## PHI KAPPA PHI INITIATES FIRST WOMAN MEMBER

Mrs. Jane McKimmon, W. W. McCulloch, W. A. Yost, J. C. Mason, and M. W. McCulloch Receive Keys

## WILL RECEIVE B.S. IN JUNE

Home Economics Leader Graduated From Peace; Completes Work Here For Degree

A worthy page of history was created Tuesday night in the Y. M. C. A. when Mrs. Jane S. McKimmon, State Home Economics leader, was initiated as the first active female member of Phi Kappa Phi, national honorary scholarship fraternity, at State College.

Along with Mrs. McKimmon were initiated four men, as follows: W. W. McCulloch, W. A. Yost, J. C. Mason, and M. W. McCulloch.

Mrs. McKimmon is a graduate of Peace Institute. She has been in charge of the Home Economics extension work for several years. During this time she has found time to continue her studies at this institution, and has made an enviable scholarship record.

Mrs. McKimmon has only just started on her journey as a pioneer in the jungles of male autocracy at State College. She will receive her B.S. degree with the class of '27 in June, being the first woman to get a degree from this college. Other women have studied here, but none have ever completed all requirements for graduation.

## STATE SOPHS BANQUETED BY GIRLS OF MEREDITH

Good Attendance of About One Hundred Despite the Inclement Weather

The fair Sophomores of Dr. Charles' "Country Club" entertained the Sophomore Class of State College last Saturday night with a most enjoyable party. Even though the weather was not ideal, the attendance was good, about one hundred State men being present.

The program given by the girls was both unique and delightful. The guests were first given an opportunity to "date" their particular friends and make new ones. The party was then led to another auditorium, which presented the appearance of a most attractive night club. Enchanting candle light revealed small tables, decorated in honor of the Father of Our Country, and the old-fashioned, stately minuet brought back memories of his time, all of which was a setting for the burlesque, given by the girls, on George Washington's most famous saying, "I cannot tell a lie."

After this pleasing program, refreshments were served, which were in keeping with the decorations. Bessie Ray's orchestra furnished the music for the evening.

When the time for departure came, A. B. Holden, in the absence of President Moore, who unfortunately had a wrestling-team engagement, thanked Miss Edith Waters and her classmates, in behalf of the State College Sophomores, for the pleasant evening. An exchange of cheers between the two classes concluded the affair.

## PINE BURR SOCIETY PICKS SENIOR AND FIVE JUNIORS

At the spring election of Pine Burr Society, Thursday night, the following men were elected: W. W. McCulloch, Senior; C. J. Noblin, C. Z. Bailey, J. D. McCall, F. M. Williams, and H. H. Stott, Juniors. These men will receive their Pine Burrs Wednesday, March 2, at the chapel exercises.

The tentative date for Scholarship Day was voted for Wednesday, April 13; at which time there will be an address by some distinguished man; and scholarship awards will be made, carrying out the regular annual scholarship day program.

## CARD OF THANKS

The co-operation shown by the students in taking military, in signing the cards allowing The Agromeck to draw \$1.25 from their military deposit, to pay for the military section in the annual, is highly appreciated. The entire regiment went almost 100 per cent. We of The Agromeck staff wish to thank each man who co-operated with us in this project.  
1927 AGROMECK.

## STATE GLEE CLUB WINS THIRD CONTEST PLACE

Major P. W. Price Elected Vice-President Southern Glee Club Association

The first Southern Intercollegiate Glee Club contest was held at Greenville, South Carolina, February 18, in the Hall of Fine Arts at Greenville College for Women.

North Carolina was represented by N. C. State; Alabama by Alabama State; Tennessee by University of Tennessee; and South Carolina by Furman.

The contest was won by Furman. N. C. State lost by a slight margin, and took third place with 12 points out of a possible 300 behind Furman.

It was understood by the State club that the "Lotus Flower", the number selected by the national music committee, would count the greater part toward the contest. Accordingly, the club spent the greater part of the time perfecting that number.

Mr. Picanel, president of the National Glee Club Association, praised the N. C. State Club highly, stating that it sang the "Lotus Flower" more nearly perfect than any club at the contest.

Major P. W. Price was elected vice-president of the Southern Glee Club Association. Plans are now being made to hold a state elimination contest next year. Major Price expects to have the State contest in Raleigh. The Southern contest is invited to go to Greenville again next year.

## ANIMAL HUSBANDRY CLASS MAKE TRIP TO DURHAM

Professor Clevenger Carries His Class on Inspection Tour of Dairy Plants

W. L. Clevenger, professor in the Department of Animal Husbandry, accompanied by his class in advanced dairy manufacturing, made a trip to Durham, Thursday, February 17, to inspect several dairy plants.

While in Durham, the class visited The Durham Produce Company, The Durham Ice Cream Company, and The Lakewood Dairy.

The Durham Produce Company has been in business for about six weeks, and is not thoroughly settled down to business yet. The building is new and is equipped with new machinery, which is up-to-date in every respect. It is located about one block from the Southern Railroad, on the Chapel Hill side. Mr. Ashbough, the manager of the plant, welcomed the students, telling them he was glad to see so many men getting into the dairy manufacturing business.

The Durham Ice Cream Company has been in business for several years, and is one of the most up-to-date ice cream plants in Durham. Again the "set-ups" were on the manager when Mr. Baer treated the students to one of his fancy ice-cream dishes.

The class then proceeded to the Lakewood Dairy, which is about one and one-half miles out from Durham, on the Carolina road. Mr. F. A. Ward is the owner, and the dairy shows the results of his successful management. The dairy is one of the largest in the country.

The class received much benefit from the trip by seeing the plants and getting acquainted with the management of those plants. Those making the trip were: Professor W. L. Clevenger, J. F. Lutz, W. C. Orders, R. Strider, A. E. Shearin, G. S. Coble, S. L. Homewood, C. L. Straghan, S. C. Wilson, J. H. Pope, O. N. Henly, J. W. Temple, R. W. Zimmerman, and T. L. Moose.

## FACULTY CLUB IS NOW IN PROCESS OF FORMATION

Committee Appointed by Dr. Brooks to Submit Tentative Recommendations

## TO LOCATE IN HOLLADAY

Club Also Open to Graduate Students and Extension Division Workers

In the near future a meeting will be called for the purpose of forming a faculty club at State College, and will eventually culminate a project endorsed by Dr. E. C. Brooks, president of the college. A committee has been appointed to study the matter and to submit recommendations, which will, however, only be tentative. The members of the committee are: Dean B. F. Brown, Chairman; Dean E. L. Cloyd, Professors J. W. Harrelson, O. F. Greaves-Walker, T. P. Harrison, J. B. Derieux, F. E. Rice, A. H. Grimshaw, L. E. Wooten, Major C. C. Early, and Mr. A. S. Brower.

Dr. Brooks has consented to turn over to the club the large room on the southwest corner of Holladay Hall formerly used by the Physics Department as a laboratory. This room is well lighted, large, and can easily be made into a fine and attractive club room. All efforts will be made to keep expenses moderately low, yet to have a dignified, cozy, home-like club room with curtains, easy chairs, and the like. It will be a place where friends and faculty men from other schools may be taken.

Some of the features of the club will be the attractively furnished club room for the meeting of the faculty; a supply of magazines, books, periodicals, and daily newspapers; suitable games, including pool and billiards; suitable exercises, and recreations such as tennis, golf, and bowling; smokers in the winter, and picnics in the fall and spring.

The constitution and by-laws will be simple, and the only officers will be president, vice-president, and secretary and treasurer. No initiation fee will be charged, and admission will be as free as possible. The goal set is to secure every member of the faculty as a member. Dues will be charged and will be used to furnish the rooms as soon as they become available, and to be used only for furnishing and maintenance, not for construction, renovating the quarters, heat, light, or similar expenses.

The faculty men will become better acquainted, and will have a real touch of college life. The club will be open also to graduate students and to members of the Extension Department.

## Winter Term Exam Schedule Complete; Large Classes First

The winter term examination schedule has been made out.

One of the features of the new schedule is the fact that the examinations for the classes for which the greatest number of students are scheduled are placed first.

This plan will be the means by which the majority of the student body will finish exams early.

The schedule is as follows:

Classes having their first Will take their examination on  
Mon., 8.....Thurs., Mar. 10-9-12  
Tues., 8.....Thurs., Mar. 10-2-5  
Mon., 9.....Fri., Mar. 11-9-12  
Tues., 9.....Fri., Mar. 11-2-5  
Mon., 10.....Sat., Mar. 12-9-12  
Tues., 10.....Sat., Mar. 12-2-5  
Mon., 11.....Mon., Mar. 14-9-12  
Tues., 11.....Mon., Mar. 14-2-5  
Wed., 11.....Tues., Mar. 15-9-12  
Wed., 12.....Tues., Mar. 15-2-5  
Wed., 13.....Wed., Mar. 16-9-12  
Wed., 14.....Wed., Mar. 16-2-5

(1) Examinations will begin Thursday, March 10, at 9 a.m.

(2) No examination shall be scheduled or held by any member of the faculty before Thursday, March 10.

(3) The examinations will be held in the room where the classes have their recitation.

(4) Examinations for afternoon practice periods, and classes having their first recitation later than Wed-

## All Engineers, Attention

Be it known throughout the Earth and all other planets within a radius of ten trillion miles that Thursday, March 17th, is hereby set aside as Engineers' Day at State College.

