STATE SENDS 54 R. O. T. C. MEN TO CAMP McCLELLAN

"The Piedmont" Leads Transport Train of South-bound Ultra-Collegiate Skeeters

RANK HIGH IN ATHLETICS

Take Three First Places in Track Meet; Grub Line Rush is Major Sport

Once again State's cadets have successfully gone through the gruel of six weeks of intensive military training at Camp McClellan, Alabama, deriving during the sojourn much pleasure, little financial profit, and great military benefit.

State's transport train, which, by the way, was mostly Fords and the "Old Piedmont," carried a total of fifty-four students to the camp. Of this number three came back, one being too light, one too fat and color blind, and the other too short.

The cadets got a real taste of the term, "Go in a citizen and come out a soldier," in that all went in the large examination and clothing building, at the camp, attired themselves in their birthday clothes, and finally came out soldiers. The sudden change of style, which consisted of donning one of Uncle Sam's sun bonnets, heavy O.D. shirts, roadpacker shoes, and the other army paraphernalia, was liked none the best at first, but before six weeks had passed and the clothing had "shwunk up" to fit, things were going pretty smooth.

Much palaver has been given out about army grub, but the big rush three times a day was a major sport, and the art of washing one's own knife, fork, and spoon after each meal finally was done by a simple twist of the wrist in the buckets of hot water.

"That Alabama sun is hell," has been said and told many a time, but every mother's son that came away from the camp had "that school girl's complexion" and a feeling of renewed vigor such as that obtained only from taking Lydia E. Pinkham's Vegetable Compound for women's ills.

Athletics and amusements had a fitting place and an allotted time, so that if drilling and hiking did not use up all one's energy he could spend it on the baseball diamond, track, swimming pool, boxing ring, tennis court, or hiking to nearby places of interest.

State's team showed up very creditably in everything that they took part in. A very interesting novelty stunt was pulled stunt night by "Tubby" Robbins, "Doodle" Sides, and E. F. Monroe. The stunt con-

A. W. McLEAN, Governor North Carolina and Chairman ex officio Board of Trustees N. C. State College

PROF. HONEYCUTT LOSES LIFE ON FISHING TRIP

State College Faculty Man Loses Life on Fishing Trip Near New Bern

Professor Adolph J. Honeycutt, well known at State College as a member of the faculty in the School of Science and Business for the past three years, was drowned September 3, while on a fishing trip in the Neuse River. Five men were in the party, three of whom escaped with their lives when a strong northeast wind capized the small open gas boat in which they were making the trip. The boat was about twelve miles from New Bern at the time.

At the same time H. R. Gardner, of Pollockville, with whom Professor Honeycutt was visting, was drowned. The bodies were recovered near the scene of the accident by the crew of the U. S. Coast Guard Cutter Pamlico. Mr. Honeycutt, who was 32 years old, was a member of the faculty of State College, being connected with the Department of Sociology. He was a graduate of State College in the class of 1924, and received his Master's degree in 1925. Prior to graduation he instructed in sociology.

Prior to the World War Mr. Honeycutt attended Duke University (then Trinity College). When war was declared he enlisted and served overseas. Returning in 1919 from France, he entered State College.

Mr. Honeycutt was a lover of the outdoors and spent much of his spare time in hunting and fishing, according to his mother. He was fishing when the boat capized and threw the party in the river. Friends of Mr. Honeycutt stated that he was a poor swimmer and that his heart was weak, due to injuries received in the war.

Greetings! TO STATE COLLEGE STUDENTS

E. C. Brooks, President

At the opening of a new college year I wish to extend greetings, not only to the old men who are returning, but also to the new men. Our purpose should be stronger than ever before, in order that a new and richer spirit may prevail on our campus.

I am very happy to announce that two new departments have been added to the College—a department of Geology and a department of History. The undergraduate schools of Agriculture, Engineering, Science and Business, and Textile have been strengthened, in order that a background of genuine culture may be broader, the purpose of study more definite, and the direction of our energies may lead into a more wholesome life, which may contribute to the advancement of our social welfare, as well as to our industrial progress.

