State Students Evaluate Prof Performances

By HALL HARDING, IV
N.C. State students will see four opera performances in a unique pro-
gram this spring that was organized and pro-
duced by students. The performances are de-
signed to be enjoyed by the students involved and others who may attend the events.

The events are organized by the Opera Club, a student group that meets regularly to discuss and perform opera. They have a variety of members from different majors and backgrounds. The club organizes events such as performances, recitals, and lectures to help students learn more about opera and its history.

The performances feature productions of well-known operas such as "Madame Butterfly," "La Boheme," and "Die Fledermaus." The club hopes to attract a diverse audience by showcasing the beauty and diversity of opera performances.

The performances are scheduled to take place in the Student Union Auditorium on campus. The club is actively seeking students who are interested in participating in future performances or events. Interested students are encouraged to contact the Opera Club for more information.

More details about the performances, such as dates, times, and ticket information, will be announced in the future. The Opera Club members are excited to share their passion for opera with the campus community and hope to see many attendees at the upcoming events.

State Students Evaluate Prof Performances

By ROBERT STAPAN
A bill passing the House with President's approval for the new program was introduced at the N.C. State University on Monday. The bill was passed unanimously through the committee and referendum committees.

The new program will be known as the "State Student Evaluation Program." It is designed to help students evaluate professors and their courses. The program will be conducted by the students themselves, allowing them to provide valuable feedback to the professors and the university.

The program will be implemented across all departments and will cover various courses. Students will be able to submit anonymous evaluations through an online platform. The evaluations will be compiled and analyzed to identify areas for improvement and to enhance the quality of education.

The program is expected to be a significant improvement in the evaluation process. It provides students with a voice in shaping their educational experience, ensuring that professors and courses are continuously evaluated for excellence.

The "State Student Evaluation Program" is scheduled to begin in the fall semester. Students will be notified of the evaluation dates and instructions through their email and course syllabi. They are encouraged to participate actively in the program to improve the quality of education for everyone.

The new program is one of the many activities being considered by the N.C. State University administration to enhance the educational experience for all students.

Campus-Crier

The N. C. State University Student Body will meet January 27 in Room 104 of the Student Union at 7:30 p.m.

The new interim schedule will be presented with a requested bill for the university and a new semester’s plans will be presented. Everyone is encouraged to attend.

The "Campus-Crier" will be held on Fridays at 7:30 p.m. during the semester with additional meetings planned for February and March. Students are encouraged to attend to stay informed on campus events and developments.

Peele Hall Opens Again

Peele Hall, which was closed for renovation in 2016, has officially reopened. The renovation work included updates to the HVAC systems, electrical systems, and the building’s infrastructure. The project was completed on time and under budget, allowing the university to reopen the facility.

The renovation aimed to provide a safer, more comfortable environment for students and staff. The improvements include enhanced accessibility, natural lighting, and energy-efficient systems. The renovation project was managed by the Facilities Management Department.

The university is committed to maintaining and improving its facilities to support the learning and teaching experiences of students. The renovation of Peele Hall is one of the many initiatives undertaken to enhance the university’s campus environment.

The "new" Peele is expected to be a significant improvement over the old building, offering more space, better technology, and improved facilities. The renovations have been designed to meet the needs of today’s students and faculty, ensuring a more vibrant and engaging academic environment.
Exercising Responsibility

The effectiveness of the faculty evaluation poll currently being taken across the campus is in the balance of the student body in filling out the cards, the response on the professor who receives the results.

The evaluation system was conceived as a means of judging the effectiveness of a professor by those who count: the students. If the poll is mistakenly used by the students to grade a professor for bad grades, or to overrate their classroom-work due to a personal relationship, then the poll is worthless.

Many of the questions on the poll are subjective in nature, and only a few are clearly objective. This creates unnecessary difficulty for the student in answering the questions and in many cases it will require strong self control to keep them from answering the personal questions. This is unfortunate and compounds the problem of analyzing the results.

Professors come in two varieties, good and bad. The numbers on the cards indicate only how good or how bad they are and do not necessarily measure their ability. This judgment can be made for outside activities, whether these are research, graduate research, or leading the church choir. The professor is here in the role of educator and educational leader and his effectiveness should be judged on this alone.

Disregarding the obvious failings of this particular poll, one must look with some degree of interest at the future of students and future professors. (The next page of this issue of the "The Technician" is the second part of this article.)

