## FACULTY COUNCIL PASS NEW REGULATIONS FOR MILITARY DEPARTMENT

Idea is to Raise Standard of the  
R. O. T. C. Unit at This  
College

### STRICT MILITARY RULES

Appeal to Pride and Respect Which  
Students Have for College as  
Basis for Idea

Several new rules pertaining to the Military Department were passed at the last faculty meeting. For some time it has been felt that more respect was due the rules and regulations of this department, and the new rules are the outgrowth of this sentiment. The outstanding features of the new regulations are the "Punishment Tours." These will not be given, however, except in case of some breach of discipline or failure to attend to military duty. The Military Department does not wish the students to feel that these punishment tours are to be the chief object to encourage discipline. They appeal to the pride and respect which the men have for the college as a basis to raise the standards of the unit here. The penalties for breach of discipline are given below:

1. For each absence from drill or from a military class, when not excused by the College physician, by the Dean of Students, or by the Professor of Military Science and Tactics for proper cause, to walk one punishment tour.

2. For an unexcused absence from a special formation, such as a parade of the regiment on memorial day, parade in the city of Raleigh, field maneuvers, etc., to walk two punishment tours.

3. Answering roll call and subsequently leaving class or formation without permission, to walk two punishment tours.

4. Abuse of uniform, such as using uniform in lieu of overalls, or slovenliness of appearance in uniform, to walk one punishment tour.

(Continued on page 5.)

## TEXTILE SCHOOL WINS BLUE RIBBON AT FAIR

N. C. State College Textile School won the blue ribbon for having the best display of its kind at the annual N. C. State Fair held in Raleigh, October 12-17.

The display was made up of over 100 different fabrics, all of which were designed and woven by the students in the Textile School. These fabrics contained plain weaves, dobby weaves with rayon, lenos and jacquard designs. Also, there was an assortment of silk, wool and cotton hose from the knitting department; cotton yarn showing the steps of manufacture from raw cotton to finished yarn, and a vari-colored display of rayon, silk, and cotton from the dyeing department.

As a souvenir of the Fair the visitors were given a woven photograph of Dr. E. C. Brooks, President of N. C. State College. This photograph was designed and woven on a jacquard loom by a student of last year's Senior class.

## FULLBACK QUTEN IS CAPTAIN WOLF CUBS

Fullback Outen of the Freshman squad has been elected captain of the Wolf Cubs.

Outen hails from Mt. Holly, where he starred for two years. His 5 feet 9 inches height and 185 pounds of brawn are reminiscent of the famous Red Lassiter, plunging fullback of several Wolfpacks, and it is hoped that he will make a worthy successor to "Red."

## Regular Library Service Begins In Three Weeks

Necessary to Operate a Day  
Schedule Until Lighting  
Fixtures Installed

There will be no evening hours at the D. H. Hill Library until the electric lights are installed among the book stacks by the campus electrician. There are only two lights now in use to light the thousands of volumes arranged on the shelves, thus making it difficult to serve in as wide a range as would be done if the library were open for night service. The library is open at present, however, from 8 a. m. to 1 p. m., and from 1:30 to 5 p. m.

The opening for Sunday service is pending upon several things, chief of which is the unsettled condition and the fact that all work is now being carried on in the basement of the building. Another reason for the short hours of the library is the absence of student help, which greatly lightens the work of the library force. During their off hours, the students are allowed to help in the library work, and as the schedules have not as yet been arranged, it has necessitated the postponement of this valuable aid.

There are four cornices in the entrance hall of the library in which are to be placed ferns or other plants until the death of some one worthy of having a bust or statue placed in one of them in his honor. It would seem as if the man for whom the library was named, Dr. D. H. Hill, would be the very person to honor with a marble figure in the most beautiful building on the campus.

The total capacity of the new library is 150,000 volumes, while the present shelving capacity is 50,000 volumes. Of the \$7,076.25 worth of books, 11,569 are reserve volumes and are not to be taken from the building, while 7,301 are for the two-weeks circulation.

(Continued on page 5.)

## SPRINGER BACK FROM ATLANTA

Was Delegate to Southern Regional Conference of  
Y. M. C. A.

Mr. H. E. Springer returned from Atlanta Monday afternoon, having attended the meeting of the Y. M. C. A. Southern Regional Council from Friday morning through Sunday afternoon. This council meeting was held to work out the Blue Ridge program for the coming summer, and Sunday was set aside for consideration of the World Court issue.

Mr. Springer was elected to the Southern Regional Council, while a delegate from N. C. State at Blue Ridge the past summer. The council has twenty student members, two from each of the ten Southern States, as well as other members.

Dean E. L. Cloyd is a graduate student member of this council, but was unable to attend this year.

Mr. Springer reports that the meeting was a success. He further stated that Blue Ridge Y. M. C. A. Conference would be held from August 18th through 28th.

Sunday's meeting of this council was given over to a joint meeting with faculty members, colored students, a delegation of girls from the Y. W. C. A., and some prominent leaders.

The World Court issue was taken up and discussed by the members present. The students present voted in favor of having state and interstate conferences, like the rest of the country is doing, in the ten Southern States to take up this World Court issue. As a result of this student conference, conferences are being held in the South. One of them will be held in North Carolina for North Carolina colleges.

## LITERARY MAGAZINE NOW BEING PLANNED FOR STATE COLLEGE

Meeting of Student Body Will  
Be Called to Decide  
Issue

### A STUDENTS' PUBLICATION

Will Be Under Direct Supervision of  
Students' Publication  
Board

A meeting of the student body will probably be called next week to decide whether or not we shall have a literary magazine at State College. This will be strictly a students' publication, and comes under the direction of the Publication Board, along with the *Agomeck*, *TECHNICIAN*, and *Agriculturist*.

The need for some medium of literary expression has been felt on the campus for a long time. Through the efforts of several prominent members of the Senior class, and the hearty support of the English department and Brooks Literature Club, a plan has been worked out which, if endorsed by the students, will satisfy this need.

The proposed magazine will be directly supervised by the Publication Board, who will also have charge of the election of the staff members. A name for the new publication will be selected by the staff and the board. It has not been determined whether a contest will be staged for the best name.

If the students vote in favor of a publication of this kind the first issue will probably be gotten out before the end of this semester. Thereafter it will be published semi-quarterly, six times during the school year. It will contain 36 pages, 8 x 12 inches, two columns to the page. Each student will be assessed 50 cents per year to defray the expenses of printing and distribution.

The State College magazine, if it becomes a reality, will not publish news stories, but will limit its scope to productions of a strictly literary nature. Stories, poems, plays, and feature articles will make up its contents. Essays and theses from all the different schools will be accepted and published. The magazine will offer an outlet for the literary endeavors of State College students, and will be a means of putting before the public some of their meritorious work.

It is hoped by the men who are sponsoring this move that the other students will realize the need for a literary publication, and will cooperate with them in their efforts to promote one.

## Band To Richmond With The Wolfpack

"Daddy" Price and His Gang Leave  
Friday Night for the V. M. I.  
Game

The Physical Education Department decided late Thursday afternoon that funds were available to take the band to Richmond for the game with V. M. I. Saturday. The musicians will leave tonight at 11:30 on board a special coach, and when the Wolfpack takes the field Saturday they will have thirty-five ardent supporters, if the whole of Virginia should root for V. M. I.

The men will wear the military uniform, but will take along the red and white combination which made such a favorable impression here last week. The weather will decide which garb will be worn, according to Captain Price. The band men will return Sunday.

Another one: What shall I do? I have a conflict between gym and physical ed.

## Noted Speakers Will Address 'Y' Meets In Future

Governor McLean Will Probably  
Be Speaker at One of  
Meetings

The "Y" Promotion Force plans to have a series of lectures on Wednesday evenings at 6:30 for the rest of the fall term.

The program committee has in mind several outstanding speakers of the State, including Judge Stacy and Governor McLean. Mr. T. S. Johnson, a well-known engineer of the city and State, will give the first lecture Wednesday evening, October 21. Mr. Cunningham will give a reading at the same time. Music will be furnished by the College String Band.

The program is planned with the idea of interesting young college men. Such questions as: "What does the business world expect of a young man in the way of character?" will be discussed.

The program will be posted from week to week, and all college boys are urged to attend these meetings.

## CLASS SOCCER WILL SOON BE STARTED

The various Physical Education classes are fast getting into shape for the Interclass Soccer League to be started week after next. This league will mark the first soccer league in this school, and although the game is new to the majority of students, it is fast becoming very popular. It is a game that requires plenty of wind and individual skill, and if the enthusiasm shown in the regular class work is any indication, soccer will be a mighty popular intramural sport.

In all probability the league will be divided into two divisions: the Monday and Wednesday classes in one, and the Tuesday and Thursday classes in the other. The winners of each division will play in the final championship game.

## NOTED CHEMISTS VISIT N. C. STATE

Dr. Law Inspects Work Being  
Done by Experiment  
Station

During the past week the college was favored with the visits of some noted chemists. Among this number may be mentioned the visit of Dr. C. H. Herty, formerly editor of the *Journal of Industrial and Engineering Chemistry*, but who is now president of the Synthetic-Organic Chemical Company of New York.

Dr. T. C. Law and W. H. Bennett, president and vice-president, respectively, of the Inter-State Cotton Seed Crushers Association, inspected the work which is being done by the Agricultural Experiment Station on the feed products of cotton seed, and the oil studies which are being carried on by the Engineering Experiment Station.

Dr. Law is president of the Law and Company Chemical Laboratories in Atlanta and Wilmington. These two laboratories do practically all of the oil testing for the cottonseed oil industry of the South. Dr. Law is an official of the American Oil Chemists Society. While he was here he renewed the proposition of the Inter-State Cotton Seed Crushers Association to provide the equipment for an experimental oil mill at the college, if the college would furnish the housing for the equipment and provide instruction in this work.

What makes you think Moses was a fraternity man?  
Well, wasn't he in the thick of all the rushes?

