Jr., spent the week-end with his parents in Charlotte.

George Howard spent the week-end in Concord.

R. G. Thomas visited his parents in Vass during the week-end.

Mr. E. L. Cook was the guest of Ray Nettles at Winston-Salem.

Jimmie Miller, from the Sigma Chapter at Syracuse, N. Y., spent the week-end with the boys at the Phi Kappa Tau house on Chamberlain street.

Fred Crum spent the week-end in Goldsboro, where he attended the funeral of his aunt, and returned Monday.

Mr. Murphy Gregg was a visitor at the Phi Kappa Tau house during the meeting of the Spinners Section of the Southern Textile Association.

Mr. Carl R. Harris visited the Phi Kappa Tau house while in town attending the meeting of the Spinners Section. Mr. Harris is the chairman of the section and a graduate of State College.

J. C. Powell and John Graham, freshmen, were with their parents in Tarboro during Saturday and Sunday.

The friends of J. E. (Jim) Fletcher will be glad to know that he has been removed from Rex Hospital, where he had a serious operation. He is now at the home of his sister, at 2228 Hillsboro street.

Logan-Normet Marriage
Randolph (Slim) Logan, of Shelby, a former State College student and a member of the football team for two years, was married Monday morning, February 1st, to Miss Marjorie Anne Normet, of Gastonia. The wedding took place at the home of the bride's aunt, Mrs. W. H. Poole, of the same city.

"Slim" was a member of the Pi Kappa Alpha social fraternity at State, but is now successfully engaged in the automobile accessories business in Shelby.

Dance at Sir Walter

The Raleigh Chapter of the Rotary Club was host to a number of State College men at a dance in the Virginia Dare ballroom of the Sir Walter Hotel last night, from 10 until 12:30 o'clock.

There were about thirty State College students and a number of young ladies of Raleigh present.

A good brand of music was furnished by the Carolina Entertainers, a small orchestra of this city.

The dance was preceded by the annual "Ladies' Night" banquet of the Rotary Club. During this, some good talks were made by prominent Rotarians from different parts of the State.

Highway Commission garage and Cary.

Observations of time, speed, and imper-hour were made on the outward and the return trips. A constant speed of twenty miles per hour was maintained over the entire course in the two runs. The average calculated power delivered at the drive-shaft going was 12.22 horse-power and on the return trip was 9.8 horse-power.

The completion of the truck winds up six months of strenuous labor on the part of the State Highway Commission and the Engineering Experiment Station. Mr. James Fontaine has been employed by the Station to devote his full time to the success of the project. There are also other research assistants employed in the same manner.

WELLONS IN CHARGE ROOM ASSIGNMENTS

The room assignments, which have formerly been handled by Dean Cloyd, will be taken over by Mr. Wellons Wednesday. The express office, which is being remodeled, will be used as his office. A close check is being made this week on the old assignments, and the furniture of each room is checked so as to have everything in order to begin with. This change was made for the convenience of the students as well as to give better service in the upkeep of the dormitories.

STATE IS REPRESENTED AT SOUTHERN MEET

Several men from the State College Faculty and the Agricultural Experiment Station attended the annual meeting of the Southern Agricultural Workers in Atlanta last week. The College and North Carolina were honored by having some of these men elected to important offices and appointed on committees.

At this convention many fields of agriculture were represented, including Agronomy, Plant Pathology, Entomology, Animal Industry, Horticulture, Dairying, Sociology and Economics, Marketing, and others.

Dr. C. C. Taylor was elected Chairman of the Sociology and Economics Department for next year, also chairman of research problems of his department in all the Southern States.

Dr. R. Y. Winters was chairman of the Agronomy division this year. Dr. Lehman was chairman of the Plant Pathology group this year.

Professor C. D. Matthews was chairman of the Horticultural division, and Professor C. F. Williams was elected secretary for next year.

In the Horticultural division, plans were formulated for the conduction next year of an all-Southern fruit-judging contest. Nine institutions entered the contest.

Minor offices and places on committees were held by almost every man present from this college.

