## STATE - U. N. C. DEBATE IS FULLY REPORTED IN NEW DEBATERS' ANNUAL

Is One of Eight Debates in U. S. to Receive This Distinction; Tribute to Cunningham

The debate between a team representing the University of North Carolina and a team from N. C. State College, held last spring at Chapel Hill, has been chosen as one of the eight debates selected from all the debating activities of the American colleges and universities during the year 1924-25 to be included in this year's University Debaters' Annual, which has just been published. The proposition discussed at the State-University debate was: "Resolved, That the dissemination of knowledge of birth control by contraceptive methods should be legalized throughout the United States."

A stenographic report of the entire debate is published in the Annual, which also contains a brief and bibliography of the debate.

The Annual is edited by Edith M. Phelps, who states that "the eight debates were chosen not only because they presented good material for critical study, but also because the subjects covered are likely to continue in interest." The distinction of making the Annual comes to State College for the first time, and attests to the constructive and efficient work of Prof. C. C. Cunningham, head of the Public Speaking Department, and his 1924-25 debating teams.

The debate on "Birth Control" created considerable interest, as it was one of the first to reflect the modern trend in American debating toward the newer form, now known as the Oxford system. Under this plan the teams are divided, members appearing on both sides of the question. The decision is usually by a vote of the audience, and an open forum forms part of the procedure.

The speakers who took part in the debate and whose speeches are reproduced in full were: Alvin M. Fountain and J. Alvin Wilson representing State College, and L. Taylor Bledsoe and L. B. Kennett representing the University. The decision was obtained by an audience vote on the merits of the question, rather than on the merits of the debate itself. The outcome was approximately two hundred in favor of the affirmative to fifty in favor of the negative.

The other seven debates appearing in this Annual were between teams representing Oxford University and the universities of New York, Colgate, Stanford, George Washington and Southern California, and the State universities of Washington, Arizona, Iowa, California, and Virginia. The questions discussed at these various universities included: "Cabinet Form of Government," "Japanese Exclusion," "Uniform Marriage and Divorce Laws," "Participation of the President's Cabinet in Congress," "Mencken School of Thought," "Amendment of the Volstead Act," and "Child Labor."

## MORRIS WILL ORGANIZE FRESHMEN AT CAROLINA

J. S. Morris, who was a leading member of the Freshman Friendship Council last year, attended a meeting that was held at Chapel Hill Wednesday evening, September 30, for the purpose of organizing a Freshman Friendship Council at Carolina.

Morris, who is chairman of the committee for regeneration of the F. F. C. at this institution, and who will continue to hold this position until the organization elects its officers from the Freshman Class, is well informed in Y. M. C. A. work, especially in the work and organization of the Freshman Friendship Council. At Carolina he gave valuable help and advice to the members of the Y. M. C. A. that are trying to start a F. F. C. at that institution.

## NOTICE, STUDENTS!

No more changes in address will be made until January 1.

This is necessary in order to make up our mailing list.

J. C. DAVIS.

## Noted Speaker To Address Assembly

Young Men's Christian Association Worker From China To Be Here October 7th

The State College Y. M. C. A. has been very fortunate in securing Mr. W. P. Mills, one of the most brilliant men on the Y. M. C. A. staff in China, to address the student body at the regular chapel service Wednesday, October 7, on the subject of "Floods and Their Prevention in China." He will also speak to Professor Henninger's class on "Labor Problems in China."

Mr. Mills is in charge of the Social Service work of the Hankow Y. M. C. A. and in this position he is constantly putting men in the way of serving others and has in result caused many industrial men and organizations to consult him on vital matters. On one occasion Mr. Mills has been called into counsel by the governor of the province and engineers in connection with the building of dykes to prevent floods and future famines in China. While in Hankow Mr. Mills had formed a discussion group, composed of bank presidents and wealthy business men, and now these men are preparing to become Christians. Another one of the many important things he has done has been the creation of a fund of several thousand dollars paid by the dicksha coolies themselves for an organization which will aid these men in their work.

Mr. Mills is a native of South Carolina. He received a B.A. degree from Davidson College and an M.A. degree from the University of South Carolina, as well as a B.A. in the school of theology at Oxford University. Mr. Mills was a Rhodes scholar from South Carolina at Oxford, England, from 1907 to 1910. While attending Christ Church College he was a member of the crew and took part in intercollegiate events.

Mr. Mills will also speak at the Y. M. C. A. Wednesday evening, October 7, at 6:30, using for his subject, "New Movement in an Old Country."

## BUNCOMBE COUNTY CLUB ELECTS NEW OFFICERS

J. L. Campbell Chosen President; New Members Initiated

The Buncombe County Club started the year off with a bang Wednesday night. Seven new members were initiated into the club and at a business meeting, feed, and smoker afterward officers were elected for the present year. Jimmie Campbell was unanimously made president, with Stewart Gaston vice-president, and F. M. Chedester secretary-treasurer and reporter.

Twenty-four members were present, several old men and two new ones being absent.

## Nash-Edgecombe Club Send Technician To High Schools In Two Counties

At a meeting Wednesday night, called by President Trevathan, the Nash-Edgecombe County Club decided to send THE TECHNICIAN to all the accredited high schools in the two counties.

The club voted that the paper be sent to the president of the Senior Class, because some of the principals would look at the heading, and into the waste basket it would go. It would be of no benefit to spend money on a proposition of this kind if the students do not get the paper to read. The club plans to have the initiation some time in the near future.

## Baum Resigns As Managing Editor The Technician

Other Duties Cause of Action; Has Been Very Active on Staff of Paper

Herman Baum, Managing Editor of THE TECHNICIAN, tendered his resignation to the Publications Board Wednesday night. The cause given by Baum for this action is lack of time to properly perform the duties of this office. He recently became connected with the News and Observer of this city, and as he is devoting his afternoons to this paper and keeping up his class work besides, he finds his time taken by these duties. At this writing the Board has not met to act upon his resignation, but it is understood that it will be accepted.

Baum has been a worker on THE TECHNICIAN force since his entrance in school, and his place will be rather hard to fill. Last spring the student body showed their appreciation for his efforts by electing him to one of the highest positions on the staff of the paper. His experience enabled him to take up the work in a most creditable manner. The first editions this fall were gotten up by an incomplete corps of workers, and Baum acted as reporter, copyreader, managing editor, advertising manager, and general utility man.

E. G. Moore, Editor of THE TECHNICIAN, expressed genuine regret over the loss of so valuable an assistant, but stated that under the circumstances he saw no other course open. He did not state whom he would ask the Board to appoint to fill the vacancy.

Following is the letter received by the Students' Publications Board:

Mr. F. L. Tarleton, Secretary, Students' Publications Board, North Carolina State College, Raleigh, N. C.

Dear Sir:—I hereby tender to the Students' Publications Board of North Carolina State College my resignation as Managing Editor of the 1925-26 TECHNICIAN.

It is with genuine regret that I find this action on my part necessary, but owing to other work that I find it necessary to undertake, I cannot give the time to this position on the staff of THE TECHNICIAN that it requires.

(Signed)

HERMAN BAUM.

## BILL ORMOND WAS WELL KNOWN HERE

Former Student Had Many Friends Among Faculty; Sympathy of College Community With the Prosecution

By ZIPPY MACK

The eyes of the nation, of North Carolina, and especially of North Carolina State College, are turned this week towards the spectacular trial in Rockingham of W. B. Cole, slayer of a State College boy.

Almost two months since the death of W. W. ("Bill") Ormond at the hands of the wealthy cotton mill operator, the Mills of Justice have begun their slow grind to bring the rich killer to his just deserts. The great heap of the materials and the even more formidable mass of human sympathy for the unworried dead man will be fed at one and the same time into the great Hopper, from which must finally come the edicts of Justice.

Dr. E. C. Brooks, President of N. C. State College, and Mr. T. T. Wellons, Superintendent of Buildings and Grounds, are now in Rockingham as witnesses for the prosecution. Both of them were close friends of the dead man, and are present to give testimony

(Continued on page 5.)

## NEW LIBRARY BUILDING TO OPEN OCTOBER 5TH; BE COMPLETED 15TH

### JUDGING TEAM LEAVES SUNDAY

Will Judge Dairy Cattle at the Virginia State Fair, To Be Held in Richmond

Four State College students will leave Sunday, October 4, for Richmond, where they will participate in an interstate dairy cattle judging contest to be held at the Virginia State Fair at Richmond during the week of October 5.

The State College men who will compose the team representing North Carolina are members of the Senior Class in Animal Husbandry who had a course in Advanced Stock Judging in the spring of their Junior year. The four students who made the highest average grades during the course in judging were selected for intensive practice at the beginning of the college year, September 15.

Prof. F. M. Haig, who is coaching the team, has had the men at work during every available moment of the training period, and feels that he has a competent team. It is possible that the contest will assume a three-cornered aspect by the entry of a team from Maryland.

It is the policy of the Animal Husbandry Department to give men taking the course all the practical experience possible, and it is believed that contests in state fairs, where they have access to the best animals available, is the most ideal method of getting experience.

The men composing the team are: J. E. Foster, H. M. Adams, J. E. Gibbs, and G. B. Cline. An alternate will be chosen, leaving only three men to compose the team.

## BAND WILL GO TO DURHAM SATURDAY

Alumni Provide Means for Band to Accompany the Wolfpack

When the Wolfpack marches on Hanes Field Saturday afternoon they will be greeted by the familiar strains of "Daddy" Price's State College band. The band will be taken to Durham through the generosity of the alumni of this institution. Mr. John McDonald, of Raleigh, has been especially active in promoting this trip, and the officials feel that he is rendering a real service in taking the band to Durham.

The trip will be made in a large Safety Coach which will leave here at 1 p. m. Saturday, according to a statement given out by Captain Price early in the week. The Concert Band, which is composed of 35 men, will make the trip. This group is made up of the best musicians in the 50-piece R. O. T. C. Band. On a recent trip through the southeastern part of the State the band made an excellent showing, and brought forth praise from several newspapers for their performance.