## CAMPUS PROBLEMS DISCUSSED BY DR. BROOKS AT CHAPEL

Keynote of Talk is Citizenship  
and Its Applications to  
College Life

### MUSIC BY THE ORCHESTRA

President Sets Aside an Hour Each  
Week to Become Acquainted  
With Senior Class

In his address to the student-body Wednesday, the main topic of which was the value of the study of citizenship, Dr. Brooks forcibly impressed upon the minds of the students that seriousness of purpose will solve everything, and that the great principle in government, public and collegiate, is to promote the welfare of every one in such a way that even the weakest will be held up.

In explaining his arguments on citizenship, Dr. Brooks said that there were two classes of people, the first of which relied upon forces without themselves, and the second, those who relied upon their inward forces, and realize the power of these forces.

To develop his speech further: The population of State College is greater than the population of a good many towns, and among the men living in this community there are none who are illiterate unless, as he said, they got in by mistake.

The value of the study of citizenship among such a large number of men is easily seen when it is realized that the government of such a body is a difficult task. And this government should seek the welfare of the people concerned and have some definite aim, since poor government is not always the result of bad form, but lack of unity of purpose.

In speaking of his views toward the welfare of the college, Dr. Brooks said he had two objects in view. In the first place, he said, this institution should go much further than it has done in the instruction of citizenship. This he thinks to bring about or aid by starting on the first Wednesday in November at the chapel period to have discussions of current world events, and in order that the students might see the relation between them and their own daily lives. This program will be under the supervision of

(Continued on page 5.)

## METCALF AND WELLS SCIENTIFIC WRITERS

Dr. Z. P. Metcalf and Dr. B. W. Wells, from the departments of zoology and botany, respectively, are the contributing editors for the section on North Carolina in the "Naturalist's Guide to the Americas," which has just been published by the Williams and Wilkins Company. The "Naturalist's Guide" describes the original animal and plant life conditions in the Americas. It indicates the distributional ranges, and preserves a record of the rapidly-vanishing natural conditions. It also describes the location and character of places in which the most nearly undisturbed natural conditions are still found.

It is intended primarily as a general guide for naturalists visiting in any region.

## RELIGIOUS FORUM

The speaker at The Forum this Sunday will be Dr. Carl C. Taylor. His subject is "Religious Certitude In An Age of Doubt."

Dr. Hubert M. Poteat, of Wake Forest, will present the following selections in an organ concert:

Irish Tune from County Derry—Grainger.  
Evening Rest—Hollins.  
Overture to Rienzi—Wagner.  
Nocturne—Liszt.

Editorials

They came; they saw; they conquered.

Try out for the Reporter's Club. It fills a pressing need.

Sam Wallis, former editor of this sheet, is still wondering "What Became of Sally."

Twelve new tennis courts under construction. Fine for the boys who will enter here in 1930.

News item says that a New York museum has eggs 50,000 years old. Sometimes we wonder if the Mess Hall—

Weather expert says we will have no summer during 1926. Guess that lets us out of going to summer school.

"Red" Grange says he carries ice in the summer months. Maybe that explains why he is such a cool-headed football player.

Tag football is being organized between dormitory teams. Remember, Mr. Parker can't play all the positions on all the teams.

Headline in California newspaper says that handling of dates is important problem. Evidently some of the flappers in these parts do not think so, or they would not get theirs mixed so badly.

The rain came and departed but our walks have stayed with us, contrary to the predictions of some of the campus prophets. We are not satisfied with the present walks, but they keep our feet dry, and that's a luxury.

Again we rise to commend the superintendent of grounds and all who are making it possible to sow the grass in front of the mess hall and Y. M. C. A. Continuation of this kind of work will do much to give us pride in our institution. Keep the good work going.

A committee of business men have expressed their opinions about students who make high grades in college. It seems that all of them agree that the most successful men are not the ones who made the high marks in school. Keep this and read it again after you have just flunked a quiz.

A LITERARY MAGAZINE

The students of this college will have an opportunity next week to do a great thing for themselves and their Alma Mater. We refer to the proposition of a literary magazine. The idea has been under consideration for some time, and has the endorsement of Dr. Brooks, the English faculty, and many others who have been interviewed. A few students have realized for some time the need for such a publication, and have brought it within our reach. The only thing necessary for us to do to get this distinct addition to our campus is to vote for the measure when the student-body meeting is held.

In all probability there will be those who will advance some arguments against the new project. Some will kick about the fifty cents each term; others will be doubtful, and some will kick about it on general principles. Kicking is all right if properly directed, but when such a need as this is offered our student-body we sincerely hope that the vision of a State College magazine will look larger than fifty cents.

FRESHMEN DIFFICULTIES

At this time many of the Freshmen are getting their first information concerning their standing in scholarship. Doubtless many will be somewhat disappointed when they learn that they have failed to make a passing grade on all their work. Some of this group will very likely accept this blow as a knock-out, and will spend the rest of the fall complaining about unfair treatment from somebody.

However, this group will be small. By far the larger number who have deficiencies now will accept this as a gentle reminder and will begin to patch up the weak places. They will begin to learn how to study and when to study. After all, this is just the first month, and no one need become discouraged if he has fallen short of his aims during this time of new experiences. This is far from final; but it should act as a stimulus to put forth greater effort. If the effort has already been present it has probably been misdirected. The instructor who has been flunking has a grave responsibility to these men. He should make sure that he is doing his part, and even more, to help these boys get started right. If they have the capacity and desire to learn, and then fail, we are of the opinion that something is wrong somewhere in the instructional end of this business.

We are not attempting to defend the army of social parasites who swarm about the colleges. The quicker we are rid of them the better. Neither is it our idea to imply that no student who puts forth effort should fail. We realize that many students find their way to college who are not prepared or who do not have the capacity for college education. Aside from this group, however, there is the large group—the majority—who want to learn, and who will learn if given proper encouragement.

To you of this class, who have one or two failures, don't let this shake your foundation. This is just your first blow. You have many more in store later on, perhaps of a different nature, but coming, just the same. The way in which you receive this first defeat will determine your strength for the next fray. Remember those who are cheering for you. Get back into the fight!

Some time ago one of the college editors of this State claimed that his school had the best set of tennis courts in the State. We would like to enter State College in this contest for the "booby" prize.

It doesn't matter if my big brother DID bump his dignity down the front steps of Louisburg College.

It doesn't matter if those unmanly college girls DID laugh at "The Freshman."

It doesn't matter if he DID damage his best hat to the extent that he is now wearing a cap.

He is a darn good Prof. for a' that, and a' that, and a' that.

RAIL ROAD.

TRADE WITH 'EM

The following communication was received by the editor recently, and we are publishing it here for the benefit of all who are concerned.

To the Editor of THE TECHNICIAN:

In view of the lack of complete co-operation between faculty and students, I wish to propose a plan which I think will aid both sides to reach a better understanding in the matter of student government. My idea is to have a faculty member be present at meetings of the House, and a student present at meetings of the faculty council. These delegates would not vote, but merely act as representatives of the groups from which they are elected. Of course this is merely a suggestion on my part, but I would like to know what students and faculty think of the plan.

Yours sincerely,

H. E. KENDALL,  
Pres. Student Council.

We are glad to publish this letter for President Kendall, and we will state right here that we think this is a step in the right direction. We have often been led to believe that certain members of our faculty were not satisfied with the way the students were governing themselves here. Whether their attitude is justifiable or not is another question, which we will not answer here. The plan suggested certainly has many points in its favor. It would give the faculty a more intimate knowledge of student sentiment on various topics. It would also give the students a chance to check up more closely when they knew the weaknesses in their organization as seen by the faculty.

RALPH BINGHAM WILL ENTERTAIN SAT. NIGHT

There Will Be No Charge For Admission to Hear One of Nation's Greatest Humorists

Ralph Bingham, one of America's greatest funmakers, will perform Saturday evening at 8 o'clock in Pullen Hall.

His success and popularity is attested by the fact that he has given seven thousand performances, many of these being in the nature of return engagements. He has filled more return dates than any other humorist of our day.

For eighteen years Ralph Bingham has been a member of the Redpath Bureau, and is president for life of the International Lyceum Stunt Club. Some one has said, "Bingham has the true humor that is Nature's economic set to an inspiring tune. When you come away from his performance you will come away as from a garden of rest, where brooks have sweetly sung." Dean Cloyd, chairman of the entertainment committee, states that there will be no admission charge, and that the people of Raleigh are welcome to come and enjoy this treat with us.

TO OBSERVE NAVY DAY

October 27th has been set aside by President Coolidge as Navy Day. This day is to celebrate the achievements, to inform the public of the gallant deeds of the Navy in the past, and to tell of its present condition.

The entire R. O. T. C. regiment will assemble on that date at the regular drill hour, in uniform, at their regular places, and be marched by companies to Pullen Hall. An effort is being made to get an experienced Navy officer to make an address, which is expected to be interesting and instructive.

It is contemplated that in the near future all-cadet officers will be armed with the sabre. The Military Department desires to do this, but it cannot furnish sabres to all immediately, but will do so gradually. It is planned to arm the staff this year and others if it can be done. The Officer of the Day will be armed with a sabre, and the Sergeant of the Guard with side arms suitable to his grade.

The P. M. S. and T. desires to commend all members of the regiment on the fine showing that it made in the Fair Week parade, and has published same in general orders.

The rifle team is being organized with B. L. Vick as captain. Capt. Wm. E. Vernon is instructor. The rifle team last year won third place in the United States at the Hearst Trophy Shoot.

This Week's Limerick

by ZIPPY MACK

There was once a big circus in town,  
And all of the Freshies went down;  
They strutted so proudly  
And laughed out so loudly  
We couldn't tell which was the clown!

Student Forum

Advertising At State College

Much discussion has been going on in THE TECHNICIAN as to whether or not advertisements should be placed upon the newly-erected wall on the athletic field. Why shouldn't State College reap some benefit from this wall? It surely cost the college something to erect it, so why not make it pay for itself.

I am not one of those students who would not see the leading manufacturing concerns of this country spending millions each year for this purpose. An athletic field is a splendid place to do advertising, inasmuch as many thousands of people gather there each year to witness athletic events; and it is here that advertising should and does have its psychological effect upon the individual.

Why pass up a splendid opportunity as this to make money? You say: "Well, money isn't everything." Maybe it isn't, but we would surely fare pretty common if we didn't get hold of a little now and then.

H. R. FIELDS.

Is Band Appreciated?

