## STATE WRESTLERS DEFEAT GENERALS ON VIRGINIA TRIP

### Lose to Virginia Military Institute in Second Meet

### TECHS WIN FIRST THREE FALLS IN W. & L. CONTEST

### Capt. Leary Only State Man to Win Against V. M. I.—Morris Gets Draw in 158-Pound Class.

The N. C. State College wrestlers took a three-day trip to Virginia to meet the Washington and Lee grapplers on Saturday night and the Virginia Military Institute men on Monday night.

The first match with Washington and Lee was in favor of the Techs. The score was 16-13. The State men won the first two bouts by time advantage, and the third by a fall before the Blue and White team was able to score. The Generals scored their first point in the 145-pound class when Tully pinned Moore's shoulders to the mat.

The State men won the 158-pound class bout by a fall and then Bolton, of Washington and Lee, won time advantage over Choplin. In the unlimited class Hughes threw Crowson in a little over six minutes.

115-pound—Hobbs (N. C. S.) won time advantage over Gresham. Time, 4.41 minutes.

125-pound—Leary (N. C. S.) won time advantage over Thompson. Time, 4.13 minutes.

135-pound—Frisbie (N. C. S.) won by fall over Devin. Time, 3 minutes.

145-pound—Tully (W. and L.) won, by fall, over Moore. Time, 4.55 minutes.

153-pound—Morris (N. C. S.) won over Madison by a fall. Time, 5.15 minutes.

175-pound—Bolton (W. and L.) won time advantage over Choplin. Time, 2.16 minutes.

Unlimited—Hughes (W. and L.) won, by fall, over Crowson (N. C. S.). Time, 6.29 minutes.

The second match was with the Virginia Military Institute grapplers. The Cadets won by the score of 20½ to 4½.

Captain Leary, of State, was the only State man to take a bout, but Morris got a draw with Rugh. The Cadets registered two falls and three—Continued on page 4.

## TEXTILE SCHOOL WILL PRESENT RAYON FILM

### Moving Picture Will Show Different Stages in Production of Fibre

The Textile School of State College will present "The Romance of Rayon," a film showing all the steps in the processing of this fibre, at 7 p. m., Monday, January 30, in the college Y. M. C. A. auditorium. Dr. Thomas Nelson, dean of the Textile School, extends a cordial invitation to all interested to see the film.

Dr. Nelson will also exhibit at this time actual material showing the various stages in the production of this fibre from wood pulp, cotton, or cotton linters to the finished fabrics.

Rayon is the fifth of the great fibres that have served the world, the others being silk, wool, cotton, and linen. Rayon resembles silk in that it is made from cellulose, the substance silk-worms spin silk from. It is made equally well from spruce wood pulp and from cotton or cotton linters.

The wood pulp or other raw products must first be reduced to a pulpy mass and then cooked in large digesters until all foreign matter is removed from the natural cellulose. It is then washed, bleached, and pressed into sheets that resemble paper stock. These sheets then go to shredding machines, which tear them into fragments. After this it is chemically treated until it forms a liquid that looks like molasses. Then an acid hardens it into fine filaments.

Then follows a period when the material is aged at an even temperature—Continued on page 2.

## Wrestling Tonight!

The State College grapplers will meet the Virginia Polytechnic Institute wrestlers here tonight in the Frank Thompson Gymnasium.

## Poultry Judging Team Wins Third Place At Show

The State College poultry judging team won third place in the intercollegiate judging contests held in connection with the Madison Square Garden poultry show. State ranked third in a field of six teams, representing the leading colleges of eastern United States. The team was composed of the following men: P. A. Raper, senior; W. P. Albright and T. C. Andrews, juniors, and D. C. Cathey, junior alternate. The team was accompanied by Dr. B. F. Kaupp and Prof. W. F. Armstrong, of the poultry department.

In the three previous years State teams have advanced from third place to first place in 1927. Due to the interruptions caused by the process of moving the poultry plant the team this year was handicapped by a shortage of good material to practice on. In view of this situation, the team is to be congratulated for keeping State in such a high place. W. P. Albright was high man of the contest in the written examination, which counted one-third of the contest. T. C. Andrews was high man on the State team.

While in New York the team visited the New York Egg Exchange, an egg-breaking establishment, cold storage plants, commission houses, and many other places of interest in and about the great metropolis.

The team had the pleasure of being entertained for one evening by "Railroad" Fountain and F. S. McCoy, graduates of '27, who are now employed in the New York office of the Liberty Mutual Insurance Company of Boston.

On the return trip one day was spent in Washington City seeing the many interesting sites of the nation's capital.

## Rapid Progress Is Being Made On New Building

Work is progressing rapidly on the new Liberal Arts building. It is expected to be completed in the fall of June 1, 1928, the time limit set in the contract.

The delay was caused by a misunderstanding between the stone contractors and the college authorities.

Mr. Kennedy, the college inspector, said that enough material had been placed on the job to insure steady progress in the construction work. If good weather holds out the work will be completed by the date set in the contract, June 1, 1928. Work on the second story will be started next week.

The delay in the construction was caused by a misunderstanding between the stone contractor and the college inspector.

The specifications called for sand-rubbed stone. But for some reason the contractor sent the rough stone. Work was stopped until an agreement between the stone contractor and the college authorities was brought about.

The agreement finally settled upon was to go ahead and use the stone, but the contractor would have it sand-rubbed after it was in place.