## DR. RIDDICK FAILS TO SEE ALMA MATERS CLASH

Dr. Riddick, dean of the Engineering School, did not go over to see the University-Wake Forest football game last Saturday, and when asked about it he said that it was just a case of one of his Alma Maters being defeated. Dr. Riddick has been the main-spring of athletics at this institution for quite a number of years, and has had more interest in the teams of Carolina and Wake Forest than a casual observer, having in years gone by captained the former and coached the latter. Then it was upon Dr. Riddick's recommendation that Coach Garity was secured. Perhaps we can't blame him for not wanting to see the game Saturday.

Two New Members Added to the Staff Will Insure Better Service

FULL EQUIPMENT FOR READING ROOM OCT. 15

Departmental Libraries Will Be Brought Together and Will Make Total of 18,000 Volumes

The new Library will be open October 15th with full reading room equipment installed. Due to delay in the shipment of the main reading room equipment, the Library will not operate at its full capacity until October 15th, but there will be student library service beginning October 5th.

The library staff has been increased to five, two being added this year. Miss Jeanette Bursell, graduate of N. Y. Library School, comes to us from Mt. Union College, Alliance, Ohio, where she was cataloguer, the capacity in which she will serve here. Miss Agnes B. Cooper will have charge of periodicals and bindings. Miss Cooper is a graduate of the University of Illinois Library School. For the past year she has been connected with a book shop in Shanghai, China. Miss Cooper has had ten years experience in library work, also, with Minerva University, Oxford, Ohio, and Kansas Agricultural College. With this new addition to the staff, the students of State College will get library service unequaled by any college library in the South.

The greater part of the books will be in racks in the basement of the building, although the general reference books, such as dictionaries, encyclopedias, etc., will be in the main reading room, and an open shelf collection, including fiction and general interest reading, which will be

(Continued on page 8.)

## Freshman Friendship Council Will Organize

First Meeting of Year Will Be Held in the Y. M. C. A. Sunday Afternoon at 1:30

At one-thirty Sunday afternoon, October 4, the organization of the 1925-26 Freshman Friendship Council will be held in the Y. M. C. A. auditorium. The Council is an organization that affords immediate opportunity for the new men at State College to take an active part in the program of the College "Y."

The requirements for membership are: First, belief in the association purpose and goal; second, willingness to endeavor to make Jesus Christ and His principles the model and foundation for life.

Any new student willing to meet the requirements for membership is welcomed to the meeting Sunday. New students with H-Y experience are urged to help in the work of organization. The Council will afford a chance for the continuation of the "Y" work that was done at home.

Mr. J. S. Morris, a leader in the 1924-25 Council, is chairman of the committee of organization for this year. Mr. Morris is anxious for the members of the Freshman Class to take advantage of this opportunity for personal development and service. To those who are willing to work for a realization of the fundamental principles of the Christian religion in their own lives and on State College campus, a hearty welcome is extended, and you are urged to be present Sunday at the first meeting.

## Editorials

Raleigh pressing clubs have inaugurated a price-cutting war. That's fine, but why can't it spread to the tailoring establishments?

And now the British are planning to tax silk and thus boost the price of silk stockings. Somebody is always taking the joy out of life.

One can pick up almost any magazine nowadays and find a severe arraignment of colleges and college students. Gee! we must be a terrible lot of people.

Headline in recent newspaper says that a sociological marriage experiment has proven a failure. A rather serious subject to be experimenting with, according to our way of thinking.

Hon. O. Max Gardner says that he realized a boyish ambition last week when he served as engineer on the "State Fair Special" from Rockingham to Hamlet. Which proves that he was a regular boy.

If your organization does not appear on our college calendar for next week, call by the office, bring your schedule and a good cigar, and we will guarantee that your program will appear next time.

Our contemporary, *The Tar Heel*, states that its staff has been accused of using an adding machine instead of a typewriter in getting up their paper. We would be willing to face most any charge if we could get the advertisements.

We offer our sincere apologies for the several misplaced articles in last week's paper. Our managing editor was unable to look after his regular duties and the printers were confronted with a shortage of help. These facts were enough within themselves to explain the mix-up. Aside from this, we held up the printer until late Friday afternoon in order to carry a story of the game. We hope this issue will more nearly conform to the standard which our readers have learned to expect.

## LET'S BE FAIR

For some time there has been a feeling on the part of many State College men that certain newspapers had some special grudge against us. The paper that has been cited most in this respect is *The News and Observer*. It is true that this paper has often printed news stories that were not especially creditable to the student body, but in nearly every case these have been true stories. We must remember that the business of a newspaper is to print all the news that it can get without stopping to consider who will be pleased or displeased.

The average student does not look at this question from the correct viewpoint. He sees only the personal element involved. Practically every newspaperman has to contend with this problem, and as amateurs in the game we have been confronted with it. Experience has proven that the newspaper that prints all the news is the one that lives the longest and serves society best. In this connection we wish to call the attention of our readers to an extract from *The News and Observer* of September 28. The story was written by Jonathan Daniels, who comments on our football prospects in the following manner:

The debut of young Jack McDowell, of State College, is one of the features of early season football in the State. He grew up to the State varsity from the freshman eleven of last year. In the game against Richmond University Friday he showed more real promise than any other young player observed on the playing fields this fall. He passes brilliantly, runs well, and punts with the best of them. His play in the Richmond game was the outstanding feature. He did not tally himself, but he played a prominent part in every score registered by the Wolfpack.

If Gus Tebell can train men to catch his passes, State ought to be able to play the air game all around their opponents this fall.

## WHY NOT?

At many of the leading technical schools in the south a new kind of course has been installed in the past two or three years. These are called cooperative courses and are so arranged that the student may spend one-half of his time at study and the other at work in his particular field. Such a scheme makes it possible for many boys to receive the advantages of college who otherwise would be unable to do so. Then, too, this kind of course has the possibility of linking up the practical side of the situation with the theoretical.

Other than that we know nothing about this type of course. However, it would seem that the facts mentioned above would justify a rather thorough investigation on the part of someone here who is in a position to judge its merits. We are located rather advantageously for such courses, and should be able to place men in various kinds of engineering work close by. Perhaps there are many bad points in the course, but we immediately think of one. It is comparatively new. In the minds of some people this is enough to condemn the whole proposition, but to our minds this very fact makes it all the more interesting. We have enough curiosity to want to know more about the way the thing works. If it is a success at other schools it is worthy of some discussion at least. If any study or observation of this plan has been made, we have not been informed of it. If none has been made we are ignoring a matter which should be investigated.

## SAVED—ONE TREE

During these days of construction and reconstruction it is indeed encouraging to see people go to extra trouble to save a tree. So often the mighty program of expansion sweeps everything before it, regardless of the beauties of nature. Our campus has been subjected to some modernizing, and we are glad of it. It is especially pleasing to find that our latest project, a new street between

Watauga and First dormitories, will not exact a toll from the trees. For many days we watched with much interest as the work progressed. A beautiful tree was in the path of the concrete gutters. The superintendent of grounds did a fine thing when he caused the gutter to be curved so as to miss the tree. True, the street does not look quite as well, because of the curved place in the gutter, but who will undertake to compare the beauty of sand and cement with that of nature? In our material growth let us keep sight of the really beautiful things.

## TO WHICH CLASS DO YOU BELONG

There are three kinds of boys on State College campus: the booster, the kicker, and the boy who lacks grit enough to express his convictions. It seems that most of us have a tendency to fall under the second class, always kicking and never getting anywhere. Did you ever stop to think that the more a thing is knocked the more torn up it will become? Anybody can tear down, but it takes a skilled man to improve. A man can be a booster and still criticize. We all have to admit that nothing is perfect, but instead of grumbling and knocking, why not set out to make it better? Anything that is thought to be perfect or self-satisfied is in a state of going backward. It will not advance, but on the other hand will deteriorate. When a thing is in perfect running order and is very prosperous, advertise the fact—let the people know of it—and at the same time it will improve itself.

Boosting consists of two things. The first is seeing a good point in a thing and pushing it, and the other is, once you get in the habit of boosting you will always be an asset to your community, and will establish a reputation for it.

If you can't say anything good in your criticism, don't criticize.

## NEVER AGAIN

We awoke last Sunday morning to find ourselves in a most unfortunate position. We had tempted the fates. We had courted disaster, and lo, it had come upon us. We had provoked one of the state's leading journalists with an editorial, and now the product of our hands (and typewriter) was held up to the view of some 30,000 readers, while an expert stood by, as it were, and pointed out the defects in our masterpiece.

Could anything be more heart-breaking? He has virtually accused us of chasing noxious bugs, and has called us psychologists, and perhaps a lot of other mean names. We realize that we are now undone for good, but in our last spasm of literary endeavor we wish to call the attention of the other college editors to this tragedy of modern journalism, so that they may take warning. The saddest part of it all is that one word "unique." If we had left it out we probably would not have been put in the cellar and garret. We used it only twice, and the last time it was in sarcasm. Probably it is against the rules for us to use such implements, but if we remember correctly our accuser was somewhat sarcastic in his charge against us.

We have been found guilty, 'tis true, but we have not heard of the judgment passed, if any, on us. The handwriting on the barn, however, seems to point to an intellectual almshouse, whatever that is, as our future place of confinement. There with the "psychologists who play with the Junc-bugs" we will probably spend the rest of our lives looking for the right adjectives and wondering why the Scotch reporter thinks he has a corner on sarcasm.

When the Wolfpack finishes with the Blue Devils they will indeed be blue.

Wanted—Lady wishes employment for few hours daily to take children out (or an invalid); life experience with all animals and poetry. Ruth Coon.

## This Week's Limerick

by ZIPPY MACK

There was once a young editor, Moore,  
Who had education galore;  
He answered the spiel  
Of Ben Dixon McNeil,  
And it made poor Benjamin sore.