In order that the day may be properly celebrated, all Engineering teachers and students are urged and ordered to prepare evidences of their learning and samples of their craftsmanship, and bring them together for exhibition in a Big Parade through the streets of Raleigh, and afterwards on the College Campus, to the end that we ourselves may more fully recognize our own greatness, and the people at large be convinced that Engineering is a learned and honorable profession, and that State College is the hub around which the wheel of Engineering revolves in North Carolina.

St. Patrick will be formally recognized as the Patron Saint of all Engineers, and a chapter of the Order of St. Patrick will be organized with appropriate ceremonies of initiation. Various other matters of great interest and importance will be settled. The day, and far into the night, will be filled with most interesting events, the final event being the "Grand Brawl," which will close somewhere around half-past midnight.

W. C. RIDDICK,  
Dean of the School of Engineering.

## STATE STRONG MEN FAIL TO RAISE ANNE ABBOTT

Sampsonian Strength Unavailing in Attempt to Raise 98-lb. Woman at "Y"

Herculean brawn failed when the Sampsonian strong men of State College strained biceps in the attempt to lift Anne Abbott's ninety-eight pounds of feminine daintiness from the Y. M. C. A. auditorium stage last Tuesday night, February 22.

State College men who heretofore thought themselves possessors of abnormal strength discovered to their dismay that even the combined strength of seven of them couldn't lift Miss Abbott, "The Little Georgia Magnet," from the floor.

Anne Abbott exhibited her ability to keep what she wanted when she dared one of her "twenty local gentlemen assistants" to pull a chair away from her. The only resistance she offered was lightly placing her hand upon him. She next overcame the combined efforts of four State College students to push a billiard cue along her hands as it lay at an angle of sixty degrees.

Miss Abbott brought her audience-baffling entertainment to a climactic close when she withstood the persistent efforts of nine men to push her to the wall, which was only a few inches away.

Anne Abbott said that when she was twelve years old she discovered that she could not be lifted, by human strength, against her will.

Since that time she has performed before the crowned heads and royalty of Europe, baffling the strong men of the entire world in her miraculous ability to overcome human brawn.

## COLLEGE BEEN SUBJECT TO RAVAGES OF THIEVES

Loss Estimated at \$7,500 From Birds Stolen From the Poultry Department

During the last few days State College has been subject to the ravages of thieves.

Some time during the early hours of the mornings of Friday and Saturday, February 18 and 19, the Poultry Department experienced loss of about thirty-five very valuable chickens. All of the chickens were being used for disease experimental purposes, and the loss of the experiments, which have been in progress for some time, is a great loss to the Poultry Department.

The closest estimate that can be made on the loss is \$7,500.

This theft is not the first that the Poultry Department has been subject to, but it is the most costly. Previous experience had caused the department to put in a burglar alarm, but even this was of no avail during the recent theft, because the thieves were well enough acquainted with its operation to disconnect the bell.

As yet no arrests have been made, nor is it likely that there will be any, for the heavy rains each night made it impossible to track the thief, or thieves.

A movement is already under way to ask for an appropriation to equip the Poultry Department with burglar-proof laboratories.

## Y.M.C.A. CABINET CONDUCTS MEREDITH VESPER SERVICE

Plott Takes Cabinet and Quartet to Christianize Meredith College Campus

Plott and his "Y" Cabinet had the pleasure and privilege of conducting the vesper service at Meredith College Sunday evening, February 20.

"Christianizing Campus Life" was the topic around which the program for the evening was built.

Jeff Davis opened the program by conducting the devotional exercises. The discussion of the main topic began with an explanation of the joint purpose of the college Y. M. C. A. and Y. W. C. A. by H. E. Springer. F. E. Plummer presented the methods of Christianizing the campuses of the world as advanced by Christ. This was followed by a discussion by A. B. Holden of the higher responsibilities that Christian student must assume. J. B. Britt concluded the discussion of the main topic by giving a short talk on the subject, "Campuses Christianized."

The program was enriched by two selections from the quartet composed of C. W. Orders, W. R. Marley, B. A. Presslar, and L. E. Hawes.

The Cabinet members who attended the meeting at Meredith were: "Red" Hicks, H. K. Plott, F. E. Plummer, J. C. Davis, J. B. Britt, H. E. Springer, A. B. Holden, F. M. Chester, and C. W. Jackson.

The members of the Cabinet and quartette enjoyed the visit to Meredith very much. Several of the members received such inspiration that they have planned individual visits to this institution for the near future.

## THE TECHNICIAN SURMOUNTS OLD GRAVEYARD LOT

Night Writers on Staff College Paper Have Misgivings Due to Psychological Effect

## EDITOR NEAR 3 GRAVES

First Holladay Hall Burned 3 Days Before Opening N. C. A. and M. College

Grave misgivings have lately been worrying the minds of those members of the Technician staff who do part of their writing at night; this is due to the recently-obtained knowledge that the Technician office is in close proximity to a number of graves.

Creakings, rattling window panes, and the moaning wind whistling around the corners of the Technician office's location, in the basement of Holladay Hall, are working their psychology and putting gray hairs in the venerable editor's shock of dark hair; and all because there are three graves just a few feet from his desk.

In the dim, forgotten past a noble and imposing edifice had arisen, which is the now venerable and weathered administration building—Holladay Hall. Three days before the opening of North Carolina A. and M. College, a fire broke out, which burned out a good many entrances to the building, so that the formal opening of the college was delayed until October 3, 1889, or pretty nearly a month. The setting fire to the building was a rebuke to those who had desecrated the graves that makes the building a hallowed spot. No direct evidence has ever been obtained as to who set the building on fire, since it was done during the night.

The history of the present location of the Technician office and near surroundings shows that a farmhouse, located about where the sun dial now rests, was occupied by a family named Lee. As was then a custom, often, to have family graveyards on—Continued on page 2.

## CANNON FRONT HOLLADAY SURVIVED SPANISH WAR

Flagpole Beside It Was Erected by Park in 1898, When Roosevelt Visited North Carolina

The cannon which now stands in front of Holladay Hall has had a very varied and colorful life. This gun went through the Spanish-American war on the Spanish warship "Riena Mercedes."

After the war, it was taken over by the United States, finally landing in Raleigh. It was placed in the old courthouse, and when that building was torn down, it was planned to put the cannon in the Hall of History, but on moving it it was found impossible to get it up the steps. It was then brought out to State College and dumped. Professor Charlie Park happened along, and put it in its present position.

The flagpole which stands beside it was also erected by Professor Park. This was in 1898, the year in which the late Theodore Roosevelt came to North Carolina.

## Mrs. McKimmon To Talk

Mrs. Jane S. McKimmon, Director of Home Economics of this State, is planning to deliver a lecture on "Man's Place in the Home." This lecture will be given on Tuesday evening, March 1, at the regular meeting of the Agricultural Club.

Mrs. McKimmon is an outstanding leader in her particular field of work, and is a very pleasing speaker. She was highly pleased when she received an invitation to speak to the college students. It is hoped that a large number of students will come out to hear her. The meeting is not confined to agricultural students alone, but is open to any one interested in the subject.

## PILLSBURY CORRECTS THE FORESTRY STATEMENT

Department of Horticulture Has Been Handling This Subject Until Recent Date

A letter has been received by the Editor of The Technician from J. P. Pillsbury, Professor of Horticulture, regarding the forestry course which has been recently instituted at N. C. State College.

The Technician recently printed an article which may have been misleading, inasmuch as the reader may have thought that forestry has never been taught at State College before. It has been taught before, as the following letter clearly shows:

Editor The Technician.

Dear Sir:—In your issue of The Technician January 22 the item in regard to courses in Forestry was somewhat misleading, in that there was no impression left with the reader that the North Carolina State College had ever before given any instruction in forestry.

From such class records as the writer could put his hands upon in a short time, he was able to secure the following data on the subject:

1905-'06	10	Reimer
1906-'07	4	Reimer
1908-'09	5	Reimer
1909-'10	10	Reimer
1917-'18	2	Pillsbury
1918-'19	9	Pillsbury
1919-'20	2	Pillsbury
1920-'21	3	Pillsbury
1921-'22	3	Pillsbury
1922-'23	4	Pillsbury
1923-'24	3	Pillsbury
Total	55	

This number of students, therefore, have completed a course in Farm Forestry at this institution. For the most part, this instruction was given to seniors, and the figures given refer only to the number of students receiving final passing grades on the subject; consequently it is practically certain that at least this number of men taking Agriculture in this institution have graduated.

This instruction in Forestry was given by the Department of Horticulture, as was natural, since forestry had its beginnings in horticulture, and because of the horticulturist's universal recognition of its value to agriculture. The subject was taught as an appreciation course which should present as much practical instruction on the subject of caring for woodlot areas as possible. Field work in neighboring woodlands, in silviculture and mensuration, with plans for improvement of the wooded areas

## War Dept. to Operate Seven C. M. C. T. Camps For Training 4th Corps Area

During the summer of 1927 the War Department will operate seven Citizens' Military Training Camps in the Fourth Corps Area for the training of young men between the ages of seventeen and twenty-four years. The camps will open on June 15 and close on July 14, 1927.