The work is being done by Jewel Riddle, of Santee, N. C. He is also doing the work on Dr. Brooks' new home. He is not the contractor, however, who is building the new Civil Engineering building. This work is being done by W. P. Rose, of Greensboro, N. C.

## NOTICE!

There will be a meeting of the student body in Pullen Hall on February 2 at 6:30 p. m. At this time the question of whether there will be any more freshman gauds or not will be voted upon. Other important matters pertaining to the student body as a whole will be discussed.

C. S. TUCKER,  
President.

## COL. HARRELSON TRANSFERRED TO NEW COMMAND

### State College Professor Transferred to Field Artillery Section

### WILL COMMAND REGIMENT OF ORGANIZED RESERVES

### New Post Effective Dec. 20— Was Commander of Unit of Coast Artillery Prior to Transfer—Has Military Record Ex- tending Over 20 Year Period.

Colonel J. W. Harrelson, professor of mathematics at this college, is now a member of the Field Artillery section of the organized reserves and commander of the 316th Field Artillery of the 81st Division, as a result of a notice received by him effecting such a transfer on December 20. The 316th Field Artillery is a part of the 156th Field Artillery Brigade, commanded by General Albert L. Cox.

Commenting upon Colonel Harrelson's transfer to his command, General Cox said: "As commanding general of the 156th Field Artillery Brigade, I am especially pleased at the assignment of Col. John W. Harrelson, Field Artillery Reserve, to the command of the 316th Field Artillery. I have known Colonel Harrelson intimately for a number of years and have noted his steady progress from a lieutenant of Coast Artillery to his present grade. I regard him as one of the most efficient, diligent, and capable officers in our State. The brigade is greatly strengthened by his assignment to it."

Colonel Harrelson's command, prior to his transfer, was the 534th Coast Artillery Regiment, a regiment of anti-aircraft artillery. His military record extends over a period of twenty years, beginning in July, 1908, when he enlisted in Company G, First North Carolina Infantry, National Guard. He served one enlistment with this company. In October, 1915, he was commissioned first lieutenant in the North Carolina National Guard and assigned to the First Company, Coast Artillery, located in Raleigh. He was promoted to the rank of captain and assigned command of the First Company in August, 1916, and entered Federal service in July, 1917, in the same command. In August, 1918, he was promoted to the rank of major in the army of the United States; assigned to duty with the War Department General Staff in September.—Continued on page 2.

## "The Red Masquers" Is Name Selected For Dramatic Club

"The Red Masquers" was the name selected from a number of suggested titles at a meeting of the newly organized dramatic club, which was held Wednesday in Room D, Pullen Hall. The approved title for the embryonic players was suggested by Professor Ray, who will direct dramatic work here in connection with his duties as assistant professor in public speaking.

The movement was originated by members of Pullen Literary Society, and later Leazar Society was asked to join in the movement. It was decided by the two societies that it would be necessary to make the work open to all members of the student body and not make it strictly a society organization.

Last Friday the club was formally organized at a meeting of its enthusiasts by electing officers and drawing up a set of resolutions which were passed by those who attended the meeting. A. L. Aydtlett was elected president, with Ada Spencer, secretary, and W. Hugh Campbell, treasurer. Several committees were appointed at this time, including a play-reading committee and one to select a name for the club. It will be the duty of the play readers to read plays and make selections with the help of a group of faculty advisers. The student committee is composed of C. L. Straughn, H. B. Merriam, and D. H.

## Georgia Crackers Win Hectic Game From Red Terrors

The University of Georgia five finished its three-game invasion of North Carolina with a bang Monday night by winning from the Red Terrors in the city auditorium, 38-31.

Georgia opened the scoring and piled up seven points before State found the basket. After the half-way period of the first half the Terrors found their stride and ran the score up for a seven-point lead at the end of the twenty-minute period.

State opened the second half with a rush and rang up goal after goal to establish a twelve-point lead over the visiting Georgians. The visitors were unable to score during the first few minutes of the second half.

The University team opened up its strong, whirlwind offensive in the latter stage of the half and the State defence, which had been so strong before, was unable to cope with the situation. Time after time Drew and Palmer advanced the ball to the goal and dropped it through.

To make a long story short, the Georgia team won the game with an eight-point margin. It overcame a twelve-point lead to win by that eight-point margin.

The Georgia spurt was led by Palmer, a guard, who dropped in five goals in the space of a few minutes. Frank Goodwin, State, led the Techs in scoring, getting fifteen points to the Keen, of the visitors. Young followed Goodwin to be second for the Red.—Continued on page 3.

## CERAMIC LABORATORY IS RECEIVING NEW MACHINES

### Grinding and Mixing Implements Ordered Last Year, Arrived Before Christmas

The new equipment for the ceramic laboratory is rapidly being installed. It has been ordered since last spring, but arrived only shortly before Christmas.

In the past the department has felt the need of grinding machines of various sorts and of mixing machines. The new equipment is designed to take care of this need. Other new machines are cross-breaking machines of a new design for testing the strength of various clays. An exhaust fan has been installed in the glaze room.

The machines are all of standard commercial sizes to insure adequate capacity for years to come.

A new set of three ball mills will aid in mixing and grinding glasses.

Other new machines are cross-breaking machines of a new design for testing the strength of various clays. An exhaust fan has been installed in the glaze room.

