## Emerging Issues Forum explores problems in Eastern Europe

By J. Keith Jordan  
Staff Writer

The sixth annual Emerging Issues Forum opened yesterday at N.C. State's McKimmon Center and began by exploring the problems faced by eastern Europe as it struggles to convert to democracy and a market economy.

"As proud as we are to be North Carolinians, this forum has national significance," said EIF Chairman James B. Hunt, Jr. The session was of even greater importance now than when it was scheduled last year, Hunt said, because of the events in Europe during the last few months.

Herbert Okun, executive director of the

Financial Services Volunteer Corps and a former ambassador to East Germany, agreed that the situation in eastern Europe and the Soviet Union touches the lives of all Americans. We are all "children of the cold war," he said.

Okun said the eastern Europeans had suffered through not only the occupation by foreign troops but by foreign ideas as well. They had never really felt a close connection with their governments, he said.

"There were always islands of difference, islands of dissent, and above all islands of contact with the west," Okun said. He said that when he had talked with Polish leaders, many of them had western educations and spoke flawless English.

But communication with other cultures was not easy. Speaker Maciej Kozlowski, a former Polish academic who is now a diplomat to the United States, was once sentenced to prison for five years when he smuggled political literature into Poland.

Now that the harshest laws affecting personal rights have been removed, the biggest problem facing the region is the economy, the speakers agreed.

Stephen Rhinesmith, ambassador of United States-Soviet Exchanges, said that the formerly communist countries lack the infrastructure to successfully move to a market economy in the near future.

Only eight percent of Soviet products are up to world quality standards, Rhinesmith

said. And, because of quality problems and a lack of resources it would be difficult for the Soviets to compete successfully in world markets.

Another problem is psychological dislocation of individuals caused by the transition from a command economy to a market economy. "We seem not to know how to behave," Kozlowski said.

Kozlowski said he doubts that unrest in the Soviet Union will affect the democratic movements in eastern Europe. "That is a danger that does not exist," he said.

The eventual goal of Poland and other eastern European countries is to join the European Economic Community, Kozlowski said. Until they can, they will be

the "back yard" of Europe, he said.

Rhinesmith said that problems in the Soviet Union and the European region formerly under its control would not soon disappear. It will be a generation or more before eastern Europe is economically and socially similar to the west, he said.

Last night, Former President Jimmy Carter spoke about the United States' place in the world, and today U.S. Senator Sam Nunn will speak on peace, defense and security. Carter's speech, which ended after Technician's deadline last night, will be covered with Nunn's speech in Monday's Technician.

### Protest for peace

Students for Peace camp out by the brickyard to protest the war in the Persian Gulf. Sophomores Wade Norris and John Brown, seniors Marty

Chobot and Joel Linsey and junior Emily Pitt remained outside for 24 hours to "Wage Peace."

## Presentation honors women

### Bookstore sponsors reading for African-American History Month

By Terry Askew  
Staff Writer

The Catalyst Bookstore on Dunn Avenue sponsored the second annual African-American History Month Celebration Tuesday.

The program, organized by general bookstore clerk Sherry Holbrook-Atkinson, focused on outstanding African-American women. In her welcoming address, Holbrook-Atkinson gave "a message of appreciation to this day that we celebrate, for what it means to me as an African-American."

The presentation began with quotes by outstanding African-American women. Tara Spence, a junior in textile technology, quoted Rosa Parks and Harriet Tubman. And Donica Thomas, a senior in political science, read several quotes of Maya Angelou.

Holbrook-Atkinson concluded by reading quotes from Barbara Jordan and Shirley Chisholm, "two African-American women whom I have admired for their political contributions to this country," she said.

"As a political science major and

graduate of East Tennessee State University, these two African-American women were very instrumental to me," Holbrook-Atkinson said.

Next on the program were poetry readings. Donica Thomas read Angelou's "I Rise" and "The Phenomenal Women." This reading was followed by an original poem "What an Ancestor Might Say" by Andrew Williams, a junior in mass communications.

Hans McDonald, a sophomore in civil engineering, read an original poem, "Black Woman." Frank Harris' "Momma" and Langston Hughes' "Mother to Son" to conclude that portion of the program.

Charles Ashanti, a counseling center psychologist, discussed the publication of his new book "Psychotechnology of Brainwashing."

Also recognized was Linda Simmons Henry from St. Augustine's College. She is the author of "The Heritage of Blacks in North Carolina, Vol. 1." Both books were on display.

The final presentation was an interpretation of a hypothetical meeting between Martin Luther King Jr. and Malcolm X by Eddie Lawrence, coordinator of the African Adult Education Program, and Thomas Conway, director of the Student Athletes Program.

## College Bowl Spring Challenge begins

Tournament open to all students, staff, faculty

By Claxton A. Graham  
Staff Writer

For a quick 10 points, exactly how many teaspoons are there in a tablespoon?

Answering questions like these will not only help you show off your mental muscle but may also lead to a night out with three of your closest comrades.

The 1991 N.C. State Libraries College Bowl Spring Challenge is slated to begin Saturday, Feb. 23, in the Erdahl-Cloyd wing of the D.H. Hill Library. If necessary, the competition will continue on Sunday, Feb. 24 at the library.