Is the State College Band appreciated? Is it supported by all concerned, or by only a minority of those with whom it comes in contact? Should it make the most important trips with the football team, or should it appear only on Riddick Field?

All these questions have been discussed by members of the band, and by many of the student-body. The Band is composed of State College students. It is a good Band, and as such is thoroughly appreciated by the student body, and by a part, at least, of those in authority at the college.

Is it appreciated by the Alumni and the business men of Raleigh? If not, who was it that sent the Band to Wake Forest last spring and to Duke this fall? Who was it that took the Band on the "State Fair Special," and who are willing to send the Band to Richmond Saturday? Who was it that gave the Band a giant bass drum? It was not the Athletic Association of State College. Draw your own conclusions as to who it was.

Does the presence of the Band aid the football team to keep up a fighting spirit? Ask the football men that. Does the Band advertise the college? Are not more men attracted here by the Band than by the football record?

To summarize this article: Does our Athletic Association appreciate and give a just evaluation to the consistent and enthusiastic service rendered by "Daddy" Price and his youngsters?

T. S. STUART.

Chemistry Department Exhibit

The departments of Chemistry and Chemical Engineering operated a booth in Floral Hall at the State Fair, exhibiting the products of the chemical industries of the State. The statistics and the variety of the chemical products made in North Carolina were the source of much interest to thousands of visitors.

LOST

A bunch of keys. The ring contained a post office key and four other keys. My name and address was stamped on piece of aluminum attached. Finder will please leave at 112 Watauga or the desk of the "Y."

D. R. PACE.

Agromeck Yelps

Our printer and engraver was here last week. That was him in the Studebaker roadster. Fourteen more payments and it's his.

C. B. Dryden of the Brandon Printing Company, says that our annual will be second to none in the South. Optimism is a trait that we should all cultivate.

Senior Black says that he has written home so often for money for the Agromeck that his people thought it was published once every week.

All county clubs who want space in the Agromeck, please get organized at once. We expect to make all group pictures about the first of November.

Jim Potter and Johnny Matheson spent last week-end "recuperating" in Burlington. That's a good word. Gallivanting and cavorting are good words, too.

"You can't run in a Ford and expect it to come out a Cadillac" is an expression that was heard around the campus last week. That's Greek to us, but if you are not satisfied we will be glad to give you a re-sitting.

Did you fellows see the races at the Fair? If you didn't you have no cause to weep, for you certainly didn't miss much. If you want to see some real, genuine riding, just get in one of Pap's classes.

All military officers' pictures, pictures which have to be retaken, and pictures which have not been made, will be taken at Siddell's studio Thursday and Friday, October 29 and 30, from 1:00 to 6:00 o'clock. This is your last chance to have your picture made without extra cost. If you do not have an appointment, please come by the Agromeck office any night between 6:30 and 8:00 o'clock and make one.

P. S.—Red wrote most of these—that's what makes them so sorry.

Evaporated Bull

Success

Success is the enemy. It is the only enemy that can overcome men who are invincible to failure. Men who cannot be beaten, though they fail a score of times; men who cannot be discouraged by an army of difficulties, sometimes go tumbling down as a result of a little success. More men are failures on account of success than on account of failure. A man wants recognition and reward; we say these are natural desires, and so they are. But when a man gains recognition, the temptation is very great to stop and enjoy the recognition, and when he gains reward, the temptation is to think that he has "arrived." Make your program so hard and so long that the people who praise you will always seem to you to be talking about something very trivial in comparison with what you are really trying to do.—Anon.

Chemical Society Meets

Thursday night of this week the Berzelius Chemical Society will initiate the new members with an entertainment. In the past the Berzelius Society has rendered as effective instruction in the study of Chemistry as any of the regular college instruction. This is wholly a student organization, managed entirely by the students. The society holds regular bi-weekly meetings.

### CONFERENCE ON WATER POWER IN WESTERN N. C.

Major Harold C. Fisk of the War Department in Charge of Investigation

State College was represented at the Water-Power Conference in Asheville, October 2 and 3, by H. B. Shaw, Director of the Engineering Experiment Station. He reports that the meeting was most interesting and instructive. Major Harold C. Fisk, District Engineer of the War Department, who is in charge of the investigation, presented a wealth of information, engineering data, maps, and discussions in such a way as to appeal to both engineers and laymen. There were pertinent discussions by General Lansing B. Beach, Director M. O. Leighton, and others.

This investigation of the Tennessee River and its tributaries is the first complete study ever undertaken by the Federal Government of the navigation and water-power of a whole river system and watershed. The studies are still in progress. However, so much has been accomplished that those who are familiar with it are emphatic in the opinion that it is highly desirable and even necessary to investigate the whole in order to properly develop the parts.

In western North Carolina, the French Broad, the Hiwassee, and the Pigeon rivers have a potential maximum power of about 1,000,000 h.p., one-half of which is on the French Broad. The development of water-power on these tributaries and the providing of storage reservoirs is essential to the most advantageous development of the water-powers on the Tennessee. One such storage reservoir, covering about fifty square miles and extending from Asheville to Hendersonville, with a shore line of some 562 miles, was shown by maps and contours. To establish this reservoir would require the construction of a 130-foot dam on the French Broad near the mouth of the Swannanoa, which would impound a great body of water, to be drawn upon to equalize the stream flow in the river system, rather than to produce hydro-electric power continuously at this one site.

### GRANVILLE CO. CLUB RECENTLY ORGANIZED

The Granville County Club held its first meeting in room 305, Fifth Dormitory, for the purpose of organizing a club. The club has thirteen members on roll this year in all, with only two new members. Two of the club's members didn't return this year. There were fourteen members last year.

The club originated in the fall of 1923. The enrollment at that time was only six men.

### Men's and Young Men's TOPCOATS

The Handsomest Topcoats That Ever Reached Town

At prices never offered by anyone

\$18.50, \$20.00, \$22.50, \$25.00 up to \$35.00

Every single Coat of pure wool, mostly silk-lined, Cravanetted and finely tailored. All smart fabrics and colors. All tailored expressly for Berwanger, to fit properly and hold their shape in sunshine or in showers. For these are all-weather Coats that men wear ten months in the year. No man could find Coats like these anywhere in town at the same low prices! Come in and look them over!

Two-Trouser Suits, Special \$23.50

Others \$25, \$30, to \$35

S. Berwanger The One-Price Clothier

Professor Cunningham will read a selection of the following poems next Wednesday evening, October 28, at 6:30, in the "Y" auditorium: "King Robert of Sicily," "If," "Chemistry of Character," "Vicorty Ball," "Wind in the Pines." Music by College quartette. Everybody invited.

### INITIATE MEMBERS IN ELECTRICAL SOCIETY

J. V. Strange is Principal Speaker at Initiation Featured by Dinner

The State College branch of the American Institute of Electrical Engineers held their annual initiation of new members last evening at a dinner at the Raleigh Hotel. Sixty-five persons were present, including the senior members of the society, the new members, and the electrical engineering faculty of the college. J. V. Strange, operating manager of the Carolina Power and Light Company, was the principal speaker of the evening.

In his talk to the society, Mr. Strange stated the company he represented valued very highly the graduates of State College who are in their employ, and emphasized the good work they are doing in the organization. He gave a general history of the electrical industry, stating that today is the 46th anniversary of the discovery of the incandescent lamp. This was the beginning of the present-day electrical industry. In outlining the developments of that industry up to the present day, Mr. Strange pointed out some of its defects that are yet to be overcome. The industry has been made profitable by the inter-connection of central stations over the country, so that the waste of energy may be a minimum, and it is up to the engineers of today to carry on this work for the further development of this industry, stated Mr. Strange.

The student branch of the society is composed of the entire classes of senior and junior electrical engineers at the college. The officers of the society are: F. P. Dickens, president; F. L. Tarleton, vice-president, and W. F. Sanders, secretary-treasurer.

### STUDENTS IN ECOLOGY VISIT COASTAL PLAIN

The class of undergraduate and graduate students in plant ecology spent the latter part of last week in the Wilmington region, studying the coastal plant communities under the direction of Dr. Wells and Mr. Shunk. Among the outstanding vegetational situations studied were the savannahs and sand ridges near Burgaw, the swamps near Wilmington, and the maritime forest, salt marshes, and dunes near Carolina Beach and Fort Fisher.

The party spent the two nights away from the city at the State College Field Laboratory, located near Burgaw, N. C.

The following students were in the party: A. M. Alford, R. C. Campbell, E. T. Howard, N. D. Clegg, O. F. McCrary, J. B. Mowry.

Dr. Z. P. Metcalf accompanied the party, making some interesting insect collections.

### LENOIR COUNTY CLUB ORGANIZED

All students from Lenoir County met and organized a Lenoir County Club for the purpose of creating an opportunity for all students from Lenoir County to become better acquainted and to promote a greater spirit of co-operation.

R. L. Wooten was elected president, E. W. Chadwick vice-president, and M. L. Crawford secretary-treasurer. All these men being from Kinston.

The club voted to send THE TECHNICIAN and The Agronomist to all consolidated and accredited high schools in Lenoir County.

The first meeting was well attended, twenty-one being present, and many parts of the county were represented.

The club expects at an early meeting to make Dr. Brooks, also a son of Lenoir, an honorary member of the club.

Collegiate: "May I kiss you?"  
Co-ed: (Silence.)  
Collegiate: "I say, may I kiss you?"  
Co-ed: (Ditto.)  
Collegiate: "Say, are you deaf?"  
Co-ed: "Are you dumb?"

### WILL CONDUCT CLASS IN SALES MANAGEMENT

Mr. Howard J. Wischaupt has been giving a series of lectures at the Yarrow Hotel this week. Mr. Wischaupt came here under the auspices of the Raleigh Chamber of Commerce, and his lectures are an introduction to a class which will follow next week. He is on a nation-wide advertising tour for the establishment of an institution for the training of sales executives, which is to be located at Cleveland, Ohio.

These lectures should prove helpful to students taking Business Administration or other courses in the school of Business and Science, as they are in line with the best business ideas of the time.

### Wife Willing

I asked my wife if I could go down to the gym to play ball with the fellows.

Soccer?  
No, she socked me.