The machines are all of standard commercial sizes to insure adequate capacity for years to come.

## Red Terrors Split Double Bill With S. C. Gamecocks

### FRESHMAN FRIENDSHIP COUNCIL REORGANIZED

### Will Meet Tomorrow and Dis- cuss Plans for Future Activities

Initial steps for the organization of the 1928 Freshman Friendship Council were made Wednesday at chapel when J. B. Britt, president of the Y. M. C. A., and J. E. Moore and J. R. Buchanan, of the "Y" cabinet, presented the organization to the freshman class. It was announced at that time that the organization would be completed Sunday afternoon, January 29, at 1:30, in the "Y" auditorium.

The purpose of this group is "To create, maintain, and extend throughout the student body high standards of Christian character." With this ideal to work toward, the Freshman Council has furnished practically all of the leadership for the Y. M. C. A., and a great majority of the campus leaders have been connected with it. Those speaking Wednesday gave testimony to the fact that they had been better able to meet the problems of the college man by having been in the council.

Very frank discussions will be entered into in the meetings and every man will be asked to contribute a very definite part. Problems of vital importance to the members will be brought up and light of able men thrown on them. The most logical and sane conclusions will be drawn only after a most thorough study has been made. The development of character and preparation for leadership are the essential aims of the group.

The meeting Sunday at 1:30 will be open to those who think they will

## Seniors Petition For Excuse From Third Term Exams

Definite steps were taken by the seniors at a class meeting Wednesday night to petition the faculty council to allow them to be excused from examination the third term.

A committee composed of five seniors were appointed by President Ridenhour to draw up a petition. The following men are on this committee: G. P. Hall, C. W. Jackson, F. S. Sloan, Charlie Seal, and D. A. Grider. These men will present the petition at the next class meeting, which will be held in the "Y" auditorium next Wednesday night at 6:30. At this time the petition will be open for signature of the seniors favoring such action.

The members of the graduating class, in presenting this petition, place one restriction upon themselves and that is that seniors will attend all of the graduating exercises. If this petition is granted, the class will not ask for Senior Week, which has been given to previous graduating classes.

It was also decided at this meeting to wear caps and gowns at the graduating exercises.

It was also decided at this meeting to wear caps and gowns at the graduating exercises.

It was also decided at this meeting to wear caps and gowns at the graduating exercises.

It was also decided at this meeting to wear caps and gowns at the graduating exercises.

## JANITOR CAUSES VACCI- NATION OF 17 PHI PI PHI

Seventeen members and pledges of the Phi Pi Phi fraternity were vaccinated for smallpox Tuesday as a result of having been exposed to the dread disease.

Their negro janitor, who had been absent from work for several days on account of sickness, returned to work, but some members having noticed that something was ailing him advised him to consult a doctor immediately.

After an examination it was revealed that the negro janitor had smallpox, and as a result seventeen of them living in the house were vaccinated at the college infirmary.

### South Carolina Upset Dope in Second Tilt to Win 38-30

### STATE QUINT RUNS WILD IN FIRST GAME ON ROAD

### Goodwin High Scorer Wednes- day Night With 16 Points— Johnson's Floor Work in Sec- ond Tilt a Feature—Air-tight Guarding Stops Terrors in the Final Game.

Columbia, Jan. 26—The N. C. State College Red Terrors made a two-day invasion of South Carolina to meet the University of South Carolina Gamecocks.

The Terrors won the first game by the score of 48-22. The 'Cocks made a comeback in the Thursday night game and won, 35-30.

In the first game of the two-game series the State Red Terrors handily won from the Gamecocks by the score of 48-22 by playing a magnificent and versatile game of basketball. The State team ran wild in the second half, turning a close game into a one-sided affair. The first period was a nip and tuck affair, with the score knotted several times, but the Terrors led, 22-16 at the end of the half.

Close guarding in the second period held the Gamecocks to six points, while the State team got 26 points.

The feature of the game was the basket tossing of Frank Goodwin, State center. Johnson, Haar, and Young also showed adeptness at ringing the basket. The floor-work of McDowell was beautiful, according to the reports. The passing attack of the State team was a feature of the game also.

Clark, Holcomb, and Chandler did some good work for the Gamecocks.

### LOSE SECOND

Columbia, S. C., Jan. 26—South Carolina upset the dope tonight by defeating North Carolina State in the second basketball game between the two teams by a score of 38 to 30.

The game was never one-sided, although South Carolina held the lead after the first ten minutes. Goodwin, State star of the game Wednesday—Continued on page 3.

## RADIOS ARE BECOMING MORE POPULAR ON STATE CAMPUS

### Student Thinks Low Cost of Parts Has Brought on Increase

Radios are dominating State College campus in a number that is almost equal to the number of Victrolas in the dormitories. There are arias that are strung from gable to gable and building to building. It is quite evident that if there are any radio waves in action, State College boys will be benefited by entertainments. Many of the radios are capable of accumulating news from any broadcasting station in the United States, Mexico, and Cuba.

Just after the World War radios made their first appearance on the campus, and a broadcasting station of a short wave length was installed in Winston Hall a few years later. Due to a periodical dearth of interest in the radio field and the great expense of a radio, the world-wide wonder capable of capturing the interest in the air, failed to exist among students for a few years.