## Student Forum

### HE'S RIGHT

Last week my kid brother, Railroad, filled up a whole column with several hundred words, from which I finally found that he was saying that one-thirty is too late for dinner. He is right.  
ZIPPY MACK.

### The Scramble

We are assembled before the doors of that building in which we go three times daily, for that which is given us to keep our bodies alive, better known as "bull." There is a bustle and a stir such as you see before any exciting event such as a speedway classic or a football game on Riddick Field. We are a large crowd indeed when all assembled for this affair.

Then just as you find a solid place to set your foot and begin to wonder what is going to happen next, there is a shrill note sounded from the southwest. This shrill note is greeted and cheered by a yell and a shout from several hundred "bull" thirsty throats. The wide doors of this building swing open, and the grand rush is on. Make yourself rigid, draw your muscles taut, for now the charge is on. Clothes do not count nor does any part of you. The grand idea is to get inside, for there is where the "bull" is. If you are jammed against the wall or thrown to the floor it is your own shortcoming. For by this time four or five hundred of N. C. State's hale and hardy sons have gained the steps by storm. You are squeezed and mashed and shot through the door the same as red pig meat shoots through the sausage grinder.

Once inside, the storm subsides to a degree, and if you survived with only minor injuries, it is now a matter of who has the longest reach and the most accomplished speed.

F. A. HUNTER.

## Thinks College Should Send Technician To High Schools

State College spends a great deal of money each year for advertisement, but it seems (according to the opinion of many students) that she overlooks one of the best and cheapest means of advertising. This overlooked means of advertising is the sending of THE TECHNICIAN to the libraries of our State high schools. If this were done a great many boys would come to State College that otherwise would never consider coming here to school. When all the high school boys over the State have a chance to read THE TECHNICIAN once a week they will know what State College is like and what she is trying to do for her students.

Now, just how State College would go about financing a problem like this is hard to tell, but it seems that if the student-body would appeal to Dr. Brooks this proposition would soon be put across. As soon as the students convince the executive department of the college that they are behind this sort of thing it will be only a short time until THE TECHNICIAN will be sent to all the high schools in the Old North State.

## County Agent Of Jones County

J. T. Monroe, a graduate in agriculture at State College in the class of 1920, has been selected to be County Agent in Jones County, effective September 1. Mr. Monroe succeeds E. E. Fletcher, former County Agent, who recently resigned, and will have his headquarters at Trenton. According to E. W. Gaither, District Agent, Mr. Monroe is a capable, experienced worker and will be of value to the farmers of Jones County.

## Agomeck Yelps

Well, we are doing pretty good with our pictures—only two cameras have been broken to date.

This streak of luck is probably due to the fact that we arranged to take all the pretty boys' pictures first. We are looking for serious trouble next week.

The complete schedule of appointments for pictures is fast being completed. If you have any special time you want your appointment, better make arrangements at the Agomeck office at once.

Don't anybody "cuss" the Faculty Council around us. In our opinion it is composed of a pretty good bunch of fellows. At least they helped us quite a bit by excusing students from class for 15 minutes to have their pictures made.

Seniors are kicking about the fee they have to pay. We wish to play fair, so we are presenting an itemized statement which shows how the money is being spent.

Hospital expenses for Red..... \$ 5.28  
Cigarettes for editor..... 4.70  
Actual expense for space..... .02

Total..... \$ 10.00

We note that THE TECHNICIAN will begin to negotiate at once for the purchase of a bicycle. Fellows! your dignity and honor are being trampled upon. Now is the time to rise in arms and demand that THE TECHNICIAN buy a car at least as good as Floyd Fogleman's Piedmont.

Fellows, help your college publications by patronizing the Raleigh merchants who advertise in them. The Agomeck is placing a framed poster in the windows of our advertisers to guide you in buying. The next time you patronize an advertiser in one of our publications, let him know you appreciate his support. As the old saying goes, "It helps us, and costs you nothing."

## Evaporated Bull

### Model Editor For College Paper

A college editor should be a superman endowed with the patience of Job, the editorial ability of Horace Greely, the managing and directing ability of Charles Schwab, the diplomacy of Woodrow Wilson, the judicial qualities of former Chief Justice Marshall; he needs the dignity and philosophy of Socrates, the agnostic tendencies of Ingersoll; he should have the literary ability of Shakespeare, and the lack of conscience of Amy Lowell.

In addition to the few qualifications, he needs the physique of Jack Dempsey, the nerve of a hold-up man, and Edison's ability to do without sleep. His brain should be so constituted that he could absorb the essentials of a twenty-credit course by means of the barest perusal of the subjects contained and to pass the final exams with honors so that the faculty will respect him and allow him to stay in school. He should be absolutely foreign to the needs of rest, sleep, eating, recreation, the love of society, the inclination for glory in athletics, and love.

Having these few requirements, he should be able to qualify as a fairly competent editor, and there is a possibility that he should not be hauled on the faculty carpet more than once a week and kicked by the student-body in general more than twice a day.—Huron Alphaomega.

### CAROLINA'S HAM AND BACON SHOW

The State's First Official Ham and Bacon Show To Be Held At the State Fair

North Carolina's first official ham and bacon show will be held in the Woman's Building at the State Fair this year, according to Prof. L. H. McKay of the Animal Husbandry Department at State College. This show will be held for the purpose of giving prizes for well-cured farm meats so as to stimulate more interest in the home-curing of meats and to secure the best methods now being successfully used by North Carolina farmers.

Prof. McKay states that home curing of meat is done on nearly every farm in North Carolina, and because of this it would appear that nearly every one would know how to cure meat properly and produce a product of fine quality. Yet, he finds, this is not true. More than half of the meat cured on the farms is of poor quality because it is too salty. Too, there are large losses from rancidity, skippers, rats and other parasites. This loss is generally about one-third of all the meat put in cure, he states.

To stimulate more interest in this matter, therefore, Prof. McKay will hold the first official farm-cured meat show ever held in the State. Premiums to the amount of \$96 have been offered by the State Fair, and the entries will be limited to hams, shoulders and bacon cured on the farms of North Carolina. Those who win the premiums will be required to give their curing recipes, and tell how the meat was handled and cared for. In judging, Prof. McKay states that each piece will be cut to determine its flavor and texture, and before the final awards are made, a small piece will be cooked and sampled.

"With hams, those weighing from

10 to 25 pounds will be given preference," says Prof. McKay. "The bacon should be without ribs or fat back. We will judge all of the meat very carefully, and we hope to secure enough information from this show to be able to render service in stimulating more interest in curing meat at home."

### FRESHMEN ANSWER LONG QUESTIONNAIRE

Last Monday, September the twenty-eighth, the Freshmen chapel hour was given over to the business of filling out questionnaires of "The Society for the Promotion of Engineering Education in the United States."

The chapel period was opened with a few short, snappy songs in which every one took part, showing a remarkable improvement over their previous trials. Dean Cloyd conducted the devotional exercises very profitably to all.

Questionnaires were given to all Freshmen to be filled out with information concerning themselves. These questionnaires are of great value to State College as well as the Engineering Society, which does so much for the promotion of technical courses in college.

These questionnaires mainly concern the previous educational environment of each individual student, his preparatory college work, the fondness for some studies and dislike for others, and the hobbies of each boy.

The period was closed with a word from Dad Price, who informed the Freshmen that he was highly pleased with their musical efforts and was expecting great things from them.

### GERMAN CLUB HOLDS FIRST MEETING OF YEAR

On Monday, September 28, the German Club held its opening meeting in the chapel of the Y. M. C. A. The first business of the club was the election of officers for the coming year. After considerable balloting the following officers were elected: Al Johnston, President; John Long, Vice-President, and John Dotterer, Secretary and Treasurer. Al Johnston wanted to decline the nomination for president, but the club refused to allow him to do so, as he fulfilled the requirements of the office so well last year they wished him to serve another year.

A great deal of discussion was carried on regarding the care of the financial status of the club. All the members of the club expressed a desire that an accurate account be kept of all money paid out, due to the fact that heretofore no account has been kept and the members have had no opportunity to know what becomes of the club's money. It is hoped that the new arrangement regarding finances will prove more successful.

### NEWS ITEMS FROM THE COLLEGE INFIRMARY

Jack McDowall, member of the Sophomore Class and a star backfield player on the N. C. State football team, is suffering from an infected elbow, which developed from a bruise in last Friday's game.

B. C. Brasington, member of the Freshman Class, is suffering from an injured knee. Last Thursday Brasington was taking a work-out in the gym and during the exercises he fell and injured his knee. Five stitches had to be taken in the cut.

Warren and Neal are receiving treatment for minor ailments.

D. H. Moody is also in the College Infirmary. He is suffering from head convulsion. About 12 o'clock Monday he had an attack. The beds were checked and he was asleep on the second bed. During the spell he fell from the bed. However, no serious bruises resulted from the fall.

### CERAMIC DEPARTMENT TO OCCUPY OLD POWER PLANT

The old power plant of N. C. State College is being rebuilt and when completed will be the home of the Ceramic Engineering Department.

The building will contain two classrooms, one laboratory, and offices for instruction in Ceramic Engineering. The old boiler room will be used for kilns and other mechanical apparatus necessary in the manufacture of ceramic articles.

The reconstruction is under the supervision of Mr. T. A. Kennedy, and under him there are eight employed. The building is expected to be complete in about thirty days.

It has been discovered that Jesse James held up so many stages simply on account of the chorus girls.

### FACULTYFAX

A department devoted to the problem of acquainting our student body and other readers of THE TECHNICIAN with our faculty.—E. G. MOORE.

A. F. BOWEN

Mr. A. F. Bowen, bursar and treasurer of North Carolina State College, was born at Blackstone, Va., on May 16, 1872. He was educated at the Raleigh Male Academy, finishing here in 1893.