The tournament, now in its third year, began in 1988 as an event to showcase talent from each of the residence halls on campus but has since expanded to include all students, faculty and staff of NCSU.

Unlike last year's Spring Challenge, which featured a double-elimination format with more experienced College Bowl players facing less experienced squads, this year's Challenge will be played in two parts.

On Saturday morning, current NCSU College Bowl team members will field teams in a single-elimination tournament while, that afternoon, other teams will square

off in a double-elimination competition. The winning team will receive a \$50 gift certificate for dinner at Darryl's and will have its name engraved on the Perpetual Trophy on display in the University Archives.

After the double-elimination tournament is over, the winner will take on the survivor of the single-elimination bracket in an exhibition match. An All-Star team, composed of the best players in the tournament, and a tournament most valuable player will also be named. They will receive commemorative certificates as well.

The 1991 NCSU Libraries College Bowl Spring Challenge is open to all current students, faculty and staff of the university. Registration forms and complete tournament information are available in the Student Leadership Center, 3111 Student Center, or call 737-2452 during business hours. Registration will end at 5 p.m. Thursday, Feb. 21.

The Spring Challenge is sponsored by the NCSU Libraries and the Union Activities Board. The library personnel will be serving food to the participants during the competition.

By the way, there are three teaspoons in a tablespoon.

## New Student Code of Conduct handles more than 100 cases

By Kristin Rambo  
Staff Writer

The N.C. State Judicial Board, operating under the new Student Code of Conduct, handled 110 cases between Aug. 1, and Dec. 31, 1990. Eighty-eight of those cases resulted in guilty charges, and 22 resulted in not-guilty charges.

"There seem to be more cases and hearings than have been seen in the past," said Paul Cousins, coordinator of judicial programs.

"Alcoholism is a contributing factor in the vast majority of the cases."

"However, that is true wherever you have students. That doesn't set (NCSU) apart," said Cousins.

Domestic violence — involving long-term relationships and non-acquaintance rape — has increased this year, according to Cousins.

"Although there have been less than six cases, it was more than expected," Cousins said.

There were 55 cases involving crimes dealing with property or

against the public. This category includes thefts, vandalism and disorderly conduct. Sanctions range from disciplinary probation for one year to 30 hours of community service.

Fifteen of the cases judged were crimes against people including rape, sexual assault and harassment. A guilty charge in this category can result in expulsion, disciplinary probation and 10 community-service

## Student Health Service distributes alcohol surveys

Drinking habits, alcohol trends, patterns and attitudes examined among N.C. State students

By Lisa Florer  
Staff Writer

Student Health Services has mailed out comprehensive alcohol information surveys to 18,000 randomly selected N.C. State students.

The surveys are an attempt to look at alcohol usage trends, patterns and attitudes among students, said Ajuba Joy, NCSU health educator.

"We want students to be, well, to be whole," Joy said. The surveys, therefore, are designed to spot weaknesses in existing substance abuse programs and to better design future programs, she said.

Similar surveys had been distributed every three to five years beginning in 1974. The spring 1991 survey focuses more on the origins of young people's drinking habits before college

and family predisposition to the use of alcohol. The survey also questions patterns in sexual activity that follow the use of alcohol.

"A high percentage of rape is associated with the use of alcohol," Joy said, "and 80 percent of rapists know their victims."

NCSU Student Health Services currently sponsors a three-hour alcohol assessment program for students caught in infractions or students who refer themselves. Participants in the program discuss such issues as predisposition to alcoholism, responsible use of alcohol and alternatives to drinking.

Students in the program also do some self-assessing by answering what Joy calls "red flag questions."

These self-tests question whether students find themselves missing morning classes because of

hangovers, experiencing difficulty in relationships, drinking in the middle of the day and having blackouts.

Students then meet one-on-one with Joy who counsels that particular student's needs. Some students simply need to cope with stress, others need drug education and still others need serious long-term counseling, she said.

Joy said that she encourages students to seek help — whether it is for themselves or their friends.

"When we look the other way, we're part of the problem," she said.

An Alcoholics Anonymous group meets Tuesdays from 4-5 p.m., and the next Alcohol Assessment group will meet on March 12.

Any questions should be directed to Ajuba Joy at 737-2563, 411 Clark Hall, Box 7304.

## IMPORTANT DATES AND ANNOUNCEMENTS

SPRING BREAK begins March 1 at 10 p.m. Classes resume March 11 at 8:05 a.m.

The Defense Mapping Agency will be in Room 173 of Harellson Hall on Feb. 20 from 9 a.m. until noon to interview physics, earth science, mathematics, and computer science majors.

ATTENTION PSYCHOLOGY MAJORS AND TRANSFERS INTO PSYCHOLOGY: Gain experience in a year-long internship of your career choice by applying to

the Undergraduate Human Resource Development option by March 15. Applications are located in Room 640 of Poe Hall. For more information, call Denis Gray at 737-2251.

ATTENTION DOUBLE DUTCH JUMPERS! The Center for Health Directions is looking for you to participate in the first annual Wellness-Expo whose theme is "Take a Walk on the Wellness Side." All interested individuals need to contact Linda Attarian or Ajuba Joy at 737-2563. The deadline is March 31.