Now, since twenty-five dollars is a sufficient sum of money to purchase a five-tube radio set, college students have taken advantage of such an offer, and accordingly the radios within the last two years are making a fast reappearance in the dormitories. Skilled radio experts have become prominent all over the campus, since Grant's sells the radio in pieces and it is necessary for these pieces to be assembled or wired up into a unit.

In the past two weeks two radios have been installed on a single floor in Watauga dormitory. L. B. Buray and G. H. Morrison are owners of two such sets.

Paragraphics

It certainly was tough luck to overcome a nine-point lead and hold the big end of the score at the half by a seven-point margin, and then see those Georgia Crackers defeat Gus's Terrors.

We sincerely hope our co-eds will take it upon themselves to uphold State College by making contributions to the Girls' number of the *Carolina Buccaneer*. We wonder if it will be debared from the mails.

"The Red Masquers" was the name given the dramatic club at this institution. The next thing to do is to impress this name upon the minds of the people of this state. That can best be done by presenting good plays.

H. L. Mencken urges all who feel the inclination to write, first to obtain steady employment. Until recently he suggested bootlegging, but the strength of competition has led to advocacy of taxi driving and similar occupations.—*New Student*.

Duke University students and faculty are beginning to doubt whether the honor system is being upheld at that institution. As Abraham Lincoln once said, "You can fool some of the people all of the time, but you can't fool all the people all of the time."

It has been rumored on the campus that some very insulting letters have been passed between C. S. Tucker and Joe Shuford. We have heard from reliable sources that Shuford has threatened to use his influence in having the president of the student body ousted from his lordly office unless he submits a write-up of his fellow henchmen for the 1928 *Agromack*.

No, this is not a sport extra, although it has that appearance. The lack of news is the cause of it all, and there is no news because there is nothing happening, or at least nobody has informed us of anything. The athletes and "Sleuth" Vernon, sports editor of this sheet, saved the day by shifting the sports section to the front page. There seems to be a period of relaxation going on around this campus in every respect. Again we implore the student body and faculty to let us have the news. Our supply of reporters is very limited, and it is necessary that you cooperate. Judging by the number of news articles that we get from some of the departments we fear they have moved off the campus.

A GROWING NEED

There is a growing need at this college for a printing shop. Several thousand dollars are spent annually for printing of college and student publications, and since it is the plan of the School of Science and Business to begin a course in journalism here next year the need becomes greater. It is true that the cost of a mod-

EDDY-FICATION

We've got a Rich Old Uncle that sends us lots of "jack." And the nicest part about it is, he doesn't want it back; For if there's any trouble we will go to help him fight. But Eddy says, "Don't go, my dears; it really isn't right."

And so we sit and quibble over talk of right and wrong, And listen to the murmurings of the Eddy's little song; But when the time comes 'round we'll see who furnishes the cash. Let's look to "Dear Old Uncle Sam" before we get too rash.

—Martha Andrews.

ern printing plant sufficiently adequate to publish all the publications at this college would involve a considerable amount of money, but taking into consideration the amount of money spent for printing each year the plant would pay for itself in the run of a few years.

With the installation of a course in journalism the demand for a printing shop is imperative. Under proper supervision of a competent staff of printers it would be possible to teach students how to do the various types of work found in a printing shop and at the same time print the college and student publications. A course in journalism would without a doubt be more thorough when students were taught in a college-owned print shop linotype operating, make-up, and numerous other phases of the work.

Each year there are students at this college who have had previous experience in a printing plant, and within a year or so after installation it seems plausible that the plant could be run by students with very little supervision.

THE TIME APPROACHES

The time is not far hence when boys from the high schools throughout this state will come to State College to enter the third annual invitational high school basketball tournament. Among this group of eight hundred boys are some of the future college athletes of tomorrow, and many of them will form their opinion of this college during their visit to this institution. It lies within the hands of the student body to make this tournament a success as it has been in the past, or a failure.

Only through cooperation with the athletic department by the student body can this tournament be a success. By sharing rooms with these boys and taking an interest in them and the tournament is the means by which a successful tournament may be held, as has been demonstrated by past similar events. It may inconvenience the students to take it upon themselves to entertain and furnish sleeping quarters for them, but this should be negligible in view of the fact that State College is the host to a representative group of high school boys in this state. This is one of the best possible means of advertising this college, if the student body takes it upon themselves to see that the high school boys have an enjoyable stay.

Fraternities and other organizations on the campus can help greatly in making it the most successful tournament ever held at this college through cooperation and interest. A faculty member stated the other day that it was surprising to know how many boys who attended the event last year were registered here this year. The number of students this college gets next year will largely depend upon the reception and entertainment which they get while on this campus. It is the duty of every loyal State College student to begin thinking of the best way of making these embryonic athletes enjoy themselves to the fullest degree while on our campus.

CHEMICAL DEPARTMENT OFFERS \$5.00 CASH PRIZE FOR BEST FLOAT PLANS

A prize for the best suggestion of a float for the Chemical Engineering Department will be given by the chemical engineers. This float is for the Engineering Fair, which is to be given in March.

The sum of five dollars is to be given to the fortunate one. All chemical engineering students are eligible in this contest. The suggestion must be in the office of Dr. E. E. Randolph, head of the Chemical Engineering Department, not later than 12 o'clock noon, February 4.

Prominent members of the faculty will act as judges in this contest. The material must be in ink, neatly written and explained. The prize is given by the Chemical Engineers Society.