Following this he was employed as secretary to Dr. H. P. Battle, State chemist and director of the Agricultural Experiment Station. He held this position till 1900, when Dr. Winston, then president of the College, employed him as a private secretary and registrar at the College.

He was made bursar in 1902, and has held this office creditably since. In 1917 he was made purchasing agent and treasurer in addition. He was relieved of the duties of purchasing agent in July, 1917, at which time a purchasing agent was employed.

Mr. Bowen became a certified public accountant in 1913. He is included in "The Accountant's Directory of Who's Who in America," a directory of the most prominent men of that profession in the United States.

### SOME GOOD ADVICE

12 Myrtle Ave., Swarthmore, Pa., Sept. 24, 1925.

"Howdy, Jeff; gosh dern it, howdy!" Here's a check for your gosh dern old paper. Now you had better cash it quick while it is good, because I haven't been out of college so long that I am not out of the habit of staying broke. It is a habit which every college man learns, and I still feel like a million dollars as long as I have thirty cents. So be quick.

And then I don't want to miss a copy of your old paper if it is all going to be as good as the sample. This sample ought to capture every alumnus of State College. Every alumnus that doesn't subscribe after reading this sample ought to be turned over to the Sophomores. I move to every Sophomore alumnus that we organize and get every man that doesn't support the college to the extent of at least keeping up with it through THE TECHNICIAN. What do you say about it, '24's? Guess it is up to us to go after them.

Glad to see you boys starting in right where last year's staff left off. They set you a good pace. But you have caught the step already.

It certainly does do us fellows who are out a lot of good to see the way progress is coming to our Alma Mater by leaps and bounds. And as the Associate Editor on the Staff of '24 I am delighted to see THE TECHNICIAN coming into its own. The staff of '24 claims the credit for instituting the present publications system. The class of publications that are now coming and that will come out amply rewards us for our faith in the system and for the hard work and hot arguments we had in putting it across. Old N. C. State will shine if we will shine her up and keep her polished.

Here's hoping you the best of luck in everything, including getting the check cashed.

Yours wonderfully,

JAS. E. BRITT, '24.

### True Fact

The traffic policeman had made a mistake. He had ordered a car to stop when there was really no reason. The driver, a middle-aged woman, was justly indignant.

"Pardon me, madam," said the officer, "but I thought at first you were too young to drive."

Prof.—No, Johnson, a profile is not a carpenter's tool.

### STATEMENT FROM THE BUSINESS MANAGER

Fellows, we have something which we want to put before you in such a way as to make you see the significance of it. Have you the college spirit in the amount that you want to see your publications thrive and show the state at large just what you are doing? If you do, then you want to listen to what we have to say.

There are certain merchants of Raleigh who are supporting our publications to the limit and who are trying to do the right thing toward us, and there are others who are, it seems, trying to do just the opposite. We have had quite a bit of trouble obtaining advertising matter from the Raleigh merchants this year, and it seems that the base of the whole thing is the fact that we don't seem to appreciate what we do get. We want to ask you to cooperate with us in this matter and support our advertisers. We want to show our appreciation to the Raleigh merchants who are advertising with us and give them all the business we possibly can and get away from this business of supporting those who do not support us and who will not do so.

It is natural for us to want the business of the college boys to stay in Raleigh, but it is also natural for us to want the business men of Raleigh to advertise their goods to the student body and do a little work to get that business which is waiting for them. A large number of them think that an advertisement in THE TECHNICIAN is merely a donation, and that it does them no good whatsoever. There are

others who are of the opinion that they are really getting their money's worth, and we want them to continue to think so.

It is up to the student body of the college to make these people see that their advertising is really doing them good. We want you, as members of a family who want to stick together and support each other, to see that these advertisements do what they are intended to do. In other words, don't buy from a merchant who doesn't advertise with us when you can buy the same thing from a merchant who does advertise with us.

After all, it is only right that a merchant who receives a large sum of money from an organization so large as the student-body of this college should be willing to return a small amount of it in trying to induce more of the students to buy from him.

F. K. FOLEMAN,  
Business Manager Technician.

## Wolfpack and Blue Devils To Try Initial Test of Strength

### LARGE CROWD EXPECTED

#### Coaching Systems of East and West to Meet at Duke Tomorrow

When the starting whistle blows on Haynes Field on the afternoon of October 3d most of the students of State and all those of Duke will be there to witness the first real test of strength of these two aspirants for State championship honors. State supporters are confident of repeating their 14-0 victory of last year, while the Duke cohorts are depending on a greatly strengthened team to pull them out on top.

No comparative scores can be obtained this early in the season, but State seems to have a slight advantage in view of the excellent work done against Richmond last Friday. The functioning of the backfield was especially good, with the playing of Jack McDowall, Captain Johnson, the Shuford brothers, John Jeanette, and Evans standing out above all. The line was composed mostly of new men, but they "showed their stuff" and proved themselves capable of playing against the best with honor. Another favorable sign was the show of great reserve strength, something in which the Wolfpack has been sadly lacking in the past few seasons.

Duke, in its early-season game with Guilford, showed a marked ability to pile up a large score, with the work of Caldwell and Captain Grigg showing up best. They have not, however, met a real strong team, and the result tomorrow is a matter for conjecture.

Both teams are under the management of new coaches and the play will be the style of the East, as shown by Duke with their W. and L. coach, against the style of the West, championed by Gus Tebell of Nebraska, and his N. C. State Wolfpack. Both mentors have trained their teams extra hard for this game, and the battle promises to be hot and furious throughout the four periods.

### FOOTBALL PROSPECTS FOR VIRGINIA TEAMS

Virginia's big five football teams have all opened the 1925 season with at least one game which can serve the purpose of giving a line on their prospects for the year.

The University of Virginia, having defeated Hampden-Sydney, 43-0, is preparing for a stiff game with V. M. I. Maphis, last year's star back, is not now available, but Virginia has a wealth of material in their undefeated 1924 Freshman team.

Washington and Lee, without the services of Thomas, All-Southern end, who was injured in early season practice, lost to Pitt last Saturday by the decisive score of 28-0. Scheduled games with such strong teams as Princeton and West Virginia should leave the team in too crippled a condition to be a strong state championship contender.

V. M. I. should have one of the best teams in the state if their overwhelming defeat of Emory and Henry and Hampden-Sydney mean anything. White, triple threat man and All-Southern fullback, should give a good bit of trouble to opponents.

V. P. I. does not seem to be as strong as expected, since Roanoke managed to hold them to a tie score. Don Rutherford, star drop-kicker, is back, but this should not make them a strong contender for state honors.

Richmond University should put up some good exhibitions, but is probably not so strong as the other four.

The main championship fight, while it is still too early to make valuable predictions, will probably lie between V. M. I. and the University.

### PROBABLE LINE-UP FOR N. C. STATE-DUKE GAME

Neither coach has given out an account of illness or injuries, while Tebell must choose a halfback to take the place of Jack McDowall, the young Rockingham star, who has a slight case of blood poisoning as a result of a scratch gotten in the game with the Richmond Spiders. Bill White, right guard for State, received some bad bruises in that same contest, but is expected to be able to hold down his old place in the coming scrap.

Probable line-up:

State	Position	Duke
Watkins	R. E.	Kelly
Bynum	R. T.	Grigg (Capt.)
White	R. G.	Culp
Logan	Center	Pickens
Hunneycutt	L. G.	McIntosh
Anthony	L. T.	Thompson
Kilgore	L. E.	Bennett
Jeanette	Q. B.	Weaver
Johnson (Capt.)	L. H.	Sellers
W. Shuford	F. B.	Caldwell
	R. H.	Bullock

### MCDOWALL WILL NOT BE IN GAME TOMORROW

Jack McDowall, State's flashy halfback, was taken to the infirmary Monday evening to be treated for blood poisoning in his right arm and elbow. The case is not thought to be very serious, and Jack is expected to be out again before this comes from the press. The infection is blamed on scratches and bruises sustained in the game with the University of Richmond.

McDowall's loss is a great blow to the Wolfpack, since they were depending on his reliable and educated toe and his excellent running and passing ability to help them out in the fracas with Duke's Blue Devils tomorrow afternoon.

Hospital authorities and "Doc" Sermon say it is certain Jack cannot enter the Duke game, but they have great hopes that his recovery will be sufficiently fast to have him in condition to warm things up for the South Carolina Gamecocks when they invade State on October 10.

McDowall's absence puts extra work on Tebell's shoulders, for he must now find or develop another dependable punter, as well as a running and passing back of note. C. Shuford, Faulkner, Evans, or Hunsucker will probably be called upon to fill his place as Captain Al's running mate.

### DOPESTERS EXPECT MUCH OF BULLDOGS

The battle for S. I. C. football laurels is now on. Most of the Southern teams had successful opening games last Saturday and showed signs of making strong claims to the S. I. C. crown, now adorning the proud brow of Alabama.

Most of the learned critics of the great autumn sport predict that the Georgia Bull Dogs will have an open road to the city of champions. Georgia should make this their banner year because last season they boasted a great varsity and the freshman champs of the Southland. With these two sources of material, the Bull Dogs have already shown that they have the stuff by defeating the Mercer Bears five touchdowns.

## ON THE SIDELINES

Was it sarcasm or ignorance that made the News and Observer put Richmond "Speeders" in their headlines last Sunday?

-N.C.S.-

Gus, put some more fences up, if it will make your team improve like it did this past week or two.

-N.C.S.-

Carolina's passing game seems on a par with last year's. One pass tried, none completed, last Saturday.

-N.C.S.-

Question: What broke Richmond's Spider Web?

Answer: Walter Shuford's head, Jack McDowall's feet, John Jeanette and Charlie Shuford's hands, and the whole d--(celightful) Wolfpack.

-N.C.S.-

May Jack McDowall as successfully straight-arm blood poison as he does his tacklers.

-N.C.S.-

Rackley and Greason looked good, but how about Captain "Al" and a few of his team-mates?

