COLLEGE JOURNALISTS MEET CHAPEL HILL IN SEMI-ANNUAL SESSION

Delegates Will Arrive Thursday Afternoon and Hear Address by Lenoir Chambers

FORMAL OPENING FRIDAY

Opening Address Will be Delivered by President E. G. Moore of "The Technician"

Beginning on Thursday, November 14, and continuing through Friday and Saturday, the North Carolina Collegiate Press Association will meet in Chapel Hill for the seventh semi-annual meeting. The association is composed of the newspapers and magazines of the colleges of the State. For the first time the annuals will also be represented, and it is very probable that some action will be taken to include these publications in the association.

The delegates will arrive on Thursday afternoon and will attend the first meeting at 8 o'clock in the evening, when Lenoir Chambers, of the Greensboro News, will make an address. The meeting will be formally opened Friday morning by an address from the president, E. G. Moore, editor of The Technician. His subject will be "Freedom of the College Press." Following this, a general business meeting will be held and reports received from the publications. A feature of the program for the day will be a visit to the Journalism Class of Prof. Gerald Johnson.

Group discussions will be stressed probably more than ever before. Time has been allotted for this purpose on Friday afternoon, and also Saturday morning. The purpose of the organization is brought out very effectively in these group meetings. Here the problems of the journalists are taken up and freely discussed. Among these are means of financing, matters of policy, and kindred subjects.

The social features of the gathering are being looked after by Mr. J. H. Lineberger, chairman of the Publications Board. This organization is host to the delegates, and has planned a banquet for Friday evening to be followed by a dance. On Saturday afternoon the Davidson-Carolina football game will furnish amusement, and the convention will end with a dance on Saturday night.

The officers of the Press Association, besides the president, are: W. E. Milton, of Davidson, first vice-president; Eleanor Vanneman, of N. C. C. W., second vice-president; Ruth Efrid, of Salem College, secretary; Dixie Hines, of Greensboro College, treasurer.

APPLE JUDGING TEAM DOING HARD TRAINING

Several men are working hard at the present time, training for the apple judging team which will represent State College this year at the National Apple Judging Contest.

From this group the three men who make the best showing on the final tryout will compose the team. The place for holding the contest this year has not yet been decided.

The team is being coached by Prof. C. H. Matthews. The men trying out for the team are: T. H. O'Quinn, R. S. Gaston, E. B. Cameron, R. E. Reel, G. B. Cline, Charles Lamb, J. F. Long, and J. B. Leonard.

M. W. Long, J. G. Weaver, and J. B. Slack, who made the team last year, are also training with the team, but are ineligible for the team this year.

These men are working hard and putting into their training the kind of interest that brings success.

Professor Matthews says he never saw a more enthusiastic class in Horticulture.

MANY STUDENTS STUDY TOGETHER AT CONFERENCE

Ten Men From State College Go to Duke University For Discussion

"Are we thinking as students in terms that are creditable to college students, about what is considered the big issues that confront the world today?" was the subject considered last week-end at Duke University. A delegation made up of students, men and women, of the black and white races met in conference to discuss the matter of the United States going into the World Court.

This conference was one of several that are to be held by students of the entire country before December 17, when the United States Senate will bring up the question of the World Court for debate. The goal is to make student opinion register in favor of the court.

The conference was made up of about 125 delegates, the discussions were led by prominent men in the field of international relations—Dr. Russel of Swathmore College, Swathmore, Penn.; Dr. Josiah Morse of the University of South Carolina; Kirby Page, author of "Imperialism and Nationalism"; Pay Veatch, of Council of Christian Associations, and Prof. McIntyre of N. C. State College.

Kirby Page spoke at the Sunday morning meeting and again in the afternoon. He is probably one of the best informed men on international problems, and is an ardent supporter of any movement that tends toward world peace. Mr. Page clearly showed how the economic forces of the world trade draw the different nations of the world into one unit. Economically, we cannot exist without each other.

There is another great force which tends to pull the nations apart, and that force is "nationalism." He defined nationalism as a sentiment and quoted an authority as saying: "Nationality, like religion, is subjective; psychological; a condition of mind; a spiritual possession; a way of feeling, thinking, and living." Mr. Page showed that national boundaries tend to become international barriers and that the peoples of the various nations are taught that they are different from and, of course, superior to other people. This leads to fear, suspicion, and hatred. Therefore, one of the major consequences of economic interdependence and political division is imperialism, and imperialism leads to militarism, and militarism leads to war.

The entry of the United States into the World Court is no assurance that wars will be no more, but it is a forward step in the direction of world peace, and every student in the United States should give time and thought to the matter before it comes up in the Senate.

State College had ten men at this conference.

Great Improvement On College Campus

Professor C. L. Mann Tells How City and College Should Co-operate in Constructing Roadway

The College campus is beginning to shape up in appearance, in keeping with the plans prepared about a year and a half ago by Mr. Warren Manning, landscape architect of national prominence. The execution of these plans has been conducted by Mr. Cox, a graduate in Civil Engineering of this College. Up to right recently it looked to the ordinary observer that the work being done on the campus was entirely destructive, rather than constructive. A little investigation, however, shows that all this tearing up was necessary in order that improvements made in the future might remain permanent. This necessitated the relocation, design, and the building of new water

(Continued on page 5.)

Baptist Hold Annual Meet Chapel Hill

Dr. George W. Truett and Dr. W. L. Poteat Are Chief Speakers; Many Raleigh People Attend Meeting, Which is Held in Chapel Hill Church.

The annual North Carolina Baptist Student Conference, held at the Chapel Hill Baptist Church, proved to be a huge success, from both the educational and social standpoint. Great hospitality was shown to all the delegates by the people of Chapel Hill and the students of the University of North Carolina throughout the entire conference. The young ladies were put up in homes and at the Woman's Dormitory, while the rest of the delegates were assigned to different dormitories, some staying with friends on the campus. The conference met three times a day while in session, at Swain Hall, where every college represented was given a chance to "Crow" for itself in the way of cheers and yells. Although the delegation from State was small, the volume of the noise from the yells and cheers stood out. Our N. C. State College banner was hung in the most conspicuous place in the church.

The main speaker on the opening night of the conference was Dr. Geo. W. Truett, from Dallas, Texas, who spoke on the "Authority Sufficient and an Adequate Response," before a large audience. Many of the residents of Raleigh were there, taking in this vital message from one of the world's outstanding Baptist preachers. He spoke again, on Saturday, on "The Kingdom of God Cometh Not by Observation." Among the other noted speakers were Edwin S. Preston, from Marion; Dr. J. W. Cammack, Birmingham, Alabama; Dr. W. L. Poteat, of Wake Forest, and Dr. J. E. Hicks, from Baltimore.

(Continued on page 5.)

FRATERNITY MOVES OFF STATE CAMPUS

Regarded as Beginning of New Departure in Life of College

A movement has been started which marks the beginning of a new departure in the life of N. C. State College by the moving of the Kappa Iota Epsilon fraternity from its quarters in Seventh Dormitory to the M. A. Moser residence at 1710 Hillsboro street. Other fraternities at State College are planning to follow this movement.

The Moser residence is a twelve room structure, and will comfortably house the fraternity which at present has 14 members. The house has been leased for two years. Later the fraternity expects to build its own house.

Dr. Brooks and members of the faculty have heartily endorsed this movement and their cooperation is making it possible for other fraternities to live in houses off the campus. Dr. Brooks, in a recent chapel talk, expressed confidence in the fraternal N. C. State.

Already many useful gifts have been received from friends of the fraternity who live in the city and who are anxious to see this movement advance.

The Kappa Iota Epsilon fraternity is a local fraternity which was organized in 1919.

The present members of the fraternity consists of the following boys from various parts of North and South Carolina: R. T. Green, J. C. Powell, R. C. Holland, W. P. Shuford, C. L. Shuford, J. L. Campbell, V. H. Merritt, A. F. Jordan, A. D. Fonville, W. A. Newell, J. C. Kinloch, W. W. Shope, E. P. Meredith, and G. A. Stradley. Faculty members who live in the city are Capt. John H. Gibson and E. H. Hostettler.

LA FORREST SWAN TO LECTURE HERE NOVEMBER 16 - 17

In Dr. Swan, the Y. M. C. A. Brings Man of Exceptional Ability

Dr. E. L. Swan, of the American Social Hygiene Association, will lecture at State College November 16-17, under the auspices of the Y. M. C. A. His topics will be "Social Hygiene" and "The Sex Factor in Human Life."

Dr. Swan's opening lecture will be in chapel Monday, November 16th, at 12 o'clock. Some of the night lectures will be illustrated by moving pictures and slides. The illustrated lectures will be given in the Y. M. C. A. Auditorium. In addition to his lectures, Dr. Swan will probably be available for meetings with groups and for personal interviews.

Dr. Swan comes to us with high endorsements from schools, colleges, and welfare organizations. We quote from Mr. Raymond B. Fosdick, of New York:

"I most heartily endorse the educational work which Dr. Eugene L. Swan is carrying on in connection with the American Social Hygiene Association. During the war Dr. Swan was attached to the staff of the Commission on Training Camp Activities, of which I was chairman, and his heart-to-heart talks with the men in the training camps on questions of social hygiene, were enthusiastically received. It is always difficult to talk to young men on this subject without seeming to be puritanical and prudish and I was a little uneasy when Dr. Swan first started his tour of the camps. The reports from the commanding officers, however, were immediately reassuring and Dr. Swan's services were in constant demand throughout the war. He has a special gift for talking to men, and I am glad that the American Social Hygiene Association is extending the field of his work and influence."

The American Social Hygiene Association offers the following reasons for promoting Dr. Swan's lecture tours:

"Among the forces which mold personality and character, none is more important in its potentialities for producing happiness or unhappiness than the sex instinct. Yet none is more widely misunderstood and neglected in the education of young people.

"To give youth an understanding and appreciation of this fundamental instinct, to help them direct and adjust their emotional life towards the greatest human happiness—these are responsibilities which educators are gradually acknowledging.

"In his talks with students, Dr. Swan has, as his objectives, two things: First, to educate to an appreciation of sex, and second, to show how sex may be used for individual development and social good."

The Y. M. C. A. Cabinet feels that they have been very fortunate in securing Dr. Swan to present this important subject.