Sullivan Hall Council is having a pinball and video game tournament. We need your input on game choices, organization, scoring methods, judging, etc. Call Mike at 839-1689, and come to a meeting in Sullivan classroom Wednesday, Feb. 27 at 7:30 p.m.

## SPECIAL EVENTS

Women of the World (WOW), a monthly international women's dinner and discussion group, will meet Tuesday, Feb. 19 at 6:30 p.m. at 2501 Clark Ave. Please bring a dish to share. Call 737-2451 for more information.

Each Thursday, students and staff are invited to attend an International Coffee Hour in the lower lounge of Alexander Residence Hall. Come enjoy refreshments and conversation. Upcoming coffee hours include:

Feb. 21, 11 a.m. to 1 p.m., Mennonite Church of Raleigh  
Feb. 28, 11 a.m. to 1 p.m., "POSTCARDS ON PARADE"

Le Cercle Francais, NCSU's French Club, will have its weekly conversation hour today at 4 p.m. at Mitch's Tavern. Venez Nombrex & Nombreux!

ATTENTION ALL CSC STUDENTS! The 2nd Annual Computer Science Career Day will be Feb. 23 from 9 a.m. to 3 p.m. in the Ballroom and Galleries of the University Student Center. Come hear local companies tell about what local businesses have to offer. Consulting firms, government jobs, educational jobs, private sector, and large and small companies will be represented. This is an informal event with refreshments.

The 1991 NCSU Libraries College Bowl Spring Challenge is slated to begin on Feb. 23 at the Erdahl-Cloyd wing of the D.H. Hill Library. If necessary, the competition will continue on Feb. 24. The challenge is open to all current students, faculty and staff of the university. Registration forms and complete tournament information are available in Room 3111 of the University Student Center. Prizes will be awarded, and food will be

## Corrections and Clarifications

Technician is committed to fairness and accuracy. If you spot an error in our coverage, call our newsroom at 737-2411, extension 26.

In Wednesday's issue of Technician, it was incorrectly stated that the women's basketball game against UNC was the last home game. The last home game of the season will be played Monday, Feb. 25, at 7 p.m.

served to all participants. For more information, call Claxton Graham at 737-2453.

SBPAMS is sponsoring a Black History Quiz Bowl on Feb. 27 at 7:30 p.m. in the Ballroom of the University Student Center.

## LECTURES/SEMINARS SESSIONS/WORKSHOPS

ATTENTION ADULTS AND ALUMNI RETURNING TO NCSU: A Saturday morning program has been designed for you, the individual who wants to rediscover your abilities. Do you want

to change careers, curriculum or improve your current situation? This workshop features hands-on training in classifying your goals, skills, and motivations. Learn how to locate the information necessary to make changes in your career. This workshop will be offered on Feb. 23 from 9:30 a.m. to 1:30 p.m. in 2100 Pullen Hall. Pre-registration is required and a \$15 fee covers all materials. For more information, contact the Career Planning and Placement Center at 737-2396.

Compiled by Jay Patel

## Judicial

Continued from Page 1

One individual was expelled upon being found guilty of sexual assault, according to Brian Buroker, NCSU chief justice.

There were 19 cases of illegal substance violations including underage possession of alcohol, DWI and drug possession and dealing. Sanctions for a guilty charge range from alcohol assessment school to disciplinary probation for two semesters.

Only five cases of academic mis-

conduct were handled by the Judicial Board. A guilty charge for academic misconduct, which includes cheating and plagiarism, results in sanctions ranging from 40 academic community service hours.

Many academic misconduct cases that are still being processed resulted from the fall exam period.

"There is a good academic misconduct program under the new code. I am pleased to see an increase in the reports to see. People, students and faculty included, are concerned in the integrity of the university," he said.

Sixteen cases were tried involving

miscellaneous offenses such as forgery, fireworks use and traffic violations. Sanctions for a guilty charge range from a written reprimand to 20 community service hours.

The new Student Code of Conduct was implemented during the first summer session. The revisions involve academic integrity, faculty participation and student rights.

The new code also provides a procedure manual to provide more clarity. Cousins said.

"Judicial Board is running very smoothly. We have made the transi-

tion to the new Code of Student Conduct and feel confident that the system is functioning in an excellent fashion," Buroker said.

"I am very pleased with the involvement of both students and faculty in our system. I look forward to selecting applicants for next year," added Buroker.

Applications for the 1991-1992 Judicial Board will be accepted until Feb. 22. The applications can be picked up in the Student Government office, on the third floor in the Student Center Annex.

## Film discussion in Stewart

### Technician News Services

An independent filmmaker will screen and discuss her film "Will" at 8 p.m. Sunday at Stewart Theatre.

Jesse Maple's "Will" tells the story of a drug addict who develops a close relationship with a young street orphan. Will gains the courage to overcome his addiction when he and his wife take the child into their home.

The event is sponsored by the Carolina Consortium, a film and video circuit established by representatives of local universities and art associations.

She is the first black woman to become a member of the International Photographers of Motion Pictures and Television Union in New York.

For more information call 737-2451.

## Wolfpack flirts with Robert Morris, wins by two

Bakalli nails free throws down the stretch to secure the Pack's 14th victory

By Thomas Baker  
Staff Writer

The N.C. State men's basketball team survived a scare Wednesday night by using tenacious defense and a balanced inside-outside attack to hold off pesky Robert Morris College 90-88.