New construction on our campus, new developments in our curriculum, new equipment in our classrooms and laboratories, and additional teachers for our College are dedicated to the service of the young men who seek a new freedom on a higher moral and intellectual plane during the year 1926-27.

No year in the past has offered so many opportunities for worth-while achievements. A wise choice in the selection of a profession, a refined energy rightly directed, and patience to give the right a hearing will lead us to a plane of greater usefulness. State College seeks to aid young men in the organization of their habits and to a better direction of their tendencies to behavior in the social and industrial world.

Dr. E. C. BROOKS, President N. C. State College

COLLEGE BAND TO JOIN TOUR OF EASTERN N. C.

Will Accompany Raleigh Business Men on Good-Will Tour to Begin Sept. 23

"Daddy" Price's concert band of 30 pieces will swing into full action when, on September 22, they accompany the business and professional men of Raleigh on a "good will" tour of Eastern North Carolina and Southeastern Virginia. Major Early has signified his willingness to furnish uniforms, therefore the band will travel in full military attire.

For several consecutive years it has been the custom of the "Raleigh Boosters" to make a tour of some section of the state a few weeks prior to the State Fair. These trips were called "State Fair Specials." They have asked that the State College band accompany them to lend life to the occasion. On each and every occasion the boys and "Daddy" Price, the Director of Music, have responded nobly, and have been the "hit" of each tour. At the same time they have enjoyed the trip itself to the fullest extent.

This year there will be no State Fair, but the "boosters" are determined to "spread joy" in the same manner as of old.

The tour will tax the capacity of the two days allotted, as thirty-four towns will be visited, and thirty-four concerts will be given. In addition to the concerts, the band will parade in about a half-dozen towns.

Eighty-six business men have already signed up to make the trip, and it is expected that the number will swell to one hundred by September 22. The special train will travel over the Southern, Atlantic Coast Line, and Norfolk Southern railroads, and will visit, respectively, Selma, Wilson, Rocky Mount, Enfield, Scotland Neck, Suffolk, Norfolk, Elizabeth City, Eden, Washington, New Bern, Kinston, Goldsboro, and all intermediate points.

EXTENSION DEPT. COMBINED WITH LOCAL LIBRARY

Frank Capps Takes Over Administration of Library in Addition to Extension Courses

DESIRES TO BE OF SERVICE

Library Offers Greatest Opportunities for Pleasant and Recreative Improvement

The D. H. Hill Library is the center of study and research on the campus. Nor does it apply to the campus only, for it is soon to become a center of learning for the state at large. The offices of the Division of College Extension have been moved from Holladay Hall to the library, and Frank Capps, Director of College Extension, has taken over the administration of the college library.

Under the leadership of Mr. Capps it is planned to make the library an integral part of the extension work, books being let out to the extension students on the same basis as to the resident college students. Mr. Capps is well known to the people of the state, and it is believed that he can be of distinct service to the college community and to the state at large.

The class of 1930 is the first to be so fortunate as to have the full use of the D. H. Hill Library upon entering college. The building was completed during the last scholastic year, and the dedicatory services were held during the commencement exercises in June.

Mr. Capps believes that the measure of benefits to be derived from a well rounded college course is largely dependent upon and determined by the use the students make of the library. He is, therefore, anxious to assist in every way possible to make the use of the library easy, pleasant, and profitable. It is a service agency for the students and faculty alike, and all will receive courteous treatment and every assistance possible in the use of the library. Mr. Capps has an able corps of assistants and prompt and efficient service will be their aim at all times.

NOTICE

The first Orchestra rehearsal will be held on Monday, September 20th, at 4:30 p.m., at the band room in the Gymnasium. All old members and new members are requested to be present.

The first Glee Club rehearsal will be held September 27th at 6:30 p.m. in Pullen Hall. Both new and old members are expected to attend.