Pecan Growers Will Gather Here Nov. 14

Mary Authorities on Horticultural Conditions and Possibilities Are on Program

The North Carolina Pecan Growers' Society will meet here on November 13 and 14, according to a statement by Prof. C. D. Matthews of the Department of Horticulture. A very attractive program has been arranged, including talks and experiences of the practical pecan growers and talks by a number of invited speakers from out of the State. A full attendance of all pecan growers over North Carolina is expected. The society has laid aside over \$40 to be used as premiums for the best pound exhibits of nuts to be shown at the meeting.

One of the most interesting features of the meeting will be an address by Russell T. Edwards, of the

(Continued on page 5.)

WORLD COURT ISSUE FEATURE OF ADDRESS AT COLLEGE ASSEMBLY

First Assembly Period of Series Stressing International Current Events

PROBLEM BEFORE SENATE

Arrangements Have Been Made to Get Many Prominent Speakers in Future

Dr. Brooks' plan to bring the students of State College into a closer relationship with current world events was successfully launched by the address of Dr. C. C. Taylor, Dean of the Graduate School, to the assembled students Wednesday on the subject, "The United States and the World."

The exercises were opened by a band concert. The students were delighted with the rendition of a march and a popular selection, the chorus of which was sung by the bandmen and which called forth two encores. "Shout, State!" was then played, the student body singing when the chorus was reached.

A few introductory remarks were made by Dean Cloyd and then Mr. J. P. Shaw, of the Senior Class, a delegate to the Student Conference at Duke University, told of the object of student conferences being held all over the country. At State College the chief plan is to hold a student forum for six consecutive Wednesday nights at 6:30 o'clock. There will be several books in the library on world problems and the question of the World Court, which is to be taken up by Congress on December 17.

In the further carrying out of Dr. Brooks' plan, said Dr. Taylor, arrangements have been made for several speakers, some of whom are outside the school, to make addresses to the student body. Men very prominent in the political world are among this number.

There are forty-eight nations in the World Court, said Dr. Taylor, and only fifteen are outside. In the latter number are included four of the major powers. At the last assembly of Congress the House seemed to be in favor of the United States entering the World Court and voted to that effect. The Senate, however, failed to follow the lead of the lower House, and the United States remained out of the court. What the Senate will do at the next meeting will depend upon public opinion.

In naming some of the world-important questions, Dr. Taylor spoke of the Greco-Bulgarian crisis; the trouble of France and Spain with the Rifians; the conferences in this country on the payment of war debts, and the great increase in the price of auto tires caused, according to Secretary Hoover, by the British monopoly on raw rubber.

We live in the world and not apart from it, therefore our policy of isolation will not hold very long. All our supplies and necessities come from all the ends of the earth, and this it is extremely evident that "we depend upon the world in which we live."

The student at a technical school has little opportunity to know world problems in the study of the regular curriculum, and it will be to the advantage of all that the lecture courses are to be given in chapel.

CERAMIC SOCIETY MEETS IN Y. M. C. A.

The Student Branch of the American Ceramic Society met Tuesday night in the Y. M. C. A., where a very interesting program was conducted. The main speaker of the evening was Professor Greaves-Walker, who spoke on "The Technical Man in Industry."

Stanton Hardee, the president of the society, told about some of his interesting experiences while working this summer.

One more defeat for the Wolf-pack.

If it just had to be done, we are glad it was Davidson that did it.

As long as our team shows the fighting spirit we have no complaint to make. Win or lose we are with you regardless of the outcome.

Sometimes students get the idea that certain athletes do not observe training rules. Sometimes these students have mighty good reason for this belief.

If athletes were paid for their services, then the coaches could demand that training rules be enforced. Presumably the colleges do not approve of this practice.

Usually when a team loses consistently many theories are advanced to explain the cause. The remarkable thing about this is that hardly ever is the truth found among this assortment.

As usual, when a team loses a few games, many students are asking "What is wrong?" Well, that is a question for discussion, but it is much easier to yell your head off for a team that is winning than for one that loses.

If you desire to read an article with a kick to it then turn to the Student Forum of this issue and find the article on the modern girl. Please remember that this column is open to all students and do not hold us responsible for any unusual theories expounded. We wash our hands clear of this thing here and now. Girls, please do not blame us.

Anonymous letters are often suggestions of danger, but here is one we received that doesn't look very dangerous:

RALEIGH, N. C.

DEAR EDITOR:

I was reading in your paper of October 23 that your former editor, Mr. Sam Wallis, was still wondering "What Became of Sally." It had given me quite a bit of worry also. I have at last located her. One of the Indians with 101 Ranch told me Monday he had her "Down on the Farm" "In the Covered Wagon" teaching "Peggy O'Neil" how to "Doodle-Do-Do."

Yours till iron sinks,

P. S.—We enjoy reading THE TECHNICIAN.

ANOTHER NEW ONE

Recently five seniors and one freshman who happened to eat at the same table in the dining hall formed a mutual agreement to correct each other when grammatical mistakes were made in the course of conversations at meals. Such a plan should lead to untold benefit to those involved. The results from the first few days have been startling. We know this from personal experience, because "ye editor" is one of the members of the club.

Of course each member has to take his criticisms in good spirit if the scheme is to be successful. It is surprising to find how easy it is to observe these little "slips of speech" if one will keep his mind in a receptive mood.

Now, we wish to offer a suggestion. Why not have more of these clubs? And do not start this thing at the bottom, as so many of our laws try to do. Let it start with the Senior class and work down, as it surely will if the Seniors think favorably of it.

We do not wish to release any college secrets, but it is generally known that the English language fares rather badly around these parts at times. Since the dining hall is a common meeting place for most of us it makes an ideal place to start some reform movements. When several groups have caught the spirit and formed the local clubs then they could bind themselves into one big organization whose name might be "The Amalgamated Society for Prevention of Cruelty to the English Language at State College."

COLLEGES AND CITIES

Recently someone made the observation that the football teams at Duke University and State College were mediocre because these two schools were situated in cities. This is indeed a rather interesting situation, especially to the colleges in small towns. Even though we are involved in this mediocrity we cannot refrain from making a few comments on it.

Just what is the relation between winning football teams and the bright lights? To begin with, it is pointed out that students will seek amusement in town rather than on the campus. It is further stated that college spirit is sacrificed to a large extent on account of the interest which the students have off the campus. These statements are logical and are doubtless true to a certain extent. Yet no football playing has entered the argument so far. If ten or fifteen students go to a show down town tonight is that going to affect the results of the next game? If so, how? The other question concerning that substance called "college spirit" will probably stand a little more analysis if we can be informed just what the term means.

Doubtless any Freshman here could give a demonstration of what he thought the term included. This would be a series of yells and songs. These are used only at athletic events, so why not change the name to athletic spirit. Then we can better understand our positions. The argument follows that if students do not have enough athletic spirit, the team is sure to lose, no matter how good they are. This is the only logical assumption, if we accept the original statements as true. Then, it appears that games are won or lost by the student bodies and not the teams. And the reason the student body does not have enough athletic spirit is because a city is too close by.

If the above reasoning is sound we would like to know how a team could ever be expected to win a game away from home. How is it that colleges, such as Georgia Tech, which are located in cities, happen to have such good teams? What do they do to their student body to make it have enough "spirit" to beat Penn. State?

No, dear reader, yelling is at all right in its place. So is athletic spirit. But games are won or lost by teams. We are not condemning the "pep" meetings which are held to generate athletic spirit. Certainly they can do not harm and

they often do much good. However, it is not fair to blame Raleigh and Durham because the teams of State and Duke are not up to par. The cities do more than offer inducements to college boys to spend their money. They are handy to have around to furnish patrons for the games. They help all worthy student enterprises, and if they do steal a little athletic spirit they do not put the jinx on anyone and cause him to lose a game to a rival that is not his equal.

So let us be more charitable toward the cities. They are not responsible for our failures. We should look around for a more plausible alibi.

A CASE OF THEFT

It was one o'clock in the morning. The campus was quiet and dark. A spirit of stillness pervaded the atmosphere. Just then a step sounded on the steps of the Y. M. C. A. A figure stealthily entered and paused a moment. Wrapped in a heavy coat it quietly moved to the door of THE TECHNICIAN office. A key was inserted in the lock of the door and it was quickly opened. The figure went inside and closed the door. Supreme quiet again reigned throughout the building. In a few minutes the office door again opened. The intruder carried the object of his midnight visit in one hand and held it near his heart. He was none other than the editor, who had just returned from a trip with the band. During his absence the papers for the current week had been delivered and he was forced to steal one from the pile which the circulation manager had carefully laid away with warnings not to touch, in order to satisfy that desire that is known only to those who follow collegiate journalism. About the only reward they get is the satisfaction of looking over the sheet each week while it is fresh from the press.

Our opinion is that we will live through the chaos. However, it will be rather hard on those who are nurtured by "college spirit."

Evaporated Bull

New Version of Football

Football is just a high-brow crap game. Full of points and passes. If you throw seven, you are a hero; if seven throws you, a corpse.

A crap game nearly always breaks up in a fight and a football game starts with one. The game is played by twenty-two men, Red Cross squad, and an ambulance. The teams train on brick pavements so they can take off all the skin necessary to make the weight, with little effort.

Some of the men wear a hard rubber nose-guard. It fits over the nose and has a bit that is held firmly between the teeth and works as a lever, so that an opponent can kick out the front teeth of the wearer without spraining his ankle.

Other members wear a pad on the top of each shoulder which enables the player to stand on either side of his face so that the rest of the bunch can grab him by the feet and twist off either ear without undue exertion.

The preferred method of attack is to get one of your side to distract the attention of your intended victim; the aggressor then gets back to the graveyard line, bends forward at the waist at an angle of fifty-one degrees, Fahrenheit, takes the run at top speed, and butts his head in the opponent's back at the equator. If he hits just right, he breaks the victim's back, and that counts five; if he strikes too low, he breaks his own neck, and that counts ten in the red, and his side has to start over again.

After one grand massacre at Centennial Field, I noticed one poor fellow who had been proud and dignified all through the riot, on his hands and knees, trying to pull his face out of the mud. From where I sat I could tell that he hadn't lost his pride for I could see that his disposition was stuck up. I was worried over him and was looking to see why the Red Cross Corps didn't rush up with the first aid.

