SENIORS SPEAK OF HONOR GROUPS TO NEW STUDENTS

The Golden Chain, Pine Burr, Phi Kappa Phi, Alpha Zeta, Tau Beta Pi Explained

MOORE DISCUSSES MEDAL

Winner 1926 Citizenship Award Mentions Requirements For Annual Honor

Harry Brown, Senior Class president, had charge of the program at the College Assembly Period Wednesday. His program was arranged especially for freshmen, and was composed of talks by prominent members of the Senior Class concerning the different honor fraternities and societies of the campus.

The idea of having the Senior Class take charge of an occasional assembly period originated with the Freshman Class of last year. They believed that discussions of different college topics from time to time by men who are yet students would be of more interest to freshmen than the ever-recurring faculty or speaker program.

The program Wednesday was the first of its kind, and was pronounced a decided success by those present.

President Brown opened the discussion by stressing the value of certain honors in college that were within the grasp of any industrious student.

R. R. Fountain explained the objects of and the requirements for entrance into the Pine Burr Society and the Phi Kappa Phi Fraternity. He stated that the Pine Burr is peculiar to State College, and is primarily a scholarship society, but that a man must have leadership and fraternal qualities as shown by his campus activities before he is eligible for membership.

Phi Kappa Phi is a national honorary scholarship fraternity, of which State College has a chapter. It is technical colleges what Phi Beta Kappa is to literary colleges and universities.

W. E. Wilson explained the benefits of Tau Beta Pi, a national honorary scholarship engineering fraternity which stresses character and leadership also.

D. C. Worth extolled the value of Alpha Zeta, which is to agricultural students what Tau Beta Pi is to engineers, except that it takes more the nature of a social fraternity.

J. E. Fiddy explained the workings of the Golden Chain, local senior honor—Continued on page 2.

FACULTY AND PRESIDENT FAVOR JUNIOR LOAN PLAN

Junior Class Begins Movement To Raise Loan Fund For Students

The President and the members of the faculty of North Carolina State College heartily approve the idea of the Student Loan Fund begun by the present Junior Class, which, after observing that certain very worthy and deserving students are unable to continue their college careers, initiated a movement to provide a loan fund for needy and financially handicapped students. The student-body became interested in this very patriotic movement, and it was decided to raise a fund to be known as the Student Loan Fund of the North Carolina State College of Agriculture and Engineering.

Dr. Brooks, President of State College, states that many good students may have to leave college because of a lack of funds to meet their necessary expenses. The College has other loan funds, but the amounts available at ready have been exhausted, and the new loan fund will meet a great need in this institution.

The amount raised for the fund will be deposited with the treasurer of the college, and the loans will be passed upon by a chosen committee. When an application for a loan has been approved properly by the committee, the treasurer will make the loan, taking the note of the student receiving the loan on such terms as the committee recommends. As the notes are repaid, the money will be allowed to accumulate in the treasury to be loaned to other students. J. T. Alexander, president of the Junior Class, and L. A. Taylor are the leaders in this movement.

Noon Today Last Chance To Get Athletic Tickets

Students athletic tickets, which were being distributed from the Gymnasium, can now be secured at the Bursar's office, in Holladay Hall, until noon Saturday. Registration cards which were used for the Elton game will not be honored at the gate for Saturday's game with Furman. All students should get their tickets early instead of waiting for the last-minute rush.

STOCK JUDGING TEAM LEAVE FOR DETROIT SUNDAY

Animal Husbandry Seniors to Try for Scholarships and Other Prizes

MEN ARE WELL PREPARED

Professors Haig and Clevenger Have Done Much Coaching of Team Members

Sunday night will witness another step of progress at N. C. State College when the judging team from the Animal Husbandry Department leaves for Detroit, Michigan, to compete in the National Judging Contest. This contest is the largest of its kind that a team from N. C. State has ever participated in. There will be around twenty teams in the contest, representing as many colleges from various parts of the United States.

The men making the trip are: Professor F. M. Haig, who, assisted by other members of the department, has done most of the coaching; H. M. Adams, D. C. Worth, R. W. Zimmerman, and B. A. Sides. These men have been working consistently since the opening of school, and are well prepared for the contest. All members of the team are seniors in Animal Husbandry, and, with the exception of Sides, were raised on the farm.

Professors Haig and Clevenger, who have done most of the coaching, are well qualified for this work on account of their broad experience. Professor Clevenger has had charge of the work of judging dairy products, and Professor Haig, who won second place at the National Contest for Judging Jersey cattle, under the instruction of Professor Ruffner while in college at the University of Maryland, has had charge of the animal judging.

The team has judged all of the college stock and much stock in and around Raleigh. A team from this part of the country is at a disadvantage because of the lack of stock with which to work. In this respect the North and Northwest are better situated.

The main prizes to be given in the contest are two four-hundred-dollar scholarships. Besides the scholarships, there are several silver loving cups and many other prizes of lesser importance.

The experience to be gained in this contest is very valuable in developing good judges of livestock and dairy products, each of which are much needed in the State at the present time.

Tal H. Stafford, Alumni Secretary, Sends Open Letter to the Alumni

Dear Alumni:

No doubt you have wondered what has become of your copy of "Alumni News" which has been mailed to you more or less regularly for so these many years. Here's the explanation:

Since November, 1917, the College has published and distributed, free of charge, to every alumnus whose address is available, our alumni paper. While perfectly willing, not to say anxious, to continue this practice, the time has come when the College administration feels that it can no longer justify before the State Budget Commission this expenditure of public funds. Please get this straight. The College would like to handle an alumni paper just exactly as it has been handled in the past, but a higher authority now says it can't be done.

Under the circumstances the burden of an alumni publication falls squarely upon the shoulders of the alumni. After carefully considering the matter for nearly a year, the General Alumni Association, at the meeting held last June, adopted the committee report which suggested that "Alumni News," for the next few years at least, be combined with The Technician, the students' weekly newspaper, and that the alumni be placed upon a subscription basis.

This action was taken for two reasons, namely: first, because the present receipts from alumni dues are not enough to pay for the publication of a separate paper, and, second, because the students' paper, as you will note from this sample copy, carries all of the campus news, served more frequently, in addition to a great deal of alumni news. The alumni section, it may be said, will be gradually increased, until a full page is given over to this material.

Please read very carefully this sample copy of The Technician. It will carry you right back to the campus and give you all the news while it is new. After you have done this, if you believe you would like to have the paper come to your desk every week during the school year, turn to another page in this issue, tear out the subscription blank, fill it out, and mail according to directions. The entire cost to you will be only a dollar and a quarter (\$1.25).

We sincerely hope that every alumnus of Old North Carolina State rallies to the cause. We want to keep in touch with you, and we know you want to keep in touch with the campus. It can be done only through the medium of a paper of this kind. Don't put this off. Send in your subscription at once. You cannot afford to miss a single issue.

With kindest personal regards and greetings from Alma Mater, I am, Cordially yours, TAL H. STAFFORD, Alumni Secretary.

SAXOPHONE BAND TO BE ORGANIZED

Owing to the fact that there are quite a number of boys on the campus who play saxophones and who are excluded from the Military and Concert Bands, a saxophone band will be organized. This band will be unique in that only saxophones will be used. It will be the first of its kind to be organized in the state. All men wishing to try-out should see "Daddy" Price in the Band Room Tuesday night, October 2, at six-thirty.

AG FAIR ASSOCIATION PREPARES FOR ACTION

\$1,000 Worth of Premiums Offered for Exhibits at Annual Students' Fair

The Students' Agricultural Fair Association is beginning to take on an appearance of feverish but animated activity. Their sixth annual fair will be held Thursday and Friday, October 14 and 15.