State College Represented At Blue Ridge Conference

For many years Blue Ridge has been the watchword of student Y. M. C. A. work in the colleges of the South.

In the past years it meant much to our own college and our own "Y." It is no doubt true that it has proved of greater significance this season than ever before, in the matter of preparation and training, for what promises to be the greatest and most useful year of work that our Y. M. C. A. has known.

The Student Conference, held June 15 to 25, was a little smaller from the standpoint of attendance than it has been in recent years. But the conference was very successful and proved to be a powerful factor in the life of those who were able to attend. State College was represented by A. B. Holden, J. E. Moore, W. J. Barden, Horace Springer, F. E. Plummer, David Worth, Prof. "Zippy Mac" Fountain, Dean Cloyd, W. N. Hicks, and E. S. King.

For the first time in the last three or four years our college had a representative on the Blue Ridge working staff. F. E. Plummer, Vice-President of the "Y" for this year and a member of the Senior Class in Textile Manufacturing, was our representative. Mr. Plummer spent a delightful and profitable summer. His position on the working staff entitled him to all the privileges of Blue Ridge, and to the advantage of two courses in the Southern College of Y. M. C. A. Southern College is located in Nashville,

Tenn., but holds its summer quarter of work at Blue Ridge, N. C.

During the last term of the summer quarter of Southern College a special group of courses for student Y. M. C. A. officers were given by the Southern Faculty. These courses were intensive and stiff, but were highly pleasing and profitable. Registered for this special work from July 23 to September 1 were: H. K. Plott, President of "Y" for this year; J. B. Britton, Treasurer of "Y" for this year, and J. E. Tiddy, Chairman of the Bible Study Committee. Student officers were present from a majority of the leading colleges and universities of the South. State College had the largest representation of student officers present for this special work. Jeff C. Davis, our student secretary of 1926-27 "Y" organization, was planning to be at Blue Ridge for this work, but certain changes in his plans for the summer made it impossible for him to get there.

Secretaries E. S. King and W. N. Hicks were at Blue Ridge for the summer as graduate students in Southern College. The Summer Faculty of Southern College was made up of certain well-known figures: Dr. O. E. Brown, Dean of School of Religious Education of Vanderbilt University; Dr. J. L. Keslar, of Vanderbilt; Dr. Uphaus and Dr. Baber, of Southern College. Both Mr. Hicks and Mr. King report a pleasant and profitable stay at Blue Ridge.

J. F. MATHESON President Student Body

It is most gratifying to see such a large number of new men registering this year, for it is excellent proof that State College is progressing rapidly.

In behalf of the student body I wish to welcome you to our midst, and to all the conveniences that our college has to offer.

When a man enters State College the most important thing for him to do is to become well acquainted with our honor system. We have a purely democratic form of government. The entire student body was directly responsible for our constitution and by-laws, therefore we must uphold them and strive to improve upon them. To do this much depends on the attitude and willingness of you, the Freshman Class, in adapting yourselves to our honor system. It will not only benefit the college, but it will be exceedingly beneficial to each of you personally.

It is useless for me to state the by-laws and explain the constitution of our honor system, as they are fully explained in our "Freshman Bible." Be sure to get a Freshman Bible immediately and get familiar with our honor system and our college activities. We expect your wholehearted cooperation in all student government affairs, and as loyal supporters of State College we shall appreciate everything you do for the advancement of this school, with which you and I are affiliated.

J. F. MATHESON.

H. K. PLOTT President Y. M. C. A.

The Y. M. C. A. is very happy to take this opportunity to welcome the new students, one and all, to State College.

The Y. M. C. A. on our campus is an organization for and by the students themselves. It has an employed staff of three people, a general secretary, associate secretary, and an office secretary, whose business it is to serve us in any way possible. These people will be very glad to make your acquaintance. They want to always be real friends to you and help you in any way possible.

The "Y" building is the social and religious center of the campus. We want you to make it your home. The "Y" is yours, and as soon as you get settled we want you to come over as often as you like, and not only feel at home, but act it.