Just then a young lady sitting next to me slapped me on the back and said: "Oh, look; Clarence kicked his goal." I said: "The helly did! Clarence ought to be ashamed of himself. That fellow couldn't help himself."

This Week's Limerick

by ZIPPY MACK

There were once some Wildcats in their lair,
And some foolish old Wolves went in there;
The Cats raised their back;
The Wolves held the sack;
For their scoring never went anywhere.

Student Forum

MODERN GIRLS

The Plastic Age has revealed the flaws of the modern college boy to the eyes of the world. But it still remains for a courageous writer to reveal the modern well educated, well painted, aristocratic college girl who has plenty of money and good clothes; shows her form to the best advantage; and who can find no desirable young men her equal in her home town. No wonder they cannot find their equals. They died from the bite of a snake, so history relates, after she captured her equal. He was Mark Antony. This started the decline of a mighty empire. Her name wasn't the Queen of Sheba, it was Cleopatra, the Serpent of the Nile. So these little flappers had better think before they leap. They will not wreck a nation, but they may wreck their own lives.

What man wants a painted doll for a wife? Who wants a wife who doesn't know a needle from a T-square, and who needs three servants to look after her? Who wants a wife that thinks more of a poodle dog than she does of her husband, who believes in no God but the god of pleasure, and that throughout the ages she has gradually grown perfect, until she has at last become the rose of the world. If she is the rose, fellow-students, let us look for poison ivy!
C. F. SHUFORD.

WHY THIS ATTITUDE

I ask why is it that the majority of the Agricultural and Engineering students here look upon the courses offered in the Business Administration School as Crips?

This attitude was shown in a paragraph in the Agromeck Yelps column last week. The paragraph stated that some one was contemplating organizing a Crip Club, and if organized there would not be room for all the Business Administration students.

I have taken Business Administration courses with some of the Agricultural and Engineering students and at no time have I seen any of them display any unusual amount of brilliance.

If the average farmer today had the knowledge of business subjects, such as Economics, Business Organization, and Statistics, he could no doubt increase his income materially.

Every person, regardless of his occupation, must transact, in the course of his life, some business. As a result if he is not informed along modern business methods he is the loser.

In conclusion, I will say that it is not up to the average college student to criticize the courses in any of the schools at State College, for they are all here for a purpose.
H. R. FIELDS.

ABOUT LIGHT TROUBLE

Some of our good friends have proven themselves excellent hands at diagnosing the illuminating trouble of the past week, but have gone deep enough to merely discover that the lights really did go out and that approximately 60 per cent of the 200 k.w. rating of the generator was used on the campus.

That's quite right so far; the dormitory why she won't speak to me now?

Football is the survival of the fittest, providing the fittest don't get on the bottom.

It is used to cultivate healthy bodies and to create a demand for wheel chairs. The ball is only an excuse for a fight; a bone would do as well.

I have seen about as good a fight over a football as I have over a woman.—From Rollins Sandspur.

Agromeck Yelps

"If you can read this, you are too damn close," said Jo to Bo, as he read his girl's letter.

FOR SALE—One Senior Ring, or will trade for set of Junior C. E. books.
J. M. POTTER.

Tom Masson says: "Leisure is the mother of rushes." We are always in a mad rush, but know nothing of its mother.

Red fell because he trusted a dead "clinging vine." What would a live one have done? Find the moral.

'Tis said that our laundry has an agreement with the banks whereby the banks wash no clothes and the laundry cashes no checks.

The finished proofs have been returned and students may see them at the Agromeck office, but the proofs cannot be carried out.

We want to find the freshman who bought fish for the College Seal. He is the one who thought a football coach carried two passengers.

We wish to tell the man who sent in Lydia E. Pinkham's picture for his sponsor that it has been refused. The newspaper pictures are too small.

Yes, the Editor spent last week-end in Charlotte, "attending to business." And while he was doing so, the Red Yelper spent his "week-end"—and we don't mean his ankles—trying to write a lot of wise cracks and riding the student body in general. He reminds us of some of the professors we have around here. Furthermore—but the last statement will cover everything, so we will stop.

tory lines drew from 100 to 150 amperes lately, but through fuses of 75 amperes capacity, designed to take care of a load resulting from the use of approximately one lamp per room.

Since this load has doubled at times, due to excessive fixtures placed in the rooms, one cannot expect anything else than fuse trouble to result.

This trouble has been met the best way possible by patching old fuses until new ones of the proper size could be obtained, and if the co-operation of the students can be had in the future to limit their rooms to the fixtures now in use, no further lighting trouble will be expected.

However, fuse trouble should not be confused with the short "switch-over" intervals necessary each night at 11 p. m.

S. E. SHEPARD.

THE RELIGIOUS FORUM

Prof. C. C. Cunningham, Professor of Oratory at State College, will present a dramatic reading of "The Servant in the House" at the Raleigh Religious Forum, Sunday night. The story, based on present-day religious problems, is the best known work of Charles Rann Kennedy.

The musical feature this Sunday will be a concert presented by the Raye Orchestra. The musical program will include:

- Canzone AmorosaNevin
- Ein MarchenBach
- ExtaseGanne
- BarcarolleOffenbach
- MeditationDrumm

We believe that State College students are behind Gus Tebell. We believe he will develop a winning team, if given a chance. As long as our team shows the right spirit we believe the student body will not lose confidence in the Wolfpack, even though they do not win another game this year.

**Forum Discussion
Held In Y.M.C.A.**

**Dr. Taylor and Dean Brown Conduct
Interesting Open Forum on
World Court**

An open forum discussion on the subject, "Students and America's Foreign Policy" was held Wednesday night at 6:30 at the Y. M. C. A., under auspices of the Promotion Force, a campus religious organization, for Sophomores, Juniors, and Seniors. This is the beginning of a series of six open forum discussions on "The Present International Responsibilities of the United States."

Dean Brown and Dean Taylor will lead these student discussions in such a way that the students themselves will do the talking, most of the time. At this first meeting Dean Taylor stressed the point that the students must take part if they desired to get the most out of the discussion. He said, "I am here only to guide your thoughts and to keep you from getting lost on any side issues of the main question."

In this first series of discussions we are studying "What Kind of a World Are We Living In?" which is taken from an outline prepared by "The World Court Committee" of the Council of Christian Associations. Under this topic the first question that was discussed was, in what respect, specifically, does the economic world of today differ from that of 1875? This was studied under four different topics: First, why has the question of rubber and oil become an international problem? This is important, because every nation cannot supply all of the resources it uses, due to geographical conditions. The "Teapot Dome" question arose over naval reserves of oil wells. Now then, England has practically a monopoly on the rubber market of today, while the United States has the monopoly on several commodities. For example, sewing machines, which sell cheaper in foreign countries than at home. This is due to the high tariff, which is the only means the government has to protect the home industries. England cannot control the consuming market, but she can do almost as she pleases with the supply.

Second, what difference does it make to the wheat growers of America whether or not Germany recovers economically? Of course we want Germany to pay us her war debt, but, to do this she must have an open market, through which she can sell her dyes and steel products. And so, Germany is our open market for wheat. The United States can help her regain her normal condition by not raising the tariff against imported goods which she sends here.

Third, why are citizens of the United States now investing a billion dollars a year in foreign countries? This action of our bond merchants proves that these foreign countries are slowly getting back to their normal conditions as before the war. The in-

tegrity of the government make all of our bonds a safe security. For example, the Liberty Bonds during the World War. "These things only go to prove that the people of the earth are inextricably interdependent, economically."

In trying to determine the most outstanding characteristics of the political organization of mankind today, the following questions will be discussed: First, Why are there sixty nations in the world today? Dean Taylor stated that "It doesn't make any difference whether the people of the world today originated by the Garden of Eden or the scientific theory. We do know that human life originated from one stock, which, after many years, became spread over all parts of the earth. Then becoming isolated from each other, by the natural barriers of the oceans and mountains, their language changed. Soon each group in different parts of the earth set up its own code of laws, by which they could live together. Some of the artificial causes of this fact are the present development of different means of communication and transportation."

The next item of importance is that it is generally agreed that a nation has an absolute right, first, to determine its immigration policy; second, to set such tariffs as it deems necessary; third, to maintain as large an army and navy as it desires. "This is called the principle of national sovereignty." Let us now decide just how far "national sovereignty" has an ultimate value. Complete sovereignty at the present time is impossible, for between all nations there must be some sort of an agreement. Japan at the present time is infringing on the sovereignty of China, when she sends immigrants to her sister nation, and taking the Japan flag with them. What would our own government do if immigrants from Russia came over, bringing their "rotten government" with them.

There was not enough time to discuss the last question, which was as follows: What major problems of the world's life result from the clash of economic interdependence and national sovereignty? The discussion was very interesting as many students from the Freshman class up, took part.

**FRESHMAN RULES PASS
HOUSE STUDENT GOV'T**

At a meeting of the House of Student Government, October 29th, a number of new Freshman rules, sponsored by the Sophomore Class, were adopted. Also, an amendment to section 2 of the Freshman Rules was made.

These rules, in order to come into effect, have to be voted on by the student body. As soon as this can be done, the rules will go in force.

The new rules are as follows:

1. All freshmen shall be required to lay both knife and fork on the table and stop eating during the reading of announcements in the dining hall.
2. Freshmen shall be required to wear coats while in Raleigh proper, except while at work.
3. Freshmen shall be required to run errands at the request of any upper-classman, and to give aid when asked, provided it does not work a physical hardship upon them, and they are not on class or studying.
4. Freshmen, except day students, shall be required to attend all college assemblies, and to be present at all pep and class meetings.
5. Freshmen shall be required to be present at all athletic contests held in Raleigh in which State takes part.
6. Amendment to section 2, Freshmen Rules: "Freshmen are required to speak respectfully to all upper-classmen and members of the faculty."

**STATE ENGINEER MILLER
TALKS TO CIVIL SOCIETY**

Mr. H. E. Miller, chief engineer of the State Board of Health, made a very interesting talk at the meeting of the Civil Engineering Society last Tuesday night. Mr. Miller is a sanitary engineer, and he explained exactly what is included under the head of Sanitary Engineering and the relation of Civil Engineering to it. He also discussed the water shortage at Asheville last summer, and how they helped to remedy it by using a filter plant at a swimming pool to purify water for household use. Mr. Miller has a good many State College graduates in Civil Engineering working under him, and he complimented Professor Mann on the good work they are doing.