Four thousand men will be selected to attend these camps from the area which is composed of Tennessee, North and South Carolina, Georgia, Florida, Alabama, Mississippi, and Louisiana. The Army post for North Carolina is at Fort Bragg, where nine hundred men will be trained. The men living nearest their posts will be sent there. In the State of North Carolina, men from the counties of Buncombe, Cherokee, Clay, Graham, Haywood, Henderson, Jackson, Macon, Madison, Swain, and Transylvania will be assigned to Fort Oglethorpe, Georgia. Applicants from other counties will be sent to Fort Bragg, North Carolina.

All applicants between the above age limits must pass the required physical examination, must be of good moral character, must have the consent of parents or guardians in case they are under twenty-one, before they may be admitted. The purpose of these camps is to assemble ambitious young Americans for thirty days, and to train them in citizenship, self-reliance, initiative, good fellowship, moral and spiritual conduct, and how to work hard and efficiently.

Attendance at these camps constitutes no obligation of future military service. Scholarships to the leading universities, colleges, and preparatory schools throughout the United States are awarded annually to the young men attending these camps.

The mornings are devoted to military training, calisthenic and instruction in citizenship, hygiene, first aid, and marksmanship. The afternoons are given over to athletics, every man having to compete in some form of athletics. The camp is a part of the National Defense Act.

studied, constituted the practical work of the course.

The Department of Horticulture has in this manner been taking care of the interest of this work until proper recognition of its value and needs might be accorded it. The Department of Horticulture, therefore, joins with The Technician in rejoicing over the arrival of this long hoped for recognition in the establishment of a Department of Forestry.

Sincerely yours,  
J. P. PILLSBURY,  
Professor of Horticulture.

## Students Organize Popular Book Club

In keeping with the policy of State College in gradually expanding its scope of cultural education, an announcement is made by Professor J. D. Clarke that an organization of fifteen college students for the purpose of keeping in touch with the best and the most popular books on the market today has been effected. The organization of this reading group grew out of an informal discussion between Professor Clarke and the group of students taking his courses in literature.

The idea of such a group was started by the students themselves, centered around P. F. Burnham, a student of the Engineering School.

The plan of procedure of the reading group consists of buying a number of books, of modern interest, equal to the number of students in the group. The cost of such books will be distributed equally among the number. The books will be circulated among the members, thus making it possible for a member to read a number of books equal to the membership of the club for a nominal cost of one book.

As far as possible, the club will discuss the contents and merits of each book, either as a group of readers or between the individuals of the group. A general approach will be made to everything with a view of interpreting the life and merits of modern literature in accordance with what the best consider.

The nucleus of fifteen students who have willingly and spontaneously responded to form this reading course have expressed the desire that the group be increased to the number of twenty-one, or perhaps more. The desire is not to create an unwieldy large number in the organization, but to give every student, who willingly desires to read, an opportunity to get into the organization or to provide their enrollment in another group with the same purpose.

As soon as the members of the group have read all of the books, it is proposed that the books be exchanged for the books which some other reading group possesses, or to be sold or given to the college library.

The club has appointed one of its members to keep the student body informed of the latest and best books through the columns of The Technician. The first weekly report will be found elsewhere in this issue.

## JOINT STOCK LETTER FOR SAVING TIME

Saturday, A.M.  
Dear Mary:—Well, sweetheart, I'll just misspell a few lines to you to let you know that I still think of you.

Naturally our Terrors romped on the Elon crowd Monday nite. It was a pretty good game, but not in the class with the one we had with Wake Forest awhile back.

Wednesday nite those same Terrors left for Atlanta for the Southern Conference Tournament, where they are making a stab at the bacon, and we are looking for them to bring home more than the rind. All or none is N. C. S. motto, you know.

The other night the Colonial Dames threw a big hop at the auditorium. You should have seen those gallant gentlemen, in their lace collars and cuffs, sporting those swell old-fashioned dames in their pantaloons.

Friday, as I came out of the "Bull" Hall, I saw a big crowd in front of the bulletin board, and on further investigation, found the damnation schedule was posted. As usual, all of mine come in a bunch, which only goes to prove Morton's salt slogan, cause those exams are sure going relign.

I hope you enjoyed "The Big Parade" yesterday as much as I did. If you did, we had one grand time.

Darling, don't never forget I love you, and remember me in your prayers as I draw near to those —\*\*\*— exams.

Same as ever,  
TOM.

## The Technician Surmounts Old Graveyard Lot

(Continued from page 1.)

one's farm, Mr. Eason Lee and two of his children were buried just outside the east wall of the Technician office. How many more graves were here it is unknown, but in excavating the northeast corner, where the present Technician office now stands, a grave was dug into and the bones removed; a ghastly sight; and since that time it has been working its will in various ways.

When the college was first started, Ed Dickerson, one of the first night-watchmen on the campus, used to make his round frequently to inspect the "hash house," the old dining department, which occupied the position where the Technician office now stands, and it was there he could often be heard muttering and cursing that "damned white rabbit" which he shot at often but could not hit, and

## 1927 VOCATIONAL AGS BACK FROM TEACHING

Finish Required Three Weeks Practice Teaching in State High Schools

The Seniors in Vocational Agriculture returned last week-end after three weeks practice teaching in the vocational high schools of the State.

The Vocational Seniors all report that a very enjoyable and profitable three weeks was spent in the vocational high schools of the State. Some of the Seniors declare that the three weeks practice was of more value than a whole term in college. Some of them seem to have fallen for the ladies while away.

The Vocational Seniors are thirteen in number, and they are as follows:

C. M. Allen went to Woodleaf High School.  
J. J. Barnhardt went to Rosewood High School.  
W. R. Burnette did his practice teaching in Franklinton High School.  
J. W. Edwards spent his three weeks at Ingold High School.  
T. W. Hays at Lowe's Grove High School.  
J. R. Herman went to China Grove High School.  
C. R. Lambe practiced at Cary High School.  
C. A. Leonard was at Norwood High School.  
W. W. McCulloch went to Hiddenite High School.  
R. M. Morris gave his information out at Stanfield High School.  
G. A. Mann was sent to Grantham High School.  
B. G. O'Brien was exposed at Salemburg High School.

Ed was a good pistol shot, too. That leaping, hopping, shiny-eyed white rabbit, because all the effect a pistol shot had on it was to cause it to run in its hole at one of the graves and there take up its guard over the graves.

With the growth of the college, the dining hall was moved, and the college chapel was located in the basement of Holladay, where the Technician office now is, but certain scientists had caught the gleam, and with insistence they soon had these rooms and made them reverberate with the screechings of prony brakes and strange lights emanating from the X-ray lamp.

One teacher, and highly educated, too, used to stalk up and down the platform in his classroom, saying tick-tock, tick-tock, a veritable chant; but a will was working, and a room full of boys, known and called only by a number, would sit wide-eyed and gaping, because they, too, were getting next to the secrets that only this basement imparted.

Thus, through the years there have been bleak, desolate graves, fire and smoke, ghosts, graveyard rabbits, hash, religion, science, and publicity; a vast conglomeration of things and events that hinges around the location of the present Technician office.

But those graves, through the years, have warmed to the idea of companionship, the idea of closeness; so that even now during the fall, the pipes overhead begin to jump, and thump as with flendish glee, because the ghosts have come to love company, and they jump around and through the pipes to try and show their warmth to those members of the Technician staff who warm to the occasion, but still feel a bit of awe because of the grave situation.

## SCHOLARSHIPS GIVEN IN FOREIGN COUNTRIES

The Institute of International Education has announced several scholarships for study in foreign countries. Among these courses which will be given in the following countries: France, England, Germany, Austria, Spain, and Porto Rico, there are several given in literature, history, and the major sciences.

The French Government each year offers to American men ten positions known as "Postes d'Assistants." An assistant is required to give two hours instruction in English, and in return he receives room and board and the privilege to study at the school or at a nearby university.

The Czechoslovak Ministry of Education has offered five scholarships of \$500 each to American men and women who wish to study in that country. The scholarships will be available in 1927-28 at Charles University, University of Technological Sciences, Arts Academy, and the Commercial College. Knowledge of either Czech or Slovak language is required.

For a number of years the Ministry of Public Instruction and the University of France have offered scholarships to American students in recognition of those offered by American colleges. For 1927-28 there are several offered that carry tuition, board and room, while there are some that carry only tuition.

For further information, literature can be secured at the Technician office.

## Professor Pipe's popular illustrated lecture...

You can learn far more about TOBACCO from old Prof. Pipe, than you'll get by studying every treatise ever written on it. For Prof. Pipe is the world's most eminent authority on the subject... He knows tobacco from plant to pipe!

Experiments with every known species have convinced the Prof. that the one perfect pipe tobacco is Granger Rough Cut... He points out reasons for this conclusion: (g) the Granger-grade Burley, the choicest tobacco grown; (a) the Re-discovery of Wellman's mellowing method; and (c) the Cut of the large slow-burning flakes...

Prof. Pipe proves Granger, by practical demonstration—shows how it acts under fire... You never saw tobacco burn so slow, never tasted such cool, mild mellow-ness! The first pipeful is a liberal education! You'll put your Q. E. D. and capital O. K. on G. R. C. ... and all your pipe problems will be solved... forever!

## GRANGER ROUGH CUT

The half-pound vacuum tin is forty-five cents; the foil-pouch package, sealed in glassine, is ten cents.

Made for pipes only!

Granger Rough Cut is made by the Liggett & Myers Tobacco Company

## Maryland 'Old Liners' Licked By 'Gus' Tebell's Red Terrors

Twice Conquerors of Carolina, Maryland Quint Unable to Halt Tech Offense, Which Piled Up 25 Points in First Half; State Plays Best Game of Season.