We realize that no person or organization can be a success until all selfish motives are laid aside and are replaced by a spirit of co-operation and service. The effort of the Association is to help in any way every citizen of our college community to build himself into a "well-rounded" man. We hope that you will line yourself up with the program that we are attempting to carry out this year. There are also many other organizations on the campus which you should get in line with as soon as possible.

H. K. PLOTT.

Wolfpack Training At Summer Den in Hills of Western Carolina

The Wolfpack, running under the leadership of "Tubby" Logan, has been at its summer home, Lake Sega, Brevard, N. C., since Labor Day, and will return to their own domain Monday, growling and hungry for battle.

The Wolves, barring a few minor injuries, are in good mid-season condition and will be ready to open the eyes of the followers of the "pigskin" game on Friday when State opens its season on its own gridiron with Elon. Lake Sega is an ideal place for a training camp. It is located in the heart of the mountains of Western North Carolina. The cool nights and comfortable sleeping quarters make it easy for the Wolves to rest their weary bones after strenuous days of

hard muscle-bruising practice. Wholesome food, access to the lake for water sports, and swimming help to refresh the pack.

The Wolves are highly pleased with their training camp, and Director Miller states that the pack will probably train at Lake Sega for two weeks every fall.

The camp consists of three cottages equipped with showers and electric lights. The coach's quarters is called the "Wolf Den," and has in it their sleeping quarters and offices, medical supplies, etc. The other two cabins are turned over to the Wolfpack for sleeping quarters. The pack is fed royally by Mrs. Tinsley, who lives near the camp.

Electrical Engineering Dept. Prepared for Banner Year

Prof. C. W. Ricker, who has arrived in Raleigh to take up his new work in the Electrical Engineering Department of State College, carries with him the hearty endorsement of the students of Massachusetts Institute of Technology, from whose faculty he resigned to accept a position at State College.

In the August number of a M. I. T. publication, the leading article is devoted to Professor Ricker, which article closes with this paragraph: "There is a widespread sentiment amongst Electrical Engineering students that Professor Ricker is one of the best instructors at this institution. It is felt that he is a man who knows his subject thoroughly and who has the necessary personality to place this knowledge before his classes in such a manner that it can be readily assimilated. The result is that students have been able to place full confidence in his ability. Electrical Engineering men, especially, express their regret at his departure."

In an editorial in the same publication deploring the loss of such a man from the faculty of M. I. T., we read: "It seems to us that every resource of the department should be used to prevent the withdrawal of such a man." The addition of Professor Ricker is only one of the important steps taken by State College to strengthen the growing work of the Electrical Engineering Department, according to Professor William Hand Browne of the department. Two other men have

been added to the faculty: George L. Jeffers, a native of Virginia and a graduate of State College, class of 1915, and L. P. Spoon, who has been an instructor at Cornell University for the past three years. Mr. Jeffers was an outstanding student when at this institution, and has since had valuable practical experience with the Westinghouse Company and other large electrical organizations. Mr. Spoon, besides having had practice in teaching, has also had practical electrical experience.

Extension work in this department has also been pushed. Edward W. Ruggles, a graduate of State College, class of 1922, who since graduation has been with the General Railway Signal Company, is developing this work in connection with Prof. Frank Capps, Director of College Extension. Over one hundred men enrolled in the first extension course offered by the Electrical Engineering Department last year. Another course is now being prepared.

The Electrical Engineering Department of State College, which last year had an enrollment in the regular four-year course, of 261 students, is probably the largest electrical engineering department in the entire South. Its only close rival being Georgia Tech. In its growth, the department for years has reflected powerful development in the State and the growth of the electrical industry throughout the country.

Paragraphics

Hello, Freshmen! Glad to see you.

Even the grass is sympathetically green.

Better massage your shoulders. There'll be trunks to carry next week.

Now is the time for all good hayseed to make way for King Stacomb.