B. A. Sides, secretary of the fair, has recently distributed the premium list, which amounts to \$1,000 worth of prizes of a varied nature, coming from many business organizations all over the country as well as from local business men.

For the past five years the Fair has been one of the greatest occasions among the agricultural students in each succeeding school year. At first the Fair was only a small occasion as compared with its present proportions. During the first four years the Fair was held in tents on "Ag Hill," where it will be held again this year. Last year it was held in the Agricultural Club building.

The Fair in connection with the State Fair, and in the State Fair Grounds. This idea met with great favor among the students, but they found that there was to be no State Fair this year. Not to be daunted, they capitalized on the idea that it will be the only fair held in Raleigh this year, and expect to feature that idea in their advertisements. C. A. Leonard, president of the Fair Association, states that there will be a midway that would be a credit to any professional show company.

Each of the several departments in the Agricultural School will have floats in the big parade, which will be the formal opening of the fair.

The Fair Association was one of the first organizations to sponsor the "Dad's Day" movement. It is believed that the "Ag Fair," the Davidson game, and "Dad's Day" all combined will cause October 14 to be one of the busiest days in the Fair's history.

'Alumni News' Discontinued After Nine Years of Service

E. G. MOORE NOW HEADS COLLEGE PUBLICITY

Former Editor of The Technician Takes Over Work of Distributing News

For the first time in its history State College now has a publicity bureau, with facilities for handling news from all over the campus and sending it to all state dailies. Ernest G. Moore, who finished in Education last spring, is in active charge of this bureau, and is working under the supervision of Prof. Stewart Robertson of the Journalism Department.

For several years Tal H. Stafford, Alumni Secretary, handled the college news, along with his other duties, but last spring arrangement was made whereby Mr. Stafford became Assistant Director of Athletics, and his office was moved to the gymnasium. He will continue to handle the pre-game sport "dope," as it is closely connected with his work in the Athletic Department.

All other news pertaining to the college will be cleared through the Journalism office by Mr. Moore. He is devoting one-half of his time to this work, the remainder being used in the pursuit of a Master's degree. He will be remembered by many of our readers as the editor of THE TECHNICIAN last year. In discussing his new work he asked that every member of the college community call him at the Journalism office when they have news items to report.

State is somewhat behind other colleges of the state in establishing a publicity bureau, as Carolina, Duke, Wake Forest, and Davidson have already seen the necessity of this work during the past few years.

WANDERING GREEK CLUB TO BE ORGANIZED HERE

Fraternity Men Without Chapter at State to Form Private Organization

A "Wandering Greek" club is to be organized on the campus for fraternity men without chapters here. The "Wandering Greeks," a name appropriately given to fraternity men enrolled in any school at which there is no chapter of their "lodge," will soon be working out plans to have a club all their own on the campus. There has never been such a student organization started here before, and from all appearances it seems that the club will be a success. It will sponsor practically the same ideals as the fraternities here have, and will take in each year any "wanderers" they see fit.

Allen Watkins, Alpha Tau Omega, from University of the South at Sewanee, Tenn., is back of the idea for the new organization, and expresses the opinion that if the members put all they have in the work of the club they will soon have a strong organization that will be a valuable asset to the school as well as to its members.

SOPHOMORES PUBLISH FRESHMAN REGULATIONS

Delay of Freshman Handbooks Causes Printing of Rules in The Technician

Because the Student Handbooks have not yet arrived we are here printing a few of the Freshman rules which are to be observed. Freshmen, take heed, preserve and abide by these rules. It may save you some trouble.

Sec. 1. All Freshmen shall greet respectfully all upper-classmen and Faculty members.

Sec. 2. The authorized Freshman cap shall be worn at all times except with uniforms and on Sundays.

Sec. 3. Freshman rules of the Court of Customs shall be interpreted to include the wearing of Freshman caps in Raleigh and vicinity.

Sec. 4. All Freshmen shall have matches on their persons at all times for the benefit of upper-classmen.

Sec. 5. Every Freshman shall be—Continued on page 2.

Work Will Be Carried Forward by The Technician; Now Only Alumni Paper

PRESERVED WAR RECORDS

"News" Performed a Valuable Work in Compiling Service Roll of Institution

(By TAL H. STAFFORD.)

As announced in another column in this issue, *Alumni News* has been combined with *The Technician*, and each of the 4,500 former students of the College, who formerly received the alumni paper, together with all other State College men, will be invited to subscribe to the enlarged paper.

The first issue of *Alumni News*, which was conceived by Mr. E. B. Owen, Registrar, appeared about the first of November, 1917. In the absence of Mr. Buxton White, former alumni secretary, who had entered the service, Mr. Owen assumed the responsibility for the publication of the paper, and continued to look after it for the next two years.

All during the World War, *Alumni News* followed State College men into the training camps on this side, and overseas to the front-line trenches, carrying live news about the college and its former students. In addition, the paper collected the service records of our men and a great mass of invaluable material which could not have been assembled through any other agency.

After the Armistice, Mr. White returned to his duties here, but resigned within the year. Again Mr. Owen stepped into the gap and continued the publication of the paper. In January, 1920, Mr. Tal H. Stafford assumed the duties of alumni secretary, and took over the active management of the paper, although Mr. Owen continued to act in an advisory capacity, and this arrangement was continued until the General Alumni Association, at its meeting last June, was forced to suspend the publication for lack of funds.

The need of some means of transmitting news about our alumni and the College to fellow alumni was especially clear in 1917 when the paper began. Many of our men were in France or on the high seas, and many more were training to go. *Alumni News* undertook to collect and publish the names of the men in the service. So completely was this work done that it was rare after the close of the war to find a man who had been in the service whose name had not already been found and entered on the College service list.

Our College service flag at commencement, May, 1918, showed 756—Continued on page 2.

FRATERNITY HOUSES MORE POPULAR WITH STUDENTS

Ten Groups Now Live Off Campus; Number Doubled Since Vacation Began

N. C. State College fraternities are slowly moving off the campus into houses. Prior to last year they were all in sections of dormitories, because no fraternity houses are allowed on the campus.

Since the beginning of fraternities at N. C. State it has been necessary for them to maintain a room in some dormitory section for a meeting room, and live in the rooms near it. The whole college campus was donated to the State for a State College by Mr. Pullen. Mr. Pullen did not favor fraternities and forbade the building of houses on the property. For this reason there can never be any fraternity houses on State College campus.

Last year one fraternity broke the ice by moving out into a house just a short way from the campus. It was followed by four others at different times during the year, making a total of five who had moved at the end of the school year.

At the beginning of this year five more had moved, and consequently there are now ten fraternities living in fraternity houses just off the campus.

The effect this has on the scholarship of boys in the fraternities remains to be seen. Of the five fraternities that moved off last year, two raised their scholastic standing, two lowered theirs, and one held its own. With such a large number in houses now we will probably be able to check up and see the effect.

Rock Pile and Concrete Mixer Supersede Boisterous Midway

Where once the giant porker guzzled his slops and grunted his satisfaction to the world; where the proud and pedigreed bull pawed and snorted his defiance at the surging, sweating throngs; where the he-plumaged cock proudly crowed his challenge to the feathered world; where the gallant steed with distended nostrils dashed furiously past all his competitors; where the souvenir venders and the side-show ticket agents along the midway ripped the air with their harsh and grating monotonies; where the stately but awkward elephant plodded his 10-minute rounds laden with his thrill-seeking human cargo; in short, where many a State College freshman has revealed in the sights and wonders of his first State Fair, using every conceivable method of entrance, there is now in the process of formation the

greatest residential subdivision in existence save "Gump's Paradise Vista." The old Fair Grounds and the State College Poultry Plant have been taken over by the City of Raleigh and are being cut up into city blocks to be sold as residential lots. A total of about 15 blocks will be made available. Practically all grading work is complete, and the paving of sidewalks is going rapidly forward. Great mountains of rock and gravel have been dumped from railroad cars near the center of the development, and it is stated that the work of paving all the streets is to be undertaken at an early date.