"You ought to be proud to be the father of such a large and devoted family," said Miss Louise to her visitor.

"What on earth do you mean—large family?" gasped the father.  
"Yes, indeed. Your daughter has had eleven of her brothers here, this term, to take her out. She expects another tomorrow."

Bud and Buck had not seen each other for several years when they met at a convention.

"Hello, Bud, old scout; how's wife?"  
"She's in heaven," replied Bud, sorrowfully.

"Is that so? I'm sorry!" Then, realizing that this did not sound quite right, "I—I mean I'm glad; no, that is to say, I'm surprised."

### '23 TEXTILE STUDENT LANDS GOOD POSITION

W. H. Steele, Jr., a textile graduate of the class of '23, has been appointed superintendent of the Southside plant of the Arista Mills, Winston-Salem, N. C. Steele has indeed done well in securing such an important position within less than three years after his graduation. The Textile School, and State College as a whole, are glad to hear of Mr. Steele's progress, and hope to hear of his continued progress in the textile industry.

"Mother, may I go out and play?"  
"What, with those holes in your pants?"  
"No'm; with the boys across the street."

### "FRIEND CALLIE" HALL WITH GASTONIA MILL

C. G. Hall, who graduated from this college as a Textile student with the class of '13, has recently been made assistant agent for the mills owned by the Manville-Jencks Company in Gastonia, N. C. In this position Mr. Hall not only commands a very good salary, but also occupies a large and responsible place with this company. State College, and especially the Textile School, is proud of Mr. Hall, and wishes for him success in his work.

"Say, boys; one ob dese niggers say he from de norf. Was it you, bo?"  
"Yeh, dat what I say."  
"What state you cum' from?"  
"Soul Carlina."

### FREE!

### Two Paper Pennants with College Seal and Name Printed on Same

To Every Student and Faculty Member of State College—

Which can be pasted on trunk, suitcase, or windshield of car. — Come in and ask for them. — Absolutely free!

Also, take a look at our new line of Everything for the College Man

Tobacco, Cigars, Cigarettes, Chewing Tobaccos, Candy, Cakes, Sandwiches, Fruits, Shirts, Shoes, Neckties, Hosiery, Sweaters, Scarfs, Underwear, Caps, Handkerchiefs

Also

Don't forget we have Hot Roasted Peanuts, Ice Cold Drinks, Ice Cream, Toilet Articles, School Supplies, and Magazines

### CHERRY'S

(College Court Building)

Open Till 10:30 P.M.

"Just Off the Campus"

GEO. B. CHERRY, Mgr.

"Everything's jake" when you smoke P. A.

TROUBLE'S a bubble, just as the song says. And you can stick it with the stem of your old jimmy-pipe, filled to the brim with good old Prince Albert. A remedy? It's a specific! Ask any jimmy-piper who ever butted into trouble.

Cool as the zone-of-kelvination you read about in the refrigerator ads. Sweet as the kiss of spring on a winter-weary brow. Fragrant as locust blossoms. Soothing as a cradle-song. And—P. A. can't bite your tongue or parch your throat. The Prince Albert process fixes that!

Get on the sunny side of life with a jimmy-pipe and P. A. Tie a tidy red tin to trouble. Smoke the one tobacco that's got everything you ever wished for—Prince Albert. Quicker you get going, the sooner your worries will be over. Men who thought they never could smoke a pipe are now P. A. fans. You'll be a cheerleader too!

### PRINGE ALBERT

—no other tobacco is like it!

P. A. is sold everywhere in tidy red tins, pound and half-pound tin humidors, and pound crystal-glass humidors with spout-combustion top. And always with every bit of bite and parch removed by the Prince Albert process.

Look at the U. S. revenue stamp—there are TWO full ounces in every tin.

**WOLFPACK JOURNEYS NORTH  
MEET CADETS AT RICHMOND**

**Hard Game Expected, But State  
Hopes to Reverse Score of  
Last Year's Game**

The score of Saturday's game between State and V. M. I. will have little or no effect upon Southern Conference records, but it will be of great interest to football fans of the two states.

This game, between the two most important military schools in North Carolina and Virginia, has always been one of the most important contests of the year in these states, and annually draws a large crowd to the Richmond field. Last year the Cadets took the measure of the Wolfpack by the score of 17-7; but few, if any, concede them such a margin this year. V. M. I., with losses to Virginia and Georgia Tech against it, seems to be weaker than the 1924 outfit, while Tebell's squad is undoubtedly stronger than last year's, in spite of losses to both of the Carolinas.

Play-by-play results of the game will be shown on the Gridgraph in the Frank Thompson Gymnasium, beginning at 4:30, so that all State College students and friends may have an opportunity to keep in touch with the plays and scores.

Approximately twenty-four men will accompany Coach Tebell and Captain Johnson on the trip to Richmond, and it is very probable that most of them will have a chance to take part in the contest. State's line-up will be approximately the same as in the past games, though it will cause no surprise if several changes are made by the coaches.

V. M. I. came through the Virginia game in good shape, and their regular players should all be fit for a stiff scrap.

**GOLDEN TORNADO IS  
CHAMPIONSHIP GALE**

The Golden Tornado of Georgia Tech has gotten off to a whirlwind start toward winning the Southern Conference championship. With Captain Wycoff, third All-American full-back, and "Red" Barron, brother of the famous "Red," Georgia Tech has built up this year a football machine that has decisively defeated Penn State and the University of Florida, enough to almost assure them of the championship in the Southern Conference.

Alabama, the winner of last year's Southern Conference honors, will meet Georgia Tech next Saturday. If the games that have been played and won this season by both teams mean anything, Georgia Tech should not have a hard time defeating Alabama. Alabama's victories this season have been over smaller and inferior teams, while Georgia Tech has defeated a good eastern team in Penn State and a good Southern team in Florida.

Georgia, runner-up to Alabama in last season's honors, does not seem to have the team this year that defeated Yale 7 to 6 last year. They were decisively defeated by Yale at the Eli's bowl last week, 33 to 0. Georgia will probably lose to both Alabama and Georgia Tech, though the Bulldogs always play a great game against the Yellow Jackets.

Florida, undefeated by any Southern team last year, has already been defeated by Georgia Tech, 23 to 7, which fairly puts them out of the running. In spite of this, Florida will give any team in the South a hard-fought game, and should win the majority of their games during the season.

Landowner (proudly to stranger): "You see all this land stretching out toward those distant hills? It is all mine. I am the biggest landowner in this section."

Stranger: "That reminds me of my business out here. I am tax assessor."

Landowner: "Before you go further I just want to tell you, I'm the biggest liar in seven counties."

**WOLFLETS PLAY PANTHERS  
RIDDICK FIELD SATURDAY**

**High Point Freshly Victorious  
Over Davidson Kittens;  
Tied Guilford**

The N. C. State Wolflets meet High Point College on Riddick Field Saturday in the first Freshman contest in Raleigh this season.

The Panthers, fresh from a 6-6 tie with Guilford and decisive wins over Oak Ridge and the Davidson Kittens, come to Raleigh with a good supply of experience and confidence, while as yet Sammie's Yearlings are an unknown quantity.

With a Freshman class probably larger than the Pointers' student-body and many high school stars to pick from, Coaches Homewood, Doak, and Ingram have lined up a fast, heavy team, lacking only in collegiate experience. This team is expected to come through the season, as well as this game, with flying colors, and should be heard from when the state championship games are played.

The exact line-up for Saturday's game has not yet been disclosed, but the players for each position will be chosen from the following men:

Backfield—Ford, Beatty, Outen, Eaton, Laughlin, Albright, Crisp, Rollins, Morris, Baggett, and Grubbs.  
Ends—Dedmon, Melton, Kilgore, Moore, Parker, Gorham, and McCaskill.

Tackles—Floyd, Harshaw, Parker, J. W. Ferguson, and Ellis.

Guards—Vaughan, McNeill, Reece, Barbury, Dean, and Floyd, E. H.

Center—Goodwin, Smith, Hester, and Moore.

This game will start promptly at two-thirty (2:30), so as to be over in time for everybody to see the Gridgraph showing of the varsity-V. M. I. game at the gym at 4:30.

One thing of especial interest to State students about this game is the fact that Dixon, a member of the '28 Freshman team, is now playing with the High Point Collegians.

**WRESTLING TEAM  
CALLED FOR NOV. 1**

**Men Out For Football Will Not  
Report Until End of  
Season**

The call for candidates for the 1925 wrestling team will be sounded by Coach Hicks the fifth of next month.

This year State College is going to bring to light one of the strongest wrestling teams in the country. Last year our dreams of such a team were brightened with a touch of reality by the team's success, despite the fact that it was the first that had ever represented State College and all the men were green and inexperienced.

With practically all of last year's team back, together with the new material, Coaches Hicks and Sammy Homewood are going to develop a team which we hope will emerge at the end of the season walking in the limelight.

C. S. Harrell, who last year demonstrated his ability to make any of 'em in the middleweight class sit up and take notice, will captain the team this year. He, "Red" Hicks, and Sammy Homewood are all very anxious for every one who has had any experience at all or any one who is even interested in wrestling to report when the call is made Monday, November the 2d, at 4:30 p. m., at the gym.

Coach Tebell's men will not report until after the close of the football season.

Meets have already been scheduled with the universities of North Carolina and Virginia and with Duke and Davidson, while other teams will probably be met before the season closes.

Red—Yep, I came within an ace of doing it last night.

Ted—Doing what?

Red—Making a royal flush.

**ON THE SIDELINES**

Anyhow, Carolina was "outbanded" if not outplayed.

—N.C.S.—

Don't miss the Gridgraph. It's next best to the game itself.

—N.C.S.—

Go to it, "All-Americans." You can beat Guardsmen any day.

—N.C.S.—

Three State teams in action tomorrow—the Wolfpack, the Wolflets, and the All-Americans.

—N.C.S.—

The Wolfpack leaves for Richmond Friday. Let's give them an old-time, rousing send-off.

—N.C.S.—

Congratulations to Captain Outen. May he and his Wolflets have a most successful season.

—N.C.S.—

Sammie's Baby Wolves get their first taste of battle this week. Everybody be there to cheer them along.

—N.C.S.—

First call for wrestlers Monday week. State wants a large squad and a championship team down in the Gym this year.