Eat, drink, and be merry. For the present, at least, we are the kings of the campus.

A man's education might well be measured by the time he spends in a good library. Start right.

Sure cure for Freshman homesickness: ask the Class of '28 how the campus looked when they swam in.

It is rumored that the whole student-body of Meredith expect to earn their numerals walking from bus to car and vice versa.

For the first time in history our first-year registration has topped the five-hundred mark. Probably because we had co-eds last year.

Look very carefully at the pictures and names of campus leaders in this issue. Note that John Anderson is NOT president of the college.

The statisticians tell us that there are 63 millionaires in North Carolina. Watch them strut about the campus next week in the guise of Sophomores.

It is deplorable indeed that we must again listen to the ancient "gag" about the Freshman who had to be enticed on the train by placing him between plow-handles.

In former years at registration time the campus has been a network of ditches, a sea of water, or the buildings have been in a season of repair. Now the weather is fine, the campus green, and the buildings in fair shape; so they have ripped up Hillsboro Street.

It is stated that when Mrs. Corson swam the English Channel a man followed her to within a mile of the opposite shore. Had he been a State College Freshman, and had she resembled some of the board-walk swimmers of our experience, he would have been there at the end.

The State Highway Commission has established a worthy precedent in loaning a truck to the Y. M. C. A. for the purpose of meeting freshmen at the trains. Only last year this same Highway Commission furnished transportation for the band to give concerts at the State institutions for the unfortunate. Such a spirit is commendable, and is thoroughly appreciated by the student-body.

GET STARTED RIGHT

Early in his college life a man should look about him and investigate the possibilities for development that lie in his path.

Whatever may be your aims at present, you will eventually be forced to admit that your academic work constitutes not more than half your college work. There are countless by-roads, many of them worthy ones, that lead one from the course of his daily grind of class work.

Among college students, as among all living things, you will find the mean and the two extremes.

You will still find the purely book-worm type of student, public opinion to the contrary. He is to be pitied. He ties himself to his books and fills himself with second-hand knowledge, but learns in no wise what to do with that knowledge when he has obtained it. He gets very little out of life, and gradually becomes dogmatic and narrow-minded. He belongs to the old school, and is becoming almost extinct.

At the other extreme you will find the purely "sheikish" type, the sleek, dapper young man who comes to college to spend his father's money in idleness and riotous living, and to appear to his fellows as being the most reckless and careless of their number. He is to be both pitied and feared; pitied because he doesn't realize that he is only preparing himself to be a parasite and probably a nuisance to society, and feared because he will cause many really worthy young men to follow him and waste their college life also. Fortunately, a large per cent of this type get lost in the detour known as the "flunk-out route."

As in almost every other case, the middle course is preferable. Choose only those extra-curricular duties that you believe will be most pleasant and beneficial to you. Put some real effort into them and you will not be going far wrong. You will soon find that the college community is over-organized. Because of this it is doubly necessary that you choose only those activities that you like best.

State Sends 54 R.O.T.C. Men to Camp McClellan

(Continued from page 1)

sisted of music furnished by "Tubby" at the piano, cantankerous contortions on a tin washboard by "Doodle," and superb Charlestoning by Monroe.

State went to the semi-finals in baseball—defeating the Mississippi Aggies and being defeated by Clemson. Clemson won the baseball championship.

The track meet was a good advertisement for State. With only three men scoring, they took away three first places, one second place, and two third places, getting fifth place in the meet. The teams getting second, third, fourth, and fifth were all about the same in scoring, there being but two and a half points difference between second and fifth place.

State had an aggregation of cars second in number only to Louisiana State University. There were skeletons, touring cars, and runabouts, with many varied colors, slogans, and designs. Not only did these relics take the men to camp, but all over the surrounding country. Jeff Davis's boat, the "Old Piedmont," made her third consecutive trip to camp and then took a cruise through the West. "Doodle" Sides Phord, "Leapin' Lena," took an even more extensive

Y. M. C. A. FURNISHES FREE RIDES FOR NEW STUDENTS

White Truck Furnished by State Highway Commission for Y. M. C. A.