One of the most beautiful sections of the sub-division will be the "Horse-shoe Curve" around the north end of the fair ground race track. The race track was built around a natural ravine, which necessitated the building of a fill about 30 feet high across the ravine at the north end of the track. This dam will be paved and will be a beautiful drive, but if any should buy building lots there they will probably be descendants of the ancient Cliff Dwellers. Under this

dam is a two-foot culvert 100 feet long, and it is reported that slender fishermen used this culvert as a means of access to the Fair Grounds. The second street from Hillsboro will be a 70-foot boulevard. It will enter Hillsboro Road in the Wilmont suburb, and will, with proper connections through the edge of Oberlin, furnish another excellent western outlet for Raleigh.

Kampus Komics

By DINKIE

State 29: Get your tickets now; five suits pressed for a dollar.
State 30: Can't.
29: Why not? If you wait later it will cost you more.
30: But I don't have five suits.

Figures that have attracted men: Venus de Milo, Ruth St. Denis, Annette Kellerman.
Figures that have attracted women: \$3.98.

Grandpa: "Don't want to 'ave yer face washed? Why, when I was a little boy I 'ad my face washed every day!"
Gladys: "Yes, an' look at it now!"

An officer was showing an old lady over the battleship. "This," said he, pointing to an inscribed plate on the deck, "is where our gallant captain fell."

"No wonder," replied the old lady. "I nearly slipped on it myself."

Cop (to struggling man in private pond): "Come out of that. You can't swim in there."

Feller: "I know I can't. That's why I'm hollering for help."

Have you ever been in Holland? No, but I've been in Dutch.

"I have a pain in my tummy, dear!" Said the cannibal to his mate.

"I know, I know," his wife replied: "Tis that sweet girl grad-u-ate."

"What are you writing?"
"A joke."
"Well, give her my regards."

Little Joan: "Mummy, what's this funny thing I've found?"
Mother: "That's called a hair pin, dear. If you take it to granny, she'll show you how it was used."

Teacher: Robert, give me a sentence using the word "satiate."
Bobby: I took Mamie Jones to a picnic last summer, and I'll satiate quite a lot.

"I don't care if you do hire a thousand men. You can't hold a candle to "No. What is it?"
"Gunpowder!"

State Student President Speaks at Raleigh High

(Continued from page 1)

told them that in his opinion the high school was the place to start student government, as it gave the students an earlier beginning in affairs that would be of great value to them in college and later in public life. He also said that those who attend college will be able to get along easier if they are already familiar with student rules and how to obey them.

"Alumni News" Discontinued After Nine Years of Service

(Continued from page 1)

stars. The number ran to about 1,300 by the end of the year. By counting the S. A. T. C. men enlisted at the College during the fall term, 1918, we were able to number a service list of 2,000 former students of State College and to give this fact publicity among all of our men.

The services of *Alumni News* in this connection have encouraged our pride in the record of our College men in the World War. It has kept the record of our men all the time before us, and has made the collection of a fund for a war memorial possible.

But the paper attempted a more practical service, even than this, in stimulating a new interest among our alumni in the College and in all that it is trying to do. This new interest found abundant fruition in the number of men whom alumni are influencing yearly to enter the College. Our alumni have become more and more active advertisers for their College, and this is the ideal condition which we have dreamed to reach.

The loyalty of our alumni for their College and for technical education fosters an interest in one another and an "esprit de corps" that should bring large results not only for State College, but for technical education among our people generally.

Thus *Alumni News* continued to grow in usefulness since the first copy was issued. Our living graduates now number nearly 2,000, and our total number of matriculates is close to 10,000. Through *THE TECHNICIAN*, which, for alumni purposes, succeeds *Alumni News*, we hope to keep this great body of men in touch with events here on the campus, thus stimulating interest in all College activities and enterprises, and fostering a closer cooperation in all lines of endeavor between Alma Mater and her loyal sons.

WANDA CHARMS AUDIENCES BY DANCES IN ROSE MARIE

Totem-Pole Dance is Wonderful Exhibition of Grace and Muscular Power

Reproducing with wonderful grace and rhythm the one-time famous Indian totem-pole dance, Wanda, talented dancer of the Rose Marie Company, charmed the large Raleigh audiences at State Theatre Monday and Tuesday nights.

The dancing was marked by artistic ability, muscular coordination, and ease of movement.

The last dance, in which she appeared in semi-barbaric costume, with an enormous fan representing a flame, displayed her marvelous ability even more strikingly. The climax of this dance was the feat of bending backward till she lay on the stage, with her legs under her, entirely hidden beneath her fan, and then easily and gracefully rising to her feet once more. Nevertheless during all of this strenuous action at no time did any muscles stand out or show over-development.

Wanda was small, dark, and lithe, making a marked contrast to Rose Marie, who was a very attractive blond type. In the totem-pole dance she was supported by a chorus dressed as totem poles, who, by their wooden-like movements, accentuated her grace and beauty, and put swing and rhythm into the dance.

The Indian dances gave atmosphere and made Rose Marie the success it is.

Many have wondered that Hazel Gaudeu remains with a musical play when she could rate with such dancers as Ruth St. Dennis and Pavlova.—M. A.

STATE STUDENT INJURED IN MOTORCYCLE ACCIDENT

S. S. Edmondson Takes Header Into Tree When Blinded by Auto Lights

S. S. Edmondson, State College Sophomore, narrowly escaped serious injury Monday night, September 27, when the motorcycle upon which he was riding crashed into a tree at the east entrance to the campus.

He was attempting to make the turn into the campus when lights from an approaching car behind him caused him to hit a cross-tie lying near the street.

Passing students hurried to the scene of the accident and found Edmondson in a dazed condition. In the crash he had been thrown against a tree, resulting in a painful cut on the forehead and other small cuts and bruises on the body.

Edmondson was rushed, in a passing car, to Mary Elizabeth Hospital, where it was found that three stitches were necessary to close the gash on his forehead. After receiving the proper medical attention Edmondson returned to school.

The motorcycle was undamaged, except for a few scratches in the paint.

Sophomores Publish Freshman Regulations

SPORTS

LET'S SEE YOU GROWL, WOLFPACK!

STATE Vs. FURMAN THIS AFTERNOON

Purple Hurricane Invades Riddick Field Today at 3

Furman Sends Strong Team to Oppose Wolfpack in Real Test of Strength

The Purple Hurricane will battle the Wolfpack this afternoon at 3 o'clock on Riddick field, and the Wolves are primed for the big contest. This promises to be one of the best games of the season and will test the real strength of the Wolfpack. The Hornets, coached by Billy Laval, who uses a very unique shift which is known as the "crazy quilt" were champions of South Carolina last year. Although they lost every man in the line except one by graduation, the gaps will be filled by men from last year's All-Southern freshman team.

Coach Tebell has been drilling his squad hard this week in preparation for this game. For several afternoons this week he has scrimmaged the squad against the freshman team, which used the "crazy quilt" shift. The entire squad, with the exception of Outen, came through the Eion game in fine condition. Outen has not been in uniform for several days owing to a twisted shoulder which he received in the Eion game, and will probably be out of the line-up this afternoon.