The Legislative Branch

A signal event will occur today at 4 p.m. in the North Parlor of the Union, when the Legislative branch of the Board of Student Publications gathers together for the first time in recorded history. The main purpose of the Legislative branch is to provide the editors of the Student Publications with a place to meet and discuss problems and items of interest to the editors. These questions range from the print shop and graphics, to the writing of an essay, to the direction of the entire organization.

Four of the publications, the Textile Forum, The Phoenix, the Future Life, and the Southern Engineer can be excluded from the discussion since their main purpose of the Legislative branch is to have unannounced and co-operative action and the problems which have been solved by the Legislative branch have unannounced unannounced co-operative problems.

Consequently, the Board of the Future Life and the Southern Engineer will be urged to form the Legislative branch with the specific purpose of addressing the problems which have been solved by the Legislative branch, with the specific purpose of addressing the problems which have been solved by the Legislative branch. The Legislative branch will be informed, under the guidance of the Southern Engineer, to fill out the Legislative branch, and the Southern Engineer will be urged to complete the Legislative branch.

The Wolfpack continues to show a hot and cold touch on the basketball court. Certainly few teams can keep up with the scoring average set by the Pack this in its second game, a 103-92 drubbing of the College of William and Mary in the second round of the ACC tournament.

"The Matadors" suffer from forward skills and severe injuries. It's the exception and not the rule for the Matadors to make an offensive foray into the lane with steady work by Billy Moffett and the usual talents of Eddie "Hullabaloo" Bledsoe, and then suddenly alter it to the double team of "Big Red" and Rupert Riggs to nullify and ruin the opposition's chances. It's a marginal kind of game, unfounded, no makes for 85-90 percent on the court, but occasionally means deep trouble and a blowout.

Bledsoe was an exceptional factor in the latter. State scored for the Pack in the last two minutes of the Coliseum game but the Pack got the Silverline lead a 1-2.5 edge in the first half before coming back to a 7-3.00 score, giving the Pack State margin in twelve time, then juggling 12 straight points to bring the Coliseum to a 7-7 draw. The Linn scored seven more times in the first half but Ballh..es. Bledsoe was a factor in the second ten minutes. Bringing in the double, Bledsoe's display, the Pack came out in the second half playing the Matadors game again and handed Pune another loss that held up to the final point when State won for a last shot chance and, in Coach Moose's words, "an indescribable joy.

The Wolfpack was really measured on New Year's Eve, but the Pack came out of a 60-92 win over West Virginia with nothing. After the Wolf Pack beat the Pack, tried and won, and in the second round of the ACC tournament, the Pack's third place in the ACC the last scored possible at South Carolina Wednesday night pays off in the way it didn't against State on December 19. Playing in a fifth straight game this year, the Wolf Pack showed signs of life and gained momentum in the 60-92 scoreboard.

**Harpsichord Coming To Raleigh**

Harpsichordist Mildred Dilling will present a concert on January 17 at 3 p.m. in Memorial Auditorium. This is the second in a series of weekly musical events to be sponsored by the Raleigh Concert Music Association.

Miss Dilling has received critical acclaim from New York critics for her virtuosity and personality as well as her talent on stage. She was born in Indiana and studied in Indianapolis. She is also associated with Bachlorenk in London.

**CONTRODUCTION**

To the Editor:

My purpose in writing this letter is neither to refute or support the editorial "Down with Dilling," nor is it to ask the question: What was the real motive behind the writing of the editorial? Was it the emotional appeal by a sincere desire to have Dilling leave or was it inspired by a desire to create a controversy on this specific topic? Many students believe that the purpose of the editors was to create a controversy. If the editors want to start a controversy, why can't they select a constructive subject, such as Campus Chest! How many students know what Campus Chest is? Since the editors have already decided the student's newspaper, why couldn't the editors write the students on the topic of Campus Chest?

For several years now, students have been seeking a movement that would boost school spirit. Why shouldn't Campus Chest be that movement? It is an annual, campus-wide movement that has been hidden in obscurity. With a little information and encouragement the student body might develop power of and interest in Campus Chest.

In the majority of students, Campus Chest occurs once a year when something comes around making you want to give. How can the students be expected to give when they are ignorant of the cause?

Editors, I challenge you to start a constructive controversy on Campus Chest. It is the least you would do in order to redeem yourselves from your pit of condemnation.

Terry Stevens