All C. E. students were invited to hear Mr. Miller, and a good many took advantage of this opportunity to learn more about the practical side of their profession.

**A. I. E. E. GIVES A MOST
INTERESTING PROGRAM**

The A. I. E. E. held its first regular meeting Tuesday night, October 3, giving one of the best programs we have ever heard in the society. W. E. Wilson gave a very interesting biography of J. B. Duke, and E. W. Chadwick talked on the Progress of Illumination During 1924.

Wilson's talk on the life of Duke was well presented and showed that he had put some time and thought to the subject. Duke was born near Durham, North Carolina, in 1857. While a child he had a habit of doing things by himself which seems to have never left him. Whether he was directing a tobacco concern or investigating the hydro-electric resources of the Carolinas, he did things with an eye single to the success of the work for the benefit of the people in whom he was most interested—the people of the Carolinas. We have in the past few years seen how he has lavished his great wealth in the development of the educational and charitable institutions in the State.

Chadwick had a very interesting and complex subject which he presented in fine style. He gave the major developments in the progress made with incandescent lamps in the world for the past year. In large lamps there has been a decided improvement in the design, and a decided increase in sales—over 263,000,000 being sold in 1924. In the smaller line of lamps, the automobile lamp has had much attention. An anti-glare lamp is the ultimate aim of the designers, and much progress has been made along that line.

The program for next time will be one on the resuscitation method of bringing a person back to life after drowning or receiving an electric shock. Capt. Billy Jordan, of the Red Cross, will be present to show and instruct in this method. Also, a

squad of students will be given special training in this in order to put it across to those who do not get it at the meeting.

**TEXTILE STUDENTS SEE
FREE DYESTUFF MOVIES**

A free moving picture show on "The Manufacture of Dyestuffs" was presented in the "Y" auditorium Wednesday evening for the benefit of the students and faculty of the Textile School, and also for the benefit of any other students interested in the subject. A large majority of the textile students and professors, as well as a number of students not in the Textile School, enjoyed the interesting and instructive picture that was shown.

Mr. A. H. Grimshaw, professor of Dyeing in the Textile School, made a short talk concerning the picture just before the picture was shown. He explained how indigo, one of our oldest colors or dyes, is made. He stated that before 1856 the dye manufacturers were confined to animal, vegetable, and mineral matters as sources of dyes. But in 1856 Perkins, an Englishman, discovered that coal tar is a valuable source of dyes. Now, according to Mr. Grimshaw, we have 7,000,000 colors that may be used in the dyeing industry. Mr. Grimshaw also stated that in 1914 the United States used 25,000 tons of dyestuffs, while only 3,000 tons of dyestuffs were manufactured in this country. Now 35,000 tons of dyes are made each year in the United States, while 30,000 tons of this amount are used in this country. At the present time the United States stands second in the manufacture of dyes. Germany still leads all other countries in the manufacture of this substance so valuable in the textile industry. Mr. Grimshaw's talk, preceding the picture as it did, made the picture much more interesting and instructive. The movie showed the home office

building in Wilmington, Delaware, and the large plant on the Delaware River of the E. I. Du Pont de Nemours & Co. The plant used for the manufacture of Du Pont dyes covers two square miles and employs the services of 36,000 workers. The picture showed the various processes used in the making of different dyes. It also showed the laboratories and the chemists working in them. It was interesting to notice that quite a few of the chemists were women. The picture gave a very good idea of how dyestuffs are manufactured on a large scale.

Sweet Little Girl: What time is it?
Joe College: Half past four; it won't be long till morning.
Sweet Little Girl: Goodness, mother'll be worried. I should have been in bed an hour ago.

Ants: Do you want to hear something great?
Law: Yeah.
Anas: Put two bricks together.

**When you
have to
concentrate
on a
heavy theme**

TAKE this tip from Prince Albert: Pack your pipe with P. A. and make fire with a match! That's the formula. Nothing complicated. And it works, it works! Yes, sir! Every jimmy-pipe bowl is a well of inspiration when it's packed with cool, fragrant, soothing Prince Albert.

You'll celebrate . . . and celebrate the discovery. Prince Albert is sure the right kind of pal to tie to. No matter how stiff the grade, P. A. will go right along with you. Can't bite your tongue or parch your throat, because the Prince Albert process won't let it.

Let Prince Albert cheer you with your work. Let it sweep away the mental cobwebs as nothing else can. In all the world of fine tobaccos, there's nothing like friendly P. A. Slip into top-speed now and head for the nearest store where they hand out jimmy-pipe joy in tidy red tins, marked "Prince Albert."

PRINCE ALBERT
—no other tobacco is like it!

P. A. is sold everywhere in tidy red tins; pound and half-pound tin humidors; and pound crystal-glass humidors with 100% moisture top. And always with every bit of bite and parch removed by the Prince Albert process.

Look at the U. S. revenue stamp—there are TWO full ounces in every tin.

SPORTS

Wildcats Beat Wolfpack For Score of 9-0

Davidson Drive in Third Stanza Leads to Touchdown and Victory for Cats

After sixty minutes of furious howling and crying, the Wildcats of Davidson emerged victorious over the Wolfpack of State College by the score of 9 to 0. Richardson Field furnished the battleground for the annual classic between the two institutions, which was a very colorful affair, as Davidson had planned this as their Home-Coming Day.

Both teams put up a fine exhibition of football, battling neck-and-neck through the first quarter, and on into the second period. Here Davidson forged ahead. They got possession of the ball in State's territory. At this stage of the encounter Coach Younger sent in Allen, the boy with the educated toe. Allen went true to form and kicked a field goal, which was all the scoring of the first half.

Davidson received the kick-off in the second half and started a march that ended, after many halts and retreats, in a touchdown at the beginning of the last stage of the game. This was probably the hardest fought period of the game. Davidson used a double pass to gain, though the State line may be credited with this quarter. State's offensives in this quarter were mostly of long passes from McDowall, who threw them with unerring accuracy, but they would not stick in the arms of the State forwards.

Light from many stars could be plainly seen, but the light from Hendrix and Grey was Davidson's greatest illumination. Jack McDowall, State's noted back, furnished the major treat of the day. He got off excellent punts, which were pleasing to watch, and outdistanced Grey of the Felines by many yards.

Line-up	
N. C. State	Davidson
Beatty	Pinkney
Nicholson	Richie
Anthony	Vance
Logan	McConnell
White	Belton
Bynum	Baker
Austell	Bohannon
Thomas	Hendrix
McDowall	Wells
Johnston (C.)	R. Grey
Shuford	Black (C.)

State	0 0 0 0-0
Davidson	0 3 6 0-9

RALEIGH HIGH STRONG MINUS FOUR HORSEMEN

Although crippled from the loss of five men, Coach Ripple's purple whirlwind swamped Wakeland High School here Friday, by a score of 64 to 0.

The team was badly crippled in this game, as T. Bailey, Johnson, Waddell, Bagwell, and Cox were missing. All of these except Cox were ruled out by the rules of the conference, stating that no player can play in the championship games who has played for any other school previous to this year. Cox was badly hurt in the game with Charlotte and can probably play no more this year, his skull being fractured just above his right eye. The loss of these boys was greatly felt but L. Bailey took his twins position at quarterback and the remainder of the holes were filled by equally as good men. The teamwork was good and at no time did Wakeland seriously threaten to score. The local boys scored almost at will and when the whistle blew for the end of the game had piled up 64 points.

J. J. WRIGHT

State cross-country captain, who led the field in the Davidson run last Saturday.

CROSS-COUNTRY MEN WIN OVER DAVIDSONIANS

Captain Wright Takes Lead and Holds It; Place Six Men Out of First Nine

The Red and White colors of State College flew high over the Red and Black of Davidson College in the first cross-country run of the season staged between the two institutions, during the second period of the football game last Saturday, taking the low and winning end of a 21-to-36 score. The points being counted in the order of finishing.

Captain Wright took first place and ran one of the best races of his career. His time for the three miles was 16 minutes and 50 seconds. About fifty yards behind him came Penn of Davidson, who was followed by Nance of State. The others finished in the following order: Fourth, Brimley, State; fifth, Williford, Davidson; sixth, Kendrick, State; seventh, Barnhardt, State; eighth, O'Neil, Davidson; ninth, Rowe, State; tenth, Webb, Davidson; eleventh, Treverton, Davidson.

The start was made at the upper side of the football field, and the finish was on the straight-twty in front of the main bleachers. Wright took the lead from the start and held it throughout the race. Nance, running his first intercollegiate race, made a creditable showing by taking third place. Brimley was handicapped by the fact that he lost a shoe at the half-way point, but he partly overcame this by passing Williford when only a few yards from the finish and thereby took fourth place.

The team made a good showing in view of the fact that Wright was the only varsity man from last year, while Davidson had four runners who had varsity experience. Of the first nine men who came in, six were State men.

1. Necessity knows no law.
 2. A bootlegger knows no law.
- Therefore: A bootlegger is a necessity.

Visitor: Did any member of your family ever make a brilliant marriage?
Professor: My wife did.

He—There is no sweeter place to kiss than this.
She—Go ahead and kiss it—don't mind me.

ON THE SIDELINES

Since we couldn't, we hope Carolina can—lick V. M. I.

—N.C.S.—

The Wake Forest-Duke clash will be interesting—perhaps.

—N.C.S.—

What was wrong with the '29s and the All-Americans last Saturday?

—N.C.S.—

Good luck to the cross-country boys this week. May they do Carolina like they did Davidson.

—N.C.S.—

Brimley must be in his second childhood. He finished the race "one shoe on, one shoe off" fashion.

—N.C.S.—

Soccer Ball started Wednesday. Quite a new and interesting sport for State College.

—N.C.S.—

Fifty prospective wrestlers. Go to it, Red and Sammy, and make a real team out of them.

—N.C.S.—

V. P. I., Wake Forest, and W. and L. Three more chances to keep the season from total ruin.

—N.C.S.—

Well, anyhow, Captain Wright and his distance hounds kept us from getting whitewashed last week.

—N.C.S.—

Last year's Freshies seemed to have Carolina's number. Here's hoping this season's follow suit.

—N.C.S.—

We're sorry rain interfered with the tagball games this week. They were fun to watch and fun to play.