Coach Tebell has shifted his men considerably this week. It is very probable that Hunsucker will pilot the team against the Hurricane. Goodwin has been shifted back to center. Eubanks and Floyd have been sent to end positions.

There is no basis for a comparison of the strength of the two teams, since neither State's or Furman's real strength has been tested yet. Last Saturday Furman defeated Newberry 30-0, but Newberry furnished very little opposition for the strong Furman team. The Furman backfield, according to advance predictions, seems to be one of the best that has ever trotted out under the Purple and White uniform. One of the features of the Newberry game was a 40-yard drop-kick by Davis, who comes up from the championship freshman team of last year.

This afternoon's game will no doubt draw a large crowd from both states and State athletic officials are preparing for a record crowd.

Probable line-up for State:

Beatty	L. E.
Lambe	L. T.
Nicholson	L. G.
Logan	C.
Donnell	R. G.
Bynum	R. T.
Evans	R. E.
Hunsucker	Q. B.
Melton	L. H.
McDowell	R. H.
Morris	F. B.

Charlotte: "She thinks no man is good enough for her; she may be right."
Lardner: "And she may be left."

WORLD'S SERIES SCORE TO BE POSTED AT GAME

The World's Series baseball results will be posted in the lobby of the State-Furman football game today. The results will be phoned to the Y. M. C. A., and will be posted for the benefit of the fans who will adjourn to Riddick Field to watch State play a State man's team. Do not miss the game on account of the series. Come to the game and see them both.

Unsold Gym Suits Be Returned Wednesday

All Freshmen who have not yet obtained their gym suits will have until Wednesday noon to get them from the coach's office in the Frank Thompson Gymnasium at a saving of about one dollar and a half on the outfit. After the limit set the uniforms left will be returned and the usual retail prices charge for suits by local dealers, instead of the wholesale prices now in effect at the gym. All men taking physical education are required to wear the regular gym suit while on class, and the Department of Physical Education is doing the students a service in enabling them to procure the uniforms at a cost so low.

TAL H. STAFFORD.

SERMON'S HARRIERS CONTINUE GRIND

The N. C. State Harriers have begun their annual grind. The cross-country team, under the leadership of Captain Nance, have begun training in earnest. The entire team of last year is back and ready for their afternoon trip to the Orphanage and back.

The letter men who are back this year are: Captain Nance, Wright (1925 captain), Rowe, Burnhart, and Kendrick. Greaves-Walker, Loman, and Hall of last year's freshman team, and Freeman, winner of the intramural race last year, are all making strong bids for a place on the team. Fort and several other men of last year's squad cannot be overlooked, as they are working hard.

Every man is working hard, and competition is becoming keener every day, since there is a rumor that the team will make two trips to Virginia and one to Georgia.

CERAMIC SOCIETY WILL OPEN SESSIONS TUESDAY

The student branch of the American Ceramic Society will hold its first meeting of the year Tuesday, 7:00 p.m., October 6, 1926, in room No. 1, Ceramic Building.

All students interested are invited to attend.

"DAD'S DAY" TO BE HELD ON DAY DAVIDSON GAME

For First Time in History Concerted Effort Will Be Made to Bring in Dads

State College will establish a precedent when it holds its first "Dad's Day," October 14, in connection with the State-Davidson football game and the Agricultural Students' Fair. For several years it has been apparent that some way should be devised whereby the fathers of the students would be brought in closer contact with their sons at college. Many fathers never visit the college, except, perhaps, to see their sons graduate.

Several organizations are sponsoring "Dad's Day," notably the Golden Chain, senior honor society; the Students' Fair Association, and the Athletic Department.

It is stated that the dads of the football team will have seats of honor at some central location, probably on the side-lines.

The Students' Fair will stage a parade at noon and will have a line midway of the game for the amusement of the dads and others. They will also have a variety of farm exhibits from the home farms.

The college administration is solidly behind the idea of "Dad's Day," believing that it will be of mutual benefit to the dads, to the students, and to the college.

5TH DORM CLAIMS CHAMPION DANCER

Inmates of Fifth Dormitory discovered a few days back that they have within their walls one Horace Curtis whose terpsichorean feet ask no odds of any one. Horace, erstwhile janitor and dancer extraordinary, hurries attendance at the world of dance masters, and is willing to deposit twenty-five dollars (\$25) with any well-known crook, to be donated to the Carolina Home for Cross-Eyed Mice in the event of his being outstepped by any competitor. The boys of upper Fifth are justly proud of the dancer, and are willing to back him to the limit in competition with any one who feels that he can dislodge from this Ethiopian's brow the laurel wreath of State's slapfoot master.

For music, Horace uses anything from the familiar mouth organ to a brass band. However, it has been observed that the music of bouncing nickels can evoke more action from his flying feet than could Ted Lewis himself.

SOPHOMORES DECIDE WILL ENFORCE FRESHMAN RULE

At a meeting of the Sophomore Class Monday night in Pullen Hall, it was the opinion of those present that the Freshmen are not living up to the rules. In discussion of this matter, the president suggested that the class coach the Freshmen and see that every man shall know the rules, songs, and yells by the time of the Furman game. It was also decided that if any Freshman be caught disobeying any rule, his case should be referred to the Court of Customs for settlement.

Old Stude: "You want to keep your eyes open around here."
New Stude: "What for?"
Old Stude: "Because people would think you were crazy if you went around with them shut."

Intramural Athletics Program Opens Monday

Each dormitory and all fraternities and societies that are interested in intramural athletics are asked to send representatives to Coach Doak at his office in the Frank Thompson Gymnasium next Monday, in order that the schedule of intramural sports may be opened up next week. Handball and tag football will be on the regular program of competitive athletics and the winning team in each sport will be given a medal as has been the custom during the past few years. It is hoped that a good many men will be out for the intramural athletics this year and the Physical Education Department will do all it can in behalf of those who are interested.

CHICK DOAK.

FRATS RUSH RATS AT LATE SUPPER

New Men Pay Call to Frat Houses Late at Night and Are Entertained

As a result of the ruling of the Pan-Hellenic Council prohibiting the rushing of freshmen until ten days after registration, the rushing season was not formally opened until Monday midnight.

Promptly at midnight freshmen began to assemble at fraternity houses and chapter rooms, wondering why they were invited out at this unearthly hour.

Many sleepy-eyed boys were noticed on classes Tuesday morning, giving evidence of one of those midnight suppers.

USE CENTELLA ASIATICA TO GROW YOUNG AND SPRY

Longevity and Brain Development Attributed to N. C. Herb by World Traveler

Among the many inquiries which continually pour in on a department are some that are especially interesting and humorous. Such a one was that of a California lady who requested the Department of Botany to furnish her some dried leaves of a certain plant (Centella Asiatica). The plant, an inhabitant of shallow marshes in the dewy country, was known to the department members, and Mr. L. A. Whitford, who was in the eastern section at the time, was able to send her a pound of the leaves.

None of the pharmacopoeias gave the plant any place in medicine, but the department members eventually had their curiosity satisfied through a letter from the lady, in which she explained, after profusely expressing her thanks, that in India she had learned of the wonderful properties of this plant. She had come to America to teach the western world something concerning its great value. She referred to an article in the San Francisco Sunday Examiner in which the marvelous properties of Centella were explained by her in an interview.

"Every struggling, sluggish-minded student should give ear to this. She says: 'This plant is a very wonderful brain developer and longevity herb. Whenever I have been able to get an uninterrupted supply and take it six months at a stretch, I can think clearer and do double the quantity of work that I do ordinarily, and it rejuvenates me to a remarkable extent, for I am a very old woman and yet I look but forty-five.'