The game truly went down to the wire. With 1.9 seconds remaining and the score tied at 88-88, State's Migjen Bakalli was fouled by Joe Falletta while attempting to grab a long pass from Tom Gugliotta. Bakalli stepped up to the line and calmly nailed a pair of free throws to produce the final margin.

"Bakalli has made as many clutch shots as any freshman I've ever had," Wolfpack coach Les Robinson said. "If there was an award for clutch freshman of the year, it'd

have to be him."

The Wolfpack seemed poised to blow the Colonials away early in the first half after following a nine-point run that gave the Pack an 11-4 lead.

The Pack led by as much as 12 in the first half, at 22-10 with 10:12 to play, but the Colonials charged back. Myron Walker's jam with three seconds left in the half knotted the score at 32-32.

The real surprise for the home crowd came at the start of the second half. The Pack came out flat and Robert Morris came out red hot, hitting 14 of their first 17 shots. The Colonials went on to hit a blistering 71.4 percent of their second half shots.

The Pack's offensive struggles allowed the Colonials to sprint out to a 61-50 lead with 11 minutes remaining.

Eventually, the Pack got into the groove

on both ends of the court. Once again, Rodney Monroe provided the offensive spark. He hit a three-pointer at the 9:10 mark to cut the Robert Morris lead to 7. He nailed another with 7:41 left to pull the Pack back within four at 69-65.

Following his teammate's cue, Chris Corchiani picked up the defensive pressure. His ferocious coverage of the Robert Morris backcourt allowed the Pack to cut the lead to 71-70 with 6:32 to play.

Corchiani also put in a great performance on the offensive end. He put in 24 points and dished out 10 assists, his ninth double-double of the season.

Corchiani has now moved up on the NCAA's all-time assist list, surpassing the 938 tallied by Oregon State's Gary Payton. His 939 career assists is second only to Syracuse's Sherman Douglas, who dished

out 960 in four years with the Orangemen. The Pack recaptured the momentum when Bakalli hit a three-pointer with 1:31 to play. The Colonials refused to yield, tying the score at 86-86 and again at 88-88, setting the stage for Bakalli's heroics.

"When you come back against a tough team in a pressure situation, it builds the team," Robinson said. "We were able to come back and keep our perfect record at home."

Robert Morris' deadly second-half accuracy helped them hit 51.2 percent of their shots for the game. The Pack rebounded from 39.3 percent shooting in the first half to 63.3 percent in the second and 51.7 percent for the game.

Myron Walker paced the Colonials' effort with 24 points and 9 rebounds. Ricky Cannon added 22 points and Andre Boyd chipped in 15.

Corchiani was the Pack's leading scorer

for the second time this season. Monroe finished with 23 points and Bryant Feggins muscled his way inside for 21, just two under his career high.

Robert Morris head coach Jarrett Durham was disappointed, but praised his team's gutsy effort in the face of a pressure cooker that has chopped up such nationally ranked teams as Duke and UNC-Chapel Hill. "Our guys came to play right from the start. It was a tough loss. The crowd would not let (N.C. State) die."

The win improves the Pack's overall record to 14-7, 11-0 in Reynolds Coliseum this season. Robert Morris falls to 16-10.

Despite the close call, Coach Robinson said the team must stay focused. "We've got to roll up our sleeves and try to pick up every win we can. Our goal at the beginning of the season was to make the NCAA's, and that's our goal now."

## Intramural basketball playoffs set

By Jay Taylor  
Staff Writer

Intramural basketball completes its regular season play this week. In the open A division the Juice Crew finished its season with a perfect 4-0 mark and looks to be a strong contender in the playoffs. In open C play, Bored Of Education took a 53-42 win over Tequila to improve to 3-0. BOE overcame a halftime deficit and used Mike Matthew's 24 points and Ken Joyner's 11 points to lead them to victory.

In fraternity play PKA, Delta Sig, Sigma Chi and SAE all look to have strong playoff performances. Basketball playoff brackets will be posted Monday, Feb. 18 and playoffs begin Tuesday, Feb. 19.

Session two of the beginning racquetball workshop will take place Tuesday, Feb. 19 from 6-8 p.m. on Court 10.

There will be a Hot Shot Free Throw Competition Friday, Feb. 22 from 5-7 p.m. on Court 1 in Carmichael Gym.

Informal volleyball will be Sunday, Feb. 17 from 6-8 p.m. on Courts 3 and 5 in Carmichael Gym.

Softball registration begins Feb. 18 and continues through Feb. 27. There will be a mandatory organizational meeting Wednesday, Feb. 27 at 6 p.m. in Room 104 Carmichael Gymnasium.

There will be clinics for officials Thursday, Feb. 21 at 5 p.m. and Monday, Feb. 25 at 5 p.m. Both clinics will be in Room 2014 Carmichael Gym.

Co-recreational volleyball registration will close Feb. 20. There will be a mandatory organizational meeting Feb. 20 at 7 p.m. Co-recreational badminton registration closes Sunday Feb. 24. Badminton registration for residence, fraternity, and residence/sorority divisions opens Feb. 25 and continues through March 13.

N.C. State's Bryant Feggins puts up a shot over Robert Morris' Magdi Dilal in hoop action Wednesday night in Reynolds Coliseum. Feggins finished the game with 21 points and seven rebounds.