A woman I hate is Nancy Leant. She calls me Sweetie and doesn't mean it.

WISE AND OTHERWISE

In 1926 "The Wataugan" was founded as the literary magazine of State College. Since its foundation its editors have adhered more or less to that original purpose.

We do not intend to criticize the merit of this publication. It is doing a great and much-needed work, and gives expression to a type of ideas that would not find expression elsewhere. In view of this fact, we feel that we are justified in making a few suggestions that might be worth trying.

In the first place, it will be necessary to change the type of material now being run. This may possibly necessitate a slight deviation from the original purpose of the publication. But in view of the results, such a change would be welcomed.

"The Wataugan" is not being read by the students—not being read for the simple fact that there is nothing in it of interest. And the fact that there is nothing in it of interest is not a reflection upon the taste or intelligence of the students. Why not "popularize" "The Wataugan"? By this we mean run material of such diversification that every issue would be sure of containing something of interest. In doing this the publication would gain readers. That in itself would be a noteworthy accomplishment. After you have the audience, it is possible to drive home many worth-while ideas that otherwise would go by unnoticed.

In running a popular type of material, "The Wataugan" would not be lowering its dignity. As things are, it has nothing to lose and all to gain. Its dignity as a literary magazine is certainly nothing to speak of.

We are not advocating the scandalous or the dirty. Stuff of that kind is short-lived. What we are advocating is that the editors get hold of some clean, crisp, and lively material, even if it cannot be termed specially "literary."

Profs. Dana-Foster Make Addresses At Meeting of A. S. M. E.

The student branch of A. S. M. E. at State College met in regular session Tuesday, January 24, and after a brief business period Professor Dana, honorary chairman of the local branch, gave a talk on the recent New York convention and new show. Professor Foster, of the mechanical department, also a delegate to the convention from the Raleigh branch, addressed the meeting briefly.

E. W. Worth presented a good discussion on the correct style and location of sampling pipe to be used with the separating calorimeter.

A very practical part of the program was filled by W. M. Fallock, who gave an actual demonstration of the correct method to lace power belts.

B. F. Turner discussed the power diagram of the single acting oil engine, vertical type, and gave other interesting and practical information on this type engine.

"Steam Turbine Development" was the subject of a discussion by B. G. Gorham. Mr. Gorham brought out the developments in other lines of engineering and industrial activity, which had a distinct bearing on the progress of steam turbine design.

Begin Construction of Two Greenhouses, To Be Behind Patterson Hall

Construction has been started on two new greenhouses, behind Patterson Hall, to be used by the Agronomy and Plant Pathology Departments. Each new greenhouse will be the same size as the old one, and will cost approximately \$2,500. They will be completed in about thirty days.

These greenhouses add considerably to the facilities of these two departments. They will relieve the congestion in the one that is being used at present by the Botany, Agronomy, and Soil Fertility Departments.

The old greenhouse will be used by the Botany and other teaching departments. Both of the new ones will be used in research work, one by the Soil Fertility Department in the study of the soil, and the other by the Plant Pathology Department in the study of diseases.

With these added facilities, experiments can be made more speedily. Instead of being able to work only three or four months out of the year, the members of this department can now make experiments twelve months out of the year. Students in Plant Pathology and Physiology will get more experience now, also.

CONSTRUCTION NOISES DISTURB DREAMS OF SLEEPING STUDENTS

After a few days of very cold weather, during which time the work on the new building ceased, the banging of hammers, slamming of boards, and clanking of brick can be heard about the campus from the early morning until the late afternoon.

"What do you say to a little kiss?" "I prefer a big one."

EIGHT FRATERNITY GAMES PLAYED WEDNESDAY NIGHT

Kappa Alpha's Win Over Phi Pi Phi's By One Point Margin

Inter-fraternity basketball got under way Wednesday night when the Kappa Alpha team won from the Phi Pi Phi's and the Phi Kappa Tau's defeated the team representing the Phi Omega fraternity.

The Kappa Alpha team, led by Arthur and Ward, succeeded in winning over their opponent, Phi Pi Phi's, by one point, the score being 15-14. Combs and Clark furnished the best opposition for the losers. At the half-way time the score was 8-1 for the losers, but they were unable to score but 6 points in the last half, while the winners piled up 14.

The Phi Kappa Tau-Phi Omega game was lacking in excitement. The former team won, 13-4. Rutter, for the losers, scored all four points for his team, while Crum and Nelson were the shining lights for the winners.

At eight o'clock the Phi Kappa Alpha team met the Tau Rho Alpha five, and judging from the score it would seem that the former had the ball but very little, as they were defeated, 38-4. Moss, for the Tau Rho Alpha team, accounted for 20 of their points, while McIntyre shot 8. Dunn made 3 for the losers.

At the same hour, in a much better game, the Alpha Gamma Rho five bested the team representing Sigma Tau Beta by the score of 21-18. Floyd made 6 points for the winners, while Johnson made 8 for the losers.

ANNOUNCEMENT RECEIVED OF THE PROMOTIONS OF TWO TEXTILE GRADUATES

Those people interested in the N. C. State Textile School will be glad to hear of the promotions of two of its graduates.

A. B. McCormick, class of '20, who has been superintendent of the County Moon Mills at Hemp, N. C., has recently accepted a position as superintendent of the Yarborough Mills at Durham, N. C. The Yarborough Mills is a fancy-goods mill which makes a variety of fancy shirtings.