In the final Conference game, before going to Atlanta for the Southern Tournament, the Red Terrors walloped the "Old Liners," of Maryland on the home court last Friday night, February 18, by the count of 38-23.

The Terrors started like a whirlwind and at the end of the half the State quint had piled up a total of 25 points, while the visitors had only scored 14 points. McDowell, Spence, and Brown led the brilliant first-half in scoring. There is no doubt but that the State Terrors played the best game of the season. Their system worked to perfection in the first half, their guarding was close, and their shooting ability was above par.

In the second half the Old Liners tightened down and the Terrors scored only 13 points, while the visitors scored 9. Before the game was over all the regular men were on the bench and the entire second string was in action. They also kept the situation well in hand.

Since the Maryland quint had defeated Carolina once the Old Liners had the edge on the Terrors by comparative scores, but the red-jerseyed five outclassed them in every department.

Harry Brown found his stride in this fray and scored from all angles of the court, to be high scorer for the evening, with 13 points to his credit. Spence closely followed with 10 points. McDowell held down the guard positions well and also contributed to the score.

Faber and Dean were the outstanding performers for the visitors. The former was high scorer for Maryland, with 7 points.

## ELON FALLS 33-19 LAST HOME GAME FOR TERRORS

Tech Quint Overcomes an Early Lead to Defeat Fighting Christians; Spence Scores High

The N. C. State Red Terrors rang down the curtain for the 1927 basketball season here in the Frank Thompson gymnasium Monday night by defeating the Elon quint by the count of 33-19.

It was an up-hill battle for the Terrors in the first half of the contest, for the Elon quint were in the lead until a minute before the end of the first half. At one time during the first period the visitors had doubled the score on the State five, but at the end of the half State was leading by the score of 13-11. Brown started the scoring for State. The Terrors did not work together as well as in the Maryland game, but they improved to a certain extent in the second period.

In the second half State scored 13 points before the visitors located the game late in the first period, and Goodwin was substituted. He played a very good game, contributing 6 points to the score. Spence was high scorer, with 11 points to his credit. McDowell was next, with 7 points. Spence, McDowell, and Goodwin were the outstanding performers for the Terrors, while Newman and Sims starred for the visitors. Sims was high scorer for Elon, with 8 points. Bock was next, with 7 points, but 5 of these were made from the free-throw line.

Substitutes—State: Goodwin (6), Gresham (2), and Young (3).

## FIGHTING ROOSTERS AGAIN VICTORIOUS

Invading the stronghold of the Mid-dlesex all-star quint Thursday night the Fighting Cocks found such opposition that a 25-17 victory looked mighty good to them.

The first half was clearly in favor of the Cocks, ending 15-6, but the all-star strengthened in the last half and threatened to overcome the lead.

Dickens and Roper were the shining lights for the chickens, while Dutch Holland was the big gun for the Stars.

The shop was deserted except for the cashier. A handsome young man strolled in.

"Do you keep motor car accessories here?" he asked.

The pretty cashier smiled sweetly.

"Only me," she replied.

## INTRAMURAL ATHLETICS

By T. A. VERNON

### RESULTS OF GAMES

Kappa Alpha, 34; Alpha Lambda Tau, 13.  
Pi Kappa Alpha, 18; Sigma Pi, 14.  
Sigma Tau Beta, 31; Lambda Chi Alpha, 9.  
Chi Tau, 16; Theta Kappa Nu, 5.  
Kappa Sigma, 16; Sigma Tau Beta, 27.  
Sigma Nu won on forfeit from Sigma Delta.

### STANDINGS INTRAMURAL LEAGUE

FRATERNITY				
Chi Tau	1000	Theta Kappa Nu		000
Pi Kappa Alpha	1000	Kappa Iota Epsilon		000
Sigma Tau Beta	1000	Sigma Psi		000
Phi Kappa Tau	1000	Delta Sigma Psi		000
Alpha Gamma Rho	1000	Sigma Delta		000

Kappa Alpha	500	Poultry Science Club		1000
Kappa Sigma	500	Civil Society		500
Sigma Phi Epsilon	500	Business Club		000
Tau Rho Alpha	500	Chemical Club		000
Sigma Nu	333			

### COMMENTS

Coach Doak announces that a majority of the fraternities that are entered in the league have not paid the dollar that was agreed upon with which to buy the cup. Coach suggests that all the teams pay the fee in order that he may buy the cup as soon as possible.

Chi Tau has surely set the bunch on fire. Three games last week and it seems as if they refuse to be beaten. They surely did romp on Delta Sigma Phi—held them to two lone points.

## W. & L. MATMEN WIN FROM STATE 16 TO 9

The State wrestling team lost the final meet of the season Saturday night, February 19th, when the Washington and Lee team scored 16 points to State's 9.

Competition was close, as indicated by the fact that six of the seven matches went two extra periods.

Meadows (W. and L.) and Wilkes (W. and L.), by throwing Morris (State) and Ginn (State), respectively, secured the only two falls of the evening.

The Freshman meet with Duke Saturday evening resulted in a win for Duke by a score of 16 to 11; however, five of their points were secured by a forfeit, due to a dislocated shoulder suffered by Jones.

### The Results

115-pound class—Smith (S) won from Driver (WL) with time advantage of 2 minutes and 30 seconds.

125-pound class—Wilkes (WL) threw Ginn (S) in the second extra period.

135-pound class—Rule (WL) won from Leary (S) with time advantage of 2 minutes and 45 seconds.

145-pound class—Moore (S) won from Tulley (WL) with time advantage of 3 minutes and 32 seconds.

158-pound class—Meadows (WL) threw Morris (S) in 4 minutes and 14 seconds.

175-pound class—Nicholson (S) won from Bolton (WL) with time advantage of 2 minutes and 44 seconds.

Heavyweight—Seligman (WL) won from Lambie (S) with time advantage of 2 minutes and 25 seconds.

### Freshman Summary

115-pound class—Goode (D) won from Wilson (S), on time advantage.

125-pound class—Starnes (D) threw Bell (S) in 4 minutes and 54 seconds.

135-pound class—Stainback (D) won from Frisbie (S) on time advantage in two extra periods.

145-pound class—Jennings (D) won from Jones (S) on a forfeit.

158-pound class—Chopin (S) won from Cole (D) on time advantage in 1 minute and 42 seconds.

175-pound class—Crowson (S) won from Warren (D) on time advantage in 2 minutes and 5 seconds.

Heavyweight—Smith (S) threw Johnson (D).

"Ah wants to return dese stockins and git my money back," said a colored woman, as she laid a package on the counter.

"Why, what's wrong with them, Aunt? Didn't they come up to your expectations?" asked the clerk.

"Lordy, no; dey didn't hardly come up to my knees."

Alpha Gamma Rho did Sigma Nu almost as bad. All the Sigs could do was to secure four points.

The Fighting Cocks, of the Poultry Science Club, just about clinched the honors for the Society loop. They turned in a win over the Civics Wednesday night. There was one more game to be played, but it may be called off. The Fighting Cocks certainly do have a good team and we would like to see them play the winners of the frat loop. It would be some game.

## RATS LOSE TO OAK RIDGE AND WIN OVER DAVIDSON

Doc Serron's Freshman cage artists left Monday night for a trip through the western part of the State, playing Oak Ridge and the Davidson freshmen while on the trip. Oak Ridge came out on the top of a close contest, the score being 41-40. The game was fast and snappy. Haar scoring 19 points for first place in the contest. The Little Terrors defeated the Redskins on Wednesday night by the score of 33-23. The Terrors showed up well in the passing division of the game.

After winning the game with Davidson, the victory gives the local yearlings the best claim for the championship. It is contended that the Duke fresh have not played as many games with "big five" teams as have the State freshmen.

## B. J. KOPP HEADS CLUB OF INTERNATIONAL RELATION

The International Relations Club, a new organization on the campus, which has been formed from the remains of what were the Cosmopolitan and Interstate Clubs, was launched Monday night. The meeting was held in the "Y."

The officers who will direct the fortunes of the new club are: President, B. J. Kopp, Connecticut; vice-president, H. B. Oberholzer, South Africa; secretary, E. C. Bailey, Georgia; assistant secretary, Ada C. Spencer, North Carolina; treasurer, Z. B. Mangum, Alabama; assistant treasurer, H. J. Watson, Massachusetts; faculty adviser, H. T. Leffer.

This club is a national organization, and much interest has been shown by the students from 20 other states and 6 foreign countries.

"He done me wrong," wailed the Algebra problem as the freshman handed in his paper.

## Tebell and Eight Red Terrors Leave For S. I. C. at Atlanta

State Draws Gamecocks as First Opponent in This Year's Tournament in Southern Basketball; Practically All Teams Have Made a Good Showing So Far.

Coach Tebell and eight Red Terrors departed Thursday night for the Southern Intercollegiate Conference basketball meet, to be held in Atlanta, and which will have already begun by the time this paper gets to the press, when the Terrors will have played their first Conference game with the Gamecocks of South Carolina. Although the Gamecocks have lost only one game this season, and that to W. and L. State quint has the edge over them by comparative scores. State has defeated the W. and L. five.

Coach Tebell took Gresham, Spence, and Williams, forwards; Watkins, McDowell, and Childress, guards; Brown and Goodwin, centers. Watkins, Gresham, and Brown will represent State College for the last time in basketball. These three men will graduate in June and have played three years of Varsity basketball.