"N. C. State College—a free ride for the freshmen—Y. M. C. A." Yes, a real free ride from the station to the N. C. State campus for all the freshmen was a part of the program of the Y. M. C. A. New Student Committee this year. No, there was no joke or trick about it, and no catch in it anywhere, as some of the freshmen were inclined to believe.

A large White touring car, capable of carrying ten or twelve passengers, was loaned by the State Highway Commission to the N. C. State College Y. M. C. A. for the purpose of bringing the new students from the train to the College. With the help of this car the "Y" has been able to do far more for the new students than it has ever done before. The big White touring car made trip after trip from the railway station to the campus, loaded down with future N. C. State students. Through the help of the State Highway Commission the "Y" has been able to render a service that it had not thought possible to render.

trip than did the "Old Piedmont," passing the old boat three times.

In rifle marksmanship again did State's men shine; a total of 22 out of the 51 qualified in marksmanship, two qualifying with howitzers, seven with machine guns, and 13 with the rifle.

L. Passalunig represented the Military Department at camp and he showed himself to be much interested in everything pertaining to camp life and State's welfare.

THESE DAINY FRESHMEN

Horace Greeley's words were paraphrased Thursday, when one of our instructors advised a certain young freshee to "Go to the Sir Walter." It all came about like this:

This freshee, who hails "rurally" from the scene of our first tea party and gossipers' convention (Edenton), was assigned to a basement room in "Old South."

"Aw, it ain't fit to put a dog in," says he.

"I don't want to stay in here," says he.

"I think it is awful to have to stay down in a pig-sty," says he.

"Go to the Sir Walter, then; they have nice pig-stys there," says our instructor.

We are daily expecting our friend of '30 to show up at the "Pen," asking if it is South Dormitory.

When **peg-tops** were in flower

PRINCE ALBERT has been the campus favorite since the days of long-haired fullbacks, high button shoes, turtle-neck sweaters, and hand-painted dormitory cushions. This same wonderful tobacco is even more popular in these days of plus-fours.

And no wonder. Throw back the hinged lid of the familiar red tin and release that rare aroma of real tobacco! Tuck a load into your pipe and pull that fragrant P. A. smoke up the stem! That's Prince Albert, Fellows! Nothing like it anywhere.

When problems press and your spirits slip over into the minus column, just get out your jimmy-pipe and load up with this really friendly tobacco. P. A. is so kind to your tongue and throat and general disposition. Buy a tidy red tin today.

P. A. is sold everywhere in tidy red tins, round and half-pound tin humidors, and round crystal-glass humidors with sponge-moistener top, and always with every bit of bite and punch removed by the Prince Albert process.

PRINCE ALBERT
—no other tobacco is like it!

THOMAS NELSON, Dean
Textile School

GREETINGS FROM THE TEX- TILE SCHOOL

The Textile School extends to all
Freshmen a welcome to State College;
to the privileges and opportunities
that can only be offered by a college.
This is a privilege that cannot be par-
ticipated in by every young man in
North Carolina, so all of you who are
so fortunately situated as to be able
to attend college should determine to
make the best use of the opportunities
that have been spread before you and
the talents that have been bestowed
upon you.

A cordial greeting is extended es-
pecially to the Textile students by the
faculty of the Textile School. It is
our hope that your stay with us will
be pleasant and profitable, and that
you may get from the college a full
measure of all it has to offer for your
advancement in education and a high-
er service to mankind.

THOMAS NELSON.

W. C. RIDDICK, Dean
School of Engineering

FACULTY IS A FRIEND

The School of Engineering extends
greetings and a cordial welcome to all
new students.

You enter, of course, with different
aims, but all of you with the purpose
to make a success of your college ca-
reers. May this purpose remain with
you.