-N.C.S.-

The "Sophs" seem especially aggressive this year. We're delighted to see it—down on Riddick Field.

-N.C.S.-

20-0. Not so bad, with a brand new coach and a mostly new team. Eh, what?

-N.C.S.-

Come on, ye Durham Bulls. Wolfpacks always were fond of fresh meat, be it tough or otherwise.

JENNETTE (Quarterback) Who made one of State's scores in the Richmond encounter.

KILGORE (Left End) Playing against Richmond in his first varsity game, Kilgore made a fine showing.

WHITE (Right Guard) Who received a badly bruised shoulder in the season's opener.

LOGAN (Center) "Tubby" made a fine start on his third year's playing last Friday.

## WAKE FOREST REPEATS WIN OVER CAROLINA

Wolfpack as Strong as Either, Say Those Who Have Seen the Three Teams in Action

Carolina and Wake Forest have settled their argument of football supremacy for the year, much to the chagrin of the long-victorious lads from Chapel Hill.

Most of State College, or so it seems, was present to see the Baptist's 6-0 victory, and this "most" seems to be of the opinion that the best team won. All pronounced it a wonderful game for such hot weather. Carolina's line was admittedly superior to that of Wake Forest, but in the back-fields the difference was shown. Speed and alertness proved their worth, and Wake Forest had both.

Whether Garrity's team possesses these characteristics more than Gus Tebell's is now the question here at State, and those who have seen both squads in action say that State's playing last Friday was every bit as good as that displayed at Carolina the day following. If this dope is correct, there will certainly be some violent upsets in football circles down here on Riddick Field this fall, especially along about the time of the big Fair over across the road.

## NIGHT WORKOUTS FOR TRACK PROVE POPULAR

Vineyard Favorite Resort for Would-be Stars, When Moon is Not Shining

State College has a number of men who are really interested in track. These men show great spirit for their sport, especially the cross-country men who have been using various places for their training. Some haven't had sufficient work-outs in the evening practice, so they use the late hours at night, probably because of the heat in the afternoon. The vineyard seems to be a very suitable place, judging from the number who meet there. The boys in the dormitories have been complaining of the noise made after each gang reports for the starting. They are suggesting the use of rubber shoes.

The track men have put strips of their pants on the fence at various places, probably to be able to see it more plainly.

## DAVIDSON WILDCATS SHOW MUCH STRENGTH

Davidson College and Coach Younger have fine prospects for a most successful football season, and State wishes them luck for all except their game on October 31. Their crushing defeat of Elon two weeks ago, in which they lost the service of their star quarterback, showed them as having a great driving power on the offensive, and their 7-0 victory over Wofford showed them strong both on the offensive and defensive.

Whether or not they are strong enough to stop Garrity's fast-stepping backfield will be proved tomorrow at Charlotte, though general opinion seems to say that they are not. This game might, however, have an important effect on the championship race, and the results will be closely watched by football fans all over the State. The score will, in any case, be something on which sport editors may base their predictions of future contests.

## A Job For Student Government

There has been some complaint from several members of the student-body of being unable to study at night on account of the steady roar from victrolas and the many other different noises made by horns, vocal organs, and bull sessions.

If I am not mistaken, there is a rule in the constitution of the Student Government prohibiting the playing of victrolas from seven until ten o'clock at night. If our Student Government cannot enforce the laws on the campus, which will obtain less noise and make it a place where boys that want to study can study, I see no use of a Student Government.

## FOOTBALL CALENDAR

September 26		
State	20	Richmond 0

Wake Forest vs. Davidson at Charlotte.  
Elon vs. Guilford at Guilford.  
High Point vs. Oak Ridge at High Point.  
Lenoir vs. Milligan at Milligan.

### RALEIGH HIGH TO USE RIDDICK FIELD FOR GAMES

#### Coach Ripple Makes Announcement of Interest to Students; Games on Fridays

Riddick Field will be the scene of Raleigh High's home football games this season.

Joe Ripple, end on the 1924 Wolfpack and now head coach at Raleigh High, has arranged for his team to play their five home games on State College's gridiron.

Definite announcement has not been made regarding entrance prices, but it is understood that State students will be allowed reduced rates, probably the student rate of one dollar for a season ticket.

These games will enable State boys to see some excellent high school football, and will furnish a means of getting a line on the leading high school players of the State who might be members of the Wolfpack or Wolflets in a year or two.

These games will always be played on Friday, so as not to interfere with our Varsity or Freshman schedules, and it is hoped that all State College men will take an active interest in these games and players, and try to get them to choose N. C. State for their college.

### STATE SENIORS WILL JUDGE AT LOCAL FAIRS

#### Several Faculty Members Will Also Serve as Judges at County Fairs

In response to a widespread demand for judges at the different county fairs of the State during September, October, and November, many State College students and members of the agricultural faculty are going out as official judges.

Student judges at county fairs is not a new thing, as State College has been sending out men as judges for several years. So great has been the satisfaction rendered, and so beneficial the experience to the student in his own line of specialization that the Poultry Science Department has made judging at some county or sectional fair a prerequisite for graduation. The Animal Husbandry Department sends out some students, but, owing to the hard schedule of the men, it is impossible for students to do all the judging, so much of it is done by members of the faculty. The Agronomy Department at present is sending out only faculty members as judges.

About twenty-six fairs have applied for judges, but only a part of that number has been definitely assigned

### ANNOUNCING CONTEST FOR TECHNICIAN CONTRIBUTORS

In this box will appear each week the name of the article selected by a competent committee of judges as the best article appearing in the preceding number of The Technician. The name of the writer of the article will also be given.

The Professor of Journalism (who is not a member of the judging committee) authorizes the statement that a prize will be awarded to the student making this box the greatest number of times during the school year. Details will be printed later.

The names of the judges will not be announced until the end of the contest.

Articles selected will not be restricted to any particular type, and the reasons for each selection will be printed, thereby giving constructive criticism for the benefit of all concerned.

Judges. Others will be assigned as needed.

J. F. Bullock, a Senior in Poultry Science, has already returned from judging poultry at the Randolph County Fair on September 22, and at the Davidson County Fair on September 23.

H. W. Taylor, Senior in Vocational Agriculture, is at the time of this writing, September 30, judging livestock at the Robeson County Fair.

C. B. Brown and E. R. Thompson are judging livestock and poultry, respectively, at the Craven County Fair on September 30.

W. W. Keener, Senior in Poultry Science, will judge poultry at the Rutherford County Fair on October 6.

W. D. Burton will judge poultry at the Forsyth County Fair, October 6.

J. B. Slack will judge poultry at the Vance County Fair on October 6.

J. W. Knox will judge poultry at the Pasquotank Fair on October 7.

J. S. Moore, also of the Senior Poultry Class, will judge poultry at the Sampson County Fair on November 4.

In addition to these students which are sent out as official judges, the Animal Husbandry Department is filling several places with Professors Haig and Hostetler, while the Farm Crops Department is doing the same with Professors Darst and Cotner.

It is believed that State College is rendering a distinct service to these counties, and at the same time giving experience to its students.

### LITERARY SOCIETIES TO VOTE ON POINT SYSTEM

At their meetings Friday night the two literary societies, Leazar and Pullen, will vote upon a plan of competitive activity which has been suggested to them by their faculty advisor, Professor Cunningham. The scheme provides for covering the year's activities of the two organizations from several angles, and for awarding and penalizing the societies for their merits and demerits in certain respects. At the end of the year a banquet will be held, to be paid for by the society which loses the contest, at which the year's work will be reviewed and a trophy presented to the winning society.

A committee, consisting of Professor Cunningham and the presidents of the two societies, R. J. Peeler of Leazar and H. W. Taylor of Pullen, has drawn up the following schedule of points:

For each member present at a weekly meeting, add 1 point.

For each member scheduled to appear on the program who fails to perform his part, deduct 5 points.

For each favorable opinion of an official visitor, add 25 points.

For the higher percentage of members who have paid dues by the end of each term (including initiation fee and regular term assessment), add the number of points represented by the difference in percentage. In order to carry out this phase of the competition, within fifteen days after the beginning of each term the secretary of each society will submit to the faculty advisor a list of members to be used as the basis for this calculation.

For each new, dues-paying member who enrolls after the first fifteen days of the term, add two points.

Points to be scored in the inter-society contests are to be as follows:

Declamation and oratorical contests:  
 First place ..... add 20 points  
 Second place ..... add 15 points  
 Third place ..... add 10 points  
 Fourth place ..... add 5 points

Class debates:  
 Each judge's decision ..... add 15 points  
 Best speaker in contest, add 10 points

It is planned to have a number of faculty members visit each society once at a regular weekly meeting. Each official visitor will then be asked to indicate which of the two societies is, in his opinion, doing the better work. These opinions will be evaluated in the competition as indicated above. The official visitors will be asked to base their decision on the

following factors: general conduct of meeting (parliamentary decorum, etc.); quality of program as arranged by committee (timeliness, interest, novelty, etc.); preparation and showing made by the participants.

It is believed by all who have thus far been made familiar with the details of this plan that it will do much to stimulate the whole literary society work of the college. The two groups are entering into the spirit of the contest good naturedly, and each has the will to win. It will be a long, hard grind, but there will be enough zest to make it interesting and snappy.

### Bill Ormond Was Well Known Here

(Continued from page 1.)

as to the physical fitness, the moral stamina, and the industrial acumen of their former student and employee.

The upper classmen will remember "Bill" Ormond of last year as the quiet, unobtrusive fellow who spent most of his time around the Superintendent's office. Although he was handicapped by being somewhat deaf, he was very congenial, and was always ready for a joke with his fellows. During the spring he did electrical work about the campus, and thus enabled himself to become acquainted with a much wider circle of friends than he could have gained otherwise. He was naturally inclined toward electrical work, and the night before his tragic death on August 15 he was in his room in First Dormitory, arranging the final adjustments on his radio outfit, which he, in conjunction with some of the other students who were working here during the summer, had made for himself.