—N.C.S.—

Gus and his "Red Terrors" are engaged in wearing out Frank Tom's floor again. Let 'em wear, though; we don't care.

—N.C.S.—

We quote the N. and O.: "Everybody is glad that 'Red' Grange has finally gotten loose, after weeks of hard luck and defeat. Grange is the most beloved as well as the most spectacular figure on the American grid-iron today."

State Frosh Lose To Baby Deacons

Wake Forest Freshmen Have Slight Edge; Albright Makes Long Run

The Little Deacons of Wake Forest defeated the N. C. State Wolflets 6 to 0 on Gore Field Saturday, in one of the best games there this year.

Wake Forest scored in the second quarter when Zimmerman blocked a State punt on the Wolflet's 15-yard line and Captain Lennon, of Wake Forest stepped over State's goal for the only score of the game.

State threatened Wake Forest's goal in the third quarter when terrific line charges placed the ball on Wake Forest's 11-yard line. The Junior Demos backed up and threw the State back for losses and killed any scoring chances for the Wolflets.

Although Wake Forest's touchdown came after a blocked punt the victory was clearly earned. Lennon, Weis, and Smith; of the Little Deacons, broke through the State line to throw the Wolflet backs for losses. Albright, State half back, broke through the Wake Forest line for 27 yards and the

longest run of the game in the third quarter.

Wake Forest attempted five passes, all of which were grounded. The Wolflets took to the air eight times, two passes were completed for a gain of fifty yards, two were intercepted and four were grounded. Wake Forest made eight first downs to six for State.

RE-ENLISTS IN ARMY FOR FOOTBALL GAME

An unusual incident took place in Charleston, S. C., Monday in a game between the Parris Island Marines and Fort Moultrie. Freddie Paul, star back and coach of Fort Moultrie, was ineligible to play because his term of enlistment had expired. At the end of the first half the Marines were leading, 7 to 0, and Paul was prevailed upon to change his mind. He re-enlisted before the beginning of the third period and was sworn back into the service by Major R. John West, commandant at Fort Moultrie. He played during the entire second half and was the spirit of his team. He had refused to re-enlist before the game started.

The Marines won, 35 to 0.

An ounce of church is worth a pound of court.

Wolves Invade Camp of V. P. I. Grid Artists

Team Tired of Getting Licked and Go North Determined to Show Fight Spirit

The Wolfpack will journey up to Blacksburg, Va., to meet V. P. I. Saturday, November 7.

This game is expected to be very good and there is a chance that the Prairie Howlers may repeat last year's record. The outcome of the game last year was State 6 and V. P. I. 3. The team that will be sent on the field to represent V. P. I. this year will be practically the same team that they marched on Riddick Field last year. They have a very heavy team, the average weight being about 183 pounds.

There are only about three outstanding players on this team. They are Moran, Holly, and Esleek. Moran plays center and is a very good man. He weighs 200 pounds. Holly plays end, and is a very fast man to be as heavy as he is. His weight is about 180 pounds. Esleek plays half-back and he is the best man in the back-field. He weighs about 183 pounds. V. P. I. has a very good defensive team, but that does not mean they do not have an offensive team.

The team that will represent State College will be about the same as in the past, with probably a few minor changes. The Wolfpack is tired of getting licked and are getting hungry for some fresh meat.

State Grapplers Are Enthusiastic

All Letter Men Except Sherman Back to Begin Second Season of Mat Sport

No less than fifty men reported to Coaches Homewood and Hicks at the Frank Thompson Gymnasium Monday evening, Nov. 2, to begin their first workouts for the season with the State College wrestling team. Many more are expected as soon as the football and cross-country seasons are over.

Coach Hicks made a short talk and demonstration about the rules of the sport. He laid much emphasis on the importance of strict training, so that each man may keep himself in the best possible physical condition. In his address he gave an example of clean sportsmanship by recalling the splendid spirit of last year's team.

Several of the men on last year's squad are now out for football and the cross-country team and will report for practice when the season in these sports are closed.

The N. C. State grapplers are beginning their second year with all the letter men back again, except Sherman, and are determined to put up some stiff opposition to other collegiate teams. Both coaches are very optimistic over their prospects for the season.

"RED TERRORS" ARE STARTING PRACTICE

The call went out a few days ago for the "Red Terrors" to assemble and about thirty responded. This is not such a good showing for a student body of fourteen hundred, but there is a large nucleus from last year, and Coach Tebell was able to mould a winning team from the thirty.

Thursday night at the gym the first practice was held. A short talk was made by the coach and then he instructed his men in various fundamentals of the game. These included proper handling of the ball, different types of passes and shots. Then the new men were given a demonstration of the Tech type of passing by the members of the varsity squad of last year. Practice will be held every Tuesday and Thursday night at the gym and Coach Tebell and Captain Dickens will welcome any additions to the squad.

"Laugh this off," cried the chimpanzee as he tied a can to the hyena's tail.

Wolf Cubs Battle Heavy Tar Babies

State Freshmen Will Attempt to Repeat 7-0 Win of Last Year Over University Team

Will the Wolflets be able to do what last year's team did, and win from the Tar Babies 7-0? The showing against High Point two weeks ago was encouraging, to say the least, but the loss last Saturday to the Little Deacons of Wake Forest was not quite so good.

Anyhow, this issue will be decided Saturday afternoon, when the Tar Babies invade Riddick Field. Dedmon, Ellis, Melton, and Goodwin were the outstanding performers for the Wolf Cubs against Wake Forest, and they, as well as the rest of the team, should be in the best of condition by Saturday.

The Carolina Freshmen have a very heavy team this year, and to date have only a fair record. They defeated Maryland Yearlings by a good margin and then in turn were taken into camp by the Little Gamecocks of South Carolina. It is said that the lightest man in the Carolina line weighs 190 pounds, though the backfield is slightly smaller. One of the Tar Baby forwards is about 6 feet 6 inches tall and tips the scales around 240.

SEVENTH VICTORS FIGHTING FIFTH

The second game of intra-mural tag football, which was played by Fifth and Seventh Dormitories, was won by Seventh by the score of 7-0.

The only touchdown in the game was made a few minutes after the start when "Skeet" Green tossed the ball 20 yards to Joe Powell, who was standing back of the goal line. Charlie Seal added the extra point by a well-placed drop-kick through the uprights.

The closest either team came to a score after that was also in the first half, when Red Meredith, playing for Seventh, barely missed a placement kick from the 40-yard line, the ball going just outside the posts.

At no time did Fifth threaten to score, due to their inability to complete passes and to punt out of danger. Several chances to make long gains were missed because of the fact that they were not able to hold the ball.

SIXTH TIES SOUTH IN HECTIC BATTLE

South and Sixth Dormitories played to a scoreless tie in the third tagball game of the intra-mural season Wednesday afternoon on Freshman Field.

South pushed the playing during the entire time and succeeded in keeping the ball in Sixth's territory during most of the game. Completed and intercepted passes were the rule rather than the exception, and many excellent chances to score were lost by the latter route. South did the best work, but failed to score because of carelessness.

This is best shown by the play in the last quarter, when South lost two touchdowns in just a few minutes, one because of the fact that only six men were on the line of scrimmage, and another because a player was off-side on the otherwise scoring play.

Carte du Jour

An optimist is a man who buys a red-barreled pen for four-fifty, imagining that people will think it's a Parker Duofold.

Parker Pens Sold by STUDENTS SUPPLY STORE "On the Campus"

Last Week's Best Article

The honor for having the best article in the issue of October 16 goes to S. E. Shepard for his article, "Local Chapter Tau Beta Pi Installed."

The best article in the issue of October 23 goes to F. M. Chedester for his article, "Wolflets Play Panthers."

F. L. Tarleton has the best article in the issue of October 30. The article is, "Phi Kappa Phi Fraternity Holds Initiation Banquet."

STATE HARRIERS MEET TAR HEELS SATURDAY

After winning handily from the Davidson harriers last Saturday, the cross-country team is now preparing for an invasion by the Tar Heels on the coming Saturday. In addition to the varsity meet, there will be one between the two Freshman teams. Both meets will be run separately and will be staged during the football game.

The strength of the Carolina team is not known as yet, this being their first meet of the season. But it is expected that they will bring along a well balanced and capable team, therefore a close contest is in view.

The followers of cross-country here were greatly encouraged by the splendid showing made against Davidson in the initial start of the season. If the members of the team stay in good condition, a successful season is anticipated.

MID-WESTERN TEAMS RIDE OVER EASTERN

Saturday was a great day for Western teams, as they were successful in their tilts with Eastern football eleven. Outstanding among them were the Illinois-Pennsylvania contest and the Michigan-Navy game.

For the last few years the teams representing the West have gradually been forging ahead of the Eastern teams. The great team that represented Notre Dame last year has not been paralleled this year, but there are a number of strong teams representing the West.

"Red" Grange was again in his old-time form Saturday, and was the leading factor in defeating Pennsylvania by a decisive score. Of the four touchdowns made, "Red" made three of them and paved the way for the fourth. Illinois had lost three games up to this time, but it seems that their luck has turned by defeating the great Blue and White team.

Notre Dame defeated Georgia Tech at Atlanta in a very slow contest. Tech, minus the aid of Wycoff, seems to have been easy for the Westerners.

The Navy was smothered by the great Michigan team, 54 to 0. The Navy opponents were so determined that they even took the ball from its course between a Navy punter's hand and toe and ran for a touchdown.

Great Improvement on College Campus

(Continued from page 1.)

lines, sewer lines, gas lines, light lines, steam lines, etc. We now have a well designed underground system. It has been mapped, in order that in the future, when it becomes necessary to find a pipe or conduit for a new connection, the point can be located with a minimum disturbance of the earth. Instead of having to dig up an acre of land as we have had to do heretofore. From now on all the work done on the campus will show for what it is worth. This work will chiefly be the building of drives and walks and the planting of trees and shrubbery. As these improvements are being made we should confine our walking to the paths and our automobile driving to the drives, instead of walking and driving on the sod.