This is the third time in as many years that the Red Terrors have been sent an invitation from the officials of the Conference. Last year the Terrors defeated the Auburn Plainsmen in their first game, and in the second contest three extra five-minute periods were necessary in order to play off the tie with the Mississippi Aggies, who were runners-up in the Tournament. This year the State five have as good a Conference record as any of the teams entering. All have lost at least one game. State has the same record as the Tar Heels, who dropped two games to the Old Liners, of Maryland.

## AGRICULTURAL CLUB HOLDS REGULAR MEETING

The Agricultural Club held its regular meeting in Patterson Hall last Tuesday night, and one which proved to be very interesting as well as instructive.

The following program was rendered: H. M. Willis gave a short talk on "How I Can Benefit My Community by Taking Agriculture." C. A. Leonard gave a report on "My Experience as a Teacher," as he has just returned from his three weeks of teaching, required of Seniors in Vocational Agriculture. J. L. Fort talked on "Problems on the Poultry Farm in the Winter and Spring." W. A. Alexander gave a talk on the "Evaluation of the Farm."

The business matter brought before the club was a discussion of the annual spring reception that is to be given in the near future.

## AMERICAN CHEMICAL SOC. MEETS RICHMOND, APR. 11

As host to the American Chemical Society, the Virginia Section will entertain the society in the annual spring meeting to be held in Richmond from April 11th to 15th. This is the first time that the spring meeting has been held in the South, although several years ago the fall meeting was held in Birmingham. In view of the fact that there will be fifteen hundred chemists from all over the country at the meeting, it will be a great advertisement for the South.

"I caught my husband kissing the maid, so I made him promise me two new gowns."

"Of course you discharged the servant."

"Oh, no, not yet. I need a fur coat."—Boston Transcript.

## SPRING FOOTBALL FULL SPEED AHEAD

Freshman Athletes Are Showing Stuff; One Dark Horse

The annual spring football practice opened up here on February 14th and is showing results. The first scrimmage was held Tuesday afternoon on the Freshman Field.

The practice began with about forty men trying out for the team. Since that time many new faces have appeared on the field and now the squad numbers between fifty and sixty men. Coach Tebell says that within a week all the Varsity men will be out, with the exception of Outen and Evans.

The purpose of the spring practice is to acquaint the new men with the fundamentals in blocking, tackling, carrying the ball, and to help them to master the formations for next year.

The first scrimmage was held yesterday afternoon with everybody going like a house on fire. One of the outstanding features of the first scrimmage was the sensational running of George Silver, a freshman rookie. This lad had never seen a game until last fall, and his first try was made Tuesday afternoon with everybody going impressed with his work and predicts a great future for the youngster.

All men who wish to learn the game from the bottom up are urged to come out. The daily menu from now on will be drills in fundamentals and training and a short daily scrimmage.

## Borrowed Bits o' Bull

Before electric signs were invented actors were obliged to make their reputation by acting.—Seattle Post-Intelligencer.

We learn with interest by way of the *Dearborn Independent* that Eskimos can't swim. Well, there wouldn't be any fun in going to a beach inhabited by weavers of fur bathing suits.—*Greensboro Daily News*.

Charlie Chaplin, it appears, is again starring in the Gold Rush.—*Life*.

For the dental association we suggest the slogan, "Be true to your teeth or they will be false to you."—*Salt Lake Telegram*.

The orators are said to hold their audiences spellbound, but more frequently the trouble is that their feet have gone to sleep.—*The Newbernian*.

We imagine we hear the Chinese asking who has a better right to use gunpowder than its inventor.—*Pittsburgh Chronicle-Telegraph*.

## Paragraphics

Time passes too swiftly. We should like to see more basketball games.

The Fighting Cocks are gaining state-wide recognition. Fight always does.

With football, baseball, basketball, and track practice, the athletes are quite busy.

The women are slowly making inroads into our sanctum. Mrs. McKimmon is now a member of Phi Kappa Phi.

Since moving into our new quarters we had hoped for a really literary atmosphere, and now they tell us that the Faculty Club will be our nearest neighbor.

This being an agricultural college, we have heard much discussion of the Haugen-McNary bill. The most enthusiasm that we have heard is that "it MAY help."

Every man is entitled to his own opinion, but we fail to see how any real State College man can afford to miss the acquaintance of the high school boys who will be with us next week.

## NOT PERSONAL COLUMN

We have received additional contributions for the Student Forum concerning the extra drill controversy of the last two weeks.

It is our policy to print any signed articles concerning controversial subjects that are of interest to the student body, and we should like to print these contributions. But we find that in this case there is a resort to personalities, for which the Student Forum was not created. The extra drill period idea has been abandoned; both sides of the controversy have been heard from, and there is no cause for a personal discussion of a dead subject.

## MINISTRY AND MILITARY

There has been a tendency on the part of the daily papers of the state, led by the *News and Observer*, to attribute the cause of the slight military discussion at State College to a sermon against war by Dr. J. A. Ellis, pastor of Pullen Memorial Baptist church.

This attitude is unfair to Major Early, to the student body, and perhaps to Dr. Ellis himself.

We were not so fortunate as to hear the sermon in question, but according to the information reaching us the military training at this institution came in for no criticism, since there is little indication of militarism of the admittedly dangerous type here. Dr. Ellis's reference to Major Early was not made in any personal way, but only as the only representative of military training in the audience.

We have great admiration for the ministry, but we have not the imagination to believe that Dr. Ellis's sermon so affected the student body and Major Early that the military structure at State College is tottering on its foundations, ready to topple over.

## AN EDITORIAL INNOVATION

Beginning early in the third term the prospective candidates for editor of THE TECHNICIAN during the next college year will get a chance to take their "baptism of fire" in actual editorial work.

It has never been a custom at this institution to ask or allow prospective editors to try themselves out for the benefit of the student body, or for the satisfaction of their own curiosity concerning editorial endeavor.

The result has been comparative ignorance on the part of the student body concerning the qualifications of the different candidates. Because of this there would often be a lack of enthusiasm over the elections.

This year there are four men who loom up as the most likely choice for editor. We who have observed their work find little to choose between. We have determined, therefore, that soon after the first of next term we shall create a precedent by allowing each one of these men to edit the paper for one week. We hope that the student body will be interested in these "trial issues," and that they will pay special attention to the editorials, as they will be, in a sense, the campaign speeches of the different men.

It is not now definitely known who will be asked to try his hand at the helm, but we are fairly safe in predicting that the following men will be the provisional editors: W. L. Roberts, S. V. King, and C. Z. Bailey, juniors, and A. L. Aydlette, sophomore.

Each of these men is well qualified to take hold of the editorial work, and will probably get more pleasure and real experience out of editing one issue than in working for months in his present position on the staff.

Complete details will be worked out later, but it now appears that the present editor will be detailed to take over the work left vacant by each provisional editor in turn.

The Engineers' "Grand Brawl" approaches, but the formidable wall of examinations cuts off the view.

We feel that our education will never be completed, due to the fact that we failed to see the latest "yellow journal" which was posted on the dining hall bulletin board.

## ORIENT and OCCIDENT

A. Laurance Aydlette

Slowly but surely the imperialistic factor of American government is stretching forth its grasping arm over all the western world. Slowly but surely the domain, potential or advisory, of the United States is spreading over both North and South America. Gradually one country after another is becoming dependent on this nation. The United States already is dictator of the policies of the government of Haiti, Cuba, and Santo Domingo. Now it is assuming control of the small Central American republic of Nicaragua. President Diaz has requested the State Department of this country to take over the control of government in the Latin American territory and to retain control for several hundred years.

When President Monroe made his famous statement to European and other foreign nations to keep out of the western small nations he erected a barrier, in one sense, politically, that will for some time keep the Eastern governments from interfering in affairs in the western hemisphere. He made the Americas safe for Americans. Politically no European nation can work in this part of the world, but financially the nations of Central Europe have a strong hold on the South American countries. The East can do nothing to endanger the West, however, without involving the United States, a country which is today recognized and feared the world over except in some respects.

The Americas are protected well enough from Europe, but they are open with no protection to the ravages of a western country might wish to make upon them. The United States has and is protecting the American world from the European, but it has failed to place any barrier that will protect the American countries from the United States itself. Madison probably never thought of the possibility or the danger of this country ever assuming control of the western hemisphere. And yet today American imperialism slowly is spreading.

It has been said that oil interests have long been advocating the annexation of Mexico. Mexico is a very backward country as the result of the Spaniards during their control in tropical America. Spain ruled her colonies with an iron hand, considered them only as workshops to produce the precious metals with which they were so plentifully supplied. She never allowed any manufacturing or home industries in her possessions and kept the people in a subjected and a dejected state for centuries. Today only a few of the countries have thrown off the early influences of Spain.

Mexico is not one of these countries. To annex Mexico would set back the United States by just so much as the southern country is backward. The resources, wealth, and knowledge of this country would be for several years pouring into the Latin-American world in an attempt to bring it up to our standards of living, commerce, civilization and morals and religion. It is probably inevitable that this country, if it survives long enough, will assume control over most of North America and perhaps a part of South America as well.

Until the rest of the world becomes as well off in government, civilization, and resources as the United States the imperialistic trend should be curbed. Only when the time is ripe can this country assume command of the western world and dictate the policies of government. Yet slowly American imperialism is working toward such an end.