Ormond was born in 1894, the son of a Methodist minister, whose fine family connections and transient life led his family into an acquaintanceship which spreads out over most of North Carolina. His father, Reverend A. L. Ormond, now holds his charge at Nashville, N. C.

Shortly before the outbreak of the World War Ormond attended school at Trinity Park High School, and at the beginning of the war enlisted and went overseas. He was wounded and gassed, and lost his hearing through shell-shock, and from effects of the gassing and exposure. At the close of the war he wished to return to school, but his health would not permit of such a movement. After having spent some time in hospitals and at home he worked in several places, among them the mill operated by Cole, who later became his slayer. It was while there that he formed the acquaintance of Mr. Cole's daughter, Elizabeth Cole, the increasing friendship for whom finally led to his death.

Ormond registered at State College as a special student in Textile Manufacturing on October 28, 1924. His long-felt wish to return to school was realized, but he soon found that his poor hearing would not permit his remaining with the class, and accordingly, on February 17, 1925, he officially withdrew from college. His determination to learn a trade, however, was not killed, and by a special arrangement with the college authorities he stayed on the campus and did electrical repairing about the campus at no expense to the college. At the end of the school year in June the Senior who had been in charge of the electrical repair work of the college was no longer available, and Ormond was quickly given the position of campus electrician. He entered immediately upon his duties and served the college in this capacity until his tragic death at the hands of his former employer and rich father of his sweetheart.

"I hear you're an awful strong man."  
 "Yes, I get up every morning and pull up the river."  
 "Aw, that's nothing. I took an axe and cut down a tree this morning and then took another ax and chopped it up again."

### Y. M. C. A. Drive Fails Secure Needed Funds

Only About One-fourth of Amount Expected From Faculty and Students Secured

Only \$425 in cash and \$300 in pledges have been received by the Y. M. C. A. from the student-body.

This means that the Y has received far less than one-half of the \$1,800 that it expected from the students. With this small amount of money this organization cannot continue to be the lively and progressive association that it is today. It cannot function properly; it cannot give you a good and worth-while program; it cannot mean to you what a real Y. M. C. A. on this campus should mean. This means that the Y must take a step backwards while the remainder of the college is rapidly moving forward.

You still have a chance to contribute to the Y. M. C. A., and the association will appreciate and will be glad to accept your contribution. You still have a chance to lend a helping hand to keep this worthy organization in the field of progress. Remember, the Y.

M. C. A. is your organization, and it is what you make it.

### CROSS-COUNTRY TEAM HAS BEGUN PRACTICE

With the first week's practice and its resulting sore muscles and stiffness gone, the cross-country squad has been taking its daily distance run together with the idea of giving the new men an idea of pace-setting and the speeds to use for best results.

Prof.—I believe you missed my class yesterday.

A. Hahn—Why, no, I didn't, professor; not in the least.

### "It's a great aid to scholastic efficiency"

ONE professor makes this remark, and countless others are saying the same thing. They know the value of a typewriter as a time-saver, as a means of compiling data, and as a help in the expression of thought. Then too, it frees the "prof" from that tedious task of deciphering longhand, and keeps him in perfect "reading humor." And perfect "reading humor" tends to mean better marks.

The New Remington Portable is the lightest and most portable Portable with 4-row standard keyboard; it is the most compact Portable; it has the longest writing line of any Portable; it accommodates full width paper and long envelopes; it has the finest touch and action; it does beautiful work; its durability has been proved; and all the writing is always visible.

Call in, see the machine, and let us explain our easy payment plan.

## FORESTRY WORK ON BIGGER SCALE

### State College Will Give Courses in Forestry, and Extension Work Is Planned

For about 25 years students in horticulture and agriculture at State College have received instruction in Forestry. Prof. J. P. Pillsbury has always been keenly interested in this subject and his course has attracted a group of students each year. This interest has continued to grow so that in the past year a number of students petitioned for a course in forestry on a much larger scale than it has been possible to give in the past.

As a result of this request, an arrangement has been completed between the College and the Department of Conservation and Development by which Prof. F. H. Claridge, of the Yale School of Forestry, has been secured, and will conduct classes in the new course at the College. In addition, he will operate a State Nursery, where seedling trees of desirable species will be grown and distributed at cost to individuals and organizations in the State desiring to restock waste land. Land on the College farm has been secured for the nursery and the first seed will be sown this fall.

Two other branches of forest activities are also to be a feature of the State's program. A Division of Forestry has been created in the Department of Agriculture, with Forester H. M. Curran, formerly with the Extension Service, as its head. In this division it is proposed to furnish direct aid to the farmer in the sale of his surplus forest products. Carload shipments will be made to certain factories this fall.

Forestry extension work will be continued by the College, with R. W. Graeber, formerly County Agent of Iredell County, as Extension Forestry Specialist. Mr. Graeber will co-operate with the other foresters in bringing new and improved methods of cropping and care of farm forests to the timber landowners of the State.

## COLLEGE "Y" PICTURE SHOW

"IT'S YOUR SHOW"

PATRONIZE IT"

Program for Tuesday, October 6

"ARE PARENTS PEOPLE?"

Stars: BRONSON, VIDOR, MENJOU

Thursday, October 8

"The Little French Girl"

Stars: BRIAN, JOYCE, HAMILTON, RALSTON

Come at 6:30 or 8:30, Both Days, and enjoy yourself

It is stated that this arrangement will give a well-rounded program for North Carolina.

"It has been suggested," says Mr. Curran, "that the forestry personnel should all be concentrated in one department, but this is not entirely logical. The great university forest schools do not use as professors forest department officials, nor is the marketing service of State and government departments manned with officials of other services. A close co-ordination of the work of the three groups of foresters is, of course, desirable. Team work of the three, in the widest possible field, will benefit the State and bring forestry to all classes in a way impossible if all workers were in one department."

### MERCHANTS TO DISTRIBUTE AFTERNOON PAPER FREE

The Raleigh Times, evening paper, is trying to get advertisers to give free copies of the paper to the students of State College from now until Christmas.

The plan is as follows: One concern will give the papers one day per week from now until Christmas. The Times will deliver the papers to the students. The advertising concern will pay for the papers and a sticker with their advertisement on it. One of these stickers will be placed on every copy delivered by the Times. The advertisers selected will all handle a different line of goods, as there will be only one cafe, one movie, one book store, etc.

At the present writing Mr. Ivey of the Students' Supply Store gave papers Monday, September 20, and Cherry's gave them Tuesday, September 21. The students seemed pleased at receiving the papers and told the carriers so. But the advertisers are the ones that should be told if you appreciate the papers and desire their further continuance. Let them know of your appreciation by word of mouth and patronage.

All of the advertisers have not been secured yet. So the Times is giving 100 copies every evening to different dormitories until advertisers can be secured. The Capitol Theatre will give 700 copies, beginning Friday, October 2, every Friday until Christmas.

Pete—Why does Eb. call his Ford Piorrh?

Sam—Four out of every five have them.

## ALUMNI NOTES

(Observations and Communications of Zippy Mack)

The victory last Friday was a very fitting way in which to begin a football season, don't you think? And about tomorrow, over at Duke University, there will be more of the same sort of stuff, if we make no mistake. Modesty in predictions seems to be a failing with our boys this year, but modesty is always becoming, you know.

Messrs. R. F. ("Babe") Ruth and J. S. Skeen, of the '23 boys, dropped in on us the other day and passed several words. "Babe" was formerly with the Poultry Department at Clemson College, but was relieved for this year because of the disastrous fire at Clemson last spring. He is filling out by selling life insurance in and about Greensboro. Skeen, to use his own admission, is doing nothing in particular, and is just going around eating on his friends, and enjoying it.

Mr. T. R. ("Ted") Causey, of the '24 Electricals, was on the campus for a day or two last week-end. He was on his way to Schenectady, where he has accepted a position with the Radio Department of the General Electric Company.

Mr. G. K. ("George") Murray, of the Textile Class of '21, probably the greatest baseball hero in the history of State College, was among the visitors during the week. George has been pitching with a fractured arm in a Southern league during the summer, and is preparing to have an operation, which he hopes will render his arm as good as new.

Mr. A. M. ("Mutt") Joyner, who almost finished with the '23 Textile men, was a visitor last week. "Mutt" was forced to leave school on account of the death of his father, and has of late been teaching in the Greenville High School.

At the game Friday we noticed several of the old men back again. Among them were "Cigar" Hoey, president of the Student Council last year; "Red" Johnson, captain of basketball for the past two years; "Jim" Allen, captain of the '24 baseball team, and "Connor" Eagles, valedictorian of the class of 1921.

### PROFESSOR MANN TELLS OF FOUNDING OF C. E. SOCIETY

The Student Chapter of the American Society of Civil Engineers was started at this college several years ago. This is one of the first student chapters inaugurated. Since then practically all the leading colleges and universities in the United States have inaugurated student chapters. The parent society realizes that it can promote a healthy growth in its membership by this agency. It encourages and assists in the formation of these chapters. The North Carolina section has a standing committee whose duties are to make suggestions to the sections as to how they may co-operate with these student chapters. The greatest help comes to the student member if the chapter is properly doing its work and the members attend regularly. Aside from the training and experience he may get in debating and in general speaking, he acquires a feeling of friendship towards his profession and at the same time toward the society which stands for the best of his profession.

The chapter at this college has been very active since its organization. The meetings have been held regularly, and programs prepared and presented. It has been addressed by the secretary of the society and by other prominent local engineers. In its regular meetings, discussions have been free. The membership has been very satisfactory.

There is only one criticism which the writer feels he should not let go unsaid, and that is concerning the form of initiation which has been used each year in bringing in new members. This chapter is a branch of a purely professional and technical society, and there can be no ground for any form of physical initiation, much less for that form of initiation commonly known as "horse play." When a new member is brought into a society in this manner he at once gets entirely the wrong impression of what the society should stand for. This form of initiation may not be out of place in a fraternal society, but if it is used here it can do no more than belittle a dignified technical so-

ciety. If the student feels that he should have some opportunity of getting in this form of initiation, then I would suggest that a fraternal engineering society be organized, making only those members eligible who hold membership in the student chapter.