The College is anxious to improve the road leading from Hillsboro street by the flag pole, the Library, and on down to the bridge. The city owns the land on the opposite side of this drive. The city commissioners have been approached concerning the improvements on this road and have been assured by the College that it will cooperate and do its part towards making this road not merely presentable but to put it in such shape as to make it of real service. The commissioners were told that if the city would improve this side to the bridge that the College would extend and complete the road to the Western Boulevard. Up to the present time they have taken no action in regard to this matter. This

road was originally laid out with an eye to beauty. The trees on the park side are in a double row, providing for a shady walk. If the angle in the road just in front of the Library was rounded off with a smooth curve and a sidewalk laid from Hillsboro Street on the park side, between these rows of trees, the result would mean a driveway as attractive as could be seen anywhere. Such improvements would not by any means be for the benefit of the College alone. The public could approach Pullen Park from Hillsboro Road through this attractive drive, rather than by the unattractive ways now offered. Pleasure seekers going from the city to the park by means of the street car could leave the car at the drug store and have a beautiful walk along this drive, over the bridge, entering the park at its naturally pretty entrance. Drivers in automobiles would be afforded not only a beautiful road, but a short connection between Hillsboro Street and the Western Boulevard. The great need for this connection will be apparent when this new western outlet is opened up for traffic. It is earnestly hoped that the city commissioners will cooperate with the College in improving this part of Raleigh.

Pecan Growers Will Gather Here November 14

(Continued from page 1.)

American Tree Association, of Washington, D. C. Mr. Edwards is associated with the Nature Magazine, and is to speak on "How to Interest School Children in Planting Pecan Trees."

Among some of the other leading speakers are H. M. Curran, Forester, State College; W. A. Radspinner, Horticulturist, State College; W. N. Roper, secretary of the society; C. D. Matthews, Horticulture Department, State College; Prof. J. P. Pillsbury, Horticulture Department, State College; J. J. Skinner, U. S. Department of Agriculture; G. A. Cardwell, Agriculture Agent, Atlantic Coast Line

Railway; Prof. C. L. Newman, associate editor, Progressive Farmer; Hon. W. A. Graham, Commissioner of Agriculture; and many others.

The society is looking for fine results from this meeting, as all phases of pecan growing will be taken by specialists in each field. It is the plan of the society to put the pecan tree on the map of North Carolina.

Baptists Hold Annual Meet at Chapel Hill

(Continued from page 1.)

Maryland. The keynote of the conference was, "Christ—Constrained in Campus Conquest," and was stressed in most of the addresses. A great number of students were on the program who were very interesting, including two students from State College, Nelson N. Harte and Bernard J. Kopp. The great outstanding student musical talent was the Wingate Junior College Quartet, which rendered several selections throughout the entire conference. There were about three hundred delegates from all parts of the State. The following students were delegates from State College: N. N. Harte, B. J. Kopp, D. R. Pace, C. W. Overman, L. R. Hunt, J. Alexander, L. R. Humbert, and C. U. Skinner.

Why a Storm Door?

Because the ordinary door does not keep out cold winds, drafts, snow, and rain; because the storm door we make is cold-tight and winter-proof, and you will be able to keep your house good and warm and save coal in the bargain. Ask us for prices and see our samples. We are making storm doors for most of the wise folks in town.

**JUDSON D. ALBRIGHT
NAMED CHIEF CHEMIST**

Mr. Judson D. Albright, Jr., who graduated in Chemical Engineering in the class of 1921, has been named chief chemist in charge of the laboratory attached to the district offices of the prohibition enforcement unit in Charlotte. In addition to this district, composed of North and South Carolina and Georgia, Mr. Albright will have charge of analysis work in beverages and narcotics for the State of Florida.

Mr. Albright won distinction as an athlete in college, breaking the State record for the 100-yard dash in 10 seconds, and the 220-yard dash in 22 1/2 seconds.

Mr. Albright is an unusually able chemist, a lieutenant in chemical warfare service, a member of Delta Sigma Phi, a fellow in Theta Tau, a Mason, and a Shriner.

**WITHDRAWAL OF SMITH
CAUSE OF PROMOTIONS**

Major B. W. Smith has withdrawn from school and has gone to his home in Charleston, S. C. Major Smith's withdrawal has left a vacancy and promotions are as follows:

A. H. Thomas from captain to major, commanding the 2d battalion.

J. B. Upshur from first sergeant to captain, commanding Company I.

J. F. Beavers from sergeant to first sergeant, with Company D.

The disciplinary system has gone into effect and the first tour will be walked Saturday, November 7, under the supervision of Major Early.

The Faculty Gun Club has been organized, with Professor Hunnicutt as secretary. The club met Monday and Wednesday and shot from 4:30 until 6:00 p.m.

**LIBRARY WILL SOON
RUN ON FULL TIME**

The D. H. Hill Library is beginning to function properly. It has not yet reached its full stride, due to the fact that lights for the stacks have not been available at night.

By the time this issue is out, it is hoped to be open from 7:00 to 10:00 at night, in addition to the hours 8:00 a.m. to 1:00 p.m. and 1:30 p.m. to 5:00 p.m.

Due to the fact that night reading in the library has not been possible, there has been a minority of library utilization as compared with previous times.

Due to unforeseen delays in arrival of equipment, the lobby of the library has not been opened. This equipment has been due five weeks, and as soon as it arrives the installation process will go forward. Then, instead of the cramped, small reading room at the end of the stacks, in the basement, comfortable and roomy accommodations will be available.

The lobby of the new library is to contain reference books, open shelves for students to select general reading material, and reading rooms.

The stacks in the basement are in good order now, so that books and reading material are available.

He: "If a cannibal eats his mother's sister, what is he?"
She: "I don't know."
He: "Why, he is an ant-eater, of course."

ALUMNI NOTES

(Observations and Communications of Zippy Mack)

College football teams throughout the South have had repeated occasions for remarking that Davidson has a hesitancy about losing games on their own field. The truth of the remark was emphasized Saturday when the Wolfpack visited the Presbyterians. But then, a defeat at the hands of Davidson doesn't sting like some others would, so we are not complaining.

Mr. Hoy Lee ("Bud") Fisher, of the Civil Engineering Class of '23, has recently accepted a position as engineer for the city of Palm Beach, Florida. Mr. Fisher served with the A. E. F. during the World War, and later entered at State College, where he finished with his class. Although Fisher suffered the loss of his right arm during his term of service he never wavered from his purpose of becoming an engineer, and his recently acquired position is sufficient testimony as to his success.

Mr. Dortch Whitted Hill, of the Civil Class of '25, was a recent visitor on the campus. Hill is now doing civil engineering with the Seaboard Air Line Railway, and has headquarters at any point where he happens to find himself on their system.

Mr. and Mrs. Clarence Call request you to be present at the marriage of their daughter, Madeline, to Mr. Orton A. Boren, Thursday afternoon at half after five, November nineteen, nineteen twenty-five, Methodist church, North Wilkesboro, N. C. Mr. Boren was for a time a member of the Mechanical Engineering Class of '21.

Mr. and Mrs. Joseph A. Osborne announce the marriage of their daughter, Hester, to Mr. Beverly Moss Blount, October 24, St. Peter's Episcopal church, Washington, N. C. Mr. Blount is a member of the Mechanical Class of '15. After graduation, Blount served in the World War, and later as an instructor in Physics at State College. He is now in the employ of the Newport News Shipping and Dry Dock Company.

**PROFESSOR HAIG
JUDGES AT TARBORO**

Prof. F. M. Haig, of the Animal Husbandry Department of State College, spent Wednesday, October 28, judging livestock at the Edgecombe County Fair, at Tarboro. Professor Haig stated that the entries of dairy cattle were especially good, and that the quality of the animals shown was much above the average. The swine shown was unusually good, there being over two hundred purebred hogs entered. In addition, there were a number of entries of horses and mules; several sheep, and some beef cattle. All the livestock was of good quality, showing that the farmers of Eastern Carolina are now devoting more of their attention to this branch of farming, according to Professor Haig, who states that he was immensely pleased with the showing made.

**RECEPTION DISCUSSED
AT AGRICULTURAL CLUB**

Details of the coming reception were discussed at length at the regular weekly meeting of the Agricultural Club Tuesday night.

A program, consisting of a very interesting debate and several talks was carried to a successful close, after which an outline was given by "Shorty" Cline, judging from which the Agricultural students will feel at home at the Agricultural reception November 21.

Having the reception "a la barn" and wearing overalls was not definitely decided upon, but it may be safely said that there will be a great change in the entertainment. If they have all that barbecue and all those girls in gingham aprons to help eat it there sure will be gaiety in the old barn that night.

**MISS MARTHA ANDREWS
JOINS LEAZAR SOCIETY**

Excitement reigns in the camp of Leazar Literary Society as a result of the entrance into their midst of Miss Martha Andrews, the only full fledged co-ed on the campus.

Miss Andrews has shown that she is a capable, earnest student, and the men of Leazar believe that she will be a valuable asset in raising the standard of the society in every respect. Her ability in literary society work is as yet unknown, but it is predicted that she means business and that the men of Pullen have an unexpected obstacle in their way to highest honors and to a feed at the expense of Leazar.

A. M. Fountain (Zippy Mack) now a member of the English Department, was present and made a short talk to the society. He stated that he was delighted to find that there was a great variety in the type of programs offered.

Leazar and Pullen decided to hold the annual declamation contest Friday, November 12, which will give a very short time for preparation.

**THE PULLEN SOCIETY
ADOPTS SYSTEM RULES**

Pullen Literary Society met October 30, at the usual time. Membership articles were brought up and unanimously passed on, which read as follows:

Section 1. All students in N. C. State College shall be eligible to membership in this society.

Sec. 2. The membership of the society for any term shall consist of:

(1) Those students still enrolled in the College who have paid their membership dues for the preceding term and who are not absent more than five times during the term without being excused by the society.

(2) Those students who are initiated into the society at the beginning of the term.

(3) Those students who after the initiation signify their intention of joining the society and pay their dues for the term. It is understood that such members are to be initiated at the beginning of the next term.

(4) That former members who are reinstated will pay a fee of twenty-five cents.

The following program was then rendered:

Debate: Resolved, that betting on all State College intercollegiate contests should be abolished.

Chairman of debate—Ginn.

Affirmative—Travathan, J. F. Lutz.

Negative—B. L. Williams, J. S. Frink.

The debate was unusually good and showed a great deal of thought on both sides. The judges' decision was in favor of the affirmative, two to one.

A report from the American Mercury Magazine, entitled "The Color Line," by F. E. Plumber, and Humor by R. S. Gaston, were the closing numbers on the program.