## Uncle Dudley's Opinion--

## POLITICS

It is only a short time now before the different elections come off for offices to be filled next year. You should start thinking now and should give serious attention to the men who will fill these offices.

It is the duty of every State College student to vote at these elections and to do it wisely. Your political situation here is just a step below what will be expected of you when you leave college. It is a privilege to have a vote in the election, and you should value it highly.

If the officers elected are not your choice after the election for student government, and if you did not vote, what right have you to complain? That is something that happens each year. There are many students who are not interested enough to vote, yet they complain because their men were not elected. Perhaps you are guilty. If you are, I am writing this to you. It is your duty to yourself, to your fellow students, and to your college to vote for the man who is best, in your estimation, for the office. Be square, and give your man your loyal support. Politics is a great game if conducted on the right plane, but it can also be a curse on any college or nation if controlled by unworthy hands. Your vote is the greatest privilege you have as a citizen of the United States, and you must realize this while you are in college.

Some of you take no part in the election and you feel that there will be enough votes from others to carry on the elections. You are doing your college and yourself a great injustice by feeling that way. If your privilege to vote was taken away from you, you would assume quite a different attitude toward it.

There is no use for me to discuss the different issues of this question, for you know as well as I do what your duty toward this is and what you should do. I am asking you to do your duty in the coming elections and help your fellow-students to do theirs, so that the right men shall be placed in the position they are capable of filling.

## PULLEN SOCIETY ELECTS OFFICERS OF NEXT TERM

Pullen Literary Society held the election of officers for the spring term at its meeting of February 18 because of the fact that the time was growing short to get the names of the members and officers in the Agromock. The regular program was dispensed with, and a smoker was held while the election was in progress.

## Famous Business Analyst Looks at College Sports

Here is what Roger Babson says he would do with a college if he were its president:

I would cut the college course to two years;

I would put in a time clock and make the students punch it;

I would make them work eight hours a day;

I would train boys to habits of thrift, punctuality, conscientiousness, and check up on them;

I would get rid of big business athletics—football games and tickets at \$5;

I would restore athletics to the many;

I would get rid of college snobbery, and stop waste of time.

## Babson Speaks

Speaking of the average student's attitude in regard to college, Mr. Babson says:

"He thinks a college education an immunity from hard work."

"The shame of the colleges is that they are mangling the emotions of boys. How can boys have any respect for substantial things when football coaches get more salary than football presidents; when to make the football team, the baseball team, the college paper, is the only open sesame to eliteness, a fraternity, a chance to associate with the boys who count, and whose friendship is counted upon as the first step toward success because of these boys' wealth and influence, a chance to drag a girl to a big prom and have the boys whisper, 'There goes 'Goodness'; he is the end of the football team, president of the 'Oofs,' he has a Marmion roadster, he's a fine fellow and a BIG man!'"

## Big Business Sports

"And the greatest offender against a proper college environment is big business athletics, and particularly big business football. The spirit of big business is going out of our colleges. Today, men play sports in our colleges so as to make the social grade in college. Sport for sport's sake is gone. In its place we have a specialized set of athletes whose business is to win for the glory and prestige of the college they represent."

"Think of the disgusting importance recently assigned to the break in the football relations between Harvard and Princeton. One would have thought that the progress of education depended on football relations. 'All this importance given to football is deadly psychology to the boy in college.'"

"Furthermore, big business sport in college today is restricting true sport. I approve college sport. But I am opposed to making a god of sport or in making sport only for the few. The only legitimate excuse for sport is to encourage sport. A generation back and the whole college played sports. Then we began to specialize in sport. We began to concentrate on winning, on making games huge spectacles. From that moment the spirit of play went glimmering. Today only 5 per cent of the student body play on college teams, and only about 10 per cent are interested in any way with actual playing of sports. We must raise that 5 per cent to 90 per cent, and the way to do it is to get rid of big business athletics in our colleges. Stop training teams to be spectacles in a big hippodrome."

"As things now stand, it is impossible for our colleges to produce brains in competition with raccoon coats, social proms, football celebrities, track stars, basketball wizards and fraternal mumbo jumbo."

## No Character Building

The interviewer then asks his subject, "I once heard you say, Mr. Babson, that the development of brains was not the most important thing for our colleges to develop. I believe that you said the cardinal deficiency of our colleges is that they failed to develop character."

"Yes, and for this reason," continued Mr. Babson. "A man with knowledge and without character is dangerous to society. A man without knowledge or character is a dead loss."

"By character I mean training in habits of integrity, concentration, honesty, punctuality, thrift, and the like. Our colleges should begin to think about the development of character. I had two friends in college. They went to the same classes, had the same professors, got approximately the same marks. Today one is conducting a great campaign for better tenement sections in our cities. The other is in New York advising manufacturers how they can beat the Pure Food Act."

"What we must do is to develop character in college. Formerly a boy came to college with character. He had been used to working about the house doing chores. A boy was serious-minded when he matriculated at college. He brought character with him. The result was that he acquired knowledge because he had this serious characterful outlook on a college education. Today a boy is coddled for 20 years. He is raised on the indulgence of father's pocketbook. He enters college with a taste for luxury and indolence. He is unable to resist the appeals of athletics and the instinct for importance they feed. Formerly a boy went to college to get

## Professor Zip says--

ANNE ABBOTT typifies her sex—she never moves till men are wrecks, who try to lift her from her place, to get a glance into her face. Big Nick and Charlie Lambe are bruised, as though on gridiron roughly used, because they strained in vain to lift this girl with magnetism's gift. They tugged and strained their eyeballs grey, to find some plan or means or way to raise this midget human frame, but all their works went down in shame. Big Donnel, sheik of many moons, approached with heartbeat's frantic tunes, to lift the damsel where she lay, and make the prizes melt away. He now proceeds with stick and crutch; his social standing isn't much; his knees are sagged all down in front; his speech is but a muffled grunt; his manners ape the rural swain who tries to lift his house in vain. Old Tubby Robbins, skinned and sore, declares he plans to ride no more a billiard cue to make his seat, and lift him clear up off his feet. He now stands up instead of sits, to play for Ed King's movie fits; he begs his friends for cushioned seats, and off the mantel takes his eats. Anne Abbott now is far away, and yet we cannot help but say that all her stubborn, wayward tricks are far beyond us country hicks.

an education. Today he goes there to be amused."

## What Shall We Do?

Asked by the interviewer what he would do about it, Mr. Babson answered:

"Here is what I would do: 'I would cut the college course down to two years.'

"I would make a boy work eight hours a day. He should punch a time clock, and go about his college work every morning the same as if he worked in a factory. I would get rid of the sinful leisure of having to spend only three hours a day in the classroom."

"I would train a boy in habits of integrity, industry, thrift, punctuality, conscientiousness, and back him up on these things."

"And I would get rid of big business athletics. If I were president of a great university tomorrow, I would say that henceforth there would be no more big football games with tickets for \$5."

"I would restore athletics to the many. I would do it by making it a rule that only those who had actually taken part in college athletics could attend the games after they had graduated."

"In brief, I would make athletics once more for the many: I would reduce college snobbery, economize on the terrible present waste of time and money in a college education, cut out all the distracting forces that are making amusement parks out of our colleges. Men would still play football, they would still dance, BUT they wouldn't play football and dance to the pre-eminent exclusion of a practical, useful training in knowledge and character."

"Steinmetz said to me one month before he died:

"We have learned how to harness steam and water-power. The next great invention will not be mechanical. It will be a way to harness the

spiritual emotions in men, which emotions are the basis of all creative work."

"Is there any doubt about the signs of the times? They wanted Red Grange to run for Congress, and featured him beside the most important economic and political news of the day. They put Valentino on the front page—Dr. Elliot on the second."

"Yes, this destructive spirit of worshipping false values finds its most persuasive priest in the football coach, the college fraternity, the college prom, and the foolish father who pays for raccoon coats, expensive clothes, and large allowances."

## JOURNALISTS "WATCH 'EM MAKE" NEWS &amp; OBSERVER

The staff of the "Old Reliable" extended the right hand of fellowship to about a dozen students representing the class in Advanced Journalism at State College Wednesday night. The budding journalists were introduced to the mysteries of manufacturing a Nuisance Disturber by the genial managing editor, Frank Smithurst, the eloquent telegraph editor, Neil Hester, and the inscrutable columnist, Ben Dixon McNeill.

The automatic A. P. writer, a machine that reproduces copy at the rate of 60 words a minute, with its ivory's ticked away down in Atlanta, was among the mechanics of the news-paper art that impressed the class. They also followed with interest the story's progress through its circuitous journey from the reporter's desk to the semi-circular plate that fits the rotary press.

"Fadder, you told me you would give me a dollar every time I got an 'A' in collich. Fadder, I made two last week."

"Well, here's two dollars. Now, quit studying so much. It's bad for you."

## Saves Razor Blades

THE softer your beard when shaving, the less work for your razor. Williams Shaving Cream softens the beard bristles so completely that the razor just glides through them. This eliminates "pull" and lengthens the life of your blades. Then, Williams lubricates the skin for easy shaving and leaves it glove-smooth after the shave. Two sizes—35c and 50c.

## Williams Shaving Cream

## RALEIGH WOMEN SPONSOR BETTER SPEECH WEEK

Movement Started in 1919 Now  
Observed Throughout the  
United States.

Another "Better American Speech Week" will be staged in Raleigh, under the auspices of the Woman's Club, beginning February 27. During the week the club women will make an effort, through publicity, to have every man, woman, and child in the city to exercise more care in their speech.