You will be discouraged at times, no
doubt, but if you are faithful and ear-
nest in your work, careful in your ha-
bits of living, and sensible in your at-
tention toward the requirements of
the college, your stay here will be
worth while to you, and will be pleas-
ant as well as profitable.

The faculty of the School of Engi-
neering is anxious to be of service to
you in every possible way. A teacher
must, to some extent at least, be a
taskmaster, but above and beyond this
we want to be your helper and friend.

W. C. RIDDICK.

WOLFPACK WILL ENGAGE ELON CHRISTIANS FRIDAY

Team Will Return From Lake
Sega Monday to Resume
Training on Riddick Field

The State College Wolfpack will
open the football season at Riddick
Field, September 24.

The pack has broken camp at Lake
Sega, Brevard, N. C., and will return
to their old haunts to practice on
Riddick Field Monday.

The strength of the 1926 football
team is entirely an unknown quan-
tity, but all the early season dope
that has reached our ears has been
to the effect that the boys are truly
"putting out."

Three of the players are tempo-
rarily out with injuries, but it is be-
lieved that they will soon be in fit
shape again.

There is little on which to hazard
a guess as to who will start the game
against Elon, but it is safe to say
that Coach Tebell has no favorites,
and that any man who is "showing
the goods" will get a chance.

The game with Elon will be by no
means a set-up, as the Christians
are always fighting to the last mi-
nute of every athletic contest which
they enter.

If you must kick out something, try
a football.

COLLEGE THE TURNING POINT

There are few turning points in
life more important than entering
college. For the first time in his
career the student is compelled him-
self alone to make choices that may
have the most far-reaching effects
upon his whole future. He must
choose his curriculum, at least in a
general way; he must choose his
friends; and he must choose the use
of his time, whether he would or not.
State College attempts to offer to
its students opportunity to taste of

the best things of life and to be nour-
ished upon the kind of mental and
moral food out of which only can
good and successful men be made.

The faculty of the School of Science
and Business welcomes to State Col-
lege the freshmen and others new to

our campus. It hopes that they will
here soon learn to take the first steps
necessary to make life into a real
business of living and that to this
end they will learn to make their
choices, large and small, with an eye
to the effects.

FIFTH AVENUE, NEW YORK

Four-mile belt conveyor—the longest in the world—installed in a Pennsylvania mine
for transporting coal from mines to river barges. Electric motors operate this conveyor.

90,000 Wheelbarrows in one hand

A button is pressed. An electric motor goes
to work, followed by another and still others
until twenty sections of a belt conveyor
four miles long are in operation!

Through an abandoned mine runs this giant
wheelbarrow carrying nine thousand tons
of coal per day in a steady stream from the
miners to the coal barges on the Monon-
gahela River. One man controls it with no
more effort or concern than pressing a
switch button. Electricity pushes it.

Not only conveyor belts of all sizes, shapes
and kinds, but also hoists, tractors, cranes,
elevators, stackers, locomotives, and other
material-handling equipment have gained
flexibility, dependability, and ease of control
through electric motorization.

Moving things in one way or another is the
educated man's work in life. And electricity,
ever at his command, is moving more and
still more of the things which move this
new world of ours.

The General Electric Company
has devoted years of study to
material-handling and trans-
portation problems. In its own
vast plants the handling and
moving of materials and prod-
ucts have been simplified to
the highest degree, thus provid-
ing a daily demonstration of
the value of electricity.

A series of G-E advertisements
showing what electricity is
doing in many fields will be
sent on request. Ask for book-
let GEK-1.

AN INVITATION

Following the custom of cave men of old, who drew crude pictures on the walls of their dwellings, summer school students have left behind them various works of art, advertisements and the like.

In my room, written in girlish scrawl, appears the following advertisement: BEATRICE MALLOCK.

Rural Hall, N. C.: MINNIE DENNEY, 505 Highland Ave., Winston-Salem, N. C.; MILLY ANGEER, Winston-Salem, Route Three. "WRITE IF YOU SO DESIRE." Not being selfish, I am passing this ad on without comment. Bite, Freshman, bite. C. F. SHUFORD.