The Department of Botany will be glad to inform any one where many wild acres of this plant may be found, and one may get enough leaves to make oneself a genius in a week, and restore one's vitality to the vigor of sixteen years overnight. Just one at a time, please!

work that I do ordinarily, and it rejuvenates me to a remarkable extent, for I am a very old woman and yet I look but forty-five."

PUBLIC CONCERT GIVEN BY BAND

The College Band gave a concert Sunday evening from the bandstand in the grove in front of Holladay Hall. The concert was well attended.

This is the first of a series of concerts to be given from time to time throughout the year. The music-loving public is beginning to recognize the ability of the band, whether it be in the rendition of classical music or the contortions of jazz.

Some of our first classmen are so stingy that they don't know how to spend a week-end.

list this under "major sports"

THERE'S no other sport on the calendar to compare with smoking a jimmy-pipe packed with P. A. Indoors and out. Any season. You win even when you draw, if you get what we mean. And how you will draw, once you know the wonderful taste of Prince Albert!

Cool as an over-cut notice from the dean. Sweet as the thoughts of a holiday. Fragrant as woodland flowers after a spring shower. P. A. never bites your tongue or parches your throat. The Prince Albert process fixed that the day P. A. matriculated.

Come out for this major sport! Get yourself a tidy red tin at that nearby smoke-shop where they hand out P. A. sunshine. You and Prince Albert are going to be great buddies right from the start. Because there just never was another tobacco like Prince Albert!

PRINCE ALBERT

—no other tobacco is like it!

P. A. is sold everywhere in tidy red tins, pound and half, pound tin humidors, and pound crystal-glass humidors with space-consistent top. And always with every bit of bite and pack removed by the Prince Albert process.

Paragraphics

Have classes started yet?

We have been too busy to investigate.

"We take nobody's dust," said Dean Cloyd, as he stopped the regular stream of traffic through the campus.

The noise of the concrete mixer on Hillsboro street is the most beautiful music we have heard since "Daddy's" concert Sunday.

For one week, at least, we are in the newspaper business in a big way. This issue has a circulation of over six thousand.

Our headline writer went on a strike. He claims that "The Students' Agricultural Fair Association, Incorporated" is too much name for any "one-hoss shoe."

Wake Forest had the college spirit and won from Carolina. The bleachers scored at least one of those touchdowns. How many will the bleachers here score today?

Will someone please explain to us just why it is that every year, just after the first Sophomore meeting, the campus and sidewalks become decorated with Freshman numerals?

The Registrar's office is always ready to render service in the classification of students. The latest wrinkle is the classifying of the co-eds into married and single groups.

We have had special "days" of every description, including the well-deserved "Mother's Day." We are indeed glad that someone has at last thought of Dad. He has perhaps been neglected.

It is reported that on a certain class in the Phys. Ed. Department the students refused to leave when the whistle blew, and demanded that the lecture be concluded at once. Sounds like a bed-time story.

It is reported that one of the big features of "Homecoming Day," November 11, will be the stunt night at the gym in which each fraternity and departmental club is to contribute a stunt. We'll bet our next dime it'll be good.

We are convinced that at least a few people read these ravings. Last week we advised that the Managing Editor be thanked for that edition. He has received formal thanks from anonymous ones at Winthrop College, and is deeply grateful.

We long to see the time when the Student Council, or some other vested authority, shall declare open season on the hordes of hucksters that harass us each night as we sit in our rooms with intent to study. If we want to buy anything we know where to find the stores.

A COWARDLY TRICK

Some students on the campus do not realize yet the seriousness of the student government and the laws of North Carolina. The student council last year put their foot down on hazing, not to spoil the freshmen, but to uphold the laws governing this institution and to abide by the laws of North Carolina.

One phase of this law is being violated by the students here in regard to the painting of class numerals. Some boys, and boys they are, or perhaps better termed kids, do not seem to be loyal enough to paint their own numerals, but have to sneak around in the dark of night and insert numerals for the freshmen. This not only shows their lack of class spirit, but also a sneaking way of punishing innocent freshmen.

There is no class spirit of fun in such, to a student of brave and open action, and that is the type of student that makes up or should make up the student body.

No red-blooded man will nourish the idea that such a thing is characteristic of good sportsmanship or a way of having fun, if you term it that way.

Whenever a State College student or faculty member goes to purchase anything in Raleigh he should ask himself this question: "Does this business establishment advertise in the college publications?"

ADVERTISERS SHOULD RECEIVE STUDENT TRADE

Whenever a State College student or faculty member goes to purchase anything in Raleigh he should ask himself this question: "Does this business establishment advertise in the college publications?"

A large percentage of the business men of Raleigh are well aware that the State College community spends several hundred thousand dollars with them each year, and they are willing to bid for that trade by advertising with us.

They are meeting us half way. They give us their good money to run our publications, and we give them our good space to tell the collegiate world what they have to sell.

Only last Wednesday we were in a clothing store down town and saw four State College men spend around \$160 for clothes within thirty minutes time. He was one of our best advertisers.

If all students will make a practice of telling who they are when making purchases, the merchants will realize the benefit to be derived from advertising with the student newspaper.

CRAVEN COUNTY CLUB TO SEND TECHNICIAN HOME

The Craven County Club held its first meeting of the new school year Thursday evening, presided over by W. L. Adams, president.

Following the custom of the last few years, a reporter was elected, T. G. Smith receiving the position of responsibility.

The Technician will again be sent to all the Craven County high schools. This plan was inaugurated by the Craven County Club several years ago, and was immediately adopted by several other county clubs.

STUDENT FORUM

ARE YOU LOYAL?

Are you loyal to State College? If you were asked that question you certainly would answer yes. Then, why do you not prove it? At the pep meeting on Thursday night before the Elon-State game there were only a handful of students there compared to the number enrolled.

The yells in the bleachers were very weak most of the time. Occasionally there was an outburst of that real college spirit and pep. The boys on the field notice the weakness in the bleachers. Is it encouraging to them? Certainly not.

WHY WAS WORK ON HILLSBORO STREET DELAYED?

Who sets the time for the City of Raleigh to do construction work? This is the question being asked by many State College students.

After some consideration on the Carolina Power and Light Co. agreed to do their part, and the city looked upon this as a good time to pave the street from curb to curb.

Just a week before the college boys came back the construction company went to work, and this has caused no little confusion.

The students at all times hear the sound of cars and horns passing over the campus.

Several Seniors last year realized that the societies in the School of Engineering lacked unity and co-operation.

The Council, hardly a year old, needs much attention and care like a new-born babe; there it lies in the cradle of our campus crying for nourishment of organization and faculty supervision.

Seeing the need of an Engineering Council at State College, each engineering society elected two representatives to a central council, which met with the object of binding together the various departments, promoting combined meetings of the whole School of Engineering.

The Council, hardly a year old, needs much attention and care like a new-born babe; there it lies in the cradle of our campus crying for nourishment of organization and faculty supervision.

It is the duty of every society to have a meeting in the near future, in order that this problem may be fully discussed. The engineering faculty you, for they heartily endorse the Engineering Council.

The Engineering Council will unite the engineering societies as the Pan-Hellenic Council unites the fraternities. Fellow engineers, a well-organized council needs the co-operation of every engineering student on the campus.

The Engineering Council will unite the engineering societies as the Pan-Hellenic Council unites the fraternities.

If all students will make a practice of telling who they are when making purchases, the merchants will realize the benefit to be derived from advertising with the student newspaper.