The movement, which was started in 1919, by the National Council of Teachers of English, is now observed throughout the entire Nation. Started by members of the English faculties of American colleges and universities, the effort should have a special appeal to college students.

There is little question but that the average college man and woman, in spite of the emphasis placed on English in the curricula, is loose in his or her speech. Too much bad grammar and slang, to say nothing of the number of "Indian grunts," enters into campus conversation. The members of the Woman's Club are especially anxious, therefore, that State College students aid them in

## Last Week's Best Articles

The honor for winning first place in the Best Article Contest last week and the four passes given by the State Theater goes to E. H. Roberts for his article, "Vivian Players Present 'The Old Homestead' in Pullen Hall." The honor for winning second place goes to W. A. Hunt for his article, "Park Possesses Two Pennies Dead Yankees."

making the week a beneficial one by being particularly careful. They suggest that the following rules be kept in mind:

Speak correctly and pleasantly. Begin the habit today of using GOOD SPEECH, and it will last all your life.

Get rich! Learn the meaning and the correct use of three new words each week. It will pay you well! Shabby, careless speech is as bad as slovenly clothing.

Respect the beautiful language of America, and others will respect you.

## DR. LANE TALKS TO COLLEGE ASSEMBLY

"A man when he prays should not seek to bend God's will to his in order that he may wheedle something out of the Almighty, but rather he should strive to get his own will straight and in line with God's," said Rector Henry Lane, of the Church of the Good Shepherd at the student assembly Wednesday.

Dr. Lane's subject was prayer, and he succeeded a number of prominent religious leaders in a series of addresses given each Wednesday on the general subject, "The Sermon on the Mount."

The methods of Christ were the methods the rector held up to the students as the guiding principle of their spiritual lives, but he warned them to be careful and not misinterpret the will of the Father.

Last week Dr. Poteat, President of Wake Forest College, spoke upon the subject, "Fit for Tat." Other religious leaders conducting the study of "The Sermon on the Mount" have been Dr. Elbert Russell, of Duke University, and the Rev. Dr. Stanbury, pastor of Edenton Street Methodist Church. Next Wednesday, Professor Cunningham will bring the series to a close.

State has recently put in some poultry. Let's go out in the orchard and help professor pluck the hen-fruit.

New York—The "big town," in its most human, most intimate mood. Lovely women, beautiful clothes, realistic setting and many phases of life are condensed into one tensely dramatic, vivid plot. These qualities make "An Affair of the Follies," showing at the STATE Theater, Monday and Tuesday, with Keith Vaudeville, a picture offering a treat. Billie Dove, Floyd Hughes and Lewis Stone are featured.

"Comedy is the university of the screen," declares Louise Fazenda, the laughable comedienne who, in her own peculiar way, can make comedy out of tragedy. She supports Marion Davies and Owen Moore in their latest feature, "The Red Mill," which will be shown at the STATE Theater next Wednesday and Thursday.

Clara Bow's ability with her fists almost ended disastrously when a well-planted uppercut on Jacqueline Yaddon's jaw almost rendered the latter hors de combat during the filming of a scene for Miss Bow's first Paramount starring vehicle, "It," which comes to the State Theater next Friday and Saturday.

"It" is a typical Elinor Glyn story and has plenty of the Glyn punch and kick. Clara is supported by Antonio Moreno and a cast of film stars.

Speaking of "monkey business," how would you like to go down a turgid, muddy river, studded in places with dark and filthy mudflats, on which bask huge somnolent alligators; loathsome-looking places, infested with deadly water snakes and insects? That would be bad enough—but suppose, after you had gone through with all this and had planned to make camp and get a good night's sleep, you were suddenly confronted by a huge, long-armed, fang-bared gorilla. That is what happens to the feature star of "The Gorilla Hunt" that comes to the CAPITOL Theatre next Monday for a two-day run.

Colleen Moore answers the old, old question about the whereabouts of "Sally" in her feature picture of the same name, which shows at the CAPITOL Theatre next Wednesday and Thursday.

"Stroll in the park" with Owen Moore at the CAPITOL Theatre next Friday. His latest and best picture, "The Song and Dance Man," shows there for just the one day.

A mask can cover a multitude of sins—but it can also cover an equal number of good deeds. Tom Tyler proves it in "The Masquerade Bandit," showing at the CAPITOL Theatre next Saturday.

Imagine having to go to all sorts of social affairs given in your honor when you first join a community, in a dirty looking stubble black beard! That was the predicament of Kenneth Thomson, who makes his screen debut opposite Vera Reynolds, in "Risky Business," which comes to the SUPERBA Theatre next Monday and Tuesday.

Conrad Nagel, erstwhile romantic hero of the screen, romps through hilariously comic trials and tribulations in "There You Are," latest development of his new trend towards whimsical comedy which starts a two-days run at the SUPERBA next Wednesday.

It is one of the funniest screen plays of the year.

A beautiful woman cried when they parted. She hated to see him leave; he was above the average. You could actually call him beautiful—he would not resent it a bit, for the woman was his mistress and he was only Torzan, the wonder-horse which Ken Maynard rides in "The Overland Stage," showing at the SUPERBA Theatre next Friday and Saturday.

During the football season of 1925 there were over 2,000,000,000 paid admissions to games through the United States.

No wonder college life, with all the pep found in those "Institutions of higher learning," always goes big on the screen. The football game in "College Days," showing at the PALACE next Monday and Tuesday, is one of the best ever screened.

Can the dead return? This is a question which forms the motive of the Fox films version of "The Return of Peter Grimm," which shows at the PALACE Wednesday and Thursday.

[In a secluded corner at the Prom]

## Camel is the understanding smoke

CAMEL is always the friendly cigarette. In days of tense achievement, in moments of joy and gaiety, a lighted Camel will spur you to the stars with its cool, crisp fire. Camels understand your every mood.

A purchase of Camels brings you the choicest Turkish and Domestic tobaccos. Blended by skillful experts into the world's most popular smoke, and the best.

R. J. REYNOLDS TOBACCO COMPANY, WINSTON-SALEM, N. C.

Unfathomed quality is the distinguishing mark of Camel.

No matter what the price you pay, you can buy no better cigarettes than Camels. Smoke them as frequently as you please. You will never be left with a cigarette after-taste; Camels aren't made that way. That is why experienced smokers everywhere demand them. That is why millions thrill to three short words: "Have a Camel!"

©1927

When the man in the moon laughs something's happening. He's a pretty wise old sport and his specialty is spying on lovers. He'll tell you that when kissed, some girls get sore while others ask for more. He's seen all sorts of kisses, but he's decided that "The Midnight Kiss," coming to the PALACE next Friday, beats 'em all. It's a hip-tickle.

Daring dancing is naughtily but nicely done by Natalie Kingston, who plays one of the leading roles in "Lost at Sea," the feature at the PALACE next Saturday.

## VOCATIONAL MEN RETURN FROM TEACHING TRYOUTS

The embryonic teachers represented by the thirteen Seniors in Vocational Agriculture have returned from three weeks practice teaching in various agricultural high schools in various parts of the State.

They all declare that they had some wonderful experiences, and that the trip was very enjoyable and beneficial. However, they all seem to have their failings: as, for instance, when a farmer asked "Shorty" Burnette what kind of garden peas to plant, that enlightened individual advised him to plant little green ones; and "Satan" O'Brien learned, after returning to college, that he was supposed to have been teaching shop work while away.

Following is a list of the students who tried their hand at their future profession: J. J. Barnhardt, C. A. Leonard, R. M. Morris, W. R. Burnette, B. G. O'Brien, W. W. McCulloch, J. R. Herman, J. W. Edwards, C. R. Lamb, J. E. Tiddy, T. W. Hayes, C. M. Allen, and G. A. Munn.

## GREAVES-WALKER TALKS TO CLAY WORKERS IN NORTH

Addresses Audience at Ontario and Reads Paper Before Convention at Detroit

Professor A. F. Greaves-Walker, of the Department of Ceramic Engineering, returned Friday from a trip to Toronto, Ontario, Canada, and Detroit, Michigan. At Toronto Professor Greaves-Walker addressed the Silver Jubilee Convention of the Canadian National Clay Products Association, also delivering a series of lectures at the University of Toronto. At Detroit he attended the convention of the American Ceramic Society, where he acted as chairman of the General Session and read a paper before the Heavy Clay Products Division.

Professor Greaves-Walker reports that North Carolina and State College are attracting a great deal of favorable attention in the North. In both Toronto and Detroit the work of State College, especially in aiding industry, was lauded by prominent speakers. North Carolina raw materials, such as feldspar, pyrophyllite, and kaolin, also came in for high praise; they were, in fact, used as standards of comparison. Less than three years ago these same materials were either practically unknown or their reputation was at such a low ebb that North Carolina manufacturers did not mention their source.

B. Mifflin Hood of Atlanta, Georgia, who attended the Short Course in Clayworking and Ceramics at State College last year, was elected president of the American Ceramic Society. Mr. Hood is heavily interested in three of North Carolina's largest ceramic plants and maintains an office in Raleigh.

## Social Events

### THETA TAU HAS ANNIVERSARY

Rho chapter of Theta Tau, national engineering fraternity, celebrated the third anniversary of their installation on this campus at a banquet held last Wednesday night at the Peacock Alley Tea Room.