Bill O'Brien, class of '25, who has been traveling for Stine, Hall & Co., New York City, has been elected manager of the O'Brien Hosiery Mills, which were recently organized in Winston-Salem, N. C.

**APPOINT COMMITTEES FOR ST. PATRICK'S DAY AFFAIR**

**Engineers' Council Makes Progress in Preparations For March 17 Celebration**

The Engineers' Council is making rapid progress towards a gala celebration St. Patrick's Day, March 17. A number of committees have been appointed to assist in the planning and work for this day. A committee has been appointed for the Engineers' Brawl, which is to be given on the night of March 17, in the gymnasium. Another committee has been appointed to see that every department of the Engineering School has an adequate display to put on exhibition and a similar group is seeing to it that each department has a float. This committee has also interviewed the automobile agencies in Raleigh in an attempt to get cars for the parade. The results were very encouraging. In order to make St. Patrick's Day a

state-wide celebration there is a movement on foot to ask the presidents of the alumni societies of engineers in North Carolina to call a meeting of their respective societies and have some sort of celebration in honor of our first engineer. St. Patrick was our first engineer and is the greatest one the world has ever known. It has been a custom of most of the engineering schools in the United States to celebrate this day. The celebration of this day at State College began last year, and it is hoped this will become a yearly occurrence.

"The Gay Retreat" is the happy title of Fox Films' war comedy coming to the State Theatre for a two-day run, beginning Monday, along with five excellent acts of Keith Vaudeville.

And the story is just what the title suggests—a hilarious picturization of the adventures of three chaps who start out with the wrong outfit—"A. W. O. L."—and who go through the entire war in the same condition. The plot is unique, the situations novel, and the cast exceptional.

Here's a new form of emotional inspiration for screen acting—a portable phonograph and a ukulele. It was to the strains of these that William Haines played some of his best scenes at West Point, where his new Metro-Goldwyn-Mayer starring vehicle, "West Point," coming to the State Theatre Friday and Saturday, was filmed.

In the scenes taken in the dormitories at the United States Military Academy there was not room for the usual studio orchestra. William Bakewell, one of the actors in the cast, however, had a portable phonograph, and was a ukelele virtuoso—and he offered both his machine and his talent.

In the close scenes the phonograph wheezed and Bakewell twanged—and the inspiration music welled forth in grand shape. It saved the day.

"Prominent among the featured cast of "Painted Ponies," which will be presented Monday and Tuesday at the Capitol Theater, is "Slim" Summerville, who has played comedy-relief parts in many of Hoot Gibson's popular western releases.

Summerville is acknowledged to be one of the most versatile screen actors of today. Although it is true that he is best known for his comedy roles, he has not been neglected for more serious parts. A veteran of many years experience in the movies, this elongated celluloid comedian has written and adapted scores of stories for the films and is a director of established ability.

Art Goebel, one-time holder of the world's record for upside-down flying, plays an important role opposite Al Wilson, who stars in "The Air Patrol," the Universal Western aerial melodrama showing Thursday at the Capitol Theatre. A bit of the sensation derived from this thrilling script may be gained from his descriptive version.

"There is very little danger in flying upside-down in the plane is taken to a high altitude before the feat is attempted," said Goebel. "Turning the plane over as is commonly done in the 'loop' is the first step, but after the ship is upside-down the wings are brought to the horizontal position and the plane runs along exactly as when right-side up. It descends very rapidly, however, and it is quite impossible to hold it in that position any great length of time. The record has been smashed a number of times unofficially, but the latest official record is held by a French air ace. It is four and one-half minutes."

Manager J. Noble Arnold of the Superba Theatre announces the coming of the Warner Bros. production, "Sailor Izzy Murphy," with George Jessel, next Monday for a run of two days. This is said to be the most uproariously amusing of all sea stories, detailing the amorous adventures of one Izzy Goldberg, perfumery salesman. Jessel's unflinching solemnity adds to the portrayal of the character of the young man whose haps and mishaps include being booted off the door-mat by the irate father of the lady of his dreams; wild pursuit of that worthy with the determination to get damages for the indignity to his person.

(Continued from page 1)  
Terrors. He did some excellent offensive work. The State defense was featured by Warren and Johnson. Captain McDowell has not yet hit his last season's stride, but nevertheless his presence is felt. The work of Drew and Martin on the defensive for the visitors was good.

**Red Terrors Split Double Bill With S. C. Gamecocks**

(Continued from page 1)  
night, was unable to get loose tonight, as two South Carolina men clung to him like leeches. McDowell was likewise successfully held in check, though his guarding was very good. The floor-work of Johnson for the visitors was a feature of the game.  
Holcombe, for South Carolina, led the scoring for the night, sinking six goals from the floor and making one free shot for 13 points.  
Farr, at guard, also played a pretty game for the home team.

ture until it is ready to go to the spinning room, where it is turned into thread, there assuming for the first time a fibre-like appearance. After this it is wound into skeins and put into bundles, and is then ready for shipping to the mills.  
The finished fibre sells for approximately twenty-five per cent of the price of silk, according to Dr. Nelson. It is used for making a great variety of fabrics, and is especially useful for decorative and novelty work when used with cotton and other fabrics.