Keep up with Wolfpack sports. Read Technician.

## Corchiani leads Pack by Colonials

Monroe's 23 leaves him six behind record

By Mark Cartner  
Staff Writer

Wednesday night's 90-88 thriller in Reynolds Coliseum between N.C. State and Robert Morris was a bit unexpected — for more than one reason. The 8,650 fans on hand weren't there just to see another Wolfpack win.

No, the victory was supposedly a given. The fans were there to witness a piece of N.C. State basketball history in the making. They came to see Rodney Monroe score 30 points and break David Thompson's career scoring mark.

What they got was a nail-biting, heart-stopping, down to the buzzer slugfest that relegated the Iceman to the backburner and made an unlikely hero out of a guy who scored only five points.

Freshman reserve Migjen Bakalli swished his only field goal attempt of the game, a three-pointer, then calmly stroked two free throws with less than two seconds remaining to seal the win for the Wolfpack.

Bakalli was obviously relieved in the locker-room afterward. "I was glad I got the opportunity to redeem myself. I was feeling had after I threw that pass away."

With less than a minute to play and State nursing a two-point lead, Bakalli threw a cross court pass that was picked off by the Colonials, who then knotted the score at 88.

Still, Bakalli's late heroics would

have been impossible without the inspired second half play of senior point guard Chris Corchiani. After a sluggish first half, Corchiani took control in the second stanza.

Repeatedly driving the lane, Corchiani tallied 20 second half points giving him 24 for the game. He also dished out 10 assists.

"I didn't feel I had to take over," said Corchiani. "I had a very sub-par performance in the first half and I saw a lot of opportunities in the second half."

Robinson saw things differently. "I think he (Corchiani) saw that we needed to win and he just took over."

Monroe, however, was held scoreless down the stretch but acted unconcerned after the game choosing to focus on the win and not on the scoring record.

"The team was probably focusing on (the record) really more than I was," said Monroe. "A couple of weeks from now you won't know what the score was — you'll just see the win."

Monroe's unselfishness in light of a potential record-breaking performance is evident in the number of shots he took. Needing 30 points to break Thompson's record of 2,309 points, Monroe shot just 15 times.

"We wanted to try and get that far Rodney in front of the home crowd," said Corchiani. "It's amazing how Rodney doesn't go out and force anything. He stays within the team frame of offense."

### Use those condoms

This is National Condom Awareness Week, which started the 14th and extends to the 21st. The idea is to make people — especially sexually active people — aware of the vast mutual benefits of using condoms.

The first concern for the female — and a hefty one for the male — is probably unwanted pregnancy, a problem that can be prevented by using a condom. If couples think it is a bother to stop and deal with a condom, they should weigh the bother of a short disruption of sexual excitement with the bother of having to care for a child from an unwanted pregnancy.

Another concern, one that takes lives instead of making them, is sexually transmitted disease. Condoms are only effective ninety percent of the time, that's true, but they are a lot better than no protection at all.

Furthermore, there are more than thirty known STDs, and one of every four Americans between the ages of 15 and 55 will catch one, or more, of these. By using condoms, people can be more certain about being in the vastly happier and healthier 75 percent section.

Many STDs do not have symptoms, so people may not know they are infected until permanent damage has been done. Bottom line: Be careful.

If you wonder if you are infected and want a confidential, safe diagnosis, call Planned Parenthood of Raleigh at 833-7534 or 833-7526.

Technician, of course, believes in safe sex. Using condoms is a good idea.

### NCSU must control funds

Last semester, the story came out that the College of Humanities and Social Sciences had its budget cut by 44 percent. A week later, \$100,000 appeared almost from nowhere. At the time, it seemed like something was amiss with whoever handled the money. Along with most of the student body, we at Technician wondered what exactly is going on. This is what we found.

The budget is prepared by the UNC system and then handed to Chancellor Monteith. He can do some things, but in general the budget is handed to him, telling him how much money he can spend in a certain area. This explains last semester when the CHASS cut was made. Then, Monteith managed to redirect money to ease the damage wrecked.

This is why we at Technician are outraged at the way money is handled by the UNC system. Instead of giving NCSU and the other UNC-system colleges the money and letting them decide where it should go, a subcommittee somewhere in the bureaucracy makes the decision. How can this system work?

If NCSU had the power to manage its own money, it may have been possible to avoid some of the hardship of the cuts and to avoid questionable purchases. For example, what is the arch by the library? No one here knows, and the State Critic is having a contest about it. We believe that the money could have been much better spent.

To put it in perspective, suppose that your parents sent you money and told you exactly how much to spend on pizza, groceries, video games, parking tickets, etc., down the line. To check on you they would require receipts and threaten removal from college if you didn't comply. Suppose your best friend turned 21 one month. You can't give up a month of video games to get the money, you simply can't buy him/her a drink without having to go dry for a while. That's about how it is with NCSU's money.

C.D. Spangler, please let us handle our own finances. We're adults now and we can take care of our own money.

### Remember our troops

#### Quotes of the Day

"Except for the few years between the invention of the Pill and the discovery of Herpes, sex has always been dangerous."

—Vogue Magazine

"If you really love her, wear a condom."