Among the guests present were Mr. Fred Coffman, of Charlotte, grand officer of the fraternity, Colonel Harrelson, honorary member, and Mr. Harry St. George Tucker, F. W. Habel, president of this chapter, served as toastmaster.

Theta Tau was founded at the University of Minnesota, October 15, 1904. Since then, 19 chapters have been installed.

The installation of Rho chapter on February 16, 1924, marked the 17th step in a policy of expansion which has been marked by its progressive nature and remarkable success in the engineering field.

The officers of this chapter are: F. W. Habel, president; John Armstrong, vice-president; K. V. Wainwright, secretary; H. L. Sullivan, treasurer.

### SIGMA PHI EPSILON MOVES

Sigma Phi Epsilon fraternity, which has been located on the campus since 1905, moved Saturday, February 19, to 216 Chamberlain Street, the house formerly occupied by the Phi Kappa Tau fraternity.

For the past 22 years, Sigma Phi Epsilon has had a chapter room in 1911 Dormitory. However, fraternity life on the campus has undergone a great change. During the past two years twelve fraternities have left the campus for homes of their own.

### DANCE OF SAINTS SATURDAY

The Junior Order of Saints gave their annual dance in the Frank Thompson Gymnasium last Saturday night. The affair was well attended and enjoyed by all present. The gymnasium was decorated in the traditional colors of red and black streamers, running down from a loop in the center of gym to the side balconies.

The Saint's figure, in which each

member pinned a red rose on his partner, was led by Albert Daugherty, president of the order, and Miss Mildred Shell, of Greensboro. The music for the dance was furnished by "Kike" Kyser and his orchestra, from the University of North Carolina.

The chaperons for the occasion were: Dr. and Mrs. E. C. Brooks, Dean and Mrs. E. L. Cloyd, Professor and Mrs. Hinkle, Professor and Mrs. Thomas H. Nelson, Major and Mrs. C. C. Early, Mesdames J. S. Manning, H. M. Bonner, S. P. Norris, J. E. O'Donnell, R. M. Albright, J. N. Mason, R. G. Sherrill, R. W. Wynne, W. L. Brogden, and F. M. Haig.

The Junior Order of Saints is the oldest order of its nature on the campus, it being organized in 1903.

### PHI KAPPA TAU HAS NEW HOME

The Chi Chapter of the Phi Kappa Tau fraternity, formerly located at 216 Chamberlain Street, has moved to 14 Woodburn Road. This chapter of the Phi Kappa Tau was installed in 1923; the chapter was formerly the Phi Psi, and then Phi Psi Lambda.

In 1920 the Phi Psi Lambda had the first fraternity house at State College, and since then the moving spirit has spread. The Phi Kappa Tau lived on Chamberlain Street 13 months, moving because of more spacious quarters.

### TREVATHANS ENTERTAIN AT ROCKY MOUNT

Mr. and Mrs. H. L. Trevathan, parents of R. R. and P. E. Trevathan, students at State College, were the host and hostess to a group of ten young people last Sunday in their home at Rocky Mount.

Among those present were Misses Geneva Yeargan, Annie Ree McGugan and Thelma Martin of Meredith College, Miss Elinor Lane, Meredith College alumna, Messrs. H. J. Oberholzer, P. E. and R. R. Trevathan, of State College, and Kennan Allen and Clifford Wren, of Garner. The party enjoyed a delightful trip, topped off with enticing viands served by the hostess.

### CODY ONE ALUMNUS WHO DOESN'T KNOCK STATE

E. D. Cody, of the class of '25, who has been doing extension work in the western part of the State, visited the college this week.

He did not say that the college was going to the dogs as so many of the alumni love to do, but said he was pleased when he noticed the advances made by the English Department.

Many times during his work in Henderson County he was asked to publish articles, and here he says a knowledge of journalism would have been invaluable. Public speaking is another course which he advises every man to take, for every man is called upon at some time or another to make a talk to an audience. Last, but not least, he recommends a course of Business English. This, he maintains, is a course which should be required of all students, irrespective of what school they are registered in.

## Alumni Notes

Observations and Communications of ZIPPY MACK

Spring has arrived. The grass is getting green, the trees are budding, the students are sitting on the front campus yelling at the passersby, and Seymour has stopped wearing a hat.

We wish to apologize to all our readers for the reference to Tom McCrea last week. When we refused to put his name in here, he slipped down to the printer's and put it in himself; that is, he himself put it in.

Mr. Herman (Radio) Baum, of last year's Electricals, is now with the engineering department of the Dixie Construction Company, in Birmingham. His address is 1215 Maplewood Avenue.

Mr. James E. (Jazz) Britt, of the '24 Mechanicals, was a recent visitor on the campus. While in school, Jazz was active in many fields, including that of the Technician. He is now with the legal department of the Westinghouse Electric Company.

Mr. T. C. Barber, of the '11 Textiles, and Mr. Van Buren Fowler, of the '07 Agriculturals, were recent visitors. Mr. Barber operates a hosiery mill in Mount Airy, while Mr. Fowler is farming at Horseshoe, North Carolina.

Mr. A. C. Foster, B.S. 1917, is Plant Pathologist, Sanford, Fla.

Mr. K. B. Glenn, B.E. 1923, is Dist. Mgr., Brooksville, Fla.

Mr. Grady C. Stone, B.S. 1926, is Arch. Draftsman, Raleigh, N. C.

Mr. C. A. Sheffield, B.S. 1920, is County Agt., Lexington, N. C.

Mr. Wm. H. Griffin, Jr., B.E. 1914, is Civil Engr., Goldsboro, N. C.

Mr. R. E. Black, B.S. 1926, is teaching Voc. Agri. at Piney Creek High School, Piney Creek, N. C.

Mr. H. D. Crookford, B.S. 1920, is Asst. Professor, Phys. Chem., Dept. of Chem., University of N. C., Chapel Hill, N. C.

Mr. G. W. Whitson, B.E. 1917, is Central Office Manager, Sou. Bell Tel. and Tel. Co., Asheville, N. C.

Mr. W. H. Jennings, Jr., B.S. 1923, is Instructor at Iowa State College, Ames, Iowa.

## Kampus Komiks

By DINKIE

Visitor (at funeral): "Is that her coffin?"

Widower: "No; that's my daughter. She has the croup."

Merry Widow: "On the one hand, I love you, but—  
Prof. Clevenger: "On the other hand, you have a wedding ring."

Jim: "Do you walk home from rides?"  
Jane: "Naw, I ride home from walks."

Prof. Mann: "I believe you missed my class yesterday."  
"Hiram" (cheerfully): "No, not at all."

Rowing Coach: "You want to come on the crew, huh? Ever rowed before?"  
D. C. Worth: "Only a horse, sir."

"I want a pencil."  
"Hard or soft?"  
"Soft. I'm writing a love letter."

A kiss in time saves nine miles walk.

Five Cents Worth.—Customer (on Sunday morning): "Give me change for a dime, please."  
Druggist: "Sure, and I hope you enjoy the sermon."

Visitor (to fond mother): "That boy of yours seems to have a thirst for knowledge."  
Mother: "Yes. He gets his thirst from his father and his knowledge from me."—Fitzgerald (Ga.) Leader.

A little girl was told that her mother, who was ill, would not get well until warm weather came. That night she finished her prayers by saying: Bless father, and make it hot for mother."—London Answers.

Flapper: "Haven't I met you somewhere before?"  
Ruf. Person: "Dunno, but your face tastes familiar."

He (wildly, as car skids toward ditch): "I've lost control! The brakes are locked!"  
She (in back seat): "And of course you've left the key in your other pants!"—Tom Rivers (N. J.) Sun.

## 'MANNERS' IS TALK BY DR. HARRISON

"Let your actions be the reflection of your inner thoughts and ideals, and you need no book of etiquette," said Dr. T. P. Harrison in his talk to the State College R. O. T. C. cadets at Pullen Hall last Thursday at drill hour.

Dr. Harrison took as his subject, "Getting On With Men," and stated that this is the first essential of life, both for students in college and for the graduates when they go out into the world. The discussion centered about "manners" and "conduct," with the speaker giving the views of different well-known men as to whether manners should cover the real feelings of the individual, or whether they should merely reflect his thoughts and ideals. The well-known Lord Chesterfield was an example of the former, and died in misery. Sir Philip Sidney practiced the latter, and died, as he had lived, a hero and a gentleman.

The speaker also compared the ceremonious but insincere manners of foreign peoples with the abrupt but sincere manner of Americans, and explained his preference for the latter. This, he said, is due to the democracy of Americans, and succeeds where superficial manners fail. He also said that a man's character could be judged by his handling of money and his attitude toward women.

Major C. C. Early introduced the speaker.

## SHORT COURSE GRADING OF HAY GIVEN IN MARCH

A two-day course in "Market Grading of Hay" will be offered March 1 and 2 at State College.

This course is especially arranged for hay brokers, merchants, dairymen, and large consumers of the market hay.

An expert from the United States Department of Agriculture, Washington, D. C., will be in charge.

This course is designed to help consumers of hay determine the true market values of hay according to the U. S. standards for grade. A special study will be made in securing proper adjustments on unsatisfactory shipments of hay, with a Government expert in market hay in charge.

Portions of bales of hay sent to Prof. W. H. Darst before March 1 will be certified as to class and grade free of charge, according to Federal standards.

She: "John, dear, I am to be in an amateur theatrical. What would folks say if I should wear tights?"

He: "They'd probably say that I married you for your money."—The Pathfinder.