The program for the following week was read, and each member on it had to answer as to whether he would be present or not.

STATEMENT ABOUT POOL

Believing that it is a general belief of the students and faculty of the College that the pool will be closed during the winter, I wish to make announcement that the circulating and heating system is working admirably, and that the pool will be open the year round.

On faculty nights the pool is very little used, numbering two or three an evening. The pool will be closed on Tuesday and Friday evenings until there are sufficient numbers using it to warrant having it opened.

The pool will be emptied this coming Monday and cleaned. It will be refilled on Wednesday.

J. F. MILLER.

FREE MOVING PICTURE

The Chemical Engineering students present this week at the "Y" a very instructive picture, "The Story of Gasoline." This is a three-reel film showing the whole procedure of locating an oil district, drilling the well, transporting and refining of petroleum.

Reel one shows an oil field, a tank farm, pumping station pumping crude oil from tank farm to refinery, a map of the 60,000 miles of pipe line in the United States and a view of the oil refineries. It also shows distilling of gasoline from crude oil and the removal of coke from the still.

Reel two shows the chemical treatment of gasoline in agitators to remove impurities, and the final distillation. Shows converting of gas oil into gasoline by "cracking" process, which is distillation under high pressure.

Reel three shows recovery of gasoline from natural gas by compression and condensation. Shows test labora-

tories to determine boiling point of gasoline and to develop and improve processes of distilling. Shows gasoline storage tanks with capacity of 3,000,000 gallons, shipment of gasoline by barrel, boat, tank car, and tank truck, and its delivery to service stations.

The Chemical Engineering students will present a free moving picture regularly every two weeks during the college year, through the courtesy of the Bureau of Mines.

What do you charge for a funeral notice in your paper?

BALTIMORE

N. C. Agriculture and Industry Now Bound

Unimposing Technical Sheet Presents Brave Front; Has a Wide Circulation

(R. R. Fountain.)

Realizing the great service rendered the College, the State, and the country as a whole by the publication, "Agriculture and Industry," Editor Stewart Robertson has caused to be prepared bound volumes, covering the school years 1923-'24 and 1924-'25. The work is an imposing volume, twenty by fifteen inches, done in black imitation leather, and contains two sub-volumes, each completely indexed and composed of forty issues. A bound volume may be found in the D. H. Hill Library.

In an attempt to make the paper even more representative of all phases of the College work, the President of the College and the Deans and Directors of the various Schools have recently been appointed as an advisory board to assist in securing information and material for the publication.

Thinking it advisable to get a cross-section of the opinion of the faculty concerning the publication, your reporter visited, first, Dr. Riddick, Dean of the Engineering School, who said: "I consider the sheet, N. C. Agriculture and Industry, as containing a mass of interesting and useful information in most concise form. I have kept a file of the numbers that have reached me."

Dr. Wells, of the School of Agriculture, stated that he ran across a man in Toronto, Canada, who desired a copy of "Agriculture and Industry," that he had found on file in the New York Botanical Garden.

Dr. E. E. Randolph, chairman of the Chemical Department, School of Science and Business, gave out the following statement:

"N. C. Agriculture and Industry" provides a channel for disseminating information obtained by research done at State College on live problems pertaining to agricultural interests and engineering problems and investigations.

"It is a College publication, having

the sanction of the College authorities; hence, the articles published in its columns carry the weight and distinction which may not be apparent in the same articles published in newspapers. Each article is carefully edited so as to remove any obscurity of statement and to make the information available to all people engaged in State industries. A regular system of publication of important information is thus provided, whereas the occasional publication in various newspapers would be unsystematic and lacking in definiteness. The research work of the College is put in a ready form for distribution to the various interests of the State and country at large.

"Although a volume of this publication contains information from various agencies of the College, individual issues are concerned with more or less definite types of work; hence, as an illustration, one issue may be suitable to send to the people engaged in mechanical industries in the State, another may be suitable for distribution to the chemical industries of the State, and still another may be suitable to the agricultural interests.

"The periodical has become an organ of the College, not only for distributing results of investigations at the College, and for summarizing the results of investigations done elsewhere, relative to the agricultural interests of the State, but also furnishes a means of information to the different groups of workers in State College in such a way that the various departments may co-operate in their efforts for the advancement of the welfare of the people.

"An opportunity is afforded through its columns for notes on ideas and results obtained by work which may be of value to some, but which is not of such an elaborate nature as to make a leading article in a newspaper or technical journal. By way of suggestion to thoughtful people, these notes are invaluable.

"The form of the paper adapts it for filing purposes, so that it can be kept for reference work. The index of former volumes of the paper has increased the usefulness of the journal."

Do You Know? "HOW TO STUDY"

The Students' Hand-Book of Practical Hints on the Technique of Effective Study

by WILLIAM ALLAN BROOKS

A GUIDE containing hundreds of practical hints and short cuts in the economy of learning, to assist students in securing MAXIMUM SCHOLASTIC RESULTS at a minimum cost of time, energy, and fatigue.

ESPECIALLY RECOMMENDED for overworked students and athletes engaged in extra curriculum activities and for average and honor students who are working for high scholastic achievement.

Some of the Topics Covered

- Scientific Shortcuts in Effective Study.
- Preparing for Examinations.
- Writing Good Examinations.
- Brain and Digestion in Relation to Study.
- How to Take Lecture and Reading Notes.
- Advantages and Disadvantages of Cramming.
- The Athlete and His Studies.
- Diet During Athletic Training.
- How to Study Modern Languages.
- How to Study Science, Literature, etc.
- Why Go to College?
- After College, What?
- Developing Concentration and Efficiency.
- etc., etc., etc., etc., etc., etc.

Why You Need This Guide

"It is safe to say that failure to guide and direct study is the weak point in the whole educational machine."—Prof. G. M. Whipple, U. of Michigan.
"The successful men in college do not seem to be very happy. Most of them, especially the athletes, are overworked."—Prof. H. S. Canby, Yale.
"Misdirected labor, though honest and well intentioned, may lead to naught. Among the most important things for the student to learn is how to study. Without knowledge of this his labor may be largely in vain."—Prof. G. F. Swain, M. I. T.
"To students who have never learned 'How to Study,' work is very often a chastisement, a flagellation, and an insuperable obstacle to contentment."—Prof. A. Inglis, Harvard.
"HOW TO STUDY" will show you how to avoid all misdirected effort.
Get a good start and make this year a highly successful one by sending for this hand-book and guide NOW.

You Need This Intelligent Assistance

Kampus Komics

Marshal: I could die dancing with you.
Girl at Dance: It's about to kill me, too.

Speed Cop: "You've been going fifty miles an hour!"
Debutante: "If you think that's fast, you ought to see me when I'm parked."

Do you like codfish balls?
Dunno, never attended one.

"Have you got a brother-in-law?"
"No, my brother's a doctor."

A Kiss Amiss
Sweet Young Thing: "Have you ever kissed a girl?"
Bill Woods: "Is that an invitation or are you gathering statistics?"

"Cow": I wish I had a nickle for every girl that I have kissed.
"Spiro": What would you do? Buy yourself a package of gum?

"Do you know," said the grocer pompously, "that I started in life as a barefoot boy?"
"Well," said the clerk, "I wasn't born with shoes on, either."—Ex.

"I am sorry I married you," sobbed the bride.
"You ought to be," he replied; "you cheated some other girl out of a mighty fine husband."

Parent (anxiously): Nurse, is it a "him" or a "her?"
The Nurse: It's a "them!"

Dear Editor: I am in love with a homely girl but she doesn't seem to care for me, while a pretty girl with lots of money wants to marry me. What should I do?

Editor: Marry the one you love and send the name and address of the other.

"I got one of those suits with two pairs of pants."
"How do you like it?"
"Not so well. It's too hot wearing two pairs of pants."

WILLING

He: I like any kind of wild game. Do you?
She: Yes, do you happen to know a good one?

Real Tolerance

Jack: I have a Ford; what car have you?
Bob: A Packard.
Jack: Well, that's a good car, too!

Kissing a girl just because she wants you to is like scratching a place that doesn't itch.

"We've certainly seen a great deal of each other during our lives," said one chorus girl to another as they retired from the stage.

A city lady on a farm, seeing a lot of calves, remarked, "Oh, what cute cowlets!"
"They ain't cowlets, they're bullets," corrected the farmer.

FIRST SHELF ON DRAMA NOW READY AT LIBRARY

In The Technician of last week an announcement was made concerning lists of some of the world's best literature being prepared by the instructors of Literature. The chief purpose in submitting these lists is to help the students of State College in their selection of suitable reading matter. In this issue of The Technician a list of twenty-five outstanding plays is offered to those students who want to know themselves more intimately, particularly as they see themselves through the struggles, disappointments, and victories of literary personalities.

A few suggestions regarding the study of the drama will, perhaps, be helpful to the student. The drama should be interpreted as a literary production primarily designed for presentation on the stage. Its presentation before an audience is accomplished by actors and actresses who for the time being—perhaps an hour or two—live and move as human beings. Dramatic literature, as none other, reveals most nearly the human soul in the whole of its being. This is assuredly due to the fine interplay of word and action on the stage. Besides, costuming, lighting facilities, and scenery of the modern stage in particular have been very effectual in making dramas realistic.

This is true not only as regards realistic effects, but also imaginative effects. The best producers of dramas like the keenest critics of general literature, feel that imagination is an essential part of the drama; consequently they make efforts to blend in the right proportion the imaginative with the realistic.

If you would look into the depths of some of the world's most highly revealed personalities, read some of the masterpieces of dramatic literature. J. D. CLARK, Chairman, Dept. of English.

Dramas Which Have Helped Men to Know Themselves

- Hamlet—Shakespeare.
- King Lear—Shakespeare.
- The Tempest—Shakespeare.
- Macbeth—Shakespeare.
- As You Like It—Shakespeare.
- Dr. Faustus—Marlowe.
- Edward the Second—Marlowe.
- The Rivals—Sheridan.
- School for Scandal—Sheridan.
- She Stoops to Conquer—Goldsmith.
- Everyman in His Humour—Jonson.
- Volpone—Jonson.
- Riders to the Sea—Synge.
- Candida—Shaw.
- Major Barbara—Shaw.
- Man and Superman—Shaw.
- Shoemaker's Holiday—Dekker.
- Importance of Being Earnest—Wilde.
- Strife—Galsworthy.
- Justice—Galsworthy.
- Hour Glass—Yeats.
- Second Mrs. Tanqueray—Pinero.