SHELTON ATTENDS MEET OF CERAMICS SOCIETY

Dr. G. R. Shelton, assistant professor of Ceramic Engineering, spent the week in Atlanta, attending the twenty-eighth annual convention of the American Ceramic Society. Professor A. F. Greaves-Walker, who is a trustee of the society, did not attend, remaining here to conduct the work of the department.

MEREDITH NEWS

(By LEONE WARWICK.)

We feel that the appellation, "Dr. Brewer's Country Club," is inappropriate, especially since our new post office is being put up, and our telephone exchange is almost installed. In fact, we begin to think the Capitol ought to be moved nearer town. It has been promised that the State Prison or any other North Carolina institution that obstructs our view or annoys us will be moved by the Legislature.

Founders' Day was a momentous occasion this year, this being the first public authoritative statement of the financial side of the building of New Meredith. W. N. Jones, president of the Board of Trustees, gave a report showing the cost of the buildings and the amount still due, together with tentative plans for raising this money. The chief feature of these exercises, however, was an excellent address on the subject of Christian Education by Rev. Clay I. Hudson, pastor of the Fritchard Memorial Baptist Church of Charlotte. In the afternoon from four-thirty to six o'clock the college faculty was at home in the parlors, and in the evening from eight-thirty to ten there was held the Student Government Reception.

The courtesy of the State College Sophomores in deferring to the wishes of Dr. Brewer in the matter of painting the numeral deserves the highest commendation, and is greatly appreciated by our Sophomores as well as by

our president. The numerals on the highway and the one farther up on the campus we consider a great asset to New Meredith.

The officers of the P. W. D.'s were entertained by some of the new members Saturday night. A chicken dinner was the chief attraction of the evening, but in addition there were sundry stories, toasts, and reports. The Society appreciates the publicity given to it by THE TECHNICIAN, but requests that the secret of its initials remain forever a dark secret.

Invitations have been issued to the Junior Class by their little sisters for a party on the evening of the thirteenth. St. Valentine's Day coming on Sunday this year, all those who would

celebrate must do so on Saturday, in spite of the fact that it is the thirteenth.

The much-heralded Senior minstrel is at last to take place; the date set is Saturday, February 20. We are hoping that the notorious red mud will dry up before then.

She—All men are fools.
He—Yes, dear. We were made fools so you girls wouldn't all be old maids.

The question is sometimes asked: Where do young men get when they enter a large industrial organization? Have they opportunity to exercise creative talents, or are they forced into narrow grooves?

This series of advertisements throws light on these questions. Each advertisement takes up the record of a college man who came with the Westinghouse Company after graduation and within the past ten years.

Engineer! Arrest that Bolt

THE Sales Department was talking in emphatic and easily understood language. It was saying, "We want action."

At Westinghouse, action in many cases is another word for research. And research works toward selected goals. In this case the goal was for new apparatus to make unchained lightning more respectful of power plants, lines and equipment.

Today, as a consequence, the electrical industry is the beneficiary of the "Autovalve Lightning Arrester", perfected to a degree of efficiency, long service and universal utility never dreamed of before. Behind that picture you find Joseph Slepian. With two degrees from Harvard, he started training in our East Pittsburgh Shops in 1916. A year later he entered the Research Department.

This was the lightning arrester situation which Slepian took into the research camp: There were two different types of apparatus. One, called the multi-gap, was used chiefly on poles of distribution circuits. When lightning struck, it frequently caused transformer troubles and damaged equipment. For high-voltage application there was the cumbersome electrolytic arrester. Its performance was good enough. But it required constant attention; was costly of upkeep; and could not be used on poles.

When Slepian perfected the Autovalve Arrester, the demand was so great that orders could not be filled. It was entirely new. One type of apparatus solved the whole problem—no more costly care. It stands up indefinitely, whether used on poles or on the ground—sufficient reasons for yearly sales exceeding \$2,000,000.

Such results may depend as much on a phase of an engineer's past training as on his immediate research. Take the radio horn which gives the natural tone to Radiola sets. It was Slepian's mastery of mathematics, in which he specialized at Harvard, which contributed toward that big advance in the early days of loud-speaker popularity.

The man with "hidden reserves" is constantly finding them called upon to "climb peaks and cross mountains" in institutions like Westinghouse.