MORE RAVING FROM AN ANCIENT CO-ED ADMIRER

Now we just wonder if, when winter comes, we shall be bothered with such things as mosquitoes, flies, fleas, and-Co-eds? Yea, verily, we wonder exceedingly and mightily—aye, yea, mightily. The question is, Shall we, or shall we not?

Me, I say! Never! Not as long as a shirt is left unbuttoned in this school. Co-eds are the abomination of this earth.

THE TECHNICIAN

AGROMECK STAFF MEN ANNOUNCED BY EDITOR

Raleigh Firms Get Contract For Photography and Printing; Work Being Pushed

The work on the 1927 Agromeck is progressing rapidly. The contract for printing has been let to Edwards & Broughton, and the photography is to be done by Siddell's Studio, also of this city.

The campus pictures, baseball and track pictures have already been made. The Society, Saturday, the Junior and Sophomore pictures will be made the first part of next week.

The following staff members have been appointed and have already begun work:

- J. W. Shuford, Managing Editor. U. G. Hodgins and John Alexander, Advertising Managers. M. L. Rockfield, Senior Editor. F. M. Chedester, Athletic Editor. B. A. Sides, Military Editor. A. F. Dougherty, Sociore Editor. Tom Wilson, Sophomore Editor. Tus Faison, Fraternity Editor. A. L. Ayldett, Snap-shot Editor. M. K. Stewart, Circulation Manager. Other appointments will be made later.

like the poor "Fool" in his very truthful poem, who was stripped of his money, mind, morals, merchandise, and miscellany.

We do not object to petticoat rule at home, at the polls, or anywhere, except on the campus of old N. C. State. If she wishes higher education, let her go to those schools o' schools, Meredith, Peace, and St. Mary's; even let her go to jail or to Jericho, but leave State as the last stronghold of the Man's Man.

We are her support and her only reason for living. Why can't she leave us alone for four short years? C. F. SHUFORD.

'26 ELECTRICALS WRITE FROM SPECIAL SCHOOL

Edwards' Note.—This letter was received recently by The Technician. Both Middleton and Vick were members of the last graduation class at E. and were well known on the campus.

On July 1 Ernest M. Friar, Herbert D. Middleton, Jr., and Bingham L. Vick arrived in Atlanta to report to the Southern Bell Telephone and Telegraph Co. for the General Training Course which this company gives each year to a picked group of college graduates from different colleges of the Southern Bell territory, which embraces nine Southern States.

The class as a whole contains forty-three men this year as compared with twenty-six of last, which goes to show the growth of the company. The men taking the training course are equally divided between arts and commerce graduates on one hand and electricals and mechanicals on the other.

The colleges and universities represented are as follows: Auburn, 9; Mississippi, 5; Georgia Tech, 4; Mississippi A. and M., 4; N. C. State, 3; University of North Carolina, 3; University of Alabama, 3; Vanderbilt University, 3; Mississippi College, 2; Tulane University, 2; Emory University, 2; Clemson College, 1; University of Georgia, 1; and University of Tennessee, 1.

The course is arranged so that the student changes his assignment at least once a week. This offers an opportunity for him to get a wide range of experience as well as a welcome variety to the student. Saturday mornings are devoted to lectures, at which time the entire class is assembled, this being the only time during the week that the entire class is together.

Our assignments cover everything from the setting of telephone poles to the commercial and accounting departments. The purpose of this course is to give us fellows a general idea of all the departments of the telephone company, thus helping each man to decide which department he is best suited for.

We assure the Electrical Class of 1927 that this is a good company to work for, and we hope that next year will see a still larger representation from "Old N. C. State." HERBERT D. MIDDLETON, JR. BINGHAM L. VICK.

Professor Zip says--

PERHAPS you've noticed how the street is red and torn from end to end; how red dust fills the stuff we eat and lies in every way we wend. The snorting shovel rams its teeth deep down where once the roadway lay; from out its jaws there comes a wreath of sombre dust that floats away.

Uncle Dudley's Opinion-- On Real College Spirit

About this time of the year college spirit, as it is called, begins to awaken, and the new men become very excited over the athletic program. The first football game usually, if successful, starts the eager hearts of the freshmen to beat a little faster.

Now, fellows, most of all of you call this college spirit, but in reality is this real college spirit? I will agree with you that it is athletic spirit, but it is far from the former.

There are issues among the fraternities that form a part of the original spirit. When one fraternity "low-rates" another, makes cut-throat remarks, and runs another down, is that in true spirit of the college?

The class as a whole contains forty-three men this year as compared with twenty-six of last, which goes to show the growth of the company. The men taking the training course are equally divided between arts and commerce graduates on one hand and electricals and mechanicals on the other.

Investigation revealed that calls for "Ethel" and "Mabel" have been frequent during the past few nights. The coppers said they were always low in the man-of-the-world tone invariably assumed by quavering collegians when seeking a strange "date" by phone.

"Ethel, oh Ethel," calls the copper at the phone if he is in a good humor and after a little fun. Sometimes another after some more fun will pitch his copper voice to the roof and lip, to come around or chides him along until he gets suspicious and hang up.

"Have you read 'The Last of the Mohicans'?" "No, I haven't read the first of it yet."

THE SPIRIT OF N. C. STATE

Let us beat 'em As we meet 'em Out on Riddick field. Let us cheer And all be there, When opening up the deal.

We may lose, But let us choose Always to win the game. And we will stay To see them play And never to refrain.

Players, let us remind you That we're all behind you, And love to see you meet; For we are men To help you win, And never meet defeat.

Just shout and yell, And fight right well; The story we'll relate, That you're the ones Who've always won, And played for N. C. State. MELVIN MCKENZIE, '30.

TELEPHONE CALLS SHOW COLLEGE BOYS ARE BACK

The college boys are back. Any one who hadn't observed this from the red caps and screeching tweeds about the Capital City couldn't miss the fact if he dropped by the police station.

"Vessir, they're back," intoned one of the big coppers. "Howdy know—arrested any yet?" "Nope, just the telephone," he grinned.

"Ethel, oh Ethel," calls the copper at the phone if he is in a good humor and after a little fun. Sometimes another after some more fun will pitch his copper voice to the roof and lip, to come around or chides him along until he gets suspicious and hang up.

Textile School Obtains Additional Equipment for Use and Experiment

The Textile School opened for the fall session with seven states and two foreign countries represented by students. The states represented are: Virginia, North Carolina, South Carolina, Georgia, Alabama, Mississippi, and Massachusetts, while the foreign countries are China and Hawaii.

The addition to the Textile Building was completed during the summer, and new machinery has been received. The old opening and picking machinery has been discarded and replaced by the following equipment: Saco-Loewell bale breaker, Saco-Loewell vertical opener, Reeves variable speed drive; Whitin C. O. B. machine, breaker picker, and Saco-Loewell finisher picker.

The carding and spinning department has a full complement of machinery for making carded and combed

yarns. In order to carry out tests which have been planned, the following new equipment is now being added to the experimental room: One card from Howard & Bullough Machine Co., Pawtucket, R. I.; one slubber, one intermediate from Saco-Loewell Shops, Lowell, Mass.; one intermediate, one fine frame, one drawing frame from Whitin Machine Works, Whitinsville, Mass.; two spinning frames from Fales & Jenks Machine Co., Pawtucket, R. I., one of which is equipped with the Casablanca system; one spinning frame from the Saco-Loewell Shops, Lowell, Mass., equipped with the four-roll system and the Roth long draft system; one Fales & Jenks fancy twister; one Nasmith comb; Parkes-Cramer humidifying system.

To co-operate with the mills of the State as well as to give instruction to the students in the Textile School, the

experimental room will be operated as a separate unit.