**Col. Harrelson to Have Charge of New Command**

(Continued from page 1)  
1918, and discharged from the army in August, 1919.  
In the same month of his discharge Colonel Harrelson was reappointed a lieutenant-colonel in the Coast Artillery section of the Reserve Corps and was promoted to the rank of colonel in January, 1923. Until the time of his recent transfer to the Field Artillery he held the distinction of being the senior colonel in the Coast Artillery Reserve Corps of the Fourth Corps Area.  
Colonel Harrelson has held many posts of responsibility and distinction, both during and since the World War. During June, July, and August, 1918, he was in command of the first group command, the chief gunnery officer, and in charge of the post officers' school at Fort Caswell, North Carolina. After the war he served on the board which relocated all of the National Guard and Reserve Corps units now assigned to the State of North Carolina. He is now a member of the National Council of the Reserve Officers' Association of the United States and past president

**of the Raleigh chapter of the Reserve Officers' Association.**

**MOVING PICTURE SHOWS MANUFACTURE OF CEMENT**

A motion picture concerning the modern manufacturing process and uses of cement was shown in the Y. M. C. A. auditorium Monday evening at 6:45. This picture was pro-

duced by the United States Bureau of Mines to create interest among students of America's leading engineering institutions in one of our most modern structural utilities. This film, Manufacturing and Uses of Cement, which was secured for State College by Dr. E. E. Randolph, of the Chemical Engineering Department, was of general interest among the engineering school.

## SOCIAL ACTIVITIES

**Saints' Dance**  
The annual dance given by the Junior Order of Saints will be held in the Frank Thompson Gymnasium on February 18. This dance is always one of the best given during the year and is well attended. The music for the dance will be furnished by the University Club Orchestra.

The membership in this order is limited to the junior and senior classes and to the members of the leading national fraternities. The following Juniors were initiated this year: Henry Stokes, Phi Gamma Delta; Bob Shepard and Hank Young, Sigma Nu; R. M. Tyson, Sigma Pi; George

Howard, Phi Kappa Tau; J. W. Black and Dick Crisp, Kappa Sigma; Gus Bailey, Kappa Alpha; Mack Greaves-Walker, Sigma Pi; M. G. Finch, Sigma Phi Epsilon; Roddy Fields, Sigma Chi; Nick Loughlin, Chi Tau, and Jimmy Griffin, Pi Kappa Alpha. The senior members are as follows: Don Childress, Alpha Delta Phi; Joe Foll, Phi Gamma Delta; Clarence Ridenhour, Kappa Sigma; Bents Howard, Phi Kappa Tau; Jimmy Mayfield, Sigma Pi; Joe Cobb, Kappa Alpha; John Dunn, Pi Kappa Alpha; Pop Williams, Sigma Nu; Howard White and Hilliard Carr, Sigma Phi Epsilon.

**Delta Alpha Sigma Dinner**  
The Delta Alpha Sigma fraternity, which is the local architectural fraternity, was host at a dinner Wednesday evening, given in honor of Mr. Christen, who was investigating the local chapter as a representative of the Alpha Rho Chi fraternity. The Alpha Rho Chi fraternity is a national architectural fraternity which was founded in the central western section of the United States. At the present the chapter closest to North Carolina State is at the University of Virginia.

In response to a petition submitted by the local fraternity, the Alpha Rho Chi fraternity is now conducting an investigation to determine the eligibility of the local chapter.

The dinner proved to be a wonderful success in every respect. Following the dinner, short talks were made and a round-table discussion held.

Those attending the dinner were W. A. Cox, Jr., J. M. Wooten, C. Z. Bailey, E. W. Kearney, G. M. Inscoc, H. L. Sullivan, C. W. Connelly, J. M. Browning, M. G. Norman, Professor J. D. Paulson, Professor R. E. Shumaker, and L. H. Christen, in whose honor the dinner was given.

**German Club Dance Tonight**  
The German Club will give a dance tonight from nine till twelve at the Frank Thompson Gymnasium. This is the first dance to be given by the German Club since the mid-winters, so extensive preparations are being made in order to cause the dance to be a most successful and enjoyable one.

**Delta Sigma Phi to Move**  
The Delta Sigma Phi fraternity has obtained the house left vacant by the Kappa Alpha fraternity. A number of repairs are now being made on the house, and as soon as they are

completed, the Delta Sigma Phi's will be at home on 2607 Vanderbilt Avenue.

R. B. Trogden and Johnnie Ford attended a house party at Greensboro, N. C., last week-end.

J. L. Cooper and Burgess Perry were at the Benvenue Country Club dance last Saturday in Rocky Mount.

Ted Smith spent the week-end with his parents in Greensboro.

J. L. Stone visited his people in Nashville, N. C., last week.

Mr. "Hub" Sullivan motored to Asheville last week-end.

### C. W. Sheffield Selected To Teach New Course Here

C. W. Sheffield, a native of Randleman and a State College graduate, has been selected by the college to instruct Standards of Inspections. This is a new course for the college.

Mr. Sheffield is a graduate of the class of '26 and is a member of the Alpha Gamma Rho fraternity.

While in college he made a splendid record as a student. Since graduation he has been with the Federal and State Inspection service, traveling from place to place, all over the South.

Mr. Sheffield's office is in Ricks Hall and he may be found there or at the Alpha Gamma Rho fraternity house on Hillsboro street.

### Theta Kappa Nu Suffers Large Loss Caused By Bursting Water Pipes

Due to an oversight on the part of the last men leaving the house, the local chapter of Theta Kappa Nu fraternity suffered a severe financial loss, through the freeing up of their heating and water system.