—Suggested Slogan for National Condom Awareness Week

#### Forum policy

Technician welcomes Forum letters. They are likely to be printed if they:

- deal with significant issues, breaking news or public interest.
- are typed or printed legibly and double spaced.
- are limited to 400 words and
- are signed with the writer's address, phone number and, if the writer is a student, his classification and curriculum.

Technician reserves the right not to publish any letters which is deemed inappropriate for printing by the editor in chief.

Letters are subject to editing for style, brevity and taste. In no case will the writer be informed before publication that his/her letter has been edited for printing.

Technician will withhold an author's name only if failure to do so would result in clear and present danger to the writer. Rare exceptions to this policy will be made at the discretion of the editor in chief.

The Forum is for the public to voice opinions on all newsworthy topics. Technician will consider all submissions, but does not guarantee that all letters will be published. No letters will mean that the public has no opinion worthy of publication.

All letters become the property of Technician and will not be returned to the author. Letters should be brought by Student Center Annex Suite 323 or mailed to Technician. Letters to the Editor, P.O. Box 8608, Raleigh, NC 27695-8608.

### Condom Week promotes awareness

This is National Condom Awareness Week, so don't be surprised if one of your friends calls you and says, "It's 2 a.m. Do you know where your condoms are?", because the inquisitive acquaintance is probably just testing your awareness of condoms, specifically your condoms. If your friend calls and says, "Quick. What percentage of the time does a condom protect against sexually transmitted diseases?" You should be prepared to make a snappy comeback: either be irresponsible and say "Shove off," or be an intelligent, responsible adult and say "90 percent."

If you answer 90 percent, you win the ditzy set and the luxury box of paisley designer condoms. If you answer "shove

#### Payne and Rothwell Opinion Columnists

off", you may receive a lifetime supply of uncertainty. Give such an answer in the bonus round and you may be eligible to trade in your uncertainty for a very serious disease or an unwanted pregnancy.

Also know, in case you're asked, that there are more than 30 different diseases, and that your chances of catching one (if you're between 15 and 55) are one in four. These are not good odds.

All you lovers should appreciate your condoms, not based solely on aesthetic

qualities, but because they will ward off nasty diseases like AIDS and babies.

Know also that since many STDs have no symptoms, a person may not know that he or she is infected until some sort of serious damage has been done, such as infecting someone else.

An analogy has been made between condoms and socks, though none of us have never seen argyle, or "sports" condoms with blue stripes and "Nike" on the side. Maybe little "footic" condoms exist, but if you are aware of that, it is your little secret.

Mike Rothwell and Barry Payne are sophomores majoring in English.

### Teachers are influential in our lives

Can you remember your high school years?

What's the first thing that comes to mind? Is it the warm, inviting smell of a freshly waxed gym floor, the sound of the bell that ended each class period, your best friend, or perhaps your favorite teacher?

Well, the other day when I thought back to that period of my life, my mind was full of pictures of past instructors. Every one of them, from the best to the worst, flashed before my eyes. And it made me think of how influential teachers were in each of our lives. They guided us both intellectually and mentally.

In addition to teaching us course material, they helped us with personal problems and even disciplined us when we needed it. Without their help, we wouldn't have had enough knowledge to be admitted to this university. Moreover, they helped lead us toward our career goals.

At least they're supposed to guide us toward our future — but do they? Unfortunately, through experience I've learned that one bad teacher can have a tremendous impact upon vulnerable teenagers.

Throughout high school, I had many teachers who encouraged me to pursue certain goals. They challenged, nurtured and put their faith in me.

#### Kathleen Stey Opinion Columnist

Naturally, I began to place confidence in myself as well. I took extra courses in their subject area, did outside work in the field and most importantly, I enjoyed what I was doing.

However, in my senior year, I ran into an instructor, who in my mind at least, will never win a teacher-of-the-year award. In fact, I tend to think that she's the rotten apple that spoiled the bunch.

Throughout the entire year, she ridiculed everything I did. I honestly can't think of one assignment about which nothing bad was said. More than once that semester, I went to bed frustrated and in tears. I began to despise her class, and the entire subject as well. By the time I'd graduated, I had even promised myself that I would never again do anything associated with her class.

Fortunately, with the help of a very close friend, I was able to overcome the mental block that I'd developed back in the twelfth grade. Now, after three years I'm doing exactly what I always wanted to do.

Nevertheless, when I think of the thousands of high school-aged children in America, I become upset. How many

students have been negatively influenced by their teachers? And, as a result, how many of them will end up in jobs they don't even like? Considering the large numbers of students enrolled in secondary schools each year, I'm pretty certain that I'm not the first person to be negatively affected by an educator. Furthermore, I'm sure that I won't be the last.

Teachers can make or break their students. If they care about their jobs, then students will excel. However, if they aren't committed to their work, they could very easily be destroying lives. That much power rests in their hands!

I wish that each and every high school instructor was able to realize the strength of his or her red pen. In addition, I hope that they try to use this dominance to push their students toward success instead of shoving them into a state of withdrawal.

When the education majors at this university graduate and begin teaching, I hope that they'll be dedicated to their profession and to every person that enters their classroom. Wouldn't it be nice if their teaching could be a positive instead of a negative memory for their students?

Kathleen Stey is a junior majoring in communications.