The various machines in the school have been rearranged so as to illustrate different methods of driving cotton mill machinery.

During the past few weeks the school has received the following new equipment: One twenty-harness dobbie loom, from the Hopedale Mfg. Co., Millford, Mass. This loom was exhibited at the Textile Exposition held recently in Boston. One twenty-harness dobbie silk loom, from the Stafford Company, Readville, Mass. One set of harness shafts and heddles, from the Steel Heddle Co., Philadelphia, to be used on the German plush loom which was imported specially for the school by Mr. A. H. Buhlman, textile engineer, New York City. One card, from Woonsocket Machine and Press Co., Woonsocket, R. I. Two bobbin cleaning machines, from Terrell Machine Co., Charlotte, N. C.

Mr. L. C. Atkinson, class of 1915, recently donated to the school a number of loom reeds made by the Textile Specialty Co. of Greensboro, of which company he is president.

Two new men were added to the Textile School Faculty this year. Mr. H. R. Gaffney, a graduate of the College of Charleston and an alumnus of Georgia Tech, becomes Assistant Professor of Designing and Weaving. Dr. Owens Hand Browne, an alumnus of N. C. State College, who received his Ph.D. degree at Johns Hopkins last year, becomes an instructor in the dyeing department.

PAINT SCRUBBING FALLS DUTY OF FRESHMAN CLASS

Recent Numerals Change Point of View of Ex-Freshman on Use of Bricks

"In the evening by the moonlight You could hear those Freshmen scrubbing."

In the evening by the moonlight You could hear those bricks a-rubbing. How the Sophomores enjoyed it! They would sit all night and listen As Freshie scrubbed. In the evening by the moonlight."

This is the song that is brought to our minds as we see the numerous thirties appearing on and near the campus. For the past several days they have been appearing at regular intervals. Who paints them nobody seems to know, but it is generally understood who will erase them.

Although numbers of those who were members of last year's Freshman Class swore at that time never to make a freshman get down on his hands and knees on a sidewalk and use a brick to erase a numeral, they now find that there is some fun in calling, "Hey, Freshman, grab a brick and hop on this thirty." They also have a feeling of elation that they are not the ones who have to "hop to it."

"ON THE SPUR OF THE MOMENT"

The sudden occurrence of an accident always happens "on the spur of the moment." On the spur of the moment a man's anger flares up and he shoots a man who is on "the spur of the moment."

The jury acquits the man or pronounces him guilty for the same reason—"on the spur of the moment."

A man marries a woman, on the spur of the moment, and regrets it forever.

On the spur of the moment the doctor says a case of indigestion is a case of acute appendicitis and treats the patient for the same. The patient

pays the doctor for his services, but not on the spur of the moment. This article was suggested to the author on the spur of the moment and was written in the same time. It will be forgotten on the spur of the moment.

It's a hit!
You can bat out
lots of good stuff with
a Remington Portable Typewriter

It is surprising how the Remington Portable helps with college work. Long reports, theses, and transcriptions of lectures simply roll out of this machine. You don't have to be an experienced operator to speed up your writing to an unbelievable degree. Your theses and reports look better, too, and quite naturally create a more favorable impression on the professors when they are written on the Remington Portable. Weighs only 8 1/2 pounds, net, and is the handiest, fastest, simplest to operate, and most dependable of all portables. Smallest, lightest and most compact standard keyboard portable.

Alumni Notes

Observations and Communications of ZIPPY MACK

This afternoon many of the alumni will be on hand to see their own team go up against that of their fellow alumnus, Coach "Billy" Laval, of Furman. This will probably be one time that a State son does not do all in his power to make the Wolfpack victorious, but those occasions are infrequent. May the best man win.

In the street paving and tearing-up which is now going on in our front yard we find that Dewey Cline, of the '20 Civils, is right in the midst of the operations, being in charge of the L-asalter end of the destruction and construction.

Mr. T. C. (Dick) Dickerson, of the Mechanicals of '26, who is now with the Newport News Dry Dock folks, writes very interestingly of his work to Prof. J. M. Foster, of his department. Professor Foster is kind enough to let us quote from his letter. In addition to telling of interesting work with turbines, "Dick" says: "The thing that impressed me most during my last term in college was the untiring effort which you put forth to get every man a job, and the fact that you did have a job to offer every Senior Mechanical. Since talking to men from other schools I believe that the N. C. State Mechanical Department is more successful than any other school in the South in that respect."

Mr. H. W. (Pop) Taylor, of the '26 Vocationals, is in Lexington this week, where he has charge of a soils exhibit at the Davidson county fair. "Pop" is now doing graduate work here in school.

Mr. Robert M. (Doc) Shuford, of the '26 Mechanicals, is now with the Frick Company. He was originally in the Ammonia Fittings Department, but has later been transferred to the Foundry.

Mr. S. E. Shepard, also of the '26 Mechanicals, is doing drafting for Jas. M. Workman, Engineer, of Greensboro.

Tal Stafford tells us that the Alumni News will not longer be published, but that all the alumni will be given an opportunity to subscribe to this paper, which will not only give news of the old fellows, but will also give up-to-the-minute news of the student and athletic activities. We hope that all the alumni will become subscribers, and that they will tell us if they do anything worth while.

Neglect
Whenever I have cause to feel
That life's neglecting me a bit,
I find the only reason is,
That I'm not giving much to it.

Report of General Alumni Assn. Meeting of June 7, '26

[Error's Note: The following annual report has in the past been published in the July issue of *Alumni News*. This paper was discontinued before the General Alumni Association meeting on June 7, 1926, and the report is being included in this issue of *The Technician*, especially since this issue is being mailed to 4,500 members of the Alumni Association.]

The meeting was called to order by President J. A. Higgs. The minutes of the previous meeting were read and approved.

Report of Treasurer

The treasurer's report showed total receipts for the year of \$1,500.63 and total disbursements \$1,110.86, leaving a balance on hand April 30, 1926, \$389.77. The treasurer stated that the actual balance in the bank on April 30, 1926, as per statement from the Commercial National Bank, was \$490.07. The treasurer reported that this extra \$100 was due to a credit of \$100 paid by Mr. J. E. McDougal, treasurer Central Athletic Committee, on a note.

Report of Auditing Committee

Mr. G. Y. Stradley, a member of the Auditing Committee, in the absence of Mr. Merritt, chairman of the committee, reported that the committee had gone over the treasurer's books and found them to be correct. It was

moved and seconded that the report of the Auditing Committee be accepted. This motion carried.

Report of the Executive Committee

In the absence of the chairman of the Executive Committee, Mr. W. F. Pate, the secretary of the committee, Mr. Cloyd, read the minutes of the Executive Committee during the past year. It was moved and seconded that the report of the Executive Committee be approved. This motion carried.

Report of Memorial Committee

Mr. C. L. Mann, chairman of the Memorial Committee, submitted his report. It was moved and seconded that his report be approved. A copy of the report is on file as a part of the minutes of this meeting.

Report of the Treasurer of the Memorial Committee

Mr. E. B. Owen, treasurer of the Memorial Committee, submitted his report. His report showed the whole amount subscribed to the Memorial since its beginning to be \$43,676.50. Whole amount collected, \$28,855.27. Whole amount due, \$14,721.23. Amount in bank June 1, 1925, \$222.69. Amount collected from June 1, 1925, to June 1, 1926, \$2,095.25. Making total receipts of \$2,317.94 and total disbursements

for year \$2,244.15, leaving a balance in the bank June 1, 1926, of \$72.79.