### OLD STATE STUDENTS WRITE OF EXPERIENCES

At 5 a. m., June 30, 1925, a Chevrolet roadster, bearing two former State College students, left Sumter, S. C., with its nose headed west, destined for Atlanta, Ga.

Ten hours of hard driving brought the roadster to the home of the Stone Mountain Memorial and the headquarters of the Southern Bell Telephone and Telegraph Company. It was the students' intention to enter the general training course offered by this company.

Upon making their intentions known, however, they found that there were twenty other college graduates in the same boat. But all of the students had "reservations," which assured them a place in the course.

So, on July 1, 1925, twenty-two college graduates began their duties in the general training course of the Southern Bell Telephone and Telegraph Company. State College was represented by two men: George Wray and Henry Shelor. Auburn was represented by six men, Mississippi A. and M. by four, Georgia Tech by two, University of Georgia by two, University of Kentucky by two, Clemson, Vanderbilt, Louisiana State, and Georgetown each by one.

Nor were all these men electrical graduates. There were three Commercial, two Arts, one Chemical, and six Mechanicals. The class is very congenial and, having common ideals, they get along fine together. The class meets every Saturday morning for open discussions, lectures, new assignments, etc. Each student gets a different assignment every week. The purpose of these assignments is to give the student an insight into the different departments of the company and to acquaint him with the working organization.

After the four months general training course, each student gives his preferences as to the department he wishes to work in and the location. The company endeavors to locate the student as near as possible to his preference.

Mr. Weisiger, the company's representative, will be at State near the middle of October. He will distribute some literature and tell some interesting things about the telephone company.

### DR. CARL C. TAYLOR ADDRESSES AG. CLUB

Dr. C. C. Taylor spoke to the Agriculture Club Tuesday night about the N. C. State Agriculturist. This is a scientific magazine gotten out by the agriculture students.

Dr. Taylor said it was every student's duty to subscribe to this magazine. He told the club there were four reasons why the Agriculturist should be made successful: First, other colleges of agriculture are successfully putting out magazines of this type. Second, it is very valuable to the students, because it trains them in journalism and management. Third, it is a house organ between the students, and should be one between the students and the former students. Fourth, the School of Agriculture needs the magazine. It advertises the school.

W. G. Booker announced that the Agriculturist would be published monthly this year. Heretofore it has been published only four times each year. The subscription price is only one dollar per year.

J. P. Shaw told the club that each student who takes part in the fair may get a ticket, which will let him in and out as often as he desires, for one dollar. He also called the club's attention to the moral obligation which we owe the donors of the prizes.

### CHATHAM COUNTY CLUB HOLDS FIRST MEETING

On Monday night, the 28th of September, the Chatham County Club held its first meeting for the school year of 1925. The purpose of the meeting was to initiate the new members.

The new men are: Paul Ellis, Siler City; Ellis Vestal, Bonlee, and Eugene Goldston, Goldston. Only seven of the thirteen old members have returned. The officers for the year are: President—Julian Moore. Vice-President—George Hackney. Reporter—Herbert Palmer.

### BERZELIUS SOCIETY ELECTS NEW OFFICERS

At a recent meeting of the Berzelius Chemical Society Mr. C. B. Denson was elected president and Mr. E. F. Monroe vice-president. Nearly all of the old chemical engineering and chemistry students are back, and the prospects are bright for a good year for the society. At the next meeting the seventeen freshmen chemical engineering and five freshmen chemistry students will be received into the society. It is probable that a student branch of the American Chemical Society will be formed.

Two new instructors have been added to the Chemistry staff. Mr. A. D. Jones has had three years of graduate study in physical and industrial chemistry at the University of Cincinnati and has had experience in industrial chemical plants. Mr. H. L. Caveness has a master's degree from Duke University. He has had experience in teaching chemistry.

Last year's graduates all have good positions. L. L. Hedgpech has charge of the waterworks plant at Thomasville. Urquhart is chemical engineer for the Texaco Oil Company in Port Arthur, Texas. Smith is traveling salesman for the Union Carbide and Linde Air Products Company. Pridden is teaching chemistry at Oxford. McRea is chemist in the Georgia Experiment Station. Two State College chemists, L. F. Trice and W. H. Weir, are assistant engineers in the Bureau of Engineering of the State Board of Health. Their duties are to supervise all of the water supplies of the State.

Last year Dr. L. F. Williams, professor of organic chemistry, was chairman of the department. This year Dr. E. E. Randolph, professor of chemical engineering, is chairman.

Unsurpassed in Practicality Guaranteed

### Electrical Society Makes Plans For Fall Electrocutation

The A. I. E. E. held its second meeting for the year Tuesday night. Plans for the initiation of new men were partly completed, besides the appointment of committees for the carrying out of a program for the coming year.

It was decided to take in new members Tuesday night, October 20. Men who are taking Junior or Senior Electrical Engineering are eligible for membership, and must get their names in to the secretary-treasurer as shown on the bulletin board in Winston Hall if they expect to be taken in at the above-stated time. Dues will also be posted on this bulletin board with the time for payment.

A program for the year is being worked upon, and it is hoped that the co-operation of every member will be had. We shall try to get a reasonable amount of variety in our programs, combining lectures from outstanding engineers with student programs.

Since Baum has accepted a position with the News and Observer, which prevents his regular attendance, the society elected W. F. Sanders as secretary-treasurer and reporter.

Programs will be put on every first and third Tuesday nights, which should be very helpful to new men especially.

### WHAT HAPPENS NEXT WEEK

**MONDAY**  
12:00 m. —Chapel for Freshmen.  
1:00 p.m.—Meeting of TECHNICIAN Staff.

### Freshmen, Sophomores, Juniors, Seniors, Athletes Do You Know? "HOW TO STUDY"

The Students' Hand-Book of Practical Hints on the Technique of Effective Study

by  
**WILLIAM ALLAN BROOKS**

A GUIDE containing hundreds of practical hints and short cuts in the economy of learning, to assist students in securing MAXIMUM SCHOLASTIC RESULTS at a minimum cost of time, energy, and fatigue.  
ESPECIALLY RECOMMENDED for overworked students and athletes engaged in extra curriculum activities and for average and honor students who are working for high scholastic achievement.

#### Some of the Topics Covered

Scientific Shortcuts in Effective Study.  
Preparing for Examinations.  
Writing Good Examinations.  
Brain and Digestion in Relation to Study.  
How to Take Lecture and Reading Notes.  
Advantages and Disadvantages of Cramming.  
The Athlete and His Studies.  
Diet During Athletic Training.  
How to Study Modern Languages.  
How to Study Science, Literature, etc.  
Why Go to College?  
After College, What?  
Developing Concentration and Efficiency.  
etc., etc., etc., etc., etc.

#### Why You Need This Guide

"It is safe to say that failure to guide and direct study is the weak point in the whole educational machine."—Prof. G. M. Whipple, U. of Michigan.  
"The successful men in college do not seem to be very happy. Most of them, especially the athletes, are overworked."—Prof. H. S. Canby, Yale.  
"Misdirected labor, though honest and well intentioned, may lead to naught. Among the most important things for the student to learn is how to study. Without knowledge of this his labor may be largely in vain."—Prof. G. F. Swain, M. I. T.  
"To students who have never learned 'How to Study,' work is very often a chastisement, a flagellation, and an insuperable obstacle to contentment."—Prof. A. Inglis, Harvard.  
"HOW TO STUDY" will show you how to avoid all misdirected effort.  
Get a good start and make this year a highly successful one by sending for this hand-book and guide NOW.

### TEXTILE SOCIETY INITIATES 21 MEN

Twenty-one textile students were admitted to the Tompkins Textile Society Tuesday evening, September 29.

The initiation, though short and lacking in much of the roughness that characterized Textile Society initiations in past years, was lively and full of pep, as any of the new members will testify. After the initiation the new members were given a chance to say a few words before the society. Several responded with short talks, in which they stated that they were glad to become members of the society, and will do all they can to promote the interests of this organization.

The men that were admitted are: Thomas Nelson, H. J. Spry, J. M. Dunn, John Kidd, G. B. Moore, E. B. Armstrong, A. C. Jones, N. A. Long, B. G. Gorham, G. B. Dunn, B. G. Groves, C. C. Herrington, B. B. Howard, L. A. Gregg, J. O. Foy, H. S. Hasty, J. C. Kinlock, F. M. Williams, R. R. Kissel, Z. B. Mangum, and W. C. Park.

### Kampus Komics

Young Jack was talking to the new visitor, soon after her arrival. He eyed her critically for a few moments, then looked up and said: "So you're my grandmother, are you?"  
"Yes, dear, on your father's side," remarked the old lady, smiling.  
"Well, you're on the wrong side; you'll find that out," replied Jack.

John (from Philadelphia): "You know once we had such a cold day that my mother's clothes froze on the line."

Pete (from Boston, not to be outdone): "That's nothing; we had such a cold day once at home that a statue of Abraham Lincoln with his hand on a little nigger's head, you've seen it? Well, old Abe took his hand off the nigger's head and put it in his pocket."

Some time ago a Latin class was moved temporarily into one of the classrooms used by the Department of Education at Chapel Hill. A friend noticing several buzzards circulating above Peabody building, remarked to Professor Noble, "Hello, Noble! I see the buzzards are about to take the Department of Education."  
Professor Noble replied, "O no! a dead language has just been moved in."

"Look out for your tongue; it's in a wet place and might slip."

From a state board examination:  
"What is a writ of attachment?"  
"A letter from my sweet heart."

Lieutenant (to Fresh who is number one, front rank): "Can you hold a pivot?"  
Fresh: "I don't know. I haven't been issued one, yet."