—N.C.S.—

We notice with pleasure that actually and at last work has been started on twelve of our long-promised tennis courts.

—N.C.S.—

The long-distance Wolves have their first run of the season next week against Davidson. We're trusting them to bring home the Wildcats' bacon.

—N.C.S.—

Perhaps the News and Observer is correct, but it would seem more propitious for them to wait until after the Davidson game, at least, before being so certain that State is out of the championship race, especially since Carolina has lost as many games as have the Techs.

**V. M. I. GAME WILL BE  
PLAYED IN GYMNASIUM**

Will Start at 4:30, Making Possible  
See Both Freshman and Grid-  
graph Games

The State-V. M. I. football game will be played in the Frank Thompson Gymnasium this Saturday. Oh, no! not in flesh and blood, but on the State College Gridgraph. This device, showing in detail every play made on the Richmond field when the Wolfpack meets the Flying Cadets, was last year used in the auditorium of Pullen Hall, but this year will be installed in the gymnasium. This change, it is rumored, was made in order to prevent damage to the roof of the auditorium from the vociferous yells of an excited student-body, as the shouting last year was loud enough to be heard easily in Sixth Dormitory and occasionally in Seventh.

The knock-down bleachers will be put back in the gym to provide seating arrangements for the spectators, and an admission fee of twenty-five cents will be charged. This same system will be used for all the rest of the out-of-town games this season, which are V. M. I., Davidson, V. P. I., and Washington and Lee.

Great interest was shown in this Gridgraph last year, and the crowds attending its long-distance games increased steadily during the time it was in operation. All those not for-

tunate enough to be able to take the Richmond trip will find this a very interesting and entertaining substitute, as well as a good way to support the Wolfpack and cheer for your team.

Mr. Miller, Director of Athletics, recently gave out the following facts about the Gridgraph: It was purchased by the Athletic Association last year at a cost of \$1,100, and was bought for the purpose of pleasing the students and affording them a means of seeing the out-of-town games of the Wolfpack. Besides the original cost, the telegraphic work for each game amounts to about \$35. The quarter charged for admission is by no means profit, for at that rate it will be two or three years before the board is paid for, and any money taken in after that will be turned over to the department for the purchase of new equipment.

The reports on the State-V. M. I. game this Saturday will start at 4:30, thus giving everybody plenty of time to see the Freshman-High Point game on Riddick Field at 2:30.

This Gridgraph is open not only to State College students, but to any State College football fan who may be interested. The admission charge of 25 cents is the same for all.

All basketball candidates meet in Y. M. C. A. at 7:30 P. M., Tuesday night.  
**COACH TEBELL.**

**CROSS-COUNTRY  
TEAM WILL OPEN  
WITH DAVIDSON**

**Initial Meet of Season Will Be  
Held at Football Game  
Saturday**

Bang! goes the gun, and with a galloping start the cross-country team knocks the lid off the season in a meet with Davidson, which will be the side-show attraction between the halves of the State-Wildcat football game next Saturday. The course, as the Davidsonian writes, is to be on the Davidson-Concord highway, and State's flying Wolves are anxious to test the roadability of that road as compared to the Method-Cary boulevard.

With a week of extra hard running behind the team, the coming week's work is expected to put on the finishing touches, and should bring the squad up to the meet in tip-top condition. The four- and six-mile courses were used regularly during the past week.

Members of Captain J. J. Wright's band of B. V. D. artists frankly admit that they do not fear the coming meet with Davidson. In other words, they expect to bring home the bacon. In the first place, they have an ambition, the goal of which was set up by the teams of the three last years. State won the State championship for two straight years, and last year the team finished a very close second. This year there is as good material as in any preceding years, and the men have confidence.

According to advanced dope, the team shapes up about as follows:

Wright and Brimley are sure of their places, while Sam Rowe, Barnhardt and "Sure-Shot" Vick have just about completed their reservations for the Davidson trip. The remaining places are being battled for by McCann, Nance, Kendrick, Fort and "Sparky" Boswell, with Nance and Kendrick probably having the edge.

The schedule is as follows:  
Oct. 31—Davidson at Davidson.  
Nov. 7—Carolina, here.  
Nov. 14—Washington and Lee, here.  
Nov. 21—Duke at Duke.  
Nov. 28—Open.  
Dec. 3—State meet at Duke.

**PULLEN HALL USED  
FOR CLASSROOMS**

The main floor of Pullen Hall, which the library has recently vacated, will soon be occupied by the English and Electrical Engineering departments.

The three classrooms on the north side will be used only by the English Department, Professor Cunningham and Professor Daugherty having their classrooms and offices in these. There will be one classroom on the south side which will be occupied by Professor McIntyre. He will use this as a temporary classroom for Electrical Engineering Laboratory until the new Electrical Engineering building is completed.

**Sweet Papa!**

A moon,  
The steps,  
A pretty miss,  
A man with arms so strong,  
An upward glance,  
A fatal kiss—  
Another good man gone wrong.

"Did he steal much?"  
"Yes; he robbed the shoemaker of his awl."

Judge: Where did the auto hit you?  
Boliek: Well, Judge, if I'd been carrying a license number it would have busted into a thousand pieces!

**Short Story**

Buck Rose sat on a tack. Buck rose.

**State Championship Records**

Team	Won.	Lost.	Tied.
Wake Forest	1	0	1
Davidson	0	0	1
State	1	1	0
Carolina	2	1	0
Duke	0	2	0

**FOOTBALL SCHEDULE**

October 17		
Duke	6	Elon 0
Guilford	6	High Point 6
Lenoir	10	Emory and Henry 0
Davidson	13	Presbyterians 0

**October 23**  
Lenoir vs. Erskine at Hickory

**October 24**  
State vs. V. M. I. at Richmond.  
Carolina vs. Maryland at College Park.  
Duke vs. William and Mary at Norfolk.  
Wake Forest vs. Florida at Gainesville.  
Davidson vs. Furman at Charlotte.  
Elon vs. Concord State at Berkeley, Virginia.  
State Freshmen vs. High Point at Raleigh.

## J. A. McNEEL HEADS RALEIGH HIGH VOCATIONAL GUIDANCE

Believed Be of Much Benefit to Students Beginning Life or College Career

In the Raleigh High School this week will begin the actual work of developing a bureau of Vocational Guidance. Mr. J. R. McNeel, one of the graduate students of North Carolina State College, is the director of this work, which is being supervised by E. W. Boshart, Professor of Industrial Arts.

The aim of this bureau is to advise or co-operate with the students in choosing, preparing for, entering upon, or making progress in his or her occupation.

This work was started last spring when the pupils filled out questionnaires pertaining to the work that they wished to do in the future. These questionnaires have been carefully gone over and the information recorded. This week Mr. McNeel will make a talk to the High School students about the future when they leave school. The English teachers will co-operate by assigning such essays as "What I Expect to Do When I Finish School" to arouse the interest of the pupils.

Arrangements will be made later to have men representing various professions to come and talk to different groups of students. Finally, Mr. McNeel will hold group conferences and individual conferences with the pupils to advise them as to what occupation they are best fitted to enter. This instruction should be particularly helpful to students who enter college, as it is notoriously true that many college

men are undecided about a vocational objective. The result is that not only their college course but perhaps their future lifework will suffer because of a lack of necessary information along this line.

Through this bureau it is planned to aid students so desiring to find suitable employment when they leave school and during the summer months.

Mr. McNeel will have his headquarters at the Senior High School, but will work with both the Senior and Junior High Schools.

### Campus Problems Discussed By Dr. Brooks At Chapel

(Continued from page 1.)

Dr. Taylor, and will be presented each month and oftener if the occasion warrants it. The object of this exercise is to enable all at the college to better interpret the great movements around us.

The second thing Dr. Brooks proposed for the betterment of the college is the organization of a literary club, which is to have a room in the library building where the students may go during their off hours to study the great men and works of literature and history.

Before the end of the year Dr. Brooks hopes to have established a strong center dealing with the history of the country, and he wishes that a department of history might be established at the college.

In order to give himself an opportunity to know the students better and to talk with them more, the president of the college has set aside the hours of twelve to one on Monday to discuss with any member of the Senior class any problem pertaining to the institution or a personal or public problem. The hour of 4 to 5 p. m. has been set aside for any of the other students.

Dr. Brooks' purpose in this is to learn by closer contact with the students why there is so little respect for personal property, and why there is so much more destruction, breakage, and disregard for others than there ought to be. It is a significant fact, he says, that in the year 1923-24 there was returned to the student-body \$2.20 of their breakage deposit; last year \$1.60, and this year none. The money lost in this manner would have installed a department of history and a department of business law at the school, with a margin for other expenses.

Over \$40,000 was spent last summer on the dormitories alone to make them more comfortable and more satisfactory to the students. It is hoped that 1911 and First dormitories will be remodeled next summer. Dr. Brooks said, and added that is a serious question whether or not we shall build more dormitories on the campus.

The president commended the attitude of the student-body toward the club boys who stayed here during Fair Week. He hopes to see the entire institution organized by counties in order that when men come as visitors they can be well cared for and shown the best of hospitality by boys from their own county. The student-body did more for the Fair, parade, and other activities than any of the county agents.

Several parents have been uneasy about their sons, who belong to a fraternity, moving into their own chapter houses off the campus. Dr. Brooks has answered several letters concerning such matters, and has replied that the movement has his extreme faith and approval since, besides lessening the congested condition of the dormitories, it will induce the principle of taking care of property belonging to others in the fraternity men.

### Faculty Council Pass New Regulations For Military Department

(Continued from page 1.)

5. Neglect of rifle or equipment, one punishment tour.

6. Disrespect to or failure to obey the lawful orders of a student officer or non-commissioned officer in the proper discharge of his duty, one to five punishment tours, depending upon the seriousness of the offense.

7. Any breach of military discipline not especially enumerated above, such as inattention, talking, laughing, smoking, chewing, spitting, while in ranks at attention; improper uniform or wearing the uniform improperly at drill or elsewhere, coming late to drill or to military class, gross negligence in rendering prescribed salutes, etc.; any of such breaches to be recorded on the student's record, and for three breaches to be recorded on the student's record, and for every three unexcused breaches within one term the student will be required to walk one punishment tour. For each offense

the punishment for which is not a punishment tour, the student will be called into the office of the Professor of Military Science and Tactics for admonition.