It was moved and seconded that the report of the treasurer of the Memorial Committee be approved. This motion carried. A copy of the report is on file as a part of the minutes of this meeting.

Report of Standing Committee

Athletic Committee

Mr. J. E. McDougal, treasurer of the Central Athletic Committee, made a statement concerning the receipts and expenditures of his committee during the past year. It was moved and seconded that before further funds be expended by the Central Athletic Committee, the committee shall present to the Auditing Committee an itemized report, and that the Central Athletic Committee be authorized to go forward with its work when its report has been approved by the Auditing Committee. This motion carried.

Report of Committee on Board of Trustees

Mr. I. O. Schaub, chairman of the Committee on Board of Trustees, reported that since the term of office of no member of the board of trustees expires this year, the committee had no report to make. Mr. Schaub also reported that a special committee, of which he was chairman, had been appointed to confer with the president with regard to the conflict in the time of meeting between the board of trustees and the General Alumni Association, and that the president had requested that a special committee from the General Alumni Association be appointed to meet with a committee from the board of trustees to see if it would not be possible to work out a plan which would avoid this conflict in the future.

Report of Nominating Committee

The nominating committee recommended the following men for officers of the association for the year 1926-27:

For President—A. J. Wilson, Class 1907, Raleigh, N. C.
 For First Vice-President—J. W. Hendricks, Class 1917, Newton, N. C.
 For Second Vice-President—E. G. Moore, Class 1926, New Bern, N. C.
 For Secretary-Treasurer—E. L. Cloyd, Class 1915, Raleigh, N. C.
 Chairman Executive Committee—L. O. Schaub, Class 1900, Raleigh, N. C.
 For Membership on Executive Committee for Term of Three Years—I. O. Schaub, R. H. Merritt, W. F. Pate, J. W. Harnelson, E. E. Culbreth, G. Y. Stradley.

The president called for further nominations from the floor. There being no further nominations, it was moved and seconded that Tal H. Stafford be instructed to cast a vote of the Association for the candidates as presented by the Nominating Committee. This vote was carried, and the candidates were unanimously elected.

Alumni Loyalty Fund

Mr. J. W. Harnelson made the following recommendation: "It is recommended that the General Alumni Association approve and adopt the endowment insurance plan submitted by the Jefferson Standard Life Insurance Company for selling one-quarter of a million dollars of endowment life insurance to the N. C. State College Alumni; said insurance to be paid through the Alumni Loyalty Fund Council to the State College on October 3, 1943.

"It is further recommended that the insurance sold under the plan herein stated be known as the Alumni Loyalty Fund, and that the fund be administered by a council known as the Alumni Loyalty Fund Council, to be composed as follows: President General Alumni Association, ex officio chairman of the council; President of the College, ex officio member; business manager of the college, ex officio member; chairman of the Board of Trustees, ex officio member; Alumni secretary, ex officio member; secretary Board of Trustees, ex officio member; two Alumni elected for a period of three years; two Alumni elected for a period of two years; two Alumni elected for a period of one year.

"At each subsequent annual meeting of the General Alumni Association two Alumni shall be elected to replace those whose terms expire, also any vacancies in the membership filled by this association shall be filled at the annual meeting. Six members shall constitute a quorum, but in no case shall any business be transacted unless at least one-half of those present are Alumni. All actions of the committee shall be approved by the general Alumni Association at its annual meeting.

Mr. Harry Hartsell, an alumnus of the college and representative of the Jefferson Standard Life Insurance Company, was called upon for a statement giving the details of the plan. It was moved and seconded that the General Alumni Association accept the recommendation as presented by Colonel Harnelson.

An amendment was offered to this motion: "That the completion of the Memorial Tower shall be the first project undertaken under this plan." The amendment was accepted by the mover of the original motion. The motion, as amended, was then voted upon and carried.

Naming of the New Electrical Engineering and Physics Building

Mr. George Cox, an alumnus of the college and a member of the Electrical Engineering Faculty, was called upon for a statement concerning the proposed name for the new Electrical

Engineering building. Mr. Cox stated that immediately following the death of Prof. Henry Knox McIntyre, for seventeen years a member of the Electrical Engineering Faculty, the Alumni of the Electrical Engineering Department had drawn up a resolution requesting that this new building be named in memory of Professor McIntyre; that this resolution had been presented to the executive committee of the Board of Trustees, and that this committee felt that the building should be named in honor of Prof. William Hand Browne, head of the Department of Electrical Engineering, and that the main Electrical Engineering laboratory should be named the Henry Knox McIntyre Laboratory. He stated further that he had since conferred with a number of Alumni who proposed the first resolution, and that they were now all in favor of naming the new building Browne Hall and the main laboratory the McIntyre Laboratory.

It was then moved and seconded that the General Alumni Association recommend to the Board of Trustees of the college that the new Electrical Engineering and Physics building be named Browne Hall, and that the main Electrical Engineering laboratory be named the Henry Knox McIntyre Laboratory. This motion carried, and it was then moved that a committee of three be appointed to go before the Board of Trustees at once with this recommendation. This motion carried, and the president appointed Mr. Bedford Brown, Mr. G. C. Cox, and Mr. L. O. Henry to present this resolution to the Board of Trustees at once.

It was further moved that this same committee request the Board of Trustees to consider the naming of all unnamed buildings on the campus. This motion carried.

made announcements concerning the other features of the Commencement.

Alumni News

Mr. John A. Park, chairman of the Committee on Alumni News, reported that the President of the college had stated that after June 1, 1926, it would be impossible for the college to publish the *Alumni News* out of college funds, and that the special committee appointed to consider this question recommended that the *Alumni News* be combined with *The Technician*, which is a weekly paper published by the students at State College, and that the subscription price be \$1.25 a year.

Mr. Stafford, Alumni secretary, was asked to make a statement concerning this. Mr. Stafford stated that the President of the college felt that the college could probably finance the first two issues of the combined publica-

tion, sending it to the present mailing list of *Alumni News*, and that after that this paper would be mailed at the subscription rate of \$1.25 a year. Mr. Stafford stated that in his opinion the Alumni would be much pleased with this combination, since *The Technician* is a weekly paper giving all college news, and that this paper had been voted the best college newspaper in the State by the North Carolina Intercollegiate Press Association at its last meeting. It was moved and seconded that the recommendation of the Alumni News Committee be adopted. This motion carried.

There being no further business, the meeting adjourned.

With the hemispherical integrator the illuminating engineer measures light intensity and distribution. These laboratory findings are practically applied to improve our everyday illumination.

When the sun goes down

More than 350,000,000 incandescent lamps, with a combined light of nine billion candlepower, make city streets, stores, and homes brighter than ever before.

In bungalow or mansion, workshop or factory, dormitory or auditorium, there is no excuse for poor illumination. We have cheaper and better lighting in the electric lamp than ever before; for the dollar that bought 1,115 candlepower-hours of light with the carbon-filament lamps of 1886, now buys 16,200 candlepower-hours of light with the MAZDA lamps.

Not only more light, but correctly applied light, is the order of the day. The electric lamp, with its flameless yet highly concentrated light source, lends itself ideally to reflectors, shades, and screens. It is controlled light—safe light. And illumination becomes an exact science.

During college days and in after life, correct lighting must ever be of paramount importance to the college man and woman. Good lighting is the worthy handmaiden of culture and progress.

The General Electric Company is the world's largest manufacturer of incandescent lamps. And behind the G-E MAZDA lamps are vast research laboratories dedicated to cheaper and better electric illumination, and to the conservation of eyesight.

A series of G-E advertisements showing what electricity is doing in many fields will be sent on request. Ask for booklet GEK-1.