### Just a bunch of trash

I pose a question: Have you ever thought about trash cans? Aside from emptying them, I didn't either, that is, until one chilly February morn as I traversed the Brickyard (not the University Student Plaza, or whatever we're supposed to call it). Along the way I noticed three grounds workers replacing those 55-gallon drum-cum-trash barrels. I know you've seen those workers of American industry; brown, about 3 feet high, cylindrical. They are being replaced (if they haven't already) by new, lightweight, prettier, state-of-the-art trash bins. Now, if you figure that there are about 10 barrels throughout the Brickyard, and estimate the cost of a new bin at around \$50 each (plus the total labor of the three guys at almost \$75), you're looking at a price tag around \$575 for pretty garbage cans. Just when and where did the university allocate money to buy pretty garbage cans? What's wrong with the old tried-and-true 55-gallon drum? Sure, it won't win any awards for aesthetics, but it serves its purpose perfectly, if not beautifully. Also, these new bins look sturdy enough to withstand about one post-game celebration of students banging, beating and standing upon them. Just try to damage an all-steel 55-gallon drum — kick it, run it over — hell — torch it. You just can't break those things; that's the kind of durability needed as a furious student comes out of an exam just looking for something to kick the crap out of. The problem here is not new trash bins. The problem is that yet another misallocation of precious few university funds had occurred. Nobody wants an ugly campus, but in these times, doesn't it make more sense to spend

### Technician Campus Forum

money enhancing knowledge (via books for D.H. Hill or new lab equipment) rather than enhancing aesthetics? So next time you visit the "ole Brickyard," stop and admire the new; not of our renovated library, but of N.C. State's new decorative trash bins.

### Nathan was voicing a popular sentiment

I'm writing in response to Nathan Gay's article "Contest is Racist." To begin with, at about the time someone has spoken out about this growing problem. This university attempts to pride itself on its non-racist demeanor while at the same time it allows such blatantly discriminatory events to take place. This seems like a contradiction in terms. In addition, the new Student Center Annex is a joke. I will be the first to admit that Afro-American culture and history are of critical importance not only to preserve but to protect as well. However, lately this is getting a little bit out of hand. I can understand the need for an Afro-American Cultural Center but as Nathan Gay states in his article, what about the Hispanics, the Chinese Americans and the other groups that have contributed so vitally to the growing diversity of the "American" culture. Three floors dedicated to only one of the many facets of the American population is excessive. Also, why not have

an intercultural center representing everyone instead of concentrating on solely one group. I believe an injustice has been done here and should be remedied.

The Ebony Man contest is yet another sore point. How can this be viewed in any way but in a racist light. This contest expressly states that it is for black males only. How is this not discriminatory? I agree with Nathan, why not have an Ivyman contest or just a general beauty pageant, why segregate the competition? This is merely an extension of the propaganda won on shirts by many Afro-Americans stating, "It's a black thing, you wouldn't understand," "black by popular demand" and "black power" — just to name a few. You don't have to be a literary genius to understand the connotations implied. Understandably, one should take pride in their past culture and the Afro-American past is a rich one, but why put down other groups or promote supremacy by one culture instead of promoting understanding between these groups and appreciation of different cultures? The use of these shirts and the construction of these facilities only leads to the widening of the rift between the cultures. We should all work for the consolidation of these races, but by catering to the needs of one group more than the needs of the others, a feeling of resentment is formed and racist feelings come into play as a result. If the university works truly on a non-discriminatory policy, it should strive for equality in cultural representation and the promotion of cultural unity (the American culture, that is).

## Precision Engineering Center battles technical problems

By Troy Page  
Staff Writer

One of the greatest achievements of any engineering discipline is its ability to merge concepts with those of another branch of engineering or science.

At the Precision Engineering Center on N.C. State's Centennial Campus, this achievement is exactly what has been accomplished. Students and faculty from several schools of engineering have come together to apply their talents and knowledge to various problems and questions facing the technical and engineering professions today.

Tom Dow, director of the center, says that the focus of the group's activities is to "understand the limitations of current manufacturing methods" and if possible, to make improvements in the manufacturing process. One of the primary methods of reaching this goal is to alter the traditional approach to manufacturing methods.

Current manufacturing methods rely on practices that require products to be completed, then tested for efficiency or flaws. The staff of the Precision Engineering Center is trying to find ways to make the process simultaneous, both producing and testing at the same time.

Dow says this integrated process requires three crucial elements.

First, there must be a way of examining the process and product while in the production phase, which requires sophisticated sensory equipment. For this, the physics students and faculty of the center are developing various new instruments and methods of measurement, which are capable of examining materials and surfaces down to the molecular level.

Second, the producers must understand the process well enough to be able to modify it in the right way if the sensors and measurements indicate that it is needed. For this, mechanical engineering staff study the "process modeling" facet of pro-

duction.

Third, there must be a way of controlling the modifications, based on the sensor input and precise knowledge of the entire process. To this end, computer science personnel concentrate on the computer architecture and software designs necessary to control complex manufacturing systems and their instruments. They produce computer controllers for certain production processes with the sensors, process model and output controllers built in.

Other engineering disciplines represented at the center are electrical engineering, whose personnel work very closely with the computer science staff, and materials science, which concentrates on the wide range of materials involved in manufacturing.