8. When a student is notified to report to the office of the Professor of Military Science and Tactics and willfully fails to report at some time during office hours of the day ordered, unless excused by the College physician or by the Dean of Students for proper cause, he will be required to walk one punishment tour.

9. Aggravated cases of disorderly conduct, such as firing rifles from windows of dormitories, to walk one punishment tour.

10. Failure to obey the lawful orders of officers of the Military Department, from one to five punishment tours, depending upon the seriousness of the offense. Disrespect or insubordination towards officers of the Military Department are to be reported to the President of the College for his action.

11. A member of the R. O. T. C. who, upon proper request of an officer, a student officer, or a student non-commissioned officer, fails to give his true name, or gives a false name, three punishment tours.

### Procedure in Cases of Military Discipline

1. The Professor of Military Science and Tactics shall investigate all breaches of military discipline, interview each student concerned, and ascertain all facts of the case before imposing punishment tours. The decision of the Professor of Military Science and Tactics as to the imposition of punishment tours shall be final.

2. Punishment tours shall be for two hours duration and shall be walked the first Saturday afternoon or afterwards following the decision of the case in question. Only one tour will be walked on any one Saturday. A commissioned officer of the regular army on duty with the Military Department will be present at all times during which such punishment tours are walked to supervise such punishment.

3. At the time a student has imposed upon him a punishment tour he shall be fully informed of the seriousness of the offense of willfully failing to comply with the penalty imposed and be made to understand clearly the penalty for deliberate non-compliance with the above-stated College Regulations. In case a student shall have imposed upon him a punishment tour by the Professor of Military Science and Tactics and, not being excused by the College physician or by the Dean of Students or Professor of Military Science and Tactics for proper cause, fails to report for such punishment tour or tours at the time and place set, and to walk such tours in a proper manner to completion, he shall be reported to the President of the College for suspension or dismissal.

### Regular Library Service Begins in Three Weeks

(Continued from page 1.)

This circulation last year increased thirty-eight per cent. No new books have been added to the 15,000 volumes now on the shelves except those needed by the instructors for their classes.

The chairs for the reading room have been delivered, but the tables have not, although they are here. Until the rest of the equipment for the reading room comes, it cannot be opened. There is still a large amount to arrive, be delivered and installed, since the loan desk, reading room shelving, atlas cases, card catalogs, and other articles are not here yet.

When everything is completed the capacity of the reading room will be about two hundred, and that of the periodical room about forty. The remainder of the equipment will probably take about two weeks to arrive, and another week will be taken up in its installation and setting up, so that the date of the complete opening will not be under three weeks.

### FLOYD AND ANDERSON GO TO BOONE TAVERN

Nu, the State College chapter of Alpha Gamma Rho Fraternity, will send George L. Floyd and John Anderson, Jr., as delegates to their national convention, which will be held at the Daniel Boone Tavern, Columbia, Missouri, October 29, 30, and 31. Messrs. Floyd and Anderson will leave Raleigh Saturday and go via Cincinnati and St. Louis. They will stop over at several points of interest in the course of their trip, and return by the southern route about November 3d.

Kappa Sigma: "I want you to come to our fraternity shag with me."  
Sigma Nu: "Thanks. Is it formal or shall I wear my own clothes?"

### Public Speaking

We often speak of selling State College to the high school boys of the State. How do we wish to buy them? By our football record, by the baseball championship won, by having the best board, and by various and kindred ways.

But there is before the student-body a way to sell State College to the really outstanding boys of the State. A means whereby there will come to State College boys that really accomplish things worth while after finishing here. The ability of the graduates and their accomplishments speak stronger for a school than mere numbers. Therefore, we want men at State College who have the ability to do things. The best high school boys are going to the school that turns out men that do things.

Now, the students of State College have a chance to show that men are being trained at this school. In the coming debates and oratorical contests between the different colleges and universities of this State and other States, it behooves the students of State to prepare for the try-outs in large numbers in order that the best talent of the student-body may make the teams.

If we can only get the best men of State College out and on the team we are sure to bring home many victories, and thereby prove to the people of the State that students at State College can think as well as well as work. Therefore, when the call for debaters is given, let every student who can speak on a platform respond.

J. D. BRITT.

## Dean Nelson's Brother Speaks To The Textiles

States That Local Mills Producing Fabrics Fine as Any Made in Any Country

Mr. Will Nelson, who is a brother to Professor Nelson, and who is connected with the Judson Mills, Greenville, S. C., with headquarters in New York City, gave a very interesting talk to the students of the Textile School Monday evening at a meeting of the Textile Society.

In his talk, Mr. Nelson emphasized clearly and strongly the fact that there are mills in our Southern States that can and are producing fabrics whose fine qualities are not surpassed by those of any fabrics produced in any other country. Much of the progress in textile work that is being made in this country today is being made by the mills of the South. In this section of the country, according to Mr. Nelson, we have designers and stylists who are able to produce creations equal to those produced in any foreign country.

But, as Mr. Nelson stated, this country, instead of taking the lead in the bringing out of new creations, often follows the lead of foreign countries because of the fact that the American public would rather pay a higher price for an imported fabric of the same quality and design as an American-made fabric. By simply stamping the word "Imported" upon a piece of cloth we may increase the value of that cloth in this country. The people of the United States have not yet realized that the fabrics produced in this country are equal to those made in any other country. But the mills of this country, especially those of the South, are gradually opening the eyes of the American people to the fine qualities of the products of the textile industry of the United States.

In concluding his talk, Mr. Nelson told the textile students not to be afraid of starting to work in a mill at the bottom after finishing school. The man that has the right training and knows how to use the knowledge that he has acquired will not stay in a small place at a low salary for any length of time. Mr. Nelson further stated that the textile industry is big and presents great opportunities for a large number of men.

## ALUMNI NOTES

(Observations and Communications of Zippy Mack)

The old fellows who came up for the Fair Week tragedy and for the week-end following were so numerous that we can scarcely mention all of them. The editor says he has the paper about full, anyway. That's all he uses us for—just to finish out where the other stuff won't go. But there's nothing like a good sport. Let's go!

The signal honor among the alumni for the past week goes to Mr. E. B. Morrow of the Horticultural Class of '21. Mr. Morrow has just been appointed extension horticulturist for the Agricultural Extension Service of State College. In this place he succeeds Mr. Glenn O. Randall, who is going into teaching and research. Mr. Morrow, after his graduation at State, went to the University of California, where he graduated in 1923, and later obtained his Master's Degree in 1924. Since that time he has been doing special work with the crop reporting service for the State.

Among the more recent graduates who registered at Alumni Headquarters during Fair Week were: J. S. Whitener, '23 Civil, who is now with W. C. Olson, Elizabeth City; J. O. Anthony, '24 Vocational, who is now teaching at Dunn; G. C. Lassiter, '25 Business, who is now in the oil business at Spring Hope; F. B. Mewborn, '24 Textile, who is now in the salesmanship game at Grifton; F. I. Brock, '25 Business, who is selling Fords in Trenton; J. L. Higgins, '24 Civil, who is selling Hupmobiles in Enfield; E. F. Strupe, '23 Agricultural, who is farming at Tobaccolville, and M. D. Clarke, '23 Civil, who is now Assistant Division Engineer for the S. A. L. Railway at Hamlet.

## TRUCKERS' SCHOOL TO BE HELD IN NEW HANOVER

The Agricultural Extension Department of this institution, through the efforts of the county agent of New Hanover County, is planning to hold a two-day truckers' school at Wilmington, N. C., November 5 and 6. It is their plan to offer any assistance they may to the truck growers of Eastern Carolina. Long has a need of such a meeting been felt.

Some of the most well-informed men along the lines of truck growing have been secured as speakers in this school, some or most of them going from our own institution. The main ones are I. O. Schaub, Director of Extension; Dr. R. Y. Winters, Director, Experiment Station; C. D. Matthews, chairman, Department of Horticulture; Robert Schmidt, Specialist in Vegetable Research; G. O. Randall, Extension Horticulturist, all of N. C. State College; A. E. Mercker, Fruit and Vegetable Specialist, N. C. Division of Markets, and H. H. Zimmerly, of the Virginia Truck Experiment Station.

One of the purposes of this meeting is to bring to the growers some of the latest and most valuable experimental data of practical value pertaining to the production of truck crops. Mr. Schaub will speak on the subject of Extension Work in Relation to Truck Growing. Through this discussion will be made plain to the growers that the Extension Department

will be in position to render them direct assistance in solving any problem that may arise.

What good is our Experiment Station here going to do if the farmers from over the State don't ask for help?

## KIWANIS CLUB ADOPTS TUNE OF COLLEGE SONG

The tune of "State College Keep Fighting Along," the football song written by "Ditty" Ray, and known so well to the State College students and to the people of Raleigh, has been chosen as the tune of a new song of the Raleigh Kiwanis Club, and was sung for the first time at the weekly luncheon of the club last Friday.

"Kiwanis Keep Building Along" is the name of the new song. The singing was led by H. P. Williams, a member of the club and an instructor in the department of Mathematics at the college. Perhaps it was due to the large number of men connected with State College that the tune of our song should be chosen by the local Kiwanis Club.

The members of the State College student-body would get some very good pointers on the way the song should be sung by hearing it sung with such real enthusiasm as by this organization.

## "ALL-AMERICAN TEAM" PLAY NATIONAL GUARD

N. C. State's All-American Scrubs will make their first gridiron appearance of the year when they play the New Bern National Guard team at New Bern this Saturday. The Guards are said to have a fast and tricky team, composed of former college players and high school stars. The State machine is in fine shape, having been in training since the opening of the season, and has furnished some stiff opposition for the varsity.

The scrubs have plenty of scrap and determination, and will put up a good game, for they realize that the experience gained in these contests will give them a better showing for the varsity late in the season and next year. The team they meet this week will most likely use successful plays of former college outfits, which will be good ones to learn and use.