Most of the fraternities living in houses delegated the last man who left the house for Christmas holidays to see that the water was turned off and that the heating system was drained. However, the "O. K." boys evidently forgot to appoint an official drainer of pipes, because when they returned on January 4, they found things in bad shape. Practically every water pipe and radiator had frozen and burst, and with the sudden warm weather, had thawed out and wet portions of the house. The boys immediately got in touch with a local plumbing concern, who consented to do a rush job for them. Within a week the house was completely equipped with a new furnace and heating system; also a new set of water pipes.

### "PETTING" IS SUBJECT OF AGRICULTURAL CLUB DEBATE

With their faces wreathed in smiles and their ears intent to hear every word that was said, the members of the agricultural club heard a program that was a coming of wit and humor last Tuesday night in Patterson Hall.

O. R. Lineberger, who was the first on the program, discussed ways of improving the club. He stated that interest in the club could be awakened and kept alive by learning its purpose and by giving it more publicity.

The next number on the program was a debate. The subject was, "Resolved, That this club deprecates promiscuous petting." D. H. Moody and J. D. McCall represented the affirmative side of the question, while T. L. Moose and F. S. Sloan defended the negative side of the proposition. The affirmative side based their argument on the assumption that excessive petting was detrimental to college work. The negative contended that unless a person practiced petting, he could not compete successfully with other men who practice this sort of thing. The popular vote was four to five in favor of the negative.

T. C. Andrews and J. C. Cathey gave brief but interesting accounts of their recent trip to New York. They, along with Albright and Raper, represented State College in the poultry judging contest at Madison Square Garden.

### State Wrestlers Defeat Generals On Virginia Trip

(Continued from page 1)

decisions. The 158-pound bout was a draw.

**Summary:**  
115-pound class—Woodward (V. M. I.) won by decision over Hobbs (N. C. S.). Time advantage, 3:10 minutes.  
135-pound class—Field (V. M. I.) won by decision over Frisbie (N. C. S.). Time advantage, 6:32 minutes.  
125-pound class—Captain Leary (N. C. S.) won by decision over Thomson (V. M. I.). Time advantage, 5:06 minutes.

158-pound class—Rugh (V. M. I.) and Morris (N. C. S.) wrestled to a draw in two extra periods.  
175-pound class—Captain Woodbury (V. M. I.) threw Choplin (N. C. S.) with half-Nelson and body hold. Time, 7:01 minutes.

Unlimited class—Haase (V. M. I.) threw Crowson (N. C. S.) with body holds. Time, 4:22 minutes.

Referee: Zimmerman, Oberlin.

### TWO SHORT COURSES ARE BEING OFFERED THIS WEEK

#### Beekeeping, Marketing, and Production of Poultry Open to All Farmers

The Poultry Department and the Department of Entomology gave their annual short courses this week. The former is a course in all phases of the production and marketing of poultry and eggs; the latter a course in beekeeping.

These courses have been given for several years at State College and are open to all farmers.

The poultry short course consisted of a series of lectures by the poultry staff and the poultry extension men every day, beginning Monday and running through Friday. Also visits to the college poultry plant and some commercial plants around Raleigh were made, with a study of houses and layouts as the object.

There were meetings of the Poultry Association at seven evening. Saturday the final event is the Judging Contest, and the winner gets a silver loving cup.

The beekeeping short course is much shorter. It did not begin until Thursday, but it followed closely the plan of the poultry course.

Some features of the course were talks by men like H. H. Root, of Medina, Ohio, a beekeepers supply manufacturer; Dr. B. W. Wells, of the Botany Department, and A. D. Hiatt, of Watertown, Wis.

There was also a honey judging con-

test Saturday, the winner of which was awarded a silver cup.

The State Beekeepers Association held a business meeting and a round-table meeting in conjunction with the course.

### Finds Right Tobacco for the Tropics

October 6, 1926  
Larus & Bro. Co.  
Richmond, Va., U. S. A.

Gentlemen:  
Most all well-known tobaccos smoke well in a cold or temperate climate, but very few in a tropical climate. They are mostly too heavy, don't seem to be blended right—at least that is my opinion gained from practical experience.

However, Edgeworth is the same in any climate. Again that is my opinion gained by practical experience.

I cannot get the same pleasure out of any brand of tobacco that I can out of Edgeworth, and I have tried many—and paid fancy prices, too. It costs real money to smoke imported tobaccos here; the import duty is very high.

Anyway, we cannot have everything we would like in these countries, so we hold on to all the little pleasures possible. Now you know why I smoke Edgeworth.

Yours respectfully,  
R. C. Rigg  
Cortagraph, Columbia, S. A.

**Distinguished by a favor that places it first.**  
It is a natural pride that Camel feels for its triumphs. Not only did it lead the field shortly after its introduction. It passed steadily on with each succeeding year until today it holds a place in public favor higher than any other smoke ever reaped. Camel is supreme with modern smokers.  
Obviously, there is a quality here that particular smokers appreciate. It is indeed the myriad qualities of perfection that are to be found in the choicest tobaccos grown. And the art of Nature is aided by a blending that unfolds each delicate taste and fragrance.  
You will more than like Camels. You will find a solace in them every smoking hour. Their mildness and mellowness are an endless pleasure.