Particular projects being carried out by individuals at the center involve different facets of the new production model, each specific to an area of study, but all are devoted to the overall goal of widespread improvement of production processes. To emphasize this point, Dow says that "the nature of university research is that it is not linked to a particular device, but to the principle of the project in general."

At the moment, the computer science staff is working with the concept of parallel processors, where two computer processors operate in tandem, essentially two computers working together. Dow says that the main problem is "how to divide the workload" of the processors.

At the same time, materials science students work with special materials, particularly fragile substances and their special needs in the manufacturing process. This is also an area of interest for mechanical engineering students who concern themselves with the limits of these materials in the production phase. In production, time is an important factor. Production that runs faster is less costly, but processes that run too quickly can

Peter Sweaver/Staff

The attached computer (left) is the controller for the Diamond Turning Cutting and Grinding table (right). It also is connected to sensors in the table that measure the accuracy and precision of the process.

ruin the desired results, and thus be a waste of time and money. So the question concerning the use of fragile materials in manufacturing becomes, according to Dow, "How do you predict how aggressively you can take off material without damaging it?" The mechanical engineering students try to design machines that allow greater control of the process, based on the specifications provided by the materials science staff.

Another crossover of disciplines between computer science and materials science is that of the use of the Scanning-Tunneling Microscope (STM).

The STM is a very powerful high-resolution instrument capable of producing electronic images of small clusters of atoms on surfaces. The STM is also able to alter the arrangement of the molecules of the surface, producing different shapes. These shapes, when arranged prop-

erly, may eventually be able to emulate the computer media model of binary language. This development would revolutionize the computer media industry, allowing for information packing at a far higher density than current magnetic media.

In fact, Dow says that according to a report released in the 1950s, if it were possible to achieve this information recording on the molecular scale, then it would be possible to record everything ever written on a surface the size of a credit card.

The current facilities of the Precision Engineering Center are located at Centennial Campus off Avent Ferry Road, but it began in December of 1982 as an extension of the mechanical engineering department. Originally, it was housed in Broughton Hall and made the move to its new location in 1988.

The first floor of the building is occupied by the center. The building

was built from a five-year, \$5 million federal grant, and Dow says that the facilities are "of very high quality; as high-quality as you would find any place in the country in a lab," noting that the center has measuring and manufacturing equipment worth approximately \$1.5 million.

### NORTH CAROLINA STATE UNIVERSITY NEWS RELEASE

Independent filmmaker Jessie Maple will screen and discuss her film, "Wet" at 8:00 pm, Sunday, Feb. 17, at Stewart Theatre.

The event is sponsored by the Carolina Consortium, a film and video circuit established by representatives of local universities and art associations.

Maple's "Wet" tells the story of a drug addict who develops a close relationship with a young street orphan. Will gains the courage to overcome his addiction when he and his wife take the child into their home.

Maple is a New Yorker who has produced and directed films for more than 10 years. She founded and operates 30 West Theater, a permanent screening room in New York that programs films by black independent media artists.

She is the first black woman to become a member of the International Photographers of Motion Pictures and Television Union in New York. Her book, "How to Become a Union Camerawoman, Film/Videotape," tells of her battle for union membership.

The Carolina Consortium is a vehicle for independent multicultural media artists and their films and video productions. It is in its first year, it is being co-sponsored by the NCSU Student Center, Duke University Program in Film and Video, North Carolina Central University Student Affairs and St. Joseph's Historic Foundation. It is supported by a grant from the North Carolina Arts Council.

Other February consortium programs in the Triangle area are:

Friday, Feb. 15, 8:00 pm, Duke Auditorium, North Carolina Central University, "Kiss Grandmama Goodbye," screening and discussion by filmmaker Debra Robinson.

Saturday, Feb. 16, 2:00 pm, Stanford L. Warren Branch Library, Durham, "Twice as Nice," screening and discussion by Maple.

Monday, Feb. 18, 8:00 pm, Bryan Center Film Theater, Duke University, "I Be Done Been Was Is," screening and discussion by Robinson.

For more information, call 737-2451.

**DO YOU LIKE SPADES, BILLIARDS, OR BACKGAMMON? WOULD YOU LIKE TO WIN MONEY?**

If so, come to "Game Night", the annual campus tournament held in the Student Center on Friday, February 15, 1991 at 8:00pm. The winners will compete against schools from the N.C., S.C., Virginia, Tenn., and Kentucky areas and will represent NCSU at the Univ. of Kentucky from March 1 thru 3, for the region 5 College Union Tournament. All transportation, lodging and entrance fees will be paid by the Indoor Recreation Committee of the Union Activities Board. You must be taking at least 3 credit hours and have a 2.0 GPA this semester.

If you have any questions, please contact: Eric Fairfax at: 847-3134

**CRYPTOQUIP**

2-15

GBQS YNUJYYNMAC GNAW

XQLQBNOAW KAJQRWA YA

JQO UYRKK UYCIRLY UYAX.

Today's Cryptquip clue: Y equals H

The Cryptquip is a simple substitution cipher in which each letter used stands for another. If you think that X equals O, it will equal O throughout the puzzle. Single letters, short words, and words using an apostrophe can give you clues to locating vowels. Solution is accomplished by trial and error.