"Dutch" Holland, former backfield star of the Wolfpack, is coaching the "All-Americans" and will be in charge of them on the trip. Those making the trip will probably be Crisp, Mooney, Bristow, Baum, Shuford, Watkins, Shelton, Frazier, Ridenhour, Crum, Biggers, Nicholson, and Henghan.

## TAG FOOTBALL RULES AND WEEK'S SCHEDULE

The first Intramural League of the fall term will start Monday, October 26th, when the first games of the Dormitory Tag Football League are played. Tag football is a new Intramural sport for State College, and one that promises a great deal of interest and enthusiasm. Every dormitory has indicated a desire to have a team, with 1911 having two, one made up of the south end and the other from the middle and north end.

The rules governing tag football are the same as those governing the regular varsity game, with the following exceptions:

1. Instead of actually "tackling" the man with the ball, he is considered "down" when "tagged."
2. Blocking, either in the line or for interference, must be done with both feet on the ground. (You cannot leave your feet as in the varsity game.)
3. Every man on the team is eligible to receive a forward pass.

These changes in rules do not limit tag football to a "passing game," as very effective blocking can be done while the blocker is still on his feet. It requires the use of signals and plays the same as regular football, with even a higher premium on double- and triple-pass plays.

Every one is eligible to compete on his dormitory team, with the exception of varsity football letter men and men on either the varsity or Freshman squads. If a student was on either of these two squads Monday, October 20th, he will be ineligible for this league.

The schedule for the first week is as follows:

Monday, October 26th—1911 (S. E.) vs. Watauga.

Tuesday, October 27th—5th vs. 7th.

Wednesday, October 28th—6th vs. South.

Thursday, October 29th—4th vs. 1911 (N. E.)

## Chemical Picture At "Y"

Monday night the Chemical Engineering students entertained the students of the college with a moving picture film of the manufacture of steel. This film was provided by the Bureau of Mines. A very large attendance enjoyed this picture at the "Y." It is proposed to present pictures of chemical industries every two or three weeks during the year for the free entertainment and instruction of students and faculty. The public is cordially invited to see these pictures as presented.

Grace, eighteen-year-old daughter of Mrs. Wooten, invites her sweetheart, a young preacher, to dinner. When all were seated around the table, Grace's little six-year-old brother, Billy, was still talking.

Preacher: Now, Billy, put your head down. I'm going to ask grace.

Billy: Oh! We have been expecting that for a long time.

An old colored woman lost her husband and was wearing mourning. Her mistress came in one morning to find her making undergarments of black.

"Mirandy," she said, "why are you making all your clothes black?" "Cause, missus, when I mourns, I mourns through and through," said Mirandy.

He stood there by the window  
As he watched her bathe — —  
His heart kept beating faster  
As he watched her bathe — —  
(Instructions: Fill in spaces with "her dog.")

College Youth (standing on the corner): Could you give a poor cripple enough for a cup of coffee and a sandwich?

Good Old Lady: Why, my poor lad; how are you crippled?

College Youth: Financially.

Cliff: "What do you think of Czecho-Slovakia?"

Keys: "Well, it's hard to say."

# Student Conference Be Held Discuss World Court Problem

Purpose is to Create Interest in Issue Which Will be Brought Up in United States Senate on December 17th; Conferences to be Held Simultaneously Throughout Entire Country

(By H. E. Springer.)

Student conferences are to be held throughout the United States during the next two months for the purpose of discussing, with a view to creating an interest in, the World Court issue, which is on the calendar of the United States Senate for December 17th. At that time the Senate will decide whether or not it is in favor of the United States entering the World Court.

The conference at which the college students of North Carolina will consider this question is to be held at an early date, the exact day and the place to be announced later. Members of the faculties of the colleges will be urged to sit in on these conferences in order that they may continue the discussion in the classrooms. Definite information concerning this student and faculty conference will be available in a few days. Other conferences for the discussion of this important issue by Southern students will be held at Lynchburg, Va.; Atlanta, Ga.; Danville, Ky.; Chattanooga, Tenn., and Jackson, Miss. Similar assemblies or conferences of American students are to be held throughout the United States.

It is a significant fact that a group of prominent men and women, some in favor and others against the entrance of the United States into the League of Nations, recently met together, agreed and mapped out the following program:

"First, that the United States should enter the World Court immediately on the basis of the Harding-Hughes-Coolidge reservations; and secondly, that the adherence to the Court Protocol beyond five years be conditioned upon the acceptance by the other nations of the world of the basic principle of the outlawry of war."

Two questions arise concerning this program: First, will the United States Senate act favorably upon the issue of the World Court when it comes before them December 17th; and secondly, if adopted by the Senate, is it probable that the various nations would fulfill the specified conditions within the five-year period?

Kirby Page, in his article "The Harmony Peace Program," in the October number of "The Intercollegian,"

says: "There is an abundance of evidence to indicate that the nations would eagerly fulfill their part of this plan if thereby they could be assured of the full co-operation of the United States with the World Court."

"The answer to whether the Senate acts favorably on the issue or not depends mostly on the amount of public opinion generated between now and December 17th, and also partly upon the decisions made by the leaders of the Republican party."

"Chinese, Hindu, and other thinking students the world over are more and more shaping and influencing the policies of their governments. In this respect they are far ahead of the American students. Are we indifferent? Are we disinterested; or do we lack information?"

Now is the time to correct this by making a sane, reasonable, and non-partisan study of this World Court issue. We American students can create student opinion on this real, definite, and tangible issue which faces the Senate December 17th. Regardless of the action which may be taken by the Senate, however, it seems unmistakably clear that the World Court student conferences will afford a great opportunity to us as students to focus our attention upon the whole question of the United States in its relations to international affairs and to see what we can do to have a more active participation in public affairs.

A group of Chinese boys were discussing the relative merits of the two billboards, one advertising Carnation Milk and the other advertising Bull Durham. One of the boys was explaining the signs to the others in this way: "In America they have he cows and she cows. The she cows give milk and the he cows give tobacco."

Two Irishmen were waiting at a corner with a shotgun to shoot their landlord, whom they expected to arrive in a few minutes. Patiently they waited, five, ten minutes—for a whole half hour. Finally, his patience exhausted, Pat turned to Mike and said: "B'Gorry, Mike, I hope nothin' happened to 'im!"

In England they never show comedies on Saturday night. They are afraid the worshippers will start laughing in the church on Sunday.

Jimmie Green: I heard a ghost story the other night. By jove, it made me start.

Elizabeth: I wish I knew it.

### Do You Know? "HOW TO STUDY"

The Students' Hand-Book of Practical Hints on the Technique of Effective Study

by  
WILLIAM ALLAN BROOKS

A GUIDE containing hundreds of practical hints and short cuts in the economy of learning, to assist students in securing MAXIMUM SCHOLASTIC RESULTS at a minimum cost of time, energy, and fatigue.

ESPECIALLY RECOMMENDED for overworked students and athletes engaged in extra curriculum activities and for average and honor students who are working for high scholastic achievement.

#### Some of the Topics Covered

- Scientific Shortcuts in Effective Study.
- Preparing for Examinations.
- Writing Good Examinations.
- Brain and Digestion in Relation to Study.
- How to Take Lecture and Reading Notes.
- Advantages and Disadvantages of Cramping.
- The Athlete and His Studies.
- Diet During Athletic Training.
- How to Study Modern Languages.
- How to Study Science, Literature, etc.
- Why Go to College?
- After College, What?
- Developing Concentration and Efficiency.
- etc., etc., etc., etc., etc.

#### Why You Need This Guide

"It is safe to say that failure to guide and direct study is the weak point in the whole educational machine."—Prof. G. M. Whipple, U. of Michigan.

"The successful men in college do not seem to be very happy. Most of them, especially the athletes, are overworked."—Prof. H. S. Canby, Yale.

"Misdirected labor, though honest and well intentioned, may lead to naught. Among the most important things for the student to learn is how to study. Without knowledge of this his labor may be largely in vain."—Prof. G. F. Swain, M. I. T.

"To students who have never learned 'How to Study,' work is very often a chastisement, a flagellation, and an insuperable obstacle to contentment."—Prof. A. Inglis, Harvard.

"HOW TO STUDY" will show you how to avoid all misdirected effort. Get a good start and make this year a highly successful one by sending for this hand-book and guide NOW.

You Need This Intelligent Assistance

## Kampus Komics

Woman on Boat: Oh, Captain, I'm getting so seasick I don't know what to do.

Captain: Don't worry, ma'am; you'll do it.

"Have another cocktail, Georgsh?"  
"Thanksh—no—Uh've had twelve—hic—an I'm shooperstishus."

"What denomination are you?"  
"Oh, which church is fixing to have a party?"

He: "Won't you sit in this chair?"  
She: "After you."

Coach: What are your habits at night?  
Pete: Pajamas.

She: "What color do you prefer for brides?"  
He: "White is my first choice."

She (cooly): "But Sam, you are sure you love me?"  
He: "Well, what do you suppose I'm doing, trying to wrestle."

"Changed your bed linen yet, Roomie?"  
"Heck no; 'tain't worn out yet."

Actor: "I don't believe I deserved to be hissed at."

Manager: "Probably not, but eggs are so expensive."

"Oh, darling, I'm so glad you've come. We heard that some idiot had fallen over the cliff, and I felt sure that it was you."

Jinks: "I'm a man of few words."  
Smith: "Shake! I'm married, too."

#### In the Seaside Library

"Have you enjoyed 'Crabbe's Tales'?"  
"Crabs have no tails."

"Oh, I should have said, 'read Crabbe's Tales.'"

"Red crabs have no tails, either."

The young son came running madly into the house, and dashing over to the book case he began throwing volumes right and left.

"Where's that book tellin' how to swim?" he cried.

"What do you want with it?"  
"Pop needs it—he just fell in the river!"

Mary: "What's the surest cure for love at first sight?"

Alice: "Another look."

"Say, waiter, I ordered corn."

"Sh; there's a prohibition officer at the next table."

#### Her Error

He had spoken to her on the street, and she was properly insulted.

"I don't know you from Adam!" she exclaimed indignantly.

"You ought," he retorted mildly; "I'm dressed different."

"You remind me so much of Moses."

"Howzat?"  
"You open your mouth'n the Bull rushes."

"Well, I guess I'm 'It.'"