Great Divide—Moody.
Abraham Lincoln—Drinkwater.
Melting Pot—Zangwill.
Note:—Copies of these plays may be borrowed at the Hill Library. At a later time this list will be supplemented by another list of great dramas.

How This College Man Found the Secret of Making Money Pleasantly and Easily

THE year before he graduated, his father sold out his coffee business and retired.

But he wasn't the kind who could stay retired. "Son" hadn't made up his mind what to do after graduation, so knowing how he liked flowers, Dad kind of concluded he would have a decision ready.

So he built this sassy little flower shop in one of the residential sections of Indianapolis.

Then he called us in to add the greenhouse, which he calls his "big glass show case".

Dropped in to see them not so long ago.

Say man, but there is just one of the nicest little gold mines I've bumped into in many a day.

A delightful business in every way, and growing every day.

How about it, don't you think your Dad would chip in on a proposition like that?

Write us. We'll give you all the facts you want, and then some.

More and more college men are taking up this flower business every year.

It's fun, and there's money in it—that's why.

If interested write to the Manager of our Service Department, Ulmer Building, Cleveland, Ohio, who will give it his personal attention.

Rifle Team Shoots Begin Armory Range

Regimental Shoot Will Be of Nature
an Intra-mural Sport and
Receive Medals

The new indoor rifle range that is being installed in the armory is to be completed this week.

Try-outs are to be held at once for the battalion teams. Each team is to be composed of ten shooting members and two alternates. Work will begin the 29th with two periods for preliminary instruction and two periods for elimination shooting. The members getting the highest scores in the regimental shoot will compose the college team. The regimental shoot will be completed by December 15th, while the first college shoot will be held on January 8, 1926.

The staff is working to make the regimental shoot an intra-mural sport, while the college team is to be a minor sport. The team that wins the regimental shoot is to get the intra-mural sport medal, and the college team to receive the minor sport medal.

"Get behind your rifle team and let's win the National Championship Shoot."

Watch THE TECHNICIAN for results of these shoots.

PHYSICS DEPARTMENT TO ORGANIZE SOCIETY

For the first time in the history of State College, the Physics Department will have a society of its own.

This society is composed of students who are now taking Physics, who have taken Physics, or are interested in this subject. This society will be under the leadership of Mr. A. B. Stewart, a post-graduate in Physics.

The first meeting was held at 7:00 o'clock on the evening of November 3d, in the Physics Department. The organization and days for regular meetings were decided on at this time.

This society will study some of the things along the line of Physics. Among these may be included radio, X-ray, and the lives of great physicists. An attempt will also be made to get good speakers for the club from such institutions as Carolina, Duke, and Wake Forest. Astronomy will also be included in the subjects for discussion, although it does not exactly come in the field of Physics. This is one of the most interesting subjects up for discussion, as the stars will be looked at from a telescope.

All students taking Physics, who have taken Physics, or who are interested in this subject, are eligible for membership.

It was pointed out by Mr. Stewart that there would be socials, also, at which those interested in this subject might have enjoyment among themselves.

VOCATIONAL TEACHERS GIVING SATISFACTION

"The teachers of agriculture are doing well and the work is progressing nicely," said Leon E. Cook, professor of Vocational Education, Saturday morning, after returning from a visit to the agricultural schools at Conway, Rich Square, and Woodland.

H. G. Wharton, a graduate student of State College, has charge of the agricultural work at Conway. Professor Cook stated that Mr. Wharton had succeeded in getting splendid support from the community. He has been instrumental in organizing a Kerby Club, which is composed of four townships, including Conway. The purpose of this club is for the improvement of schools, homes, and farm conditions.

Dr. E. C. Brooks, president of N. C. State College, was the principal speaker at the meeting of the Kerby Club Saturday evening, October 31. This meeting was held at Severn.

"The boy stood on the burning deck,
The flames around did roar;
He took a cake of Ivory soap
And washed himself ashore."

Even Such Is Man

Like to the falling of a star,
Or as the flights of eagles are,
Or like the fresh spring's gaudy hue,
Or silver drops of morning dew,
Or like a wind that chafes the flood,
Or bubbles which on water stood:
Even such is man, whose borrowed light

Is straight called in and paid to night.
The wind blows out, the bubble dies,
The spring entombed in autumn lies;
The dew's dried up, the star is shot,
The flight is past, and man forgot.
—Francis Beaumont.

B. L. Vick, '26, and A. B. Halen, '29, were initiated in Square and Compass, Masonic fraternity, Tuesday night.

Frank Galloway, Chapel Hill, visited friends Sunday afternoon.

W. P. Watkins visited friends at Carolina Saturday and Sunday last week.

T. C. Harrill, E. B. Armstrong, W. J. Bigger, and A. E. Huggins attended the State-Davidson game last Saturday.

Pete Barber, '24, visited friends in Raleigh last week for a few days.

Charlie Anstell, John Anthony, and "Moco" Bynum, after the game at Davidson, went to Shelby for the week-end.

James Crane and "Mac" Gorham were in Tarboro with their parents during the week-end.

Charlie Shuford spent Saturday and Sunday in Greensboro.

Sam Davis and Burke Parker spent the week-end in Gastonia.

Bill Newell, Sammie Pearson, Jimmie Kirdock, and Red Meredith motored to Scotland Neck this past week-end, returning Monday morning.

Bill Shope was in Durham this past week-end.

J. E. Davis, Roy Bumpass, and N. G. Hodgkin spent the week-end in Greensboro.

G. W. Dudley and W. T. Brown were in Charlotte during Saturday and Sunday.

J. P. Hughes spent the week-end in Hillsboro.

G. L. Uzzle visited friends in Smithfield the past week.

MY FALL

(Editor's Note.—Zippy Mack's fall down the steps of Louisburg College to the tune of hundreds of feminine giggles has aroused so much comment in the press and on the campus that he is moved to make the following explanation:)

Oh, yes I fell,
And fell like—well,
I didn't fall so hard!
I bumped and slid,
And yet I guided
Myself into the yard.

I'll bet those women
Thought I was swimmin'.
Or doing fancy dives;
But all was very
Involuntary—
Those girls may bet their lives.
—Zippy Mack, '23.

WILKES COUNTY HAS DESERTED QUARTET

The students from Wilkes County met November 4 and organized a Wilkes County Club, for the purpose of creating an opportunity for all students from Wilkes County to become better acquainted and to promote a greater spirit of cooperation.

Last year this county had only four students, and they organized a club, including three more counties, and called it the Mountain Quartette. However, this year there are ten students from Wilkes, which enabled them to form a club representing only their own county.

Modern girls just love the water—unless it happens to be in a wash-tub.

HAVE YOU EVER MET AUNT ELLA MCGUIRE?

If you do not know Aunt Ella you are both lucky and unlucky. You are lucky in that you haven't had to spend much time in the Infirmary, but you are unlucky in that you have missed knowing one of the richest characters on the campus.

Aunt Ella McGuire is the faithful and efficient cook, laundress, maid, and general house-cleaner at the College Infirmary. She is friendly, courteous, and ready at all times to do anything for the boys. Here's a little tip: when you come to the Infirmary, let Aunt Ella know how and what you want to eat, and more than likely she will fix it for you. She has been on the payroll of State College for thirty years, and for the last fifteen has been at the Infirmary. She can tell you about State College when there were only about fifty students, when Hillsboro Street was a road, and what is thickly populated now was then promising sites for saw-mills. In her thirty years she has worked in Watauga, in the kitchen, in the dining-room, and in the Infirmary. There is only one negro on the campus that has been here longer than Aunt Ella, and that is the big yellow darkey that works for Mr. Owen. "He was here," Aunt Ella said, "when da fust brick was laid."

"Da wurst time we ever had here was during the epidemic of flu," said Aunt Ella. "Lawdy, overthing was full den, upstairs, downstairs, Y. M. C. A., an everthing. It was wartimes den, all the boys wore soldier soots, de tank camps were over in de Fair Grounds, you know. Dey brought dem boys over here in dem stretchers and I'll declare, sometimes dey would not live three hours. And all dem good white folks coming over here working and exposing demselves. Some of them took it, too, and died."

too. Yes, sir, dem was turrrible times, to be sure."

Aunt Ella loves State College, loves the boys, loves to talk about the old days and the people who were here then. She has been here thirty years and has no plans for the future except to stay on with Miss Mainor and State College.

Craven County Boys MEET AT 9:30 P. M.

The regular business meeting of the Craven County Club was held October 25, 1925. The meeting was held in Vice-President James Rhodes' room at 9:30 p.m. President E. G. Moore presided over the meeting.

The roll was called and fourteen members were present. Plans were discussed to have a club smoker. It was decided to have the smoker in the Y. M. C. A. on Thursday night, November 5, 1925. A committee was appointed to prepare the refresh-

ments. When all of the business had been transacted, the meeting adjourned.

"Why is a ship called she?"
"Because it makes a better showing in the wind."

"What would a nation be without women?"
"Stagnation."

In an isolated region, almost inaccessible in winter, this 6500 h.p. hydro-electric plant located on the Deerfield River in New England, starts, protects, and stops itself.

A Self-Starting Power Plant

Dawn—the slumbering city awakens and calls for electric current. Many miles away the call is answered. A penstock opens automatically, releasing impounded waters; a water turbine goes to work, driving a generator; and electric current is soon flowing through wires over the many miles to the city. This plant starts and runs itself.

Power plants with automatic control are now installed on isolated mountain streams. Starting and stopping, generating to a set capacity, shutting down for hot bearings and windings, gauging available water supply, they run themselves with uncanny precision.

Thus another milestone has been reached in the generation of electric power. And with present-day achievements in power transmission, electricity generated anywhere may be applied everywhere.

The non-technical graduate need not know *where* electricity comes from—nor even *how* it works. But he should know *what* electricity can do for him no matter what vocation he selects.

The General Electric Company has developed generating and transmitting equipment step by step with the demand for electric power. Already electricity at 220,000 volts is transmitted over a distance of 270 miles. And G-E engineers, ever looking forward, are now experimenting with voltages exceeding a million.

A new series of G-E advertisements showing what electricity is doing in many fields will be sent on request. Ask for booklet GEK-1.