The latest thing in radio is receiving groceries by radio. Last night some one got Java and Hamburg.

CARL C. TAYLOR, Dean The Graduate School

LOOK INTO THE FUTURE

At first thought it probably seems a far cry to be calling the prospects of graduate work to the attention of the men who are just now registering as freshmen. On second thought, I am sure, many of the freshmen will agree that even this early, purposes for graduate study is not foreign to their plans. All of you have made decisions to be college trained men. Most of you have tentatively selected the profession for what you expect to train yourselves. Each of you purpose ultimately to be the best trained expert possible in your chosen field. In many cases that means you are looking forward to graduate training.

North Carolina State College is already better equipped in many ways to offer you that training than any other institution in the South. By the time you have completed your undergraduate training your Alma Mater will have larger and better equipped graduate school than is here now. To those of you who, at that time, want to go one rung higher in professional training it will offer a challenging invitation. Now, at the beginning of your college education, it invites you to take its services and prospects into your educational purposes and plans.

CARL C. TAYLOR.

I. O. SCHAUB, Dean School of Agriculture

AGRICULTURE PROMISING

It is a real pleasure to greet so many new men who plan to pursue an agricultural course. Agriculture has experienced serious economic difficulties for the past few years, but all signs now indicate a change of the tide, and when the Class of 1930 finishes its college work, agriculture should be on the crest of a prosperity wave. That would indeed be a fortunate time to graduate.

We welcome you, therefore, individually and collectively, and pledge you our hearty co-operation. I. O. SCHAUB.

MEREDITH FROSH WEAR CAPS; NO DATES YET

According to information tendered by a tender sophomore from Meredith to a tough tombstone buddy from State, the Meredith freshmen will this year wear a cap to denote their rating, or lack of it.

It is alleged that these caps are already designed and ordered, and that the world is waiting with bated breath the time when the young ladies of '30 shall strut their newly acquired crown down the boulevards

of Raleigh and Method. It is stated that the caps will follow the prevailing fashion of this time of year, being green in color and having red letters across the front of a size that he who runs may read and which will proclaim to the world that the wearer is a freshman. This industrious sophomore also discovered that there will be no dates dispensed at Meredith tonight, as this is closed night for the various club meetings. It is believed that the act of imparting this information will be a material saving of labor to the Hello Girls.

Welcome, Freshmen!--

The Pilot's Letter

Forest Park, Ill. June 16, 1926

The Parker Pen Company, Gentlemen:

At 4:10 P. M. yesterday I took off in my Yackey plane from Checkerboard field. When I reached an altitude of 3000 feet I leaned over the side and dropped a Parker Over-size Duofold Pen. A few minutes later I made a landing near my starting point, and a crowd was examining the same Parker Duofold pen, which had landed on hard ground. To my great surprise, the pen had not been damaged in the slightest by its 3000 feet drop.

Walter A. Aldema
Signed with the Parker that dropped 3000 feet.

Start School with a Pen that won't break—Dropped 3000 feet!

YES, the Parker Duofold Pen was tossed from an aeroplane at dizzy altitude to test our new Non-Breakable material "Permanite," and landed 3000 feet below—unharmd.

Tests such as this are the best guarantees that a pen will last practically forever.

For a year we kept secret the fact that Parker Duofold Pens and Pencils have barrels of this new lustrous, beautiful, light-weight Permanite until a whole series of heroic demonstrations proved that it does not break.

This black-tipped lacquer-red beauty is not only the smartest, shapeliest pen, but the greatest writing instrument the world has ever seen. Its yielding, super-smooth point is guaranteed 25 years not only for mechanical perfection but for wear.

Choose your point and color at any good pen counter. But look with care for the name "Geo. S. Parker" on the barrel—the mark of highest excellence.

Parker Duofold Pencils to match the Pens: Lady Duofold, \$3; Over-size Jr., \$3.50; "Big Brother" Over-size, \$4