"Why so?"  
"I parked my car wrong, and a cop tagged me."

Lawyer: "Where were you on the afternoon of the sixteenth?"

Defendant: "With a couple of my friends."

Lawyer: "Thieves, probably."

Defendant: "Yessir; lawyers, both of them."

City Boarder: "I suppose you hatch all these chickens yourself?"

Farmer: "No; we keep hens for that purpose."

Prof. Aderholt: "Did you have words with your wife?"

Prof. Yoder: "Yes, I had words but no opportunity for using them."

Geo: "Yes, I'm making a study of you."

Jill: "Do you think you'll ever have a good grasp of the subject?"

"Tis better to have loved and lost Than to get married and be bossed."

#### Satisfied

"What did King Darius say when he found that the lions hadn't harmed Daniel?"

"Such popularity must be deserved."

## POWER AND PROGRESS

The following significant statements about power and industrial and social progress in the United States are quoted from an editorial in the Electrical World of September 26, 1925:

"Supremacy of this country in world affairs and its present social well-being are based on the use of immense quantities of power. The annual power production of all the rest of the world is less than that of the United States, and analysis shows that power provides the means for our industrial and social leadership."

"But the United States leads the world in economy of production as well as in magnitude of production. Men of the electrical industry have had the courage, initiative and brains to outdistance all their contemporaries

in the effectiveness of their efforts. In the past decade the power produced has more than doubled, but there has been a decrease of 15 per cent in cost and an increase of less than 5 per cent in the amount of fuel used. Today more than twenty American stations can produce a kilowatt-hour for each pound of coal burned."

"Within the past three years American engineers have built plants that show an increased thermal economy of nearly 20 per cent over past practices. This is a greater achievement than had been recorded in the previous fifteen years. Power is rolling along with a momentum that will not be stopped for many years. Its promoters deserve and need the hearty encouragement and support of all industry, for they supply a fundamental aid indispensable to the social and economic progress of the nation."

### Value Of Modern Home Conveniences To Farm Women

Prize-Winning Essay Submitted in Students' Fair Held Last Week

By F. C. WINSTON Senior, Voc. Ed.

One of the main reasons of the steady drift of farm people to the city is the lack of modern conveniences in the rural districts. The farm boys get discontented with the farm at an early age. They go to visit their city friends, and noticing the luxuries and conveniences that are to be had in the city, they naturally have a desire for them on their farm. If these were supplied there would be more farm boys and girls staying on the farm. The percentage of people living in the rural districts is decreasing with each census. Farms are being abandoned and left to wash away or grow up in weeds. The only hope of checking this mad rush to the city is to improve the living conditions of the farmer.

This is a task which the Agricultural Extension Department and Home Demonstration Agents are striving to do. Great progress has been made along this line, but there is still a greater task to be done. The big cry the agent has heard is hard times or the lack of money. The home may be improved gradually, such as building or refurbishing one room at a time, buying one article at a time, or merely the starting of a saving account is a step towards improvement. The cost of improvement is trifling in consideration for the value it will give.

Some women have realized their dream of modern conveniences by first starting a small account. They can obtain money from the sale of home-grown produce, butter, eggs, milk, the sale of flowers, etc. If the majority of women are to have conveniences, this is the way it will have to be accomplished.

The real value of all the conveniences is the prolonged life of the farm woman. The census proves that the life of the farm woman is considerably shorter than that of the city woman. The everyday task of drawing water and carrying it great distances has shortened the lives of many farm women.

Modern conveniences will make the farm woman take a new interest in her work. The work which was drudgery will become a lighter task. It will give her more time to devote to the interest of her children, and will increase her efficiency as a mother. It will make her a better wife; she will be less quarrelsome, for her task will be lighter, and she will go around with a smile on her face. The wife will have more time to devote to outside duties, such as church work, club work, and time for recreation.

The farm woman should study her conditions and strive to improve them. The saying that Heaven only helps those who help themselves is a true one. If the woman does not take the forward step, chances are her conditions will never be improved.

An old-fashioned kitchen can be turned into a modern kitchen at a small cost. Some paint, timber, carpenter tools, and a few hours labor is all that is necessary to remodel the kitchen. Plans for rearrangement can be obtained from the demonstration agent or from bulletins on this subject. An open kitchen can be celled and made a nice room. Here is where the wife spends over half of her time, and she deserves to have a place that she can be proud of.

Some farmers think that their wives do not need improvements in their kitchen. They say that their kitchen is as good as the one that their mother used. They do not stop to think that they are not using the same tools that their fathers used, but have improved their equipment to the greatest extent that he is able. Whenever his wife says improvement to him, the cry of hard times and wait until next year is heard. The cemetery is now full of many wives who died, still waiting for improvements in their kitchens which never came.

The farmer usually hires labor during the rush season. He little thinks of his wife, who has a rush season the entire year round, without any improvements whatsoever to help her in her daily task.

Waterworks and electric lights are two conveniences that can be installed on every farm at a small cost. These may be also paid for at a small month-

Tell me not, Sweet, I am unkind, That from the nunnery Of thy chaste breast and quiet mind To war and arms I fly.

True, a new mistress I now chase, The first foe in the field; And with a stronger faith embrace A sword, a horse, a shield.

Yet this inconstancy is such As you, too, shall adore; I could not love thee, Dear, so much, Loved I not Honour more.

—Richard Lovelace.

C. C. Hilton was visiting friends on the campus this past week.

Bill Shope was in Asheville several days last week.

Mr. and Mrs. J. M. Weaver, of West Asheville, were down with their son, J. G. Weaver, during Fair week.

P. K. Ewell, '22, now located at Charlotte, was on the campus Sunday, with fraternity brothers.

D. R. Pace visited friends in Greensboro Saturday and Sunday of the past week.

J. H. Britt, James Carr, and Leon Carr spent last week-end with relatives in Clinton.

Jack McDowall spent the week-end in Rockingham, N. C.

George Hunsucker was in Hamlet with his family this week.

A. B. Thomas was in Wilmington during Saturday and Sunday.

C. V. Stevens spent the week-end with his parents in Asheville.

"Buc" Christman and Bruce Gorham were in Rocky Mount during the latter part of last week.

Charlie Herrington spent the week-end with his family in Rocky Mount.

Messrs. D. L. Harris, J. S. Frink, and C. L. Straughan spent the week-end with Mr. Harris's parents at Mooresville.

C. R. Prevatt spent the week-end with his parents who live in Penbroke.

P. D. Chamblee spent Saturday and Sunday of last week with his parents, near Zebulon.

Messrs. John Henderson, James A. Williams, Carl Blackwood, and Dewey Lawter came over from "Carolina" on Wednesday of last week to pay D. R. Pace a visit and to witness the State-Carolina football game.

Earl Turbyfill and Otis Stroupe are planning to visit friends in Greensboro this coming week-end.

J. B. Maness visited his parents near Star last week.

R. R. Jackson, of Wake Forest, visited his brother, C. W. Jackson, and witnessed the game Thursday of last week.

Doyle and J. C. Early, of Wake Forest, came to witness the State-Carolina game and to visit friends on the campus.

Mr. Allarde Case and family, of Hendersonville visited their son, W. N. Case, Thursday and Friday of last week.

F. D. Jenkins and C. V. Stevens motored to Asheville for the week-end.

ly payment that the farmer will hardly miss. These improvements alone will improve the value of the farm, make living conditions more healthful, make the house feel more like a home than a shelter in which to live and eat in. It will make the entire family take more interest in their home life.

Success is said to be inspiration mixed with perspiration. If the farm girls had conveniences at home that would inspire them to take an interest in their home work they would be very glad to help their mothers in their daily task. Without inspiration very little perspiration is lost, so the

girls do only what they are bound to do. Running water may be supplied by the use of a hydraulic ram whenever this is practical. This is the cheapest source of running water known. The cost of installing a ram is less than \$100. The value of running water is many times more than the cost of installation.

### FUNDAMENTAL OR MODERN MORALS

The college year brings to us the never-answered question: Just how wicked are the boys and girls, and are they getting better or worse?

Since Abelhard's French followers gathered about him in the first university, sympathetic sisters of both sexes with eyes out for scandal have taken interest in the collegiate youth. Others, as self-appointed missionaries, have aided the idea that young men and women, leaving the protection of home and entering college, tread in the devil's territory.

Badness has its ramifications. There's smoking, petting, boozing, cheating, and others. In some eyes, bobbed hair is the badge of abandon,

just as the anklet worn by the French lass is the sign of the courtesan. But the vogue for abbreviated tresses, barbers seem to agree, is falling off, yet a number of ears are being exposed, a la Swanson.

Boozing is more serious. The University of Texas has taken drastic steps to keep students from partaking. Every case of intoxication at university dances must be reported by the manager, and—evidently in contemplation of a brisk business—special blanks are provided by school authorities for this purpose.

Smoking by the ladies is fairly well established, but even yet the question is tossed about. Vassar seems to be the storm center. Says The Vassar Mirror: "A recent questionnaire reveals that almost half the student-body uses tobacco. . . . Of course the girls are rebellious against the restriction of their independence. If they wish to smoke, nothing should prevent them. The majority of the parents registered disapproval, but how much does a parent's opinion matter?"

Regarding a report of girls of the University of Illinois smoking on the campus, The Indiana Daily Student says: "All this fumadiddle is a vast

amount of tweedle-dee and tweedledum. . . . If the women wish to smoke, let them be the ones to be sorry if the habit gets them."

The Indiana Alumnus speaks about general behavior: "The morality of the student-body of any university is higher than that found in the average town of the same number of persons." And Dean C. E. Edmington, Indiana University, says: "I know of a great many things college students do, but no one can convince me they are going to the devil."

On the other hand is the assertion of E. R. Wright, of Chicago, that universities are "dens of vice" and should be burned to the ground before more money is spent by people for their sons and daughters to learn immorality.

"Meet the Challenge," exhorts The Highlander, of the Baptist Des Moines University. "Petting, booze and automobiles are carrying them over the precipice. . . . Is that true of Des Moines University? Let us look these things squarely in the face that are carrying—if not us—perhaps our best friend over the precipice. Am I honest? Am I clean? Am I dead in earnest with some great moral purpose?"—From the American Campus.