"25: 'What'll we do tonight?'  
"26: 'Let's go out to the cemetery and dig up a few girls.'"

Proctor: "Hey, what's all that commotion in the agricultural school?"  
Soph: "A cow fell down and strained her milk."

Deadeye: You say Joe got killed? How come?

Dick: Well, he stuck his head in that saloon and hollered fire.  
Then what?  
They did.

"Gentlemen," introduced the proud father, "this is my little son, Tommy. He's bright as a whip."  
"Ya betcha," responded Tommy.  
"What was that wise crack I pulled yesterday that almost gave old Spivins hysteria, pa?"

A mule being shipped from one town in Georgia to another had his tag with address hanging around his neck. Becoming hungry, he ate it. The old negro in charge of the mule was asked where the mule was going. Seeing

### Sophomores Paint Gate Of New Fence

When the population of this village awoke yesterday morning and drowsily wended their way to the mess hall they were greeted by a very clever piece of painting on the gates of the new fence which separates the dollar from the deadbeat when football games are being played on Riddick Field.

As one would naturally expect, it is the work of the Sophomores, but it would be a credit to highly skilled hands. A shief is painted in white and on this across the top are the words "N. C. STATE," painted in the customary red. Below is the pride of the Sophs, the "28." The design was made with precision and shows up very well from any position on the field.

A member of the staff was tipped concerning the operations of the painters, but when he visited the spot about 9 o'clock Wednesday night no signs of life were visible. The work had been started, but was nowhere completion. The scribe had planned to write the story and wait for it to "break," but he decided it might appear in print before the work was finished, so he refrained. However, when the sun peeped up over the hills Thursday morning the "28" was there in all its glory.

### New Library Building To Open October Fifth; Be Completed Fifteenth

(Continued from page 1.)

changed periodically. This feature will also be contained in the main reading room. This room will accommodate about 200 readers.

There are now about 15,000 volumes. With the assembling of the different departmental libraries, this number will be increased to around 18,000 volumes. The number of books is to be increased from year to year. This year is hoped to be as good as last, with an expenditure of \$7,000 for additional books.

The new Library Building, as some one has said, is "A masterpiece of architecture." A combination of many beautiful marbles has gone into the construction of the building. The front facing of the building and the portico columns are beautiful white Vermont marble. Within the octagonal entrance hall, with its high obscured glass dome and round-globe central lighting fixture, the walls are of cream kingstone with decorative placards of figures in relief set in the walls at intervals. The balcony that circles the rotunda is set with a balustrade of Italian marble. Four kinds of marble have gone into the design of the beautiful inland floor of the hall.

There will be no need for signs that "Quiet must be observed," for to enter the rotunda of the building with its high-arched dome, its exquisite blending of colored marbles, its soft light, is to feel something of the hush that makes one instinctively whisper.

Johnson said: "Knowledge is of two kinds. We know our subject ourselves, or we know where we can find information upon it."

The library is the storehouse of the latter, and even to know how to find the information you need is to be on the royal road.

### PLANS SUBMITTED FOR ENLARGEMENT TEXTILE BUILDING

Plans for enlarging the Textile Building have been submitted. No particulars are available at this time except that the addition will be made on the east side, and the tower will be in the center of the building.

This addition will help the Textile School wonderfully, as they are badly in need of room.

### S-O-C-I-E-T-Y

All Social and Personal News turned in to The Technician office will be appreciated

M. H. Stuart spent the week-end with his parents at Henderson, N. C.

J. F. Byrd was in Vass, N. C., this week-end.

Leslie Stradley and Jimmie Campbell spent the week-end with friends at Carolina.

Maurice Daughtridge, Harry McGee, Lawrence Christman, and "Slouby" Horne spent the week-end in Rocky Mount.

Jim Weaver was in Greensboro this week-end.

Alvin Kartus and William Breeman of Carolina were on the campus a few days ago.

Stuart Gaston was in Burlington this week with friends.

V. L. Pollock was at Carolina this week.

J. J. Barrier visited C. J. Montgomery for a few days at his home in Haw River, N. C.

Lee Roberts and "Sunshine" Hill were at Carolina for the Carolina-Wake Forest game.

"Biddie" Robertson is back on the campus for a short visit.

Several State men attended the dance Saturday night at the Woman's Club, sponsored by the Ace Club.

The following familiar faces were seen on the campus this past week: "Red" Johnson, Herman Curtis, "Cigar" Hoey, Henry Bremer, Ted Causey, Joe Ripple, and Oswald House.

Walter Brown, George Dudley, Red Uzzle, Elmer Shelton, Kenneth Locklin, and Roy Bumpass were in Greensboro for the week end.

George Uzzle and Jimmy Perkinson of Wake Forest College were visitors on the campus for the week-end.

#### Bogart-Bowen

Invitations have been issued as follows:

"Mr. Arthur Finn Bowen requests the honor of your presence at the marriage of his daughter, Eunice Woodward, to Mr. William Hawkins Bogart on Wednesday evening, the seventh of October, at 6 o'clock, First Presbyterian Church, Raleigh, N. C."

No invitations have been issued in the city, but friends of the family are cordially invited to attend.

#### Square and Compass Meets

The Alpha Sigma chapter of the Square and Compass had a smoker in the Y. M. C. A. at State College Tuesday night. Addresses were made by Dr. T. P. Harrison, D. B. Van Sant and Prof. Greaves-Walker. There were about 25 in attendance. It was decided to have monthly meetings and to invite prominent Masons of the State to make addresses from time to time. It was also decided to take steps for the organization of a chapter of the order of the De Molay.

J. O. Peterson spent the week-end at his home in New Bern.

Carl Chadwick of Duke University spent the week-end with friends on the campus.

Among the students attending the Carolina-Wake Forest football game last Saturday were: Willie N. Case, S. G. Farris, E. H. Floyd, W. M. Pucker, T. A. Vernon, John Perry, and D. R. Pace.

#### German Club Meeting

At a recent meeting of the German Club the following officers were elected: "Al" Johnson, president; John Long, vice-president, and John Dotterer, secretary and treasurer. No definite date was decided upon for a dance at this meeting, since the principal purpose was the election of officers.

#### Edenton Street Social

The Sunday School Social, which was given at Edenton Street Church Friday night, September 25, was attended by many State men. A few of the girls were from Peace and Meredith, but most of them were town

girls. Several readings were given by children from the Orphanage, and Prof. Cunningham of State gave a few selections. Refreshments were served during the evening.

#### Pan-Hellenic Officers

The following officers were elected for the ensuing year at a recent meeting of the Pan-Hellenic Council: Ed Cranmer, president; Tommy Harrell, vice-president, and "Mugs" Seawell, secretary and treasurer.

### MEREDITH NEWS

Meredith opened September 9 with a very large enrollment, since there are a hundred and eighty freshmen and eighty members of the Senior Class. Since our new buildings will be complete before the second semester, there are many students whom the old buildings will not accommodate and who are rooming in town until Meredith is moved. The faculty has twelve new members, eight of whom belong to the Music Department.

A number of entertainments have been given for the new girls; among these were the Y. W. C. A. reception and the society receptions. All of these were very enjoyable affairs, helping our freshmen to better understand and enter into the spirit of the college.

Thus far the chief social event has been the annual barbecue at the new site. This was rendered doubly interesting by the fact that the new buildings were open for the inspection of the students and faculty. After this, those among us are few indeed who are reluctant to leave our present quarters. The new plant seems to have been constructed on a scale of

almost unheard-of magnificence when we compare it with the cramped halls of old Meredith. There is only one flaw in the whole scheme—where will we go next year for the barbecue? This year's affair probably needs little description, for the several truck loads of girls were certainly heard, if not seen, when they passed the campus of N. C. State.

In response to a need which has long been felt at Meredith, an exclusively literary club has been formed for the eleven best writers of the school. The membership at present is limited to four, the remaining seven to be elected at the end of the year. Eleven more will be elected each year, if the committee considers their productions good enough. It is necessary for an applicant to have published at least three compositions in The Acorn. In case there should be more than eleven applicants, the best will be chosen. It is hoped that this club (which has been christened The Quill and Quip) will prove instrumental in bringing out some of the latent literary powers of our students.

Not only the Sophomores but the whole student-body is extremely proud of the gorgeous "28" which ornaments the sidewalk in front of our campus.

Our class of '28 has not been idle by any means, as was attested by the green dresses, general facial make-up, and novel caps of the freshmen at various times since the opening of school. '29 has taken it all in good part, however, and from their sportsmanship we are sure that next year they will prove to be as ideal Sophomores as their predecessors.

We of Meredith are glad to see again our old acquaintances at State, and we welcome also the many wearers of the familiar little red caps.

We express our appreciation for the space THE TECHNICIAN has given us, and will do our best to send in items which will be of interest to the students at our neighboring college.

When rural service lines bring electricity to the farmer's door, many of his labor troubles are at an end. Motors, large and small, will do the many chores of farm and farm house for a few cents per day.

## The Farm Electrical

Of the six and a half million farm homes in this country, only half a million have electricity.

Still, the advantages of electricity are widely known. But there is more to farm electrification than the installation of motors, lights and heaters. Current must be brought to the farm, and that means many miles of transmission line, supporting poles, transformers, and adequate generating equipment.

Slowly but surely the electrification of American farms is taking place. As farmers learn how to use electricity, rural service lines reach out farther and farther into open country.

Six million farms to be electrified! Here is a vast and virgin field for the application of electricity, with countless opportunities for college-trained men in the technical and commercial phases of this undertaking. And for the agricultural college student and others planning a future life in rural sections, it means a better, bigger, happier life-time now in the making.

Since its inception the General Electric Company has pioneered in the various fields of applied electricity. Today G-E engineers are co-operating with various State agricultural committees in the study of farm and rural electrification. These committees include members of the agricultural college faculties.

A new series of G-E advertisements showing what electricity is doing in many fields will be sent on request. Ask for Booklet GEK-1.
